	10,814	10,898		

The management of the American, like that of the English railroads, is entirely in private hands. Their concerns are managed by corporations, chartered by the respective states, and having for officers a president, secretary, and directors. Each of the directors must be a stock-holder. The president and secretary have liberal salaries, but the services of directors are gratuitous. The rate of railroad speed in America is not so great as in England. The ordinary velocity of a passenger train is 20 m. an hour, though on some lines it is as great as 28 and 30 m. Special trains frequently keep up a speed of 45 m. an hour for a long distance, and on one road, that from New York city to Albany, 40 m. an hour is the average rate for all passenger trains. In New England the average price per mile in the first class is about a penny; the second class throughout the country is only used by railroad labourers, emigrants, negroes, and other persons of the same class. From New York to Boston the fare is about one penny farthing per mile; from New York to Philadelphia about a penny three farthings; and from Philadelphia to Baltimore, three halfpence. From New York to Cincinnati the distance is 367 m., of which 143 m. are travelled by steam-boat. The price of passage for the whole distance is about £3 6s. 8d. The lines between Baltimore and Cincinnati, 650 m. in length, will shortly be opened, and the fare will be £2 14s. 3d.

[*Electric telegraph.*] Several of the states of the Union are completely interlaced by electric telegraphs, which are more numerous than rivers or railroads. Every leading city or town has a telegraph office or agency, and even the children at the public schools are taught the principle of this remarkable discovery and its various applications. The first telegraph line established in the United States was Morse's, in May 1844, between Baltimore and Washington, and an appropriation was made by congress to test the practical operation of the invention. There are now 17,500 m. of telegraph working under the Morse patent, and between 9,000 and 10,000 m. otherwise. A telegraph to the Pacific is contemplated, to start from Natchez, Mississippi, through Texas, crossing the gulf of California to San Diego, and thence up the coast to Monterey and San Francisco. When a steamer arrives from Europe in the morning, whether at Halifax, Boston, New York, or Philadelphia, the news she brings is published on the same day in every principal city in the Union.

[*Population of North America.*] If the aboriginal population be rapidly declining, the superinduced European pop. is proportionally increasing. It was provided by the constitution that the first census of the U. S. should be made "within three years after the first meeting of congress, and within every subsequent term of ten years, in such manner as they shall by law direct." The first census was accordingly taken in 1790, and the seventh in 1850. In the first census the whole pop. of the U. S. was divided into only five classes, in which the total amount of the several classes was as follows:—

1. Free white males under 16 years,	802,127
2. Do do. of 16 years and upwards,	813,365
3. Free white females,	1,556,626
4. All other free persons except Indians not taxed,	69,511
5. Slaves,	697,697
Total,	3,929,328

In the first three enumerations "all other free persons except Indians not taxed" were thrown into one mass, without distinction of age or sex, and the same course was adopted respecting the slaves; but in the fourth census each sex of both these descriptions of persons was distinguished, according to age, into four classes, and each sex of the free white inhabitants was divided, as in the second and third censuses, into five classes; and in addition, the number of free white males between 16 and 18 years was exhibited in a distinct column. Persons engaged in agriculture, commerce, and manufactures, were also distinguished into three several classes; and "foreigners not naturalized" formed an additional class. Since the census of 1840 there have been added to the territory of the republic, by annexation, conquest, and purchase, 833,970 sq. m.; and its title to a region covering 341,463 sq. m., previously claimed and occupied by a foreign power, has been established by negotiation, and it has been brought within the acknowledged boundaries of the Union. By such means the area of the U. S. has been extended during the past ten years from 2,055,163 to 3,230,572 sq. m., without including the great lakes or the bays which indent the Atlantic and Pa-

cific coasts. It is estimated that these new territories brought into the Union, at the time of their incorporation with it, 172,000 inhabitants. The total number of inhabitants in the U. S. was on the 1st of June, 1850, 23,263,488. The absolute increase from the 1st of June, 1840, was 6,194,035; and the actual increase per cent. 36.23; but the probable amount of population acquired by additions of territory should be deducted in making a comparison between the results of the present and the last preceding census. These deductions diminish the total pop. of the country, as a basis of comparison, to 23,091,488, and the increase to 6,022,035. The relative increase, after this allowance, is found to be 35.27 per cent. The aggregate number of whites in 1850 was 19,630,738, exhibiting a gain upon the number of the same class in 1840 of 5,484,933, and a relative increase of 38.28 per cent.; but, excluding the 153,000 free pop. supposed to have been acquired by the addition of territory since 1840, the gain was 5,281,933, and the increase per cent. 37.20. The number of slaves, by the census of 1850, was 3,204,089, which shows an increase of 716,733, equal to 28.81 per cent. If we deduct 19,000 for the probable slave pop. of Texas in 1840, the result of the comparison will be slightly different. The absolute increase will be 697,733, and the rate per cent. 28.05. The number of free-coloured in 1850 was 428,661; in 1840, 386,292. The increase of this class has been 42,369, or 10.96 per cent. From 1830 to 1840 the increase of the whole pop. was at the rate of 32.67 per cent. At the same rate of advancement the absolute gain for the ten years from 1840 to 1850, would have been 5,576,590, or 445,445 less than it has been, without including the increase consequent upon additions of territory. The aggregate increase of pop. from all sources shows a relative advance greater than that of any other decennial term, except that from 1800 to 1810, during which time the country received an accession of inhabitants by the purchase of Louisiana, amounting to something more than 1 per cent. of the whole number. Rejecting from the census of 1810 1.45 per cent. for the pop. of Louisiana, and from the census of 1850, 1 per cent. for that of Texas, California, &c., the result is in favour of the last ten years by about one-fourth of one per cent., the gain from 1800 to 1810 being 35.00 per cent., and from 1840 to 1850, 35.28. The decennial increase of the most favourite portions of Europe is less than $1\frac{1}{2}$ per cent. per ann.; with the U. S. it is at the rate of $3\frac{1}{2}$ per cent. According to past progress, viewed in connexion with that of European nations, the pop. of the U. S. in 40 years will exceed that of England, France, Spain, Portugal, Sweden, and Switzerland combined. The relative progress of the several races and classes of the population is shown in the following statement:—

INCREASE PER CENT. OF EACH CLASS OF INHABITANTS IN THE UNITED STATES FOR 60 YEARS.

Classes.	1790 to 1800.	1800 to 1810.	1810 to 1820.	1820 to 1830.	1830 to 1840.	1840 to 1850.
Whites.	35.7	36.2	34.19	33.95	34.7	38.28
Free coloured,	82.2	72.2	35.25	34.85	30.9	10.96
Slaves,	27.9	33.4	39.1	30.61	23.8	28.81
Total coloured,	32.2	37.6	28.58	31.44	23.4	26.41
Total,	35.01	36.45	33.12	33.48	32.67	36.28

This is a view officially put forth by an officer of the American government of the past and probable future progress of the country. Mr. Darby, a writer of some reputation upon statistics in the United States, assumes the average annual increase of the pop. as equal to 3 per cent. If the ratio of increase be taken at 8 per cent. per ann., the pop. doubles in about 24 years; therefore, if no serious disturbing

influence should interfere with the natural order of things, the aggregate pop. of the U. S., at the close of this century, must be over 100,000,000.

The following table shows the increase of pop. from 1790 to 1850, without reference to intervening periods:—

	1790.	1850.	Absolute Increase in 60 years.	Increase per cent. in 60 years.
Whites,	3,172,464	19,630,738	16,458,274	518.78
Free coloured,	58,466	428,661	369,195	629.85
Slaves,	697,897	3,204,089	2,506,192	359.10
Total free, coloured,	757,363	3,632,750	2,875,387	379.65
Total,	3,929,827	23,263,488	19,333,661	491.97

Sixty years since, the proportion between the whites and blacks, bond and free, was 4.18 to 1. In 1850, it was 5.4 to 1, and the ratio in favour of the former race is increasing.

The following remarks upon the comparative advances of population in the U. S. and Great Britain accompany the census report of 1852:—"During ten years the pop. of the entire kingdom of Great Britain and Ireland increased from 26,833,496 to 27,452,362, or at the rate of a little more than half-a-million in 10 years. In the last 50 years England and Wales increased 102 per cent. (males 105, females 97.50), and Scotland 78 per cent. (males 84, females 78). The pop. of the U. S., during the past 50 years, has increased at the rate of 337 per cent., and in 10 years intervening between the last two censuses it increased from 17 and a fraction millions to over 23,000,000, or 86 per cent. During the same period (leaving Ireland out of view) the pop. of Great Britain increased at the rate of 12 per cent. during 10 years, or $1\frac{1}{10}$ per cent. per annum." The comparative house-accommodation of the people in the two countries are described in the subjoined statements: "By the last census it appears that in the U. S. the number of houses occupied by free persons amounted to 3,363,427. It would seem from the British reports that the pop. of that country is supplied with houses almost in the precise proportion as in our own country. In comparing the pop. of Great Britain and Ireland with the inhabited houses, it appears that the whole number of houses in Great Britain amounts to 3,669,437, being nearly one house to each 6 persons; and that in Ireland the number of inhabited houses amounts to 1,047,735, being in the proportion of two houses to each 13 persons."

The density of the pop. of the country at large and of its several parts is thus given: "Taking the 31 states together, their area is 1,486,917 sq. m., and the average number of their inhabitants is 15.54 to the sq. m. The total area of the U. S. is 3,230,572 sq. m., and the average density of pop. is 7.2 to the square mile."

From the most authentic data in possession of the public departments, the following table has been prepared:—

TABLE OF THE AREA AND THE NUMBER OF INHABITANTS TO THE SQUARE MILE IN EACH STATE AND TERRITORY IN THE UNION:—

States.	Area in sq. m.	Population in 1850.	Number of inhabitants to the sq. m.
Maine.	30,000	563,188	19.44
New Hampshire.	9,280	317,964	34.26
Vermont.	10,213	314,120	30.77
Massachusetts.	7,800	994,499	126.11
Rhode Island.	1,306	147,544	108.66
Connecticut.	4,674	370,791	79.53
New York.	46,000	4,097,394	67.96
New Jersey.	6,320	489,333	60.04
Pennsylvania.	46,000	2,311,788	50.23
Ohio.	39,946	1,980,406	49.55
Indiana.	33,909	968,416	28.57
Illinois.	55,405	851,470	15.37
Iowa.	50,914	192,214	3.77

Wisconsin,	53,924	305,191	5-45
Michigan,	56,943	397,654	7-07
California,	188,942	165,000	-87
Minnesota Territory,	83,000	6,077	-07
Oregon Territory,	341,463	13,293	-04
New Mexico Territory,	319,774	61,547	-28
Utah Territory,	187,923	11,280	-06

Total Free states and Territories,	1,474,993	13,419,130	
------------------------------------	-----------	------------	--

States.	Area in sq. m.	Population in 1850.	Number of inhabitants to the sq. m.
Delaware,	2,120	91,836	43-64
Maryland,	9,846	583,686	62-81
District of Columbia,	60	51,687	861-46
Virginia,	61,351	1,421,681	23-17
North Carolina,	45,000	863,903	19-30
South Carolina,	34,500	663,507	27-23

Kentucky,	37,690	993,406	26-07
Missouri,	67,380	682,043	10-12

Total Slaveholding states,	844,115	9,688,223	
----------------------------	---------	-----------	--

From the location, climate, and productions, and the habits and pursuits of their inhabitants, the states of the Union may be properly arranged into the following groups.

	Area in sq. m.	Pop.	No of inhabitants to sq. m.
I. New England states, (6)	63,272	2,728,106	43-11
II. Middle states—including Maryland, Delaware, and Ohio, (5)	151,760	3,553,713	56-26
III. Coast Planting States—including South Carolina, Georgia, Florida, Alabama, Mississippi, and Louisiana, (6)	286,077	3,587,372	12-43
IV. Central Slave states—Virginia, North Carolina, Tennessee, Kentucky, Missouri, Arkansas, (6)	309,210	5,167,276	16-71
V. North-Western states—Indiana, Illinois, Michigan, Wisconsin, and Iowa, (5)	260,295	2,734,745	10-22
VI. Texas,	327,321	212,592	-69
VII. California,	188,983	165,000	-87

The ratios of increase in which the several classes of the pop. of the U. S. have advanced is shown in the following statement of population by classes decennially, from 1790 to 1850 inclusive.

	1790.	1800.	Inc. p. ct.	1810.	Inc. p. ct.
Whites,	3,172,464	4,304,489	35·7	5,862,004	36·2
Free coloured,	59,466	108,395	82·2	186,446	72·2

---------------------------------------	-----------	------	-----------	-------

[Immigrants.] The reports of the registrar-general show the departure from Liverpool and other British ports of 630,861 persons for the U. S. during the years 1848, 1849, and 1850; but the American returns indicate the arrival of only 341,000, exhibiting a disparity in the accounts of 29,000 during those three years, of 11 to 14 per cent. After a careful investigation of authentic records, and making due allowances for the imperfections of official returns, the following statement of immigration into the U. S. from all the rest of the world, since the date of the first census up to that of the last, a period of 60 years, has been prepared:—

Number of foreigners arriving from 1790 to 1810,	120,000
Natural increase, reckoned in periods of 10 years,	47,560
Number of foreigners arriving from 1810 to 1830,	114,000
Increase of the above to 1820,	19,000
Increase from 1810 to 1820 of those arriving previous to 1810,	53,450
Total number of immigrants and descendants of immigrants in 1830,	359,010
Number of immigrants arriving from 1830 to 1850,	903,979
Increase of the above,	36,728
Increase from 1830 to 1850 of immigrants and descendants of immigrants in the country in 1830,	134,130
Total number of immigrants and descendants of immigrants in the U. S. in 1830,	782,847
Number of immigrants arriving from 1830 to 1840,	778,500
Increase of the above,	185,150
Increase from 1830 to 1840 of immigrants and descendants of immigrants in the U. S. in 1830,	364,445
Total number of immigrants and descendants of immigrants in the U. S. in 1840,	1,900,842
Number of immigrants arriving from 1840 to 1850,	1,542,850
Increase of the above at 12 per cent.,	185,152
Increase from 1840 to 1850 of immigrants and descendants of immigrants in the U. S. in 1840,	722,000
Total number of immigrants into the U. S. since 1790, living in 1850, together with their descendants,	4,350,984

The inter-migration of the native citizens among the states is a branch of the general inquiry embracing the nativity of the inhabitants, which is curious and interesting. It is found that out of 17,736,792 free native inhabitants, 4,112,453 have migrated and settled beyond the states of their birth. Of white natives of Virginia, 335,000, equal to 26 per cent. of the whole, have found homes beyond her borders. S. Carolina has sent forth 168,000, which is 36 per cent. of all native white citizens of that state, and is equal to 59 per cent. of all remaining in the state of their nativity. This is the highest proportion observable in the statistics of any of the states. N. Carolina has lost by emigration 261,316 free inhabitants, equal to 31 per cent. Among the Northern states Vermont and Connecticut have contributed most largely, in proportion to their total pop., to the settlement of other parts of the country. This roving tendency of the American people is incident to the peculiar condition of their country. When the fertile plains of the West shall have been filled up, and men of scanty means cannot by a mere change of location possess themselves of homesteads, the inhabitants of each state will become comparatively stationary.

[Nativity of the Population.] The British colonies in America, forming the original 13 states, were settled by emigrants, a large proportion of whom were natives of Great Britain. No considerable emigration of Celtic Irish, or other people of Celtic origin, took place until after the commencement of the present century. The New England states, New Jersey, Pennsylvania, Delaware, Maryland, Virginia, North Carolina, South Carolina, and Georgia, were mainly settled by Englishmen. New York, the only Dutch colony, passed under British dominion, with a small pop., partly Dutch and partly English, in 1674. A few Dutch, Germans, and Poles settled in New Jersey; a few Swedes in Delaware, many Germans in Pennsylvania, where they afterwards became one-third of the pop.; and some French Protestants, called Huguenots, in New York, New Jersey, and South Carolina. Besides the small Polish colony in New Jersey, another branch of the Slavonic race was represented by a colony of a few Moravians and Bohemians in Pennsylvania. With the exception of a few Scotch Highlanders who settled in North and South Carolina and Georgia, no Celtic colony is to be found among the settlements in the British North American colonies of either the 17th or 18th centuries. Settlements of Lowland Scotch and Scotch Irish from the north of Ireland were made in Pennsylvania

and the Carolinas, and a small number of Irish Protestants settled in the town of Londonderry in New Hampshire. The considerable numbers of Irish Protestants from Ulster and other parts of Ireland, of Lowland Scotch and not of Celtic origin, who have, from time to time, emigrated to the U. S., have led to error in investigating the elements of American pop.; but no considerable Celtic element existed in the pop. of America previous to the census of 1790. The Welsh, considered by some as Celts, furnished a small proportion of the early emigrants to British America. There were a few Welsh colonies in the U. S., in the last century, where the emigrants retained their language, manners, and customs. Such is the county of Cambria, in Pennsylvania, and some smaller settlements in New York and other states. It is probably fair to estimate the Welsh element in the present pop. of the United States at 500,000. The greater proportion of the Jewish race now found in the U. S. is of recent emigration. Of the free inhabitants of the U. S., 17,737,505 were, according to the census of 1850, natives of its soil, and 2,210,826 were born in foreign countries, while the nativity of 39,014 could not be determined. It is shown that 1,965,618 of the whole number of foreign-born inhabitants were residents of the free states, and 345,310 of the slave states. The persons of foreign birth formed 11.06 per cent. of the whole free pop. The countries whence have been derived the largest portions of these additions to its population appear in the following statement:—

Natives of Ireland in the U. S. in 1850,	961,719
... Germany,	573,325
... England,	278,675
... British America,	147,700
... Scotland,	70,550
... France,	54,069
... Wales,	28,863
... All other countries,	95,022

2,210,826

The proportion in which the several countries above-named had contributed to the aggregate immigrant pop. was as follows:—

Ireland,	45.64 per cent.
Germany,	25.09
England,	12.06
British America,	6.68
Scotland,	3.17
France,	2.44
Wales,	1.34
Miscellaneous,	4.47

By scanning the foregoing statement respecting the nativity of the foreign pop. of the Union, it will be seen that 1,488,507, or 67 per cent. of its whole amount, are natives of the British islands and the British American provinces. The following classification of the inhabitants of the United States, according to their origin, was made by an intelligent commentator upon the census returns:—

Descendants of the European colonists previous to 1776,	14,260,865
Ditto of people of Louisiana, Texas, and other acquired territories,	1,000,000
Immigrants since 1790 and their descendants,	4,350,934
Descendants of Africans,	3,626,961

Total, 22,238,700

Rate of mortality. For general estimates, adopting the current classification of the states, the American census exhibits the following ratios of mortality, disregarding the ages at death:—

	Annual deaths per cent.	Ratio to the number living.
New England states,	1.55	1 to 64
Middle states, with Ohio,	1.39	1 73
Central slave states,	1.38	1 73
Coast Planting states,	1.37	1 73
North-Western states,	1.24	1 80
Total,	1.38	1 73

The values for the three middle divisions agree with the average for the U. S. as a whole, representing one death to 73 living. It is stated in the report for 1851, that the statistics of mortality for the census year represent the number of deaths occurring within the year as 320,433, the ratio being as one to 73.6 of the living, or as ten to each 736 of the population. The rate of mortality in this statement, taken as a whole, seems so much less than that of any portion of Europe, that it must at present be received with some degree of allowance. With respect to the longevity and vital characteristics of the slaves and free-coloured, the following epitome of life-tables is given on the expectation of life for coloured persons:—

Completed age.	New England.		Louisiana.	
	Coloured, Male.	Coloured, Female.	Coloured, Male.	Coloured, Female.
0	39-75	45-20	28-68	34-08
10	42-92	45-75	35-92	40-69
20	35-87	39-92	30-48	35-36
30	29-77	34-96	26-87	30-98

40	22-68	28-75	22-25	28-66
50	18-77	22-11	19-13	21-07
60	13-89	17-61	14-75	16-77
70	9-42	13-06	11-23	10-98
80	6-44	7-87	8-28	6-16
90	3-69	4-61	3-43	3-34

Deaf, Dumb, Blind, Idiotic, and Inane. It appears from the census of 1852, that there is one insane person for every 2,464 of the whole free pop.; one idiot in every 2,087 persons; one deaf and dumb person for every 3,353; and one blind person for every 4,705. These calculations are made only for the free persons born in the states in which they resided when the census was taken. To include the whole number would be unfair to those states whose benevolent and well-regulated institutions for the afflicted have attracted many from other states not possessing similar advantages, and a large number are foreigners. Rhode Island has the greatest number of insane persons, New Hampshire the greatest number of idiots, Connecticut the largest number of deaf and dumb, and Delaware the most blind persons in proportion to their respective population, while the western states and territories are almost exempt from these objects of sympathy and philanthropy. It also appears that one slave is deaf and dumb out of every 6,553 of the slave pop.; one blind in 2,646; one insane in 11,611; one idiotic in 3,081. Delaware has the greatest proportion of deaf and dumb; Virginia the greatest proportion of blind; district of Columbia the greatest proportion of insane; and Delaware the greatest proportion of idiots. A comparison of the proportion between the afflicted free and slave pop. shows a much greater number of deaf and dumb, insane and idiotic of the former, while the relative number of blind slaves far exceeds those of the free. The following table shows the comparative ratios:—

	Free pop.	Slaves.
Insane,	1 in every 2,463	1 in every 11,011
Idiotic,	1 in every 2,087	1 in every 3,083
Deaf and dumb,	1 in every 3,353	1 in every 6,553
Blind,	1 in every 4,705	1 in every 2,646

DEAF AND DUMB.	
Whole No. in U. S.,	Whites, 9,469, or 1 in 2,073
...	Free coloured, 145, or 1 in 2,354
...	Slaves, 489, or 1 in 6,553

BLIND.	
Whole No. in U. S.,	Whites, 7,997, or 1 in 2,454
...	Free coloured, 494, or 1 in 867
...	Slaves, 1,211, or 1 in 2,646

INSANE.	
Whole No. in U. S.,	Whites, 15,156, or 1 in 1,395
...	Free coloured, 321, or 1 in 1,335
...	Slaves, 291, or 1 in 11,011

IDIOTIC.	
Whole No. in U. S.,	Whites, 14,230, or 1 in 1,309
...	Free coloured, 436, or 1 in 963
...	Slaves, 1,040, or 1 in 3,081

The above aggregates and proportions show that the deaf and dumb and insane are the most numerous in the white pop.; the blind and idiotic among the free coloured; while the slaves are almost exempt from insanity and idiocy.

Indian tribes within the States. The most numerous and most important of the native tribes which still continue in the immediate vicinity of the whites, are those which occupy reservations in Georgia, the Floridas, Alabama, Mississippi, and Tennessee. The only tribes lately residing E of the Mississippi, who could aspire to the names of nations, were the Creeks, the Choctaws, the Chickasaws, the Cherokees, and the Seminoles. As a rule, the red man disappears before the superior moral and physical influence of the white. In Malte Brun's statement—furnished by his translator, and taken from *Nile's American Register* for June, 1823—the whole number of Indians then dwelling on the E side of the Mississippi was estimated at 120,346; those to the W of the Mississippi, as far as the Rocky mountains, and S to the Red river, were stated at 134,220. To the W of the Rocky mountains, the number was estimated at 171,800; and between the Red river and the Rio-del-Norte, at 45,370. Grand total, 470,000. On the first of December, 1837, Mr. C. A. Harris, commissioner of Indian affairs, laid the following calculations before congress, showing the number of Indians then E of the Mississippi; of those that had emigrated from E to W of that river; and of those within striking distance of the western frontier; also the estimated number of warriors they might collectively be able to bring into the field:—

I. TRIBES EAST OF THE MISSISSIPPI.

1st. Under treaty stipulations to remove W of the Mississippi.

Winnabagoes,	4,500
Ottawas of Ohio,	100
Potawatamies of Indiana,	2,950
Chippewas, Ottawas, and Potawatamies,	1,500
Cherokees,	14,000
Creeks,	1,000
Chickasaws,	1,000
Seminoles,	5,000

Apalachicola,	400
Ottawa, and Chippewas in the peninsula of Michigan,	6,500
	36,950

2d. Not under treaty stipulations to remove.

New York Indians,	4,176
Wyandots,	875
Miamies,	1,100
Miamonies,	4,000
Ottawa, and Chippewas of the lakes,	2,564
	19,415
Total,	49,365

II. NUMBER WHO HAVE EMIGRATED FROM THE E TO THE W OF THE MISSISSIPPI.

Chickasaws,	549
Chippewas, Ottawas, and Potawatamies,	2,191
Choctaws,	16,000
Quapaws,	476
Creeks,	20,437
Seminoles,	407
Apalachicola,	265
Cherokees,	7,911
Kickapoos,	568
Delawares,	836
Shawnees,	1,373
Ottawas,	874
Wons,	223
Piankashaws,	162
Ponies and Kaskaskias,	123
Potawatamies of Indiana,	53
Sauwaks,	351
Sauwaks and Shawnees,	211
Total,	51,327

III. NUMBER OF INDIGENOUS TRIBES WITHIN STRIKING DISTANCE OF THE W FRONTIER.

Stoux,	21,600
Iowas,	1,500
Sacs,	4,800
Foxes,	1,600
Sacs of the Missouri,	500
Onges,	5,130
Kansas,	1,606
Omahas,	1,600
Ottos and Missourians,	1,000
Pawnees,	12,500
Comanches,	19,200
Kieways,	1,800
Mandans,	3,300
Quapaws,	450
Minatarees,	2,000
Pagans,	30,000
Assinaboins,	18,000
Appaches,	20,380
Cree,	3,000
Arrepahes,	3,000
Gros Ventres,	16,800
Eutaws,	19,200
Crows,	7,200
Caddos,	2,000
Poncas,	900
Arikaras,	2,750
Cheyennes,	3,200
Blackfeet,	30,000
Total,	221,806

In 1854, the commissioner of Indian affairs reported that "the whole number of Indians within the U. S. limits was estimated at 400,000. About 18,000 yet linger in some of the states E of the Mississippi, principally in New York, Michigan, and Wisconsin; the remainder, consisting of Cherokees, Choctaws, and Seminoles, being in North Carolina, Mississippi, and Florida. The number in Minnesota, and along the frontiers of the Western states of Texas, comprising mainly emigrated tribes, is estimated at 110,000; those of the Plains and Rocky mountains, and not within any of our organized territories, at 63,000; those in Texas at 33,000; those in New Mexico at 45,000; those in California at 100,000; those in Utah at 12,000; and those in the territories of Oregon and Washington at 22,000." The aboriginal pop. does not exceed one person for every 20 sq. m.; it is constantly declining, and probably in the lapse of two centuries at most, the native races of this part of the continent will be extinct. From time to time they are bought out—to roam westward, "like bees whose hive has been destroyed." Besides this helpless state of things, the continual feuds between savages, their inordinate propensity for spirituous liquors, and the ravages of small-pox, are causes powerfully and constantly operating to diminish their numbers. The Cherokees alone have made considerable progress in the cultivation of their lands, and even in literature and the arts of civilized life. The Creeks have abundance of tame cattle, swine, and poultry; and cultivate tobacco, rice, maize, potatoes, beans, cabbage, melons, grapes, strawberries, and other fruits.

Slaves and Free Blacks. The taint of black slavery "is the plague-spot upon the social condition of the Americans;" for "be the blight of slavery more or less pernicious to its victim, it reaches the master caste as well as that of the slave." In the Northern and Middle states—where the numbers never were very great—a system of gradual emancipation was many years since adopted, which, by giving freedom, at a certain age, to the children born after a given date, has put an end to slavery in these districts. The slaves are chiefly to be found in the southern and south-western states, where the culture of the soil is similar to that of our West India islands. It is unlawful to import slaves from abroad into any part of the United States; but it is legal to transport them from one slave-state to another; and the northern plantations—which offer very few of the ordinary excesses for the employment of Negro labour, and where in many districts the land is so exhausted that the slaves cannot reproduce as much as they consume—are becoming a vast breeding-ground, on which blacks are reared for the express purpose of supplying the terrible demands of an internal slave-trade which is carrying on both by sea and land. "The Americans," says Captain Basil Hall, "are perpetually taunting England with having entailed slavery upon their country." But, as regards the validity of the plea of necessity, the whole case has completely altered its character since the acquisition of Florida and Louisiana, countries cultivated wholly by slaves; and still more, by the introduction of states into the Union, where no similar necessity for slave-cultivation, on account of climate, was ever pretended to exist, but where, nevertheless, slavery has been introduced by the solemn act of the legislature. A recent observer, Sir Charles Lyell, while he gives a uniformly favourable account of the condition of the slave pop. of the U. S., is favourable to Negro emancipation, and takes every opportunity to stand up for the improvidence of their mental faculties. "It is useless," he says, "now to look back and wish, for the sake of civilization, that no Africans had ever crossed the Atlantic. Their number in the Union now exceeds 3,000,000, and, as they have doubled in the last twenty-five years, we must expect, unless some plan can be devised to check their increase, that they will amount, before the close of this century, to 80,000,000, by which time the white pop. will have augmented to 80,000,000. Notwithstanding this increase of Negroes, were it not for disturbing causes, I should cherish the most sanguine hopes of their future improvement and emancipation, and even their ultimate amalgamation and fusion with the whites, so highly has my estimate of their moral and intellectual capabilities been raised by what I have lately seen in Georgia and Alabama." It had previously been imagined that an impassable gulf separated the two races; but now it is proved that more than half that space can, in a few generations, be successfully passed over, and the humble Negro of the coast of Guinea has shown himself to be one of the most imitative and improvable of human beings. Yet the experiment may still be defeated, not so much by the fanaticism of abolitionists, or the prejudices of those slave-owners who are called perpetualists, who maintain that slavery should be permanent, and that it is a blessing in itself to the Negro, but by the jealousy of an unscrupulous democracy invested with political power. The abolitionists of the North endeavour to bring the powerful lever of public opinion to act upon their brethren of the South; and at every meeting of congress they also try to make slavery a national affair in that body, though the spirit of the constitution guarantees to each state the integrity of its separate laws and institutions. The first Abolition society was established in Philadelphia in 1833. The balance of political power between the slave and the free states in congress is still too closely adjusted to afford any prospect of a speedy termination to Negro slavery by any measures that would not endanger the permanence of the union. In the senate every state has an equality of representation with every other; and the slave states are 15 in number, the free states 16. In the house-of-representatives the altered relations of pop. have increased the representatives of the free states by 3, and diminished those of the slave states by the same number since 1840. But there are other considerations to be taken into account besides the mere aggregate numbers of the representatives of slave states and free states. In the 32d congress, 8 of the old Atlantic free states will have fewer members by 20 than they had in the 27th, and 6 of the old Atlantic slave states by 25. On the other hand 6 of the new western free states will have more members by 20 in the 32d than they had in the 27th congress, and 6 of the new western slave states by 14. The old Atlantic states are becoming less powerful in the house-of-representatives; the more reckless pioneers of settlement in the far west are becoming more powerful there; and the ratio in which the representatives of the western free states are increasing exceeds that at which those of the western slave states are increasing even more than the ratio at which the representatives of the Atlantic slave states are decreasing. In a recent American journal, we find the following estimate of the number of the coloured race now believed to exist on this continent in slavery and in freedom:—

United States,	3,650,000
Brazil,	3,050,000
Spanish colonies,	1,470,000
South American republics,	1,180,000
British colonies,	750,000
Hayti,	850,000
French colonies,	270,000
Dutch colonies,	50,000

Danish colonies,	45,000
Mexico,	70,000
Canada,	35,000
Total,	15,370,000

Of these, 7,500,000 are in slavery in the United States, Brazil, and the Spanish and Dutch colonies; 350,000 are in progress of emancipation in the South American republics; and the remainder, 8,620,000, are free.

Physical characteristics.] The Americans are generally tall, with strong and well-proportioned frames, and fresh and ruddy complexions; but their features are said to want delicacy, and their physiognomy has little expression; the women have more of that delicate beauty which belongs to their sex, and generally have finer features and more expression in their countenances. They are mostly tall, with light and airy shapes, fine heads, and complexion of a dazzling whiteness. "Without participating," says Ward, "in all Mr Waterton's enthusiasm with regard to the American women, it is difficult for the most casual observer not to be struck with their appearance; nor do I know any part of the world, not even excepting England, where the display of female beauty is more striking than at New York and Philadelphia, where from the warmth of the climate, the light dress of the south of Europe is seen in conjunction with the freshness and bright colouring of a northern complexion." Sir Charles Lyell expresses his opinion that the principal cause of the different aspect of the Anglo-Saxon race in England and America will be found to be the climate. "Many who have been born in America, of families settled there for several generations, find their health improved by a visit to England, just as if they had returned to their native air; and it may require several centuries before a race becomes thoroughly acclimatized. The great difference of the species of indigenous animals and plants in North America, those of the middle and southern states being almost all distinct from the European, points to a wide diversity of climate, the atmosphere being drier, and there being a much greater annual range of the thermometer than in corresponding latitudes on the E side of the Atlantic. Even so cosmopolite a being as man may demand more than two centuries and a quarter before he can entirely accommodate his constitution to such altered circumstances, and before the successive generations of parents can acquire themselves, and transmit to their offspring, the new and requisite physiological peculiarities. English travellers often ascribe the more delicate health of the inhabitants here, to their in-door habits and want of exercise. But it is natural that they should shrink from exposing themselves to the severe frosts and long-continued snows of winter, and to the intense heat of the summer's sun. An Englishman is usually recognised at once in a party by a more robust look, and greater clearness and ruddiness of complexion, and it is surprising how distinguishable he is even from persons born of English parents in the United States. It is also a curious fact, which seems generally admitted, that the native Anglo-Australians bear a considerable resemblance to the Anglo-Americans in look and manner of speaking, which is a mystery, for there is certainly in that case no analogy between the climates of the two countries." There is undoubtedly considerable danger of a degeneracy in the physical characteristics of the white man in America. So long as the pop. is recruited by an immense influx from Europe, the change will be less perceptible; but that immigration once checked, it may become a very serious question.

Languages.] The languages spoken in the United

States, exclusive of those of the indigenous tribes, are as numerous and diversified as the nations to which its emigrant population belong, namely: English, French, German, Dutch, Swedish, Spanish, and Gaelic. All these emigrants retain, in a greater or less degree, their native language, in which they perform their respective religious services, converse, and transact mutual business; the English language, however, is by far the most prevalent, and must in process of time become the universal instrument of oral communication. In it, all the public business of the different states is transacted, laws are promulgated, records kept, and diplomatic correspondence carried on in English. In the northern states, English is spoken in great purity, and pronounced with propriety, by persons of education. In the middle states, where the pop. is more mixed, the language is proportionally corrupted, especially in pronunciation. There are no provincial dialects in America. Emigrants from all parts of Great Britain have met and intermixed with each other, and with the natives of the country, and the peculiarities of dialect, therefore, have necessarily melted down into the general speech, which is common English. The low-bred Londoner does not there transmit his vulgar *shibboleth*; and the son of the Northumbrian is free from the *burr* which sticks in the throat of his father. Dialects can only be preserved by collective bodies speaking the language which they acquired in their youth, and cannot therefore continue in promiscuous colonies. The French and Spanish languages are confined chiefly to the states of Upper and Lower Louisiana, and must at no very distant epoch be completely superseded by the English, which will in process of time be the vernacular language from the Atlantic to the Pacific, and from the gulf of Mexico to the Frozen sea.

Literature and Public press.] "With their due proportion of genius, in common with all other nations, and with the advantage of a more general diffusion of popular intelligence than is to be found in any other community, too many of our citizens in all the learned professions," says an American author, "begin, continue, and end their career, on much narrower ground than their native capacity, properly unfolded by previous general information, would enable them to cover. Another obstacle to the growth of literature in the U. S., arises from the great propensity to consume the talent of the country in the effusion of newspaper essays and political pamphlets, instead of concentrating it in the production of some regular, consecutive work. Add to this, the universal vice of the U. S., a perpetual craving after novelty. The charge which Demosthenes brought against his own countrymen, that they were continually running about, and asking, 'Is there anything new?' is equally applicable to the Americans. This eternal restlessness and desire of change, pervade the whole structure of our society: the same man will start into life as a clergyman, then turn lawyer, next convert himself into a farmer and land-jobber, and, taking a seat in congress, or some state legislature, by the way, end his days as a merchant and money-broker. The people are incessantly shifting their habitations, employments, views, and schemes: the residence of a servant does not average two months in each place; the abode of a whole household is generally changed once a-year, and sometimes oftener; numerous families, that have been previously settled in the elder states of New York, Connecticut, and Massachusetts, are continually migrating into Ohio, or the territories of Alabama, Illinois, and Mississippi; the executive, the legislators, the magistrates, and officers of all

kinds, are changed biennially, or annually, or half-yearly, according to the greater or less infusion of the restless spirit of democracy into our various forms of government." These causes are all hostile to the cultivation of literature in this country; at the same time there is a wide diffusion of knowledge throughout the states. The cheap publication of books encourages a demand and supply in the U. S. almost unexampled in any European state. There have been eight editions, comprising 7,500 copies, of *Stewart's Moral Philosophy* published during the last twenty years,—a greater number, we suspect, than has been sold in our own country. Periodical works and newspapers abound in extraordinary and countless quantity. In most cases the editions of one and the same work are larger and more frequent in the U. S. than in any other country. Many reprinted English works have here passed through three or four editions, while the publishers of the original in England have but one. In one instance, the sale of a book in America amounted to 100,000 copies; whereas in England, only four editions, of 1,000 copies each, were disposed of. The sale of five book-selling establishments amounted, in 1836, to 1,350,000 dollars. A single publisher paid, in the five years preceding 1834, 135,000 d. for copyrights, out of which 30,000 d. were for two works only. The number of volumes issued in the U. S., from the 1st of July, 1850, to the same date in 1851, was 1,298. The number of pages in these vols. amounts to 213,049. The distinct works composing the vols. are 1,176. Of these 817 were published in New York, 223 in Philadelphia, and 203 in Boston. The department of fiction, including every class of novels and tales in prose, comprised 249 distinct works. —The first newspaper published in America was *The Boston News Letter*, which appeared in 1704. There were but 7 papers in the United States in 1750; in 1810 there were 359 (including 25 published daily), which circulated 22,200,000 copies in the year. In 1823 they had increased to 598, and in 1828 they amounted to 892, of which Pennsylvania alone had 185, and New York 161. The number of copies circulated in the year by these journals exceeded 80,000,000; the circulation in 1842 did not fall short of 100,000,000. The whole number of journals in the U. S. on the 1st of June, 1850, amounted to 2,800. The aggregate circulation of these papers and periodicals is about 5,000,000, and the entire number of copies printed annually in the U. S. amounts to 422,600,000. The following table shows the number of daily, weekly, monthly, and other issues, with the aggregate circulation of each:

	Number.	Circulation.
Dailies,	350	750,000
Tri-weeklies,	150	75,000
Semi-weeklies,	125	80,000
Weeklies,	2,000	2,875,000
Semi-monthlies,	50	300,000
Monthlies,	100	900,000
Quarterlies,	25	20,000
Total,	2,800	5,000,000

Since the census was taken a large number of new journals have been established, chiefly in the state of California and in the new territories of Oregon, New Mexico, Utah, and Minnesota. There is a journal, edited with spirit and ability, among the Cherokee Indians, which is printed in the Cherokee language and characters. Copies of a great many daily papers are sold at 1 cent each; but nearly two-thirds are sold at from 2 to 4 cents. Of the above number of publications, 424 are issued in the eastern states, 876 in the middle states, 716 in the southern states, and 784 in the western states.

There is one journal for every 7,184 free inhabitants. In the great majority of cases the editor is both the printer and publisher, or proprietor, of his paper.

Education.] The northern states have made the most liberal provisions for public education. The plans adopted for this purpose, by the different legislatures, seem well-calculated to answer the end designed; but to enter into any detail respecting the various modes in which instruction is communicated to the community, would be inconsistent with the plan of our work. It is sufficient to observe, that the great body of the New England pop. can read and write, and that many of them are respectably acquainted with the classical languages, and elementary sciences. From the report of one of the commissioners, the school-fund of Connecticut appears to be 1,858,074 d. = 2371,000. The amount of division to the common schools annually, in 1823, was 67,791 d., which enables the state to expend 60,000 d. annually on schools. There is a rule to enforce a distribution of this fund to the different district-schools, according to the number of children in each, between the ages of 4 and 16. The mode pursued is this: the inhabitants establish school-districts, and appoint a committee in each district, whose duty it is to manage the concerns of the district and provide an instructor for the school, with the consent of the district and the approbation of the visitors. There were 1,580 schools in the state of Connecticut alone in 1824. The same principle and regulations apply to all the western states in the Union. The new states have made immense appropriations of land (from the sale of which the fund is raised) for the purpose of general education; thus is laid the foundation to support schools and colleges to the fullest extent wanted. In the southern states, the state of education is deplorable. Before the revolution, the wealthy Carolinians sent their children to Europe for their education; since that period, they have sent them to the northern states,—an unequivocal testimony of their own inferiority.

Colleges.] There were in the United States 48 incorporated colleges or universities, in 1839; and the statistics of these were as follows:

The number of instructors in 32 colleges was	317
The number of graduates in 30, in 1828, was	652
The number of under-graduates in 33 colleges, in 1828 and 1829,	2,809
Number of volumes in 30 college libraries,	123,118
Number of volumes in 35 students' libraries,	66,730

From calculations made in the year 1830, it appears that the number and proportion of college students in each state of the Union, compared with the pop., was at that date as follows:—In Maine, 128 students, being 1 student in 3,300 persons; New Hampshire 189, or 1 in 2,300; Vermont 138, or 1 in 2,000; Massachusetts 543, or 1 in 1,070; Rhode Island 84, or 1 in 2,700; Connecticut 205, or 1 in 1,400; New York 543, or 1 in 2,700; New Jersey 115, or 1 in 2,900; Pennsylvania 486, or 1 in 3,200; Delaware 10, or 1 in 8,000; Maryland 171, or 1 in 2,600; District of Columbia 38, or 1 in 1,400; Virginia 370, or 1 in 3,200; North Carolina 96, or 1 in 7,500; South Carolina 214, or 1 in 2,800; Georgia 107, or 1 in 3,800; Alabama 83, or 1 in 12,000; Mississippi 28, or 1 in 4,700; Louisiana 18, or 1 in 17,000; Kentucky 250, or 1 in 2,600; Ohio 169, or 1 in 5,800; Tennessee 144, or 1 in 4,000; Indiana 4, or 1 in 75,000. It is estimated, that, in the New England states, there is now, on the average, one student in college for 1,650 inhabitants; in the middle states, 1 for 3,400; and in the states south and west of Pennsylvania, 1 for 4,400. The chief literary institution in the U. S. is Harvard university, in the state of Massachusetts, at Cambridge, 8 m. W of Boston. Its professorships now amount to upwards

of 20, including the medical department, which is an integral part of the institution, although for the greater convenience of medical students, it occupies buildings in Boston. The university comprises five colleges and a new hall. The academical course is completed in four years, at an expense of about 100 guineas a-year.

The whole number of incorporated colleges in the U. S., in 1840, was 100. All the states in the Union have one or more of these institutions. The whole number of students, according to the catalogue for 1840, was 9,142, giving on an average about 90 students to each college. Most of the colleges in New England and the middle states, with a very few of those in the south and the west, have able faculties. The collegiate system of the U. S. has been derived from the collegiate system of England. There are, indeed, many points of dissimilarity, but these have grown out of the peculiar circumstances which have attended the carrying out of the English system. In all the older colleges, and in very many of the more recent ones, the students reside together in the collegiate buildings, under the immediate eye of the tutors or of the unmarried professors, and they eat at a common table. They are divided into four classes, called *freshmen*, *sophomores*, *juniors*, and *seniors*, the whole course thus extending through four years. There are, however, comparatively but few students who spend so long a time in college; inasmuch as they are allowed to enter any class if they can bear the requisite examination. The collegiate year, like that of the English, embraces about nine months, and is divided into three terms of scarcely three months each, with two short and one long vacation between them. The whole property of an American college is held by a corporation, usually known as a board of trustees. There are in the U. S. at least 81 libraries of 5,000 volumes and upwards, to which the public, more or less restrictedly, have access, and of these 49 are immediately connected with colleges or public schools. The aggregate number of volumes in these libraries is about 980,413, 200,000 of which are in the state of Massachusetts, 159,000 in the state of Pennsylvania, 158,000 in the state of New York, 81,000 in the state of Connecticut, 53,000 in the district of Columbia, 41,000 in the state of Virginia, 38,000 in the state of Maine, 37,000 in the state of Rhode Island, 30,000 in the state of Ohio, 30,000 in the state of South Carolina, 28,000 in the state of New Jersey, 22,000 in the state of New Hampshire. The number of volumes thus provided in these states respectively, excluding from notice those contained in libraries under 5,000 volumes, appears to be: In Rhode Island about 84 to every 100 of the pop., in Massachusetts about 27, in Connecticut 26, in Pennsylvania 9, in New Jersey 7, in New Hampshire 7, in Maine 7, in New York 6, in South Carolina 5, in the district of Columbia, containing the capital of the Union, it is 121. The city of Boston possesses about 73 volumes to every 100 of its inhabitants; Richmond, the capital of Virginia, 59; Philadelphia 53, New York 35, Washington 119. The library of oldest foundation, and also of greatest extent in the U. S., is that of Harvard University, which dates from 1638. Its present number of books, including the "society libraries" of the students, is stated at 68,500. The library of Yale college, founded in 1700, contains 34,500 vols. The library of the American Antiquarian society at Worcester is particularly rich in American history, and contains many valuable MSS.; its present number of volumes exceeds 13,000. The Mercantile Library of New York contains about 25,000.

Religion.] Since the American revolution, no religious establishment is recognised by the federal government. As this is a matter of some importance, it shall be given in Dr. Morse's own words: "The constitution of the U. S. provides against the making any law respecting an establishment of religion or prohibiting the free exercise of it: and in the constitution of the respective states, religious liberty is a fundamental article. Religion is here placed on its proper basis, without the feeble and unwarranted aid of the civil power: it is left to be supported by its own evidence, and the lives of its professors, and the Almighty care of its divine author." It would be an erroneous conclusion, were it inferred from this, as has been attempted by some, that the people of the U. S. are inattentive to religious observances: the fact is directly the reverse; in no other country are there so many churches in proportion to the numbers of the pop., and in no other country are the working clergy so well paid. Religion, although deriving no pillars from the state, is possessed of 8,000 places of public worship, and "intolerance is disarmed by being let alone," and the various Christian sects agree to differ. There are no rich livings, indeed, but, on the other hand, none of the ministers of religion are subjected to the miserable penury on which many of their brethren in the gospel are allowed to starve in our own country. There are, in certain parts of the Union, lands which were given to the Episcopal church anterior to the Revolution, and which in these particular cases render any further contribution unnecessary; but the clergy of the U. S. are almost uniformly supported by assessments, voluntary so far as the law is concerned, but which public opinion renders in no small degree obligatory. The Americans are distributed into all the different sects which are to be found on this side of the Atlantic. The most numerous are Baptists, Methodists, Congregationalists or Independents, and Presbyterians. The churches or edifices for public divine worship in the U. S. in 1850, numbered 36,000 (36,011), of which the Methodists owned one-third, or 12,467; the Baptists nearly one-fourth, or 8,791; the Presbyterians, the next number or 4,584; and if we count the Dutch Reformed, Congregational, Lutheran, and German Reformed with the Presbyterian (and the differences between all these seem slight and unessential), the total was 8,112. But the estimated capacity of the Presbyterian and allied churches was greater in the average than that of the Baptist and Methodist churches, so that, while all the Methodist churches would accommodate but 4,209,333 worshippers, and all the Baptist but 8,130,878, the Presbyterians and related churches aforesaid had room for 3,705,211 worshippers. The Catholics had but 1,112 churches accommodating 620,950 worshippers. The Episcopalians had 1,422 churches, accommodating 625,213 worshippers. The average number that each church edifice in the Union will accommodate is 384; the total value of church property, in 1850, was 86,416,639 d. If all the churches should be filled at one time they would hold 13,849,896 persons—probably something near the total pop. that could at one time attend church.

Federal constitution.] The U. S. of North America are a political aggregation of independent but confederated republics, each of which has a particular constitution of its own, and a distinct and separately organized government. The form of constitution adopted by the particular states is nearly the same; but it is proper here to premise, that the colonies now forming the U. S. were settled at different times, and by different classes of emigrants, and that the degree of power retained by the crown over them was extremely various. In some instances, the governor and council were named in England; in others, the governor alone was appointed there; while, in the case of Rhode Island and Connecticut, the people enjoyed by charter so

uncontrolled an independence in the regulations of their local concerns, that the revolution did not render necessary the slightest alteration in the forms of internal administration. One of these colonies, indeed, retains even to this day the charter of Charles II., as its system of state-government; another only parted with the royal charter for a constitution of its own making in 1618. With distinct legislatures, and with such discrepancies in the sources from which their respective executives derived their authority, it need hardly be observed, that each colony was wholly independent of every other. The idea of a congress was first partially acted on in 1722; and one composed of deputies from all the eastern and middle colonies was held at Albany in 1754 with the approbation of the mother-country, for the purpose of considering the best means of defending the provinces against the French, then rulers of Canada, and their Indian allies. On this occasion a plan was proposed of a federal government; but the scheme was not relished either by the ministry at home or by the colonies, and was never put into execution. The first congress held on account of the alleged grievances sustained from England, and which met at New York in 1765, maintained that the power of taxation resided solely in the colonial legislatures. The language adopted at the meeting of 1774 was still more decided; but it was in the ensuing year that the congress assembled, which, on the 4th of July, 1776, declared the independence of the United States. On the separation from England, the little power which had been either claimed or exercised by the British government, was at once assumed by the individual states. The authority of congress was at first wholly of a recommendatory character, and rested on the general conviction of the necessity of co-operation, rather than on any defined principles. But the importance of some understood compact was early felt; and even before the declaration of independence was formally made, a committee was appointed to prepare an act of confederation, which having been agreed to in congress, and proposed to the several states for their ratification in 1777, was generally assented to by them in the course of the ensuing year. This act was essentially between 13 independent powers for specific purposes. It was indeed resolved that the union of the states was to be perpetual; but it was also declared that "each state retains its sovereignty, freedom, and independence, and every power, jurisdiction, and right, which is not by this confederation expressly delegated to the United States in Congress assembled." The idea of an association of equal sovereignties was so fully persevered in, that each colony, without regard to its extent or population, had but one vote in the congress: thus recognizing a very pernicious principle, and giving, it might be, to the opinions of an actual minority, a power as great as to those of the majority. The principal object of the league was to act with energy for the common defence; and for this purpose a general treasury was established for the payment of the troops, and such national matters. Congress had no power to raise taxes; even the land-taxes for the common defence were raised by the several states, the quotas only being fixed by congress. The limitations of the powers of the superintending authority occasioned a degree of inaction which was very far from according with the pressing nature of the demands made by the general or the local governments; and when fear from abroad had ceased, the whole confederacy was found inefficient for the promotion of the general interests of the several states. The present general constitution was adopted in 1787, and carried into effect on the 4th of March, 1789. The "constitution," the "supreme law," as it is called, begins thus: "We, the people of the United States, in order to form a more perfect union, establish justice, ensure domestic tranquillity, provide for the common defence, promote the general welfare, and secure the blessings of liberty to ourselves and our posterity, do ordain and establish this constitution for the United States of America." The whole constitution, therefore, proceeds from the people of the states; it is their act, and it is passed for the special and admirable purposes enumerated. Not only the living people, therefore, of the states have a right to alter, as their predecessors had to annul this constitution—they are bound, in order to attain the objects and ends described, to alter and amend it, if it fail to attain these ends. The great distinction which exists between the present system, and that for which it was substituted is, that the federal government, instead of being a consideration of the states, now acts, in those cases in which it possesses jurisdiction directly as individuals, without the intervention of any other authority, while at the same time the powers which are not transferred by the constitution to the general government, remain in the individual states as independent republics. Thus the American people are under a double government, each of which is independent of the other. If a subject fall within the cognizance of the state, the law respecting it must be passed by the local legislature, the judiciary authorities who interpret it are appointed under the sanction of the provincial constitution, as also the executive or ministerial officers who give effect to the decision. So, on the other hand, should the matter appertain to the general government, congress provides the law in the case, the United States Judiciary construe it, and it is enforced by persons deriving their authority from the federal power. Piracy and murder might be adduced as familiar instances of this distinction: these crimes being cognizable by different jurisdictions, could in no part of the investigation come before the same tribunals. Many imperfections have, by politicians, been pointed out in this constitution. It wants, say they, a declaration of rights. The people are not secured in the bene-

fits of even the common law. The number of representatives is too small for that of the people represented. The senate has too great preponderance in the constitution, and is in such a situation as to be daily acquiring more. The judiciary department is so constructed, that, by continued appeals, a process may be extended to an extraordinary length, and it possesses the anomalous power of annulling a law by declaring it unconstitutional. The president has no constitutional council; and will be naturally led to choose one for himself from the great officers of the state. Hence, too, arises the power of the senate, in the appointment of public officers; and a connexion between that branch of the legislature and the executive branch by far too close for the safety of the state. Treaties are declared to be supreme laws of the land, although, in negotiations concerning them, the opinion of the representatives be not asked. The general clause at the end of the enumerated powers of congress may be construed into a sense very dangerous to the liberty of the country. The power of congress is superior to that of the governments of the particular states, so that the declarations of rights made by these states are of no consequence. No provision is made for the preservation of the liberty of the press; trial by jury in civil causes is not secured; nor is the danger of standing armies in time of peace sufficiently obviated. Among the unavoidable evils of a double government are increased expense and a jealousy among the component parts, whether directed against the whole or against each other: 'a sectional feeling,' as it is named, is called forth on all questions that suppose a divided and opposite interest. Much has been said by the advocates for American wisdom, towards the extenuation of these blemishes; but, after all that their ingenuity has been able to suggest, they are obliged to confess, that many things exist in the constitution of the U. S. loudly requiring amendment.

Congress. In the federal democratic republic of the U. S., all legislative powers are vested in Congress, which consists of a senate and a house-of-representatives. The house-of-representatives is composed of members chosen every second year by the people of the several states, and in number in accordance with the pop. of each; and in order to ascertain the number each state is entitled to, a census is taken every 10 years, excluding from the enumeration for this object two-thirds of the slaves, and all Indians not taxed. Each state is entitled to at least one representative. Vacancies are filled by intermediate elections. The house chooses its speaker and other officers. No person under 25 years of age, who has been less than seven years a citizen of the U. S., and who is not a resident of the state electing him, is qualified for representative. The constitution provided for a specific number of representatives from each state to compose the House until the ascertainment of the pop. under the census of 1790; but since then legislation has decennially fixed the number to be elected. From the 3d March, 1793, the apportionment was one representative to every 33,000 of the representative pop.; after 1803, one to every 33,000 also; after 1813, one to every 35,000; after 1823, one to every 40,000; after 1833, one to every 47,000; after 1843, one to every 70,680; and after 3d March, 1853, 233 representatives to be divided *pro rata* to the several states. The following table shows the number of representatives to which each state has been entitled since the establishment of the government:—

States.	1793.	1798.	1803.	1813.	1823.	1833.	1843.	1853.
Maine,	—	—	—	7	8	7	6	—
New Hampshire,	3	4	5	6	6	5	4	3
Massachusetts,	8	14	17	20	18	12	10	11

Virginia,	10	19	22	23	22	21	15	13
North Carolina,	5	10	13	13	13	13	9	8
South Carolina,	5	6	8	9	9	9	7	6
Georgia,	3	3	4	6	7	9	8	8
Alabama,	—	—	—	—	3	5	7	—
Mississippi,	—	—	—	—	1	2	4	5
Louisiana,	—	—	—	—	3	3	4	4
Tennessee,	—	—	3	6	9	13	11	10
Kentucky,	—	2	6	10	12	13	10	10
Ohio,	—	—	—	6	14	19	21	21

Indiana,	—	—	—	—	3	7	10	11
Illinois,	—	—	—	—	1	3	7	9
Missouri,	—	—	—	—	1	2	6	7
Arkansas,	—	—	—	—	—	—	1	2
Michigan,	—	—	—	—	—	—	3	4
Florida,	—	—	—	—	—	—	1	1
Texas,	—	—	—	—	—	—	2	2
Iowa,	—	—	—	—	—	—	2	2
Wisconsin,	—	—	—	—	—	—	3	3
California,	—	—	—	—	—	—	2	2

In addition to these representatives from states, the house admits a delegate from each organized territory, who has the right to debate on subjects in which his territory is interested, but cannot vote. California has 2 members by a special act. The senate consists of 2 members from each state, elected by the legislatures thereof respectively for 6 years. One-third the whole body is renewed biennially, and if vacancies happen, by resignation or otherwise, during the recess of the legislature of any state, the executive of such state makes a temporary appointment until the next meeting of the legislature, which fills such vacancy. Senators must be at least 30 years old, must have been citizens of the U. S. for 9 years, and be residents of the state by which chosen. Each senator has one vote. The vice-president of the U. S. is *ex officio* president of the senate, but a president *pro tempore* is elected by and from among the senators, who, in the absence of the president, acts in his stead. Besides its ordinary legislative capacity, the senate is vested with certain judicial functions, and its members constitute a high court of impeachment. No person can be convicted by this court unless on the finding of a majority of senators, nor does judgment extend further than to removal from office and disqualification. Representatives have the sole power of impeachment.

President.] The executive power is vested in a president, who is elected by an electoral college, chosen by popular vote, or by the legislature of the state, the number of electors being equal to the number of senators and representatives from the states to congress. His term of office is 4 years, but he is eligible for re-election indefinitely. The

electors forming the college are themselves chosen in the manner prescribed by the laws of the several states. A majority of the aggregate number of votes given is necessary to the election of president and vice president, and if none of the candidates has such a majority, then the election of president is determined by the house of representatives, and that of the vice-president by the senate, from among the three candidates having the highest number of electoral votes, and in doing so, the vote is taken by states, the representatives of each state having only one vote, which must, of course, be determined by a majority of their number. No person can be president or vice-president who is not a native-born citizen, of the age of 35 years, and who has been a resident of the U. S. for 14 years. The president is commander-in-chief of the army and navy, and of the militia when in the service of the Union. With the concurrence of two-thirds of the senate, he has the power to make treaties, appoint civil and military officers, levy war, conclude peace, and do all that rightly belongs to the executive power. He has a *veto* on all laws passed by congress, but so qualified, that notwithstanding his disapproval, any bill becomes a law on its being afterward approved of by two-thirds of both houses of congress. The president has a salary of 25,000 d. per annum, and a house at Washington for a residence during his official term. The vice-president is *ex officio* president of the senate; and in case of the death, resignation, or other disability of the president, the powers and duties of that office devolve upon him for the remainder of the term for which the president had been elected. This provision of the constitution, for the first time since the foundation of the government, came into operation in 1841, on the demise of General Harrison, who died just one month after his inauguration, when John Tyler, the vice-president, succeeded. In case of the disability of the vice-president, the president of the senate *pro tempore* takes his place.—The offices of president and vice-president have been occupied by the following gentlemen since the adoption of the constitution:

Presidents.	Vice-presidents.	Terms of Office.
1. George Washington,	John Adams,	30th April, 1789, to 4th March, 1793
2. Do. do.	Do. do.	4th March, 1793, — 1797
3. John Adams,	Thomas Jefferson,	— 1797, — 1801
4. Thomas Jefferson,	Aaron Burr,	— 1801, — 1805
5. Do. do.	George Clinton,	— 1805, — 1809
6. James Madison,	Do. do. (d. 30th Apr. 1812),	— 1809, — 1813
7. Do. do.	Elbr. Gerry (d. 23d November, 1814),	— 1813, — 1817
8. James Monroe,	Daniel D. Tompkins,	— 1817, — 1821
9. Do. do.	Do. do.	— 1821, — 1825
10. John Quincy Adams,	John C. Calhoun,	— 1825, — 1829
11. Andrew Jackson,	Do. do.	— 1829, — 1833
12. Do. do.	Martin Van Buren,	— 1833, — 1837

14. {William Henry Harrison,	John Tyler,	— 1841, 4th April, 1841
{John Tyler (on the death of General Harrison),		4th April, 1841, 4th March, 1845
15. James K. Polk,	George M. Dallas,	4th March, 1845, — 1849
16. {Zachary Taylor,	Millard Fillmore,	1849, 9th July, 1850
{Millard Fillmore (on the death of General Taylor),		9th July, 1850, 4th March, 1853
17. Franklin Pierce,	Wm. Rufus King (d. 18 Ap. 1853),	4th March, 1853, — 1857

Cabinet.] The administrative business of the nation is conducted by several officers, with the title of secretaries, etc., who form what is termed 'the Cabinet.' These are the secretary-of-state, the secretary-of-war, the secretary-of-the-navy, the secretary-of-the-treasury, the postmaster-general, the secretary-of-the-interior, and the attorney-general—the last being the official law authority for advisement in administrative affairs. Each of these presides over a separate department.

The Judiciary.] The judicial power of the U. S. is vested in one supreme court, and in such inferior courts as congress may from time to time establish.

The present judicial establishment consists of a supreme court, district courts, and circuit courts. The supreme court is composed of one chief justice, and six associate justices, who hold a court in the city of Washington annually; besides which, each of these justices attends in a certain circuit, comprising two or more districts appropriated to each, and, together with the judge of the district, composes a circuit court, which is held in each district of the circuit. The district courts are held respectively by the district judge alone. Appeals are allowed from the district to the circuit courts in cases where the matter in dispute, exclusive of costs, ex-

ceeds the sum or value of fifty dollars, and from the circuit courts to the supreme court, in cases where the matter in dispute, exclusive of costs, exceeds the sum or value of 2,000 d.; and in some cases, where the inconvenience of attending a court by a justice of the supreme court is very great, the district courts are invested with circuit court powers. Each state is one district, for the purpose of holding district and circuit courts therein, with the exception of New York, Pennsylvania, Virginia, Tennessee, Louisiana, and Alabama, each of which is divided into two districts. There are, besides, territorial courts, which are temporary, and lose that character whenever a territory becomes a state. In addition to the district court for the district of Columbia, there is a circuit court for that district, which exercises, under the authority of congress, common law and equity jurisdiction similar to that of the county courts of Maryland and Virginia. Each court has a clerk, a public attorney, or prosecutor, and a marshal, all of whom are appointed by the president of the United States, with the exception of the clerks, who are appointed by the courts. The compensation of the judges is fixed by law; that of the clerks, attorneys, and marshals, consists of fees. The judges of the U. S. have adopted a dictum of Lord Hale's, and declared that the judiciary is not a subordinate but co-ordinate power of the state. They have declared too that the "Constitution is the supreme power," that the judicial power extends to all cases of law and equity under it; and on these premises they have assumed to be the interpreters of the supreme power, and have gone so far as to declare that any "act of the Congress of the U. S. which shall be, in the opinion of the supreme court of the U. S., contrary to the written words of the constitution, is *ipso facto* void and of no effect." Justly alarmed at such inordinate pretensions, President Jefferson proposed to appoint the judges for a term of years. President Jackson renewed the proposition, and though it has never been carried into effect as to the supreme court, in no less than 22 states of the Union, the judges are now elected by the people for terms of years.

State governments.] The subdivisions into which the several states of the Union are formed, are styled *counties*, with the exception of the states of S. Carolina and Louisiana. In S. Carolina the subdivisions are termed *districts*, and in Louisiana, *parishes*. In the six New England states, and also in the states of New York, New Jersey, Pennsylvania, and Ohio, the counties are subdivided into *townships*, and in Delaware into *hundreds*; but in the rest of the states no such subdivision as that of township is known. In the New England states these townships are commonly styled *towns*. They differ considerably in size, generally varying from about 5 to 6 m. square. They are incorporated by the legislature of the respective states with certain rights and privileges, and have a distinct police, which is conducted by officers elected annually by the citizens. Some of the principal of these officers are a town-clerk, selectmen, assessors, school committee, overseers of the poor, surveyors of highways, &c. The townships in the New England states, and in the state of New York, are subdivided into school districts of convenient size; and in these districts common schools are maintained, at least a part of the year, to which all the inhabitants, both poor and rich, have an equal right to send their children for instruction. The money necessary for the support of the schools and of the poor, for the repair of roads, &c., in the several towns, is derived from a tax upon the inhabitants, or from funds appropriated to the object. In those states in which the subdivision of township is unknown, the word *town* is used in a more restricted and appropriate sense for a compact collection of houses. The differences which exist between the general government and the state governments are unimportant. They consist each of an executive and legislative department; but each state has prescribed the manner in which it pleases to have its own internal administration regulated, as well as the extent of authority which it deems necessary to confide to its local rulers. The only restraint on the unlimited freedom of the inhabitants to decide for themselves on this matter is to be found in the provision in the federal constitution, that the U. S. shall guarantee to every state a republican form of government. But though there is no concurrence in the particular details of the systems established by the several states, they agree with one another, and with the consti-

tution of the Union, in the general distribution of powers. The governors are elected more frequently than the president, in most cases annually or biennially. They are in some states chosen by the legislature, in others by the people at large. The lower house of the legislature—except in one instance—is elected annually, and the term of service of the councillors or senators differs from one to four years. The qualification of the electors is various. In the eastern and middle states it is so small as to amount almost to universal suffrage, paupers and criminals being alone excluded. Voting by ballot very generally prevails, and is easily managed.

Revenue of the States.] On the subject of American finance and taxation, it ought always to be kept in mind that each of the states in the union has a distinct government and legislature of its own, which levies taxes for defraying the expenses of its own militia, and its own civil administration, including the salaries of the governors, judges, and all other public officers, and the expense of the state legislature, &c. These state-taxes are levied differently in different states. The revenues of the state of New Jersey, for instance, are raised by taxes on land, iron-works, mills, distilleries, breweries, ferries, fisheries, carriages, stags, taverns, horses, cattle, &c. But the most common way of raising the state-taxes is by a poll-tax and a property-tax. These state-taxes are never paid into the treasury of the government of the U. S.; nor do they make any part of the ways and means in the budget of the federal government presented yearly to congress. It is necessary to remark this in order to prevent our readers from falling into the common mistake of those whose whole knowledge of American revenue and expenditure is derived from the newspaper reports of the president's speech, and the American budget as presented to congress, and who consequently suppose that the receipts and disbursements of the federal government comprise all that the people of the U. S. pay in taxes.

State debts.] The following table exhibits the debts of the states, and the annual interest. It may not be strictly accurate, but it is as nearly so as possible. It will be seen that Pennsylvania exhibits a very prominent attitude in this table, the gross amount of her indebtedness being over 40,000,000 d.:-

	Debt in 1839.	Debt in 1848.	Annual In- terest on absolute debt.
Maine,	554,976 d.	979,000 d.	65,000 d.

... .. 1848,	—	224,023,827	9,980,062

The stocks and bonds issued for banking purposes, and to be lent to railroad and canal companies, are treated in this table as state debts. So far as the general interests of the state are affected by state debts, there is no difference between bonds issued and lent to corporations, and those issued to procure money for constructing public works by the state. In both cases, the stock is disposed of in the foreign market, and the specie must be sent from the U. S. to pay the interest; and it is material to the credit of the stocks, that all loans of credit certificates to incorporations should be at once recognised and acknowledged as state debts. There are a great number of cities in the Union, besides those enumerated in the present table, which have contracted debts, the amounts of which are unknown. The bank of the U. S. issued bonds, post-notes, and other evidences of debt, and put them afloat in Europe, to the amount, probably, of 30,000,000 d. There are also a class of monied incorporations, which possess, or have assumed, the right of issuing bonds, and these have been

sold or hypothecated in Europe, to the amount of several millions of dollars, which are an addition to the debt against this country. Of the states which now compose the Union, the following nine have no public debt:—New Hampshire, Vermont, Rhode Island, Delaware, Florida, and Wisconsin. The following nine states have regularly paid their interest without interruption: Massachusetts, New York, Ohio, Virginia, S. Carolina, Georgia, Kentucky, Tennessee, and Alabama. Pennsylvania suspended payment in August 1842, and resumed in February 1843. The following eight have failed to pay their debts: Mississippi failed to pay in Aug 1841; Indiana, July 1841; Illinois, January 1842; Florida, January 1842; Michigan, January 1842; Maryland, January 1842; Louisiana (on part of her debt), December 1842; Arkansas, 1841. By the constitution of 1787, the judicial power of the supreme court of the U. S. was extended to all controversies "between a state and the citizens thereof and foreign states, citizens or subjects." Had this article remained in force, the foreign holders of state-bonds could have enforced the payment of their debts through the supreme court. This provision of the constitution was vindicated in the *Federalist* in these terms: "The Union will undoubtedly be answerable to foreign powers for the conduct of its members, and the responsibility for an injury ought ever to be accompanied with the faculty of preventing it. As the denial or perversion of justice by the sentences of courts is with reason classed among the just causes of war, it will follow that the federal judiciary ought to have cognizance of all causes in which the citizens of other countries are concerned. This is not less essential to the preservation of public faith than to the security of public tranquillity." To these reasons Judge Story adds this one: "It is of the greatest national importance to advance public as well as private credit in our intercourse with foreign nations and their subjects. Nothing can be more beneficial in this respect than to create an impartial tribunal to which they may have resort upon all occasions when it may be necessary to ascertain or enforce their rights." The constitution, however, was amended, and the 11th amendment is, that "The judicial power of the U. S. shall not be construed to extend to any suit in law or equity commenced or prosecuted against one of the U. S. by citizens of another state, or by citizens or subjects of a foreign state." The object of this amendment is thus related by Judge Story in his *Commentary on the Constitution*: "It is a part of our history that, at the adoption of the constitution all the states were greatly indebted, and the apprehension that these debts might be prosecuted in the federal courts, formed a very serious objection to that instrument. Suits were instituted, and the supreme court maintained its jurisdiction. The alarm was general, and to quiet the apprehensions that were so extensively entertained, this amendment was proposed in congress, and adopted by the state legislatures." The constitution of the U. S. was thus distinctly altered in order to deprive foreign creditors of the means which the law gave them to recover their debts. It was changed to relieve "the apprehension" of certain states, that the general government would be compelled to enforce the payment of their foreign debt.

General Expenditure and Revenue.] The following is a statement of the annual expenditure, exclusive of the public debt, from the commencement of the U. S. constitutional government to the 31st of December, 1837:—

For the year 1791,	1,919,590 d.	For the year 1815,	26,953,571 d.
1792,	1,877,904	1816,	23,373,433
1793,	1,710,070	1817,	14,454,610
1794,	3,500,546	1818,	18,808,674
1795,	4,350,638	1819,	16,300,273
1796,	2,541,930	1820,	13,134,580
1797,	2,834,591	1821,	10,723,479
1798,	4,023,223	1822,	9,827,643
1799,	6,480,167	1823,	9,784,154
1800,	7,411,370	1824,	15,330,144
1801,	4,981,669	1825,	11,490,459
1802,	3,737,080	1826,	13,062,316
1803,	4,002,824	1827,	12,663,095
1804,	4,452,869	1828,	13,298,041
1805,	6,357,326	1829,	12,860,460
1806,	6,081,109	1830,	13,229,533
1807,	4,984,572	1831,	13,884,067
1808,	5,504,539	1832,	16,616,388
1809,	7,414,572	1833,	22,713,255
1810,	5,311,052	1834,	18,425,417
1811,	5,592,604	1835,	17,514,360
1812,	17,338,499	1836,	50,868,194
1813,	28,082,397	1837,	39,164,743
1814,	30,137,087		

The following table for the year ending June 30, gives the U. S. revenue and expenditure for the fiscal year ending June 30, 1848:—

Customs,	31,671,443 d.
Lands,	3,223,521
Minerals,	375,745
Loans,	17,299,270
Total revenue,	52,477,979 d.

Civil,	5,598,064 d.
Army,	24,198,106
Indian, &c.,	2,631,085
Navy,	9,894,891
Interest,	2,087,657
Debt,	7,906,593
Total expenditure,	52,668,017 d.

By way of comparison we subjoin the tables of revenue and expenditure of the general government, for nine years from 1845 to 1853, inclusive:

REVENUE.

Year ending June 30,	Customs.	Miscellaneous.	Total.
1845,	27,528,113 d.	2,341,021 d.	29,769,134 d.
1846,	26,713,668	2,784,579	29,498,247
1847,	23,747,864	2,588,926	26,336,790
1848,	31,757,070	3,679,679	35,436,750
1849,	28,344,738	2,727,608	31,072,347
1850,	39,668,696	3,707,112	43,375,798
1851,	49,017,568	3,295,412	52,312,979
1852,	47,320,326	2,425,273	49,745,598
1853,	58,931,865	2,405,707	61,337,572

EXPENDITURE.

Year ending June 30,	Civil List and Miscellaneous.	War.	Navy.	Total.
1845,	5,608,207 d.	9,583,208 d.	6,328,639 d.	21,370,049 d.
1846,	6,788,000	13,579,428	6,450,862	26,817,290
1847,	6,715,854	41,381,806	7,931,633	55,929,089
1848,	5,588,070	37,820,163	9,406,737	42,811,970
1849,	14,017,640	17,390,936	9,839,818	57,687,607
1850,	14,839,725	13,901,764	7,928,313	46,669,802
1851,	17,872,967	11,814,793	9,987,798	49,675,558
1852,	17,361,164	13,424,075	9,928,236	40,713,475
1853,	17,174,955	15,476,825	10,891,639	43,543,419

Public debt.] The public debt of the U. S. at different times was as follows:—

Before the adoption of the constitution,	75,416,476 d.
1790,	60,219,021
1800,	52,976,294
1810,	55,173,217
1816,	127,324,923
1820,	91,015,555
1830,	48,565,405
1844,	24,748,188

On the 1st day of July, 1844, the debts of the U. S. consisted of the following particulars:—

	Dollars.	Cts.
Old funded debt,	178,094	84
Outstanding certificates of do.,	24,314	29
Treasury notes of 1812,	4,317	44
Certificates of Mississippi stock of 1814 and 1815,	4,330	9
Debts assumed by Congress, district of Columbia, in 1836, now reduced to	1,360,000	0
Outstanding Treasury notes of two acts,	2,254,207	31
Loan due 1845, 54 per cent.,	5,672,976	88
Do. 1863, 6 per cent.,	8,243,886	88
Do. 1853, 5 per cent.,	7,004,231	35
Total debt,	24,748,188	23

We find from official documents that the principal and interest, including the stock of Texas, payable annually from the 1st of January, 1861, to its final redemption, will be as follows:—

Years when the principal will become due.	Principal. Dol. Cts.	Interest. Dol. Cts.	Total. Dol. Cts.
1861, 10th Aug.,	303,573 92	4,209,735 68	4,513,309 60
1862,		4,194,556 94	4,194,556 94
1863, 1st July,	6,468,231 35	4,082,851 16	10,451,082 51
1864,		3,871,145 38	3,871,145 38
1865,		3,871,145 38	3,871,145 38
1866,		3,829,485 72	3,829,485 72
1867,	4,999,149 48	3,573,688 16	8,572,838 64
1868,		3,573,688 16	3,573,688 16
1869,		3,573,688 16	3,573,688 16
1870,		3,573,688 16	3,573,688 16
1871,		3,573,688 16	3,573,688 16
1872,		3,573,688 16	3,573,688 16
1863, 1st Jan.	8,198,686 03	3,061,767 00	11,260,453 03
1864,		3,061,767 00	3,061,767 00
1865, 1st Jan.	10,000,000 00	2,581,767 00	12,581,767 00
1866,		2,581,767 00	2,581,767 00

1867.	2,581,767 00	2,581,767 00
1868.*	43,029,450 80	372,200 00
	72,969,090 78	59,732,084 22
Add debt of the district cities assumed by congress, whereof there is payable annually, 50,000 d. and interest.		990,600 00
The old funded and unfunded debt, a great proportion whereof will never be called.		119,586 98
And outstanding treasury notes, which, when issued in stock, will be payable in 1868,		209,561 61
		74,288,238 37
Deduct Texas stock,		10,000,000 00
Debt Ist Dec. 1860, as per statement,		64,288,238 37
• 1868, {1st Jan., 27,239,450 00 d.		
{1st July, 16,740,000 00		
		43,029,450 00 d.

The treasury have the power to purchase any portion of the above stocks before the period of redemption, which would, of course, reduce the amounts.

The following table purports to show the amount of the federal, state, municipal and corporate stocks of the U. S., held in Europe, with the increase thereof during four years from 1848 to 1852:—

	July 1, 1848.	July 1, 1852.	Increase.
Federal.	11,000,000 d.	45,000,000 d.	34,000,000 d.
New York.	16,000,000	40,000,000	24,000,000
Pennsylvania.	30,000,000	47,000,000	17,000,000
Ohio.	15,000,000	30,000,000	15,000,000
Michigan.	2,000,000	6,000,000	4,000,000
Massachusetts.	2,000,000	7,000,000	5,000,000
Maryland.	6,000,000	10,000,000	4,000,000
Virginia.	6,000,000	12,000,000	6,000,000
S. Carolina.	2,000,000	2,500,000	500,000
Georgia.	700,000	1,200,000	500,000
Alabama.	7,000,000	8,000,000	1,000,000
Mississippi.	7,000,000	7,000,000	—
Texas.	2,000,000	2,000,000	—
Arkansas.	2,500,000	2,500,000	—
Tennessee.	2,500,000	4,000,000	1,500,000
Kentucky.	2,000,000	3,000,000	1,000,000
Indiana.	5,000,000	10,000,000	5,000,000
Illino.	10,000,000	13,000,000	3,000,000
Missouri.	500,000	1,000,000	500,000
Louisiana.	12,000,000	10,000,000	—
Total.	141,900,000 d.	361,200,000 d.	122,000,000 d.
Less decrease in Louisiana.			2,000,000
Net increase in four years.			120,000,000 d.
Dividend as follows.—			
Transfers of Federal stock.			34,000,000
Transfers of State stock.			18,000,000
Sales of New State stock.			10,000,000
Transfers city and Railroad bonds.			10,000,000
Sales of New Railroad, City and County bonds.			50,000,000
Total as above.			120,000,000 d.

Post-office.] The postmaster-general reported the receipts, 3,487,199 d. during the nine years ending 30th June, 1845, as having averaged 4,364,625 d. a-year. At the close of the fiscal year ending June 30, 1851, there were in operation within the U. S., 6,170 mail routes; their aggregate length was 196,290 m., and 5,544 contractors were employed thereon. The annual transportation of the mails on those routes was 53,272,252 m.; the annual cost thereof, 3,421,754 d.; being about 6c. 4 mills per m. Of these 53,272,252 m. of annual transportation, 8,568,707 m. are required to be performed upon railroads, at a cost of 985,019 d.; being about 11c. 5 mills per mile; 5,454,982 m. in steam-boats, at a cost of 454,893 d.; being about 8c. 3 mills per mile; 19,776,568 m. in coaches, at a cost of 1,047,159 d.; being about 5c. 3 mills per mile; and 19,521,975 m. in modes not specified, at a cost of 934,683 d.; being about 4c. 8 mills per mile. There were on the 30th day of June six foreign mail routes of the estimated aggregate length of 18,349 m. The number of miles of annual transportation thereon is estimated at 615,206. The whole number of post-offices in the U. S. was 19,796. The gross receipts

of the postal department were 6,786,493 d. The expenditure amounted to 6,278,401 d. The earliest reliable statistics of the post-office are those for the year 1790, when the number of post-offices was 75, the extent of post routes 1,875 m., and the revenues of the department 37,935 d. In the United Kingdom there are 15 letters written in the year for every one of the pop.; in the U. S. the number is only 4. In 1854 the letters which passed through the American post-offices were 119,000,000, while the number that passed through the post-offices in this country was nearly 450,000,000. In London, in 1852, there were 41 letters written for every one of the inhabitants; in New York, the number was only 23. The cause of this discrepancy may be the want of postal facilities in America. There is no such thing as prompt and daily deliveries of letters to every house, cottage, and hovel in that country such as in England, and although there are 24,000 post-offices in America, and only 10,000 in the United Kingdom, the former do not afford the accommodation which the latter do on account of the vast area over which they are spread, and are a poor substitute for the letter carrier and rural postman. The pop. of the following 8 places, viz., London, Liverpool, Manchester, Birmingham, Bristol, Preston, Leicester, and Limerick, in 1854, was 3,500,000; the postal receipts were £1,500,000; and the postal local expenditure was £260,000. The pop. of the 8 following places, viz., New York, Philadelphia, Baltimore, Boston, New Orleans, Cincinnati, St. Louis, and San Francisco, was in the same year 1,500,000; the postal receipts were £300,000; and the local expenditure, £80,000. The local cost of working a million of letters in England is £550, and in America £2,400. This difference arises from the cheapness with which letters charged an uniform postal rate can be worked as compared with the cost of working letters charged a variable postal rate. In America there are three inland rates, and in England there is only one. In 1839, before the introduction of an uniform rate of postage in England, the gross expense of working a million of letters was £10,000; at the present time it is only £3,000, or less than one-third.

Military force.] It is evident that the warlike establishment of a great nation, removed by distance from the immediate danger of collision with powerful neighbours, can give no approximate idea of the resources of the country. There has always been a jealousy in the republic against any unnecessary standing army. The principal reliance of the federal union for defence is on the militia of the several states, amounting, by the returns of 1841, to 1,587,722 men. Of this number, about one-fifth, say 300,000 men, are uniformly equipped, and are mustered and drilled several times a-year. The *Army Register* for 1843 contains the appalling announcement, that this multitudinous host was commanded by 627 generals, 2,670 general staff officers, 13,813 field officers, 44,938 company officers, being in all 62,205 officers. Service in the militia entitles to the elective franchise; and all persons able to bear arms are called on to perform military duty thrice a-year. But, according to Captain Hall, the training does not exceed four or six days altogether in the year, and the militia-exercise is so loose, that they would require to be untrained whenever they were called out to actual service. The regular army in 1841 was 12,539; in 1842, 9,012; in 1844, 8,616; in 1853, 11,000. This force was employed chiefly to garrison the fortifications on the sea-coast and the frontiers. In 1846 it was augmented to 30,000 men, chiefly volunteer forces, to meet the demands of the war with Mexico. The officers of

the regular army are chiefly educated at the government military academy at West Point. The army expenses in 1844 were 6,174,485 ds.

Marine force.] A navy department was not created till 1798, nor a permanent naval peace-establishment till 1801. The force was then reduced to 9 frigates; and, excepting an attack on Tripoli, was employed only on coasting-duties, until the war with England in 1812. The military marine in 1828 consisted of 7 ships of 74 guns; 6 frigates of 44 guns; 4 of 36 guns; 2 corvettes of 24; 12 sloops of 18; and 7 schooners; besides 5 ships of the line, with 6 frigates, in course of building. The expenses of the naval establishment for 1828, were 3,786,649 d., or about £750,000; in 1844, 4,703,950 d. The force of the American marine in 1845 was as follows: 11 ships-of-the-line, viz. one of 120 guns, 7 of 80, and 3 of 74; 17 frigates, mostly of 44 guns, with a total of 738 guns; 54 smaller vessels of 30 to 6 guns; 2 steamboats of 500 horse-power, one of 220 horse-power, and one of 120 horse-power—total 1,360 horse-power. "The ratings of these vessels will, however," says Captain Marryat, "very much mislead people as to the real strength of the armament. The 74's and 80's are in weight of broadside equal to most three-decked ships; the first-class frigates are double banked of the scantling, and carrying the complement of men of our 74's. The sloops are equally powerful in proportion to their ratings, most of them carrying long guns. Although flush vessels, they are little inferior to a 38-gun frigate in scantling, and are much too powerful for any that we have in our service, under the same denomination of rating. It is impossible." Captain Marryat continues, "not to be struck with the beautiful architecture of most of these vessels. The Pennsylvania rated 120 guns, of four decks, carrying 146, is not by any means so perfect as some of the line-of-battle ships. The Ohio is, as far as I am a judge, the perfection of a ship of the line. But in every class you cannot but admire the superiority of the models and workmanship. The dockyards in America are small, and not equal to what they may eventually require. They certainly do not require such establishments or such store-houses as we have, as their timber and hemp are at hand when required; but they are very deficient both in dry and wet docks. Properly speaking, they have no great naval depot. This arises from the jealous feeling existing between the several states. A bill brought into congress to expend so many thousand dollars upon the dockyard at Boston in Massachusetts, would be immediately opposed by the state of New York, and an amendment proposed to transfer the works intended to their dockyard at Brooklyn. The other states who possess dockyards would also assert their right, and thus they will all fight for their respective establishments until the bill is lost, and the bone of contention falls to the ground. It is remarkable that along the whole of the eastern coast of America, from Halifax in Nova Scotia down to Pensacola in the gulf of Mexico, there is not one good open harbour. The majority of the American harbours are barred at the entrance, so as to preclude a fleet running out and in to manoeuvre at pleasure; indeed, if the tide does not serve, there are few of them in which a line-of-battle ship, hard pressed, could take refuge. A good spacious harbour, easy of access, like that of Halifax in Nova Scotia, is one of the few, perhaps the only, natural advantage wanting in the U. S." The *New York Herald*, in 1853, thus describes the condition and organization of the federal navy: "The Mississippi is so badly armed, and her guns so light, that an English war-steamer, with only

one large gun, could destroy her before her fire could take the slightest effect. Then look at the miserable sailing qualities of the ships and war-steamer of our navy. Notwithstanding the improvements of the age in naval construction, the fleet—or rather the apology for a fleet, which we possess—stands just where it did 40 years ago. Our war-steamer are the worst of all. In the present state of things two or three British steamers, with guns of long range, could sink every ship and steamer in possession of the government. Yet this country has resources which, if properly wielded, could soon turn the tables against the combined fleets of the world. Our steam-tonnage, including the river-navigation, doubles that of Great Britain, and exceeds that of all nations put together. Here, then, we have scientific, practical, and mechanical skill sufficient to raise a steam fleet that would outnumber, outrun, and defeat all others. But before this could be accomplished the amount of disasters that might be sustained in encounters by our navy and merchant marine would be terrible, to say nothing of the exposure of our badly fortified ports. The vast extent of our seaboard demands protection far beyond what a navy four times as large as our present one could afford. Then look at the list of our old foggy captains in the navy, promoted, not by merit, but seniority—men unfit to take a command. The low wages paid to seamen—being less by one-third than they can procure in merchant-vessels—together with the barbarous system of flogging that prevailed until lately, have driven or kept away almost every good man from the service, and left the dregs behind. In short, the face of things in the navy is changed since the days of Bainbridge, Lawrence, and Decatur; and, had we suddenly a repetition of the war of 1812, we should have a very different tale to tell." The *U. S. Navy Register* for 1852 represents the navy as thus composed in that year:—

	Vessels.	Guns.
Ships of the Line,	12	914
Frigates,	14	680
Sloops of War,	31	402
Brigs,	4	40
Schooners,	3	4
Steamers,	16	63
Store Ships,	5	24
Total,	75	2,047

No estimate can be formed of the real strength of the crews of the American navy, because it is well known that a considerable proportion of this fleet is manned by British seamen, who are attracted by the high pay of the American navy in time of peace. In 1845, of the 6,100 seamen employed in the federal fleet, only 960 were native Americans. But that very circumstance shows the extreme difficulty of manning an American fleet in war, and especially in a war with England. Their ships are, in fact, worked to a great extent by English mercenaries, a large proportion of whom would return to their own colours on the outbreak of hostilities.

Comparative cost of government.] The following remarks on the comparative cost of government in the U. S., and in the United Kingdom, from Mackay's *Western World*, apply to the state of things in 1848: The American people being now about 20,000,000, their expenditure for army, navy, ordnance, pensions, civil contingencies, and foreign intercourse—in short, for everything but the debt, amounts to about 5s. sterling per head. We, being about 30,000,000 of people, have to pay 14s. 8d. per head to defray the expenses of the state, exclusive of the debt; that is to say, for the mere expenses of government, we pay absolutely between four and five times as much as the American; and individually, nearly three times as much. When the debt of both countries is thrown into the scale, this difference is, of course, greatly increased, inasmuch as we pay yearly, as interest upon our debt, more than the whole principal of the debt of America.

even after the war, amounts to. The expenses of all the state governments taken together does not exceed \$500,000 of dollars, which is but a trifle over £1,350,000. This added to the £5,000,000 for the support of the general government, gives £4,125,000, as the aggregate cost of government, both general and local, in America. This makes the cost per head of government in America, exclusive of the debt, 5s. 3d., to contrast with 14s. 8d., the cost per head of the government of England, exclusive of her debt.—The following curious comparative estimates are from another pen. "Beside the despotism of the Czar, the Russian lives, trades, and contributes to the revenue as follows: his staple food is rye and cabbage; his average consumption of colonial produce is 1 lb. 4 oz. to 1 lb. 9 oz. of sugar, and 24 oz. of tea. He trades to the extent of 6 shillings, and contributes to the state 5 shillings. The Austrian, under an absolutism locally modified, and with a rigorous censorship, lives on inferior grains, consumes 2 lb. 11 oz. of sugar, and contributes to the state about 7s. 7d. The Prussian and German, under illusory constitutions, and with a preventive censorship, live—the Prussian on potatoes and rye—the German on inferior grains. They average a consumption of 1 lb. 11 oz. of sugar, and 14 lb. coffee. The estimate of animal food in Prussia is averaged from 16 to 20 lb. and the Prussian contributes rather less than 10s. to the royal treasury. If we now take France, when under a representative form of government, in which at least one adult male in every 44 shared, and with a press which the law may persecute, but whose voice no censorship could silence: the Frenchman's staple food is wheat; he consumes from 6 lb. 10 oz. to 7 lb. 4 oz. of sugar, he trades at the rate of 6s., and contributes upwards of 38s. to the state. The Belgian, with a more liberal constitution, which gives to one adult male in every 31 a vote, lives chiefly on wheat, consumes 14 lb. of sugar, contributes 18s. to the state, and trades to the extent of 7s. The inhabitant of the United Kingdom (whose electors are one in 7) lives on wheat and animal food, consuming, at the lowest calculation, 77 lb. of meat, 19 lb. of sugar, 14 lb. of coffee, and 1 lb. 9 oz. of tea. He trades to the extent of 197s., contributes 5s. to the state, and in its need has contributed upwards of 100s. with far more facility than the Russian pays his 5s. The United States-man, thoroughly self-governed, and whose vote is his birthright, has secured a share of material comfort proportioned to the freedom of his institutions. A choice of grains, 19 lb. of sugar, near 64 lb. of coffee, nearly 1 lb. of tea, and 200 lb. of meat, constitute his average food. His trade averaged, in 1840, 67s., and the cost of his government was 5s. or 6s.

History. The history of the United States naturally divides itself into two periods: the first embracing the annals of the British North American colonies, which separated from the mother-country in 1776; and the second, the history of the republic established by the colonists.

I. *The Colonies from 1607 to 1776.* "In the course of the 17th century," says Everett, "the French and English took possession of all this part of North America, which was not pre-occupied by the Spaniards. The French entered by the St. Lawrence; followed that noble artery to the heart of the continent; traced the great lakes to their parent rivulets and weeping fountains; descended the Mississippi. Miracles of humble and unavailing heroism were performed by their gallant adventurers and pious missionaries in the depths of our western wilderness. The English stretched along the coast. The geographer would have pronounced that the French, in appropriating to themselves the mighty basins of the Mississippi and the St. Lawrence, had got possession of the better part of the continent. But it was an attempt to compose the second volume of the *Fortunes of America*, in advance of the first. This it was ordained should be written at Jamestown and Plymouth. The French, though excelling all other nations of the world in the art of communism for temporary purposes with savage tribes, seem, still more than Spaniards, to be destitute of the august skill required to found new states. I do not know that there is such a thing in the world as a colony of France growing up into a prosperous commonwealth. A half a million of French peasants in Lower Canada, tenaciously adhering to the manners and customs which their fathers brought from Normandy two centuries ago; and a third part of that number of planters of French descent in Louisiana are all that is left to bear living witness to the amazing fact, that not a century ago France was the mistress of the better half of North America. It was on the Atlantic coast and in the colonies originally planted or soon acquired by England, that the great work of the 17th century was performed:—slowly, unobtrusively, effectively. A mighty work for America and mankind, of which even we, fond and proud of it as we are, do but faintly guess the magnitude! It could hardly be said, at the time, to prosper in any of its parts. It yielded no return to the pecuniary capital invested. The political relations of the colonies from the first were those of encroachment and resistance; and even the moral principle as far as there was one, on which they were founded, was not consistently carried out. There was conflict with the savages,—war with the French and Spaniards,—faring and feuds between neighbouring colonies,—persecution of dissenting individuals and sects,—perpetual discord with the crown and the proprietaries. Yet in the main and on the whole, the work went on. Things that did not work simply worked together; or if they did not work together they worked by reaction and collision. Feeble germs of settlement grew to the consistency of powerful colonies; habits of civil government rooted themselves in a soil that was continually stirred; the flame of future republics knit itself as it were in embryo,

under a monarchical system of colonial rule; and in the middle of the 18th century the approach of mighty changes began to be dimly foreseen by gifted spirits. A faint streak of purple light blushed along the eastern sky." Of the thirteen colonies whose delegates signed the declaration of independence, twelve were settled in the 17th cent., and the colonists, with a few trifling exceptions, were Englishmen. In 1690 the number of English colonists in North America did not exceed 4,000; in 1690 it was not less than 80,000, or had increased twenty-fold in the space of 80 years: in 1701 the pop. of the colonies is estimated to have been about 262,000. The period of colonization was one of great intellectual and political excitement in the mother-country. The principles of liberty, the rights of Englishmen, the nature, use, and objects of government, were topics of general interest and discussion in England at this period. It is an observation of Fox, that from 1688 to 1640, the general improvement in all the arts of civil life, and, above all, the astonishing progress of literature, were the most striking among the general features of that period, and were in themselves causes sufficient to produce effects of the utmost importance. Another remarkable element in the society from which swarmed the American colonists, was the state of religion. An imperfect reformation, favoured by the government, and amounting to little more than a secession from the Catholic church, was accompanied by a popular reformation ready to follow out its principles to their results. The *Puritans*, as they were reproachfully called, or Non-conformists, were compelled to attack the temporal power, and to defend civil liberty, while defending freedom of conscience. This mixture of religious faith in the contest for political rights, gave the English Puritans the seal, firmness, and boldness of religious reformers. It is further to be considered, that while the English colonists brought with them to America the broadest and most generous principles of liberty, and those free institutions which convert general maxims into practical truths and make them a part of the daily life of men, they, at the same time, left behind them those restraints which checked their free action in England. They brought with them, across the Atlantic, trial by jury and the right of representation, but left behind them feudal services, privileged orders, corporations and guilds, with other similar burdens upon industry. "Two things worth mentioning," says Everett, "contributed to the successful result of North American colonization. One was the absence of the precious metals. The British colonies were rich in the want of gold. As the abundance of gold and silver in Mexico and Peru contributed, in various ways, to obstruct the prosperity of the Spanish colonies, the want of them acted not less favourably here. In the first settlement of a savage wilderness, the golden attraction is too powerful for the ordinary routine of life. It produces a feverish excitement unfavourable to the healthy growth and calm action of the body politic. Although California from the first has had the advantage of being incorporated into a stable political system, of which as a sister State she forms an integral part, it is quite doubtful whether, looking to her permanent well-being, the gold is to be a blessing to her. It will hasten her settlement; but that would at any rate have advanced with great rapidity. The other circumstance which operated in the most favourable manner upon the growth of the Anglo-American colonies was the fact, that they were called into existence less by the government than by the people; that they were settled not by bodies of colonists, but by individual emigrants. The Crown gave charters of government and grants of lands; and a considerable expenditure was made by some of the companies and proprietors who received these grants; but upon the whole, the U. S. are settled by individuals,—the adventurous, resolute, high-spirited, and many cases, persecuted men and women, who sought a home and refuge beyond the sea; and such was the state of Europe in the 17th and 18th centuries, that it furnished a succession of victims of a long series of political and religious disasters, who found, one after another, a safe and a congenial retreat in some one of the American colonies." In 1606 two companies of merchants and others were incorporated, under the names of the London company and the Plymouth company, with the exclusive right of settling and trading within their respective limits. The former began the colonisation of British America in 1607, by sending to Virginia a colony of 100 men, which, before the end of the year, was reduced by suffering and the badness and scarcity of food, to 38 souls. In October, 1609, the number had been increased by new colonists to 500; but famine again reduced them in six months to 60 persons. In 1619 the first colonial assembly was convoked, consisting of representatives elected by the boroughs, the concerns of the colony having been previously managed by the company in England. As the colonists were mostly adventurers without families, 30 young girls were sent over by the company in 1620, and sold to the young planters, at the rate per head of from 100 to 150 pounds of tobacco. In 1621 the company passed an ordinance vesting the government of the colony in a governor, council, and general assembly, the latter chosen by the inhabitants, with power to enact laws. In 1622, 347 men, women, and children, were massacred by the Indians; a general Indian war followed, and the number of settlements were reduced from 90 to 8. In 1634 the company was dissolved by the crown, and the colony taken into the hands of the king. Such are a few incidents from the humble annals of the first colonists, presenting a picture of suffering too often renewed in other parts of the country. The Plymouth company, to which was granted the exclusive right to trade and settle in N. Virginia, did nothing effectual towards the

colonization of their jurisdiction. But, in 1630, a number of Puritans (Brownists), who had set sail for Virginia, were landed either by accident or treachery within the limits of the Plymouth company. Ten years afterwards they obtained from the company a grant of the land to which they had previously no title but occupancy; but they were never incorporated as a body politic by royal charter, and they therefore remained a mere voluntary association, under laws and magistrates formed and chosen by themselves, until their union with Massachusetts in 1692. The germ of the New England colonies was the Massachusetts colony, settled in 1630 by a company incorporated that year by royal charter, the land having been previously purchased from the Plymouth company. The government of the colony was transferred to Massachusetts in 1630, by vote of the company; and a few years later, the freemen adopted the plan of acting by delegates or representatives; courts were also established, and the charter of a trading company was thus tacitly converted into the constitution of a commonwealth. The Massachusetts colonists were Puritans, and rendered themselves not less obnoxious to the court-party at home by their religious principles, than by this unwarranted assumption of political power. This, with other circumstances, led the Plymouth company to resign their charter to the king in 1636. Such, however, was the distracted state of England at the time, that these remote colonies attracted little attention, and were left to grow up in habits of self-government, while their numbers and wealth were increased by successive emigrations of parties worsted in the civil strife at home. The persecuted Puritans fled to New England; the oppressed Catholics to Maryland; the defeated cavaliers or royalists to Virginia. The first settlement, that of Virginia, says Everett, "was commenced in the spirit of worldly enterprise, with no slight dash however of chivalry and romance on the part of its leader. In the next generation this colony became the favourite resort of the loyal cavaliers and gentlemen, who were disgusted by the anasthetics of the English commonwealth or fell under its suspicion. In the meantime New England was founded by those who suffered the penalties of nonconformity. The mighty change of 1640 stopped the tide of emigration to New England, but recruited Virginia with those who were disaffected to Cromwell. In 1624 the island of Manhattan, of which you have perhaps heard, and if not, you will find its history related with learning, judgment, and good taste, by a loyal descendant of its early settlers, was purchased of the Indians for 24 dollars, a sum of money by the way, which seems rather low for 23,000 acres of land including the site of this great metropolis, but which would, if put out at compound interest at 7 per cent. in 1624, not perhaps fall so very much short even of its present value; though I admit that a dollar for a thousand acre is quite cheap for choice spots on the fifth avenue. Maryland next attracted those who adhered to the ancient faith of the Christian world. New Jersey and Pennsylvania were mainly settled by persecuted Quakers; but the latter offered an asylum to the Germans whom the sword of Louis XIV. drove from the Palatinate. The French Huguenots, driven out by the revocation of the edict of Nantes, scattered themselves from Massachusetts to Carolina. The Dutch and Swedish settlements on the Hudson and the Delaware provided a kindred home for such of their countrymen as desired to try the fortune of the new world. The whigs of England, who rebelled against James II. in 1685 and were sent to the transatlantic colonies, lived long enough to meet in exile the adherents of his son, who rebelled against George I. in 1715. The oppressed protestants of Salzburg came with Oglethorpe to Georgia; and the Highlanders, who fought for Charles Edward in 1745, were deported by hundreds to North Carolina. They were punished by being sent from their bleak hills and sterile moors to a land of abundance and liberty; they were banished from oatmeal porridge to meat twice a-day. The Gaelic language is still spoken by their descendants, and thousands of their kindred at the present day would no doubt gladly share their exile." It would lead us greatly beyond our necessary limits to attempt even a sketch of the annals of the colonies. We must satisfy ourselves with a hasty view of the forms of government which prevailed in them. Of these forms there were three: the royal, the charter, and the proprietary governments. 1. The charter governments were confined to New England. The people of the New England colonies, by their charters, were entitled to the privileges of natural born subjects, and invested with the powers of government, legislative, executive, and judicial; they chose their own governors, elected legislative assemblies, established courts of justice, and in many points exceeded the powers conferred by the charters. The only limitation to their legislative power was, that their laws should not be contrary to those of England. The crown claimed indeed the right of revoking the charters; but the colonists maintained that they were solemn compacts, irrevocable unless for cause. 2. The royal governments were those of Virginia, New York, and at a later period, the Carolinas (1728) and the Jerseys (1702). In these colonies the governor and council were appointed by the crown, and the colonists chose representatives to the colonial assemblies. The governors had a negative on the proceedings of the legislatures, which were composed of the councils and the popular assemblies: the judges and most of the officers were also appointed by the king, although, in many cases, paid by the colony. 3. The proprietary governments were those of Maryland, Pennsylvania, and, at first, the Carolinas and the Jerseys,—the two former remained such till the revolution. These colonies were in the hands of proprie-

tors or individuals to whom grants of land had been made by the crown, with authority to establish civil governments, and make laws under certain restrictions. The history of the proprietary governments is little more than that of a perpetual quarrel between the people and the proprietors, chiefly owing to the manner in which the latter exercised their prerogative of repealing or negating the acts of the colonial assemblies; for even in these colonies representative bodies, partly elected by the freemen, and partly summoned by the proprietors, were soon introduced. The common English right of assent to taxes, as the colonists themselves called it, was asserted in the fullest manner by nearly all the colonies as early as the middle of the 17th cent.; and it was a commonly received opinion in America, that the authority of parliament in the colonies did not extend to taxation or internal legislation, but was confined to the regulation of trade. For a long time the colonists enjoyed almost unlimited freedom of commerce; it was not until they had surmounted the hardships and difficulties incident to their first establishment, and had begun to increase rapidly in wealth, that their commerce began to be submitted to restrictions intended to secure its benefits to the mother-country. In the two French wars, 1744—1748, and 1755—1763, the colonists took an active part, and favourably distinguished themselves on several occasions. The various Indian wars which prevailed at intervals all along the extensive and exposed line of frontiers, were likewise in general conducted by the colonists themselves. Primary schools were first established in New England, and it early became a favourite object, in that part of the country, to enable every individual to read and write. Colleges were also founded for the higher education of youth; and, at the beginning of the revolutionary war, there were eight institutions of this kind in the country. The peace of Paris, in 1763, by annihilating the French power in North America, relieved the colonies from the pressure of foreign hostilities. But a course of policy was now adopted by the British ministry, which finally led to the separation of the American colonies from the British empire. In 1764 an act of parliament was passed, continuing the duties on certain articles imported into the colonies, towards raising a revenue; and it was provided that all penalties for breach of the acts of trade and revenue committed in America might be recovered in any vice-admiralty court in the colonies. In 1765 (March 22) the stamp act was passed; and soon after, a bill was brought in authorizing the quartering of troops in the colonies. These measures were received in America with universal opposition; and a general congress of the colonies was held at New York, which adopted a declaration of rights and grievances, asserting taxation by themselves, and trial by jury, to be the inherent rights of the British subjects in the colonies. In this state of affairs the stamp-act was repealed, March 18, 1766; at the same time, a declaratory act was passed, asserting the right of parliament to bind the colonies in all cases whatsoever. The Rockingham ministry, by which these measures were carried, was soon displaced; and in June, 1767, the new chancellor of the exchequer brought in a bill imposing duties on glass, paper, pasteboard, white and red lead, painters' colours, and tea, imported into the colonies. This act, after giving rise to combinations among the Americans against the importation of the articles specified, was also repealed, March 5, 1770, the duty on tea being alone continued. The colonists accordingly renounced the use of that article, or obtained it from foreign countries. In 1773 the ministry procured an act, permitting to East India a drawback on teas exported to America, for the purpose of rendering it cheaper in this country, and inducing the Americans to submit to the small duty imposed upon it. Large shipments were made; but in Philadelphia and New York the vessels were not allowed to land their cargoes; in Charleston it was put into stores, but not permitted to be offered for sale; and in Boston, where the British authorities refused to allow the vessels to return without having been entered, the tea was thrown overboard. This act of violence was followed by the Boston port bill, interdicting all commercial intercourse with the town of Boston, and by a bill for entirely subverting the government of Massachusetts. In this crisis the other colonies made common cause with Massachusetts; and a general congress met at Philadelphia on the 5th of September, which adopted a declaration of rights, asserting the exclusive power of legislation, in all cases of taxation and internal policy, to be in the provincial legislatures. They next proceeded to interrupt all commercial intercourse with Great Britain, by the non-importation, non-consumption, and non-exportation agreement, binding themselves not to import, consume, or export certain articles, until the acts complained of should be repealed. These proceedings had no effect on the policy of the British government, and general preparations now began to be made in the colonies for armed resistance. A detachment of troops sent from Boston to seize some provincial stores collected at Concord, fired upon the citizens who assembled to oppose them, and actual hostilities were commenced. The second congress, which met in May, 1775, determined to organize an army; and Washington was appointed commander-in-chief of the colonial forces. "We have counted the cost of this contest," said congress, "and are with one mind resolved to die freemen rather than to live slaves." On the 4th of July 1776, congress adopted a declaration of independence.

II. *War of independence.* 1. The declaration of independence, after recapitulating those acts of the British government which were viewed as subversive of the liberties of the British subjects in America, declares the united colonies to be free and indepen-

dent states absolved from all allegiance to the British crown, and all political connection between them and the state of Great Britain to be totally dissolved. The affairs of Lexington and Bunker hill, the capture of several posts, and an unsuccessful expedition against Canada, were among the acts of hostility which had preceded the declaration of independence. By the beginning of March, 1776, 14,000 regular troops had been enlisted, and the British were obliged to evacuate Boston on the 17th of March. The military operations which closed the year were the capture of New York by the British forces under Lord Howe and Sir W. Howe, after the defeat of the Americans on Long Island; the battle of White Plains, and the retreat of the American forces through the Jerseys and across the Delaware; and the subsequent affairs at the battles of Trenton and Princeton. The campaign of 1777 was more favourable to the American cause. General Howe had indeed taken possession of Philadelphia, and the Americans had been defeated on the Brandywine, and at Germantown; but the northern army, under the command of General Gates, after some partial success, compelled General Burgoyne to surrender his army at Saratoga on the 17th of October, and thus cut off the communication between New York and Canada. On the reception of this intelligence in Europe, the French government, on 6th Feb. 1778, entered into treaties of amity and commerce with the U. S., and thus recognised their existence as an independent nation. The British commander now came to the resolution to evacuate Philadelphia, and concentrate his forces at New York. About the same time a French fleet arrived on the coast, having on board about 4,000 French troops. Congress had hitherto consisted of an assembly of delegates from 13 independent states, with little more authority than that of advising the states to adopt certain measures; money was raised only by consent of the states; congress had no power to enforce obedience, and the states were held together only by external pressure. After long and embarrassing discussions, articles of confederation were agreed upon by congress, Nov. 15, 1777, and submitted to the state legislatures for ratification. By these articles, the exclusive cognisance of foreign relations, the rights of war and peace, and the right to make regulations of men and money, were confided to congress. But, like all former confederations, the decrees of the federal government operated upon the states in their sovereign capacity, and not upon the individual citizens; and as soon as danger from abroad was past, this confederacy was found to be utterly incompetent to govern the country. In 1778 the south became the principal theatre of warlike operations. In October 1781, the contest was finally closed by the surrender of Cornwallis at Yorktown, to the combined French and American forces under Washington and Rochambeau. In the following year a treaty was concluded between Holland and the U. S.; and after long protracted negotiations, a definitive treaty of peace with Great Britain was signed, Sept. 24, 1783. Denmark, Spain, Sweden, and Russia, had previously recognised the U. S. as a sovereign power. The war had been attended with great sacrifices on the part of the Americans. Without arms, ammunition, or pecuniary resources, congress was obliged to have recourse to a paper medium. Bills of credit to the amount of 300,000,000 dollars had been emitted during the first five years of the war, and no provisions were made for redeeming them. In 1780 these bills had depreciated to such a degree as to cease to circulate: the treasury was empty, and the army unpaid, without clothing, and often without food. At this crisis the French government made a grant of 4,000,000 livres by way of subsidy, and a further sum by way of loan; and finally a loan of 10,000,000 livres was raised in Holland. These supplies, with a new organization of the finance department, and the establishment of a national bank, contributed to relieve the pressure. At the peace the public debt was found to amount to 42,000,000 *l.*, on which congress was unable to pay even the interest; but the regulations and regulations of that body were little regarded by the states, and the country was becoming a prey to anarchy, when a convention, composed of delegates from the several states, met at Philadelphia in May, 1787, for the purpose of revising articles of confederation. On the 17th of September, this convention, under the presidency of Washington, agreed on a federal constitution to be proposed to the people in state conventions.

From the establishment of a federal government] The thirteen united colonies, which issued the declaration of independence, entered into the confederation of 1778, and formed the constitution of 1789, were New Hampshire, Massachusetts, Rhode Island, Connecticut, New York, New Jersey, Pennsylvania, Delaware, Maryland, Virginia, N. Carolina, S. Carolina, and Georgia. At an early period of the struggle, congress had recommended to the assemblies and conventions of the several colonies, to establish governments suited to the new exigencies of the country: not a difficult task to a people accustomed to manage their own affairs, and whose legislative and judicial institutions in some cases needed only a slight reform. The constitutions of the states were in general modelled on the same plan, having, in imitation of the British constitution, a legislative authority vested in two houses, one or both of which were chosen directly by the people; and an executive, with definite power, chosen by the people or by their representatives. These documents are the first written constitutions of government with which history makes us acquainted. These governments were all highly popular in their principles, simple in their machinery, and well-calculated for the management of home affairs; but the general regulation of commerce on uniform principles, the management of the intercourse with

foreign states, the support of a military peace establishment, the settlement of disputed questions between thirteen sovereign powers, required a general authority competent to decide these and similar questions. The convention of Philadelphia, after a session of about four months, finally adopted on 17th September, 1787, the present federal constitution of the U. S., with the provision, that the ratification of it by 9 states should be sufficient for the final establishment of the new system. The first president was Washington, who was chosen by a unanimous vote of his fellow-citizens. The first congress assembled at New York, March 4, 1789, and immediately proceeded to raise a revenue by imposing duties; to establish a federal judiciary consisting of a supreme court, with circuit and district courts; to organize the executive administration, by creating the departments of war, of foreign affairs, and the treasury; to fund the debt of the United States, and assume the state debts; and to create a national bank. The jealousy of state rights, which had made the adoption of a federal constitution a matter of great delicacy and difficulty, soon began to manifest itself in opposition to the federal government, and the two parties of federalists and anti-federalists were distinctly marked from an early period. Indian hostilities required an increase of the military establishment; and a duty imposed on domestic spirits met with open resistance from the people. Meanwhile the progress of the French revolution excited a lively interest in America. The president indeed attempted to maintain a strict neutrality in the contest between the new republic and the European cabinets; but the minister of the French convention, offended with this neutral policy, actually undertook to raise troops against the Spanish possessions, to fit out naval expeditions in the ports of the U. S., in direct defiance of the orders of the executive; and was supported in this conduct by a strong party in different parts of the country. A treaty settling the boundaries between the U. S. and the Spanish colonies, and conceding to the former the right to navigate the Mississippi, was concluded Oct. 27, 1795; and a treaty with Great Britain was ratified Aug. 14, 1795. This latter treaty—commonly known as Jay's treaty—created such divisions in the U. S. as to put in danger the existence of the government. Petitions against it were sent in from all parts of the country, and it was the subject of a violent debate in the next session of congress. "The objections of those opposed to carrying the treaty into effect, were, generally, that it wanted reciprocity; that it gave up all claim of compensation for negroes carried away contrary to the treaty of peace, and for the detention of the western posts; that it contravened the French treaty, and sacrificed the interest of an ally to that of Great Britain; that it gave up, in several important instances, the law of nations, particularly in relation to free ships making free goods, cases of blockade, and contraband of war; that it improperly interfered with the legislative powers of congress, especially by prohibiting the sequestration of debts; and that the commercial part gave few advantages to the U. S."—[Fittin's History of the United States.] But public opinion gradually settled in favour of the treaty, as being the only possible means of saving the country from becoming involved in the wars of the French revolution. The depredations of French cruisers upon the commerce of the U. S. were such, that, on the 7th of July, 1797, the treaties with France were declared to be no longer obligatory. But the revolution of 18th Brumaire changed the policy of the French republic, and a new treaty was concluded between the two powers, Sept. 30, 1800. On the retirement of Washington, John Adams was elected to succeed him; and, in 1801, Thomas Jefferson was chosen third president of the U. S. One of the most important events of this period was the purchase of Louisiana from the French government, in 1803, for the sum of 15,000,000 dollars, 2,500,000 of which were retained as a compensation for illegal captures made by France. After the rupture of the peace of Amiens the Americans became possessed of an extensive and lucrative carrying-trade; but the continental system of Napoleon, and the counter measures of the British government, directed to the interruption of all commercial intercourse between the respective belligerents and neutrals, threatened the entire destruction of American commerce. Great Britain also claimed the right of searching American vessels, and impressing from them British seamen. To counteract the imperial decrees and the British orders-in-council, the general government of the U. S. in 1807 prohibited the exportation of any article from the U. S. territories; but this measure was received with so much opposition that in 1809 the embargo was repealed; at the same time, all trade and intercourse with France and England was prohibited by act of congress. In June, 1812, war was declared against Great Britain, and was continued, with varied fortune, for three years, during which the Americans attempted, without success, the conquest of Canada, and the British were repulsed in several attacks upon the maritime cities of the U. S. Peace was finally concluded at Ghent, December 24, 1814, by a treaty which settled nothing, and made no allusion to the causes of the war.

The change in European affairs produced by the peace of Paris in 1815, contributed to introduce a considerable change in the policy of the American government, and the relations of domestic parties, which still continues in operation. Previous to this time, party-divisions were founded, in a great measure, upon points of foreign policy, and on foreign predilections or aversions. The facilities for commerce had diverted a great portion of the national capital into commercial channels, and manufactures had received little attention. Since that period European politics have exercised less influence in the country; manufacturing in-

dustry has been developed to an astonishing degree; internal improvements have been pushed with vigour; several new states have been admitted into the Union; and many years of peace and prosperity have well developed the resources of the country. The following extract from the message of President Monroe to congress, in 1823, develops what may be regarded as the dominant idea in the Union with relation to foreign politics. "In the wars of the European powers, in matters relating to themselves, we have never taken any part, nor does it comport with our policy so to do. We owe it to candour, and to the amicable relations existing between the U. S. and those Powers, to declare, that we should consider any attempt on their part to extend their system to any portion of this hemisphere, as dangerous to our peace and safety. With the existing colonies and dependencies of any European power, we have not interfered, and shall not interfere. But with the governments who have declared their independence, and maintained it, and whose independence we have, on great consideration and on just principles, acknowledged, we could not view any interposition for the purpose of oppressing them, or controlling in any other manner their destiny by a European power, in any other light than as the manifestation of an unfriendly disposition towards the U. S. It is impossible that the Allied powers should extend their political system to any portion of either continent, without endangering our peace and happiness, nor can any one believe that our southern brethren, if left to themselves, would adopt it of their own accord. It is equally impossible, therefore, that we should behold such interposition in any form with indifference." The maxim that no European nation has a right to interfere in the policy or affairs of the American continent is a sufficiently arrogant one of itself; but appears more singularly preposterous as put forth by a government which has increased its powers by extending territory and jurisdiction on every possible occasion and on the slightest pretexes.

Immediately after the establishment of Mexican independence, the country lying between the Sabine and the Rio-Grande was overrun by emigrants from the U. S., whose influence prevailed on Texas to declare for the federal constitution of the Mexican republic, when Santa Anna, in 1824, had succeeded in establishing a military despotism. The contest between Texas and Santa Anna terminated in the capture of the Mexican general, and the recognition by him, as the price of his liberty, of the independence of Texas. The same influence which had overthrown Santa Anna's power in this quarter of the Mexican territory, ultimately succeeded in annexing it to the federal union of the North American states in 1845; and in 1848 New Mexico and California were added to the union. The history of these latter transactions is sketched in the respective articles CALIFORNIA, MEXICO, and TEXAS.

UNITY, a township of Waldo co., in the state of Maine, U. S., 31 m. NE of Augusta, drained by a branch of Sebasticooti river. Pop. in 1840, 1,457; in 1850, 1,557.—Also a township of Sullivan co., in the state of New Hampshire, 45 m. W by N of Concord. It has a diversified surface, and is drained by Little Sugar and Beaver Meadow rivers. Pop. in 1840, 1,238.—Also a township of Westmoreland co., in the state of Pennsylvania, 130 m. W of Harrisburg, drained by Crabtree and Big Sewickly creeks, and by Nine Mile river. Pop. in 1840, 3,003; in 1850, 3,100.—Also a township of Columbiana co., in the state of Ohio, 149 m. NE by E of Columbus, drained by tributaries of Little Beaver river, and intersected by the Ohio and Pennsylvania railroad. Pop. in 1840, 1,896; in 1850, 2,095.—Also a township of Sullivan co., in the state of New Hampshire.—Also a village of Alexander co., in the state of Illinois, 5 m. N of the Mississippi.

UNKEL, a village of Prussia, in the prov. of the Rhine, regency and 26 m. NW of Coblenz, and circle of Neuwied, on the r. bank of the Rhine. Pop. 680. The environs are noted for their wine.

UNKELBACH, a village of Prussia, in the reg. of Coblenz, circle of Ahrweiler. Pop. 380.

UNKENBACH, a village of Bavaria, in the circle of Pfalz, district of Overmoschel. Pop. 864.

UNKJAR-SKELESSI, a village of Turkey, on the Bosphorus, 8 m. NNE of Constantinople, celebrated as the spot where a treaty of defensive alliance, between Russia and Turkey, was concluded on the 8th of July 1833, on "the principle of conservative and mutual defence." By the 2d article of this treaty preceding treaties were confirmed; and by the 8d art. Russia engages to furnish by land and by sea as many troops as the Sublime Porte might call for. A separate and secret art.

appended to this treaty, recites that, "in virtue of one of the clauses of the first article of the patent treaty of offensive alliance concluded between the imperial court of Russia and the Sublime Porte, the two high contracting parties are bound to afford to each other mutually, substantial aid, and the most efficacious assistance for the safety of their respective dominions. Nevertheless, as his Majesty the emperor of all the Russias, wishing to spare the Sublime Ottoman Porte the expense and inconvenience which might be occasioned to it, by affording substantial aid, will not ask for that aid if circumstances should place the Sublime Porte under the obligation of furnishing it, the Sublime Ottoman Porte, in the place of the aid which it is bound to furnish in case of need, according to the principle of reciprocity of the patent treaty, shall confine its action in favour of the imperial court of Russia to closing the strait of the Dardanelles—that is to say, to not allowing any foreign vessel of war to enter therein under any pretext whatever."

UNKIE-TUNKI, a hill-fort of Hindostan, in the prov. of Ayrungabad, on a rock which rises precipitously to the height of 200 ft.

UNNA, a town of Prussia, in the prov. of the Rhine, regency and 18 m. NW of Arnberg, and circle of Hamm. Pop. 5,663. It is enclosed by walls and ditches, and has an hospital. It has manufactories of calico, hats, distilleries of brandy, and breweries.—Also a river of Turkey in Europe, in Croatia, which has its source in Mount Sabor, the Dinaric Alps, on the confines of Dalmatia; runs first NW, then bends NE, and afterwards E, forming for some distance the line of separation from Austria, and joins the Save on the confines of Slavonia. Its principal affluents are the Unnatz and Sanna, both of which it receives on the r. The chief towns on its banks are Ostrovitz, Bihach, Novi, and Turk-Dubitz.

UNNATZ, a town of Turkey in Europe, in Croatia, on the l. bank of a river of the same name, an affluent of the Unna, 20 m. SE of Ostrovitz.

UNNERSDORF, a village of Bavaria, in the circle of Upper Franconia, lordship of Bans. Pop. 240.

UNSANG, a district in the NE part of Borneo, forming the E extremity of a peninsula which projects between the Mindoro and Celebes seas, and presents a narrow isthmus between Sandakan and Darvel bays.

UNSEBURG, a village of Prussian Saxony, in the reg. of Magdeburg, circle of Wanzleben, on the Bode. Pop. 850.

UNSHA, a town of Russia, in the gov. of Kestroma, circle of Makariev, on a stream of the same name which flows into the Volga.

UNST, an island and a parish in the extreme N of Shetland. The island is separated on the SW from Yell by Blumol-sound, a rapid tideway about 1 m. broad, and from Fetlar on the S by a sound between 3 and 5 m. broad. It forms a slender, though indented oblong, extending from NNE to SSW; and measures 11½ m. in length, about 3½ m. in mean breadth, and upwards of 36 sq. m. in area. The coast, over much the larger part of its extent, is a constant alternation of headlands, and of indenting bays and creeks. Balta-sound on the E. and Uyea-sound on the S, are so covered by isles of their own name, and screened by projecting headlands at their entrances, as to afford good shelter to shipping. The isles Balta and Uyea, the islets Hafgruna and Hunie, and the holms Sha, Burra-frith, Woodwick, Newgord, Hogoland, and Weatherholm, skirt the coast of U., and are comprehended in its parish. The surface, compared with that of the other Shetland islands, is reckoned level. About

2,000 acres are arable, and nearly an equal number of acres are meadow and grass-lands, which might easily be brought into tillage. Five-sixths of the whole area are in commonage; and might, to a considerable extent, be improved. Gneiss, serpentine, chlorite, schist, and diallage rock, are the principal rocks of the island; and talcose and micaceous schists, primitive limestone, and quartz and hornblende rocks, also occur. Fishing here, as throughout Shetland, forms the prime employment of the inhabitants. Articles of Shetland hosiery form a considerable article of manufacture. A village has recently been built at Uyea-sound. Pop. of the p. of U., in 1831, 2,909; in 1851, 2,977.

UNST (NORRN), an isolated rocky islet lying to the N of the Shetland isles, on which a lighthouse has recently been erected.

UNSTONE, a township in the p. of Dronfield, Derbyshire, $\frac{1}{2}$ m. N by W of Chesterfield. Pop. in 1831, 586; in 1851, 776.

UNSTRUT, a river of Prussia, which has its source in Saxony, in the Dun-gebirge, a little to the W of Dingelstadt; runs first SE; enters the duchy of Saxe-Coburg-Gotha; flows thence NE to the confines of the principality of Schwarzburg-Rudolstadt, and afterwards SE to the Saxon-Saale, which it joins on the l. bank, a little to the N of Naumburg, and after a total course of about 120 m. Its principal affluents are the Wipper and the Holme on the l., and on the r. the Gera-Mühlhausen. Thamsbruck, Artern, Lancha, and Freyburg, are the chief towns on its banks.

UNTER, a German word signifying Lower. Names with which it is compounded, not found amongst the following, are to be sought for in the subsequent word.

UNTERACH, a village of Austria, in the gov. of Enns, circle of Kogel. Pop. 600.

UNTERAGERI, a commune in the Swiss cant. of Zug. Pop. in 1852, 2,248.

UNTERBACH, a village in the Swiss cant. of Valais, bail. of Baron. Pop. 228.

UNTERFRANKEN. See FRANKONIA (LOWER).

UNTERHALLAU, a village and district in the Swiss cant. of Schaffhausen, bail. of Unterklettgau. Pop. 2,607.

UNTER-INNTHAL. See INN.

UNTERJESINGEN, a town of Württemberg, in the circle of the Schwarzwald, on the l. bank of the Ammer. Pop. 1,400.

UNTERLAND, a district in the W part of the duchy of Saxe-Meiningen. It contains the town of Meiningen.

UNTERSCHACHEN, a village of Switzerland, in the cant. of Uri, 9 m. E of Altorf. Pop. 475. It has several mineral springs.

UNTERSCHUTZEN, a village of Prussia, in the prov. of the Rhine, and circle of Altenkirchen. Pop. 200. It has a powder-mill.

UNTER-SEE. See ZELLER-SEE.

UNTERSEEN, a small town of Switzerland, in the cant. and 30 m. SE of Bern, and bail. of Interlachen, on the Aar, between lakes Thun and Brienz. Pop. 1,360. The houses are generally of grotesque structure, and black in colour. It has several saw-mills and box-manufactories, and in the vicinity are mines of silver and copper.

UNTER-THURGAU, a village of Bavaria, in the circle of Swabia, SE of Kaufbeuren. Pop. 600.

UNTER-TURKHEIM, a town of Württemberg, in the circle of the Neckar, bail. and 2 m. SE of Canstadt. Pop. 1,700. It has a gypsum quarry. Wine is cultivated in the environs.

UNTERVAZ, a district and v. of Switzerland, in the cant. of the Grisons, in the Unterland. Pop. 1,097.

UNTERWALDEN, a canton situated nearly in the centre of Switzerland, between the parallels of $46^{\circ} 44'$ and $46^{\circ} 57' N$; bounded on the N by the lake of Luzern; on the E by the canton of Uri; on the S by Bern; and on the W by the canton of Luzern. It is about 25 m. in length from NE to SW, and 20 m. in its greatest breadth; with an area of only 260 sq. m. Pop. in 1837, 22,571; in 1850, 25,168, of whom only 28 were Protestants. Of this pop. 13,799 belonged to the Upper U., and 11,399 to the Lower U.; and only 52 in the whole number were foreigners. It consists of four principal valleys, covered with meadows and pasture lands, and surrounded by lofty Alps, of from 3,000 to 10,000 ft. elevation above sea-level, and some of which, as the Titlis and Surene, are covered with glaciers and perpetual snow. The general slope of the surface is from the S towards the N, or the shores of Lake Luzern, into which the two principal streams of the canton, the Aa and the Melch, discharge themselves. The eastern part of the canton has a favourable exposure, and a mild temperature; but the vine is reared with difficulty. The exports consist of cattle, hides, cheese, butter, honey, tallow, timber, and fuel; the imports, of corn, wine, and various manufactures. In point of manners, this is altogether a primitive district, a spot where, in conjunction with the neighbouring cantons of Schwytz and Uri, the independence of the republic had its origin, and the simple habits of the assertors of Swiss liberty are in a great degree preserved. The constitution is democratic. The chief towns are Stanz, the capital of Bas-Unterwald; Sarnen, the capital of Haut-Unterwald; and Engelberg. The contingent is 677 men.

UNTERWYL, a hamlet of Switzerland, in the cant. of Argau and parish of Gebistorf. Marble and coal are found in the environs.

UNTHANK, a township in the p. of Skelton, Cumberland, $\frac{1}{2}$ m. NW of Penrith. Pop. 255.

UNTSCHEN, a village of the duchy of Saxe-Altenburg, and bail. of Altenburg. Pop. 150.

UNVERRE, a commune of France, in the dep. of the Eure-et-Loir, cant. and 5 m. ESE of Brou, near the Oizanne. Pop. in 1846, 2,478.

UNWATTEN, a central county of the state of Michigan, U. S., comprising an area of 576 sq. m., drained by Maskegon river and other small streams.

UNZMARKT, a market-town of Styria, in the circle and 9 m. W of Judenburg, on the l. bank of the Muhr. It has nitre works and a forge.

UOMO-MONTO (PUNTA DELL'), a headland of the N coast of Sicily, in the prov. and district of Palermo, in N lat. $38^{\circ} 11' 20''$, and E long. $13^{\circ} 7' 30''$.

UPA, a river of Russia, in the gov. of Tula, which flows first NNW, and then WSW to the Oka. It has a total length of about 150 m., and is navigable to the town of Tula.

UPADRANG, a town of Nepal, 40 m. WSW of Catmandu, on the l. side of the Tirsul-Ganga.

UPAIX, a town of France, in the dep. of the Hautes-Alpes, and cant. of Laragne, 11 m. NW of Sisteron. Pop. 720.

UPANEMÁ, a river of Brazil, in the prov. of Rio-Grande-do-Norte, an affluent of the Appodi.

UPAR, or UPARI, a valley of New Granada, in the dep. of the Magdalena, intersected by the Cesare. It runs from N to S, and is 45 m. long and 30 in breadth. It produces sugar, and has mines of silver, copper, iron, and lead. It is well-peopled.

UPATA, a town and canton of Venezuela, in the prov. of Cartagena. The town is situated in N lat. $7^{\circ} 49'$, and W long. of Caracas $4^{\circ} 31'$, at an alt. of 351 yds. above sea-level, 31 leagues from Angostura. It contains a handsome church, and a pop.

of about 700.—The canton, containing 6,000 sq. leagues, and a pop. of 12,000, three-fourths of whom are independent Indians, Guayanas, Caribbees, Guayacas, Warrows, Pariagotos, and Aruaks, is the most beautiful district in the whole course of the Orinoco. It consists of undulating elevated savannahs, traversed by ranges of wooded hills, and presenting varied scenery. The climate is more temperate than in other parts of the Lower Orinoco. Vast herds of wild cattle and horses graze over these immense plains. The Capuchins of Catalonia had formerly thirty missions in the neighbourhood of the capital of the canton; but at the breaking out of the war of independence, the civilized Indians dispersed, and the missions were mostly abandoned. A great deal of coffee, cotton, sugar, and excellent tobacco is exported from the *labranzas* in the neighbourhood of the capital; and it has recently been reported that gold dust has been observed in large quantities in the bed of the Yurukéi river in this canton. The nearest port on the Orinoco to Upata is Puerto-de-las-Tablas, which is reached by a ride of 17 leagues over a beautiful country. Puerto-de-las-Tablas is near the mouth of the Caróni, and a few hours' pull above Guayana-Vieja, which Keymis took, and where Sir Walter Raleigh's son was killed. The steamer that now runs between Trinidad and Angostura calls at Puerto-de-las-Tablas.

UPATOIE, a village of Muscogee co., in the state of Georgia, U. S., on the W branch of a creek of the same name, an affluent of the Chattahoochee river, and intersected by the Muscogee railway. Pop. in 1840, 100.

UP-AVON, or UPHAVEN, a parish in Wilts, 9 m. ESE of Devizes. Area 3,329 acres. Pop. in 1831, 498; in 1851, 510.

UPCHURCH, a parish in Kent, 5 m. E of Chatham. Area, with the hamlets of Ham, Haliwell, and Otterham, 5,138 acres. Pop. in 1851, 497.

UPERNAWICK, a district of Greenland, on the shore of Baffin's bay.

UPHALL, a parish in Linlithgowshire, bounded on the SE and S by Edinburghshire. Area 3,922 acres. The rivulet Broxburn passes eastward through it, and gives its name to a village, with 500 inhabitants, a little NE of the centre of the p. The village of U., with 160 inhabitants, is situated in the W side of the p., 13 m. from Edinburgh. Pop. in 1831, 1,254; in 1851, 1,331.

UPHAM, a parish in Hants, 2½ m. NW by N of Bishop's Waltham. Area 2,852 acres. Young, author of *The Night Thoughts*, was born here in 1681. Pop. in 1831, 511; in 1851, 550.

UPHILL, a parish in Somersetshire, 8 m. NW by W of Axbridge, at the mouth of the Axe. Area 1,697 acres. Pop. in 1831, 306; in 1851, 422.

UPIE, a commune of France, in the dep. of the Drome, cant. and 8 m. SSW of Chabeuil. at the foot of a mountain. Pop. 1,098.

UPIGNY, a departement and commune of Belgium, in the prov. of Namur. Pop. 268.

UPITANGÁ, a river of Brazil, in the prov. of Santa Catharina and district of São-Francisco.

UPLAND, an ancient prov. of Sweden, now comprised in the prefectures of Upsal and Stockholm.

UPLEADON, a parish in Gloucestershire, 3 m. E by N of Newent, on the river Leadon. Area 1,207 acres. Pop. in 1831, 241; in 1851, 275.

UPLEATHAM, a parish in the N. R. of Yorkshire, 3 m. NNE of Guisborough. Area 1,100 acres. Pop. in 1831, 265; in 1851, 447.

UPLOWMAN, or UFLOWAN, a parish in Devon, 4½ m. ENE of Tiverton. Area 2,912 acres. Pop. in 1831, 335; in 1851, 386.

UPLYME, a parish in Devon, 1 m. NNW of

Lyme-Regis, on the borders of Devonshire. Area 3,199 acres. Pop. in 1831, 975; in 1851, 1,032.

UPMINSTER, a parish in Essex, 3¼ m. ESE of Romford. Area 3,373 acres. Pop. in 1851, 1,238.

UPOLU, or OATUAH, one of the Samoan group, in 8 lat. 13° 49'. It is about 40 m. in length, and 10 m. in breadth; and is richly covered with timber. On its N coast is Apia harbour, in the above lat., and W long. 171° 40'.

UP-OTTERY, a parish in Devon, 5 m. NNE of Honiton. Area 5,830 acres. Pop. in 1851, 1,042.

UPPER, a township of Cape May co., in the state of New Jersey, U. S., 13 m. NE of Cape May, bounded on the SE by the Atlantic, and intersected by the Tuckahoe and Cedar Swamp creeks. Pop. in 1840, 1,217.—Also a township of Lawrence co., in the state of Ohio. Pop. 1,180.—Also a township of Carroll co., in the state of Arkansas. Pop. 478.—Also a township of Crawford co., in the same state. Pop. 1,144.

UPPER ALLOWAY'S CREEK, a township of Salem co., in the state of New Jersey, U. S., 7 m. SE of Salem, drained by Alloway's and Slow creeks. Pop. in 1840, 2,235.

UPPER ALTON, a village of Madison co., in the state of Illinois, U. S., 2½ m. E of the Mississippi. Pop. in 1840, 1,002; in 1850, 2,000.

UPPER BERN, a township of Berks co., in the state of Pennsylvania, U. S., bounded on the N by the Blue mountains, and on the E by Schuylkill river. Pop. in 1840, 2,906.

UPPER CHICHESTER, a township of Delaware co., in the state of Pennsylvania, U. S., watered by Hook and Naaman's creeks. Pop. in 1840, 475.

UPPER DARBY, a township of Delaware co., in the state of Pennsylvania, U. S., drained by Cobb's and Darby's creeks. Pop. in 1840, 1,489.

UPPER DUBLIN, a township of Montgomery co., in the state of Pennsylvania, U. S., 99 m. E of Harrisburg, drained by Darby and Cobb's creeks. Pop. in 1840, 1,322; and in 1850, 1,550.

UPPER FREEHOLD, a township of Monmouth co., in the state of New Jersey, U. S., 12 m. E by S of Trenton, bordered on the NE by Assunpink creek, and on the S by Crosswicks creek, and drained by affluents of these rivers. Pop. in 1850, 2,556.

UPPER HANOVER, a township of Montgomery co., in the state of Pennsylvania, U. S., 81 m. E by N of Harrisburg, drained by Perkioman creek and its branches. Pop. in 1840, 1,467; in 1850, 1,570.

UPPER MACUNGY, a township of Lehigh co., in the state of Pennsylvania, U. S., 74 m. ENE of Harrisburg, drained by Lehigh creek. Pop. in 1840, 1,769; in 1850, 1,900.

UPPER MAHANTANGO, a township of Schuylkill co., in the state of Pennsylvania, U. S., 37 m. NE by N of Harrisburg, drained by two branches of Mahantango creek. Pop. in 1840, 1,291.

UPPER MAHANY, a township of Northumberland co., in the state of Pennsylvania, U. S. Pop. in 1840, 1,131.

UPPER MAKEFIELD, a township of Bucks co., in the state of Pennsylvania, U. S., 25 m. NNE of Philadelphia, bordered on the N by Pidcock's creek. Pop. in 1840, 1,490.

UPPER MARIETTA, a village of Lancaster co., in the state of Pennsylvania, U. S., on the E bank of the Susquehanna, and on the Columbia branch railroad.

UPPER MARLBORO', a village of Prince George co., in the state of Maryland, U. S., 7 m. SW of Annapolis, on the S side of the W branch of Patapsco river. Pop. in 1850, 800.

UPPER MIDDLETOWN, a village of Middle-town township, Middlesex co., in the state and on

the W side of the Connecticut, U. S.—Also a village of Manallen township, Fayette co., in the state of Pennsylvania, on Redstone creek, 155 m. W by S of Harrisburg.

UPPER MILFORD, a township of Lehigh co., in the state of Pennsylvania, U. S., drained by the N branch of Perkiomen creek, and by the head waters of Saucon creek. Pop. in 1840, 8,081.

UPPER MOUNT BETHEL, a township of Northampton co., in the state of Pennsylvania, U. S., on the W side of the Delaware. Pop. in 1840, 2,643.

UPPER NAZERETH, a township of Northampton co., in the state of Pennsylvania, U. S., drained by two branches of Manookisy creek. Pop. in 1840, 1,118.

UPPER OXFORD, a township of Chester co., in the state of Pennsylvania, U. S. Pop. in 1840, 1,277.

UPPER PAXTON, a township of Dauphin co., in the state of Pennsylvania, U. S., 22 m. N of Harrisburg, drained by Mahantango and Great and Little Wiconisco creeks, and bordered on the W by the Susquehanna. Pop. in 1840, 1,814.

UPPER PENN'S NECK, a township of Salem co., in the state of New Jersey, U. S., bounded on the W by Delaware river. Pop. in 1840, 1,854.

UPPER PROVIDENCE, a township of Delaware co., in the state of Pennsylvania, U. S., 13 m. W of Philadelphia, bordered on the E by Crum creek, and on the W by Ridley creek. Pop. in 1840, 780.—Also a township of Montgomery co., in the same state, bordered on the SW by Schuylkill river, and drained by Perkiomen and Mingo creeks. Pop. 2,244.

UPPER RED HOOK, a village of Redhook township, Dutchess co., in the state of New York, U. S., 46 m. S of Albany, on the E bank of Hudson river. Pop. in 1840, about 800.

UPPER SAINT CLAIR, a township of Allegany co., in the state of Pennsylvania, U. S., drained by Charter's creek. Pop. in 1850, 2,700.

UPPER SALFORD, a township of Montgomery co., in the state of Pennsylvania, U. S., 10 m. NNW of Norristown, drained by Perkiomen and Rich Valley creeks. Pop. in 1840, 1,301.

UPPER SANDUSKY, a village of Wyandott co., in the state of Ohio, U. S., on the W side of Sandusky river, 60 m. NW of Columbus. Pop. in 1850, 783.

UPPER SAUCON, a township of Lehigh co., in the state of Pennsylvania, U. S., 6 m. SE of Northampton, drained by Saucon creek, an affluent of Lehigh river. Pop. in 1840, 2,072.

UPPER STILLWATER, a village of Penobscot co., in the state of Maine, U. S., on the W side of Penobscot river, opposite Marshe's island, and intersected by the Bangor and Piscataquis railroad.

UPPER SWATARA, a township of Dauphin co., in the state of Pennsylvania, U. S., drained by Swatara creek. Pop. in 1840, 1,205.

UPPER TULPEHOCKEN, a township of Berks co., in the state of Pennsylvania, U. S., drained by Northkill and Little Northkill creeks, and intersected by the Union canal. Pop. in 1840, 2,941.

UPPERVILLE, a village of Tanquer co. in the state of Virginia, U. S., 129 m. N by W of Richmond. Pop. in 1850, 850.

UPPINGHAM, a market-town and parish in the co. of Rutland, 12 m. WSW of Stamford. The town stands on an elevated situation, and contains several good houses chiefly disposed in the form of a square. Area of p. 1,210 acres. Pop. in 1851, 2,068.

UPPINGTON, a parish in Shropshire, 7 m. ESE of Shrewsbury. Area. 755 acres. Pop. in 1831, 117; in 1851, 98.

UPRIGHT POINT, a headland of New South Wales, in the co. of St. Vincent, in S lat. 35° 50'.

UPSALA, or **URSAI**, an ancient town in Sweden, in a laen or district of the same name, situated in a flat country, 89 m. NNW of Stockholm, on the small river Sala or Fyris, which divides it into two parts, and opens a communication with Lake Mälär. It is the see of an archb., and had a pop. in 1845 of 5,680. Most of the private houses are of wood, but the public buildings are of stone or brick. The cathedral is a large structure of the 13th cent., on the model of Notre-Dame at Paris, but built in great part of brick. The university of U., founded in the 15th cent., has 47 professors; and is usually attended by from 800 to 1,000 students. It can boast of Linnæus, Celsius, Bergmann, and a number of distinguished professors, and possesses a valuable library founded by Gustavus Adolphus, and now numbering 150,000 vols. The other objects worthy of attention are the observatory, the botanical garden, cabinets of natural history and mineralogy, the royal castle and gardens, and the residence of the archb. This town was long the residence of the Swedish monarchs, who bore the title of kings of U., till the beginning of the 10th cent. The coronation of the kings of Sweden is still performed here. About 3 m. to the N of the more recent town is Old U., a decayed place with a very curious old church.—The laen of U., bounded on the N by the gulf of Bothnia, on the E by the laen of Stockholm, on the S by lake Mälär, on the W by the laen of Westeraas, and on the NW by Gefle, has an area of 1,556 geog. sq. m., with a pop. in 1845 of 87,700. Its chief river is the Sala.

UPSHIRE, a hamlet in the p. of Waltham Abbey, Essex; 12 m. N by E of London. Pop. in 1831, 745; in 1851, 845.

UPSHUR, a county in the NE part of the state of Texas, U. S., comprising an area of 1,053 sq. m., drained by Little Cypress river and its branches, and by affluents of Sabine and Big Cypress rivers. Pop. in 1850, 3,394. Its capital is Gilmer.

UPSON, a central county of the state of Georgia, U. S., comprising an area of 208 sq. m., drained by branches of Flint river, by which it is bounded on the SW and W. Pop. in 1840, 9,408; in 1850, 9,424. Its capital is Thomaston.

UPTON, a township of Worcester co., in the state of Massachusetts, U. S., 35 m. WSW of Boston, on West river. Pop. in 1840, 1,466; in 1850, 2,023.

UPTON, a chapelry in the parish of Blewberry, Berks, 4 m. NNE of East Ilsley. Pop. in 1851, 337. Also a parish in Bucks, 2 m. NNE of Windsor, intersected by the Western railway. Area 1,950 acres. Pop. in 1801, 1,018; in 1831, 1,502; in 1851, 3,573.—Also a township in the p. of St. Mary, co-palatine of Chester, 2 m. N of Chester. Area 1,106 acres. Pop. in 1831, 289; in 1851, 555.—Also a parish in the co-palatine of Chester, 7½ m. N by W of Great Neston. Area 929 acres. Pop. in 1831, 191; in 1851, 227.—Also a parish in Huntingdonshire, 6 m. NW of Huntingdon. Area 970 acres. Pop. in 1831, 150; in 1851, 169.—Also a township in the p. of Sibson, Leicestershire, 8½ m. SW of Market-Bosworth. Pop. in 1831, 148; in 1851, 152.—Also a parish in the co. of Lincoln, 5 m. SE by E of Gainsborough. Area 3,180 acres. Pop. in 1831, 460; in 1851, 577.—Also a parish in Norfolkshire. Area 1,693 acres. Pop. in 1831, 510; in 1851, 564.—Also a parish in Northamptonshire, 2 m. W of Northampton. Area 979 acres. Pop. in 1831, 48; in 1851, 42.—Also a parish in Nottinghamshire, 2½ m. E of Southwell. Area 1,860 acres. Pop. in 1831, 533; in 1851, 629.—Also a parish in Somersetshire, 7 m. W by N of Wiveliscombe. Area

8,779 acres. Pop. in 1831, 844; in 1851, 844.—Also a township in the p. of Badsworth, Yorkshire, 6 m. S by E of Pontefract. Area 1,096 acres. Pop. 255.

UPTON, a township of Worcester co., in the state of Massachusetts, U. S., 35 m. WSW of Boston, drained by West river. Pop. in 1850, 2,023.

UPTON (Bisor's), a parish in Herefordshire, 4 m. NE by E of Ross. Area 3,891 acres. Pop. 698.

UPTON-CRESSETT, a parish in Salop, 4½ m. W by S of Bridgenorth. Area 1,608 acres. Pop. 58.

UPTON-GRAY, a parish in Hants, 3 m. SW by W of Odiham. Area 2,234 acres. Pop. 422.

UPTON-HELIONS, or HILTON, a parish in Devon, 8 m. NW of Exeter. Area 819 acres. Pop. in 1831, 152; in 1851, 137.

UPTON-ST.-LEONARD, a parish in Gloucestershire, 3½ m. SE of Gloucester. Area 2,975 acres. Pop. in 1831, 898; in 1851, 1,124.

UPTON-LOVEL, a parish in Wilts, 2 m. SE of Heytesbury. Area 1,899 acres. Pop. in 1851, 238.

UPTON-MAGNA, a parish in Salop, 4 m. E of Shrewsbury. Area 3,260 acres. Pop. in 1851, 488.

UPTON-NOBLE, or LOVZ, a parish in Somersetshire, 3½ m. NNE of Bruton. Area 677 acres. Pop. in 1831, 282; in 1851, 238.

UPTON-PYNE, a parish in Devon, 3 m. N by W of Exeter. Area 1,852 acres. Pop. in 1851, 491.

UPTON-SCUDAMORE, a parish in Wilts, 2 m. N by W of Warminster. Area 2,500 acres. Pop. in 1831, 392; in 1851, 407.

UPTON-UPON-SEVERN, a market-town and parish in Worcestershire, 9 m. SE of Worcester. Area of p. 3,170 acres. Pop. in 1831, 2,343; in 1851, 2,290. The town, supposed to have been erected on the site of a Roman station called *Upoesa*, stands on a cliff on the r. bank of the Severn, and consists of several well-paved streets containing good houses. The river is navigable here for vessels of 110 tons, and is crossed by a stone-bridge of 6 arches. It has some trade in cider.

UPTON-SNODSBURY, a parish in Worcestershire, 6 m. E of Worcester. Area 1,661 acres. Pop. in 1831, 316; in 1851, 341.

UPTON-WARIN, a parish in Worcestershire, 3½ m. NNE of Droitwich. Area 2,600 acres. Pop. 422.

UPTON-WATERS, or PARVA, a parish in Salop, 5½ m. N by W of Wellington. Area 732 acres. Pop. in 1831, 193; in 1851, 202.

UPWAY, a parish in Dorset, 4 m. S by W of Dorchester, including the tythings of Elwell and Stottingway. Area 1,385 acres. Pop. in 1851, 687.

UPWELL, a village and parish partly in Cambridgeshire, and partly in Norfolk, comprising the chapelry of Welney. The village, sometimes called Well, is situated on both sides of the navigable river Welney, 6 m. SE of Wisbeach. Area of p., 21,746 acres. Pop. in 1831, 3,471; in 1851, 5,877.

UPWOOD, a parish in Huntingdonshire, 2½ m. SW of Ramsey. Area 1,809 acres. Pop. 416.

UR, a village of France, in the dep. of the Pyrénées Orientales, and cant. of Saillagouse. Pop. 250. It has an iron mine.

URABA. See DARIEN.

URACH, a town of Würtemberg, capital of a bail. of the same name, in the circle of the Schwarzwald, 24 m. SE of Stuttgart, on the Ems and Elbach, in a deep valley of the Alps. Pop. in 1852, 5,952. It has a castle belonging to the counts of Würtemberg, built in 1448, two churches, and a theological seminary, and possesses extensive manufactures of linen, cutlery, and printed goods, several yarn and paper mills, bleacheries, &c. The trade consists chiefly in sheep, and in articles of local manufacture. This town is of great antiquity, and was frequently the residence of the sovereigns of

Würtemberg. In its vicinity are the remains of the ancient fortress of Hohen-Urach, and of the convent of Güterstein.—Also a village of Baden, in the circle of the See. Pop. 700.

URAGA, a town and port of Japan, on the W coast of the bay of Jeddo. It was visited by the American expedition under Captain Perry in 1854. The squadron, consisting of the steam-frigates *Susquehanna* and *Mississippi*, and the sloops of war *Plymouth* and *Saratoga*, sailed from the harbour of Napa-kiang, in Lieu-kieu on the 2d of July. On the morning of the 8th they made Cape Idzu, near the S entrance of the bay of Jeddo, and sailing directly up the bay, anchored in the afternoon off the town of U. The appearance of the steamers—the first ever seen in Japanese waters—with the other vessels in tow, moving with all sails furled, at the rate of nine or ten knots an hour, appeared to produce considerable sensation among the Japanese, and all the trading junks, with which the bay was crowded, carefully kept out of their way. As the vessels were coming to anchor, two shells or rockets were fired into the air from a battery about a mile distant, but apparently as a signal, and not as a token of hostility. The next morning, the governor of U., and a nobleman of the third rank, came off, and, after ascertaining the object of the visit, asked for time to despatch an express to Jeddo, in order to obtain instructions how to act. During the three days which elapsed before the answer arrived, the *Mississippi* made a trip of about 10 miles further up the bay, finding everywhere deep soundings. Beyond the promontory of U., a point which no foreign vessels had passed before, she discovered a large and beautiful bight, which was perfectly land-locked, and offered secure and commodious anchorage. She was followed at a distance by a number of government boats, but none of them attempted to interfere with her, or with the cutters of the different vessels which were sounding in advance of her. The presence of the squadron appeared to cause no interruption to the inland commerce, for the bay was at all times studded with large junks and hundreds of small craft, passing up and down.

URAGO D'OGLIO, a village of Austria, in Lombardy, in the prov. and 19 m. W of Brescia, and district of Chiari, on the r. bank of the Oglio. Pop. 1,358. It has a castle.

URAHÍ, a small river of Brazil, in the prov. of Rio-de-Janeiro, and district of Campos, an affluent of the Imbe.

URAL MOUNTAINS, an extensive chain stretching from the gulf of Kara, in the Arctic ocean, southwards to about the parallel of 50°, forming a natural physical line of demarcation between Asia and Europe, throughout an extent of 900 m.; and traceable perhaps, on a meridian elevation, to an extent of 30°. Throughout a great part of its course the chain is made up, in breadth, of numerous embankments and lateral ridges, the aggregate of which is never under 30 m. in breadth, and, in some points, reaches 120 m. In several places the range does not constitute the actual watershed between the rivers of Europe and Asia, for some streams, which rise on the E declivity of the chain, after skirting it for some distance, break through the range and mingle their waters with the rivers of Europe. The N division of the chain, beyond the parallel of 65°, is covered with forests and morasses. The average elevation between the parallels of 58° and 56° is only about 1,350 ft., although the base on which the range rests has an average alt. of 900 ft. above sea-level. The highest part of the range is to the N of the parallel of 56°. The highest summit N of the parallel of 66° is not more

than 3,000 ft. high. About the parallel of Obdorsk, the chain turns suddenly to the E for nearly 25 m., after which it recovers its direction of N and S, and rapidly declines towards the marshes. The culminating point of the whole chain is supposed to be the Konshakofskoi-Kamen, in N lat. $59^{\circ} 30'$, which attains an alt. of 5,720 ft. above sea-level; but later observations appear to indicate that the D'encashkin-Kamen, which lies to the N of the parallel of 60° , has a greater alt. than this. Both these points, however, are to the eastward of the principal range. The S division, within that of the N, is composed of several ridges, arranged in a fan-shape and bending SSE, S, and SW. It is a diversified and picturesque region, and rises in the Iremel, to an alt. of 5,200 ft. above sea-level. The highest part of the range is traversed by two roads. One of these begins at Workoturie; passes to the S of the Tawdin-akoi-Kamen; and crosses the chain in about $59^{\circ} 15'$, to the town of Solikamsk. The other, and more northern route, passes from Bogosslavak in Siberia, to Tcherdin in Anope; crossing the principal range in 60° N lat., and on the N side of the Kakwinskoi-Kamen.

Geological structure. For our knowledge of the geology of this great mountain-barrier, we are mainly indebted to the recent researches of our countryman, Sir Roderick J. Murchison. "Considering the short space which has elapsed since the conquest of Siberia," says that distinguished geologist, "and up to now recent a time these mountain-tracts remained in a state of impenetrable forest inhabited by idolatrous Vogles and Ostiaks upon the N, and Mahomedan Bashkirs on the S, we ought rather to feel astonished at the rate with which the region has been cleared and civilised through the introduction of European manners and mining industry. When Peter the Great, with a keen perception of the current methods of advancing his empire, selected the first Demidoff, to explore the iron ores of these mountains, he laid the foundation of the great native mineral wealth, which now so conspicuously distinguishes Russia from all the surrounding nations. The earliest mining establishments or *serods* planted by that great sovereign are still the centres of activity, and have served as models after which numerous other works have been formed, both by the government and private speculators. In the days of Peter, geology was so little understood (a few gold-mines only being known, and a great portion of the country unexplored), that the descriptions of the great naturalist are chiefly to be viewed as vivid portraits of living nature: as such, indeed, his observations have well stood the test of time, and small gleanings only have remained for those who followed him. Since that time, the Russian miners, learning their first lesson from foreigners, have become a well-informed class, independent of extraneous aid, and their directors (officers of the Imperial school-mines) have described the lithological and mineral characters of the country, around their respective posts, with great fidelity." The axis, or central portion of the chain, consists to a great extent of talcous schists, or chlorite and quartzite, ancient sedimentary strata, for the most part in a highly metamorphic condition, in consequence of numerous syenitic and trap rocks; but on account of the presence of certain organic remains, traceable at intervals in limestones to the Silurian series. Along the E flank, the most accessible by reason of the mining establishments, the strata are also greatly altered by the prevalence of igneous rocks; it was only along the W flank that Sir Roderick and his companions were enabled to establish a clear succession of carboniferous, devonian, and silurian deposits. True granite is of very rare occurrence along the axis of the chain, and has at a comparatively recent period burst through the eastern dislocations. The periods of dislocation, the change of relative level of land and water, and of the protrusion of igneous rocks, appear to have been phenomena repeated at different geological epochs. From the occurrence of cupriferous minerals diffused throughout the Permian strata, Sir Roderick infers that anterior to the deposition of these beds, metallic veins must have existed in the U.; and from the abundance of the remains of terrestrial plants in the same deposits, that the chain must have been raised to a certain extent above the level of the then existing ocean. Subsequent periods of disruption are proved by the lines of disturbance in the Permian series on the immediate flank of the U., and connected with dislocations which have affected them. The patches of Jurassic rocks at the N and S extremities of the range, are considered to have been subsequently deposited, and the absence of strata of that age throughout the great mass of the chain, or for 17° of lat., to prove that it was constantly above the level of the sea during the Jurassic epoch. Between that period and the accumulation of the gold alluvia, there are no signs of any great changes in the physical structure of the U., and the only deposits assignable to that interval are certain trachytic grits and beds of lignite, which, it is conceived, may have been formed in lakes. On the W side of the chain, the order of the metalliferous rocks is

best developed; but it is on the E igneous slopes that the miner is best repaid by ores. Sir Roderick concludes that "the widely-spread cupriferous deposits of Permian, which occupy all the low country to the W of these mountains, have been derived from pre-existing eastern lands, upon which the plants and vegetables enclosed in the Permian conglomerates must have grown. Judging from its composition—it is entirely made up of fragments of ancient Uralian rocks—the great Permian deposit must have been accumulated, not only after the completion of the Silurian, devonian, and carboniferous systems, but after their consolidation, and either after or during their mineralisation with copper-ores. This is a clear and undeniable conclusion, at which the field-geologist who has examined this region arrives; for, in whatever parallel of latitude he may trace this ancient detritus, he invariably finds it to be more coarse and metalliferous as it approaches the mountains from which its materials have been derived, whilst in receding from them, such mineral matter (always in the form of deposit, and never in the condition of veins) as regularly dies away and is lost in marine marls, sand, and limestone. But if the Ural mountains were, as we contend they must have been, the source whence all these cupriferous sediments, as well as detritus and fossil vegetables were supplied, very different indeed must have been their former outline from that which now prevails; for on the W slope of the axis down which the waters now flow into Permian, there are no great veins and original sources from which such debris could have been derived. All the spots where the largest veins, masses, and original centres of copper-ore occur, whether at Bogosslovak, Nijny-Tagilsk, Gumeshefsk, and Polofsk, south of Minsk, or other and intermediate places, are on the eastern side of the chief ridge. Supposing that these mines were in the process of forming, or having been formed, were undergoing destruction, during an era in which the land had assumed its present outline, almost every cupriferous particle and drop of water impregnated with or transporting such mineral matter must have descended into the adjacent low country of Siberia. By no natural agency could any considerable quantity of such coarse materials be now carried to the low countries on the west, between which and all the great copper sources which are known lies the ridge of the U. Now, as all the cupriferous detritus has been carried to the western flank of the mountains, and not a particle of it into the low country of Siberia, it follows that by far the greatest variation in physical outline which the region has undergone—one by which a lofty wall was thrown up between Permian and the original copper-sites of the U.—took place at a period posterior to the formation of the Permian deposits."

Gold deposits. When the region of Permian was submerged beneath the sea, and the Permian deposits were in process of formation, the U. mountains formed the rocky shore of a low continent, from which powerful streams poured into a western sea. That old continent contained iron and copper, but neither gold nor platinum; for traces of those metals have never been found in the Permian detritus. In rocks still older—such as the carboniferous conglomerates—there is no trace of gold; nor in rocks far younger, such as certain tertiary grits. From these, and other reasons equally strong, Sir Roderick concludes that the U. chain became auriferous during the most recent disturbances by which it was affected, when its highest peaks were thrown up, the present water-shed established, and the greenstone, porphyries, syenitic granites, and other comparatively recent igneous rocks, intruded through the palaeozoic rocks, along its E slopes; in short, that gold was one of the most recent mineral productions anterior to the historic era, and coeval with mammoths and rhinoceroses. Their bones are seldom detected out of the line of the gold-works; and the Bashkirs regard them with superstitious respect, saying to the Russian miners, "Take from us our gold if you will; but, for God's sake, leave us the bones of our ancestors." Along with these gigantic quadrupeds are found the remains of the *Bos Ursus*, now the only survivor of this ancient fauna. A question of interest arises from the total absence, on both flanks of the U., of erratic blocks, and of any traces of those scratches, grooves, and polishings, which are considered, by the advocates of the glacial theory, to be proofs of the former existence of glaciers. Its drift is all local and not transported; and in the northern portion of the chain, between 60° and 65° of lat., no glaciers are found on peaks constantly covered with snow, and attaining an alt. exceeding that of the highest

mountains of the British Isles. This absence of all the phenomena of glacial action seems to exclude the possibility of the lower or flat regions of Russia having been once invested in a cerement of ice. The problem connected with the entombment of mammalian remains in the gold alluvia, as well as in alluvium generally, is difficult of solution, but by whatever means the universal destruction of those great mammals, during one particular period, may be attempted to be explained, Sir Roderick answers, that it was owing, in the district under consideration, including the low regions extending from each flank of the U., to an elevation whereby a change to a colder climate was effected. To the general view of Baron Humboldt, that the richest gold-deposits are those which are derived from ridges having a meridian direction, M. Erman is opposed; but Sir Roderick is of opinion, that it is a fact that the greatest quantity of gold ore has been obtained from chains having a nearer relation to N and S than to equatorial or E and W directions, due perhaps to the general form of the chief masses of land, and the prevailing strike of the palaeozoic rocks. In a paper read before the British Association, Sir Roderick points out the error into which some persons had fallen, that the Uralian mines were worked underground; the only small subterranean work being one near Ekaterinburg, which affords a very slight profit. All the other mines along the Ural chain, throughout 8° of lat. are simply diggings and washings which are made in the detritus or shingle accumulated on the slopes of the ridges and in the adjacent valleys, and, with one exception, are all upon the E side of the range. This phenomenon is a necessary result of the structure of the chain; the older deposits through which the eruptive rocks have risen constituting chiefly the crest and E slopes of the chain, whilst the W slopes are occupied by deposits of younger or Permian age. Comparing California with the U., Sir Roderick shows that there is a very great coincidence of mineralogical structure, and that with these constants the same results obtain; the chief distinction consisting in the apparently larger proportion of gold in the detritus of the newly-discovered deposits in California than in those of the U. More recently, Sir Roderick, and other geologists, have observed a striking resemblance between the geology of the Ural chain and that of the Blue mountain ranges in Australia, which run, in a general line, not far from the meridian, through 30 degrees of lat. in Tasmania and New Holland, and New Guinea, having their highest points at an alt. of from 5,000 to 6,000 ft. above the sea; with an axis of chloritic and talcose schist, and quartzites, with occasional limestones of Silurian age, in which occur metallic ores and gold in veins of quartz. Moreover, granitic rocks of a comparatively younger age break through them. As on the flanks of the U., the carboniferous formation repose, so in Australia occurs the very same order of deposits. Sir Roderick, therefore, anticipated the extraordinary discovery of gold in the Australian continent, thinking it most highly probable, that besides the lead and copper which exist in the Blue mountain ranges, auriferous sands would be found in the rivers flowing from them. In respect of other phenomena, the dividing ranges of New Holland are similar to the U., with the exception that the slope in this hemisphere is to the W, and the escapement edges of the deposits to the E. So far as has yet been ascertained, the drift of the U. mountains seems to have its parallel in that of Australia, which is all local, and much of it fluviatile, deposited at the ancient mouths of the present rivers when the country was at a lower level.

The phenomena pointed out by Capt. Sturt render it far from improbable that the interior depressed area of Australia is of similar character to the great Aralo-Caspian country. From these and other facts communicated to the Geological society, Sir Roderick predicted the probable mineral wealth of Australia, and in a letter addressed to Sir C. Lemon, and published in the *Philosophical Magazine*, was the first to advise that a person well acquainted with the washing of mineral sands should be sent out to Australia, speculating on the probability of auriferous alluvia being abundant in that region.

In the paper read before the British Association, already referred to, Sir Roderick adverts to the distinctions between such surface mining-operations as those of Siberia, California, and the Brazils, and those works in which besides the ores of silver, copper, &c. gold also had been extracted from the veins in the solid or parent rock, as in Mexico. Sir Roderick also traces the history of gold and its development as known to the ancients and our ancestors of the middle ages; and shows that in all regions where rocks similar to those he had described occurred, there gold has been found in more or less quantities; and that just in proportion to the time that a country has been civilized has the extraction and produce of the precious metal diminished; so that in many tracts where it formerly prevailed to some extent, it has been either worked out or the mines have been almost forgotten. The continental tracts formerly so rich, as cited by Strabo, with the exception of the N. Ural or country of the Arimaspes, whence the Scythian ores came, are no longer gold-bearing districts. The Scythian or Uralian tract had, in fact, remained unknown and unattended to from the classical age until this century, and so completely ignorant were the modern Russians of the existence of gold in the U. mountains, or that they had in their hands the country which supplied so much gold to Greece and Rome, that excellent German miners had long worked the iron and copper mines of that chain before any gold veins were discovered. These also were worked as solid veins in the rock for some time before the accidental discovery of a small per-centage of gold ore in the ancient alluvium or drift led to the superficial diggings, which produced at an infinitely less expense ten times the amount of produce of the mines in the solid rock near Ekaterinburg. All the energy displayed by the Russian miners having failed to augment the amount of Uralian gold, and as it has never much exceeded half-a-million sterling, the period is gradually arriving when the local depressions or basins of auriferous detritus of that region will be successively dug and washed out, and the U. will then resemble many other countries in possessing actual mines of iron and copper, but merely a history of its gold. Russia, however, has also the golden key of all Eastern Siberia, in which various offshoots from the Altai chain, chiefly those which, separating the rivers Lena, Jenisei, &c., stretch along the shores of the Baikal lake, have proved so very productive, that for some years they have afforded three millions sterling average, exclusive of the U.

URAL, or JAİK, a river of Russia, which rises in the above chain, under the parallel of 55°; flows S to Orsk; then W through the mountain-chain to Orenburg; and from the latter place SW and S to the Caspian, into which it discharges itself by several mouths below Gurjev. The waters of the U., which have a breadth of from 150 to 200 fath. at Glinyoi, divide into two branches, about 4 m. below Gurjev. The first branch flows into the Beloi-Ilimen, 8 m. SE of Gurjev; the other, the Paltavai,

flows westwards, and again separates into 4 branches before it reaches the Caspian. All the mouths of the U. appear to be shallow and filled with reeds.

URALSK, a town of Russia, in the gov. of Orenburg, on the r. bank of the Ural, in N lat. 51° 11' 25", 150 m. WSW of Orenburg. Pop. 15,000.—There is another small place of the same name on the Ural, in N lat. 53° 43'.

URARIEVERA, a river of Brazil, in the prov. of Para, which runs NE, receives the Uraricapara on the l., and after a total course of about 135 m., joins the Idome.

URARINHAS, a town of Ecuador, in the dep. of Assuay, on the N bank of the Amazon, at the confluence of the Xucaray, 30 m. NE of La Laguna.

URARIRA, a river of Brazilian Guayana, an affluent of the Rio Negro, which it joins on the r. bank between Moreira and Thomar.

URARTE, a village of Spain, in the prov. of Alava, 9 m. SSE of Vitoria. Pop. 170.

URAS, a village of the island of Sardinia, in the div. of Cape Cagliari, and prov. of Busachi, in a marshy but fertile locality. Pop. 1,500.

URATUBA, a small town of Independent Tartary, in the khanat of Kokan, on the r. bank of the Schun. 30 m. NE of Khojend.

URBACH (Ossa), a town of Württemberg, in the circle of the Jaxt, bail. and 3 m. E of Schorndorf. Pop. in 1840, 2,073. It has a tobacco factory.—Also a parish and village of Hanover, in the reg. of Hildesheim, near Buckenem. Pop. 780.—Also a village of Prussia, in the reg. of Coblenz, circle of Neuwied. Pop. 462.

URBAIN (SAINT), a town of France, in the dep. of the Haute Marne, and cant. of Donjeux-Sur-Marne, 16 m. SE of Vassy. Pop. 928.

URBAN, a village of Austria, in Moravia, in the circle of Znaim. Pop. 1,100.

URBANA, a township of Steuben co., in the state of New York, U. S., 183 m. W of Albany. Pop. in 1840, 1,884; in 1850, 2,079.—Also a township of Champaign co., in the state of Ohio, 39 m. W of Columbus, and intersected by the Columbus, Piqua, and Indiana, and the Mad river and Lake Erie railroads. Pop. in 1840, 1,386; in 1850, 3,414.—Also a village of Champaign co., in the state of Illinois, on the S side of the Salt Fork of Vermillion river, and intersected by the Chicago branch of the Illinois Central railroad. Pop. in 1840, 150; in 1850, 400.—Also a village of Jackson co., in the same state, 155 m. S by E of Springfield, and near the Illinois Central railroad.

URBANIA, a town of the Papal States, in the deleg. of Urbino and Pesaro, on the Metauro, 8 m. SW of Urbino. Pop. 3,716. It has a china manufactory.

URBANNA, a village of Middlesex co., in the state of Virginia, U. S., on the SW side of Rappahannock river, near the mouth of a river of the same name, and 46 m. E by N of Richmond.

URBANO, a fortress of the Papal States, in the leg. and 17 m. WNW of Bologna, on the frontier of the duchy of Modena. It has 5 bastions, and a small garrison.

URBAR, a village of Prussia, in the prov. of the Rhine, regency and circle of Coblenz. Pop. 508.

URBINO, a town of the Papal States, capital of the leg. of Urbino and Pesaro, and of the district of the same name, 45 m. W of Ancona, and 138 m. N of Rome, on a mountain. Pop. 4,418. It is the see of an archb., a college, and a ducal palace. Needles are its chief article of manufacture. It is noted as the birthplace of Raphael.

URBINO-AND-PESARO, a legation or province of the Papal States, bounded on the N by the lega-

tion of Forli and the republic of San Marino; on the NE by the Adriatic; on the SE by the deleg. of Ancona; on the S and SW by that of Perugia; and on the W by Tuscany; and comprising an area of 540 sq. m. Pop. in 1843, 237,966. It is to a great extent covered by ramifications of the Apennines, and is watered by the Metauro, and its affluents, the Cantiano, Cesano, Foglia, and Marecchia. The mountains are, for the most part, naked and sterile, but the hills are covered with olive and mulberry trees and vines, and in the valleys, corn, legumes, lint, hemp, and fruit, are grown in great abundance. It has numerous herds of cattle, sheep, and pigs, and the silk of the Fossombrone is noted as the finest in Europe. The leg. comprises 5 districts, 28 towns, and 410 villages.

URBIONE, a lake of Spain, in the prov. and 42 m. NW of Soria, at a considerable elevation, amid lofty mountains. It is, according to Garibay, 4,800 ft. in depth, and appears to have been the crater of a volcano. It discharges itself into the Najerilla.

URÇAY, a village of France, in the dep. of the Allier, cant. and 12 m. W of Cerilly. Pop. 500. It has an iron-mine.

URCEL, a village of France, in the dep. of the Aisne, and cant. of Anisy-le-Chateau. Pop. 400. It has manufactories of sulphate of iron and of alum.

URCHFONT, or **EXCEPPOIT**, a parish in Wilts, 3½ m. SSE of Devizes, containing the tythings of Eastcott and Wedhampton. Area 6,873 acres. Pop. in 1831, 1,389; in 1851, 1,604.

URCISSE (SAINT), a village of France, in the dep. of the Tarn, cant. and 5 m. NW of Salvagnac. Pop. 340. In the environs are quarries of marble.

URCIZE (SAINT), a commune of France, in the dep. of Cantal, cant. and 12 m. S of Chaudesaigues. Pop. 1,878.

URDA, a town of Spain, in the prov. and 33 m. SSE of Toledo, on two hills enclosed in a valley, watered by the Amarguillo, which is liable to extensive inundations. Pop. 4,100. It has a church, a handsome chapel, and an hospital. The manufacture of charcoal and of hosiery form the chief objects of industry. In the vicinity are quarries of jasper, and mines of silver and antimony.

URDAX, a town of Spain, in the prov. of Navarra, 86 m. NNE of Pamplona, in the valley of Bastan, near the French frontier. Pop. 600. It has a church, and a convent, and an iron-work, and carries on an active trade in faggots.

URDEL, a village of France, in the dep. of the Basses-Pyrenees, and valley of Aspe. In its vicinity is an alabaster quarry.

URDEN, a mountain of Switzerland, in the cant. of Grisons, enclosing a small deep lake, liable by vicissitudes of weather to violent agitation.

URDENBACH, a village of Prussia, in the prov. of the Rhine and circle of Düsseldorf, on the Rhine. Pop. 1,000. It has manufactories of woollen fabrics.

URDINGEN. See **URDINGEN**.

URDOS, a commune of France, in the dep. of the Basses-Pyrenees, and cant. of Accons, 30 m. S of Oloron. Pop. 406. It has a custom-house.

URE, or **YORR**, a river of Yorkshire, which, in conjunction with the Swale, with which it unites at Myton-hall, forms the Ouse. From the elevated moorland between Yorkshire and Westmoreland, in which it rises, its general course is E, passing Hawes and Askrigg. From this point to Ripon, it runs SE, passing Middlesham and Mesham; 3 m. below which latter place it becomes the boundary between the N and W ridings. From Ripon its course is S and then E, past Boroughbridge and Aldborough till its junction with the Swale.

UREI, or **OUAI**, a river of Sumatra, which has its

source in the E part of the district of Redjang; runs along the confines of that of Anak-Sungei; and which, after a total course of about 60 m., throws itself into the Indian ocean, to the SE of the embouchure of the Caytun. Near the sources of this river are the grottoes of Goha, from which saltpetre in great quantities is extracted.

URENHAI, a village of Kashmir, to the NW of Islamabad.

URFAH. See **ORFA**.

URFAHR, or **UFER LINS**, a market-town of Austria, in the circle of the Muhl, on the Danube, opposite Linz. Pop. 2,660.

URFT, a village of Prussia, in the prov. of the Rhine, reg. of Aix-la-Chapelle, and circle of Germund. It has several forges.

URGUB, a town of Asiatic Turkey, in the pash. of Caramania, 80 m. SW of Kaisariyeh, on an affluent of the Kizil-Irmak. It is singularly built on a number of conical eminences.

URGUNDAB, a river of Afghanistan, which has its source in the Husareh country, about 100 m. NE of Candahar, flows past that town, and 25 m. below is joined by the Turnak; thence it takes a W direction, and after a total course of about 350 m., falls into the Helmund in N lat. 31° 30'. Its banks are fertile, and its waters are extensively employed in irrigation. On its bank, about 25 m. W of Kelah-i-Ghilje, is a village of the same name.

URGEL. See **SEU-D'URGEL**.

URGLIN, or **RUTLAND**, a parish in co. Carlow, 2½ m. ENE of the town of Carlow. Area 3,149 acres. Pop. in 1881, 970; in 1841, 1,004.

URGNANO, a village of Austria, in Lombardy, in the prov. and 8 m. S of Bergamo, and dist. of Verdello, on the road by Canonica from Brescia to Milan. Pop. 2,596. It was formerly enclosed by walls, defended by towers, of which only a small portion now exists, and has an ancient castle.

URI, a central canton of Switzerland, bounded on the N by Schwyz; on the NE by Glaris; on the E by the Grisons; on the S by Tessin; on the SW by Valais; and on the W by Unterwalden and Bern. Schöpf estimates the superficial surface of this canton at 24 German sq. m.; but according to Meyer's chart, its area is nearer 34 such sq. m. The whole canton consists of the two valleys of the Reuss and the Urseren. The most remarkable alp is the St. Gotthard, over which one of the main roads to Italy is here led, with a summit-level of 6,790 ft. above the Mediterranean. The chain of mountains which immediately surround this place, takes the general appellation of St. Gotthard, but each summit has its own particular name. No spot in Europe gives birth to so many noble rivers as this: from it the Reuss flows towards the N; the three sources of the Rhine towards the E; the Ticino towards the S; and the Rhone towards the W. No mountain in this cant. is under 5,000 ft. in alt. above sea-level; and the greater number of the summits range from 8,000 to 9,000 ft. in alt. The pop. of the canton in 1850 was 14,505, in 2,855 families, being an increase since 1837 of 986, or a mean annual increase of 1 in 184, while 1 in 144 was the average for all Switzerland. Of the pop. in 1850, only 40 were returned as foreigners, and only 12 as of the protestant religion. Every male above 20 years of age is a member of the general assembly, which is held once a year to choose the officers of the executive department. The revenue is small, there being almost no taxes, and little trade; it is surprising how three such poor cantons as Luzern, Uri, and Unterwalden, could raise sums sufficient for the execution of their share of the superb carriage-road over the St. Gotthard. The chief town is Atdorf, with 3,000 inhabitants.

URIBE, a district of Spain, in the prov. of Vizcaya. It extends N to the gulf of Gascogne; is watered by the Salcedon and Nervion; and is one of the most extensive and most fertile in the prov. It contains 82 communes, and has several iron-works.

URIE, a river of Aberdeenshire, which rises in the district of Strathbogie, and flows successively E, S, and SE. Its entire length of course is about 20 m.

URIMARAS, a tribe of Indians of Central America, who inhabit the SE part of the state of Costa-Rica.

URITANA. See **ORIA**.

URIUPINSKAIA, a town of Russia, in the gov. of the Don Cossacks, 25 m. SW of Novo-Cherkassk, on the l. bank of the Choper.

URK, an island of the Zuider-see, in Holland, in the prov. of that name, 24 m. E of Hoorn, in N lat. 53° 39' 47". It does not exceed 8 m. in circumference, but has a village with 575 inhabitants employed chiefly in fishing.

URLAND, a parish and village in Norway, in the diocese and 75 m. NE of Bergen, and bail. of Northern Bergenahuus. Pop. 2,000.

URLINGFORD, a parish, containing a small town of the same name, co. Kilkenny. Area 3,497 acres. Pop. in 1831, 2,492; in 1841, 2,830. The town stands on the mail-road from Dublin to Cork, 8½ m. NE by E of Thurles. Pop. in 1841, 1,742.

URLOFFEN, a village of the grand-duchy of Baden, in the circle of the Middle Rhine, bail. and 8 m. N of Offenburg, on the railway from Karlsruhe to Freiburg. Pop. 2,250.

URMENY, a market-town of Hungary, in the comitat and 9 m. S of Neutra.

URMITZ, a village of Prussia, in the prov. of the Rhine, on the Rhine, SE of Neuwied. Pop. 598.

URMSTON, a township in the p. of Flinton, co. palatine of Lancaster, 5½ m. SW by W of Manchester, on the N bank of the Mersey. Pop. 730.

URNA-DESA, or **UNDRA**, a district of Little Tibet, extending between the Himalaya and Cailas mountains, and watered by the Sotlej. It is noted for its wool, which is said to be the finest in Tibet, and has several iron mines. The mountaineers cultivate the vine. Deba is the chief town.

URNASCH, a village of Switzerland, in the cant. and 8 m. WSW of Appenzell, on a small river of the same name. Pop. 2,464.

URNEN (**NUEBER**), a village of Switzerland, in the cant. and 9 m. N of Glaris, on the Linth, at its exit from lake Wallenstadt. Pop. 1,505. It has mineral baths, and manufactories of silk and leather.—In the vicinity is another village distinguished as Ober U., with a pop. of 691.

URNEY, a parish in co. Cavan, containing the town of Cavan. Area 7,934 acres. Pop. in 1831, 6,050; in 1841, 6,464.—Also a parish, partly in co. Donegal, but chiefly in co. Tyrone, containing the village of Clady, and a small part of the town of Strabane. Area 14,488 acres. Pop. in 1841, 7,662.

URNIETA, a town of Spain, in the prov. of Guipuzcoa, 6 m. S of San-Sebastian. Pop. 1,625. It has a parish church, two chapels, and an hospital, and possesses several iron-works. The environs are fertile, producing maize, legumes, and fruit.

URNIYARAH, a village of Sind, in the Little Desert.

URNSHAUSEN, a village of the duchy of Sachsen-Weimar, in the circle of Eisenach. Pop. 700.

UROLA, a river of Spain, in the prov. of Guipuzcoa, which has its source in Mount Araya, in the S part of the prov.; waters Legarpia, Zamarraga, Villareal, Azcoytia, and Aspeytia; and after a course in a generally N direction of about 30 m., throws itself into the gulf of Gascogne at Zumaya.

URPETH, a township in the parish of Chester-

le-Street, co-palatine of Durham, 2 m. SW of Birtley, intersected by the Great North of England railway. In the vicinity are extensive coal-mines. Area 1,671 acres. Pop. in 1831, 716; in 1851, 952.

URQ, a village of France, in the dep. of the Ariège, cant. and 3 m. ESE of Cabanes. Pop. 188.

URQUHART, a parish on the coast of Moray-shire. Pop. in 1831, 1,019; in 1851, 1,331.

URQUHART-AND-GLENMORISTON, a united parish in Inverness-shire, having a length from E to W of 30 m., and in general from 8 to 12 m. in breadth. The peopled districts are the narrow slopes along Loch-Ness, and the glens of Urquhart and Moriston, the only transverse valleys which branch off from the NW side of the Ness part of the Glenmore-nan-Albin. The largest of several hamlets, Milntown, has about 150 inhabitants. Good roads go up the two principal glens toward Kyle-Rhea, the ferry to Skye; and two roads connect the glens respectively along Loch-Ness, and 8 or 9 m. to the W. Pop. in 1831, 2,942; in 1851, 2,380.

URQUHART-AND-LOGGIE-WESTER, a parish chiefly in the SE of Ross-shire, but comprehending also the well-known detached district of Nairnshire called Ferrintosh. It extends from NNE to SSW 10 m. About 4,860 acres of the whole area are in tillage. The village of Conan Bridge has upwards of 300 inhabitants; and at the hamlet of Culbokie are held four annual fairs. Pop. in 1831, 2,864; in 1851, 3,153.

URR, a parish in the SE of Kirkcudbrightshire. Area about 12,000 acres. The surface, compared to that of most Galloway parishes, is level, few of the hills being of considerable height. On the W bank of Urr-water is the celebrated Moat of Urr, an artificial mount or table-land, rising from concentric and successive terraces, and anciently used as a seat of judicature by the petty chiefs of the feudal times. This is probably the largest work of its kind in Scotland. The villages of the parish, with their pop., in 1836, are Dalbeattie with 1,393; Haugh, with about 230; and Springholm, with about 300. Pop. of the p. in 1831, 3,098; in 1851, 3,362.—Also a river of Kirkcudbrightshire, which issues from the lake below described, and runs 26 m. to the Solway frith, midway between the Nith and the Dee. Its prevailing direction is toward the S. About 4½ m. before losing itself in the Solway, it begins to expand into an estuary; and at its embouchure, between Heston island and the headland on the E, it has a breadth of very nearly 2 m. It is navigable for considerable craft 7½ m. above its embouchure.

URR (Loch), a small lake on the boundary between Dumfriesshire and Kirkcudbrightshire, about 3 m. in circumf., and 5 fath. in extreme depth. Its water appears extremely black, the ground under and around it being in general a heathy moss. Pike, and a few large trout, are the only fish which it produces. The surrounding scenery is a bleak and dreary expanse of tame, naked, heathy hill.

URRACAL, a town of Spain, in the prov. of Almería, on the Almanzora, 5 m. ENE of Purchena. Pop. 850. It has a soap manufactory, and several linen bleacheries.

URRAN, a rivulet of co. Wexford, which rises among the SE skirts of Mount Leinster; receives various early affluents from the Blackstairs; and flows about 11 m. SE to a confluence with the Slaney at a point about 5 furl. below Enniscorthy.

URRAO, a town of New Grenada, in the dep. of the Cauca, and prov. of Chocó, 24 m. SW of Santa Fe-de-Antioquia. Pop. 620.

URRAY, a parish partly on the N border of Inverness-shire, but chiefly in the S end of Wester Ross, Ross-shire. Pop. in 1851, 2,621.

URREA-DE-GAEN, a town of Spain, in the prov. of Ternel. Pop. 1,426. It has a parish church and a custom-house. The manufacture of linen and rearing of cattle form the chief branches of local industry.

URREA-DE-XALON, a town of Spain, in the prov. and 18 m. W of Zaragoza, near the Xalon, in a fertile locality. Pop. 740.

URRIBARI, a hamlet of Spain, in the prov. of Vitoria, and district of Aramayona. It has several mineral springs.

URROZ, a town of Spain, in the prov. of Navarra, 14 m. E of Pamplona, in a plain, at the foot of a mountain. Pop. 660. It has manufactories of coarse cloth.

URRUGNE, a commune and town of France, in the dep. of the Basses-Pyrenees, cant. and 3 m. SW of St. Jean-de-Luz. Pop. in 1846, 3,638.

URSA (PUNTA-DELL'), a headland of Sicily, on the N coast, in the prov. and district of Palermo, in N lat. 38° 18', and E long. 13° 11'.

URSANNE (SAINT), or SAINT URSITE, a small town of Switzerland, in the cant. of Berne, bail. and 9 m. SE of Porentruy, in a wild and rocky locality, on the Doubs, at an alt. of 471 yds. above sea-level. Pop. 726. It has several tanneries, and in the vicinity are extensive iron-mines.

URSBERG, or URSBERG, a hamlet of Bavaria, in the circle of Schwaben, to the NE of Memmingen. Pop. 240. It has a castle and a fine church.

URSEKAU, a village of Prussia, in the reg. of Breslau, circle of Steinau. Pop. 660.

URSEL, a commune and village of Belgium, in the prov. of E. Flanders, 12 m. NW of Ghent. Pop. 2,500.

URSEL (OWEN), a town of the duchy of Nassau, bail. and 5 m. NE of Königstein, on a river of the same name. Pop. 2,400. It has several paper and tobacco mills, and copper works.

URSERNTAL, or URSEERNTAL, a valley of Switzerland, in the cant. of Uri. It is about 9 m. long, and 2 broad, and is watered by the Reuss. The mountains by which it is enclosed afford excellent pasturage. Cheese forms the chief article of produce. See ANDERMATT.

URSETSH, a town of European Russia, in the gov. of Minsk, circle of Slutsk. Pop. 1,500.

URSINS, a village of Switzerland, in the cant. of Vaud, and district of Yverdon, 18 m. N of Lausanne. Pop. 252. It has some Roman ruins.

URSLINGEN, a village of Württemberg, in the Schwarzwald circle, bail. of Rottweil. Pop. 509.

URSPITZ, a village of Moravia, in the circle of Brunn, on the Iglawa. Pop. 640.

URSPRING, a village of Bavaria, in the prov. of Upper Bavaria, district of Schongau. Pop. 200.—Also a village of Württemberg, in the circle of the Danube, near Ulm. Pop. 298.

URSWICK (GREAT), a village, township, and parish in the co-palatine of Lancaster, 8 m. SSW of Ulverstone, containing the townships of Adgarley, Bardsea, Bolton, Stainton, and Little U. Area 4,100 acres. Pop. in 1831, 752; in 1851, 891.

URT, a commune of France, in the dep. of the Basses-Pyrenees, cant. and 5 m. NW of La Bastide-Clerence, on the l. bank of the Joyeuse. Pop. 1,657.

URTEBIZE, a commune of Belgium, in the prov. of Hainault, and dep. of Mainvault. Pop. 318.

URU'A, a village of Brazil, in the prov. of Rio-Grande-do-Norte, and district of Villa-Flor.—Also an island of the Madeira, in the prov. of Para, below the confluence of the Mataura.

URTSCHITZ, a town of Moravia, in the circle of Olmutz, lordship of Plumenau. Pop. 1,060.

URUBAMBA, a district and town of Peru, in the dep. of Cuzco. The district produces cacao, and varieties of fruit. Pop. 9,250. The town is 39 m. N of Cuzco, on the r. bank of the Vilcabamba.

URUBAQUIS, a tribe of Indians of Brazil, who inhabit the district between the Uatuma and Anavilhana, to the N of the Amazon.

URUBU, a comarca and town of Brazil, in the prov. of Bahia. The town is finely situated on the r. bank of the Rio-de-São-Francisco, 84 m. NW of Rio-de-Contas. Pop. 1,000. It has a church and a chapel. The environs are fertile, and produce sugar in considerable quantities.—Also a town of the prov. of Maranhão, on the l. bank of the Itapicurie, and comarca of Caxias. Its inhabitants, who are Indians, cultivate cotton and rice.—Also a river of the prov. of Para, in Brazilian Guayana, which throws itself into the Amazon, on the left bank, after a course of about 150 m., and nearly opposite the confluence of the Madeira. See also *PROPIHA*.

URUBUQUARA, a river of Brazil, in the prov. of Para, which has its source in the Serra-Velha; runs S; traverses the lake of the same name, and after a total course of 195 m., throws itself by the l. bank into the Amazon.

URUBURETAMA, a mountain-range in Brazil, in the prov. of Ceara, and district of Villa-da-Imperatriz, running from N to S between the rivers Curu, and Acaracú.

URUCAIA, a village of Brazil, in the prov. of Minas-Geraes, and district of São-Romão, on the l. bank of a river of the same name, and about 90 m. above its confluence with the São-Francisco.—The river rises in the Serra-Tabatinga, and flows E to the São-Francisco, which it joins on the l. bank after a course of 200 m. It has a narrow channel.

URUCANGA, a river of Brazil, in the prov. of Santa-Catharina, which runs E to the ocean. Its mouth is obstructed by sand-banks.

URUCUHI, a river of Brazil, in the prov. of Piauí, which has its source on the E side of the Serra-Gurguea; runs N, and joins the Parnahiba, on the r. bank, nearly opposite the confluence of the Rio-das-Baixas.

URUCUPARANA, a river of Brazil, in the prov. of Para, which runs first NE, then N, and after a total course of about 185 m., joins the Amazon, on the l. bank, a little below the confluence of the Cuari.

URUCURICAIA, or *IGUARAPE*, a natural canal of Brazil, in the prov. of Para, which connects the rivers Guajara and Xingu.

URUCURUNI, a tribe of Indians of Brazil, who inhabit the Cordilheira-dos-Parecis, in the prov. of Matto-Grosso, and N part of the comarca of that name.

URUCUYA. See *URUCAIA*.

URUENA, a town of Spain, in the prov. of Segovia, and partido of Sepulveda, on Mount Almaraz. Pop. 706. It has a parish church, a custom-house, and a public granary.

URUGUAY. See *BANDA-ORIENTAL*.

URUGUAY, a great navigable river of S. America, which rises in Brazil, under the 28th parallel, on the W flank of the Sierra-de-Santa-Catharina, and collecting various streams, traverses a vast extent of country in a W, NW, and finally SSW course; and, under the 34th parallel, unites with the Parana to form the Rio-de-la-Plata. The U., though not equal either to the Paraguay or the Parana for length of course, surpasses both in the accession of waters it receives, and near its confluence with the latter, it is its equal if not its superior in breadth. Its entire length of course exceeds 800 m. The quick accumulation of waters from the mountain-torrents renders it an extremely rapid stream in the upper part of its course; and when it

leaves the hilly country, it attains so great a breadth 680 m. above its junction with the Parana, that a ten-oared boat, it is said, requires half-an-hour to cross it. The most remarkable tributaries of the U. are the Pelotas, the Uruguay-Pitu, the Piratiny, the Ibicui, the Guarey, the Arapey, and the Rio-Negro. On the l., the U. communicates by the river Merim or Mirinai, with the lake that bears the latter name. Upon the whole, the U. is a rocky stream, of difficult navigation, except by the *balsas*, a species of craft peculiar to South America. It abounds in fish, and the country through which it passes is romantic, beautiful, and fertile in pasturage. Hides and tallow form as yet the chief articles of export from the regions through which it flows. From the junction of the Uruguay-Pitu, a little below the parallel of 27°, to the junction of the Uary in S lat. 30° 20', it forms the boundary between Brazil and the La-Plata federacy; from the latter point to its estuary, it separates the republic of Uruguay or the Banda-Oriental from the same federacy. The chief towns on or near its banks are Concepcion in the Misiones prov., and Belem and Purificacion in Uruguay. By special treaty with Brazil, the navigation of this river is open to all countries.

URUKSTADT. See *KARGE*.

URUMJIK, a town of Turkey in Europe, in Rumelia, in the sanj. and 50 m. NW of Gallipoli, and near the r. bank of the Maritza.

URUMEA, a river of Spain, which has its source in the mountains near the village of Goyzueta, in the W part of the prov. of Navarra; traverses the valley of Basaburna-Menor; flows afterwards into the prov. of Guipuzcoa; passes near Ernani and Astigarraga, and under the walls of St. Sebastian; and after a total course, in a generally NW direction, of about 15 m., throws itself into the gulf of Gascogne.

URUMIYAH, or *QORMIAH*, a town and lake of Persia, in the prov. of Azerbijan. The town is situated in N lat. 37° 35', E long. 45° 10', about 10 m. W of the lake, at an alt. of 4,300 ft. above sea-level. It is walled, and contains about 25,000 inhabitants, of whom 900 are Nestorians, 2,000 Jews, and the rest Mahomedans of the Shyite sect. The streets are irregular and dirty, and have a gloomy appearance, all the larger houses being shut in by lofty mud walls. A very efficient educational agency amongst the Nestorians has existed here since 1833 under the American board of foreign missions. A printing-press has been set up, and upwards of 1,300 scholars, throughout the various Nestorian districts, are now receiving instruction at the schools established by the missionaries. U. was the birthplace of Zoroaster, and for several subsequent ages the sacred city of the fire-worshippers, of whom a few yet survive in the remote valleys of Khorassan. Of the author of the Zendavesta and his followers, however, U. preserves but few traces. Several lofty mounds, composed entirely of ashes, and varying in height from 60 to 100 ft., remain to point out the site of the altars whereon their rites were celebrated; but except these and some temple-caves in the neighbouring mountains, there is little to remind the traveller of the sacred fires and their worshippers. The lake, which takes its name from the town, is little less than an inland sea, being 80 m. in length from N to S, and 20 m. in breadth, with a circuit of rather over 300 m. Its waters are so salt that fish cannot live in them; and from them and the broad girdle of pure salt washed up all round its banks, the greater part of Kurdistan is supplied with this article. Of late years this vast sheet of water has sensibly diminished, and on many parts of the shore whole square miles of white sparkling salt now

spread out to where once was the water-mark. The greatest depth of the lake does not exceed 4 fath.; the average is only 2 fath.; but the shores shelve so gradually, that even this depth is rarely attained within 2 miles of the land. From the lake to the commencement of the Kurdistan mountains on the W stretches out a splendid and fertile plain of some 30 m. long, by half the number broad, and scattered over this magnificent area are not less than 300 villages, with varying populations of from 100 to 1,200. Indeed, as seen from the summit of one of the neighbouring mountains, it appears like one vast garden, richly studded with every kind of fruit tree—peach, nectarine, apricot, cherry, plum, pear, quince, and apple-trees clustering forest-like wherever the ground is not occupied with the vine or other crop.

URUNUELA, a town of Spain, in the prov. of Logrono, 48 m. E of Burgos, on the r. bank of the Najerilla. Pop. 530. It has manufactories of household linen.

URUOCA, a defile of the Serra-Hibiapaba, in Brazil, in the prov. of Ceara and district of Granja.

URUP, or **COMPANY'S ISLAND**, an island of the N. Pacific, in the group of the Kurile islands, to the N of Hurup or Staaten island, from which it is separated by Vries strait.

URUPES, a group of islets in the Madeira, in the Brazilian prov. of Para.

URURAHÍ, a parish of Brazil, in the prov. of Rio-de-Janeiro, and comarca of Campos, near a river of the same name. Pop. 2,000. The culture of sugar and mandioc and distillation of rum form the chief objects of local industry. The river U. connects lakes Aina and Feia.

URURI, a town of Naples, in the prov. of Sannio, district and cant. and 6 m. E of Larino, pleasantly situated on a hill. Pop. 1,228. It is enclosed by old walls, and contains a fine episcopal palace, a church, and two chapels.

URVILLE, a village of France, in the dep. of the Calvados, cant. and 2 m. SSE of Breteville-sur-Aizas. Pop. 625. In the vicinity is a productive iron-mine.

URVOLGY. See **HERRENGUND**.

URWITZ, a village of Prussia, in the prov. of the Rhine, and circle of Coblenz. Pop. 200.

URZAINQUI, a town of Spain, in the prov. of Navarra, 30 m. ENE of Pamplona, in the valley of Roncal, on the Ezca, which is here crossed by a bridge. Pop. 360. It has a fulling-mill.

URZEDOW, a town of Poland, in the gov. and 26 m. SW of Lublin. Pop. 1,800.

URZULIN, a village of Poland, in the gov. of Lublin, obwód and 39 m. SE of Radzyn, in a marshy locality. Pop. 180.

URZY, a village of France, in the dep. of the Nievre, cant. and 6 m. SE of Pougy, on the Nievre. Pop. 520. It has several forges and nail-works.

USACA. See **ORAKA**.

USAGRE, a town of Spain, in the prov. and 54 m. SE of Badajoz, partly on a hill, and partly on a river of the same name, which is here crossed by a bridge. Pop. 2,260. It has an oil-mill. Wood and madder are cultivated in the vicinity.

USAN, a fishing-village on the coast of the p. of Craig, 3 m. SSE of Montrose, in Forfarshire. Its inhabitants are about 200; and, in employments and character, are akin to their neighbours of **FERRIDES**: which see.

USANAR, a town of Spain, in the prov. and 12 m. NW of Guadalajara. Pop. 932. It has a parish-church, a custom-house, and a public granary.

USBECS, or **USZKES**, a predominating race in Turkestan, and especially in the three khanates of Khiva, Bokhara, and Khokan.

The founder of the Usbec power was Sheibani Khan, a remote descendant of Tushi Khan, son of Jenghis Khan. Abulghazi, their historian, tells us their name originated with a khan named Usbec, who reigned in Kiptchak in the 14th cent. Yet it seems strange, that if the hordes of Kiptchak took the name of Usbecs from Usbec Khan, none but the hordes of Khiva, Bokhara, and Khokan, should retain it. Abulghazi tells us further, that the U. are composed of four tribes: Vighurs or Oigurs, Naimans, Durmans, and Kongorats. But little dependence can be placed on an author who confounds the Mongolian with the Turkish language, and derives all the tribes of Central Asia from Turk, the son of Japhet. The ancestors of Sheibani Khan possessed the principality of Tura, to the E of the Ural-Tau, and their subjects dwelt in summer on the banks of the Jalk, in winter on those of the Syr. At the commencement of Sheibani's reign, his dominions were confined to the district of Turkistan, to the NW of Tashkend. His followers were then an agglomeration of tribes of Turki, Mongol, and probably of Finnic race, moulded down into one people, with a preponderance of Turks. His army was latterly swelled by predatory volunteers, from all the nomadic tribes from Khashgar to the Volga. The whole region possessed by the race of Timur Bek, was at this juncture split into a confused mass of petty principalities, whose chiefs, continually at war with each other, could never be brought to act in concert against their formidable enemy, Sheibani Khan, who subjugated them all in succession, till not one foot of ground was left of all that Timur had conquered, between the Kynder-Tau and the Hindu-kush, and from the Bellur to the Caspian. Sheibani wished also to subjugate Persia; but in this attempt he was defeated and slain by Shah Ismail, the founder of the Saffi dynasty, in 1510. This decisive defeat saved Persia, but the successors of Sheibani retained their conquests between the Amu and the Syr. The male line of Sheibani ended in Abul Fyze Khan, who was stripped of all his possessions S of the Amu, by the celebrated Nadir Shah. His misfortunes drew upon him the contempt of his chiefs; and he was assassinated by a Mungut, named Rahim, who succeeded him, and who was in his turn succeeded, after a reign of 12 years, by Daunlar Khan, a descendant of Sheibani, whose son, Shah Murad, celebrated under the appellation of *Beggi Jan*, an active, ambitious prince, recovered almost all the territories which had been lost by his predecessors since the time of Nadir; nothing but the singular abilities of Killich-Ali preserved Balkh from falling into his hands. This royal priest reigned sixteen years, and was succeeded by Mir Hyder who died in 1826. See articles **KHOKAN**, **KHIVA**, and **BALKH**.

USCLITZ, or **USCZ**, a town of Prussia, in the prov. of Posen, circle and 11 m. NW of Chodziesen, on the Netze, opposite the confluence of the Kud-dow. Pop. 1,784. It has extensive glass-works.

USCIE, a town of Galicia, in the circle and 15 m. NE of Stanislawow, at the confluence of the Dniester and Knechenin.

USCIE-BISKUPIE, a town of Galicia, in the circle of Czortkow, on the Dniester, 15 m. E of Talszczyk.

USCIECZKO, a town of Galicia, in the circle and 30 m. SSE of Czortkow, on the l. bank of the Dniester, at the confluence of the Sielawa.

USCOQUES, a Slavonic tribe who inhabit Illyria, Croatia, and Dalmatia, and were formerly noted for their piracies. They speak the Illyrian and Croat languages, and profess Catholicism.

USDUM, a long range of low hills in Syria, near the S end of the Dead sea. It runs from NNW to SSE, giving the same direction to the shore of the sea. At the S extremity of the Dead sea, it bends SSW. It is in general nearly 150 ft. high, and is a mass of solid rock salt, covered with a thin stratum of limestone and marl. See article **DEAD SEA**.

USE MOUNTAINS, a small mountainous range in co. Cork, extending about 44 m. in length. It flanks the W side of the vale of the Allua.

USED, a town of Spain, in the parish of Zaragoza, 12 m. SW of Daroca, at the foot of a chain of sandy hills. Pop. 1,150. It has a parish-church, a custom-house, and a public granary. A little to the S is the salt lake of Gallocauta.

USEDOM, or **USZEDOM**, an island, circle, and town of Prussia, in the prov. of Pomerania, and regency of Stettin. The island lies between the Baltic on the N, the Pommersche-haff on the S, the Peene on the W, and the Swiene, by which it is separated from the island of Wollin, on the E. It is 33 m. in length from NW to SE, and 15 m. in extreme breadth. It contains several lakes, of which the principal is the Achterwasser, an expan-

sion of the Peene. It has extensive level tracts, and is in some parts covered with wood. The soil possesses little fertility. The inhabitants, about 12,000 in number, employ themselves chiefly in fishing and navigation. It contains two towns, viz. Swinemunde and Usedom.—The town is 11 m. NW of Stettin, in N lat. 53° 47' 24", and E long. 14° 9' 25", on the Usedom-see, an arm of the Kleine-haff, and on an isthmus of the S coast of the island of the same name. Pop. in 1853, 1,504. It is enclosed by walls, with three gates, and has two suburbs. It has distilleries of brandy, but fishing and agriculture form the chief objects of industry.

USELDINGEN, a village of Holland, in the prov. of Luxemburg, circle of Diekirch. Pop. 560.

USERAS, a town of Spain, in the prov. and 12 m. NNW of Castellon-de-la-Plana, and 32 m. SW of Peniscola, in an irregular but fertile locality. Pop. 1,900. It has a church, several chapels, and an hospital.

USERIN, a village of the grand-duchy of Mecklenburg-Strelitz, bail. and 5 m. W of Alt-Strelitz. It has tan and saw-mills. Pop. 800.

USH, or Ouj, a river of Russia, which rises in Volhynia, and flows in an ESE course of 120 m. to the Pripiet.

USHAK, a town of Asiatic Turkey, 70 m. SW of Kutahyah. It has a considerable manufacture of carpets.

USHANT, or Ouessant, an island of France, off the coast of Finistere. It is 5 m. in length, and 3 m. in breadth; and had a pop. in 1841 of 2,194, chiefly fishermen. It has a lighthouse on its NE point, in N lat. 48° 25' 31", E long. 5° 3' 19".

USHLAWROED, a hamlet in the p. of Bedwelyt, Monmouth. Area 6,150 acres. Pop. 5,859.

USINGEN, a town of the duchy of Nassau, capital of a bail. of the same name, and 24 m. NE of Wiesbaden, on the Uzbach. Pop. 200. It is enclosed by walls, and has a suburb, a fine castle, two churches, an hospital, and a polytechnic school. It possesses manufactories of hosiery, flannel, tanneries, and several tan and fulling-mills. Pop. of bail., which has an area of 26 sq. m., 22,000.

USITZA, a district and town of Turkey in Europe, in Servia, 100 m. SSW of Belgrade, on one of the head streams of the Morava.

USITENNA. See Voustrain.

USK, a market-town and parish in the co. of Monmouth, 12½ m. SW of Monmouth. The p., which includes the hamlets of Glascoed and Gwchellog, has an area of 4,956 acres, of which 410 belong to the township of U. Pop. in 1801, 734; in 1831, 1,775; in 1851, 2,038. The town, which receives its name from the river on the banks of which it is situated, is supposed to stand on the site of the Roman station *Burrium* or *Bullacum*. On an abrupt eminence to the E are the remains of an ancient castle, destroyed in the Parliamentary war, when the town also suffered considerably. The town chiefly consists of several streets, disposed generally in the form of an oblong square. The high-road to Abergavenny passes the principal street; the houses in which are much scattered and separated by gardens and orchards. There is a bridge of 5 arches over the Usk. The Mamhilad railway runs from this bridge to the Brecknock and Abergavenny canal, in Mamhilad p., a distance of about 5 m. The town-hall is a neat structure, erected by the Duke of Beaufort. The inhabitants are employed in the salmon-fishery on the Usk, in husbandry, and the manufacture of japanned tin ware. The quarter-sessions for the county are held alternately here and at Monmouth. The county house-of-correction is in the neighbourhood of the

town. This town returns a member to Parliament, in conjunction with Newport and Monmouth. The number of voters registered in 1832 was 107.

USK, a river of South Wales, which rises in a lake on the N side of the Bannau-Sir-Gaer in Caermarthenshire; runs first N and then E as far as Brecknock, where it is joined by the Honddu; it then runs SE to Abergavenny, and in this part of its course is joined by the Grwyneu-fawr. About 3 m. below this it enters Monmouth, and its course from this point is described under the head Moxmouthshire. Its total course is about 60 m.

USKE, a parish, 3½ m. NE by N of Ballymore, in co. Kildare. Area 1,763 acres. Pop. in 1841, 1,036.

USKEANE, a parish in co. Tipperary, 2 m. NE of Borris-o'-kane. Area 7,656 acres. Pop. in 1831, 1,459; in 1841, 1,875.

USKEYAGH (Loon), an inlet of the sea on the E side of Benbecula, in the Outer Hebrides, the largest of the singularly ramified sea-lochs which cut that island into a labyrinth of land and water.

USKONG, a parish of Norway, in the diocese and bail. of Aggershuus. Pop. 2,500.

USKUP, a sanjak and town of Turkey in Europe, in the W part of Rumelia, and forming a portion of the ancient Macedonia. The sanj. lies between 41° 20' and 42° 15' N lat., and between 21° 15' and 23° 20' E long.; and is bounded on the W and NW by the sanj. of Scutari, from which it is separated by the Tohar-Dagh and the mountains of Gliubotin; on the NE and E by the sanj. of Ghiustendil, from which, in the first of these directions, it is separated by the mountains of Argentaro or Egrisu; and on the SW by the sanj. of Monastir. It is 69 m. in length from E to W, and 39 m. in breadth, and has generally a mountainous surface. The principal rivers are the Vardar, and its affluents the Uskup and Lepents and the Paigna. The sanj. comprises 4 districts or jurisdictions. The inhabitants are chiefly Greeks.—The town is situated on the l. bank of the Vardar, at the confluence of the river of the same name, and 120 m. NW of Salonica. Pop. 12,000. From the beauty of its situation and buildings, it has been named the fiancée of Greece. It contains several mosques and Greek churches, and fine promenades. This town, from the number and extent of the ruins by which it is surrounded, appears to have formerly been a place of great size. It is built on irregular ground, but is filthy in the extreme. In the W part, on a hill near the Vardar, are the ruins of an old castle.

USLAR, or UESLAR, a town of Hanover, capital of an amt. of the same name, in the gov. of Hildesheim, 23 m. N of Gottingen, at the foot of the Solling, in a valley watered by the Ahle. Pop. 2,780. It is enclosed by walls, and has an hospital. It has manufactories of linen and pipes, several bleacheries, a copper-work, forges, and paper-mills.

USMAN, a town of Russia, in the gov. and 90 m. SW of Tambof. Pop. 3,800.

USMASTON, or UZMASTON, a parish in Pembrokeshire, 1½ m. SE of Haverford-West, on the river Cleddy. Area 2,070 acres. Pop. in 1851, 683.

USFALLATA, a town of Chili, in the prov. and 100 m. NE of Santiago, in a valley of the same name, formed by a bifurcation of the Andes, and traversed by the Mendoza and San-Juan rivers, which flow respectively S and N, and escape on the E by two narrow gorges. The pass of U. forms the most frequented road between Chili and La Plata. In the vicinity is an extensive silver-mine.

USSAC, a commune of France, in the dep. of the Correze, cant. and 3 m. NNE of Brives. Pop. in 1846, 2,175.

USSANA, a village of Sardinia, in the div. of

Cape Cagliari, prov. and 12 m. N of Cagliari, in a fertile but unhealthy plain. Pop. 1,000.

USSAT, a village of France, in the dep. of the Ariège, cant. and 2 m. SE of Tarascon, near Mount Segur. It has several mineral springs and baths, and in its vicinity are beds of fine alabaster.

USSEAU, a commune of France, in the dep. of the Deux Sèvres, and cant. of Mauzé. Pop. 1,280.

USSEL, an arrondissement, canton, commune, and town of France, in the dep. of the Corréze. The arrond. comprises an area of 89,586 hect., and contains 7 cant. Pop. in 1831, 57,378; and in 1846, 64,836. The cant. comprises 13 com. Pop. in 1831, 10,910; in 1846, 12,086. The town is 86 m. NE of Tulle, on the Sarsonne, which is here crossed by a fine bridge, near the Diege, and at an alt. of 792 yds. above sea-level. Pop. in 1789, 2,652; in 1821, 3,497; in 1831, 3,963; and in 1846, 4,350. It has manufactories of woollen fabrics, sail-cloth, and saddlery, a tannery, and a nail-work. Granite is found in the environs.

USSELBY, a parish in Lincolnshire, 3 m. N by W of Market-Raisin. Area 1,110 acres. Pop. in 1831, 84; in 1851, 69.

USSES, a river of Sardinia, in the div. of Savoy, and prov. of Genevois, which has its source in the mountain Des Saleves; runs first W, and after a total course of about 80 m., flows into the Rhine on the L. bank, a little above Seyssel. It is joined by the Petites Ussets, a mountain torrent.

USSON, a commune of France, in the dep. of the Puy-de-Dôme, cant. and 2 m. NE of Sauxillanges. Pop. 881. It contains the ruins of an ancient fortress of the same name, formerly one of the strongest in France. It was noted as the residence of Marguerite, first wife of Henry IV. It was destroyed by Louis XVIII. in 1684.

USSON-EN-FOREZ, a commune and town of France, in the dep. of the Loire, cant. and 8 m. SW of Bonnet-le-Château. Pop. in 1846, 3,780.

USSON-DE-POITOU, a commune and town of France, in the dep. of the Vienne, and cant. of Gençay, 15 m. NE of Civray, on the Cluere. Pop. in 1846, 2,183.

USSORA, a river of Turkey in Europe, in the prov. of Bosnia, which, after a course in a generally NE direction of about 45 m., joins the Bosna.

USTAD, a village of Cutch Gundava, near a lake on the road from Sind to Candahar.

USTARITS, or USTARITZ, a canton, commune, and town of France, in the dep. of the Basses-Pyrénées, and arrond. of Bayonne. The cant. comprises 8 com. Pop. in 1831, 8,438; and in 1846, 9,491. The town is 8 m. S of Bayonne, on the L. bank of the Nive. Pop. in 1846, 2,466. It has manufactories of common woollen fabrics, glass, earthenware, and nails, and several tanneries.

USTARROZ, a town of Spain, in the prov. of Navarra, 30 m. ENE of Pamplona, in the valley of Boncal, partly at the foot, and partly on the slope of a mountain, in a fertile locality and near the frontier of France. Pop. 619. It is divided into two parts by a river of the same name.

USTELLEGNY, a mountain of France, in the dep. of the Basses-Pyrénées, near the valley of Bargoiry. It contains extensive seams of iron.

USTER, a village of Switzerland, in the cant. and 13 m. ESE of Zurich, and bail. of Greiffensee on the Aabach. It contains the ruins of a castle of the same name. Pop. of parish, 4,496. It has extensive cotton factories. Wine is cultivated in the locality.

USTICA, an island of Sicily, in the prov. of Palermo, in the Tyrrhenian sea, in N lat. 38° 45', and E long. 18° 11'. Pop. 1,800. It is 8 m. in

length, and 1½ in breadth, and is nearly oval in form. It contains several mountains, of which the principal are Guardia, in the centre; Larso, in the S; and in the NE, the hill on which is fort Falconara. The coasts are in most parts steep. The soil possesses considerable fertility, and produces wine, corn, olives, cotton, &c. Fresh water is scarce, and the inhabitants depend chiefly on rain water, which they collect in cisterns. In the vicinity are several coral banks. The chief town is Santa Maria.

USTON, a commune of France, in the dep. of the Ariège, and cant. of Oust, on the Aleth. Pop. in 1846, 3,891. In the vicinity are extensive silver-mines and a forge.

USTRON, a village of Moravia, in the circle and 9 m. ESE of Teschen, on the L. bank of the Vistula. It has extensive iron-works.

USTRZGKY, a town of Galicia, in the circle and 21 m. ESE of Sanok.

USUGE (SAINT), a commune of France, in the dep. of the Saône-et-Loire, cant. and 4 m. N of Louhans, near the r. bank of the Saône. Pop. 2,391.

USUMASINTA, a river of Guatemala, which rises in the district of Peten, in Vera-Paz—on the opposite side of the ridge on which the Belize of Honduras takes its rise under the name of the Rio-de-la-Passion—and flowing from E to W, it enters the country of the Mayas Indians, in crossing which, its navigation is interrupted by a considerable cataract, near the ruins of Palenque. Below this, it is joined by the San-Pedro, the Chacamas, and the Tulija; and near the sea the Tabasco also joins it. It discharges itself by numerous channels, the principal one of which flows into the bay of Campeachy, to the W of the Lago-dos-Terminos, at the port of Victoria.

USUPAMA, a mountain of Venezuela, in the dep. of Caracas, which runs from NW to SE, and terminates on the r. bank of the Coroni.

USURBIL, a town of Spain, in the prov. of Guipuzcoa, 6 m. SW of San-Sebastian, on a hill which is washed by the Orrio. It consists of five parts, some of which are well built. Pop. 1,400. It contains a parish church, several chapels, and an hospital; and has manufactories of iron-ware and anchor-forges. This place formerly bore the name of Belmonte-de-Usurbil.

USWORTH (GREAT and LITTLE), a united township in the p. of Washington, co. of Durham, 4 m. SE of Gateshead. Pop. with North Biddick in 1801 was 1,236; in 1831, 1,477.

USZIKA, a district and town of Russia in Europe, in the gov. of Podolia, 25 m. ESE of Kamieniec, on the Dniester. Pop. 1,250.

UTA, a village of Sardinia, in the div. of Cape Cagliari, prov. and 12 m. W of Cagliari, between the Mannu and Sixerris, in a fertile plain. Pop. 1,200. It has some trade in corn.

UTAH, the name now assumed by the United States territory which was originally organized under the title of the state of DESSETER, and is physically described under that name, and in the article GREAT SALT LAKE, in our columns. The territory, as now remanded back by congress, in the session of 1849-50, to a territorial rank, under its present title, and which previously constituted a portion of the Mexican province of California Alta, lies between the parallels of 37° and 42° N, and the meridians of 106° and 120° W; and is bounded on the N by Oregon; on the E by Nebraska and New Mexico; on the S by New Mexico; and on the SW and W by California. Its extreme length from E to W is 740 m.; its breadth 840 m. Its area has been recently computed at 187,923 sq. m. The great basin, which the larger portion of it constitutes, is

about 500 m. in length by 265 m. in breadth; and contains the Great Salt Lake, about 70 m. in length by 30 to 35 m. in breadth. None of its streams or lakes have any visible outlet either to the Atlantic or the Pacific. In 1850 it was divided into the 7 cos. of Davis, Great Salt Lake, Iron, San-Peto, Tule, Utah, and Weber, having an aggregate pop. of 11,380.—Also a county of Utah territory, extending from the mountains to the W of Utah lake to the Rocky mountains, a distance of about 25 m. It is generally hilly, and is drained by Green river and its affluents. Pop. in 1840, 2,026. Its capital is Provo city.—Also a lake of the same territory, to the SE of the Great Salt Lake, with which it is connected by the Jordan. It receives Timpanogoo river and Spanish Fork on the E, and Utah river on the S. The latter river has its source in the W part of San-Peto co.

UTANDE, a town of Spain, in the prov. and 15 m. NE of Guadalajara, in a valley watered by the Vadiel. Pop. 292. In the vicinity is a Benedictine abbey, the oldest in the prov.

UTATLAN. See QUICHE.

UTAWA. See OTTAWA.

UTCH, a village of Sind, in the delta of the Indus, near the Joa mouth.

UTCUBAMBA, or HUAHUA, a river of Peru, in the dep. of Truxillo, which has its source in the Andes passos, to the W of Chachapoyas; enters Ecuador, and joins the Tunguragua on the r. bank, about 20 m. SSE of Jaen-de-Bracamoros, and after a course, in a generally NW direction, of about 210 m.

UTELLE, a town of Sardinia, capital of a mandemento, in the prov. and 21 m. N of Nice. Pop. 1,600. The culture of the vine, olive, and chestnut, and manufacture of cheese, form the chief objects of local industry.

UTENDORF, a village of Saxe-Meiningen, at the foot of the Dolmars. Pop. 230.

UTERSEN, or YTERSON, a town of Denmark, in the duchy of Holstein, 12 m. SE of Glückstadt, on the Pinnau. Pop. 2,200. It has manufactories of pottery and sugar refineries, and carries on an active trade in cattle.

UTHLEBEN, a village of Prussia, in the reg. of Merseburg, circle of Sangerhausen. Pop. 595.

UTICA, a city of Oneida co., in the state of New York, U. S., on the S side of the Mohawk river, 84 m. distant by railroad from Albany, and in N lat. 43° 6' 49", and W long. 75° 13'. It stands on a beautiful inclined plane, sloping towards the river, and is surrounded by one of the best agricultural and manufacturing districts in the Union. It is intersected by the Albany and Buffalo railroad, and the Erie and Chenango canals. Pop. in 1820, 2,972; in 1830, 8,328; in 1840, 12,782; and in 1850, 17,565.—Also a village of Licking co., in the state of Ohio, on the E side of the N fork of Licking river, and 47 m. by the Central Ohio and the Sandusky, Mansfield, and Newark railway from Columbus. Pop. in 1840, 800; and in 1850, 420.—Also a village of Shelby township, Macomb co., in the state of Michigan, 22 m. NNE of Detroit, on the E bank of Clinton river.—Also a village of Clarke co., in the state of Indiana, 109 m. S by E of Indianapolis, on the NW bank of the Ohio. Pop. about 300.—Also a village of Livingston co., in the state of Missouri, 167 m. of Jefferson, on the W side of Grand river. Pop. about 100.

UTIEL, a town of Spain, in the prov. and 54 m. W of Valencia, near the gorge of the mountain of Bunol. Pop. 5,700. It is built without regularity. It possesses manufactories of silk and linen fabrics, paper, and soap, and brandy distilleries and flour-mills.

UTILA, a small island of the Caribbean sea, near the coast of Honduras, to the NW of the island of Roatan, in N lat. 16° 14', and W long. 87° 10'. It is 7 m. in length, rises to a considerable height, and is covered with wood. It was formerly inhabited.

UTKINTON, a township in the p. of Tarporley, co.-palatine of Chester, 1½ m. N by W of Tarporley. Pop. in 1801, 458; in 1881, 564.

UTLAENGE, or UTLANGEN, an island of Sweden, in the prefecture of Bleking, in the Carlskrona channel. It has a village of the same name, and possesses considerable cultivation.

UTOE, a small island of Russia in Europe, off the SW coast of Finland, in N lat. 59° 47', and E long. 21° 25'. It has a light-house.—Also a small island of Sweden, in the archipelago of Stockholm, in the Baltic. It has productive iron-mines.

UTOROP, a village of Galicia, in the circle and 15 m. S. of Kolomea.

UTRECHT, a province of Holland; bounded on the N by N. Holland and the Zuyder-Zee; on the E and S by Gelderland, and on the W by N. Holland. Its surface is level, except toward the S and the E, where the monotonous aspect of the scenery begins to be exchanged for a slight variety of vale and eminence. The soil in some parts is sandy, and fit for little but raising wood; in general, however, it affords good pasture. The extent of the province is about 490 sq. m. It is traversed by the Vecht, the Amstel, and other branches of the Rhine, and has a better supply of springs and streams than the maritime provinces, as well as a purer atmosphere. Agriculture is here active and prosperous. Wheat, rye, barley, oats, buckwheat, beans, and potatoes, are extensively cultivated. Cattle and horse-breeding is also pursued on a very extensive scale. The exportation, chiefly to England, from this province in 1849, was 72,522 head; in 1850 it had risen to 75,966. Of horses the exportation in 1849 was 11,214; in 1850, 11,801. Of sheep, the exportation in 1849 was 27,671; in 1850, 30,749. Of swine, the exportation in 1849 was 19,921; in 1850, 22,549. Cheese is also manufactured on a large scale; and as a consequence of the extensive reclamation of waste lands, turf is raised in large quantities, and the exportation of that article is considerable. The pop. in 1851 numbered 150,279—a small amount by comparison with the other provinces of Holland. Since 1830, however, the augmentation of pop. has been 17,253. The trade of this district is inconsiderable. There is in progress a very extensive reclamation and tillage of waste land, assisted by a regulation of the government which exempts from the land-tax all land taken for the purpose of reclamation. Education is well provided for. Besides the university of Utrecht, which now contains 351 students, there are 149 elementary schools in the district, attended by 18,911 pupils; of whom 10,427 are boys, and 8,484 girls. This prov. is likewise well supplied with charitable establishments for the poor. There are altogether 148, of which 131 are entirely maintained and conducted by ecclesiastics, and with ecclesiastical funds; 14 are civil establishments; and 3 mixed, civil and ecclesiastical. In addition to the elementary schools before mentioned, the writer whose recent details we have transcribed in this article states that there are 16 for pauper children, 67 communal schools, 10 infant schools, and 6 Sunday-schools.

UTRECHT, the capital of the preceding province, is situated 23 m. SE of Amsterdam, on the Vecht, where it branches off from the Old Rhine, by which it is divided into two parts. The position is healthy, and exempt from the disadvantages of damp so common in Dutch towns, the soil being dry, and

having a degree of elevation considerably above the level of the canals; and nothing can surpass the beauty of the approaches to the town, particularly that from Amsterdam, which consists of a broad avenue bordered with rows of trees. U. is surrounded with an earthen mound which has been levelled and planted. It is of a form nearly square, and, exclusive of the suburbs, about 3 m. in circuit. Its aspect is antique, many of the houses being built in the Gothic style. The streets are of considerable width, and intersected by canals, the level of which is in some instances 20 ft. below that of the pavement. Of the public edifices, the most remarkable is the cathedral, a considerable part of which is now in ruins, but the detached tower, which still remains entire, is a very remarkable object. Its height is said to be 388 ft., and from a point, at the height of 300 ft., the eye commands, towards the W, the cities of Amsterdam and Rotterdam, and the whole coast between them. There are 11 other Protestant, and 8 Roman Catholic churches. The stadhuis or town-house is a good structure: the other objects worthy of notice are the charitable establishments, and hospitals. A beautiful public walk, called the Maliebaan, outside the walls, is upwards of a $\frac{1}{2}$ m. in length, and bordered with several rows of lime-trees. The university of U., though not so celebrated as that of Leyden, is of considerable note. It was founded in 1636; is attended by about 300 students; and has professors in the classical languages, mathematics, medicine, divinity, and law. Its buildings are plain; but attached to it are a library, an anatomical theatre, a botanical garden, a cabinet of natural history, and an observatory. The town likewise possesses a hall-of-paintings, schools for the fine arts, and several valuable private libraries and other collections. The pop. in 1849 was 49,176. The manufactures are on a small scale, and consist chiefly of cotton and woollen spinning, silk-twisting, and carpet weaving, velvet, soap, leather, and cordage; but the trade in grain and in cattle is not inconsiderable, having the advantage of inland navigation. U. is the first town in the Dutch provinces where the traveller coming from the westward perceives an uneven surface, and begins to exchange the monotony of Holland for the diversified scenery of Gelderland. "Here the flat, dead level of Holland seems to end. The neighbourhood, it is true, can still be flooded for purposes of defence, by means of the works erected as recently as 1820; and by this contrivance the prov. of Holland is capable of being separated from the land to the east, like a fortress within a moat, and defended by its pop. when the rest of the country is in the hands of an enemy. It is because U., as it were, commands the outworks of the fortress, that so much pains have been taken at various times with the works constructed for its defence. But as you travel E from this city, you find that, not many miles off, defence by means of inundations becomes no longer possible: there is no longer the flat, open country level as a bowling-green, the line around the horizon being as uniform as if drawn by a ruler; canals become less frequent; the rows of trees and windmills are no longer to be seen; the rich level pastures studded with cattle, have been left behind; and in their stead, are waving fields of grain and buckwheat, spreading over a gently undulating country, well timbered, full of glade, and copse, and woody avenues. Here, in the primeval age of Holland, the sea intruded not; the mud-flats out of which the prov. of Holland proper was afterwards scraped, could not have extended eastward of U., which must then have lain upon the verge of the peopled continent."—U. was the *Trajectum ad Rhenum* of the Romans; and *Ultra*

Trajectum of the Middle ages. It was the birth-place of pope Adrian VI.; and is memorable as the place where, in 1579, was concluded the act-of-confederation of the seven provinces, and in 1713, the well-known treaty of peace between the allies and French.

UTRERA, a judicial partido and town of Spain, in the prov. of Seville. The town is 20 m. SSE of Seville, in a luxuriant valley. Pop. 12,000. It is surrounded by old walls, and has the remains of an ancient castle. The streets are spacious and well-paved, and the houses generally well-built. It has a large square adorned with two fine fountains. It contains two parish churches, the principal of which, of Gothic architecture, is remarkable for its fine naves and lofty clock tower—seven convents, numerous hospitals, a fine town-house, cavalry barracks, and a prison. It possesses manufactories of hats, pottery, soap, and starch, a tannery, and numerous oil-mills. Cattle and horses are among its most important objects of trade. In the vicinity are several salt works. U. is the ancient *Iliturge*.

UTRILLAS, a village of Spain, in the prov. and 51 m. from Saragoza. Pop. 100. In the vicinity are several coal-mines.

UTTENDORF, a town of Austria, in the gov. of Linz, and circle of the Inn, 29 m. N of Salzburg, on the Mattig. It has manufactories of hosiery.

UTTENHAGE. See UITTENHAGEN.

UTTERBY, a parish in Lincolnshire, $\frac{1}{2}$ m. N by W of Louth. Area 1,564 acres. Pop. in 1851, 246.

UTTOXETER, a market-town and parish in the co. of Stafford, 14 m. NE by E of Stafford, containing the townships of Crakemarsh, Creighton, Stramshall, and Woodlands, and the v. of Woodgate, which last is pleasantly situated about a $\frac{1}{2}$ m. S of Uttoxeter. Area 8,973 acres, of which the township of U. contains 2,440 acres. Pop. of p. in 1801, 2,779; in 1831, 4,864; in 1851, 4,990. The town is a place of great antiquity. Leland calls it Utok-Cester. It is situated upon a gentle eminence on the W bank of the Dove, about $\frac{1}{2}$ m. from the river, in the heart of a rich pasture district. It consists of several streets with a market-place in the centre. An ancient bridge over the Dove here unites the counties of Stafford and Derby. The town has a considerable traffic in corn and cheese, which has been facilitated by the formation of a branch-canal from the Caldon canal near Frogghall, a branch of the Trent and Mersey navigation, which comes up to a wharf in the W end of the town.

UTTWEIL, or Urtwyl, a village of Switzerland, in the cant. of Thurgovia, and bail. of Arbon, 26 m. ENE of Frauenfeld, on lake Constance. Pop. 606.

UTZE, a village of Hanover, in the gov. of Lüneburg, 15 m. SSE of Celle.

UUA, or Oa, a river of New Granada, which issues from a lake of the same name, and after a course in a generally SE direction of about 100 m., joins the Guaviare on the l. bank, in W long. 70°.

UVALDE, a central county of the state of Texas, U. S., comprising an area of about 1,300 sq. m., drained by Rio Frio and its branches, and bordered on the W by Nueces river. It is mountainous in the N, but is in other parts fertile and well-cultivated.

UWCHLAND, a township of Chester co., in the state of Pennsylvania, U. S., 85 m. ESE of Harrisburg. It is generally level, and is drained by Brandywine creek. Pop. in 1850, 1,600.

UWUR, a village of the Punjab, on the l. bank of the Chenab.

UXBRIDGE, a market-town and chapelry in the p. of Hillington, Middlesex, 15 m. W by N of London. The town is situated on a gentle declivity on the banks of the river Colne, over which there

are here two bridges. The Grand Junction canal, on which are wharfs, warehouses, and other conveniences for trade, passes through it. The town consists chiefly of a single well-paved street, nearly 1 m. in length, and having a commodious market-house in the centre. It has a considerable trade in flour, for grinding which there are numerous mills on the river, while the conveyance of flour to the metropolis is facilitated by the Paddington canal. Pop. in 1801, 2,111; in 1831, 3,048; in 1851, 3,236.

UXBRIDGE, a parish of Van-Diemen's Land, in the co. of Buckingham, bounded on the E by the Plenty, and on the W by the Styx.

UXBRIDGE, a township of Upper Canada, in the Home district. Pop. in 1842, 810.

UXBRIDGE, a township of Worcester co., in the state of Massachusetts, U. S., 36 m. SW of Boston, watered by Blackstone river and its tributaries, and intersected by the Providence and Worcester railway. Pop. in 1840, 2,004; in 1850, 2,457.

UXELOUP, or UXLOUP, a village of France, in the dep. of the Nièvre, cant. and 10 m. NE of St. Pierre-le-Moutier, in a plain, on the l. bank of the Loire. Pop. 125.

UXMAL, a ruined city of Yucatan, 45 m. SSW of Merida, and 10 m. from the ruins of Zayi. Mr. Norman describes a vast pile of ruins here which he calls the governor's house, as standing upon three ranges of terraces: the great platform, or terrace, measuring upwards of 500 ft. long, and 415 ft. broad. It is encompassed by a wall of fine hewn stone 30 ft. high, with angles rounded, still in good preservation. Along the S edge of this platform are the remains of a range of small pillars. Upon the NW corner of the platform is an edifice, the smallest of all the ruins, with few and plain ornaments, the most remarkable of which is a continuous line of turtles, cut from stone of about a foot square, arranged under the cornice. Upon the main terrace stands another of smaller dimensions, constituting the foundation of the governor's house. The measurement of this terrace is 338 ft. long, 83 ft. broad, and 30 ft. high, having a majestic flight of stone steps in front of the entrance. It is divided into double ranges of rooms, from front to rear. Two of the principal, situated in the centre, are 55 ft. long, 10 ft. broad, and about 19 ft. high, with an angular ceiling occupying one half of the whole. The walls, of a durable kind of limestone, are upwards of 3 ft. thick, and of fine hewn stone laid with the greatest care. The ornaments are composed of small square pieces of stone, shaped with skill, and inserted between the mortar and stone with the greatest care and precision. An extensive pile of ruins designated as the nuns' house, is situated a few rods distant, in a N direction from the governor's house. It comprises four great ranges of edifices, placed on the sides of a quadrangular terrace, measuring about 1,100 ft. around, and varying in height from 15 to 24 ft., its sides corresponding to the cardinal points. The principal entrance is through an acute-angled arched doorway into a spacious court. This range is upwards of 200 ft. long, 25 ft. broad, and 16 ft. high, containing eight rooms on either side of the principal entrance. The opposite, or northern range, by its superior elevation, and more elaborate work, was evidently the principal portion of this immense structure. The walls of the rooms are finished with a clean, white, hard substance. On the western facade are the remains of two great serpents; their heads turned back, and entwining each other. They extend the whole length of the facade, through a chaste ground-work of ornamental lines, interspersed with various rosettes; and are put together by small blocks of stone, exquisitely worked, and arranged with skill and precision. The pyramid, situated about two rods E from the ruins of the nuns' house, with which it appears in some way to have been connected, presents a fine exterior of hewn stones, large at the base, and diminishing in size as they approach the platform. Its base measures 500 ft.; from the base to the summit or platform it is 100 ft. The summit is reached, on the E side, by a flight of 100 stone steps, each one foot high, and about 6 inches deep. The area of the platform measures 73 ft. in length and 31 ft. in width, and is occupied by an edifice 60 ft. long, 13 ft. wide, and 30 ft. high. A few rods distant, in a SW direction from the governor's house, are the remains of an extensive range, or succession of ruins composed of terraces, walls, rooms and corridors, and court-yards.

UXUE, a town of Spain, in the prov. of Navarra, and 27 m. SE of Pamplona, on the summit of a mountain of the same name, and one of the highest in the prov. Pop. 1,440. It was formerly surrounded by walls, of which a small portion only now remains, and has a cistern of extraordinary dimen-

sions. Its trade consists chiefly in charcoal, fagots, and oil.

UYCKHOVEN, a department and town of Belgium, in the prov. of Limburg, watered by the Meuse. Pop. 435.

UYEA, an isle, harbour, and village, in the p. of Unst, in Shetland. It is the grand rendezvous of shipping for the deep sea-fishing, and the entrepot for goods to the fishing-stations in Unst and neighbouring islands.—Also a pasture-island, about 2½ m. in circumf., on the W coast of Northmaven, 4½ m. from the N extremity of the mainland of Shetland. It covers a safe harbour on the coast of the mainland.

UYLEBROCK, a commune of Belgium, in the prov. of E. Flanders, dep. of Vlierzele. Pop. 323.

UZBEKS. See USZACS.

UZE, a commune of France, in the dep. of the Drôme, cant. and 2 m. from St. Vallier, on the Galaure, near its confluence with the Rhone. Pop. 600. It has manufactories of pottery and bricks.

UZECH-DES-OULES, a commune of France, in the dep. of Lot, cant. of St. Germain. Pop. 706. It has extensive manufactories of pottery, and several oil-mills.

UZEDA, a town of Spain, in the prov. and 24 m. NW of Guadalajara, on a rising ground, the base of which is washed by the Xarama. Pop. 700. It has the remains of towers, a church, and a convent. This town has the title of a county, and was formerly fortified. At the distance of about 5 m. amid the mountains is the famous village of Patones.

UZEGEOIS, an ancient district of France, in Languedoc, now comprised in the departments of the Gard and Lozere. It derived its name from Uzès, the capital.

UZEL, a canton, commune, and town of France, in the dep. of the Côtes-du-Nord. The cant. comprises 7 com. Pop. in 1831, 14,205; in 1846, 12,390. The town is 9 m. NNW of Loudéac, near the l. bank of the Oust. Pop. in 1841, 2,090. It has three fine halls, and five different market-places, and is the centre of an extensive trade in linen and thread, and in cattle, fruit, and shoes.

UZEN (Болчои), a river of Russia, which rises in the gov. of Saratov; and flows SW, and then SE, to the salt lake of Kamych, into which it flows after a course of 260 m.

UZERCHE, a canton, commune, and town of France, in the dep. of the Corrèze, and arrond. of Tulle. The cant. comprises 9 com. Pop. in 1831, 13,340; in 1846, 14,213.—The town is 15 m. NW of Tulle, on a steep hill, near the l. bank of the Vézère, which is here crossed by a substantial bridge, and near the confluence of the Bradascon. Pop. in 1846, 3,485. It is ill-laid out and badly built, but has a generally picturesque aspect. It has a communal college. The locality is noted for its horses. U. formerly bore the name of Usreca.

UZERO, a village of Spain, in the prov. and 30 m. W of Soria, on a river of the same name, which is here crossed by a bridge, and a little above its confluence with the Duero. Pop. 200. It has an old castle, a fulling-mill, and a dye-work.

UZE'S, an arrondissement, canton, commune, and town of France, in the dep. of the Gard. The arrond. comprises an area of 148,010 hect., and contains 8 cant. Pop. in 1831, 83,732; in 1846, 89,536.—The cant. comprises 15 com.—Pop. in 1831, 14,489; in 1846, 16,304. The town is 14 m. NNE of Nîmes, on a height near the r. bank of the Auzon. Pop. in 1789, 7,566; in 1821, 5,622; in 1831, 7,274; in 1846, 7,215. It is generally ill-laid out, and ill-built, and with the exception of the episcopal palace, and a fine terrace near the church, contains few objects of interest. It has a consisto-

rial church, a communal college, and possesses manufactories of hosiery, in silk and cotton and common cloth, and earthenware, several tanneries, oil, and silk spinning-mills; and a trade in grain, wine, brandy, cattle, oil, and silk. This town, which is of great antiquity, was formerly the seat of a bishop. In the 16th century, it was fortified by its inhabitants, who had embraced the Calvinist faith, and who maintained their independence within its walls till 1629, when it was taken by Louis XIII., and its fortifications razed to the ground.

UZESTE, a town of France, in the dep. of the Giroude, cant. and 3 m. ESE of Villandrau. Pop. 915.

UZNACH, a district and town of Switzerland, in the cant. and 30 m. SW of St. Gall, on a height, near the E extremity of Lake Zurich. Pop., Cath., 1,586. It is well-built, and is surrounded by a finely wooded country. In the vicinity is a quarry of lignites in which naphtha is found.

UZZANO, a commune of the grand-duchy of Tuscany, in the prov. of Florence, and vicarist of Pescia, in the Val-di-Nievole. Pop. 3,280.

V

*. For articles not found under V, look under B, F, or W.

VAACKE, a village of Electoral Hesse, in the prov. of Lower Hesse and circle of Hof-Geismar, on the Weser. Pop. 792.

VAAGE, a parish of Norway, in the diocese of Agderhus and bail. of Christian, and 156 m. NNW of Christiania. Pop. 8,400.

VAAGOE (Oer), an island of the Lofoden group, to the W of Hindoen, in N lat. 68° 50', and E long. 114° 10'. It is 86 m. in length from NE to SW, and 18 m. in breadth. It contains the parish and port of Vaage. Pop. 1,800.

VAAGOE (Vær), an island of the Lofoden group, to the WSW of Ost-Vaagoe, in N lat. 68° 25', and E long. 15° 10'. It is 86 m. in length from NNE to SSW, and 15 m. in breadth, and contains several parishes. Both these islands are chiefly inhabited by fishermen.

VAAGS-OE, an island off the W coast of Norway, in the diocese of Bergen and bail. of Northern Bergen, in N lat. 61° 58', to the SW of Stadland.

VAAL. See **GARDER** and **ORANGH RIVER**.

VAALE, a parish of Norway, in the diocese of Agderhus and county of Jarlsberg. Pop. 1,700.

VAALER, a parish of Norway, in the diocese of Agderhus and bail. of Smaalenen, and 80 m. S of Christiania. Pop. 1,800.

VAAE, a commune and town of France, in the dep. of the Sarthe, cant. and 8 m. S of Mayet, on the r. bank of the Loir, between the Brault and Guicherat. Pop. 1,998. It has several tanneries. This town was formerly fortified, and was for some time held by the English.

VAASEN, a village of Holland, in the prov. of Guelders, 28 m. N of Arnhem. Pop. 1,300.

VAAST (Sadt), a village and port of Belgium, in the prov. of Hainaut, 10 m. E of Mons. Pop. 1,615.—Also a town of France, in the cant. and 3 m. E of Quetshou, a little to the NE of La Hogue. Pop. 880. It is protected by a battery on the E.

VAAST. See **HOUEUX** (LA).

VAAST-DIEPPEDAL (Sadt), a village of France, in the dep. of the Seine-Inferieure, cant. and 7 m. ENE of Ourville. Pop. 1,026.—Also a commune in the dep. of the Aveyron, and cant. of Rieupeyroux. Pop. 2,156.

VABRE, or **VABRES-DE-SEREGATE**, a canton, commune, and town of France, in the dep. of the Tarn, and arrond. of Castres. The cant. comprises 6 com. Pop. in 1831, 9,027; in 1846, 9,579.—The town is 12 m. N of Castres, on the Berion. Pop. in 1846,

2,583. It has a Calvinist consistorial church, and possesses manufactories of cotton and woollen fabrics, and of leather.

VABRES, a commune and town of France, in the dep. of the Aveyron, cant. and 8 m. WSW of St. Affrique, on the r. bank of the Dourdan, and near its confluence with the Sorgues. Pop. 730. It was formerly a bishop's see.

VACAH, a river of Brazil, in the prov. of São-Pedro-do-Rio-Grande, and district of Cacapaba, which has its source in the mountains to the E of the Rio-Ibicui; runs ENE, and joins the Jacuhi, on the r. bank, some leagues above the confluence of the Santa-Barbara.

VACALLO, a village of Switzerland, in the cant. of Tesino and district of Mendrisio. Pop. 550.

VACARAPI, a river of Brazilian Guayana, in the district of Macapa, which joins the Para, 18 m. above its confluence with the Amazon.

VACARIA, a river of Brazil, in the prov. of Minas-Geraes, and comarca of Rio-de-Jequitinhonha, which has its source in the Serra of Grão-Mogor, and joins the Jequitinhonha on the l. bank, above the confluence of the Aracuaí.

VACAS (RIO-DE-LAS), a river of Guatemala, which has its source in the E part of the territory of Sacatepec; runs SW; passes Guatemala-la-Nueva; and after a course of about 90 m., throws itself into the port of Guatemala.

VACCA, a small island of the Mediterranean, near the coast of Sardinia, in the gulf of Palmas, and to the NE of the island of Toro, with which it was comprised by the ancients under the name of *Phumbea*.

VACCARIZZO, a town of Naples, in the prov. of Calabria-Citra, district and 14 m. W of Rossano, on a hill. Pop. 978. It has two churches, a Latin and a Greek.

VACH, a village of Bavaria, in the circle of the Rezat and presidial of Kadolzburg, 8 m. NW of Nuremberg. Pop. 883. It has glass-works.

VACH, or **VACHA**, a town of Saxe-Weimar-Eisenach, capital of an amt of the same name, in the principality and 20 m. WSW of Eisenach, on the l. bank of the Werra. Pop. in 1852, 2,458. It is enclosed by walls, with three gates, and has a school and an hospital. It possesses several paper and spinning-mills, and tanneries.

VACHE, an island near the S coast of Hayti, 8 m. ENE of Point Abaco, in N lat. 18° 4', and W long. 73° 40'. It is 12 m. long from E to W, and 3 m. in

breadth, and has two good ports. It is fertile and well supplied with good water.

VACHE (LA), a village of France, in the dep. of the Drome, cant. and 6 m. S of Valence, on the Viorne. Pop. 260.

VACHERESSE, a village of Sardinia, in the div. of Savoy and prov. of Chablais, on the r. bank of the Drance, 7 m. SE of Evian. Pop. 1,000.

VACHKA, a river of Russia in Europe, which has its source in the gov. of Vologda, in the district and to the NW of Jarenek; flows through the N part of the gov. into that of Arkhangel, and after a course, in a generally NNW direction, of 225 m., joins the Mezen on the l. near Oust-Vachka.

VACIA-MADRID, a village of Spain, in the prov. and 9 m. SE of Madrid, at the confluence of the Manzanares and Jarama. It contains an ancient royal palace, several mineral springs, and some Roman antiquities.

VACQUERIE (LA), a village of France, in the dep. of the Herault, cant. and 8 m. NE of Lodeve. Pop. 500.

VACQUES, a village of France, in the dep. of the Haute-Garonne, cant. and 7 m. SE of Fronton. Pop. 550.

VACRI, a town of Naples, in the prov. of Abruzzo-Citra, district and 28 m. SE of Chieti, and cant. of Bucchanico, on a hill. Pop. 1,180.

VACZ. See **WATZEN**.

VADA, or **BURUD-KADIA**, a headland of Tunis, to the N of the gulf of Gabes, in N lat. 35° 11' 52". On its summit is a lofty tower, visible from a distance at sea of 18 m., and forming an important land-mark to navigators.

VADAGARRY, a town of Hindostan, in the presidency of Madras, in the Carnatic, in the district and 42 m. NW of Tinnevely, at the foot of the Western Ghats.

VADAGHERRY, a town of Hindostan, in the prov. of Malabar, 24 m. N by W of Calicut.

VADANS, a town of France, in the dep. of the Jura, cant. and 4 m. NW of Arbois, near the Cuisse. Pop. 672.

VADENROD, a village of Hesse, in the prov. of Ober Hesse. Pop. 540.

VADI, or **VADO**, a market-town of Sardinia, in the prov. and 4 m. SSW of Savona, on the gulf of Genoa. Pop. 2,000. It has productive fisheries.

VADILLO, a town of Spain, in the prov. of Zamora, on the Guarena. Pop. 500.

VADKERT, a market-town of Hungary, in the comitat of Neograd, to the SW of Balassa-Gyarmath. It has mineral baths. 2,400.

VADO, a market-town of Spain, in the prov. of Guadalajara. Pop. 800.

VADOCONDIS, a market-town of Spain, in the prov. of Burgos and partido of Aranda-de-Duero, on the Duero. Pop. 720.

VADONVILLE, a village of France, in the dep. of the Meuse, on the Maas. Pop. 248.

VADRUP, a village of Prussia, in the circle of Munster. Pop. 420.

VADSOE, a parish of Norway, in Finmark, on the Waranger-fjord. It has a harbour and productive fisheries. Pop. 1,200.

VADUTZ, a parish and market-town of the principality of Lichtenstein, 48 m. SSW of Bregenz, near the r. bank of the Rhine. Pop. 1,000.

VAELS, or **VAALS**, a town of Holland, in the prov. of Limburg, 16 m. SE of Maestricht, with 3,000 inhabitants, employed chiefly in the manufacture of woollens, needles, and wax-candles.

VAERDAL, a town of Norway, in the prov. and 32 m. NE of Trondhjein, at the mouth of the Vaerdals-elv. Pop. 1,900.

VAETHEN, a village of Prussia, in the reg. of Magdeburg, circle of Stendal. Pop. 320.

VAGA, a river of Russia, which rises in the gov. of Vologda; flows NE, and joins the N. Dwina, near Ust-Vaga.

VAGAI, a river of Asiatic Russia, which, after a course of upwards of 150 m., falls into the Irish, 84 m. SE of Tobolsk.

VAGHA, a town of Hungary, in the com. of Presburg, on the Vagh. Pop. 1,400.

VAGLI, a town of the duchy of Modena, in the district of Canara. Pop. 1,800.

VAGLIANO, a town of Tuscany, in the prov. of Florence, on the river Chiana.

VAGLIO, a town of Naples, in the Basilicata, 7 m. E of Potenza. Pop. 2,680.—Also a village in the Swiss cant. of Ticino, near Lugano. Pop. 236.

VAGNEY, a town of France, dep. of Vosges, on the small river Vagnev, 6 m. E of Remiremont. Pop. 2,962.

VAGOS, a town of Portugal, in the prov. of Douro, 6 m. S of Aveiro.

VAGUARE, a river of New Granada, in the prov. of Neiva, which runs E, and enters the Magdalena.

VAHLBRUCH, a village of Hanover, in the reg. of Calenberg, near Hameln. Pop. 500.

VAHR, a village in the territory of Bremen, on the r. bank of the Elbe. Pop. 480.

VAHRENHOLZ, a village of the principality of Lippe-Deimold, on the Weser. Pop. 780. It has a castle.

VAHRN, a village of Austria, in Tyrol, in the circle of Brixen. Pop. 770.

VAIGATZ, an island, or assemblage of islands, belonging to European Russia, in the Frozen ocean, between Nova-Zembla and the continent, having an entire length of 95 m., with a breadth of 32 m. Their surface is low, rocky, and incapable of cultivation equally from the soil and climate, so that they are only visited occasionally by hunters from the adjacent parts of Russia on the main land. The fixed inhabitants are Samoyedes. The strait, which lies between the gov. of Arkhangel and the island of V., and between the Frozen ocean and the gulf of Kara, called the straits of Karaky, is 60 m. in length from NW to SE. This passage was discovered by the Dutch in 1594, and carefully explored by the Russians between 1785 and 1789.

VAIHINGEN, a town of Wurtemberg, on the river Enz, 11 m. NW of Stuttgart. Pop. 3,324.—Also another large village of Wurtemberg, near Esslingen, on the Fildem. Pop. 1,464.—The district of V., in the Neckar circle, has an area of 3.3 German sq. m., with a pop. in 1852 of 23,151.

VAILLAC, a town of France, in the dep. of the Lot, 16 m. N of Cahors.

VAILLY, a town of France, in the dep. of the Aisne, 9 m. N of Soissons. Pop. 1,594.

VAIMIRGA, a river of Russia, which joins the N. Dwina, after an E course of 70 m.

VAIRANO, a town of Naples, in the prov. of Lavoro, 7 m. NE of Teano.

VAIRO, a town of the duchy of Parma, 32 m. S of Parma, on the Enza.

VAISON, a town of France, dep. of Vaucluse, on an eminence near the small river Ouvèze, 9 m. E by N of Orange. Pop. 2,879. It has a castle, and was the birthplace of the Roman historian Trogus Pompeius. It still exhibits several Roman ruins.

VAJASD, a small town of Transylvania, in the co. of Lower Weissenburg, near the Marosch.

VAJDA-HUNYAD. See **EISENMARKT**.

VAKH, a river of Siberia, in the gov. of Yeniseisk, which joins the Obi, after a W course of 300 m.

VAKUP. See **AK-HISSAR**.

VAL (L^{re}), a commune of France, in the dep. of the Var, cant. and 4 m. N of Brignoles. Pop. 1,752.

VALACHIA. See WALLACHIA.

VALADARES, a village of Portugal, in the prov. of Minho, comarca and 8 m. E of Valença-de-Minho. Pop. 500.

VALADY, a village of France, in the dep. of Aveyron, cant. and 8 m. SW of Marcillac. Pop. 500.

VALAIS, or WALLIS, a canton in the south of Switzerland; bounded on the N by the cantons of Bern and Vaud; on the NE by Uri and Ticino; on the E and S by Piedmont; and on the W by Savoy. It has an area of 192 sq. leagues of 25 to a degree, or 1,106 geog. sq. m. It is watered in its whole extent by the Rhone, and is bordered on the N by the Bernese Alps, and on the S by the Pennine Alps, ranges embracing some of the loftiest mountains in Europe. No country exhibits a greater diversity in its productions, the low ground being hot, the ascent of the mountains temperate, while the high grounds approach to the climate of Norway and Iceland. The vine is cultivated to an alt. of 2,000 ft. above sea-level; and in the valley of the Rhine the silk-worm is reared. Harvest in the valley is finished by the end of May, while in other districts its activity is greatest in September and October. The lower slopes of the mountains are covered with magnificent forests of chestnuts, walnuts, and pines. The pop. in 1852 was 81,559, of whom 1,654 were foreigners; and 1,204 Swiss from other cantons. The increase of the pop. since 1837 has been 4,969, or a mean annual increase of 1 in 307. The religion of the inhabitants is the Catholic; the number of Protestants in 1852 being only 463. The language of the Upper Valais, or mountainous parts, is German; that of the low ground, or Lower Valais, a dialect of French, the inhabitants being a mixed race descended from the aborigines of France and Italy. The rearing of cattle is the only employment of consequence; traffic is confined to the sale of cattle, and of a little corn and wine. This petty community was formerly an independent republic in alliance with Switzerland; it was declared one of the cantons of Switzerland by the congress of Vienna. The capital is the town of Sion, with a pop. in 1852 of 3,516. The next town in importance is St. Maurice. Pop. 1,327. The cant. is administratively divided into 13 *diocèses* or districts, each of which has its own council, elected by the male citizens, and sends 4 deputies to the legislative diet. The executive is vested in a council of 5.

VALANIDI, a town of Naples, in Calabria-Ultra ima, 6 m. SSE of Reggio. Pop. 1,200.

VALATIA, a village of Columbia co., in the state of New York, U. S., at the confluence of the Valatia and Kinderhook creeks, 2 m. NE of Kinderhook. Pop. in 1850, 1,650.

VALBASES (Los), a village of Spain, in the prov. and 18 m. SW of Burgos. It is walled, and has two churches, and two convents. Coarse woollens are woven here.

VALBENOITE, a commune of France, in the dep. of the Loire, cant. and 6 m. SE of St. Etienne, on the Furens. Pop. in 1846, 5,504. It has manufactories of instrument strings and vegetable dyes, and several forges.

VALBERT, a village of Prussia, in the reg. of Arnberg and circle of Olpe. Pop. 468. It has several iron-works.

VALBONA, a village of Spain, in the prov. of Teruel. Pop. 545. It has manufactories of cloth.

VALBONNAIS, a canton, commune, and town of France, in the dep. of the Isere, arrond. of Grenoble. The cant. comprises 11 com. Pop. in

1881, 6,003; in 1846, 6,277. The town is 27 m. SE of Grenoble, on the r. of the Marsanne. Pop. 1,336.

VALBONNE, a village of France, in the dep. of the Gard. Pop. 1,060.—Also a village in the dep. of the Var. Pop. 1,010.

VALBUENA, a village and port of the Argentine prov. of Tucuman, on the Salado, 120 m. NE of San-Miguel-de-Tucuman.

VALCANVILLE, a commune of France, in the dep. of the Manche, and cant. of Quettehou, 15 m. NE of Valognes. Pop. 1,176.

VALCAIRES, a salt lagune of France, in the dep. of Bouches-du-Rhone, and in the delta of that river. It is 9 m. in length and 7 m. in breadth.

VALCARLOS, a village of Spain, in the prov. of Navarra, 35 m. NE of Pamplona. Pop. 500. Iron is wrought in the vicinity.

VALCIMARA, a market-town of the Papal States, in the prov. of Macerata, 5 m. NE of Camarino. Pop. 850.

VALCIVIERES, a village of France, in the dep. of Puy-de-Dome, cant. and 4 m. NE of Ambert. Pop. 1,200.

VALCONETE, a market-town of Spain, in the prov. of Guadalajara. Pop. 340.

VALCOUR, an island of the state of New York, U. S., in Lake Champlain, 5 m. SE of Plattsburg. It is 3 m. long and 1 broad.

VALDAGNO, a market-town of Austria, in Lombardy, 15 m. NW of Vicenza, on the r. bank of the Agno. Pop. 3,300. It has manufactories of cloth.

VALDAHON (L^{re}), a commune of France, in the dep. of the Doubs, and cant. of Vercel, 18 m. S of Baume-les-Dames. Pop. 985.

VALDAI, a district and town of Russia in Europe, in the gov. and 99 m. SE of Novgorod, on a lake of the same name. Pop. 3,000. It is enclosed by earthen walls, and contains a palace and several churches. The lake, which is about 6 m. long and 3 m. broad, is fed by a small stream called the Valdaika, and discharges itself into the Msta.

VALDAI HILLS, a range of hills in the same gov., the culminating point of which does not exceed 1,100 ft., and the general elevation of which is only 300 ft., but which form the line of separation between the basins of the Black sea and the Baltic. The Volga rises on their S slopes, at an alt. of not less than 800 ft. It has long been supposed that these hills form the highest ground in the interior of European Russia; but near Kremenetz in Podolia, there is a point of 1,328 ft. alt. above sea-level, whence the Dniester and Dnieper flow to the Black sea; and the Bug and the Vistula to the Baltic. See article RUSSIA.

VAL-D'AJOL (L^{re}), or LAITRE, a commune and town of France, in the dep. of the Vosges, and cant. of Plombières, 9 m. SW of Remiremont on the Combant. Pop. in 1846, 7,040. It has manufactories of kirchenwasser, and of straw-hats, calico, and cordage, and spinning and saw-mills and wax-works. Coal is wrought in the vicinity.

VALDARACHAS, a village of Spain, in the prov. and 6 m. ESE of Guadaluara.

VALDARNO. See ARNO.

VAL-DE-AVELLANO, a town of Spain, in the prov. of Soria. Pop. 881. It has a parish church, a custom-house, and a public granary.

VAL-DE-CANAS, a market-town of Spain, in the prov. of Estremadura, on the Tajo. Pop. 1,700.

VAL-DE-FUENTES, a town of Spain, in the prov. of Salamanca, on the Sangusín. Pop. 680. It has a parish church, a custom-house, and a public granary.—Also a town in the prov. of Cáceres, to the r. of the Sierra Montánchez. Pop. 1,184. It has a parish church and a custom-house.—Also a

market-town in the prov. of Estremadura, near Montanches. Pop. 1,768.

VALDEGANGA-DE-JORQUERA, a town of Spain, in the prov. of Albacete. Pop. 1,470. It has a parish church and a custom-house.

VALDEGATE, a market-town of Spain, in the prov. of Burgos. Pop. 878.

VAL-DEL-ALGORFA, a village of Spain, in the prov. of Teruel, near Alcaniz. Pop. 1,430.

VAL-DEL-ANDE, a market-town of Spain, in the prov. of Burgos. Pop. 800.

VAL-DEL-ARENAS, a market-town of Spain, in the prov. of Guadalajara. Pop. 525.

VAL-DEL-AVEÑO, a market-town of Spain, in the prov. of Guadalajara. Pop. 498.

VAL-DEL-COLMENAS, a market-town of Spain, in the prov. of Cuenca, near Huete. Pop. 768.

VAL-DEL-CONCHA, a market-town of Spain, in the prov. of Guadalajara. Pop. 566.

VAL-DEL-LAGUNA, a market-town of Spain, in the prov. of Madrid. Pop. 478.

VAL-DEL-LOSA, a market-town of Spain, in the prov. of Salamanca. Pop. 655.

VAL-DEL-MORILLO, a market-town of Spain, in the prov. of Madrid. Pop. 1,835.

VAL-DEL-PIELAGO, a market-town of Spain, in the prov. of Leon. Pop. 400.

VAL-DEL-RIBELLO, a market-town of Spain, in the prov. of Guadalajara. Pop. 210.

VAL-DEL-ROBLES, a market-town of Spain, in the prov. of Zaragoza, near Alcaniz. Pop. 2,255. It has several paper-mills.

VAL-DEL-SAZ, a market-town of Spain, in the prov. of Guadalajara. Pop. 445.

VAL-DEL-UNCAR, a market-town of Spain, in the prov. of Cáceres, near Plasencia. Pop. 412.

VAL-DEL-VIMBRE, a market-town of Spain, in the prov. of Leon. Pop. 308.

VALDEMORO, a market-town of Spain, in the prov. of Madrid. Pop. 1,880. It has a parish church, two hospitals and a custom-house.

VAL-DE-MORO-DEL-REY, a market-town of Spain, in the prov. of Cuenca, near Huete. Pop. 408.

VAL-DE-NUZ, a valley of Switzerland, in the cant. of Neuchâtel, extending between the lake of that name on the S, and the Chasseral on the N. It contains 24 villages.

VAL-DE-OLIVAS, a market-town of Spain, in the prov. of Cuenca. Pop. 2,700. It has a parish church, several schools, and a convent. Its industry consists chiefly in the manufacture of linen and woollen fabrics, and the rearing of cattle.

VAL-DE-OMILLAS, a market-town of Spain, in the prov. of Valencia. Pop. 510.

VAL-DE-PENAS, a judicial partido and town of Spain, in the prov. of Ciudad-Real. The partido comprises 6 pueblos. The town is 30 m. SE of Ciudad-Real. Pop. 10,200. It has a parish-church, several convents, an hospital, and a public granary, and possesses manufactories of woollen and linen fabrics, and several mills.—Also a market-town in the prov. of Jaen. Pop. 4,000.

VAL-DE-PENAS-DE-LA-SIERRA, a market-town of Spain, in the prov. of Madrid, near Alcalá-de-Henares, on the Jarama. Pop. 855.

VAL-DE-PIELAGOS, a town of Spain, in the prov. of Guadalajara. Pop. 855.

VALDERADUEY, a river of Spain, which has its source in the prov. of Leon, enters that of Zamora, and joins the Duero on the r. bank.

VALDERCE'S, a canton, commune, and town of France, in the dep. of the Tarn, and arrond. of Albi. The cant. comprises 6 com. Pop. in 1846, 6,016. The town is 9 m. NE of Albi. Pop. 1,544.

VALDERROBRES, or **VALDERROBLES**, a town of Spain, in the prov. of Teruel. Pop. 2,250. It has a parish-church, a custom-house, and a public granary, and possesses manufactories of paper and cloth.

VAL-DE-SANTO-DOMINGO, a market-town of Spain, in the prov. of Toledo. Pop. 1,825. It has a parish church, a custom-house, and a public granary, and possesses manufactories of common cloth.

VAL-D'ESNE, a market-town of France, in the dep. of the Haute-Marne. Pop. 815.

VALDESOTO (SAN FELIX), a town of Spain, in the prov. of Oviedo. Pop. 1,253.—It has a parish church and a custom-house.

VAL-D'ESPINA, a market-town of Spain, in the prov. of Palencia. Pop. 377.

VALDIERI, a village of Sardinia, in the prov. and 12 m. SW of Coni. Pop. 2,600. It has iron works.

VAL-D'ILLIEZ, a village of Switzerland, in the cant. of Valais, and circle of Montheli. Pop. 835.

VALDIVIA, a province of Chili, situated in the midst of the country mainly occupied by the Araucanian Indians. It lies upon the coast, on both sides of the river Valdivia, and is bounded on the N by the river Imperial; on the S by the Maypal or Rio-Negro. The Guinchi or Cunchi Indians are in possession of its S part. It is about 180 m. long, and 70 m. broad. The climate is colder than in the N provs. of Chili, and snow covers the peaks of the Andes chain which bounds this prov. on the W, though of considerably lower elevation than those towards the N. From the coast to the Andes, the surface is generally level, and the soil good; while intercourse is facilitated by a number of navigable rivers. The principal towns are Valdivia and Osorno. The pop. is about 35,000.

VALDIVIA, the capital of the above province, is situated on the S shore of the river of its name, at 9 m. distance from the sea, in S lat. 39° 49', W long. 73° 15'. The harbour is situated in a beautiful bay formed by the river, and has been represented as the safest, the strongest from natural position, and the most capacious of any ports in the South sea; but the anchorage for large ships is limited, and a bank with shallow water upon it detracts very materially from its value. It is known that the coasts of Chili have been elevated several feet, apparently by internal pressure, of late years; and Dr. Wayman reports that in 1820 he had observed that there was at this point of the coast, only 2 ft. water where 6 Dutch line-of-battle ships had anchored about 70 years before. The island of Mansera, situated in the mouth of the river, forms two passages, which are bordered by steep mountains and strongly fortified. The town contains a college built by the Jesuits, several convents, a parochial church, and a royal hospital. The private houses are chiefly of wood. The adjacent country is hilly, rising to an alt. of 1,000 ft. Water is plentiful, and provisions are cheap. This city was founded in 1551, by Pedro-de-Valdivia, who gave it his name, and obtained immense sums of gold from its vicinity. Its wealth allured many, and it soon became one of the most populous cities in the kingdom. It was twice besieged ineffectually by the Toqui Caupolicán, but it was not so fortunate in resisting the celebrated Paillamachu. In 1590 it was surprised at night by that leader, who killed the greater part of the garrison consisting of 800 soldiers, and, having burned the city, carried off immense booty, together with a number of prisoners. The Spaniards rebuilt it anew, and fortified it so strongly that it has resisted all the attempts of the Araucanians to take it. It was, however, taken in 1640 by the Dutch, who, frustrated in their

attempts to form an alliance with the Araucanians and the Cunchi, were compelled to abandon it. In 1830 it was captured by Lord Cochrane with a patriot force.

VALDIVIA, a river of Chili, which has its rise in the lake of Huanahué, in the Andes, and runs W into the Pacific in a course of about 120 m. Its stream is clear, and it is so deep that ships of the greatest burden come close up to the city of Valdivia, and lie close to the quays. The banks of this river are fertile, and yield wheat, pulse, and fruit. The territory through which it flows abounds in cattle and in timber.

VALDOBIADENE, a town of Austrian Lombardy, in the prov. and 20 m. NW of Treviso. Pop. 2,480. It has several silk-mills.

VALDROME, a commune and village of France, in the dep. of Drome, arrond. and 20 m. SSE of Die. Pop. 1,288.

VALDUGGIA, a commune and village of the Sardinian states, in the div. of Novara, 3 m. E of Borgosesia. Pop. of com., 3,158.

VALDUNQUILLO, a village of Spain, in the prov. and near the city of Leon. Pop. 910.

VALEDIA, a small port of Morocco, 27 m. SSW of Mazagan. The coast is here very rocky, and though there is a spacious natural harbour, it is little frequented, on account of its difficult and dangerous entrance.

VALEGGIO, a town of Austrian Lombardy, on the Mincio, SW of Verona. Pop. of com., 4,558.

VALENÇA, a comarca and town of Brazil, in the prov. of Bahia. The town is on the r. bank of the Una, and near a canal by which that river is connected with the Jiquié. Pop. 1,200. It has a parish church and two schools. Coffee is cultivated to a considerable extent in the locality.—Also a town of Rio-de-Janeiro, between the Parahiba and Preto. Pop. 5,000. It has a parish church and an hospital. An active trade is here carried on in coffee, millet, mandioc, and other productions of the locality.—Also a town of the prov. of Piauí, about 60 m. N of Oeiras, on the Catinguinha. Pop. 3,000. The annexed district is extensive, but thinly peopled. Its chief productions are rice, millet, mandioc, tobacco, saltpetre, and cattle.

VALENÇA-DO-DOURO, a town of Portugal, in the prov. of Beira, 9 m. W of St. João-de-Pesqueira, near the l. bank of the Douro. Pop. 635.

VALENÇA-DO-MINHO, a town and fortress of Portugal, in the prov. of Minho, on the l. bank of the Minho, opposite the fortress of Tuy in Spain, 56 m. N of Oporto, and 73 m. WNW of Braganza. Pop. 1,828. It is supposed to have been founded by the soldiers of Viriatus.

VALENÇAY, a town of France, dep. of the Indre, 25 m. NNW of Chateauroux, on the Nahon. Pop. of com., 3,229. Hosiery and woollen goods are manufactured here. It has a fine castle, where Ferdinand VII. of Spain resided from 1808 to 1813. Pop. of cant. comprising 10 coms., 12,815.

VALENCE, a town of France, the capital of the dep. of the Drome, agreeably situated on a declivity on the l. bank of the Rhone, 43 m. SW of Grenoble, in N lat. 44° 55' 50", E long. of Paris, 2° 33' 9", at an alt. of 382 ft. above the Rhone. It is surrounded with walls, which give it at a distance rather a gloomy appearance; and it is ill built and irregular, with narrow and winding streets. The cathedral is a building of considerable antiquity, but has little claim to attention in point of architecture. The Gothic façade of the old castle is said to be one of the finest specimens of that style in France. In front of the Place d'armes stands the citadel, in which Pius VI. died in 1799. V. is the see of a

bishop, and the seat of a diocesan college, and a communal school. Its pop. in 1841 was 18,407; in 1846, 13,901. Its manufactures comprise silk, cotton, and leather, but each on a small scale. It has also dye-works, tanneries, breweries, and marble-works. Olives grow in the neighbourhood, and the town contains a number of oil mills.—The cant. comprises 7 coms. Pop. in 1846, 28,011.—The arrond. has an area of 188,368 hectares, and comprises 10 cantons. Pop. in 1846, 149,278.

VALENCE D'AGEN, a commune and town of France, dep. of Tarn-et-Garonne, 14 m. SE of Agen. Pop. 3,088. The preparation of quills and feathers forms a chief branch of trade here.

VALENCE-EN-ALBIGEOIS, a village of France, dep. of the Tarn, 14 m. NE of Albi. Pop. 1,278.

VALENCE-SUR-BAISE, a town of France, dep. of the Gers, on the small river Baïse, 6 m. S of Condom. Pop. 1,205.

VALENCIA, a province of Spain, bounded on the N by the provs. of Castellon-de-la-Plana and Teruel; on the E by the Mediterranean; on the S by the provs. of Alicante and Albacete; and on the W by Albacete and Cuenca. Area 2,754 geog. sq. m. Pop. in 1884, 388,759; in 1849, 500,000. It is administratively divided into 15 partidos, and 245 pueblos.—The kingdom of V., an ancient division of Spain, is bounded on the N by Aragon and Catalonia; on the E and S by the Mediterranean; on the SW by Murcia; and on the NW by New Castile. It comprises the three western provs. of Castellon, V., and Alicante; and has an area of 7,193 geog. sq. m. In 1787 the pop. of this province was 825,059; in 1808, Antillon and Rehfuës state it to have been about 1,200,000; in 1849, it was 1,110,950. The greater part of the surface is mountainous. The principal plains stretch along the coast, which, in the S is bordered with cliffs and rocks, and in the N and beyond Cape San Antonio, is flat and full of sandbanks, among which the large laguna of Albufera is situated. The plain adjacent to the capital is above 80 m. in length; those to the southward, which adjoin the towns of Alicante and Orihuela, if inferior in extent, may challenge a comparison in beauty and fertility. This prov. is watered by three great rivers, the Xucar, the Segura, and the Guadalquivir; also by the Murviedro, the Palencia, the Millares, and others of less size, all flowing from the mountains of the interior to the Mediterranean. The soil consists partly of clay mixed with sand, and partly of lime and chalk; the first is predominant in the plains, which are of a luxurious fertility; the latter is chiefly found in the mountainous parts. The mountains of this region belong to the Iberian chain, which here runs into the sea in the promontories of Oropesa, Antonio, Martin, Nao, and Cervera. The principal ridges are the Sierra-de-Espadan in the N, the Monte-Penaglosa on the boundaries of Aragon; the Sierra-Picochera, the Sierra-de-Meriola, and the Bujeon. All these mountains are steep and of a wild appearance; but there is seldom much snow upon them, and a few are covered with wood. The climate is delicious, and the temp. is refreshed by sea-breezes. The heat in summer is seldom above 17° or 18° R.; in winter the temp. is from 7° to 18° R. Hoar frost and mists are uncommon, and there are scarcely 18 or 20 rainy days in the whole year. The *colono* and earthquakes, however, sometimes visit this paradise; and myriads of insects annoy the inhabitants during the summer. Agriculture is well-conducted. The lands are divided into *huertas* and *serranias*. Irrigation is here, as in the S of France, an indispensable requisite to productiveness. The fields are divided into tracts supplied

with water, and eminences which do not admit of irrigation, and are planted with vines, olives, figs, and whatever requires comparatively little humidity. Wheat, Indian corn, and barley, are grown; but the kingdom does not produce sufficient grain for its own consumption, notwithstanding that chestnuts, rice, and algarrobas, are extensively used as substitutes for bread. The finest vegetables are grown in great quantities. Among the wines of this province, are the white and red Alicante, the strong Benicarlo, the Vino-de-la-Torre, and the Car-tuxo. Brandy is exported into France. The sugar-cane is grown around Gandia, but only the fresh juice of the plant is made use of. Silk is grown in considerable quantity; but the management of this article is not well understood. Flax, hemp, and rice, are likewise reared here; yet, notwithstanding all these products, the peasantry live in general in great poverty. In manufactures the Valencians have made very little progress. The Carthaginians, and after them the Romans, worked innumerable mines in the mountains of the south of Spain, and procured from them great quantities of gold, silver, lead, and other metals. The sides of mountains in V. are still seen perforated with the mouths of caverns, whence came the silver and gold that glittered round the throne of the Cæsars; yet it did not until very recent times occur to any of the modern occupiers of the soil, to try if some of the precious metals were not still left within. Several foundries have been established along the coast, for the purpose of smelting the ores, and separating the silver from the lead, the argentiferous lead-mines only being those which are thus explored. Near Pinosa there is a stratum of mineral salt, but it is not made use of, as there are many rich salt-springs, three of which annually yield 300,000 cwt., and could be made to produce a great deal more. The language is a peculiar dialect, kindred to that of Catalonia. There are 9 *cividades*, 161 *villas*, 878 *villages*, 562 *parishes*, 171 *monasteries*, 54 *nunneries*, and 89 establishments of charity in this prov. This part of Spain, early invaded by the Cathaginians, was conquered by the Romans, and at a subsequent date by the Goths, from whose hands it fell into those of the Moors. The latter established the kingdom of V. in 713, and retained it under several vicissitudes of fortune, until 1238, when it was definitively taken from them, and united to Aragon. It afterwards formed a component part of the Spanish monarchy, but continued to preserve its representative body and its privileges, till the early part of the 18th cent., when having, in the war for the succession to the crown, taken part against the Bourbon dynasty, it was, on their establishment on the throne, deprived of its old constitution, and obliged to conform to the laws of Castile.

VALENCIA, the chief town of the above province and kingdom, is situated upon the Guadala-viar, here about 100 yds. broad, at the distance of 2 m. from the sea, in N lat. 39° 28' 45", W long. 0° 24' 23". It is surrounded with ramparts whose walls are entire and well-preserved; but the citadel is useless, being poorly fortified, and not even commanding the town. It has 8 gates, and 5 *faubourgs* or suburbs. The interior, far from meriting the flattering epithet of '*Valencia la Bella*,' consists of narrow and winding streets, crossed by a multiplicity of lanes in many of which there is no thoroughfare. Of the different public walks, the chief is that which extends along the banks of the river. Few towns contain a greater number of public buildings, but they are less remarkable for elegance than for antiquity and profuse decoration. The ancient palace, called *El-Real*, is now the re-

sidence of the captain-general. The other remarkable structures are a Moorish mosque; a church built for Christian worship in the time of the Goths; and several modern edifices, such as the college of Pio Quinto, the convent of the Carmelites, the custom-house, and the college of the patriarch. V. is the see of an archbishop, whose revenue amounts to £34,375 annually. The number of regular and secular clergy is very great, being no less than 2,610 persons. The cathedral is of great antiquity, and has undergone many changes, having been a pagan temple under the Romans,—a church under the Goths,—a mosque under the Moors,—being reconverted into a Christian temple dedicated to St. Paul after Valencia was conquered by the Cid in 1094; again turned into a Mahomedan mosque upon its re-capture by the Moors in 1100; and again converted into a Romish cathedral by Jayme, king of Aragon, in 1230, the era of its final conquest by the Christians. The university of this city was founded in 1470, and is on an extensive scale, but the course of study is antiquated. The Valencians have also an academy of painting, and reckon several eminent artists among their number. There are two public libraries.—Of manufactures, the most extensive one is of silk; but there are, on a small scale, fabrics of leather, glass, woollens, cordage, tobacco, and lace. The maritime trade of the place is carried on by lighters, which load and unload vessels at the village of Grao, near the mouth of the river.—The commerce of this city was recently very extensive; the value of its foreign and interior commerce amounting annually to £773,416, besides its exportation of silk, wrought and raw, amounting to £1,875,000, at a moderate calculation, and employing 22,000 hands. The chief articles of export are rice, saffron, almonds, and oranges.—The environs form a delicious garden, the air of which is continually loaded with perfumes. The temp. of Valencia is remarkably mild and pleasant, the intensity of the summer heat being lessened by the vicinity of the sea, and in some measure by the moisture of the adjacent plains. The spring is sometimes rainy, but the autumn is a very pleasant season, the trees and the fields not losing their verdure until December. As a resort for invalids from the north of Europe, V. has a claim to rank with Lisbon, Nice, Pisa, and other well-frequented towns. V. was the birthplace of the lawyer Mayana, of the celebrated Ant. Jos. Cavanilles, and of several renowned painters, as Espinosa, and Francisco Bibalta.—Valencia is a place of antiquity, and was probably the *Valentia Edetanorum* of the Romans. On the invasion of the Goths, it fell, with the rest of the peninsula, into their hands, and continued so until 715, when it was occupied by the Moors. From these invaders it was taken by the Cid in 1094, and given to that warrior to govern as a dependency of the king of Castile. It was consequently called '*Valencia of the Cid*,' and devolved on his death to his widow Ximene, a heroine almost equally noted in Spanish history as her husband, and who sustained in it a long siege against the Moors in the year 1100. At last, however, it surrendered, and was occupied by the Moors until 1238, when it was finally retaken by the king of Aragon. In the war of the succession, the inhabitants adhered to the Austrian candidate for the crown, until the unfortunate battle of Almansa (in 1707) obliged them to submit to the Bourbons. A number of them were punished, the city was deprived of its privileges, and obliged to adopt the customs of Castile. V. declared against the French, and baffled the first attempts made on it in 1808 by Moncey; but in the end of 1811 it was attacked by

Suchet, and, after a vigorous siege and bombardment, surrendered in January 1812.

VALENCIA, a city of Venezuela, in the department of Caracas, and province of Carabobo, situated in a fine plain, half-a-league W of the lake of the same name, in N lat. $10^{\circ} 10' 11''$, 77 m. WSW of Caracas. Pop. about 16,000. The houses are in general low and irregular, though some of the streets are broad and well-built. The parish-church, and a handsome square in which it stands, form the principal ornaments of the city. The inhabitants, formerly noted for their indolence, have lately become active and industrious, and the situation of the place is favourable for trade, being separated from Puerto-Cabello by only 10 leagues of good road. The adjacent country produces provisions and fruits in great abundance, and the plains feed immense herds of cattle, sheep, horses, and mules. V., with the towns of Victoria and Barquisimeto, suffered much from the earthquake which overthrew Caracas, La-Guayra, Merida, and several villages, in March, 1812. It remained firm to the cause of Ferdinand up to the year 1810, when it was compelled to submit to Miranda, and shortly after became the seat of the new congress of the united states of Venezuela. It was soon afterwards occupied by the royalists; but in 1812 its possession was disputed by Miranda; and in 1813, it was entered by Bolivar, without opposition.

VALENCIA (LAKE OF), a fine inland sheet of water, in the dep. of Caracas, in Venezuela. It stretches $13\frac{1}{2}$ leagues from ENE to WSW; its greatest breadth is 4 leagues. It lies at the distance of one league from the city of the same name, and is situated in a valley surrounded with mountains excepting on the W, where it extends into the interior. The waters of twenty rivers are discharged into it; but it has no visible outlet; and the space which separates it from the sea is 6 leagues in width, and is filled with inaccessible mountains. It is reported to have been diminishing for several years; and its waters are still receding, leaving behind them a rich and productive soil. This lake has about 27 islands scattered over its surface. The largest of them, called Caratopona, is highly fertile, and contains a pop. sufficient to raise provisions, fruits, and vegetables, for the market. The produce which grows on the borders of the lake is transported across its waters, or by the rivers which fall into it. The navigation, however, is not very easy, owing to the numerous islands with which the lake is interspersed.

VALENCIA-DE-ALCANTARA, a strong town of Spain, in the prov. of Caseros, on the frontiers of Portugal, 25 m. SW of Alcantara, on the l. bank of the Aird. Pop. 4,798. Some coarse linens are made here.

VALENCIA-DE-DON-JUAN, a town of Spain, in the prov. and 18 m. S of Leon, on the Esla, on the site of the ancient *Coisaca*. Pop. 1,710.

VALENCIA-DE-LAS-TORRES, a village of Spain, in the prov. and 40 m. S of Badajoz. Pop. 695.

VALENCIA-DEL-VENTOSO, a town of Spain, in the prov. and 48 m. SSE of Badajoz. Pop. 3,880.

VALENCIANA, a town and a celebrated mine of Mexico, in the dep. and 10 m. N of Guanajuato. In the mine the great vein was 22 ft. in breadth; and as the chasm is dry, it was easier worked than almost any other American mine. The pits extended, in 1790, to the breadth of 4,900 ft., and the lowest was 1,640 ft. in depth. The undertaking employed upwards of 900 men in carrying the ores to the surface; 1,800 workmen in procuring and sorting the ore; and 400 women and children carrying the minerals to the sorters. The expenses of ma-

terials, workmen, overseers, &c. was £187,500 per ann.; the net profit, during the same period, to the proprietors, after deductions of the king's fifth, and all expenses, was from £82,500 to £128,759 per ann. This mine is no longer wrought.

VALENCIENNES, a fortified town of France, in the dep. of Nord, 28 m. SE of Lille, situated on the Scheldt, which traverses the town, and here becomes a navigable river, though small in its volume of water, and sluggish in its course. The form of the town is circular. The streets are narrow and crooked, and the houses are in general ill-built, many of them being of wood. The principal edifices are, the public square, the church of Notre-Dame, the town-hall, the artillery-house, the theatre. The public library has 18,000 vols. Pop. in 1852, 24,343. The chief manufactures are lace of great fineness, cambric, gauze, linen-stuffs, hosiery, wire-cloth, pottery ware, and Prussian blue. This town belonged to the Netherlands until 1677, when it was taken by the French, and confirmed to them by treaty. In 1798 it formed one of the first objects of attack by the allies, after the defeat of Dumourier. The siege, conducted under the command of the duke of York, was long and obstinate, and part of the town was laid in ashes before the capitulation. It was retaken by the French in 1794; escaped attack in the invasion by the allied powers in 1814 and 1815, and was definitively confirmed to France by the treaties of these years.

VALENDAS, a village of the Swiss cant. of Ungusan, in the Glenner circle, NW of Ilanz. Pop. 555.

VALENS, a commune and village of Switzerland, in the cant. and 82 m. SE of St. Gall. Pop. 1,815.

VALENSOLE, a town of France, in the dep. of Basses-Alpes, 14 m. SE of Forcalquier. Pop. 3,135.

VALENTANO, a town of the States-of-the-Church, deleg. of Viterbo, 14 m. SW of Orvieto. Pop. 1,080.

VALENTIA, an island and village off the W coast of co. Kerry, near the S entrance of Dingle bay. The island is about 5 m. in length, and $2\frac{1}{2}$ m. in breadth, with an area of 6,871 acres. Bray-head, forming the SW extremity, projects about 1 m. beyond the S screen of the southern entrance of the harbour, flings sheer down to the ocean cliffs of 628 ft. in alt., and is one of the boldest and most striking of the many sublime promontories of Kerry. The cliffs of Fohilly, which screen the NW extremity of the island, are separated from the entrance of Lough Kay by Rinnadrolan point, and soar aloft to the elevation of 886 ft. The N or principal entrance to Valentia harbour, between Beg-Innis and Cromwell's fort, is very fine in scenery. A great part of the surface is under tillage, and there is a considerable range of pasture. A slate quarry on the island is worked for export. It is used for flagging, for fish-slabs, and for many purposes to which marble has been usually applied, and finds a ready market in England. At present about 120 hands are employed in this quarry. The hamlet of Valentia is situated near the NE extremity of the island, in the vicinity of the pier. The chief trade, additional to the quarrying and export of its slates and flags, consists in the conducting of somewhat extensive fisheries, in the exporting of corn and butter, and in the importing, chiefly from Liverpool, of iron, coals, and timber. The Spaniards occupied the island and harbour of V. up to the period of the English commonwealth; but the lieutenants of Oliver Cromwell expelled them, and erected two forts at respectively the north entrance and the south entrance of the harbour, to put an end to the privateering enterprises for which it had been used.

VALENTIA, or **DISSEE**, an island off the coast of Abyssinia, about 2½ m. long and ¾ m. broad. It forms a bay, affording good anchorage for large vessels, and is situated a little to the SE of Massuah. It is supposed to be the ancient *Oriee*.

VALENTINE, a town of France, on the Garonne, 3 m. S by W of St. Gaudens. Pop. 1,000.

VALENTINE'S BAY, a bay on the SE coast of Tierra-del-Fuego, to the W of Cape Success, in 8 lat. 52° 55', W long. 74° 15'.

VALENTINO (SAN), a town of Naples, in Abruzzo-Citra, 12 m. SW of Chieti. Pop. 2,460.

VALENTINSHAUSER, a village of Austria, in Tyrol, in the bail of Nanders. Pop. 840.

VALENZA, a town of the Sardinian states, in the prov. of Alessandria, situated on an eminence near the Po, 12 m. SE of Casale. It is surrounded with a wall and defended by a castle which formerly rendered it a place of strength; but its fortifications have been neglected, and it did not sustain a siege in the campaigns of 1796 or 1799. It contains several churches, a civic palace, a college, 7 hospitals, and some vestiges of antiquity. Its pop., employed partly in cultivating the vicinity, partly in manufacture, amount to 7,400. The district of V. comprises 4,364 hectares of surface; about 3,500 of which are *colline*, with a soil composed in some parts of cretaceous clay, in others pure argil, or calcareous. More than two-thirds of this land are appropriated to vineyards, calculated to produce upwards of 40,000 hectolitres of wine annually. It has some brick and tile kilns, which yield about 96,000 lire; linen and canvas are woven to the value of about 30,000 lire, and thrown silk realizes yearly about 130,000 lire.

VALENZA, a town of Spain, in the prov. of Leon. 18 m. SSW of Leon.

VALENZUELA, a town of Spain, in the prov. and 26 m. E of Cordova. Pop. 2,710.—Also a town in the prov. and near the town of Ciudad-Real. Pop. 1,280.

VALERA-DE-ARRIBA and **VALERA-DE-ABAXO**, two villages of Spain, in the prov. and about 18 m. S of Cuenca. The former has a pop. of 1,250; the latter of 1,500.

VALERIEN (SAINT), a town of France, dep. of the Yonne, 9 m. W of Sens. Pop. 1,080.

VALE-ROYAL, a beautiful valley in the p. of Whitegate, co. palatine of Chester, intersected throughout its length by the river Weaver, which is crossed here by the Grand Junction railway, on a viaduct of 5 arches of 63 ft. span each, at the height of 66 ft. above the level of the water.

VALERY-EN-CAUX (SAINT), a town of France, dep. of Seine-Inferieure, 33 m. N by W of Rouen. Pop. 5,370. It has a small but good harbour, and considerable fisheries particularly of herring. The other branches of its industry are ship-building and the manufacture of soda.

VALERY-SUR-SOMME (SAINT), a small port of France, situated on the r. bank of the Somme, near its mouth, 12 m. NW of Abbeville. Pop. 2,241. It carries on a considerable coasting and transit trade, serving as port to Amiens and Abbeville. Its harbour is capacious, but the entrance is difficult on account of sand-banks. It was here that, in 1066, William the Conqueror embarked for the invasion of England.

VALET, a town of France, dep. of the Loire-Inferieure, 6 m. N of Clisson.

VALETTA (LA). See MALTA.

VALETTE (LA), a town of France, dep. of Charente, situated on a mountain, 14 m. SE of Angoulême. Pop. 955.—Also a town and fort in the dep. of Var, 4 m. NE of Toulon.

VALEZO. See VALEGGIO.

VALFF, a village of France, in the dep. of Bas-Rhin, cant. and 4 m. SE of Obernay.

VALGARA, a village of Italy, 22 m. NW of Como. Pop. 1,000. Marble is wrought in the vicinity.

VALGORGE, a town of France, dep. of Ardèche, on the small river Baune, 25 m. SE of Privas. Pop. 1,486.

VALGRANA, a town of Piedmont, prov. of Coni, situated on the river Grana, 8 m. W of Coni. Pop. 1,625.

VALGREGHENTINO, a village of Austrian Italy, in the prov. and 18 m. NE of Como. Pop. 1,100.

VALIDIA. See VALEDIA.

VALINCOURT, a town of France, dep. of Nord, 9 m. SE of Cambrai, and 28 SE of Douay.

VALKI, a town of European Russia, on the river Macha, in the Slobodak-Ukraine, 27 m. W by S of Charkov. Pop. 5,000. The industry of its inhabitants is confined to cultivating the environs, distilling spirituous liquors, and trafficking in cattle.

VALLADA, a town of Spain, in the prov. and 40 m. SW of Valencia, on the Canolas. Pop. 1,500.

VALLADARES, a town of Spain, in the prov. of Galicia, near Tuy. Pop. 1,200.

VALLADOLID, an inland prov. of Spain, forming part of the kingdom of Leon, and bounded on the N by the provs. of Leon and Palencia; on the E by Burgos; on the S by Avila; on the SW by Segovia; and on the W by Salamanca and Zamora. Area 2,237 geog. sq. m. Pop. in 1848, 210,000. The surface lies in general high, and its soil is sandy and barren; yet there is no want of water, the prov. being traversed by the Duero, which is joined by the Oca, the Valderaduey, the Pisuerga, the Esla, the Arlançon, and other rivers. The climate is cold. Some corn is exported in good years; but the chief dependence of the inhabitants is on pasturage. Flax and hemp are cultivated to a considerable extent. The manufactures are trifling; and this is, on the whole, one of the poorest regions of Spain. It is divided into 22 districts.

VALLADOLID, the capital of the above prov., is situated on the banks of the Esgueva, which divides it into two, and of the larger stream of the Pisuerga which bathes its walls, in N lat. 41° 39' 14", 98 m. NNW of Madrid. The town stands in the midst of an extensive plain, which might be rendered more productive were the streams that traverse it made to serve effectually for the purpose of irrigation. The streets are dirty, and many of the houses in decay; there are, however, two squares, one of which, the Plaza Mayor, contains some good buildings. The cathedral, begun by Philip II., has never been finished. The town has six gates, one large bridge, and a number of small ones, 16 churches, and 24 convents. It is the seat of a bishop, of a provincial court of justice, and of an university, which is at present the most frequented in Spain. The manufactures are confined to silks, lace, paper, coarse woollens, and earthenware. The produce of the environs consists of corn, wine, and silk.

VALLADOLID, a town of Yucatan, 80 m. ESE of Merida, near the source of the Bullina.

VALLADOLID-DE-MECHOACAN, a town of Mexico, in the state of Mechoacan, on the Olid, in N lat. 19° 42', 120 m. W of Mexico, at an alt. of 69,396 ft. above sea-level. It has a fine cathedral, and several handsome houses. Pop. 25,000.

VALLANCA, a village of Spain, in the prov. and NE of Valencia. Pop. 1,025. It has some trade in wine, honey, and wax.

VALLATA, a town of Naples, in the prov. of Principato-Ultra, and district of Ariano. Pop. 4,400.

VALLAURIS, a commune of France, in the dep. of the Var, and cant. of Antibes, 12 m. SE of Grasse. Pop. in 1846, 2,482. It has manufactories of pottery. Manganese is wrought in the locality.

VALLAY, a village of France, in the dep. of the Haute-Saône. Pop. 485.

VALL-DE-MOSA, a market-town of Spain, in the prov. of Baleares and island of Mallorca. Pop. 1,580.

VALL-DE-UXO, a market-town of Spain, in the prov. of Castellon-de-la-Plana and partido of Nules. Pop. 5,500. It has a parish-church, an hospital, and a custom-house.

VALLDONA, a village of Spain, in the prov. of Castellon-de-la-Plana, and to the NW of Peniscola.

VALLDORF, a village of Prussia, in the reg. of Minden and circle of Herford. Pop. 1,000. It has mineral-springs.

VALLE, a market-town of Austria, in Illyria, in the gov. of Trieste and circle of Istria, near Rovigno. Pop. 1,050.—Also a market-town of Naples, in the prov. of Terra-di-Lavoro, near Caserta. Pop. 810.

—Also a market-town of Spain, in the prov. of Badajoz, near Villa-Nueva-de-la-Serena. Pop. 878. —Also a parish of Norway, in the district of Nedena, on the Odderen. Pop. 1,600.

VALLE, or **VALLE-D'ALESSANI**, a canton, commune, and town of the island of Corsica, and arrond. of Corte. The cant. comprises 9 com. Pop. in 1831, 3,067; in 1846, 3,248. The town is 15 m. E of Corte. Pop. 616.

VALLECAS, or **BALLECAS**, a market-town of Spain, in the prov. and 5 m. SE of Madrid. Pop. 1,542. It has a parish-church, two hospitals, and a custom-house. Agriculture, and the manufacture of linen, form the chief objects of local industry.

VALLECOERSA, a market-town of the Papal States, in the delegation and 18 m. S of Frosinone, on the Rio-di-Valle-Fratta. Pop. 8,000.

VALLE-D'ALESSANI. See **VALLE**.

VALLE-DE-ADDALAGIS, a market-town of Spain, in the prov. and NNW of Malaga. Pop. 3,300.

VALLE-DE-CABUERNIGA, a judicial partido and town of Spain, in the prov. of Santander. The partido comprises 36 pueblos. The town is situated in a valley of the same name. Pop. 287. It has a parish-church and a custom-house. The manufacture of linen and of agricultural implements form the chief objects of local industry.

VALLE-DE-CHERRATO, a market-town of Spain, in the prov. of and near Palencia. Pop. 425.

VALLE-DEL-ORO (**SANTA CECILIA**), a parish of Spain, in the prov. of Lugo, and partido of Monforte, watered by a river of the same name. Pop. 780. It has a parish-church and a custom-house.

VALLE-DEL-ORO (**SANTA-CRUZ-DEL**), a parish of Spain, in the prov. of Lugo and partido of Mondedo. Pop. 963. The manufacture of linen and rearing of cattle form the chief employment.

VALLE-DE-MATAMOROS, a market-town of Spain, in the prov. of Badajoz, near Xerez-de-los-Caballeros. Pop. 1,250.

VALLE-DE-SANTA-ANNA-LA-REAL, a market-town of Spain, in the prov. of Teruel, to the W of Henares. Pop. 474.

VALLE-DE-TABLADILLO, a town of Spain, in the prov. of Segovia, between two hills, in a valley of the same name. Pop. 517. It has a parish-church, a custom-house, and a public granary.

VALLE-D'IGUAPE, a valley of Brazil, in the prov. of Bahia, watered by an affluent of the Paraguaçu. It contains extensive sugar plantations, and is considered one of the most fertile tracts in the Brazilian territory.

VALLEES (**PAÏS-DES-QUATRE**), a district of

France, in the ancient prov. of Guyenne, containing an area of 160,000 hect., and now comprised in the departments of the Haute-Garonne and Hautes-Pyrenees. Its cap. was Castelnau-de-Magnoac.

VALLEJO, a village of Solano co., in the state of California, U. S., on the Napa straits, 25 m. NNE of San-Francisco. It is at present the capital of the state and the seat of government.

VALLE-LUNGA, a market-town of Naples, in the prov. of Calabria-Ultra, and near Monteleone. Pop. 1,000.—Also a town of Sicily, in the intendancy and to the NW of Caltanissetta. Pop. 3,500.

VALLE-MAROBIA-IN-PIANO, a village of Switzerland, in the cant. of Tessina and bail. of Bellinzona. Pop. 794.

VALLEN, an island of France, off the coast of the dep. of Finistere.

VALLENDAR, a town of Prussia, in the prov. of the Rhine, regency and circle and 3 m. NNE of Coblenz, on the Rhine. Pop. in 1843, 3,135. It has a castle, and possesses manufactories of cloth, and other woollen fabrics, leather, tobacco, and dye-works. The culture of the vine and navigation afford also important employment to the inhabitants.

VALLENDAS, a village of Switzerland, in the cant. of the Grisons and bail. of Glenner. Pop. 555.

VALLENGIN, or **VALANGIN**, a market-town of Switzerland, in the cant. and to the NW of Neuchâtel. Pop. 6,250. It has a castle.

VALLERANGUE, a canton, commune, and town of France, in the dep. of the Gard, and arrond. of Le-Vigan. The cant. comprises 3 com. Pop. in 1831, 6,621; in 1846, 6,972. The town is on the Herault, 15 m. N of Le-Vigan. Pop. 3,853. It has a consistorial Calvinist church, and possesses extensive manufactories of silk and cotton hosiery, and numerous silk-mills. The trade consists chiefly in timber. Chestnuts are extensively cultivated in the vicinity of this town.

VALLE-ROTONDA, a town of Naples, in the prov. of the Terra-di-Lavoro, and to the NW of Bonafro, in a valley. Pop. 2,210.

VALLERUELA-DE-PEDRAZA, a town of Segovia, in the partido of Sepulveda. Pop. 760.

VALLERY, a village of France, in the dep. of the Yonna. Pop. 681.

VALLÉS, a market-town of Central America, in the state of San Louis Potosi, U. S., on the l. bank of the Montezuma. Pop. 3,500. It has a trade in sugar, and other articles of local production.

VALLESESA. See **VALSESSIA**.

VALLET, a canton, commune, and town of France, in the dep. of the Loire-Inferieure, and arrond. of Nantes. The cant. comprises 4 com. Pop. in 1831, 10,804; in 1846, 9,875. The town is 15 m. E of Nantes. Pop. 5,583.

VALLEY, a village of Bavaria, in the circle of Upper Bavaria, and presidial of Wiesbach. Pop. 200. It has a castle.

VALLEY-FORGE, a village of Chester co., in the state of Pennsylvania, U. S., on the S side of Schuylkill river, near the mouth of Valley creek, 70 m. E of Harrisburg, and intersected by the Philadelphia railroad.

VALLEYRES, a village of Switzerland, in the cant. of Vaud and bail. of Orbe. Pop. 498.

VALLEYRES-SOUB-URSIUS, a village of Switzerland, in the cant. of Vaud, and bail. of Iserten. Pop. 277.

VALLEYRES-SUR-MONTAGNY, a village of Switzerland, in the cant. of Vaud and bail. of Iserten. Pop. 215.

VALLFONGA, a market-town of Spain, in the prov. of Gerona, near Campredon. Pop. 748.

VALLIBONA, a market-town of Spain, in the

prov. of Castellon-de-la-Plana, near Morolla. Pop. 790. Wool-spinning forms an important branch of local industry.

VALLIER (SAINT), a commune of France, in the dep. of the Saône-et-Loire, cant. of Mont-Saint-Vincent, 33 m. SW of Chalon-sur-Saône, on the Saône. Pop. in 1852, 1,145.—Also a canton and commune of France, in the dep. of the Var and arrond. of Grasse. The cant. comprises 5 com. Pop. in 1831, 4,282; in 1846, 4,346. The village is 8 m. NW of Grasse. Pop. in 1852, 856.—Also a canton, commune, and town of France, in the dep. of the Drome and arrond. of Valence. The cant. comprises 16 com. Pop. in 1831, 15,086; in 1846, 17,878. The town is 24 m. N of Valence, on the r. bank of the Rhone, at the confluence of the Galaure. Pop. in 1852, 1,145.

VALLIERES, a commune and market-town of France, in the dep. of the Creuse, and cant. of Felletin, 9 m. NE of Aubusson. Pop. in 1852, 2,400. Cattle are extensively reared in the locality.

VALLIEVO, or **VALLIOVA**, a town of Turkey in Europe, in Servia, 60 m. SW of Belgrade, on the l. bank of the Kolubara. Pop. 4,100.

VALLIGUIERES, a commune of France, in the dep. of the Gard, and cant. of Remoulins, 20 m. E of Uzès. Pop. 492.

VALLIQUERVILLE, a commune of France, in the dep. of the Seine-Inferieure, cant. and 4 m. W of Yvetot. Pop. 1,615. It has manufactories of woollen fabrics.

VALLMOLL, a market-town of Spain, in the prov. and near Tarragona. Pop. 874. It has distilleries of brandy.

VALLO (IL), a town of Naples, in the prov. of the Principato-Citra, 15 m. SE of Salerno. Pop. 2,480. Leather is its chief article of manufacture.

VALLOE, a small island of Norway, in the prov. of Jarlsberg, in the Christiansa-fjord.—Also a stiff and town of Denmark, in the island of Sialand, 20 m. NNE of Præstøe.

VALLOIRES, a market-town of Sardinia, Savoy, and in the prov. of Maurienne. Pop. 1,915.

VALLON, a canton, commune, and town of France, in the dep. of the Ardeche, and arrond. of Largentiere. The cant. comprises 11 com. Pop. in 1831, 8,579; in 1846, 10,422. The town is 15 m. SSE of Largentiere. Pop. 2,627. It has a Calvinist consistorial church. The culture of wine and silk, and manufacture of leather, form the chief branches of local industry.—Also a commune and market-town of France, in the dep. of the Sarthe, and cant. of Loue, 18 m. W of Le Mans, on the Geay. Pop. 1,550. It has manufactories of common woollen and linen fabrics.

VALLON-EN-SALLY, a market-town of France, in the dep. of the Allier, and arrond. of Montluçon, on the Cher. Pop. 980.

VALLONISE, a commune of France, in the dep. of the Hautes-Alpes, and cant. of Largentiere, 9 m. WSW of Briançon. Pop. in 1841, 1,193.

VALLS, a judicial partido and town of Spain, in the prov. of Tarragona. The partido comprises 80 pueblos. The town is 12 m. NNW of Tarragona, in a level tract watered by the Francolí. Pop. 9,000. It has a parish-church, 2 convents, and an hospital, and contains several distilleries of brandy, tanneries, wool-spinning and paper-mills.

VALLUHN, a village of the grand-duchy of Mecklenburg-Schwerin, on the Boize. Pop. 390.

VALM (ALT and Nau), two villages of Prussia, in the regency of Kottin, and circle of Neustettin. Pop. 960.

VALMALEDA, a town of Spain, in the prov. of Viscayo, to the SW of Bilbao, on a hill, near the l.

bank of the Salcedon, which is here crossed by two bridges. Pop. 2,000. It has a parish-church, a convent, and an hospital; and carries on an active trade in copper and iron ware, and other articles of local produce, and in cattle.

VALMARTEN, a hamlet of France, in the dep. of the Seine-Inferieure, cant. of Clères, and com. of Le Bocasse.

VALMONT, a canton and commune of France, in the dep. of the Seine-Inferieure, and arrond. of Yvetot. The cant. comprises 23 com. Pop. in 1831, 17,082, and in 1846, 16,999. The town is 18 m. NW of Yvetot. Pop. 1,112. It has manufactories of calico, and several bleacheries.

VALMONTONE, a town of the Papal States, in the leg. of Velletri, 5 m. SSE of Palestrina. Pop. 1,088.

VALMUNSTER, a village of France, in the dep. of the Moselle, and arrond. of Metz. Pop. 421. It has manufactories of magnesia and vitriol.

VALMY, a commune of France, in the dep. of the Marne, cant. and 7 m. from Sainte Menesould. Pop. 466. A victory was here gained by the French over the Prussians on the 20th September 1792.

VALNAY, a village of France, in the dep. of the Cher, and arrond. of St. Amand. Pop. 500.

VALOGNES, an arrondissement, canton, commune, and town of France, in the dep. of the Manche.—The arrond. comprises an area of 103,995 hect., and contains 7 cant. Pop. in 1831, 96,660; in 1841, 95,370; and in 1846, 93,857.—The cant. comprises 9 com. Pop. in 1831, 17,032; and in 1846, 15,888.—The town is 89 m. NNW of Saint Lo, on the Merderet. Pop. in 1789, 4,732; in 1821, 6,858; in 1831, 6,940; and in 1846, 6,579. It has a communal college, a public library and a savings' bank. It possesses manufactories of lace and blond, several dye-works and tanneries; and carries on a trade in grain, butter, eggs, fowls, game, honey, wax, feathers, fresh-fish, shell-fish, flax, and linen.

VALOIRES, a town of Sardinia, in the prov. of Savoy, 13 m. SSE of St. Jean-de-Maurienne. Pop. 2,000.

VALOIS, a district of France, in the ancient prov. of the Ile-de-France, now comprised in the departments of the Aisne and Oise. It had an area of 181,877 hect., and contained several towns, of which Crespy was the capital.

VALONA. See **AVLONA**.

VALONGO, a market-town of Portugal, in the prov. of Beira, and to the NE of Oporto.

VALOR, a town of Spain, in the prov. of, and 55 m. from Granada, at the foot of the Sierra Nevada. Pop. 1,600. It has a parish-church, a custom-house, a public granary, and several mineral springs, and carries on a considerable trade in grain, wine, fruit, and wool.

VALORBE, a market-town and parish of Switzerland, in the cant. of Vaud, and bail. of Orbe, 20 m. NW of Lausanne, near the source of the Orbe. Pop. 1,491. It has extensive iron-works.

VALORIA-DEL-ALCOR, a market-town of Spain, in the prov. of and near Palencia. Pop. 234.

VALORIA-LA-BUENA, a judicial partido and market-town of Spain, in the prov. of Valladolid. The partido comprises 41 pueblos. The town is 15 m. ENE of Valladolid, on the l. bank of the Arroyo-Maderazo. Pop. 795. It has a parish-church and a custom-house. Linen is manufactured here.

VALORICKE, a district and town of Russia in Europe, in the gov. and 156 m. SSW of Voronej, on the Oskol.

VALPARAISO, a province of Chili, bounded on the N by the lake of Catapillo; on the E by the Cuesta-de-Calavera; on the S by the dep. of Meli-

pills; and on the W by the Pacific. Pop. in 1847, 75,962. The soil is generally stony and arid, and rain seldom falls; but when irrigated, the ground is highly productive; and some of the valleys are very beautiful, and richly clothed with vegetation. The only considerable stream is the Quillota. The principal places are the city which gives name to the prov., and the towns of Quillota and Casa-Blanca.

VALPARAISO, the capital of the above prov., and the principal emporium of Chili, whence all the commerce with Peru is carried on, is situated in S lat. 33° 1' 56", W long. 71° 41' 45", about 95 m. direct distance WNW of Santiago, of which it is the port, and at the foot of a range of steep hills about 1,600 ft. high. The city itself lies about 8 m. from the harbour; but the suburb called Almendral lies close upon the harbour, and is inhabited by those employed about the shipping. The harbour is defended by a fort. V., though the chief commercial entrepôt of Chili, and indeed one of the most flourishing sea-ports of South America, is nevertheless peculiarly unfortunate in its local situation. The bay is open to the N, and affords no shelter to shipping during the winter months; the country which surrounds it is of the most barren description, and the want of space at the base of the cliffs prevents the improvement of the town. But in spite of these disadvantages, the place has increased rapidly of late years, and it is supposed to contain at present above 50,000 inhabitants. Of this number 6,000 are strangers. The main body consists chiefly of one long, straggling street, mostly composed of low white-washed houses, which runs parallel to the beach, and wherever a ravine comes down, the houses are piled up on each side of it. Of late years many handsome houses of four and five stories have been erected; and there are several fine public buildings, amongst which are the custom-house, the Merced and Matriz churches, and the Plaza-de-la-Victoria is a fine open space. The surrounding hills, being only partially protected by a very scanty vegetation, are worn into numberless little gullies which expose a singularly bright red soil. In a NE direction there are some fine glimpses of the Andes; the volcano of Aconcagua is particularly magnificent; but the immediate neighbourhood is not very attractive to a European eye. During the long summer the wind blows steadily from the S, and a little off-shore, so that rain never falls; during the three winter-months, however, it is sufficiently abundant. The vegetation in consequence is very scanty; except in some deep valleys, there are no trees; and only a little grass and a few low bushes are scattered over the less steep part of the hills. When we reflect that at the distance of 350 m. to the S, this side of the Andes is completely hidden by one impenetrable forest, the contrast is very remarkable. "We," says Dr Poeppig, "who during a long voyage had seen nothing but black and dreary rocky islands and a cheerless sky, now—in the bay of Valparaiso—looked round us in vain to discover some green tree or grassy slope; in whatever direction the eye turned, it was sure to encounter monotonous steep cliffs of grey syenite, which are all connected with the same semicircular mountain ridge. The sides and summit of this ridge are painted in the colours of an old brick, brown and red, and not a single group of trees breaks this dull uniformity, inasmuch as the parched ground is capable only of nourishing a few bushes with woody boughs and greyish leaves. Many broad slopes are quite destitute even of these, and are either covered with heaps of stones, or split into reddish gaps and ravines. Narrow and dangerous paths wind over the summit of the ridge, and along

these, involved in ruddy clouds of dust, long trains of mules laden with the productions of the country, descend to the port. The deep and dark gullies which sink down from the mountain-top to the sea-side, have no signs of a living brook; their perpendicular rocky sides are still barer than the rest. It is only at the bottom of these gullies where some soil has been heaped together, that one remarks a faint tint of green, a trace of the careful garden-culture of the poor peasant, during a short period of the year."

V. is, as it were, a city of yesterday. Under the rule of the Spaniards it was a place of no importance, and never could have been, for they vigorously repressed the trading spirit, and wished to confine its entire operations to an exchange of the manufactures of Catalonia for the agricultural produce of this dependency. Even so late as 1819, V. was only a village, with ten or a dozen huts. A little more than a century ago the whole township was sold for 1,500 d.; now, we are told, many separate houses fetch from 4,000 to 5,000 d. of rent; and building is still going on very extensively. Wherever the tide recedes a few yards, the spot is appropriated and covered with bricks and mortar. Much if not most of the property of the town is said to belong to Englishmen and other foreigners. The merchants are nearly all English, American and German; but nearly all the shops are kept by Frenchmen. The posts are regular; the police well-organized; the streets are kept clean, and crime is repressed. The number of vessels which entered the port of V. in 1845 was 859; in 1849, 968; in 1850, 1,465—412,240 tons; in 1851, 1,561. The customs' revenue in 1849 was 2387,096; in 1851, £487,400. Of the total imports into the republic of Chili during the first six months of 1852, amounting to 8,404,589 d. in value, 7,790,241 d. were imported at V. See article CANAL. The project of a railway to Santiago has been entertained for some time.

In 1822, V. was greatly injured by a severe earthquake; and on the 2d of April 1851 it was again visited by a very severe shock. Many geologists are of opinion that the bay of V. is being gradually but very sensibly affected by the general elevation of the coast in this quarter of America. In an article which appeared in the South American journal, *El Arancano*, Don Mariano Rivero dissents entirely from the opinion that earthquakes have produced changes of level in the bay of Valparaiso; and Colonel Walpole says, "I have heard, from persons long resident on the spot, both previous to the earthquake of 1822, and still residing there,—accurate observers of events,—statements in direct corroboration of M. Rivero, and whom he could not have consulted: and it is difficult to conceive why those whose opinions he considers as inconsiderately put forth, should have drawn their conclusions from the mere appearance of a piece of ground not more than 200 yds. of the whole circumf. of a bay of considerable extent." The observations made by Mr. Darwin during the surveying voyage of the *Beagle*, extended over part of the coast from 60 m. S of Valparaiso to 80 m. N of it; and throughout the whole of this line extensive beds of shells were found, elevated at various heights, from the level of the present sea-beach to 250 ft. above it. The most unequivocal proof of a recent rise is drawn from *balanides* found adhering to the rock at the height of 14 ft. above high-water-mark. Mr. Darwin also observed *balanides* similarly situated at the Rapel, 60 m. S of Valparaiso, and at Quintero, a few miles to the N of it. The present position of an ancient sea-wall, which was built in 1680 at V., cannot be otherwise explained than by a change of level. The appearance of the granitic rocks, both to the N and

S of the bay, also bear testimony, in Mr. Darwin's opinion, to the fact of an elevation to the amount of about 14 ft. The church of San Augustin was found to stand 19 ft. 6 inches above high-water mark; allowing for its probable position when built in 1614, the greatest amount of possible change cannot have exceeded 15 ft. in the period of 220 years. Mr. Darwin considers it certain that the land was elevated during the earthquake of 1820. The rise of the land, even in the bay of Valparaiso, was not equal; for a part of a fort which was not formerly visible from a certain spot, subsequently to the earthquake fell within the line of vision. There is good reason to believe that part of the most recent rise of the land, attested by the *balanida* and position of the sea-wall, has been due to changes acting previously to 1822, as well as to that earthquake itself, and likewise to an elevation produced by insensible degrees since that period.

VALPARAISO-DE-ABAJO, a market-town of Spain, in the prov. of Cuenca, and to the W of Huete. Pop. 540.

VALPARAISO-DE-AREIBA, a market-town of Spain, in the prov. of Cuenca, near Huete. Pop. 210.

VALPELLINA, a village of Sardinia, in the prov. of Aosta. Pop. 635.

VALPERPA, a market-town of Sardinia, in the prov. and 11 m. SSW of Ivrea. Pop. 3,500.

VALPO, a town of Austria, in Slavonia, in the comitat of Vezocze, on an affluent and near the S bank of the Drave, and 20 m. WNW of Esseg.

VALREAS, a canton, commune, and town of France, in the dep. of the Vaucluse, and arrond. of Orange. The cant. comprises 4 com. Pop. in 1831, 8,425; in 1846, 9,060. The town is 24 m. NNE of Orange, on the Coronne. Pop. in 1846, 4,690. It has manufactories of silk and of leather. Oil, silk, madder and chestnuts are cultivated in the environs. V. was the birth-place of Cardinal Maury.

VALS, a commune and town of France, in the dep. of the Ardeche, and cant. of Aubenas, 21 m. SW of Privas, on the L. bank of the Ardeche, near the confluence of the Volane. Pop. in 1846, 2,834. It has mineral baths, silk and paper-mills. The vine and mulberry, olive and almond trees are cultivated in the locality. In the vicinity on the Volane are basaltic rocks called the *Chaussée des Géans*.—Also a town of Austria, in the Tyrol, in the circle of Bruneck. Pop. 860.

VAL-SASSINA, a district of Austrian Italy, adjoining Lake Como, between the Grisons and the Valteline. Its length is about 18 m. Though very mountainous, it has some fruitful vales. The German family of Tour-and-Taxis take the title of dukes of Valsassina.

VALSEQUILLO, a town of the island of Gran Canaria, in the Canary group. Pop. 2,700.

VALSESIA, or **VALLESERIA**, a mountainous territory of Piedmont, in the prov. of Nevares, extending from the source of the Sesia on the NW, to the Lago-d'Orta on the SE, about 36 m. Of its whole surface only 17,700 hectares are cultivated. Pop. 35,145. It is administratively divided into the 3 mandamenti of Borgosesia, Varallo, and Scopio. It physically comprehends four principal valleys, respectively denominated the Valle-Grande-della-Sesia; Valle-Piccola, which is watered by the torrent Sermenta; Valle-Mastallone, bordering the torrent of that name; and Valle-d'Uggia, commonly called Valduggia, irrigated by the torrents Strona and Uggia. The first of these—the great valley of the Sesia—commences above Alagna, its highest village at the foot of the Alps, and extends down the river to Ponte-di-San Quirico, below Borgosesia; the torrent Sermenta and the Valle-Piccola descend southward, or nearly

so, from the chain of mountains which divides this prov. from the valley of Anzasca, the torrent joining the Sesia at Balmuccia; and the Mastallone, which has its source in the same direction, but more eastward, runs parallel with it and falls into that river at Varallo. The Strona, bordered by the Valle-d'Uggia, rises in Monte-Navigno, on the W of the Lago-d'Orta, and issues in the Sesia at Borgosesia. Besides these there are about twenty other valleys or inlets of smaller extent and isolated among the folds of the mountains, difficult of access, but generally watered by little tributary streams. There is a good deal of manufacturing industry in this district, employing 8 paper-mills, 10 cotton factories, 5 hat-works, and 5 establishments for dressing and dyeing skins. At Valduggia there is a bell-foundry; and Varallo is famous for its brass-castings.

VALSYIO, a town of Hungary, in the com. of Baranya, 5 m. W of Siklos.

VALTELINE, a lordship of Austrian Italy, in the gov. of Milan, now forming the greater part of the delegation of Sondrio. Its superficial extent is about 1,370 sq. m. It consists of a long valley traversed by the Adda, and surrounded by the Alps in all directions, except where it opens to the lake of Como on the W. Cattle form an object of export; silk is cultivated to a considerable amount. The inhabitants are of Italian origin; but were politically alienated to the Grisons until 1797, when their country was incorporated with the dependances of France in Italy, as afterwards, in 1815, with the dominions of Austria. The chief town is Sondrio. See **SONDRIO**.

VALTIERRA, a town of Spain, in Navarre, 8 m. NW of Tudela. Pop. 1,500.

VALTOUMANCHE, a village of the Sardinian states, 18 m. NE of Aosta. Pop. 1,500.

VALTRI, a town of the Sardinian states, in the duchy of Genoa, among the Apennines.

VALTRIE (LA), a small stream in Lower Canada, which falls into the St. Lawrence from the north, 40 m. below Montreal.

VALUIKI, a town of Russia, in the gov. of Voronezh, in N lat. 50° 12' 34". Pop. of circle 4,000.

VALVERDE, a town of Spain, in the prov. and 14 m. S of Badajoz. Pop. 909.—Also a town in the prov. and 25 m. S. of Cuenca. Pop. 1,700.—Also a town in the prov. of Cuenca, on the Guadalquivir, 18 m. NNE of Seville.—Also a town of the prov. of Huelva, in the Sierra Morena, 21 m. N of Moguer, and 50 m. W by N of Seville. Pop. 5,200.

VAMKAOSE, a small island in the Chinese archipelago, 62 m. SW of Macao, where the celebrated St. Francis Xavier was buried.

VAN, a large and fortified city of Turkish Armenia, situated about 1 hour's distance from the E shore of a lake of the same name, 145 m. SE of Erzerum. It is surrounded with a wall of mud and stone, with large round and small square bastions, and a deep ditch, and has four gates. Cotton and corn are imported from Persia. To the N of the city, on a high, narrow, inland rock rising abruptly from the plain, and about 600 yds. in its entire length, stands the castle, which can be approached only by one passage admitting no more than two persons abreast, and, unlike most Turkish strongholds, is not commanded by neighbouring heights. The city is well built; the houses are of stone and tile; and the streets though narrow are well paved and comparatively clean. Most of the private dwellings have each their own inner court, and are entered through an outer gate. The town contains two large churches, four mosques, two baths, and two caravanserais. The great charm of V. are its gardens which stretch over a level area of 7 m. by 4 m. be-

tween the city and the mountains to the E. It is abundantly supplied with water. Its pop. has been recently stated at 15,000, two-thirds of which are Turks, and the remainder Kurds and Armenians. The chief occupation of the inhabitants consists in the manufacture of coarse cotton chintzes. V. is said to have been founded by Semiramis. In 1533 it was taken by Solyman.

VAN (LAKE OF), the DROW-WANAI of the Armenians, and VAN-GOL of the Turks, a large inland sheet of water in Turkish Armenia, between the parallels of 38° and 39°. In the maps of D'Anville it is represented as occupying a space of 90 m. long by more than half that in breadth; and in that of Rennel it is high 60 m. in length by 30 m. in breadth; Kinneir prodigiously reduced its dimensions, making its greatest length only 30 m., and its breadth only from 9 to 13 m. The latter authority says that a vessel with a fair wind can sail the whole length of the lake in 4 hours, while he states, at the same time, that its bays and inlets are so numerous that to make the circumference of the lake would require a journey of 90 hours or 300 m. Recent observations report its length at about 70 m. from NE to SW; its extreme breadth at 28 m., and its alt. above sea-level 5,467 ft. It contains several islands. A few crazy boats navigate the lake, which abounds in fish and water-fowl. The water is brackish. The Bendi-Mahi-Su flows into the NE arm of this lake; the Kara-Chai into its E side; the Choseh-Ab into its SE extremity. But all these streams are of small extent. The Nimrud-Dagh and the Sapan-Dagh divide its basin, on the NW and N, from the basin of the Murad-Chai or Upper Euphrates. This lake is the *Arisea Palus* of Ptolemy, probably so named from the city of Arsis or Arjish, on its N shore. It is called *Bezanianus* by Moses of Chorene, and the district round it *Bezanisa*. It is not mentioned by either Pliny or Strabo.

VAN-BUREN, a central county of the state of Arkansas, U. S., comprising an area of 1,456 sq. m., drained by Little Red river and its branches. Pop. in 1840, 1,518; in 1850, 2,864. Its capital is Clinton.—Also a county in the SE part of the state of Iowa, comprising an area of 450 sq. m., drained by Des Moines river and its branches. It is undulating but generally fertile. Pop. in 1840, 6,146; in 1850, 12,370. Its capital is Keosauque.—Also a county in the SW part of the S peninsula of the state of Michigan, comprising an area of 620 sq. m., drained by Pawpaw river and its branches; by the S branch of Black river; and by Brush and Dowagiac creeks, and intersected by the Michigan Central railway. The surface is level, and the soil fertile. Pop. in 1840, 1,910; in 1850, 5,800. Its capital is Pawpaw.—Also a central county of the state of Tennessee, comprising an area of 312 sq. m., drained by Laurel creek, and by other branches of Caney fork of Cumberland river, which flows on the N border. The surface is undulating, and the soil fertile. Pop. in 1850, 2,674. Its capital is Spencer.—Also a county in the W part of the state of Missouri, comprising an area of 648 sq. m., drained by Grand river and Big creek, and consisting chiefly of prairie. Pop. in 1850, 4,698. Its capital is Harrisonville.—Also a township of Onondaga co., in the state of New York, on the S side of Seneca river, and 144 m. N by W of Albany. It has an undulating surface, drained by Camp brook and other affluents of Seneca river, and intersected by the Oswego and Syracuse railway. Pop. in 1840, 3,021; in 1850, 3,873.—Also a township of Hancock co., in the state of Ohio, 96 m. NNW of Columbus. Pop. in 1840, 402.—Also a township of Drake co., in the same state. Pop. 421.—Also a

township of Shelby co., in the same state. Pop. 596.—Also a township of Wayne co., in the state of Michigan. Pop. 940.—Also a township of Brown co., in the state of Indiana. Pop. 417.—Also a township of Lagrange co., in the same state. Pop. 284.—Also a village of Crawford co., in the state of Arkansas, on the N side of Arkansas river, and 124 m. WNW of Little Rock. Pop. in 1840, 500; in 1850, 547.—Also a village of Clay co., in the state of Indiana, 55 m. WSW of Indianapolis, and near the Terre-Haute and Richmond railway. Pop. in 1840, 588.—Also a village of Itawamba co., in the state of Mississippi, on the W side of Tombigbee river, and 165 m. NE by N of Jackson. Pop. in 1850, 100.—Also a village of Rippling co., in the state of Missouri, on the E bank of Current river, and 123 m. SE by S of Jefferson.

VAN-BUREN HARBOUR, a village of Chautauque co., in the state of New York, U. S., on the E side of Lake Erie, and near the Buffalo and State Line railway.

VANCOUVER'S ISLAND, or QUADRA, a large island off the coast of North-West America, extending from N lat. 48° 17' to 50° 55', and from W long. 128° 10' to 128° 30'. Its extreme length from NW to SE is 276 m.; its breadth varies from 50 m. to 65 m. On the E and NE it is separated from the mainland of British America by the gulf of Georgia and Queen Charlotte's sound; on the S, the strait of San-Juan-de-Fuca separates it from the Oregon territory of the United States. Little is yet known of the interior of this extensive island, but its natural resources and capabilities are reported to be very considerable; and it occupies a highly important position both with regard to the adjoining territories, the Japan and China trade, and the islands of the Pacific, and may probably at some future period command a great portion of the trade between the archipelago of the Pacific and the continent of America. It is only 4,078 m. distant from England, and but a few days sail from California and the Sandwich islands. It possesses numerous excellent harbours, the sea and rivers abound with fish, and whales are found in great numbers near the coast. Coal and limestone are abundant, and it produces the finest timber of several kinds, including the oak, pine, cedar, beech, and ash. The climate resembles that of England, but is milder, and the soil, so far as cultivation has yet extended, proves to be well adapted for the production of wheat and other crops grown in England. Stock of all kinds is easily reared, and thrives well. Capt. Wilkes, of the United States' navy, speaking of the country generally, estimates the produce, whether from farm or garden, of the finest character. He tells us, that the wheat produced weighs 63 lbs. to the bushel, and 600 acres produced 7,000 bushels; that barley yields 20 bushels to the acre, though oats do not thrive well; but pease, beans, and potatoes yield abundantly; strawberries and gooseberries, the former nearly ripe, and salad gone to seed, were seen by him at Nisqually on the 15th May. Upon the whole, he considers V. three times more fertile than the United States; cattle, he says, find natural hay all the year round, and multiply with astonishing rapidity. The climate, even in the northern part, is considerably milder than that of England; and for settlers the facilities, both as regards the raising of produce and the erection of works and dwellings, appear to be greater than had been anticipated. Game is everywhere abundant, and is calculated to prove an important item in economising domestic expenditure, while, in addition to wild fowl on the waters, there are many valuable fisheries, besides oyster-beds. Deer are often met

with, and there are also some black bears, which are considered harmless. One of the most remarkable peculiarities of the island is the great number of inlets, or arms of the sea, which, being deep and narrow, and penetrating a considerable distance inland, furnish in many instances, from the great rush of water in and out, an important and permanent motive power. The natural features of the country are described as being very beautiful, owing to its lakes, hills, woodlands, and occasional patches of prairie. The oak is abundant, frequently growing in glades, with park-like regularity. There is also a cypress which grows to a large size, and is particularly valuable for building purposes. The pines are of three sorts, and are found 160 ft. in height, and from 12 to 16 ft. in circumf. One description of pine is extremely plentiful, and possesses superior qualities for ship-building purposes. Varieties of maple and other trees are likewise common, and the valuable hemp known as the *urtica canabina* grows wild and luxuriantly in the woods. Artificial grasses, it is believed, might be cultivated with great advantage, and seeds of several descriptions have been sent out. The soil generally is a dark vegetable mould, averaging 18 inches in depth, and unusually fertile. Contrary to what is seen in England, the best lands are mostly those where pine trees grow. The flora of the island is much the same as that of Great Britain. With regard to its mineral resources, the principal rocks are stated to be of an excellent kind for building materials, both as respects appearance and durability. It is also considered that the geological features of the districts surveyed are all such as strongly to favour the anticipation that gold may be found throughout an extensive range. There is an abundance of felspar and quartz. Ironstone is likewise found in several places, but its value has not yet been determined. The quantity of iron is sufficient to affect the compass considerably, and captains of vessels who have visited the island are of opinion that this disturbance is unusually great along its shores. The native Indians behave well, and a small party of settlers penetrating into the interior with a canoe met a number of them, by whom they were warmly welcomed. They described a large lake, which no white man had ever yet seen, but which has since been visited, and found to be between 20 and 30 m. in length, and from 2 to 3 m. in breadth. A considerable quantity of wheat is raised, which is chiefly bought by the Hudson's Bay company, and exported in flour to the Sandwich islands, California, and to the Russian settlement of Sitka. The representatives of the Hudson's Bay company at Fort Vancouver, which stands about 100 m. from the mouth of the Columbia, and is the company's chief establishment on the W side of the Rocky mountains, have ingratiated themselves with the natives, with whom they carry on an extensive trade in skins. The port of Camosack, or Victoria, with its excellent harbour, promises to become of great importance as a port of refuge to ships trading along the W coast of America. The point of scientific interest, however, is the coal-field of the NE district, which is worked so near the surface, that the Cormorant steam-sloop was supplied by the natives with 62 tons of coal within three days. Specimens of this coal have been examined for the Admiralty, and although it yields a considerable per-centage of ash, it is reported to be not much inferior to the coal of South Wales.

The native pop. has been estimated at about 12,000 Indians of various tribes. The number of settlers in 1852, most of whom were sent out by the Hudson's Bay company and by the Puget Sound com-

pany, was about 400. The Hudson's Bay company having obtained from the Crown a grant of this island, in 1849, under the condition of colonizing it, but revocable at the end of 11 years, it is of importance that emigrants should know upon what terms and conditions they can settle and obtain subgrants of land on the island. They are 1. That no grant of land shall contain less than 20 acres. 2. That purchasers of land shall pay to the Hudson's Bay company the sum of £1 per acre for the land sold to them, to be held in free and common socage. 3. That purchasers shall provide a passage to Vancouver's island for themselves and their families; or be provided with a passage—if they prefer it—on paying for the same at a reasonable rate. 4. That purchasers of larger quantities of land shall pay the same price per acre, namely, £1, and shall take out with them 5 single men, or 3 married couples, for every 100 acres. 5. That all minerals, wherever found, shall belong to the company, who shall have the right of digging for the same, compensation being made to the owner of the soil for any injury done to the surface; but that the owner shall have the privilege of working for his own benefit any coal mine that may be on his land, on payment of a royalty of 2s. 6d. per ton. 6. That every freeholder shall enjoy the right of fishing all sorts of fish in the seas, bays, and inlets of, or surrounding, the said island; and that all the ports and harbours shall be open and free to them, and to all nations, either trading or seeking shelter therein. In 1852, the Hudson's Bay company reported that, up to the 27th of April in that year, there had been sold 1,478½ acres, to 11 persons, and that the fur-trade branch of the Hudson's Bay company was in possession, under the sanction of her Majesty's government, of 3,084 acres, which were occupied by them previous to the date of the boundary treaty with the United States, of which they had sold portions to some of their retired servants, who have settled themselves upon it. The company further reported that to obviate the difficulty of providing the means of subsistence for settlers on their first arrival, the Puget Sound company had made arrangements with four competent and experienced agriculturists to cultivate four farms. The Puget Sound company supply the capital, and give an interest in the profits of cultivations to the persons employed to conduct the farms with the option of purchasing them at their cost price. There had been sold and exported by the Hudson's Bay company 1,315 tons of coals, which were collected from the surface seams by the Indians; the company had incurred considerable expense in searching for coal, by boring or otherwise, without success until lately, when promising appearances had been discovered about 80 m. N of Fort Victoria, on the E coast of the island, nearly opposite the mouth of Fraser's river. The company stated that the high rate of wages in Oregon and California, and the attraction of the gold districts, in the latter country, had not only operated to prevent persons of capital settling in Vancouver's island, but had also obstructed the Hudson's Bay company and the Puget Sound company in their endeavours to bring land into cultivation, and provide means of subsistence for settlers: hitherto it had been necessary to import flour for that purpose, and for the use of the company's establishments on the island.

The government of the island has been arranged on the following constitutional basis:—The governor is appointed by the Crown, with a council of 7 members, likewise so appointed. The governor is authorised to call assemblies, to be elected by inhabitants holding 20 acres of freehold land; but it

is left to the discretion of the governor to fix the number of representatives; and to divide the island into electoral districts, if he shall think such division necessary. The governor has the usual powers of proroguing, or dissolving such assembly. Laws will be passed by the governor, council, and assembly. The legislature, thus constituted, will have full power to impose taxes, regulate the affairs of the island, and to modify its institutions, subject to the usual control of the Crown.

VANCOUVER (Cape), a headland of Western Australia, in Plantagenet co., between King George sound on the W, and Port Free People on the N, in S lat. 32° 2'.

VANDALIA, a village of Fayette co., in the state of Illinois, U. S., on the W bank of Kaaskaskia river, and 66 m. SE by S of Springfield, in N lat. 38° 50', and W long. 89° 2'. It is intersected by the Illinois Central, the Massac, and Sangamon, and the Mississippi and Atlantic railroads. Pop. in 1840, 800; in 1850, 1,100.

VANDANS, a village of Austria, in the Tyrol, district of Vorarlberg and bail. of Montafon. Pop. 900.

VANDEL, a parish of Norway, in the bail. of Romsdal, and on the Vandelv-fjord. Pop. 1,480.

VANDENESSE, a commune of France, in the dep. of the Nièvre, and cant. of Moulins-Engibert, 18 m. SW of Château-Chinon, on a river of the same name. Pop. 1,718. It has a blast-furnace, forges, and foundry.

VANDENESSE-LES-CHAROLLES, a village of France, in the dep. of the Saône-et-Loire, cant. and 4 m. E of Charolles, near the Semeuse. Pop. 1,630.

VANDEBURG, a county in the SW part of the state of Indiana, U. S., comprising an area of 240 sq. m., drained by Big Pigeon, Blue Grass, Little, and Locust creeks, and intersected by the Wabash and Erie canal, and by the Evansville and Illinois railway. Pop. in 1840, 6,250; in 1850, 11,415.

VANDERLIN, an island of the gulf of Carpentaria, of which the N extremity, Cape Vanderlin, is in S lat. 15° 34' 30", and E. long. 137° 8'.

VANDERSCHELLING, a group of islands in the N. Pacific, near the N coast of New Guinea, in the bay of Geelvink, in N lat. 3° 32', E. long. 136° 17'.

VAN DIEMEN'S LAND, or **TASMANIA**, a large island which lies to the southward of the eastern part of Australia, between 40° 45' and 44° S lat., and 145° and 148° 30' E long. Its form is rudely triangular, and its superficial extent is estimated at 23,437 sq. m. Its average length is 165 m., its average breadth 155 m. Approached from the E, it has a picturesque and beautiful appearance from the sea, presenting an endless succession of lofty mountains covered to their summits with wood; while tall rocks and precipices, glens and hills, give additional interest to the scenery of this romantic island; but the W side is wild and barren. On traversing the island, it is found to present a constant alternation of hill and dale, with occasional flats or plains; but these are comparatively few in number, though some of them are of great extent, consisting in several instances of not less than from 3,000 to 10,000 acres. "The interior," says Mr Dixon, "is characterised by its uncommon features, being in many respects unlike any other part of the world. The surface heaves up into irregular ranges of mountain-scenery, crowded over and intersected in all fashions and directions. We never see one mountain alone; but where one is, there are chains of others running up, round, and about, in open wildness and disorder; towering here and sinking there, in bewildering yet striking confusion. From April to October, the highest are capped with snow.

The whole face of the country is covered thickly with trees of immense height and circumference, growing close together, and reaching to a great loftiness before they shoot out their branches. Their leaves are unfading, but dusky and mournful, and seem in the distance nearly black, throwing an air of heavy gloom over the face of nature. The valleys are circumscribed within narrow limits, and, like the mountains, spread over with high sturdy forests. Those tracts which have never been disturbed in their primitive wildness, are called, not the forest, but 'the bush.' The native tree and shrub are not subject to the annual decay and fall of leaf which are common in other regions; but here the leaf is as lasting as the stem, and both live and die together. Nature, too, clothes herself with a constant verdure, and even in the midst of winter retains her greenness. While the earth is covered often ankle-deep in snow, the grass, the flowers, the shrubs, and the trees remain unchanged, and are as green and as healthy as in the middle of summer. But notwithstanding its exterior garment, no country can be imagined more dreary than 'the bush' of Van Diemen's Land. Travel through it hundreds of miles and your prospect is the same. Tiers of mountains still environ you, and you see nothing but a wearisome uniformity. Nothing in the shape of diversity presents itself, either to attract the eye or captivate the imagination. The stately gum-tree, with its dark and heavy foliage, shoots up before you wherever you turn your head; birds flutter in the branches, and at intervals emit a wild chirp, a dolorous scream, or a dull caw; but the note is without melody—harsh and displeasing to the ear. The plumage of many of the species, however, is pretty, and that of the cockatoo very handsome. Tracts of land are at times seen, bursting with fertility, and many more rocky, sandy, and sterile. Some have a park-like appearance, free from underwood and obstruction, and others are so overgrown with these as to be almost impervious. A few of the native shrubs are pretty, but so sparingly scattered that they have to be sought out. The wild-flowers are in small variety; but some of those that exist are very handsome when closely examined, although, being all diminutive, they are often trampled over. The indigenous trees grow up to an enormous height. The gum is the highest and greatest, and in height and circumference is reckoned to be the biggest in the world. It grows straight upward and shoots out its branches above. The root works deep in the earth, and spreads itself about in all ways and to some distance. The variety of trees is not great; but the gum is that which predominates. The foliage of all is scanty, the leaves small and far apart, and such as to afford no shade in hot weather."

Shores, Bays, &c.] The shores of Van Diemen's Land are bolder in character than those of New Holland, and advantageously broken up by deep bays and inlets. The NE shore, near Cape Portland, consists of a sandy beach occasionally broken by rocky headlands; behind it are gently rising hills; and over their green slopes the mountains of the interior rear their lofty and naked summits. As the entrance of the river Tamar is approached, the country becomes fertile, and continues so for a considerable distance to the westward. To the west of Circular Head—a remarkable promontory running 12 m. out into the sea—the shore is low and sandy, and the interior covered with heath. Cape Grim, a high, bold, dark-coloured cliff, forms the NW extremity of the island. About 70 m. to the S of this, is a narrow inlet which has not yet been explored, but which is thought to be the estuary of a consider-

able river. About the middle of the W shore is situated Macquarie harbour, opening from the NW, and deeply intersecting the land in a SSE direction. To the S of this the coast is wild and rocky. The southern coast, taking its general outline, is the most elevated of any. The rocks at South-West cape are remarkably bold. About 16 m. to the E of this cape lies D'Entrecasteaux's channel, which, passing between the north end of Bruni island and a peninsula from the main island, reaches a considerable way above Hobart town, under the name of the Derwent river, and presents a succession of fine harbours. Cape Pillar is a striking basaltic point on the SE corner of the island, which has to be doubled by vessels to and from Sidney. To the N of Pirate's bay, the land is barren, low, and sandy.

Mountains and Rivers.] Van Diemen's Land consists of two ridges, with a comparatively low country in the middle. It is diversified in features, but upon the whole is mountainous in character. According to Count Strzelecki, the space occupied by granite, porphyry, quartz, and other crystalline rocks, is to that of the limestone, clay, slate, and other sedimentary rocks, as 7 to 1. One ridge appears to stretch in the direction of Cape Grim and South cape above 230 m., dividing the streams that run W, from those of the Derwent and the Tamar. Snow lies upon one of the peaks of this ridge, in 8 lat. 43° 25', called Mount Humboldt, which has an alt. of 5,520 ft., for some months of the year. On Table-Mountain, or Mount-Wellington, which rises to 4195 ft., about the height of Ben-Nevis in Scotland, snow lies for three-fourths of the year. The southern mountains near Port Davey are very lofty; but this SW portion of the island has yet been but imperfectly explored.—The three principal rivers of Van Diemen's Land are the Derwent, running to the S; the Tamar, running to the N; and the Huon, which runs W, and joins the sea not many miles from Hobart-Town. The remotest source of the Derwent is a lake, in 8 lat. 52°, within 50 m. of the N coast. This river drains an extent of country amounting to nearly 12,000 sq. m. The fresh water which gets the name of the Derwent is not the principal branch; the main stem of the river is the Ouse. The Clyde and the Jordan are the other principal branches of the Derwent on the E side. The Macquarie is the largest branch of the Tamar, and passes through fine rich grounds. The North Esk and South Esk also flow into or rather form the Tamar, which flows NNW to Port Dalrymple. The Gordon and the King flow into Macquarie harbour on the W coast. About the parallel of 43° there are numerous lakes, one of which, Lake Clarence, is 15 m. long and 5 m. broad.

Climate.] Van Diemen's Land enjoys a salubrious climate, well adapted to European constitutions. If the summer heat in New South Wales be taken at 90°, that of Van Diemen's Land cannot be rated much above 70°; although there are times when the therm. exhibits sudden elevations, even to 100° or 110°. The mean annual heat of Hobart-Town is 52°; of summer 63°, of winter 42°. Thunder-storms are seldom experienced. September, October, and November form the spring, March, April, and May the autumn. The average of the therm. for these months is from 50° to 60°. The average number of days on which rain falls throughout the year, is from 50 to 60. Frosts are sometimes severe. The farmer sows his grain in July, August, and September, which are the spring months; in October he prepares the land for Swedish turnips; in November he gets in his potato and turnip crops; December is the height of his hay-

harvest. At about the middle of January his wheat-harvest commences, and continues through February; in March he pays attention to his fallowing and husbandry; in April he gathers his second crop of potatoes; in May he lays down his English grasses; and in June he continues his ploughing and harrowing.

Vegetation.] The natural trees of this island are nearly the same with those of New Holland; the gigantic blue gum is the prevailing tree; but neither mahogany nor rose-wood has been found here. There is, however, a species of oak called black-wood, which, with the Huon pine, the black and silver mimosas, and the pencil-cedar, serve as good substitutes for these useful trees. All the trees are evergreens; but the foliage is generally of a dark and sombre green. They often attain a vast size and height; but there is little variety in their forms. The dog-wood, pink-wood, and musk-wood, are fine-grained trees. The variety of shrubs is great, and some of them are extremely beautiful, particularly the native cherry and the fern. The myrtle often forms dense forests, and will occasionally attain a huge girth. The indigenous botany is, like that of New Holland, exceedingly scanty in articles fit for human sustenance. The sands produce a species of plantago which forms a good salad, and is one of the most useful plants that this island furnishes. In the woods of the interior, a new species of *Acoides* is found, the fruit of which is eaten by the natives; but the delicious fruits that abound in latitudes nearer the equator, and attain such perfection even in New South Wales, are unknown here. A large species of truffle occurs, which in a roasted state forms a good substitute for bread.

Animals.] The native animals are few and diminutive; and, like those of Australia, chiefly of the marsupial genus. The three different species of kangaroo, the opossum, the squirrel, and the wild cat, are the most numerous. The native dog, so well known in New South Wales, is not found here. The hynae-opossum, though it flies from man with the timidity of a hare, is extremely destructive to the flocks, amongst which it frequently commits the most dreadful havoc. This animal attains considerable size, having been found in many instances to measure six feet from the snout to the extremity of the tail. The *Dasyurus ursinus* is found in the interior.—The birds have fine plumage. We here find roselle parrots,—black, white, and satin cockatoos,—quails, widgeons, mountain and wild ducks, eagles, black swans, emus, and a bird resembling the thrush called the wattle-bird. Pheasants, partridges, snipes, and wood-cocks, have been imported from England for the amusement of the colonists; and the hunting of the emu also affords excellent sport.—Some though not all of the poisonous serpents found in New Holland are also seen here; in the reptile-family may also be mentioned guanas and lizards, centipedes, scorpions, and tarantulas. The wasp of Van Diemen's Land is a smaller but much more splendid insect than the English wasp; it has four orange-coloured wings, and horns and legs of the same colour, a hard body, and a formidable sting. Bees have been recently introduced, and promise to do well. The rivers abound with mullet, perch, craw-fish, and oysters; and the surrounding seas with whales, dolphins, and seals.

Soil.] From the hilly nature of the country, there is but a comparatively small proportion of it adapted for the plough, though presenting abundance of excellent pasturage. The extent of really available land throughout the explored part of the island has been estimated at one-third of the whole,

and this again divided into four parts, giving one for the plough and the other three for pasture; thus, out of 1,000 acres of land, about 100 will be found fit for cultivation, and from 300 to 400 for grazing. Of the whole island, which comprises 16,000,000 acres, there will be about 3,000,000 acres located, or private property; the remaining 13,000,000 acres are Crown land, about 2,000,000 acres of which are occupied under grazing-licences. The staple crops are wheat and potatoes. Wheat may be considered the chief export of the colony; it is sent to Sydney, the Mauritius, and Rio Janeiro. The principal corn-district is at Port Dalrymple, on the NE side of the island, 150 miles from Hobart-Town. Potatoes and hops are cultivated with success; and all the choicest vegetables of an English garden are raised with great facility, and pay uncommonly well for the expense and labour of planting. The seed-time is a month or six weeks later than in New South Wales, though wheat may be sown in November and reaped in March. The farms in the neighbourhood of Hobart-Town average little more than 50 acres each; in the district of New Norfolk they often exceed 2,000 acres. The average returns per acre in this latter district are,—wheat, 15 bushels; barley, 18; oats, 30; pease, 18; potatoes, 4½ tons; turnips, 4½ tons. The whole quantity of wheat grown upon the island in 1831, was estimated at 383,000 bushels, with an excess over the consumption of the preceding year of 70,000 bushels, making in all a stock of 453,000 bushels; while the consumption was not reckoned at more than 250,000, thus leaving a surplus of 253,000 bushels. In 1836, 485,969 bushels were raised. In 1845, the land in cultivation was 140,949 acres.—The live stock, in 1850, was estimated at 2,000,000 sheep, 85,000 cattle, and 16,000 horses.

Minerals.] This island produces copper, iron, alum, coal, slate, limestone, asbestos, and basaltes. It also affords cornelian, rock crystal, chrysolite, jasper, marble, and many petrifications. In the neighbourhood of Launceston there are mountains of iron-ore, which must prove a source of great wealth to the island when once it is sufficiently populous. Coal also is met with in extensive beds, particularly near Port-Arthur, and over the E division of the island. Limestone is common, and of excellent quality. In 1836, 47,600 bushels of lime were manufactured. In the district of Oatlands are three small lakes, or ponds, which are so strongly impregnated with salt that they yield, by a natural process, many tons of that essential article of life annually. This salt is not equal in quality to English salt, but nevertheless brings 10s. a hundred-weight in the colony.

Population.] The colonial pop. of Van Diemen's Land in 1821 was 7,185; in 1830, 10,390; in 1835 it was 41,512, of which 18,268 were convicts. In 1840 the free inhabitants were 28,294. In March 1851, the pop. was returned at 70,130 in the proportion of 43,127 males to 25,482 females, excluding the military, showing an excess of males to the number of 17,645. The military numbered 953 men, women, and children. Allowing for 2,813 convicts taken twice in the census of 1847, the total increase in the pop. of both sexes since that date, amounted to 2,779. The free pop. had been increased by 7,055 souls, but the decrease of convicts amounted to 4,276. Of the general total of the male pop. 10,649 were free and born in the colony. The bond male population were numbered in the following proportion—

Holding tickets of leave,	7,295
In government employment,	1,732
In private assignment,	1,816

VII.

In private employment,	1,680
In public works,	568
Total,	13,052

The total of free females was 21,445; of bond as follows:

Holding tickets of leave,	1,284
In government employment,	1,312
In private assignment,	604
In private employment,	867
Total,	4,067

Of the total female pop. 9,771 were married, and 15,709 were single. Excess of single males, 17,688. The professed religions of the military and convicts on public works are not stated, but the remainder of the population are classed as follows:—

Church of England,	45,073
Church of Scotland,	4,486
Wesleyan Methodists,	3,772
Other Protestant dissenters,	2,379
Roman Catholics,	12,444
Jews,	485
Mahomedans and Pagans,	21

We find 39,611 persons whose occupations are not included in the classes enumerated as under:—

Landed proprietors, merchants, bankers, and professional persons,	1,677
Shopkeepers and other retail dealers,	1,415
Mechanics and artificers,	5,687
Farmers,	2,633
Market gardeners,	281
Shepherds and others in care of sheep,	1,446
Gardeners, stockmen, and farm servants,	9,781
Domestic servants,	8,900
Licensed boatmen,	346
Seamen employed in coasting and river craft,	841
Whalers,	42

The total number of houses in the colony was 11,844; of which 5,723 were built of stone or brick, and 6,121 of wood. The total number of unfinished houses was 561, and 599 were uninhabited. From another return it appears that the number of free males of the ages of 21 years and upwards in the 15 electoral districts were 18,130, and the number of inhabited houses 11,392. In each district each number is as follows:—

	Males.	Houses
Hobart-Town,	4,097	3,127
Launceston,	2,381	6,644
Cornwall,	800	596
Westbury,	1,891	765
Longford,	967	424
Morven,	949	516
Campbell-Town,	872	471
Oatlands,	898	452
Cumberland,	822	462
Richmond,	992	417
Brighton,	709	409
Sorell,	940	478
Buckingham,	967	714
New Norfolk,	608	363
Huon,	806	567

In the remoter settlements, the aborigines proved themselves very destructive and implacable. They are in complexion perfectly black; their features are flat, and hair woolly. All attempts to induce them to leave their native woods, and mingle in a friendly manner with the colonists, were yet more ineffectual than in the case of the natives of New South Wales, and in 1854 it was calculated that not above 23 of the aboriginal race were in existence.

In October 1848 there were receiving from the public funds, and under the immediate direction or general surveillance of the government, 65 schools, containing 3,147 children, of whom 1,733 were boys, and 1,414 were girls; and 2,323 pupils were in attendance at 100 private schools in various parts of the island. The total number of children from 2 to 14 years of age, in the various districts of the island,

X

according to the census, appeared to be 12,994; while the number of children of these ages attending at public day-schools was only 2,917.

Government.] Up to the year 1825, Van Diemen's Land was merely a dependency on New South Wales. In that year, on the petition of the colonists, the colony was declared amenable to the mother-country only. Until 1850, the lieutenant-governor of this colony was assisted by two councils, an executive and legislative: the latter consisting of 15 members named by the king. Its duty was to make laws and ordinances for the well-being of the colony, such laws being always submitted to parliament within six weeks after the opening of each session. By 13th and 14th Vict., c. 59, the government is vested in a governor and executive council nominated by the Crown, and a legislative council of at least 24 members, of whom one-third is nominated by the Crown, and two-thirds are elected. There are also here a chief-justice, attorney-general, and all the other appendages of a supreme court of judicature,—courts-of-requests, attorneys, barristers, solicitors, proctors, sheriffs, justices of the peace, and the whole of the paraphernalia of civil and criminal jurisprudence known in this country. There are besides, as in New South Wales, a number of stipendiary police-magistrates, each having a separate and distinct district under his judicial authority. There is generally one entire regiment of the line on this island.

Commerce.] Van Diemen's Land produces for exportation corn, wool, oil, timber, mimosa bark, cattle, and sheep, and salt meat and hides. Grain is exported to New South Wales, the Swan river, the Mauritius, and recently to England. An article of more regular export is wool; next in order of value is the produce of the whale-fishery. The progressive increase of exports to the mother-country may be seen in the following table:—

	In 1837.	1831.	1836.
Bark for tanning,	9,122 cwts.	39,264 cwts.	1,542 tons.
Trawl oil and sperm,	179 tons.	845 tons.	596,234 galls.
Whale fins,	168 cwts.	618 cwts.	2,842 cwts.
Sheep's wool,	192,076 lbs.	1,359,308 lbs.	1,737,368 lbs.

The total value of the imports in 1836 was £332,548; in 1843, £490,281. The bulk of the imports is from the mother-country, comprehending spirits, malt-liquors, ironmongery, woollens, linens, stationery, and soap. Sugar is imported from the Isle of France; tea from China; silks, rice, wine, and spices, are imported from the East Indies; tobacco from Rio; cheese, oranges, horses, butter, coals, and many other articles which Van Diemen's Land itself produces, from New South Wales. The ports of the island of Van Diemen's Land and of New South Wales are free ports, and placed on the same footing, as respects trade, with those of Malta and Gibraltar. Launceston, the nearest port to the continent of Australia, is 300 m. sailing distance from Port-Phillip. Hobart-Town is 800 m. sailing distance from Sydney.

Revenue.] The ordinary revenue of Van Diemen's Land arising from import duties, law fees, licenses, and fines, was, in 1831, £67,800; while the total expense of government amounted to £60,788. It is to be remarked, however, that a parliamentary grant of about £100,000 was annually made on account of the criminal population of this colony. The revenue in 1847 was £148,763; in 1849, £152,668. The expenditure in 1847 was £140,157; in 1849, £154,634. The expense of the judicial department amounts to about £13,000 per annum, and the ecclesiastical to about £3,500. The governor's situation is reckoned worth £5,000 per annum, although his nett salary is only £2,500. The salary of the go-

vernor's private secretary is £500 per annum. British silver is used, besides dollars, rupees, and several other foreign coins.

Divisions.] Originally Van Diemen's Land was divided into two counties only, viz., Buckingham and Cornwall. In 1826 these were subdivided into several police districts, viz., Hobart-Town, comprising about 400 sq. m.; Richmond, containing 1,050 sq. m., with the towns of Richmond, Sorell, and Brighton; New Norfolk, containing 1,500 sq. m., with Elizabeth-Town, or, as it is commonly called, New Norfolk, and Hamilton; Clyde, comprising 1,700 sq. m., and the town of Bothwell; Oatlands, containing 900 sq. m., with the towns of Oatlands and Jericho; Campbell-Town, containing about 1,260 sq. m., with the towns of Campbell-Town, Ross, Lincoln, and Fingall; Norfolk Plains, a district of great extent, comprising above 2,250 sq. m., but of which the greater proportion is rugged, inaccessible land, with the townships of Latour and Westburg; Launceston, an extensive but unproductive district of 3,800 sq. m., with the town of Launceston, the second town in the colony, and also the towns of Perth and George-Town; and Oyster bay, a small district of about 900 sq. m. To these divisions may be added the penal settlements of Macquarie island and Port Arthur, with numerous islands in the straits that separate the colony from New South Wales; Maria island, formerly a penal settlement; and the territories of the Van Diemen's Land Company, comprehending nearly 500,000 acres in the NW corner of the island, and presently inhabited by about 400 souls.—The capital is Hobart-Town on the estuary of the Derwent: see that article. Next to Hobart-Town in importance is Launceston, situated at the confluence of the North and South Esk rivers, or head of the Tamar navigation, 121 m. from the seat of government, and 40 m. within the N line of coast. Its present pop. is about 2,000. From the favourable nature of its situation for commercial purposes—the river being navigable for vessels of 400 tons up to the town—its maritime trade is very considerable, and is every day increasing. The chief exports from Launceston are wheat, bark, wool, and whale-oil. Of these £60,000 are shipped annually. The custom-house revenue of the port, for the quarter preceding July, 1832, amounted to about £12,000.—Elizabeth-Town is a very agreeable township, 22 m. from Hobart-Town, on the highest navigable point of the Derwent. It is a place of considerable traffic between the capital and the rich pasturage and village districts of the interior. Spring-bay on the E, and Port-Davey, and Macquarie harbour, on the W, afford shelter for vessels.

History.] More than 120 years elapsed before the discovery of Van Diemen's Land by Tasman was followed by any event of the slightest importance to its annals. Cook, as well as his companion Furneaux, in the course of their voyage of circumnavigation in 1773, and again in 1777, visited the shores of Van Diemen's Land without discovering its insularity. In 1803 it was formally taken possession of by the English; a small detachment under the command of Lieutenant Bowen, having arrived from Sydney, with a view of forming a penal settlement for convicts transported from that colony. Elsdon or Reddown, as it is sometimes called, on the E bank of the Derwent, a few miles up the river, was the spot selected for the settlement: but beyond this, little was effected at that time. Early in 1804, Lieutenant-governor Collins, who had recently left England with a considerable expedition, having in view the formation of a settlement at Port Phillip, on the southern coast of New Holland, altered his destination by reason of the insurmountable difficulties which then appeared to attend the establishment of a colony at that place, and arrived in the Derwent, when the island was formally taken possession of in the name of his Britannic majesty; and after various surveys of the Derwent, the present site of Hobart-Town was decided upon for head-quarters. Governor Collins was accompanied by several respectable gentlemen, to fill the various situations of his infant government, and had about 400 prisoners under him, with about 50 marines. In the

centre of the same year, a settlement was formed on the other side of the island, under the command of Colonel Paterson, of the 10th, who arrived from Sydney, and in the first instance, made choice of a spot beyond George-Town, calling it York-Town, but which was afterwards abandoned. After the island had been settled about three years, the first sheep and cattle were imported. Fresh arrivals of prisoners were constantly taking place from Sydney, and the colony continued to increase, although still preserving its original character of being a place of punishment for the convicted felons of New South Wales. In 1811, Lieutenant-Colonel Davey arrived as lieutenant-governor, and about this time the embryo importance and value of the colony began to be developed. Until this period all communication between Van Diemen's Land and other places, excepting England and New South Wales, had been interdicted by certain penalties upon merchant vessels that might attempt to enter the ports; but these were now done away with, and the colony placed precisely on the same footing with respect to commerce as New South Wales. The consequence of this and of other measures that were adopted about the same time, soon became obvious. The colony began to wear the appearance of an abode of Englishmen; and although emigrants from the mother-country had not yet directed their steps hither, what with the officers of different regiments who remained in the colony—with the number of individuals who had been brought here by government upon the evacuation of Norfolk Island, with occasional arrivals from New South Wales—and the crown prisoners who had become free either by servitude or indulgence, the pop. increased rapidly. Land was also more and more cultivated, houses were erected, farms enclosed; every thing, in short, assumed an improving aspect. About 1821, the tide of emigration set in from England towards Tasmania; and the natural consequence of the capital introduced was an extension of the colony within itself in every shape. Trade began to assume regularity; distilleries and breweries were erected; the Van Diemen's Land bank was established; and many other steps taken equally indicative of the progress the place was making. Originally a dependency of New South Wales, it now holds the rank of an independent colony.

VAN DIEMEN, a river of N. Australia, which flows into the gulf of Carpentaria, on the SE side, in 8 lat. 17°.

VAN DIEMEN GULF, a gulf formed by Melville island and Coburg peninsula and the continent of Australia, and entered by Dundas strait on the N, and by Clarence strait on the W. On the S it receives South Alligator river. It contains several islands.

VANDOEUVRE - EN - BRENNÉ, a village of France, in the dep. of the Indre, cant. and 8 m. SW of Buzançois. Pop. 1,050. It has an iron-work.

VANDOEUVRES, a commune of Switzerland, in the cant. of Geneva. It has important coal-mines.

VANDRILLE-RANCON (SAINT), a commune of France, in the dep. of the Seine-Inférieure, and cant. of Candebeac, 9 m. S of Yvetot. Pop. 1,008. It has a cotton-spinning mill.

VANDBURG, a town of Prussia, in the prov. of West Prussia, circle and 20 m. E of Flatow, on a lake of the same name, in which is an island with a castle. Pop. 1,000.

VANDSØE, a parish of Norway, in the diocese of Christiansand and bail. of Stavanger, on a peninsula. Pop. 5,000.

VANDY, a river of France, in the dep. of the Oise, formed by the confluence of two streams which have their sources in the dep. of the Aisne, and which, after a course of about 8 m., joins the Aisne, on the l. bank, at the foot of La Motte.

VAN DYKE (JOSEPH and LITTLE), two islands of the Antilles, in the group of the Virgin islands, to the NW of Tortola. The larger, which is 8 m. NW of Tortola, is 7 m. in length, and 2 m. in breadth.

VANG, a parish of Norway, in the diocese of Agderhus and bail. of Christian, on the Reims. Pop. 2,100.—Also a parish in the bail. of Hedemarken, 68 m. NNE of Christiania, on the NE bank of the Mjøsen-see. Pop. 5,110.

VANGE, a parish in Essex, 13 m. S of Chelmsford. Area 2,250 acres. Pop. in 1851, 164.

VANGEN, a parish of Norway, in the bail. of Jærsberg, on the Christiania-fiord, to the NE of Tonsberg.

VANGEROW, a village of Prussia, in the reg. of Koslin, and circle of Neustettin. Pop. 250.

VANIAMBADDY, a town of Hindostan, in the presidency and 120 m. WSW of Madras, and prov. of Salem and Barahmah, pleasantly situated in an island of the Palar. It is enclosed by an earthen wall, and has two celebrated Hindu temples.

VANIKORO, two islands in the South Pacific, in the archipelago of Santa Cruz, in 8 lat. 11° 40', and E long. 165° 50'. They are unequal in extent, are close together, and surrounded by immense reefs—penetrable by only a few intricate passages—upwards of 30 m. in circuit, containing some small islands, and extending nearly continuously to the archipelago of the New Hebrides on the S. Pop. 1,500. These islands rise to the height of about 3,114 ft. above sea-level, and are densely covered with wood. On the E side of the larger island is a bay, dividing the lesser V. into two parts, distinguished as Manevai and Tevai bays, within which is a basin sheltered on all sides from the storms which frequently break with violence on the reefs without. On the N is also another passage in which the remains of the vessels of La Perouse, wrecked forty years previously, were discovered by Dillon in 1827. The islands of V. are extremely insalubrious to Europeans. The aborigines belong to the black Oceanic race, are diminutive, squalid in appearance, and hostile in disposition to strangers. They wear in the ears strings of rings made of the tortoise-shell, and a feather passed through the cartilage of the nose. The bread-fruit, coconut, and fish form their chief articles of subsistence. These islands were named by Captain Edwards, by whom they were visited in 1791, Pitt islands; and subsequently from Dillon they received the appellation of La Perouse; by D'Entrecasteaux, in 1793, Recherche. The smaller islands of the group are named Manevai and Nanounha. Paion and Vanon are districts of the larger Vanikoro.

VANIKUM, a village of Prussia, in the regency of Dusseldorf, and circle of Reuss. Pop. 480.

VANITCHES, a town of Turkey in Europe, in the sanj. and 78 m. SE of Monastir, near the l. bank of the Indje-Carasu.

VANKLEEK-HILL, a village of Upper Canada, in the W part of the township of West Hawkesbury, 8 m. S of the Ottawa. Pop. 250.

VANNEN, an island of the Lofoden group, to the NE of Ringvadsøe, in N lat. 70° 10', and E long. 20° 5'. It is 18 m. in length from N to S, and 12 m. in breadth. Pop. 500.

VANNES, a river of France, which has its source a little to the E of Fontaines, in the dep. of the Aube, flows thence into that of the Yonne, and after a course of about 39 m., in a generally W direction, joins the river of that name, on the r. bank, a little above Sens. Its principal affluents are the Lancre, St. Mards, Pouy, and Vandeurs. Villeneuve-sur-Vannes is the chief place on its banks.

VANNES, an arrondissement, canton, commune, and town of France, in the dep. of the Morbihan. The arrond. comprises an area of 163,419 hect., and contains 10 cant. Pop. in 1831, 119,774; and in 1846, 129,816.—The cant. comprises 13 com. Pop. in 1831, 27,274; and in 1846, 31,280.—The town, which is also capital of the dep., is 72 m. NW of Nantes, and 336 m. WSW of Paris, near the N extremity of the small gulf of Morbihan, in N lat. 47° 39' 31", and W long. 7° 25' 41". Pop. in 1789, 8,814; in 1821, 11,289; in 1831, 10,395; and in 1846, 12,974. It is enclosed by two small rivers, one of which bears the same name, and forms at its mouth a small harbour. It has two suburbs, each larger in extent than the town. Of these, one named the Marche is

separated by walls, defended by strong towers and by a ditch. The other, distinguished as St. Paterne, contains a handsome church, a fine mall, and a general hospital. The town possesses a custom-house, a public library, a communal college and museum, a free school of navigation, a theatre, a house of correction, and two printing-establishments. It has also an agricultural society, a polymathic society for the promotion of science, literature, and the arts. It has manufactories of varieties of woolen, linen, and cotton fabrics, hats, and lace, several tan-mills, tanneries, and iron and copper-foundries. The trade consists chiefly in grain, salt, hemp, honey, wax, butter, tallow, cider, iron, wines of Bordeaux, &c. Vannes, from the number of its ruins, appears to have been the capital of the ancient *Veneziæ*. It was erected by its sovereigns, the dukes of Bretagne, into a county. The name signifies in the low vernacular Guenet, handsome. In the adjacent peninsula of Rhys is the ancient abbey of St. Gildas.

VANNES (LES), a group of islets of France, in the Atlantic, opposite the mouth of the Vilaine, in the dep. of the Morbihan.

VANOSC, or **VANOSC-EN-VANCANCE**, a commune of France, in the dep. of the Ardeche, cant. and 7 m. SW of Annonay. Pop. 1,660.

VANS (LES), a canton, commune, and town of France, in the dep. of the Ardeche. The cant. comprises 21 com. Pop. in 1831, 17,643; and in 1846, 20,165. The town is 15 m. SW of Largentiere, near the Chassezac. Pop. 2,240. It has manufactories of silk and several spinning-mills, and carries on an active trade in silk, woollen, and linen fabrics, grain, cattle, and chestnuts. Wine, mulberries, olives, and chestnuts are cultivated in the vicinity.

VANSITTART-BAY, an indentation of the NW coast of Australia, to the E of Cape Bougainville, by which it is separated from Admiralty gulf. It is 30 m. in depth from N to S, and 27 m. in extreme breadth. Its shores present extreme irregularity of outline, and the mouth is studded with islands.

VANSITTART-HILLS, a range of hills in New South Wales, in the district of Liverpool Plains, running from E to W along the S side of Gorko river, to its confluence with Bowen river.

VANTSIOEGUTSROER, a lake of Sweden, in the prefecture of Stora-Kopparberg. It gives rise to the Eastern Dal-elv.

VANVES, or **VANVESA**, a commune of France, in the dep. of the Seine, cant. and 4 m. N of Sceaux, and 2 m. SW of the walls of Paris. Pop. 2,506. It has a lunatic asylum, and possesses manufactories of locks, extensive bleacheries, and quarries of free-stone. In the vicinity is an ancient castle belonging to the Prince-de-Conde.

VANVEY, a town of France, in the dep. of the Cote-d'Or, cant. and 8 m. ESE of Châtillon-sur-Seine, on the Ource. Pop. 795.

VAN-WERT, a county in the NW part of the state of Ohio, U. S., drained by St. Mary's and Little Anglaize rivers, and other small streams, and intersected by the Ohio and Indiana railway, the Miami canal, &c. It has a level surface, but is generally fertile. Pop. in 1840, 1,580; in 1850, 4,794.—The chief village, which bears the same name, is 105 m. NW by W of Columbus. Pop. 270.

VANXAINS, a commune of France, in the dep. of the Dordogne and cant. of Ribérac. Pop. 2,010.

VANZAY, a village of France, in the dep. of the Deux-Sevres, 5 m. SE of Chenay. Pop. 350.

VANZE, a town of Naples, in the prov. and 9 m. E of Lecce, and cant. of Vernole, in a low and unhealthy situation. Pop. 200.

VAOUR, a canton and commune of France, in the dep. of the Tarn, and arrond. of Gaillac. The cant. comprises 10 com. Pop. in 1831, 5,919; in 1846, 5,872.—The town is 14 m. NNW of Gaillac, on the most elevated point of the ridge which separates the valleys of the Tarn and Aveyron. Pop. 600. It has a fine castle.

VAPIXANA, a tribe of Indians, who inhabit the N part of Brazilian Guayana, near the confines of the British possessions.

VAPNA-FIORD, a harbour of Iceland, on the E coast, in N lat. 65° 40'. It receives the river Hof on the W side.

VAPRIO, a market-town of Sardinia, in the div. and prov. and 12 m. NNW of Novara, and mande. of Momo. Pop. 6,000. It has extensive paper-mills. A sanguinary engagement took place here in 1824 between the Guelphs and Ghibelines, in which the former were defeated.—Also a market-town of Austrian Lombardy, in the gov. and delegation of Milan, district and 7 m. NE of Gorgonzola, on the Martesana canal, and r. bank of the Adda. Pop. 1,880. It has a large paper-mill.

VAR, or **VARO**, a river which has its source in the Alps, in France, in the dep. of the Basses-Alpes, 9 m. E of Colmar. After running a few leagues, it enters the kingdom of Sardinia; forms afterwards for some distance the line of separation between the div. of Nice and the French dep. of the Var; and after a total course of about 78 m., throws itself into the Mediterranean near St. Laurent-du-Var. It flows first S to Entrevaux, then E to the confluence of the Tinea, and afterwards S. Timber is its chief article of transit. Its principal affluents are the Colon and the Esteron in France, and the Tinea and the Vesubia in Sardinia. The V. in the lower part of its course forms numerous islands. It is liable in spring to extensive floods, and is remarkable for the frequency with which it changes its bed. In summer it is reduced to an insignificant stream.

VAR, a department of France, forming the SE extremity of the kingdom; and bounded on the N by the dep. of Basses-Alpes; on the NE by Piedmont; on the E and S by the Mediterranean; and on the W by the dep. of Bouches-du-Rhone. It has an area of 2,800 sq. m. Branches of the Alps extend into the N and NE of this dep.; so that it is in general rugged and uneven, the only extensive plains being along the coast, which is penetrated by several deep bays. The rivers descending from the mountains are the Var, Verdon, Esteron, and Argens, with a number of smaller streams. The climate varies according to elevation, being in some parts, especially under a NW wind, bleak even in this southern latitude; while in others it is mild and warm; but in several districts of the lower grounds, and in the vicinity of the lagunes on the coast, the air is infected by stagnant water. The soil is in many parts dry and stony, in others, such as on the banks of the Var, and the vicinity of the town of Grasse, it is more productive. Not above a sixth of the surface is arable, and the corn raised is not equal to the consumption. Wine, brandy, and vinegar are made in considerable quantities from the grape, the culture of which occupies a twelfth of the surface. Dried fruits, cork, and silk, are likewise exported. The pastures are good in particular spots, where the command of water makes up for the infrequency of rain. The animals chiefly reared are sheep, goats, and asses; the sheep are sent in summer to mountain-pasture. Honey and wax are exported. Of minerals, in whatever variety they may exist, hardly any have been worked except coals and a little iron and lead. The manufactures are of insignificant amount; the chief articles

are silk, paper, leather, and coarse woollens. The fisheries along the coast are considerable.—The pop. in 1846 was 349,859; in 1852, 357,967. The common language is a dialect composed of French, with a mixture of Italian.—This department forms part of the ancient Provence. It contains no town of consequence except Toulon. It is subject to the royal court of Aix, and is divided into the 4 arrondissements of Toulon, Brignolles, Grasse, and Draguignan. The last, though a small place, is, from its central situation, the capital of the dep. It is subdivided into 35 cantons, and 202 communes.

VARA (Pico), a mountain of the Azores, near the E extremity of the island of San-Michael. It has an alt. of 5,000 ft. above sea-level, and is occasionally capped for a short period with snow. This peak terminates the chain of craters which extends to the centre of the island.

VARAD, a market-town of Hungary, in the comitat of Schemegh, on the l. bank of the Okor, 6 m. SE of Istvándi. It has a saltpetre factory.

VARA-DE-REY, a market-town of Spain, in the prov. of Cuenca, 6 m. E of San-Clamente, in a fertile plain. Pop. 1,690.

VARADES, a canton, commune, and town of France, in the dep. of the Loire-Inferieure, and arrond. of Ancenis. The cant. comprises 5 com. Pop. in 1831, 10,766; in 1846, 10,247.—The town is 8 m. E of Ancenis, near the r. bank of the Loire. Pop. 3,483. It has a glass-work, and carries on an active trade in wine and timber, both the produce of the locality. About 3 m. N of the town are the coal-mines of Montrelais.

VARADIN. See **VARDEIN** (Gross).

VARADOURO, a port of Brazil, in the prov. of Parahiba, on the river and to the E of the town of that name.—Also a river of the prov. of São-Paulo, which flows through the districts of Cananea and Paranaíba, and joins the Ararapira.

VARAGES, a commune of France, in the dep. of the Var, and cant. of Barjols, 21 m. NW of Brignoles. Pop. 1,478. It has manufactories of china. Oil of fine quality is cultivated in the locality.

VARAGGIO, or **VARAZZE**, a town of Sardinia, in the prov. and 6 m. NE of Savona, on the gulf of Genoa, on which it has a small port. Pop. 1,800. The manufacture of anchors and boatbuilding form the chief objects of local industry.

VARAIGNES, a village of France, in the dep. of the Dordogne, and cant. of Bussière-Badil, on an affluent of the Bandiat. Pop. 1,008. In the vicinity are mines of iron and antimony.

VARATZE, a village of France, in the dep. of the Charente-Inferieure, cant. and 4 m. ESE of St. Jean-d'Angely. Pop. 710.

VARALLO, a town of Sardinia, capital of the prov. of Val-Sesia, on the l. bank of the Sesia, and 36 m. NW of Novara. Pop. 3,300. It has an hospital, a gymnasium, and a communal college, and contains brass-foundries, and manufactories of iron and copper from the mines in the adjacent mountains. On a mountain in the vicinity is a church, containing 52 chapels, and an image of the virgin which attracts numerous votaries.

VARALLYA (Znio), or **KLOSTER-KUHORN**, a town of Hungary, in the com. of Thurots, near the r. bank of the Vricza, and 20 m. NNW of Körömcz-Banya. To the W is the castle of Znio.

VARAMBON, a village of France, in the dep. of the Ain, cant. and 2 m. from Pont-d'Ain. Pop. 500. It was formerly a town, and possessed a fortress which was destroyed in 1451. It was erected into a marquise in 1576.

VARANACO, a small river of New Granada, in the prov. of San-Juan-de-los-Llanos, which rises

near the source of the Paucana, and runs in an easterly course to the Orinoco.

VARANGER-FIORD, a gulf of Norway, in the diocese of Nordland, and E part of Finnmark, in N lat. 70° and E long. 30° 20'. It is 6 m. in length from E to W, and about 15 m. in medium breadth. It receives the Palsjoki, which falls into one of its small bays distinguished as the Pasvig-fiord.

VARANGEVILLE-LES-DEUX- EGLISES, a village of France, in the dep. of the Seine-Inferieure, cant. and 3 m. NE of Duclair. Pop. 300. It has paper-mills, and in the vicinity are mines of coal.

VARANGEVILLE-SUR-MER, a village of France, in the dep. of the Seine-Inferieure, cant. and 5 m. NW of Offranville, on the English channel. Pop. 1,200.

VARANGUEBEC, a village of France, in the dep. of Manche, cant. and 4 m. NE of La-Haye-du-Puits.

VARANO, a small lagoon in the E of the kingdom of Naples, in the Capitanata, near Monte-Gargano. It is about 20 m. in circuit, and discharges itself into the Mediterranean by a small stream on the NE.

VARANO, or **WRANO**, a town of Hungary, 53 m. N of Tokay. Pop. 1,500.

VARAPODIO, a market-town of Naples, in the prov. of Calabria-Ultra, 10 m. SE of Gioja. Pop. 1,200. It was devastated by an earthquake in 1783.

VARAYRE, a village of France, in the dep. of Lot, cant. and 3 m. SW of Limogne.

VARAZZE. See **VARAGGIO**.

VARBERG, a port of Sweden, in the laen and 86 m. NW of Halmstadt, in N lat. 57° 6'. Pop. 1,700.

VARDA, or **KIE-VARDA**, a town of Hungary, on the Theiss, 53 m. N by E of Debrecin.

VARDAC, a town of France, dep. of Lot-et-Garonne, on the small river Bayse, with 1,400 inhabitants. The cork forests of the neighbourhood supply an object of manufacture to the inhabitants.

VARDAR, a large river of European Turkey, the *Axius* of the ancients, which rises on the E flank of the Tchar-dagh; flows from NW to S through Macedonia, passing Uskup and Koprili; and empties itself into the gulf of Salonika, 10 m. W by S of Salonika, after a course of 170 m.

VARDE, a village of Denmark, in the prov. of Jutland, on the r. bank of a stream of the same name, near its embouchure in the gulf of Hierting.

VARDOC, an island of Norway, in N lat. 70° 21', E long. 31° 10'.

VAREL, a town of Germany, in the grand-duchy of Oldenburg, near the mouth of the Hase or Jahde, in N lat. 53° 24', 17 m. N of Oldenburg, and 85 m. NW of Bremen. Pop. 3,200.

VARELA (Point), or **CAPE MUINA**, the easternmost point of Annam, in N lat. 12° 58', E long. 109° 24'. It forms the extremity of a narrow sandy peninsula.

VARELLA (Pulo), an island off the NE coast of Sumatra, in N lat. 8° 47', about 10 m. from Jabong-point.—Also an islet off the E coast of the peninsula of Malacca, in N lat. 3° 16'.

VARENHOLZ, a village of the German principality of Lippe-Deimold. Pop. 690.

VARENNA, a town of Austrian Italy, situated on the E side of the lake of Como, 30 m. N by E of Milan.

VARENNES-SUR-ALLIER, a town of France, on the river Allier, 14 m. WNW of La Palisse, on the Valaçon, an affluent of the Allier. Pop. 2,296.

VARENNES-EN-ARGONNE, a town of France, dep. of the Meuse, on the river Aire, 18 m. NW of Verdun. Pop. 1,600. It has manufactures of leather and paper; but is chiefly remarkable as the place where Louis XVI. was stopped in his flight from

Paris in June 1791.—Also a small town in the dep. of Haute-Marne, 14 m. NE of Langres.

VARNES-SOUS-DUN, a commune and village of France, in the dep. of Saône-et-Loir, 1 m. E of La Clayette.

VARENSELL, a village of Prussia, in the reg. of Minden, circle of Weidenbrück. Pop. 1,200.

VARENT (SAINT), a town of France, dep. of Deux-Sevres, on the small river Thouaret, 14 m. E of Bressuire. Pop. 735.

VARESE, a town of Austrian Italy, in the gov. of Milan, situated on the small river Verbano, 13 m. W of Como, near a lake. It has about 8,500 inhabitants, who cultivate and manufacture silk. In its vicinity are a number of villas belonging to Milan families, and an elegant modern palace situated on an eminence, and surrounded by pleasant gardens and fountains.—The lake of Varese is a fine expanse of water, of an oblong form, about 6 m. in length from NW to SE, having its banks covered with luxuriant vegetation. Its elevation above the level of the Adriatic is 286 metres—774 ft.

VARGEL, or GREAT VARGULA, a town of Prussian Saxony, on the Unstrut, 14 m. NW of Erfurt. Pop. 1,000.

VARGEM-FORMOSA, a village of Brazil, in the prov. of Mato-Grosso, 28 m. W of Cuiaba.

VARGO, an island in the gulf of Bothnia, in N lat. 62° 59', E long. 21° 3'.

VARHELY, a village of Hungary, in the com. of Hunyad, 8 m. WSW of Hatziq.

VARICK, a township and village of Seville co., in the state of New York, U. S., 160 m. W of Albany. Pop. 1,872.

VARIETY, a village of Nelson co., Virginia, U. S., 85 m. W by N of Richmond.

VARIGNANO, a town of the States of the Church, deleg. and 12 m. SE of Bologna. Pop. 3,100.

VARILHES, a town of France, situated on the Arriege, 6 m. S of Pamiers, and 6 m. N of Foix. Pop. 1,700.

VARIN, a town of Hungary, in the com. and 45 m. NE of Trentsin, near the Waag.

VARINAS, a prov. of Venezuela, bounded on the N by the prov. of Maracaybo; on the E by the plains of Caracas and the Orinoco; on the S by Arhaguas; and on the W by Merida. Pop. 109,497. Its chief products are tobacco, well known in the European markets; cattle, sheep, mules, sugar, coffee, cotton, indigo, and all the fruits of the torrid zone. The produce is exported chiefly by water to Guayana; the place of embarkation being at a spot called Tocunos, 5 leagues below the cap. The most remarkable features of this country are the extensive plains of which it is composed, and which are covered with a luxuriant herbage, feeding innumerable herds of cattle, flocks of sheep, and droves of mules and horses.—The capital of the prov., of the same name, is situated about 800 m. SE of Caracas. It is a little place; but the public edifices are reduced to one parish-church and an hospital. Pop. 12,000.

VARIRIN, a river of Brazil, in the prov. of Seara, which rises from the mountains in the interior, and enters the Parana.

VARKENY, a village of Hungary, in the com. of Borsod. Pop. 1,100.

VARLOSEN, a village of Hanover, in the reg. of Minden, near Dransfeld. Pop. 425.

VARNA, a town of European Turkey, in the sanj. of Silistria, in Bulgaria, situated on the N side of a bay on the SW coast of the Black sea, at the mouth of the river Varna, opposite Galata, in N lat. 43° 12' 17", E long. 27° 56' 31", 14 hours' sailing distance from Constantinople. The semicircular

bay of V. which is about 1½ m. in length, and 2 m. across, shoals up to the beach at the apex of the semicircle formed by its shores, and the land is so low at that point that the fresh waters from the neighbouring hills form the Devna lakes, which extend in a SW direction for 7 or 8 m., with a breadth of from 2 to 3 m. towards Shumla. V. is built on a slightly elevated bank of sand, of such varying height that, in some places, the base of the walls around it is on the level of the water, and at others 20 or 30 ft. above it. Below this bank a series of plains spread all round the landward side of the town, till they are lost in the hills which, dipping into the sea in an abrupt promontory on the NE side, rise in terraces to the height of 700 or 800 ft., at the distance of 3 m. from the walls, and trend westwards to meet the corresponding chain of hills on the S extremity of the bay, thus enclosing the lake and plains in a sort of natural wall, which is, like all the rest of the country, covered with brushwood and small trees. A stone wall 10 ft. high, painted white and loop-holed, is built all around the place, so as to enclose a large irregular four-sided figure, each side of which averages 1½ m. in length, and some detached batteries, well provided with heavy guns, chiefly 68-pounders, are erected in advance of the walls on the land side. On the sea-face are four batteries, provided with heavy guns also, and at every favourable spot bastions have been thrown out. A ditch, 18 ft. wide by 12 ft. deep, further protects the *enceinte*. There are 5 gates in the exterior wall. Peering above these walls, in an irregular jumble of red-tiled roofs, are seen the houses of the place, with a few minarets towering from the mosques above them. The angles of the works are irregular, but in most instances the walls are so constructed as to admit of a fair amount of flanking fire on an assailing force. Nevertheless, the bank on which the town is built is so uneven, that a portion of the inner side of the walls could be swept from a fleet in the bay, and other parts are equally accessible to the fire of batteries on the trifling hillocks around the town. The houses of the town, about 3,000 in number, are chiefly built of wood, painted white, blue, brown, saffron, and yellow; but, for the most part, they exhibit little of the brightness of the original colouring, and the roofings of broken red tile, combined with the general dilapidated look of the plank sheathings of the side-walls, give the whole place an appearance of decay, which is not much belied by the interiors of the habitations. The houses, with few exceptions, present nothing but a door and a low gable-wall towards the street. Generally, they look out on a courtyard provided with some sheds, a well, and as many flowers and trees as can force their way through the hardened earthen floor of the enclosure. A high stone wall shuts out each mansion from its neighbour, and the doors, which perforce must open on the street, are shut the instant the occasion for their opening ceases. "Thus," says the graphic pen which has furnished the greater part of the present article, "as you wander through hot lanes presenting one eternal blank of stone walls and unpainted doorways, topped by tiled gables, and hear no sound within, except the wailing of an infant, the sharp cry of the kite soaring overhead, or the growl of the dog half-awakened by your step as he basks in the middle of the narrow path, you might think the place stricken by the plague and destitute of life, but that now and then a door opens and a pile of red or yellow or bright blue cloth, surmounted by the white folds of the *yashmak*, and terminating in light yellow boots, emerges, and at your presence rushes in again, or takes a precipitate motion across

the street and dashes in at an opposite door, or a ragged porter with a water-jar, shuffles along and eyes the infidel sullenly as he goes by. In the heat of the mid-day, when the sun blazes down into those straitened streets, the silence is absolutely oppressive, and it is a relief to hear the twitting song of the swallow as he clings to the roof. V., nevertheless, contains 13,000 or 14,000 inhabitants, chiefly Bulgarians. The garrison is generally 5,000. There is more bustle, animation, and life in the smallest hamlet in Dorsetshire than here, unless you go down to the landing-place, or visit the bazaar, where the inhabitants flock for work or business. Towards evening there are more people moving about, and the *muezzin* breaks the silence with his shrill and boylike voice." The town contains four mosques, three Greek churches, and one Armenian church. There are numerous and abundant fountains within the walls. There are three small jetties of wood opposite the principal gate of the town; and a beach of a few yards broad between the sea and the foot of the walls serves as a landing-place for lighter boats. The roadstead of V. is spacious, with good holding-ground, and well-protected from S. W. and N winds, but is open and exposed to the E. In spite of this, from the growing importance of V. as the principal port of Bulgaria and the readiest point of connexion with central Europe, it has been surveyed for its capacities both as a commercial port and as a naval arsenal. Not only is it the natural point for the concentration of the defensive resources for the protection of the eastern shore of Turkey in Europe, but, if a railway be carried out to Shumla and Rustchuk, V. must become a city of the first importance both for goods and passenger traffic. Two projects are, therefore, now on the tapis for improving this port: one is the construction of a couple of breakwaters on the sunk ledges of rocks in prolongation of the bluff cape to the south, and the shallows to the north of the roadstead; but this would involve a vast expense, and after all leave too large a space open to the easterly gales. The other project is to form the lower lake of Devna into a harbour. This lake is 60 ft. deep in the middle; and the isthmus between it and the sea is a flat of land a little raised above the level of either, but not exceeding a $\frac{1}{2}$ m. in breadth. Thus a ship-canal of a few hundred yards would open a capacious basin for the largest warlike or mercantile navy, and at the same time a secure arsenal for the construction, repair, and armament of a fleet. The direct high road to Silistria strikes off close to V. through the mountains which run parallel to the lakes of Devna or Devne; and the lower or summer-road to Paravati skirts the N shore of the lakes. Austrian steamers generally put in twice a-week at this place on their passage to and from Constantinople and Galatz. In 1847, the value of exports from V., chiefly corn, timber, charcoal, eggs, and fowls, was £600,000.—In 1828, this place was captured by the Russians, who directed their main attack upon it from the N. In August 1854, it was devastated by fire, the work probably of a Russian incendiary. In the same year, the great military expedition of the Allies sailed from this place to disembark on the Crimea.

VARNA, a village of Tompkins co., in the state of New York, U. S., 140 m. W by S of Albany, on Fall creek. Pop. in 1850, about 200.

VARNAVIN, a town of Russia in Europe, in the gov. and 168 m. ESE of Kostroma, in a district of the same name, on the Vetluga. Pop. 668. The houses are built of wood. The trade consists chiefly in pitch, woodware, and mats.

VARNEVILLE-AUX-GRIS, a village of France,

in the dep. of the Seine-Inferieure, cant. and 2 m. S of Totes. Pop. 339. In the vicinity are the extensive freestone quarries from which the village takes its name.

VARNHAGEN, a village of the principality of Waldeck and bail. of Eder, on a river of that name, a little to the SW of Waldeck.

VARNHALT, a village of Baden, in the circle of the Middle Rhine, and bail. of Buhl. Pop. 660.

VARNHOVEL, a parish of Prussia, in the reg. of Munster, circle of Ludinghausen. Pop. 280.

VAROCHI, a town of Greece, in the Morea, near the E coast of the gulf of Coron, and 12 m. SE of Calamata. Pop. 450. It is the residence of a bishop.

VAROE, an island of Norway, in the Loffoden archipelago, to the N of the Maelstrom.

VAROKH, a village of Turkey in Europe, in Albania, in the pash. and 30 m. NW of Uskup, and near the S base of the Tcha-Dagh.

VARONNE, a village of Switzerland, in the cant. of Valais, bail. and $1\frac{1}{2}$ m. NW of Leuk, about the same distance NNW of the confluence of the Dola with the Rhnie. Pop. 413.

VAROSCH, a market-town of Turkey in Europe, in Bosnia, in the sanj. of Trawnik, 15 m. N of Bosna-Seral, on the r. bank of the Sondica. In the vicinity are several mines and forges.

VAROUNDAS, a people of Africa, who inhabit the territory of Moro-Pooa, to the E of Lower Guinea. They cultivate maize and manioc.

VARRAIGNES. See VARAIGNES.

VARREL, a village of Hanover, in the bail. of Ehrenburg. Pop. 770.—Also a village of the duchy of Oldenburg and bail. of Delmenhorst. Pop. 840.

VARRIGSEN, a village of Brunswick, in the circle of Wolfenbittel. Pop. 200.

VARRONE, a mountain of Austria, in Lombardy, on the confines of the provinces of Como and Bergamo, in N lat. $46^{\circ} 0' 25''$, and E long. $9^{\circ} 31' 38''$.

VARIS, a commune and town of France, in the dep. of the Charente, and cant. of Saint-Amant-de-Brixe, on the l. bank of the Charente. Pop. 1,987. The locality affords good wine.

VARTOFTA, a haerd of Sweden, in the prefecture of Skaraborg, bathed by Lake Vetter.

VARTREY, a rivulet of co. Wicklow, which rises on the S side of Douce mountain, at an elevation of upwards of 1,030 ft. above sea-level; and flows to the head of the long estuarial belt of water which bounds the W side of the Murrough.

VARTSALA, an island of the Baltic, off the SW coast of Finland, in the archipelago of Abo, in N lat. $60^{\circ} 30'$, and E long. $21^{\circ} 14'$.

VARU. See BARU.

VARYSBURG, a village of Wyoming co., in the state of New York, U. S., on the E side of the head branch of Tonawanda creek, 236 m. W of Albany. Pop. in 1850, about 250.

VARZEA, a valley of Brazil, in the prov. of Rio-Grande-do-Norte, and district of Villa-da-Princesa.

VARZEA-DAS-BAIZES, a village and fertile valley of Brazil, in the prov. of Santa-Catherina, watered by the Tubarao.

VARZEA-DE-VACA, a village of Brazil, in the prov. of Ceara, and district of Villa-do-Principe.

VARZI, a market-town of the duchy and 30 m. SW of Parma, in the district of Borgotaro, near the r. bank of the Zeno, and at the foot of a hill. Pop. 1,488.

—Also a town of Sardinia, capital of a mandemento, in the prov. and 11 m. NW of Bobbio, on the r. bank of the Staffora. Pop. 1,598.

VARZY, a canton, commune, and town of France, in the dep. of the Nievre, and arrond. of Clamecy. The cant. comprises 12 com. Pop. in 1831, 12,048; in 1846, 13,472.—The town is 11 m. SW of Clamecy,

at the foot of a mountain covered with vines, and watered by a stream of the same name, an affluent of the Sozay. Pop. 3,132. It has a college and an hospital, and possesses extensive manufactories of linen and of leather. This town was formerly defended by a fortress, and sustained several sieges. It was taken by the Protestants in 1590.

VAS, a village of Brazil, in the prov. of Rio-Janeiro, a short distance N of Villa-do-Principe.

VASA, or WASA, a port of Russian Finland, in the district of Sodra-Korsholm, on a small bay in the gulf of Bothnia, in N lat. 63° 4' 20", 850 m. NW of St. Petersburg. Pop. 2,700. It carries on an active trade in timber, fish, pitch, and leather. In August 1852, this town, founded in 1611, was burnt down, and a new town has been begun at a short distance from the original site, which is in future to bear the name of Nicolaistad.

VASARHELY (HON-MEZŐ), a town of Hungary, in the com. of Csongrad, on the lake of Hold. Pop. 25,600, a number not frequently found collected in this agricultural country. They are for the most part Calvinists, and their chief employment is the culture of tobacco and wine.

VASARHELY (KESZI), a town of Austria, in the Ssekler-Land, NW of Kronstadt, in N lat. 46° 30'. Pop. 4,850.

VASARHELY (SOMLYO), a town of Hungary, on the river Torna, 73 m. S by E of Presburg.

VASARUT, a town of Hungary, in the island of Schütt, formed by the Danube. Pop. 1,000.

VASBECK, a village of the German principality of Waldeck, bail. of Arolsen. Pop. 470.

VASCONAS, or PROVINCIAS VASCONGADAS, a general term for the three Spanish provinces of Biscay, Guipuscoa, and Alava. See BISCAY.

VASE, a river of North America which empties into the Mississippi, 3 m. below the Great Rock, and about 55 m. NW by N of the mouth of the Ohio. It is navigable about 60 m., through a rich country abounding in extensive natural meadows.

VASEUX, a river of the state of Illinois, U. S., which rises between the Kaskaskia and the Little Water rivers, and, flowing nearly parallel to the former, falls into the Mississippi some distance above Cape Girardeau.

VASHON'S ISLAND, an island near the W coast of America, at the bottom of Admiralty inlet, in N lat. 47° 10'.

VASIETTA, a river of America, which runs into Lake Michigan, in N lat. 44° 38'.

VASIL, or VASIL-SURSK, a town of European Russia, near the confluence of the Sura and the Volga, 87 m. ESE of Nijni-Novgorod. Pop. 1,600.

VASILIKA, or BASILICA, a village of the Morea, about 9 m. WNW of Corinth, situated on the angle of a rocky ascent, on the site of the ancient *Steyon*, in N lat. 37° 59'.

VASILKOV, a town of European Russia, in the gov. of Kiev, on the banks of the Stugna, 24 m. SSW of Kiev.

VASINGAN, a river of Asiatic Russia, which joins the Obi, 30 m. below Naryn, after an ENE course of 170 m.

VASKUT, a village of Austrian Galicia, in the Bukowina, near the river Cseremos. Here is kept a large stud of Tartar horses for the Austrian army.

VASLES, a town of France, in the dep. of Deux-Sevres, cant. and 6 m. NNE of Menigoutte. Pop. 2,200.

VAS-MARTIN, an island of the Atlantic, in S lat. 20°, to the SW of Picos. It is desert, and covered with thick woods.

VASONY, a town of Hungary, in the com. and near the town of Veszprim. Pop. 1,800.

VASPINGE, a town of Persia, in Azerdibjan, about 9 m. from Tauris.

VASQUEZ, a settlement of the island of Cuba, 66 m. NW of Villa-del-Principe.—Also an island in the S. Pacific, in S lat. 24° 44'.—Also a river of Nicaragua, which flows into the Caribbean sea, a little to the N of Cartago.

VASSALBOROUGH, a township of Kennebec, co. Maine, U. S., on the E side of the Kennebec, 8 m. N by E of Augusta. Pop. 3,100.

VASSELAY, a town of France, in the dep. of Cher, cant. and 7 m. SW of Meneton. Pop. 1,000.

VASSEROLLE (COL-DE-LA), a pass between the French deps. of Ain and Jura, having an alt. of 3,480 French ft. above the lake of Geneva.

VASSOUVAR, a district and village of Brazil, in the prov. of Rio-de-Janeiro, intersected by the Patodo-Alferes, an affluent of the Parahiba.

VASSY, a town of France, dep. of Haute-Marne, 12 m. NW of Joinville. Pop. 2,600, employed partly in the manufacture of woollens. It is a well-built place; and has a considerable trade.—Also a town of France, dep. of Calvados, 12 m. NE of Vire. Pop. 3,150.

VAST (LE), a town and commune of France, in the dep. of Manche, cant. and 4 m. SE of St. Pierre-Eglise, near the Seine. Pop. 2,500. There are cotton and spinning-mills here.

VASTAN, a town of Armenia, on the SE coast of the lake of Van, 20 m. SW of Van.

VASTO (IL), or VASTO d'AMMONA, a town of Naples, in Abruzzo-Citra, on the coast of the Adriatic, in N lat. 47° 7', 18 m. WNW of Termoli. Pop. 9,000. It is walled, and well-built. It was severely damaged by an earthquake in 1706; and in 1816, the ground giving way, many of the buildings sunk suddenly into the earth and nearly disappeared. Its pop. before this dreadful calamity was about 5,000. An active fishery is conducted from this place.

VASTO-GIRARDO, a town of Naples, in the prov. of Sannio, 15 m. NNE of Isernia.

VATAN, a town of France, dep. of the Indre, 14 m. NW of Issoudun. Pop. 2,000.

VATHI, a small port and the chief place of the island of Theaki or Ithaca, in the Ionian group. It is situated at the extremity of a spacious bay, and contains 1,800 inhabitants.—Also a port on the N coast of the Greek island of Samos, containing about 500 houses, the inhabitants of which support themselves by fishing, and by the export of a good wine produced in the neighbourhood.

VATICANO (CAPA), a cape on the W coast of Naples, in the prov. of Calabria-Ultra 2da, in N lat. 38° 37'.

VATISA. See FATSA.

VATTETOT-SUR-MER, a village of France, in the dep. of Seine-Inferieure, 18 m. N of Havre. Pop. 800.

VATTEVILLE-LA-RUE, a village of France, in the dep. of Seine-Inferieure, 10 m. NE of Yvetot.

VATU-LELO, one of the Fiji islands, in S lat. 18° 30'.

VATU-MANDRE, a town on the E coast of Madagascar, in S lat. 19° 40', at the mouth of a small river of the same name.

VAUBE'COURT, a town of France, dep. of Meuse, on the l. bank of the Aime, 12 m. N of Bar. Pop. 1,270.

VAUCE, a village of France, in the dep. and 12 m. NNE of Mayenne. Pop. 1,700.

VAUCHRETIEN, a village of France, in the dep. of Maine-et-Loire, cant. and 5 m. NE of Thouarce. Pop. 1,200.

VAUCLUSE, a department of France, between the parallels of 43° 35' and 44° 25' N; bounded on

the N by the dep. of Drome; on the E by that of Basses-Alpes; on the S by that of the Bouches-du-Rhone; and on the W by the dep. of Gard. Area 1,328 sq. m. Pop. in 1841, 251,080; in 1852, 264,618. Its surface in the NE is mountainous, being traversed by branches of the Alps, some of which, such as Monts Ventoux, Lure, and Lebéron, rise to a considerable elevation. The W section consists of a broad valley extending along the Rhone. The principal rivers are the Rhone and the Durance. The former receives the Aignes and the Sorgues; the latter, the Cavallon. The soil is rich in the low grounds; in the mountains it is stony and unproductive. About one-half of the surface is arable. The climate is warm and suitable to the culture of fruit, silk, olives, vines, maize, and wheat. To pasturage, from deficiency of moisture, it is less favourable, and the cattle are in general of a diminutive breed. The manufactures consist of silk-stuffs, velvet, woollen cloths, and, on a small scale, linen, leather, paper, and vegetable essences. The dep. belongs to the diocese of Avignon, and to the jurisdiction of the court of Nîmes. It is divided into the 4 arrondissements of Avignon, the capital, Orange, Carpentras, and Apt, which are subdivided into 22 cantons, and 149 communes.

VAUCLUSE, a village and remarkable fountain in the SE of France, which gives name to the above dep. The village is romantically situated on the r. bank of the Sorgues, 15 m. E of Avignon, at an alt. of 107 metres = 351 ft. above sea-level. Pop. 455. The fountain, which issues from an immense cavern overhung and surrounded by huge rocks and mountains, 1 m. E of the village, is remarkable chiefly for the quantity of water discharged, which forms at once a river, the Sorgues, an affluent of the Nesque, capable of driving mills and bearing boats. In summer, and during dry seasons, its waters issue tranquilly from a vast basin of a semicircular form; but in spring, and after heavy falls of rain, they overflow the basin, and precipitate themselves over huge fragments of rock in a number of cascades. The valley of the V. is extremely narrow, bounded by high rocks of a brownish grey tint, relieved by a sprinkling of olive and fig trees. This fountain, the *VALCHUTRA* of the Italians, is celebrated for the ill-fated loves of Petrarch and Laura, whose residence was in the vicinity.

VAUCOULEURS, a town of France, dep. of the Meuse, situated on the declivity of a hill on the l. bank of the river Meuse, 14 m. SE of Commercy. Pop. 2,600. It has considerable cotton factories.

VAUD (PAYE-DE), WAADT, or WAADTLAND, a canton of Switzerland, bounded on the N by the cant. and lake of Neuchâtel; on the E by the cant. of Friburg; on the S by the lake of Geneva; on the W by France. Its superficial extent is nearly 1,180 sq. m. It is in general less mountainous than most other parts of Switzerland, consisting of beautiful valleys and plains intersected by small cultivated hills. The ridge of the Jorat forms the dividing line in this cant. between the basin of the Rhine and that of the Rhone. The principal rivers are the Rhone, the Orbe, and the Broye. The tract bordering on the lake of Geneva, in particular, may be ranked among the most beautiful districts in Europe. The valleys and plains are appropriated to the culture of corn; the eminences and hills, to that of vines. The climate, comparatively mild in the W of the canton, becomes colder towards the E, from its vicinity to mountains. Part of the arable ground is applied to the culture of hemp and flax; other districts to pasturage, plantations, and orchard grounds. The mineral products are iron, salt, coal, lead, sulphur, and gypsum. The chief exports are wine, cattle,

leather, filberts, walnuts, chestnuts, and cheese.—The pop. in 1852 was 199,585, being an increase of 15,968 since 1837. Of the pop. in 1852, 5,293 were returned as foreigners; 6,962 as Roman Catholics; and 888 as Jews. The inhabitants are mostly strict Calvinists, and remarkable for the careful education given to their youth. Geneva is in the vicinity; and the chief town of the cant. Lausanne has a seminary for theological study. At another of its towns, Yverdon, is the well-known institution founded by Pestalozzi. The current language is French, spoken with purity in the towns, but only as a dialect in the country. The chief towns are Lausanne, with a pop. of 14,500; Vevey, with 5,201; Yverdon, with 3,619; Morges, with 3,941.—After the decline of the Roman empire, the Pays-de-Vaud formed a part of the kingdom of Burgundy, and was afterwards annexed to Savoy. It was conquered by the Swiss, and was annexed to that country as a dependency of the canton of Berne; but was acknowledged as a separate canton in 1803 and 1814. Its government is less democratic than that of most of the other cantons.

VAUDEMONT, a town of France, in the dep. of the Meurthe, situated in a fertile country, 22 m. SSW of Nancy. It was formerly the chief place of a county, from which a branch of the Lorraine family, now extinct, took the title of prince of Vaudemont.

VAUDOIS, an interesting race of people inhabiting the valleys which descend from the sides of the snowy Alps into the rich plains of Piedmont. The best known of these valleys is that of Susa, due W of Turin, through which passes the great route of the Mont Cenis, the principal highway between Italy and France, and down which flows the Dora to unite its waters with those of the Po at Turin. Just S of the valley of Susa, and betwixt the Mont Cenis and Monta-Viso, are the valleys of the Vauds. The largest and most northerly of these valleys is that of Perouse, extending from the town of Fignerol to the town of Perouse, and there branching off in a NW direction into the valley of Pragelara, and W into the valley of St. Martin; which latter again divides into two, namely, that of the Balaille and that of Frall. More southerly is the valley of Luzern, or Lucerna, which runs W from the town of Luzern to the roots of the Col-de-la-Croix and Monta-Viso; and this valley is joined at its embouchure upon the plain by the smaller valley of Angrogna. The principal valleys occupied by the Vauds are that of Perouse, watered by the Cinsone; that of St. Martin, watered by the Germanasca; that of Angrogna, with a streamlet of the same name; and that of Luzern, watered by the Palica. All these streams flow at no great distance into the Po, which, issuing from the foot of Monta-Viso, fertilizes the great plains of Piedmont and Lombardy, and at length pours its noble flood into the Adriatic. The Italian name of this remarkable community of Protestants is *VALDESI*, or *VALLESI*, that is, 'inhabitants of the vall or valleys;' their French name is Vauds; and they are not unfrequently designated by English writers *WALDESIANS*, but they are not to be confounded with the Waldenses of the south of France, who occupy the valleys on the French side of the Alps near Briançon, from whom they are separated only by the breadth of the Alpine range; still less are they to be identified with the Vauds of Switzerland, so called from inhabiting the Pays-de-Vaud, on the N side of the lake of Geneva. "It is somewhat remarkable," says a recent most intelligent tourist, "however, that the V. of Piedmont, though historically distinct from the Waldenses of the S of France, should speak the French language, or a *patois* which is more French than Italian, whilst their ecclesiastical language is also French; but they are now teaching the Italian in all their schools; they consider themselves as belonging to Italy, not only geographically and politically, but by feeling; and they regard Italy as their future field of usefulness." The V. trace their history with good documentary evidence to the 11th cent.; but they confidently believe that their ancestors through every age from the Apostolic time to the present have been the depositaries of the simple faith of the Gospel, and protesters against the corruptions of the church of Rome. In 1478, their first persecution was commenced by Zolande, sister of Louis XI., and widow of a duke of Savoy. In 1486, Pope Innocent VIII. issued a bull of extermination against them. England repeatedly interferred to shelter them from persecution; but on the revocation of the edict of Nantes they were nearly exterminated. On the 17th of February 1848, full civil and religious rights were awarded to the V. by a special edict of the Piedmontese government.

VAUDREVANGE, or WALLENFANGEN, a village of Prussia, in the prov. of the Rhine, and reGENCY of Treves, circle and 2 m. NW of Sarrelouis, on the l. bank of the Sarre. Pop. 1,820. It has manufac

tories of china. Copper and azure stone are found in the vicinity.

VAUDREY, a village of France, in the dep. of the Jura, cant. and 4 m. S of Montbary. Pop. 742.

VAUFFELIN, a village of Switzerland, in the cant. of Berne, and bail. of Courielarn. Pop. 255.

VAUFREY, a village of France, in the cant. of the Doubs, cant. and 6 m. ENE of St. Hippolyte-sur-le-Doubs. Pop. 800.

VAUGHAN, a township of Upper Canada, in the Home District, watered by branches of the Humber. Pop. in 1842, 4,300.

VAUGIRARD, a commune of France, in the dep. of the Seine, cant. and 6 m. N of Sceaux, and contiguous to Paris on the SW. Pop. 13,817. It contains a large number of handsome dwellings, and possesses numerous manufactories of chemical substances, Prussian blue, chimney tiles, candles, glue, musical instrument strings, paper, card-board, pottery, pipes, Roman cement, bricks, articles in caoutchouc, sealing-wax, starch, hardware, machinery, and leather. Freestone is wrought in the environs, and large numbers of milk-cows are kept for the supply of the metropolis. Fire-wood and charcoal form also important objects of trade. V. was formerly a seignory belonging to the abbey of St. Germain-des-Pres at Paris.

VAUGNERAY, a canton and commune of France, in the dep. of the Rhône, and arrond. of Lyon. The cant. comprises 15 com. Pop. in 1831, 13,949; in 1848, 16,609. The village is 9 m. W of Lyon. Pop. 1,970. Coal and lead are found in the environs.

VAUGUEUX (Le), a hamlet of France, dep. of Calvados, cant. and com. of Caen. Pop. 1,500.

VAUJANY-EN-OYSANS, a village of France, in the dep. of the Isere, cant. and 9 m. NNE of Bourg-d'Oisans. It has quarries of marble.

VAUJOURS, a village of France, in the dep. of the Seine-et-Oise, cant. and 7 m. SE of Gonesse. Pop. 600. It has a fine castle.

VAULH, a village of France, in the dep. of the Yonne, cant. and 3 m. W of Avallon. On an adjacent hill are the ruins of a small temple of Mercury.

VAULION, a village of Switzerland, in the cant. of Vaud, and circle of Orbe, at the foot of Dent-de-Vaulion. Pop. 1,000. The Dent-de-Vaulion is in the Jura chain, between the valleys of Romainmôtiers and Joux, and at an alt. of 3,420 Parisian ft. above the level of the lake of Geneva. The Col-de-Vaulion, which is a carriage way, is 2,430 Parisian ft. above the level of the lake.

VAULRUZ, a village of Switzerland, in the cant. of Friburg, and bail. of Greierz. Pop. 496.

VAULVANEYS - LE - HAUT, a commune of France, in the dep. of the Isere, and cant. of Vizille. Pop. 1,684.

VAULX, a department and commune of Belgium, in the prov. of Hainault, and arrond. of Tournai, watered by the Scheldt. Pop. 996.—Also a department and commune of the same prov., in the arrond. of Charleroi, watered by the Blanche. Pop. 152. It has several marble-works.

VAULX-VRAUCOURT, a commune of France, in the dep. of the Pas-de-Calais, cant. and 5 m. SE of Croisille. Pop. 1,640.

VAUMARCUS, or **FAMEGU**, a village of Switzerland, in the cant. and 11 m. SW of Neufchâtel, and bail. of Boudry, on the lake of Neufchâtel. Pop. 200. It has a castle and fine gardens.

VAUMAS, a village of France, in the dep. of the Allier, cant. and 6 m. SW of Dompierre. Pop. 815. It has several iron-works.

VAUMEIL, a village of France, in the dep. of the Basses-Alpes, cant. and 6 m. SW of La Motte-du-Caire. Pop. 600.

VAUNAVES, a village of France, in the dep. of the Drome, cant. and 3 m. N of Brest. Pop. 400.

VAUNAVEY-LE-HAUT, a village of France, in the dep. of the Isere, cant. and 5 m. NNE of Vizille. Pop. 1,185.

VAUPE. See **UAUPES**.

VAUQUELIN, or **WILES (CAPE)**, a headland of South Australia, in Eyre Land, on the W side of Sleaford bay, in S lat. 36° 57', and E long. 135° 38'.

VAUREAS. See **VALREAS**.

VAUREILLES, a village of France, in the dep. of the Aveyron, cant. and 6 m. N. of Monbazens. Pop. 350.

VAURENARD, a town of France, in the dep. of the Rhone, cant. and 5 m. from Beaujeu. Pop. 1,074. It is noted for its cheese.

VAUTEBIS, a market-town of France, in the dep. of the Deux-Sevres, cant. and 6 m. NW of Menigot, in a woody locality. Pop. 489.

VAUTORTES, a commune of France, in the dep. and 12 m. W of Mayenne. Pop. 1,632.

VAUVENARGUES, a town of France, in the dep. of the Bouches-du-Rhone, and cant. of Trete, 8 m. ENE of Aix, on a plateau commanding a valley. Pop. 400. It has a castle, said to have been built in the 14th cent.

VAUVERT, a canton, commune, and town of France, in the dep. of the Gard, and arrond. of Nîmes. The cant. comprises 12 com. Pop. in 1831, 15,710; and in 1846, 16,668. The town is 12 m. SW of Nîmes. Pop. 4,175. It has a Calvinist consistorial church, manufactories of silk, hosiery, oil-mills, distilleries of brandy and liqueurs, and salt-petre works. Wine is cultivated in the locality.

VAUVILLE, a village of France, in the dep. of the Manche, on the N coast. Pop. 720.

VAUVILLERS, a canton, commune, and market-town of France, in the dep. of the Haute-Saône, and arrond. of Lure. The cant. comprises 23 com. Pop. in 1831, 11,150; and in 1846, 11,666. The town is 28 m. NW of Lure. Pop. 1,246. It has manufactories of candles, tanneries, glass-works, lime and tile-kilns, &c.

VAUVRIER, a village of Switzerland, in the cant. of Valais, on the Rhine. Pop. 950.

VAUX, a commune of France, in the dep. of the Rhone, cant. and 10 m. NW of Villefranche-sur-Saône. Pop. 1,934.—Also a commune in the dep. of the Seine-et-Oise, cant. and 2 m. E of Meulan, at the foot of hills, on the r. bank of the Seine. Pop. 1,025. It contains an ancient castle belonging to the Dukes de Praslin, and many other fine residences. Gypsum is wrought in the environs.—Also a commune of Belgium, in the prov. of Liege, and dep. of Vaux-et-Borset. Pop. 785.

VAUX (LA), a district of Switzerland, in the cant. of Vaud, to the E of Lausanne. It is noted for the excellence of its wine, and for the number of the terraces which here rise amphitheatrically from the banks of the Geneva. The district comprises the circles of Saint Saphorin, Cully, and Lutry, with a pop. of 6,810 souls.

VAUX (SAINT-LAURENT-DE), a village of France, in the dep. of the Rhone, and cant. of Vaugeray, 11 m. from Lyon. Pop. 1,130.

VAUXAINS, a village of France, dep. of the Dordogne, cant. and 4 m. SW of Ribérac. Pop. 1,820.

VAUXCHAVANNE, a department and commune of Belgium, in the prov. of Luxemburg, and arrond. of Marche. Pop. 885.

VAUX-CHIVREMONT, a department and commune of Belgium, in the prov. and arrond. of Liege, watered by the Vesdre. Pop. 2,262.

VAUX-EN-ARROUAISE, a commune of France, in the dep. of the Aisne, and cant. of Wassigny, 22

m. NW of Veronas. Pop. 1,621. It has manufactures of shawls.

VAUX-ET-BORSET, a department and commune of Belgium, in the prov. of Liege, and arrond. of Huy. Pop. 735.

VAUX-SUR-BLAISE, a village of France, in the dep. of the Haute-Marne, cant. and 3 m. SE of Vassy, near the Blaise. Pop. 350. It has manufactures of cotton fabrics.

VAUX-SUR-MER, a village of France, in the dep. of the Charente-Inferieure, cant. and 3 m. NW of Royan. Pop. 400.

VAUX-DE-VIRE (Les), a valley of France, in the dep. of Calvados, near Vire. It has a large paper-mill, and a manufactory of Prussian-blue.

VAVAO, a small archipelago of the Pacific, in the group of the Friendly Islands, in 8 lat. 18° 30' 2", and W long. 173° 55'. The principal island of the group, which also bears the same name, is 12 m. in length and 6 m. in medium breadth. Pop. 6,000. The 8 coasts are deeply indented and form several narrow peninsulas. On the E side are port Valdes and the roadstead of Del Refugio.

VAVIN COURT, a canton and commune of France, in the dep. of the Meuse, and arrond. of Bar-le-Duc. The cant. comprises 15 com. Pop. in 1831, 8,260; in 1846, 7,452. The village is 6 m. NE of Bar-le-Duc. Pop. 772.

VAVIORKA, a town of Russia in Europe, in the gov. of Grodno, district and 15 m. SW of Lida.

VAVITAO, or **RAIVAVAR**, an island of the South Pacific, in the group of the Austral islands, in 8 lat. 23° 42', and W long. 147° 22'. It rises to a considerable height, but is generally fertile. Its inhabitants speak the dialect of Otaheite. It was discovered in 1791 by Broughton, and received from him the name of High island.

VAXHOLM, a town of Sweden, in the prefecture of Stockholm, haerad of Danderyd, and parish of Rid, in the island of Vaxoe. It has 4 ports opposite Vaxholm. On a rocky islet is a fort erected for the defence of the Stockholm canal.

VAXOE, an island of Sweden, in the prefecture of Stockholm, haerad of Danderyd, and parish of Rid. It contains the town of Vaxholm.

VAT, a commune and village of France, in the dep. of Loire-Inferieure, cant. and 5 m. W of Nozay. Pop. 2,000.

VATA, an island of the Orinoco, one of those which, with the point of Galera, off the island of Trinidad, form the entrance of the bay of Charaguana.

VAYGARU, a river of Hindostan, in the Carnatic, which rises on the E flank of the Western Ghauts; runs E and then SE, passing Madura, Patinur, and Peringary; and falls into the gulf of Manasar, after a course of 180 m.

VAYNOR, a parish of Breconshire, near Brecon. Pop. in 1841, 2,286.

VAYRES, a commune and town of France, in the dep. of Gironde. Pop. 1,600.

VAZABARRIS, a river of Brazil, in the prov. of Sergipe-del-Rey, which rises near the coast; runs SSE; and enters the bay of Sergipe, after a course of 120 m.

VAZHABAD, a town of Hindostan, on the Punjab, 62 m. NW of Lahore, near the l. bank of the Chenab. It is a handsomely built place.

VEAGH, or **BRAGH**, a glen and a lake in the p. of Gortan, 10 m. NW by W of Letterkenney, co. Donegal. The glen is usually called Glenveagh, and forms a continuation of Glendowan on the S, while itself is continued by the mountain-vale called emphatically the Glen on the north. The lake, the wildest and the most picturesque of the lakes of

Donegal, extends 3 m. NE, with a mean width of between 2 and 3 fur.; it has a surface-elevation of 149 ft. above the level of the sea; and, notwithstanding its limited width, occupies the entire breadth of the lower part of the glen.

VEARN, a village of Herefordshire, 6 m. NNE of Hereford.

VEBRET, a village of France, in the dep. of Cantal, cant. and 2 m. ENE of Saignes. Pop. 1,200.

VECHEL, a large village of Holland, in the prov. of N. Brabant, 12 m. ESE of Bois-le-Duc. It is traversed by the Aa.

VECHELDE, a village of the duchy and 6 m. W of Brunswick, on the Aue. Pop. 800.

VECHENSKAIA, a town of Russia, in the Don Cossack territory, on the l. bank of the Don, 60 m. SE of Bogutshar.

VECHERA, a village of Turkey, on the l. bank of the Upper Kamchik, in N lat. 42° 50', E long. 26° 30', 9 m. NNE of Selimné. It consists of about 80 houses.

VECHINGEN, a parish and village of Switzerland, in the cant. of Berne, on the r. bank of the Worblen. Pop. 2,597.

VECHT, an arm of the Rhine, in the Netherlands, which separates from that river near Utrecht, flows northward, and falls into the Zuyder-Zee at Muiden, after a course of 18 m.

VECHTA, a town of Germany, in that part of the bishopric of Munster given to Oldenburg in 1802, on a river of the same name, 28 m. S of Oldenburg. Pop. 1,976. It gives name to a circle and bailiwick.

VECHTE, a river of the Netherlands, which rises in the Prussian gov. of Munster; runs NW and then SW through Hanover; enters Holland; and falls into the Zuyder-Zee above Swarte-Sluis, after a NW course of 90 m.

VECKERHAGEN, a village of Hesse-Cassel, on the Weser, 13 m. N by E of Cassel. Pop. 1,900. A saltpetre manufactory was established here in 1815.

VEDDAHS. See article **CHYLOX**.

VEDANO, a village of Austrian Lombardy, in the prov. and 12 m. N of Milan. Pop. 1,200.

VEDEM, a town of Prussian Westphalia, in the duchy and 9 m. SSE of Cleves.

VEDEN, a village of the Netherlands, in N. Brabant. Though at a distance from the sea, it has the benefit of water communication by its vicinity to a navigable river.

VEDRA (Cape), a cape in the NW of Spain, on the coast of Galicia, in N lat. 42° 19'.

VEDRENE, or **VEDRIN**, a village of Belgium, in the prov. and 8 m. N of Namur. Pop. 1,400.

VEEN, a village of Holland, in N. Brabant, 10 m. NW of Hertogenbosch.

VEENDAM, a town of Holland, in the prov. and 15 m. SE of Groningen. Pop. 5,200. It has saw-mills, tanneries, rope-works, and boat-building yards.

VEENENDAAL, a village of Holland, in the prov. of Utrecht and cant. of Rheenen, 12 m. SE of Amersfoort. Pop. 2,960. It has a yarn-mill.

VEENHUFEN, a village of Hanover, in the bail. of Leer. Pop. 260.

VEENHUESEN, a parish of Holland, in the prov. of North Holland, to the NE of Hoorn. Pop. 300.—Also a parish in the prov. of Drontheim. Pop. 5,000.

VEERAWOW, a town of the Rajput territory of Parkur, on the NW frontier of India, situated on a lake about 3 m. in circumf., in N lat. 24° 31' 6", near the ruins of the ancient city of Pareenuggur.

VEERE. See **TER-VEER**.

VEERLE, a department and commune of Belgium, in the prov. and 29 m. ESE of Antwerp, and arrond. of Turnhout. Pop. of dep. 1,395; of com. 790.

VEERSSEN, a village of Hanover, in the prov. of Luneburg and bail. of Oldenstadt, near Uelzen. Pop. 385.

VEERST, a parish of Denmark, in Jutland, in the stift of Ripen, to the W of Fredericia.

VEERT, a village of Prussia, in the regency of Dusseldorf and circle of Geldern. Pop. 684.

VEFSEN-ELV, a river which has its source in Sweden, in the prefecture of West Bothnia, in a lake in the midst of the Dofrines, flows thence into Norway, traverses the S part of the bail of Nordland, and after a course in a generally NW direction of about 90 m. throws itself into the Vefsen-fjord.

VEFSEN-FIORD, a parish of Norway, in the diocese and bail. of Nordland, on a bay of the Atlantic of the same name, and at the mouth of the Vefsen-elv, 195 m. NNE of Drontheim. Pop. 3,500.

VEGA, a village of Spain, in the prov. and 45 m. NW of Oviedo. Pop. 525.

VEGA (La), a village of the island of Porto-Rico, in the jurisdiction of San Juan, on a river of the same name, 6 m. S of Toa-Alta. Pop. 1,230.

VEGA (La), or **LA CONCEPCION-DE-LA-VEGA**, a town of the island of Hayti, in the dep. of the Cibao, on the Camus, in a fine plain 75 m. NNW of Sainte Domingo. About 6 m. W are the ruins of a town of the same name, founded by order of Columbus, and destroyed by an earthquake in 1564.

VEGA-DE-ESPINAREDA, a market-town of Spain, in the prov. of Leon, and 9 m. from Pontferrada, in a locality watered by the Cua, and liable to extreme variations of temperature. Pop. 810. It has a Benedictine monastery. The manufacture of linen is its chief branch of industry.

VEGA (NUESTRA-SEÑORA-DE-LA), a market-town of Spain, in the prov. and 24 m. SSE of Santander, in a cold mountainous locality. Pop. 4,055. It has a parish-church and a custom-house.

VEGA-DEL-RIO-TIRON. See **HERRAMELLURI**.

VEGA-DE-RIO-PONCE, a market-town of Spain, in the prov. and 38 m. from Leon, near Valderaduey. Pop. 500. It has two parish churches.

VEGA-DE-VILLALOBOS, a village of Spain, in the prov. and 38 m. from Leon. Pop. 290.

VEGANZONES, a market-town of Spain, in the prov. and 18 m. NE of Segovia, in a fine plain, near the Cega. Pop. 615.

VEGAS-DEL-CONDADO, a village of Spain, in the prov. and 12 m. from Leon. Pop. 217. It has a palace belonging to the dukes of Frias, and possesses manufactories of linen, a tile-foundry, and productive trout fisheries.

VEGAS-DE-MATUTE, a market-town of Spain, in the prov. and 12 m. from Segovia, in a level tract near the Sierra-de-Guadarrama. Pop. 635.

VEGAS-DE-MONTE, a village of Spain, in the prov. of Segovia, in a level tract encircled by the Sierra-de-Guadarrama. Pop. 552. It is of modern foundation, and has a parish church, a custom-house, and a public granary. Lime burning and cattle-rearing form the chief objects of local industry.

VEGEN-OE, an island of Norway, near the coast of Nordland, with a small village on its NW side.

VEGESACK, a balliwick and market-town of the territory of Bremen, on the Weser, 12 m. NW of Bremen, in N lat. 53° 10' 31". It has building docks, an iron foundry, and several breweries and brandy distilleries. Pop. 2,460.

VEGLIA, or **BEJA**, a town of Tunis, near the frontier of Algeria, on the Wady-Zain, in N lat. 36° 42'. It is noted for its horses, and carries on an active trade in corn.

VEGLIA, an island of Dalmatia, in the gulf of Quarnero, to the E of the island of Cherso, and separated from the continent on the E by the Morlacca

channel. Its N point is in N lat. 45° 14' 20", and E long. 14° 31' 30". Pop. 17,000. It is about 24 m. in length from NW to SE, and 15 m. in extreme breadth. The surface is mountainous and rocky, sterile in the N and E, but in other parts fertile. It abounds in wood, pastures large numbers of horses, sheep, and goats, and yields considerable quantities of fruit, wine, silk, and salt. It has quarries of fine marble, and fish abound on its coasts. The inhabitants are chiefly of Morlachian descent, and are notorious for their superstition and credulity. There are on the coast several spacious harbours, but none sufficiently protected from the gales which prevail in the Adriatic.—The capital, which bears the same name, is 81 m. SE of Trieste, on the SW coast of the island. Pop. 3,500. It is built partly on a hill, and is commanded by two mountains. It is a bishop's see, and has a cathedral, and several monasteries. The harbour is capable of receiving vessels of medium size, and is defended by a castle.

VEGLIE, a market-town of Naples, in the prov. of the Terra d'Otranto, district and 24 m. S of Brindisi, in a plain. Pop. 1,355. It has a church, a convent, and two charitable institutions.

VEGUILLAS, a town of Spain, in the prov. and 21 m. from Guadalupe, at the foot of the Sierra-de-Zarzuela, in a low and bleak locality. Pop. 300.

VEHAM, an island of the S. Pacific, in the N part of the group of the Arru islands, to the SW of New Guinea. It has a village named Vorkey. Near it is a pearl bank.

VEHLAGE, a village of Prussia, in the regency of Minden and circle of Lubbecke. Pop. 758.

VEHLEFANZ, a village of Prussia, in the regency of Potsdam and circle of Osthavelland, near Kremen. Pop. 680.

VEHLEN, a village of the principality of Schaunburg-Lippe, in the co. of Schaunburg and bail. of Bückeburg, on the Aue. Pop. 410. It has a coal-mine.—Also a village in the regency of Magdeburg and circle of Jerichow. Pop. 200.

VEHLGAST, a village of Prussia, in the regency of Potsdam and circle of West Prieignitz. Pop. 260.

VEHLIN, a village of Prussia, in the regency of Potsdam and circle of Ost-Prieignitz. Pop. 390.

VEHLINGEN, a village of Prussia, in the regency of Dusseldorf and circle of Rees. Pop. 540.

VEHLINGSDORF, a village of Prussia, in the regency of Stettin and circle of Saatzig. Pop. 240.

VEHLITZ, a village of Prussia, in the regency of Magdeburg and circle of Jerichow, on the Elbe. Pop. 360. It has several mills.

VEHLOW, a village of Prussia, in the regency of Potsdam and circle of Ost-Prieignitz. Pop. 280.

VEHRA, a village of Prussia, in the regency of Erfurt and circle of Weissenser. Pop. 220.

VEHRAB-JAGOTE, a village of Beluchistan, in the district of Lus, on the mountains to the SE of Beila.

VEHRINGEN, a village of the principality of Hohenzollern-Sigmaringen. Pop. 880.

VEHRINGENDORF, a village of the principality of Hohenzollern-Sigmaringen, on the Lauchart. Pop. 440.

VEHRNIKA. See **LATBACH (OBER)**.

VEHRTE, a village of Hanover, in the prov. and to the N of Osnabruck. Pop. 650.

VEHS, a village of Hanover, in the prov. of Osnabruck, to the N of Bersenbruck. Pop. 550.

VEHY, a district of Hindostan, in the prov. of Cashmere, traversed by the Jelum. It is noted for its saffron. Pamper is its chief place.

VEI, or **VAI**, a nation, or collection of tribes inhabiting the country near Cape Mount on the W coast of Africa, and some distance into the interior, about 5 days' sail SE of Sierra Leone.

They are in possession of a written character of recent invention. The writing itself is syllabic. About 200 symbols—though about half of them appear superfluous, as they are never used—represent the sounds of all the syllables occurring in the language, which is of simple construction. The inventor, Doalu Bukara, a man of about 40 years of age, of great intelligence, and much religious feeling, lives about 20 m. in the interior. When a child he had for a few weeks learnt the ordinary phonetic alphabet from an American missionary. He states that after he was grown up, he received in a dream the first impulse to express his language by written syllabic symbols. He imparted the dream to a few companions, who assisted him to invent the characters, and pressure through the favour of the king of the tribe the means of establishing schools and of teaching the people generally. War soon broke out, Jondu, the town of the Vela, was destroyed by fire, and the tribe depressed and dispersed. They have not had schools since; but it seems very probable that they may be re-established in the new town of Bandakoro—literally 'cotton-tree ground'—so named from the abundance of cotton trees growing near. There are as yet no data for stating with precision the geographical extension of the Vela language; but several closely allied to it—the Mandingo, Bambarra, Mendi, Susu, &c., are spoken over a very large area, stretching further than from the Gambia to the Gallinas rivers, over a seaboard of 650 m., and extending probably 300 m. into the interior. It has been generally asserted and believed that among the 180 supposed dialects of Africa, not one has till now been raised by the natives themselves to a written language.

VEIGNE, a village of France, in the dep. of the Indre-et-Loire, $1\frac{1}{2}$ m. E of Montason. Pop. 890.

VEILE, a town of Denmark, in Jutland, in the stift and 45 m. NE of Ripen, on a river of the same name, which is here crossed by a substantial bridge, and near its confluence with the Veile-fjord. Pop. 1,600. It has three gates, a market-place, an hospital, a house of detention, and a small port admitting vessels drawing under 10 ft. water; and possesses manufactories of cloth, leather, soap, starch, hair-powder, and earthenware, and productive salmon fisheries in the Veile-fjord. The trade consists chiefly in wood, grain, and tallow.—The V-fjord is formed by the Cattegat, and opens between Cape Bürs-knude on the NE, and the Trelde-naes on the SW. It is 9 m. wide at the entrance, and about 6 m. in length, with a depth of 8 fath., and gradually shoaling water. The town is situated at the head of the bay.

VEILLY, a village of France, in the dep. of the Côte-d'Or, cant. and 5 m. WNW of Bligny-sur-Ouche. It has a mineral spring.

VEILSDORF, a village of Saxe-Meiningen, near Hildburghausen. Pop. 840.

VEIROG, a town of Portugal, in the prov. of Alentejo. It has a castle.—Also a town of Brazil, in the prov. of Para, on the r. bank of the Xingu, about 60 m. above its confluence with the Amazon.

VEISCHEDE, a village of Prussia, in the regency of Arnberg, and circle of Olpe. Pop. 200.

VEISENCHTEIN. See **WISSENBURG**.

VEISEMBURG. See **WISSENBURG**.

VEIT, a village of Bavaria, circle of Upper Bavaria, presidial of Neumarkt, on the Rott. Pop. 240.

VEIT, or **VEIT-AN-DEE-WEIN** (SANKT), a village of Austria, in the circle of the Lower Weimerwald, 5 m. W of Vienna, on the Wein. Pop. 1,220. It consists of an upper and a lower town. In the former is a castle formerly belonging to the archbishop of Vienna. The latter contains manufactories of white lead and Prussian blue.

VEIT (SANKT), a town of Austria, in Illyria, in the circle and 15 m. N of Klagenfurt, on the Glan, in N lat. $46^{\circ} 44' 52''$, and E long. $15^{\circ} 37' 30''$. Pop. 1,525. It has manufactories of iron-ware and of paper. Until 1518 this town was the capital of Carnithia.—Also a market-town in the circle of the Upper Weimerwald, 12 m. S of St. Polten. Pop. 1,020. It has an iron-work, and carries on an active trade in wood. This town occupies the site of the ancient castle of Hohenstaufen destroyed in 1299.—Also a village in the circle of the Muhl, and bail. of Wachsenberg. Pop. 360.—Also a village near

Salsburg. Pop. 310.—Also two villages of Styria, in the bail. of Rothenthurm and Buchenstein, containing respectively 250 and 380 inhabitants.—Also a village in the circle of Judenburg. Pop. 330.—Also a village of Tyrol, circle of Bruneck. Pop. 420.

VEIT (SANKT), or **VEIT-AN-DEE-TRIESTING**, a village of Austria, in the circle of the Lower Weimerwald, 21 m. SSW of Vienna, on the Triesting. Pop. 918. It has copper-works, and extensive manufactories of machinery.

VEIT-AN-FLAUM (SANKT). See **FRUMK**.

VEITLAHN, a village of Bavaria, circle of Upper Franconia, presidial of Culmbach. Pop. 180.

VEITSAURACH, a village of Bavaria, circle of Middle Franconia, presidial of Heilsbronn. Pop. 198.

VEITSBRONN, a village of Bavaria, in the circle of Middle Franconia, and presidial of Radolzburg, near Mühlen. Pop. 260.

VEITSCH (GROSS and KLEIN), two villages of Styria, in the circle of Bruck. Pop. 1,060. It has mines of iron and copper.

VEITSHOCHHEIM, a town of Bavaria, in the circle of Lower Franconia, presidial and 5 m. NW of Würzburg, on the r. bank of the Main. Pop. 1,355. It has a fine castle.

VEITSRÖDE, a village of Oldenburg, in the bail. of Birkenfeld, near Oberstein. Pop. 300.

VEIVODE. See **VOIVAT**.

VEJA, a village of Austria, in Lombardy, in the del. of Verona.

VEJENOE, an island of Norway, near the W coast, in the bail. of Nordland.

VEKCHNY, a town of Russia in Europe, in the gov. of Vilna, district and 39 m. NW of Chavli.

VELA (CAPE), a promontory on the coast of the prov. of Santa-Marta, New Granada, in N lat. $12^{\circ} 18'$, W long. $72^{\circ} 12'$. It is lofty, and was discovered by Alonso de Ojeda, who gave it this name, in 1499.

VELA (LA), a port of Venezuela, on the SE coast of the gulf of Coro, in N lat. $11^{\circ} 25'$, $1\frac{1}{2}$ m. E of the mouth of the river Coro.

VELAAR, or **VELAUZ**, a river of Hindostan, which rises in the district of Salem, and flows across the Carnatic into the gulf of Bengal, in N lat. $10^{\circ} 6'$, in an E course of 120 m.—There is another stream of the same name, which rises in the Eastern Ghauts, and flows into the bay of Bengal, in N lat. $11^{\circ} 29'$.

VELADA, a village of Spain, prov. and 6 m. N of Talavera. Pop. 800.

VELAINE, a village of Belgium, prov. and 1 m. S of Namur, on the r. bank of the Sambre. Pop. 1,500.

VELAINES, a commune and village of Belgium, prov. of Hainault, 6 m. NE of Tournay. Pop. 2,150.

VELAIS-SUR-OUCHÉ, a village of France, in the dep. of Côte-d'Or, cant. and 7 m. W of Dijon. Pop. 500.

VELAS, a port of Costa-Rica, between Cape Santa Catalina and the Morro-Hermoso, in N lat. $10^{\circ} 30'$.

VELATE, a village of Austrian Italy, in the prov. and 16 m. NE of Milan.

VELAUX, a town of France, dep. of Bouches-du-Rhône, 12 m. W of Aix, in the valley of the Arc. Pop. 1,180.

VELAY, a small and mountainous district of France, in the Cevennes, lying between the Vivarais on the E, Gevaudan on the S, Auvergne on the W, and Forez on the N, and now forming part of the department of Haute-Loire. Its cap. is Le Puy.

VELAZGHIRD, a town of Kerman, in Persia, on the river Karun, 64 m. NE of Gombrun.

VELBERT, a village of Prussia, in the duchy of Berg, 14 m. ENE of Düsseldorf, and 7 m. NW of Elberfeld. It is chiefly inhabited by artisans, who manufacture various articles of steel, iron, and brass.

VELBURG, or **VILDBURG**, a town of Bavarian Franconia, on the *Laber-Noir*, 24 m. NW of Ratibon.

VELDEN, a town of Austrian Illyria, in Carinthia, on the lake of Wortdt, 18 m. W of Klagenfurt.—Also a village of Bavaria, in the presidial of Vilshiburg, 10 m. SSE of Landshut.—Also a village of Bavaria, on the *Regnitz*, 21 m. NE of Nuremberg.

VELDENZ, or **THAL-VELDENZ**, a town of Prussia, prov. of the Rhine, 19 m. ENE of Treves.

VELDES, a village of Austrian Illyria, on the lake of Frauen, 20 m. S by W of Klagenfurt.

VELDHOVEN, a village of Holland, in N. Brabant, 4 m. W of Eindhoven.

VELDSCHTERIN. See *USITERNA*.

VELE, a river of France, which joins the Aisne on the l. bank, between Soissons and Vailly, after a NW course of 75 m.

VELEIA, a village of the duchy of Parma, 24 m. S of Piacenza, on the site of the ancient *Velleia*.

VELEN, a village of Prussia, in the regency of Muster, circle of Borken. Pop. 728.

VELENCZE, or **VARAD-VELENCZE**, a town of Hungary, 2 m. E of Varadein. Pop. 1,200.

VELE-RETE, a cluster of rocks in the Eastern seas, situated to the S of the island of Formosa, in N lat. 21° 55', E long. 121° 30'. The largest of these rocks is about the height of a small ship's hull out of the water, and in clear weather may be discerned at the distance of 8 m. It is surrounded by several smaller ones.

VELESTINA, a town of Turkey, in the sanj. of Trikala, 24 m. SE of Larissa.

VELECHICO, a mountain on the N frontier of Greece, under the parallel of 39° 13', 9 m. N of Mount Chelona, and 12 m. NE of the town of Arta. It presents a bleak and barren surface.

VELEZ, a city of New Granada, in the prov. of Tunja, on the river Suarez, at the foot of a ridge of mountains, in N lat. 6° 10'. Pop. 2,500. It is built on swampy soil, and its streets are at times impassable in consequence. The temperature is moderated by the frequency of tempests in the surrounding regions. The city contains a very handsome church and two convents.

VELEZ-DE-BENAUDALLA, a town of Spain, in the prov. and 30 m. SE of Granada. Pop. 3,000. Lead is wrought in the vicinity.

VELEZ-EL-BLANCO, a town of Spain, in the prov. and 57 m. NE of Almeria, on the borders of Murcia, 4 m. NNE of Velez-el-Rubio. The pop. is considerable, but chiefly agricultural.

VELEZ-EL-RUBIO, a town of Spain, in the prov. and 53 m. NNE of Almeria, on the Guadalentin river. Its pop. amounts to 11,000; but notwithstanding this number, and its having been a place of strength under the Moors, it is neither remarkable for its buildings nor the industry of its inhabitants. Its manufactures consist chiefly of coarse woollen and hemp fabrics, oil, and flour.

VELEZ-MALAGA, a town of Spain, in the prov. and 14 m. NE of Malaga, in N lat. 36° 45'. Pop. 13,000. It stands on the slope of a hill, amidst vineyards and plantations, the produce of which, consisting of raisins, olive oil, lemons, oranges, citrons, and almonds, forms the chief articles of its trade. The town is 2 m. distant from the sea, and takes its name from the river Velez, which passes its walls, flowing S from the chain of mountains separating Granada from Andalusia. The pop. of the town amounted to 16,000 till 1804, when nearly half that number were carried off by a dreadful fever which ravaged Cadix, Malaga, and other parts of the S of Spain. In the 15th cent. this district formed the last retreat of the Moors, who built small towns on

the tops of the hills, and carried on from these fastnesses an inveterate warfare against their enemies.

VELHAS (*Rio das*), a river of Brazil, in the prov. of Minas-Geraes, which runs N and enters the *Sao-Francisco*, near Bana-das-Velhas.—There is another river of the same name, which runs WNW, and enters the *Paranaiba*, after a course of 240 m.

VELICA, a town of Austrian Slavonia, between Gradiska and Zagrab.

VELICALA, a town of the peninsula of California, near the coast, in N lat. 20° 35'.

VELICSNA, **NAGY-FALU**, or **VELKA WES**, a village of Hungary, on the *Arva*, 32 m. N of Neusohl.

VELIJ, a town of Russia, in the gov. and 52 m. NE of Vitebsk, on an affluent of the Southern Dwina.

VELIKAIA, a river of Russia, which rises in the gov. of Pskov, and flows into the SE extremity of Lake Pskov, after a course of 100 m.

VELIKA-GUBAVIZA, a village of Austrian Dalmatia, on the river Cetina, which forms here a cataract nearly 150 ft. in height.

VELIKI-USTJUG, a town of Russia in Europe, in the gov. and 249 m. NE of Vologda, on the *Soukhona*, a little above its confluence with the *Jug*. Pop. 10,000. It is nearly 5 m. in circumference, and although containing about 1,450 houses, not more than twenty are built of stone, and of the entire number not more than four-score are fit for habitation. It possesses a cathedral, 26 churches, 2 convents, a foundling hospital formerly a bank, a town-hospital, and a post-office, all built of stone. There are besides 3 salt-magazines, several establishments connected with the town-house, numerous taverns, several tanneries, manufactories of bricks, soap, tallow, and leaven. The era of the foundation of this town is unknown. It stood previous to 1212 on the r. bank of, and considerably lower down, the *Soukhona*, and nearly opposite the confluence of *Jug*, at a place now occupied by a convent and hermitage. In 1226, a Tartar chief, having embraced Christianity, founded a convent in the locality, and subsequently the existing cathedral, and to defend their new settlement, which they named *Ustjug*, surrounded it with an earthen rampart and ditch. From the advantages of its situation it rapidly rose in importance. In 1824 and again in 1398, it was taken and pillaged by the *Novgorodians*. In 1635 it was ravaged by pestilence, and again in 1761, by a disastrous inundation of the *Soukhona*.

VELIKIJA-LUKI, a town of Russia, in the gov. of Pskov, at the junction of the *Kolomenka* with the *Lovat*, 130 m. SE of Pskov. Pop. 4,000. It has a considerable trade in flax and hemp.

VELILLA-DE-EBRO, a market-town of Spain, in the prov. and 36 m. SE of Zaragoza, in a fertile locality, on the l. bank of the *Ebro*. Pop. 1,138.

VELILLA-DE-SAN-ANTONIO, a market-town of Spain, in the prov. and 12 m. ESE of Madrid, on the l. bank of the *Jarama*. Pop. 228.

VELILLE, a town of Peru, in the dep. and 75 m. SSE of Cuzco, and prov. of Chumbivilcas.

VELINES, a canton and commune of France, in the dep. of the Dordogne, and arrond. of Bergerac. The cant. comprises 16 com. Pop. in 1831, 9,548; and in 1846, 8,791. The village is 20 m. W of Bergerac, on an affluent of the Dordogne. Pop. 787.

VELINO, a mountain of Naples, in the prov. of Abruzzo-Ultra, and near the NW side of Lake Fucino. It has an alt. of 7,668 Parisian ft. above sea-level, and is one of the principal summits of the Apennines.—Also a river which has its source on the W side of the Apennines, in the NW part of the Neapolitan prov. of Abruzzo-Ultra; flows thence into the Papal States; traverses the N part of the

delegation of Rieti, and the S of that of Spoleto, and after a course first SW and afterwards NW of about 60 m., joins the Neva, on the l. bank, 6 m. above Terin. Its principal affluents are the Salto and the Turano, both of which it receives on the l. The V. forms fine cascades.

VELITZ - DAGH, a mountain of Turkey in Europe, in Rumelia, between the sanjaks of Ghin-tendi and Salonica. It makes part of the chain separating the basins of the Vardar and Radovitz.

VELITZNA. See **VELICNA**.

VELKOPOLYA. See **HOCHWIESEN**.

VELLACH, a town of Austrian Illyria, in Carinthia, on the river Moll, 11 m. NNW of Sachsenburg. It is divided into an upper and a lower town, and has in its vicinity mines and ironworks.

VELLAHN, a village of Mecklenburg-Schwerin, in the circle of Mecklenburg. Pop. 540.

VELLBERG, a village of Württemberg, in the circle of Jaxt, on the Bühler. Pop. 596.

VELLETRI, a town of Italy, in the States of the Church, in the deleg. of Rome, on the declivity of Monte-Artimisia, 21 m. SE of Rome. Its pop. amounts to about 12,000. Though pleasantly situated, it is an ill-built and irregular town, the streets being narrow and dirty, while the houses bear in general the appearance of decay. It contains, however, several detached buildings of considerable beauty, such as the Palazzo-Ginetti, with its elegant front, and the Palazzo-Borgio, with its fine collection of paintings and antiques. The town-house, also, is a good building, and several of the fountains are handsome. The principal square contains a bronze statue of Pope Urban VIII. by Bernini. Velletri, originally a town of the Volsci, became at an early period a Roman colony, and being the seat of the Octavian family, had the honour of giving birth to Augustus.

VELLEXON, a village of France, dep. of Haute Saône, cant. and 4 m. NW of Frene-St.-Mametz.

VELLO, a town of Austrian Italy, in the gov. of Milan, deleg. of Sondrio, in the district of the Sette-Comuni, 18 m. NW of Vicenza.

VELLON, a town of Spain, in the prov. and 24 m. E of Madrid. Pop. 700.

VELMERSTOOT, a mountain of Lippe-Detmold, forming the highest summit in the Teutoburgerwald. Alt. 1,460 Parisian ft.

VELSEN, a town of Holland, in the prov. of N. Holland, 5 m. N of Haarlem.

VELSHIN, a village of Bulgaria, 24 m. ESE of Shumla, near the N bank of the Paravati, and 5 m. NNW of the town of that name.

VELLORE, a fort of Hindostan, in the Carnatic, on the r. bank of the Palaar, 15 m. NW of Ascot.

VELP, a village of Holland, in the prov. of Gelderland, 4 m. ENE of Arnheim.

VELPKKE, a village of the duchy and 21 m. NE of Brunswick. Pop. 500.

VELSIGNE, a town of Belgium, in E. Flanders, 7 m. ENE of Audenarde.

VELTHERIA, a village of Switzerland, in the cant. of Aargau, district of Brugg. Pop. 900.

VENADILLO, a settlement of New Granada, in the prov. of Mariquita, 14 leagues SW of Santa-Fe.

VENAFRO, a town of Naples, in the Terra-di-Lavoro, 30 m. NE of Gaeta. Pop. 2,800.

VENANGO, a county in the NW of Pennsylvania, U. S. Area 1,120 sq. m. It is watered by the Alleghany river, and various other smaller streams. Pop. in 1850, 17,900.—Also a township of Crawford co., Pennsylvania. Pop. 1,200.—Also a township of Butler co., in the same state. Pop. 822.

VENANT (SAINT), a town of France, dep. of Pas-de-Calais, situated in a marshy district on the Lys,

6 m. NE of Lillers. Pop. 1,000. It contains several oil-mills and breweries, rape-seed and barley being the products of the neighbourhood.

VENASCA, a town of Piedmont, situated on the river Vraita, 9 m. S of Saluzzo. Pop. 2,264.

VENASQUE, a town of France, dep. of the Vaucluse, near the river Nasque, 18 m. NE of Avignon. Pop. 1,100.

VENASQUE, or **BENASCA**, a small town and fortress of the NE of Spain, in Aragon, among the Pyrenees, near the source of the river Esuera, 50 m. N by E of Balastro. In the neighbouring mountains are found silver, copper, and lead.

VENAUS, a village of the Sardinian states, in the div. of Turin, 2 m. WNW of Susa. Pop. 1,200.

VENCE, a town of France, dep. of Var, situated on the borders of Piedmont, 12 m. NE of Grasse.

VENDA (MONT), the highest summit of the Euganean hills, in the Lombardian prov. of Padua, in N lat. 45° 18', E long. 11° 41'. It has an alt. of 300 toises = 1,918 ft. above sea-level.

VENDAIS, a village of France, in the dep. of Gironde, cant. and 7 m. NW of Lesparre. Pop. 1,600.

VENDE'E (LA), a department of France, comprising a part of Poitou; and bounded on the N by the depts. of Loire-Inferieure and Maine-et-Loire; on the E by Deux-Sevres; on the S by Charente-Inferieure; and on the SW and W by the bay of Biscay. Its area, 2,600 sq. m., is equal to two of the largest counties in Britain; its pop., thinly scattered, was 376,184 in 1846; in 1852, 383,734. Its surface is almost entirely level, presenting no eminence whose elevation exceeds 450 ft. It is divided into three parts; the *bocage* or wood, the *marais* or marsh, and the plain. The first, taking its name from the tangled coppice-woods and woody thickets with which it is covered, is fertile in corn, wine, and pasture. The marsh, comprising the stripe contiguous to the coast on the S and W, is a succession of sand-hills, heaths, bogs, and salt-pools; but the pasturages are rich, and are covered with cattle and sheep of a larger size than is usual in France. The plain, formed of the tongue of land comprised between the woody part and the N limit of the department, is fertile, and fit for various kinds of culture: here hedges, timber-clumps, coppice, heath, and furze, alternate with rich corn fields, and smiling vineyards. About two-thirds of the surface is arable. The principal rivers are the two Sevres, the Vendée, the Lay, the Vie, and the Antise; but the general intersections of the dep. are by small canals and ditches. The exports consist of corn, cattle, bay salt, coal, flax, and, in a smaller degree, of iron, wool, and hides. The dep. is divided into the three arrondissements of Napoleon-Vendée, Sables-d'Olonne, and Fontenay. These are subdivided into 30 cantons, and 294 communes. It is memorable for the resistance here made to the republican army in 1793, 1794, and 1795, a resistance singularly favoured by the woods, thickets, and ditches of the country. It was attended for a time with great success, though commenced without any concert with the other royalists of France, and carried on for a season with very limited support from England. This region was also the scene of some sharp fighting in 1815. The inhabitants are a credulous and simple race, attached to old usages, and easily led by their clergy.

VENDE'E, a river of France, which rises in the dep. of Deux-Sevres; traverses the department of La-Vendée; and discharges itself into the Sevre-Niortaise, above Marana, after a SW course of 45 m.

VENDEN, a town of European Russia, in Livonia, near the Aa, 33 m. E by N of Riga. Pop. 1,300.

VENDENHEIM, a town of France, in Alsace, with 1,100 inhabitants.

VENDEUVRE, a commune and town of France, dep. of Aube, 13 m. W of Bar-sur-Aube. Pop. 1,880.

VENDHUILE, a commune and village of France, in the dep. of Aisne, arrond. of St. Quentin. Pop. 1,262.

VENDOLA, one of the Admiralty islands, of which it is the most eastern, in S lat. 2° 14', E long. 148° 9'. It is about 8 m. in circuit, is covered with cocoa trees, and populous. Being surrounded by a reef of rocks, it is inaccessible almost to boats.

VENDOME, a town of France, the capital of the dep. of Loir-et-Cher, situated on the r. bank of the Loir, 30 m. NE of Tours. For an old town it is tolerably well-built, containing several churches, an hospital, and the remains of a once magnificent castle. It has also pleasant walks, but is chiefly remarked for its public school or college, an establishment with considerable endowments, and good buildings. V. has a population of 8,000, and manufactures of coarse cottons, paper, leather, and gloves. Its environs are fertile, and picturesque.

VENDOTENA. See **PAUTELARIA**.

VENDRANGE, a village of France, in the dep. of the Loire, cant. and 5 m. W of St. Symphorien-de-Lay. Pop. 500.

VENDRELL, a judicial partido and market-town of Spain, in the prov. of Tarragona. The partido comprises 48 pueblos. The town is 42 m. W of Barcelona, on a height, 1½ m. from the shore of the Mediterranean, on which it has a small port, which is defended by two towers. Pop. 3,700. It has a parish-church and an hospital. Of its walls only portions now exist. The trade consists chiefly in wine and brandy.

VENDRES, a village of France, in the dep. of the Herault, cant. and 5 m. S of Beziers, on the bank of a lagune of the same name. Pop. 750. It has mineral baths.—The etang or lagune is 5 m. in length from N to S, 3 m. in breadth, and communicates on the SSE with the Mediterranean. It was formerly traversed by the Aude.

VENDRESSE, a village of France, in the dep. of Ardennes, 12 m. SSE of Mézières. Pop. 745. It has iron-forges.

VENEO, a district and town of Russia in Europe, in the gov. and 86 m. ENE of Toula, in the Venevka. Pop. 3,400.

VENER. See **WENER**.

VENERATA (MONTI), a mountain of Sicily, in the prov. of Messina, near Taormina, which rises to the height of 2,900 Parisian ft. above sea-level.

VENERIA-REALE, a market-town of Sardinia, in the div. and prov. and 6 m. NW of Turin, near the Stura. Pop. 2,780. It has a castle, with fine gardens, and a superb orangery. The culture of silk-worms forms the chief object of local industry.

VENERQUE, a town of France, in the dep. of the Haute-Garonne, cant. and 8 m. N of Auterive, on the r. bank of the Ariège, at the confluence of the Hesse. Pop. 1,100.

VENERSBORG. See **ELFSBORG**.

VENES, a commune of France, in the dep. of the Tarn, and cant. of Lautrec, 10 m. NNW of Castres. Pop. 1,210.

VENESME, a commune of France, in the dep. of the Cher, and cant. of Chateau-Neuf, near the Cher, 15 m. NW of Saint-Amand-Mont-Rond. Pop. 1,013.

VENETICO, a small island of the Ionian sea, Cape Gallo, near the SW extremity of the Morea, in N lat. 36° 41' 40", and E long. 21° 55' 20".

VENEUCO, a town of Sicily, in the prov. and district and 14 m. W of Messina.

VENEV, a town of Russia in Europe, in the

gov. and 83 m. ENE of Tula, on the Venevka, an affluent of the Oestr. It contains, besides the cathedral, seven parish churches, and about 600 houses, and has manufactories of silk fabrics and sail-cloth.

VENEZIA. See **VENICE**.

VENEZUELA, a republic of South America, comprising the territories of the old Spanish captain-generalship of Venezuela or Caracas; and extending between the parallels of 2° and 12° S, from New Grenada on the W, and Brazil on the S, to the Caribbean sea on the N, and the Atlantic on the W. The boundaries with the coterminous states are somewhat undetermined. Its area has been estimated at 410,000 sq. m.

Physical features. The great eastern chain of the Andes enters this republic from New Grenada, and runs in a direction nearly parallel with the coast, across the N part to the gulf of Paria. It is sometimes known under the name of 'the Maritime cordilleras of Caracas.' The most remarkable feature of the country is the vast plain which, extending from the Caqueta in New Grenada to the mouths of the Orinoco, constitutes the greater part of the surface. It chiefly consists of llanos or open plains, intersected by numerous rivers. The *masas* or elevated table-lands, also constitute a peculiar feature of this country. The Orinoco is the great river of the country, and has its whole course within the frontiers of V. See article **ORINOCO**. The rivers are numerous: those belonging to the basin of the Orinoco alone exceed 400. Every valley has its stream: and though many of them are not of sufficient size to be navigable, yet all afford ample supplies of water to irrigate the plantations on their banks. The principal of these, which run from the mountains of Caracas and Coro into the Caribbean sea, are the Zulia, the Metatan, the Guigae, the Tocuyo, Aroa, Yaracuy, and the Tuy. The rivers which rise on the S side of the chain, and flow to the Orinoco, are the Guarico, which receives some of the branches of the Apure, and then following a course parallel to that river, enters the Orinoco a short distance E of it. The Guarico, a very fine river, is joined, near its confluence with the Orinoco, by the Rio-Maneapra which flows through the plains of Calabozo. The Iguane, the Cachivame, and several others, which fertilise the vast uninhabited plains of the Orinoco, flow into that river to the W of the junction of the Apure. Most of these rivers swell in the month of April, and continue to overflow their banks during three or four months. They abound in alligators and fish. The Portuguese, formed by the union of the Pao and the Barquisimeto, flows through the greater part of V., and joins the Apure, 40 m. NW of its mouth. The lakes are not numerous, for we can hardly give that appellation to the sheets of water produced by the periodical swell of the Orinoco, or the rains, and which are generally without any depth. The lake of Valencia or Tacarigua is, however, a beautiful sheet of water, and of great extent. The lake of Maracaybo is rather a gulf of the Caribbean sea.

Climate and soil. The climate of V. is modified according to the situation. On the coast, and in the plains, a scorching heat prevails, accompanied in the latter with deluges of rain. In the mountain-valleys the air is in general pure and mild, and in some elevated parts even cold. On these mountains, which form a part of the great branch extending from the W to the gulf of Paria, divide the lands of the coast from the plains of the valley of the Orinoco, the climate is so singularly altered, that a traveller may observe the fruits of the tropics luxuriating at a short distance from those of Europe. To the S of this chain, lie the llanos or plains, which

stretch to the Orinoco, and are inhabited solely by herds of cattle, tended by mulattoes nearly as rude in nature and habits as the beasts they guard. On these plains the rainy season commences in April, and continues till November. The rain falls of taster in the morning than in the evening, and, on an average, generally occupy three hours of each day, during which period the plains nearest the rivers are converted into lakes of immense extent. From August to November, and the months of February and March, form the dry season. Earthquakes are of frequent occurrence.—The soil is fertile, and yields in abundance all the products of the West Indies, besides others which those islands do not possess. Its most noted commercial article is cacao, which is inferior to none grown in America; vanilla, maize, indigo, cotton, sugar, tobacco, and coffee are among the principal objects of cultivation; wild cochineal, dye-woods, medicinal drugs, gums, resins, balsams, sarsaparilla, sassafras, liquorice, squilla, storax, cassia, and aloes, here find that climate the most favourable to their growth; the immense plains in the interior feed multitudes of cattle, horses, and mules; in the valleys and on the mountains, sheep and deer are numerous. The jaguar and puma occur in the forests. All kinds of game are found in this country, the rivers of which also abound with fish.—Silver, tin, copper, coal, and salt are wrought.

Commerce.] The official tables of returns of trade by sea and navigation for the year ending 30th of June, 1844, show in their aggregate, as in their separate amounts of imports and exports, a considerable decrease as compared with the returns for the fiscal year preceding of 1842-3, and a larger decrease still, as compared with 1841-2:—

1842-4, Imports and exports together, about	£1,660,100
1843-5, ditto ditto	1,961,100
1841-2, ditto ditto	2,225,200

The decrease in 1843-4, as measured by 1841-2, was equal, therefore, to about 25 per cent. and of about 12 per cent. by 1842-3. The causes of this relaxation in the progress of national industry, which for several years down to 1841-2, in the exportation of indigenous products above all, had been regularly on an ascending scale, was attributable, in the first place, to unfavourable seasons, by which production was sensibly diminished, and to the extent the means of exchange and internal consumption were checked. V. is necessarily an agricultural country, whose resources principally consist in the cultivation and export of coffee, cacao, tobacco, *dibí dibi*, dry hides, and the breeding of cattle, the latter being exported chiefly to the British and French West Indies. Although so small a state, it is already a considerable consumer of British wares. The value of British produce exported to V. in 1840 was £279,743; in 1845, £390,149; in 1850, £301,094; in 1852, £273,738. The duties on the traffic of the port of La Guayra, the port of the capital, Caracas, for four years was as follows:—

From 1842 to 1843,	£31,948 d.
1843 1844,	732,115
1844 1845,	795,651
1845 1846,	891,502

The trade of the port of La Guayra, for the years stated, compiled up to the 5th of October in each year, was as follows:—

	Coffee.	Cacao.	Cotton.	Sugar.	Indigo.	Hides.
Quintals.	Quintals.	Quintals.	Quintals.	Quintals.	Quintals.	Number.
1842.	147,474	28,634	510	3,268	1,074	31,684
1844.	123,008	28,739	236	3,508	702	45,242
1846.	122,912	29,416	767	5,153	489	44,873
1846.	151,975	32,476	240	4,562	517	35,580
1847.	126,812	37,576	1,128	7,040	621	49,773

The total value of exports in 1845 was £894,745; of imports, £793,877.

Population.] The pop. of the republic was returned at 780,000 in 1800; in 1839 at 945,247; in 1851, at 1,356,000, whites, Indians, and Negroes. Upwards of one-half are people of colour. The Negroes, 49,000 in number in 1839, were emancipated in 1854. The independent Indian tribes may have an aggregate pop. of 50,000.

Government and revenue.] The government is vested in a senate and a house-of-representatives. The revenue,—of which almost the whole is derived from customs' duties,—suffered a material diminution from the reverses of industry and commerce in 1843-4. In 1840-1, the customs rendered nearly £360,000 to the treasury; in 1843-4, the return was only £264,400. By executive decree of the 16th of September, 1840, the debt was acknowledged to be 28½ per cent. of £6,625,950, equal to £1,888,395 15s., or 11,302,473 d. 44 c. of active debt, bearing interest payable half-yearly from April 1, 1840. Of deferred debt, the same amount, bearing interest from October 1, 1852. No interest has been paid on the active debt since the 1st of April, 1847. The arrears of interest to the 1st of April, 1851, were £192,146. The first year's interest on the deferred debt, payable on the 1st of April and the 1st of October, 1853, at 1 per cent. per ann., is £15,239, increasing yearly ½ per cent.: that is £3,809, until it attains the maximum rate of 5 per cent. per ann.

Divisions.] The republic is divided into the 5 departments of Maturín, Caracas, Zulia, Apure, and Orinoco, which are subdivided into 18 provs. Its chief harbours are those of Cumana in the gulf of Cariaco and Puerto-Cabello. Codazzi gives the following as the pop. of these provinces in 1841:—

Caracas,	242,888	88-4	to the sq. league.
Carabobo,	96,867	1-45	"
Barquisimeto,	112,754	144-	"
Coro,	40,476	43-	"
Maracibo,	37,800	15-	"
Trujillo,	44,788	123-7	"
Mérida,	63,116	65-4	"
Baños,	109,497	64-9	"
Apure,	16,479	3-6	"
Barcelona,	33,103	45-1	"
Cumana,	56,871	44-6	"
Margarita,	18,305	494-7	"
Guayana,	20,149	2-2	"

VENGEONS, a commune of France, in the dep. of the Manche, cant. and 2 m. NE of Sourdeval. Pop. 1,768. It has manufactories of iron-ware and of paper.

VENGOVA, a town of Russia in Europe, in the gov. of Vilna, district and 53 m. SE of Telch.

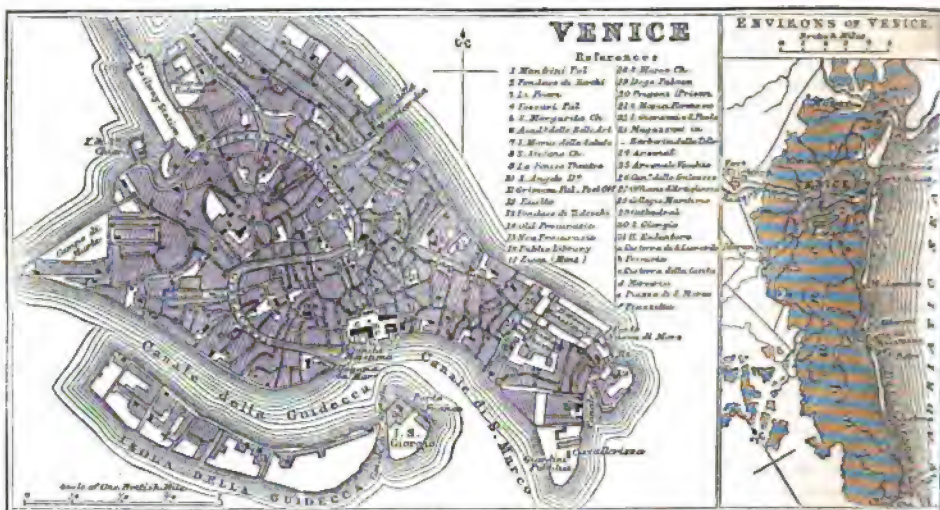

VENIA, a town of Spain, in the prov. and 36 m. SW of Oviedo. Pop. 420. In the vicinity are copper-mines, now unwrought.

VENICE (PROVINCE OF). See article LOMBARDO-VENETIAN KINGDOM.

VENICE, in Italian *VENEZIA*, in German *VENEDIG*, the capital of Austrian Italy, or of the Lombardo-Venetian kingdom, situated in the dogado of the same name, on 72 little islands, among the shallows which occur near the head of the Adriatic gulf, in N lat. 45° 25' 9", E long. 12° 20' 2", 70 m. NE of Mantua, 115 m. NE of Florence, 140 m. E of Milan, and 226 m. N of Rome. A railway viaduct of 222 arches (*α α α*) connects the city with the railway to Padua on the mainland. The lagoon, on the N division of which the city stands, is about 5 m. distant from the mainland, being a kind of small inner gulf separated from the larger one by some islands, or tongues of land, which in a great measure break the force of the Adriatic storms before they reach the *laguna* or lake; yet, in high winds, the navigation of the lake is dangerous to gondolas, and sometimes the gondo-

liers will not even trust themselves in the canals that intersect the city. This lagoon is from 25 to 30 m. long, and about 5 m. broad. It is protected from the fury of the Adriatic, by three tongues of land, which are hung in a disunited chain from N, to S, the most northern, which is immediately be-

fore the city at 1 m. distance, being called Lido, the second Palestrina, and the last Salto-Marina. Between those tongues of land are *portos* or channels from the Adriatic, by which ships not exceeding in the main passage 17 ft., and in the other 10 ft. draught of water, enter; but these *portos* are de-

fended by forts on both banks, so that each passage is considered to be hermetically closed to a hostile squadron. The most southern entrance, where exists the greatest facility for landing, is protected by an additional fort, called the Brondolo, built on the canal leading to the lagoon, and this place, though 20 m. distant from the city, is considered to be the most important point, and great care has been taken in rendering it very strong. The passages are called, beginning at the N, Porto-di-Lido, Porto-di-Malinocco, Porto-di-Chioggia, and Porto-di-Brondolo. The whole of these *portos*, and the entrance to the lagoon, is again secured by a long bar or sand bank, which breaks them from N to S, and where the deepest water, at nearly 2 m. distance, is 26 ft., shoaling on the bank itself to 5 or 6 ft., and near the shore to 3 or 4 ft. Nature and art have thus rendered V., in common opinion, inaccessible to hostile operations on the side of the Adriatic. The N extremity of the lagoon is broken up into marshes and little specks of land where no footing for man or beast exists, and therefore on that side no precaution need be taken. The accessible part may be said to be the W shore of the lagoon, from the said marshes on the N, to the fort of Brondolo on the S, making a line to be defended of nearly 40 m. in entire extent. The high road from Padua to Venice touches on the nearest point, about 4 m. distant from the city, and at that point an immense fort has been built, which is called Malghera, on the possession of which the safety of the city depends. [Times.] Most of the houses of the city have a door opening upon a canal, and another communicating with the street, by means of which, and of the bridges, a person may visit any part of the city either by land or water. The streets and canals are generally very narrow, but the great canal is 100 ft. broad, and meanders through the middle of the city. Here "the whole scene, under the brilliant light of a noon-day sun, is full of movement and colour. As soon as the steamer has dropped anchor at the entrance of the Grand canal, a little fleet of gondolas crowds round her, and, as they receive the passengers, dart off in the most easy and graceful manner possible, their steel prows

flashing in the sun, and their keels tracing a line of pearl upon the bright green water. The long wave which the prow turns over is dashed against a wall of marble-fronted palaces, the names of which, carelessly mentioned by the gondolier, awaken trails of golden memories in the mind. The breadth of the 'silent highway' allows the sun to lie in broad rich masses upon this imposing gallery of architectural pictures, and to produce those happy accidents of light and shade which the artist loves. High in the air arise the domes and spires of the numerous churches with which wealth and devotion have crowded the islands of V., the bells of which are ever filling the air with their undulating streams of music. Everything is dreamlike and unsubstantial; a fairy pageant floating upon the waters, a city of cloud-land rather than of the earth. The gondola itself in which the traveller reclines, contributes to weave the spell in which his thoughts and senses are involved. No form of locomotion ever gratified so well the two warring tendencies of the human soul, the love of movement and the love of repose. There is no noise, no fatigue, no danger, no dust. It is managed with such skill and so little apparent effort, that it really seems to glide and turn by its own will." This position of V. in the midst of waters, gives it indeed a singular appearance from a distance. Its domes and spires, its churches and public buildings, appear to the spectator, particularly when approaching by sea, to float, as our quotation expresses it, on the surface of the waves. The marble domes of the churches are very white; the palaces are of a pleasing grey colour; and the varied mass of buildings is chequered with intermingling red and white, as bricks or stucco prevail in their external construction. The streets, or rather lanes, are paved with flags or marble slabs, having small sewers for carrying off the filth. The ordinary dwellings are built of brick, and in general covered with wood. Without having arcades, as is the case in many towns in the N of Italy, they are in general provided with balconies. From the extreme narrowness of the streets, their houses are in general gloomy, and are miserably deficient in that com-

THE HARBOUR, YOKOHAMA.

modious distribution of parts which marks the dwellings of Britain, the Netherlands, and the improved parts of France and Germany. The rooms too are often wretchedly small. The general height is three or four stories. The larger houses are commonly of a square form, with an inside court containing a cistern, into which water flows from the roof, which, after being filtrated, serves for domestic purposes.

Quarters and Buildings.] The length of the city is somewhat more than 2 m.; its breadth $1\frac{1}{2}$ m.; its circuit 6 m.; so that its form, without being either square or circular, is compact. It is divided into two parts nearly equal, by the Canalazo or Grand canal (*b b b*), which winds through its whole length in a serpentine form. Exclusive of the general division into north and south by this canal, V. is separated for the purposes of police into six wards, of which the most eastern adjoins the castle, and bears the name of Sestieri-di-Castello; the Sestieri-di-San-Marco lies more towards the centre of the city; that of Canareggio comprises the NW division. These three are to the N of the great canal; the remaining quarters are situated to the S of it. That of San-Paolo is in the SE; that of Sante-Croce in the W, including several small gardens; that of Dorso-Duro forms the most southern division of the city, bordering on the Canale-della-Guidecca (*c c*). The aspect of V. is stately, and even magnificent, whether we look to its public or its private edifices; for though few of the buildings are in a pure style of architecture, the general effect is grand and imposing. In regard to the streets, as they are termed, their breadth is in general only 5 or 6 feet: in many places still less. The only exception is the street called the Merceria, situated near the centre of the city, and containing shops of all kinds; but even of that the breadth is insignificant, varying only from 12 to 20 ft. The only open place entitled to the name of square, is the Piazza-di-San-Marco (*A*), an oblong of 280 ft. in length, by nearly 100 ft. in breadth, enclosed by handsome and even splendid buildings, singularly contrasted in their outward decorations. Of these the principal are the churches of San-Marco and Geminiano; the palace formerly occupied by the doge, and the buildings called the Procurazie. This small but elegant square, a miniature of the Palais-Royal of Paris, is bordered by arcades containing elegant shops and coffee-rooms, which, when lighted at night, have a splendid appearance. It forms the central point of the gaiety and amusements of V., the resort of foreigners, and of loungers of every description. The Piazzetta (*B*) is a smaller opening leading, at right angles, from the square of San-Marco to the sea, and having on the one side the palace of the doge, on the other the public library, with its pillars of granite. This spot presents, from the concourse of people, an animated and interesting scene. The only other open spaces in the city are in the front of some of the churches, and at each end of the Rialto.

V. contains 360 bridges; but the most of them are only single arches thrown over the canals. The Rialto (*d*), a single arch thrown over the narrowest part of the Grand canal, is of marble, 90 ft. in span, and 24 ft. in height; but its beauty is impaired by two rows of booths or shops which divide its upper surface into three narrow streets. The prospect from the Rialto is lively and magnificent; but it is almost the only one in Venice; for, except the Canal-Grande and the Canaletto-dello-Canareggio (*a n n*), all the other streets are narrow: some of them have no quays, and the water literally washes the houses. In rowing along these canals, there is scarcely an agreeable object to cheer the view; and the stench

which at certain seasons exhales from the waters is most offensive.—Some parts of the city exhibit fine specimens of the architecture of Palladio. The chief buildings are the ancient ducal palace, the churches of San-Marco and San-Geminiano, the old and new Procurazie, which contain the museum, the library of St. Mark, consisting of 65,000 volumes and 5,000 manuscripts, and nine large apartments belonging to the procurators of St. Mark. All these buildings are of marble, and are situated in and around the Piazza-di-San-Marco. The patriarchal church of San-Marco, though one of the richest and most expensive in the world, does not immediately attract the eye. Its architecture is of a mixed kind, mostly Gothic, yet many of the pillars are Grecian. The outside is incrustated with marble, and the inside ceiling and floor are of the finest marble; the whole is crowned with five domes. The front which looks to the palace has five brazen gates with historical bas-relievs; over the principal gates are placed the four famous bronze horses of incomparable workmanship, originally brought to V. from the hippodrome of Constantinople, and said to have been executed by the famous Lysippus. The principal entrance of the ducal palace, 'a vast and sumptuous pile,' is called the Giant's Stair on account of two colossal statues of Mars and Neptune placed at the top. Under the portico, were the gaping mouths of two brazen lions. In an opening from the ducal palace to the sea, stood two granite pillars, lofty and massive, between which criminals were publicly executed. There is a communication between the ducal palaces and the state-prisons by a gloomy bridge,—Il Ponte-de-Sospiri or 'The Bridge of Sighs.' The cells of this prison, made of massy marble, the architecture of the celebrated Sansovino, are not only dark and black as ink, but being surrounded and confined with huge walls, the smallest breath of air can scarcely find circulation in them. They are about 9 ft. square on the floor, arched at the top, and between 6 and 7 ft. high in the highest part. There is to each cell a round hole of eight inches diameter, through which the prisoner's daily allowance of twelve ounces of bread and a pot of water is delivered. The furniture of each cell is a little straw, and a small tub; nothing else. These Publiche-Prigioni can contain about 500 prisoners. They range along the narrow canal which skirts the palace of San-Marco.

The churches built or designed by Palladio, bear witness to the taste and genius of that distinguished architect. Others, and indeed the greater number, are in the Saracenic, or, as it is currently termed, the Gothic style, and are less distinguished by elegance of structure, than by richness of interior decoration. The church of Santa-Maria-della-Salute, the work of Palladio, is an elegant structure, open to the great canal, and built outside and in, of marble, with a moderate share of ornament. The church Il-Redemptore is also an elegant building. The cathedral of Venice, dedicated to St. Peter, on an island at the E end of the city, is built of Istrian marble, and adjoins the former residence of the patriarch of Venice. The church of San-Georgio is remarkable for its front of marble and its cupola; that of San-Giovanni-e-San-Paolo is a large Gothic edifice surmounted by a cupola, and is the Westminster abbey of Venice, containing the tombs of many of its defenders and doges.—Of the palaces or mansions of the great families, the most conspicuous are those of Grimani, now the post-office, Grassi, now an hotel. Pisani, Corra-della-Regina, Foscari, Manfrini, and Cornaro, all more remarkable for their size than for elegance or symmetry. The arsenal is a

commodious and even magnificent building, situated on an island near the E end of the city. It is defended by a rampart of nearly 2 m. in extent, as well as by the surrounding water; and has before its gates two great pillars, with the four gigantic lions in granite, which stood formerly on the Piræus at Athens. Its halls are lofty and commodious; and it contains four basins or wet docks (0000), and several dry docks and slips. On the Grand canal, not far from the Rialto, stands the Fondaco-di-Tedeschi (m), long a depot for the goods of German merchants, now the council-house of the city. Of theatres, V. has no less than 6 great and small; but several of them are open only during the carnival. The lyceum has a rich cabinet of natural history; and among the educational institutions are two royal gymnasia, a normal high school, a marine college, and the seminary of the Saluta. The Armenian convent of San-Lazaro is a fine establishment situated upon a small island to the NW of the Lazaretto.

Population.] The pop. of V. at the end of the 17th cent., amounted to nearly 200,000. The census of 1825 returned it at 109,927; that of 1846, at 127,925. Venice has a fine and salubrious climate. While Paris has one person of 60 years of age to every 200 inhabitants; in V. the proportion is one to every 116. In Paris you have one octogenarian to every 900 inhabitants; in V. the proportion is one to every 491. The characteristics of the climate of V. are a summer-heat much greater than is experienced in England; a winter not of great length, but sharp, particularly during the prevalence of a NW wind which blows across the interior of Switzerland and the Alps. Rains are frequent, particularly in spring; and there being no springs or wells, the inhabitants are supplied—as in many towns of Holland—with water collected in cisterns, from the tops of the houses: this frequently wants the freshness of running water. But the chief privation to a Venetian is an exclusion from fields and gardens, the inconvenience of walking in narrow lanes, and the ascending and descending steps at every bridge which crosses a canal.—The artisans of this city form several corporations, and each corporation maintains a school, yet the Venetians are little more informed generally speaking than other Italians. Their costume has not materially changed during four centuries. As for the wealthy classes, Simond informs us they pass their time in the following manner: people of fashion rise at 11 or 12 o'clock,—pay a few visits and idle away their time till three, when they dine; in summer they take an hour's siesta after dinner; they dine and go to the coffee-house or casino till nine,—then to the opera, which is another casino,—then to the coffee-house again for another hour or two,—and seldom go to bed in summer before sunrise. There remain only two or three families of the old patrician caste in V. The *gondolieri* form a distinct class of the pop. Venice was the birth-place of Algarotti, Gazzi, Goldoni, the Paoli, and Bembo.—The civil administration of V. does little to benefit the city. The water, collected, as described, in cisterns, is very bad—in fact, all the potable water is brought in boats from the land; and though a French company has, with the permission of the government, made a number of Artesian wells, the water obtained from them has a sulphurous taste, which renders it quite unfit for drinking. It would be easy to lay pipes along the railway bridge that connects V. with the mainland, but nothing is done, and this necessary element continues to be brought in boats, as it was centuries ago. During the late siege, upwards of 5,000 per-

sons died of cholera within the city. There are numerous benevolent institutions within the city, the total annual endowments of which have been stated at 50,000 florins = £58,000; and it has been calculated that out of a pop. of 130,000, not fewer than 52,000 are in receipt of charitable relief in one form or another.

Manufactures and commerce.] The manufactures of V., if not extensive in any one branch, are of considerable diversity: they consist of woollens, serges, canvas and ropes, gold and silver stuffs, velvet, silk stockings, and lace, which is made chiefly on the adjacent island of Murano, artificial gems, glass, glass beads, soap, and paper. The goldsmiths of V. have ever been famed for the skill and beauty of their productions. The glass-works are said to employ 4,500 men. Printing is carried on here more extensively than in any other town in Italy; and books are supplied by wholesale to the Grecian islands, Constantinople, Spain, and Portugal. The price is as low as that of books in France; the type is usually good, but the quality of the paper inferior.—Napoleon is said to have made the following memorable remark with regard to this city of the seas:—"V. is the best-situated port for commerce in Italy. The goods from Constantinople and the Levant reach it by the shortest way in traversing the Adriatic. From there they can be spread to Upper Italy and Turin by the Po, and to Germany by mounting the Adige to Batzen, and from thence on to Ulm, Augsburg, Munich, and Nuremberg. V. is the port of the higher Danube, the Po, and of the Adige; nature intended it to be the depot for the Levant, Italy, and southern Germany." Napoleon at that time knew nothing either of railways or steamers; but V. certainly possesses the elements of a prosperous commercial place. The canals, that come to the very doors of the houses, render the discharging of vessels easy; indeed, almost all circumstances combine to create a hope that it may yet revive from neglect and decay. In the time of the city's prosperity the Venetian ships of the largest class, denominated *galassas* were fitted up for the double purpose of war and commerce. Some of them carried 50 pieces of cannon and crews of 600 men. These vessels, sometimes also called *argosies* or *argosies*, had an early intercourse with England. Sir William Monson mentions that the last argosie that sailed from V. for England was lost with a rich cargo and many passengers on the coast of the Isle of Wight, in 1487. Some idea of the commerce and maritime power of V., in the 15th century, may be formed from the following account given by Dara of her trade at that epoch:—"In the beginning of the 15th cent., the annual value of the goods exported from V. by sea, exclusive of those exported to the states adjoining her provinces in Lombardy, was estimated, by contemporary writers, at 10,000,000 ducats; the profits of the out and home voyage, including freight, being estimated at 4,000,000 ducats. At that period the Venetian shipping consisted of 3,000 vessels of from 100 to 200 tons burden, carrying 17,000 sailors; 300 ships with 8,000 sailors, and 45 galleys of various size kept afloat by the republic for the protection of her trade, having 11,000 men on board. In the dockyard 16,000 labourers were usually employed. The trade to Syria and Egypt seems to have been conducted principally by ready money, for 500,000 ducats are said to have been annually exported to those countries; 100,000 were sent to England." Subsequent to the cession of V. to Austria, it seems to have been the policy of the government to encourage Trieste in preference to V.; and the circumstance that Trieste was a free port whilst Venice

was not, placed the latter at a disadvantage. Since 1830 a more equitable course has been pursued; for in that year V. was also constituted a free port, and has continuously shared almost the same privileges as were conferred on Trieste. The limits of the free port are declared to extend from the port of Malamocco to the dyke of Garzina near Sant' Erasmo. Within these limits, trade is perfectly free, and no customs' duties are levied. There are custom-houses at Treporti, Mazzorbo, Campalto, Fusina, and San Pietro in Volta, forming a second line around the first. The intermediate space is the *circondario doganale*, or 'territory of the customs.' Vessels of all nations are free to enter the ports of Lido and Malamocco without paying customs' duties. Certain canals are pointed out, by which merchandise may be shipped to the main land. Fishermen's boats may go to any spot of the main land, if licensed, and not laden with goods. Salt, tobacco, nitre, and gunpowder, being monopolies of the state, are not allowed to be unshipped within the precincts of the free port, except in the custom-house. "Owing to the circumstance of V. being a free port, and the fact of her adjacency to the Papal states, a comparatively large contraband trade in various goods imported to the city, or manufactured there, is well known to be carried on with those states and the small duchies of Northern Italy. It has been estimated that full two-thirds of the coffee consumed in Lombardy is smuggled. Some trade, in vessels of insignificant size, is also carried on with the opposite coasts of Dalmatia, Albania, and the Morea. The imports of V. consist of wheat and various kinds of grains, from the adjoining provinces and from the Black sea; olive oil, principally from the Ionian islands; cotton stuffs and hardware from England; colonial produce—through England, the United States, and Brazil—with dried fish and dyeing materials. Her exports comprise grain, raw and wrought silk, paper, fruit, cheese, some oil, and wine. The trade with the interior is carried on by means of flat-bottomed vessels, which, passing through the lagunes, enter the numerous rivers and canals, freely traversing the river Po and its tributaries, and penetrating the country to a great distance. These convey salt, sugar, coffee, and other imported or manufactured necessities, returning with an exchange of grain, silk, flax, and hemp, cheese, wine, and fire-wood. I was particularly struck," says a recent writer in the *Morning Chronicle*, "with the insignificant size and shallow draught of the trading vessels in the port of V. Many scores, if not hundreds, of two-masted nondescript craft—more like our pilot boats than any kind of vessel we use—whose burthen at most cannot be more than 20 tons, lie moored in tiers before the Molo, and off the Canale-della-Giudecca. The merchandise principally transported by these vessels which I personally noted, were corn and rice, wine and oil, timber and fire-wood—a large trade in the latter—fruits, including vast quantities of melons, and pumpkins of every variety of form, size, and colour, bricks, bottles, and matting. A few brigs and schooners engaged in the foreign trade, amongst which I recognised but one English vessel, lay at anchor before the town, outside the Austrian frigate before-mentioned, a few hundred yards from the shore; in short, the shipping business appeared to go forward languidly. The soul of trade seemed to have departed. The sailors, sleeping in rows on the marble-paved quays, or shading themselves under the boats slung on the deck, and fanned by idly flapping sails, seemed as sluggish as the sea, which, so completely landlocked in the harbour by its outlying islands, has here no swell, nor

any further motion than a gentle ripple. Such as I have described was the flourishing commerce of Venice at the zenith of her prosperity—such is its degenerate and languishing condition at the present day. It would seem as though physical as well as institutional causes are operating against her; for her harbour is choking, her trade transferred to Trieste, and though restored to the dignity of what is there termed a free port, she has still fiscal regulations that impede her advance by encumbering trade. The physical position of V. precludes her from emulating, much less rivalling, Trieste as a port for commerce; a wise policy, therefore, should suggest to the Venetians that the only hope they have of recovering their ancient wealth and splendour is by application to manufactures, for which the abundance of cheap houses, warehouses, and factories, united with the low value of labour, offer them peculiar advantages. The commerce of Trieste is more than fourfold that of V. It has a port always approachable—so deep are the soundings—whereas the entrances to V. by the most favoured channels—those of the Lido and Malamocco—are insufficient for ships of heavy draught, having at most but 16½ ft. of water, and the port is gradually though not rapidly filling."

History.] The history of V. is sketched in the Historical paragraph to our article on the LOWBARDO-VENETIAN KINGDOM. During the revolutionary movement of 1848, V. endured four successive weeks' storm of shot and shell from the Austrian batteries, but no mischief of any serious extent was done to the buildings, and only four non-combatants lost their lives, though the men in arms were slaughtered by wholesale in the lines, and want of food, fever, and the cholera made unheard-of ravages among the pop. This extraordinary fact is thus accounted for. In the first place the Imperial batteries were 3 m. removed from the centre of the town—a distance at which no shells reached, and at which cannon-shot fell half-spent and nearly powerless. The bomba, fortunately for the city, only demolished the poorest quarter bordering on the Laguna; the balls knocked in a hole when they struck a palace, and then their vital force expired. The nearest point on which a battery could be placed was a French league, and a third removed from the centre of the city; and the cannon were all fired at an angle of 45, so that the effect was what is called that of 'curved artillery.' Had V. been well provisioned, or the blockade by sea and land not been strictly enforced, the city would not have been captured; but hunger and the cholera did the work of the besiegers effectually, and it surrendered only when hope of relief became extinct.

VENICE, a township of Cayuga co., in the state of New York, U. S., 144 m. W of Albany. The surface is undulating, and is drained by Salmon river. The soil consists chiefly of gravel and clay loam. Pop. in 1840, 2,105; and in 1850, 2,028.—Also a village of Erie co., on the S side of Sandusky bay, at the confluence of Cold creek, and 99 m. N by E of Columbus. Pop. in 1840, 400; and in 1850, 450.—Also a township of Seneca co., in the same state. Pop. 1,222. It contains two villages named Attica and Caroline.

VENICE (GULF OF). See ADRIATIC.

VENISSIEUX, a commune of France, in the dep. of the Isere, cant. and 6 m. N of St. Symphorien-d'Ozon. Pop. 2,415.

VENIZY, a commune of France, in the dep. of the Yonne and cant. of Briennon. Pop. 1,578.

VENLOO, a fortified town of Holland, capital of a cant. in the prov. of Limburg, 14 m. NNE of Ruremonde, on the r. bank of the Maas, in N lat. 51° 22' 16", and E long. 6° 10' 15". Pop. 7,179. It has numerous distilleries, oil-mills, bleacheries, tanneries, breweries, manufactories of spangles and needles and of snuff, and salt-refineries, and carries on an active trade. The environs are unhealthy, consisting chiefly of marshy plains. V. is of considerable antiquity. It made part of the Hanseatic league. In 1702 it was taken by the allies under the Duke of Marlborough. Opposite on the l. bank of the river is the fort of St. Michel.

VENN, a village of Prussia, in the regency of

Dusseldorf, and circle of Gladbach. Pop. 352.—Also a village of the circle of Dusseldorf. Pop. 200.

VENNEBECK, a village of Prussia, in the regency and circle of Minden. Pop. 448.

VENNEBERG, a haerad of Denmark, in Jutland, in the stift and to the NW of Aalborg. Pop. 6,600.

VENNHAUSEN, a village of Prussia, in the regency and circle of Dusseldorf. Pop. 320.

VENNIKEL, a village of Prussia, in the regency of Dusseldorf, and circle of Geldern. Pop. 260.—Also a village in the circle of Krefeld. Pop. 480.

VENNINGEN, a village of Bavaria, in the circle of the Pfalz, and cant. of Edenfoben. Pop. 1,036.

VENN-OTTERY, a parish of Devonshire, 3 m. SW by S of Ottery-St. Mary. Area 918 acres. Pop. in 1831, 133; in 1841, 105.

VENOE, an island of Denmark, in Jutland, in the stift of Aalborg, bail. of Ringkoebing, in the Lym-fjord. It is 6 m. in length from N to S, and $1\frac{1}{2}$ m. in breadth. Its coasts abound with fish.

VENOGE, a river of Switzerland, in the cant. of Vaud, which issues from the heights commanding the village de L'Isle, runs first E, then S, passing near Cossonay, and after a course of about 15 m., discharges itself into the lake of Geneva, between Lausanne and Morges.

VENOISE (La), a mountain of Sardinia, in Savoy, between the provinces of Maurienne and Tarantaise, in N lat. $45^{\circ} 24' 15''$, and E long. $6^{\circ} 49' 12''$. It has an alt. of 3,863 metres, or 12,674 ft. above sea-level, and is one of the chief summits of the Alps between the Arc and upper course of the Isere.

VENOSA, a town of Naples, in the prov. of the Basilicata, district and 11 m. E of Melfi, on a plateau near the Ofanto. Pop. 6,000. It is well built and has a fine square, many handsome private houses, a magnificent cathedral, 5 parish-churches, and an abbey, in the church of which are several fine tombs in marble, amongst others, that of William surnamed Bras-de-fer; there are besides several convents, an hospital, two charitable institutions, a bank and some Roman antiquities. In the vicinity is a fine aqueduct, by which the town is supplied with water. V. is noted as the birthplace of Horace. It was the *Venusia* of the Samnites, and was taken by the Romans at an early period of the Republic.

VENOY, a village of France, in the dep. of the Yonne, cant. and 3 m. E of Auxerre. Pop. 1,000.

VENRAY, a town of Holland, in the prov. of Limburg, district and 21 m. N of Buremonde. Pop. of district, 4,340. It has extensive manufactories of linen, shoes, leather, and vinegar, several dye-works and breweries.

VENTABREN, a commune of France, in the dep. of the Bouches-du-Rhone and cant. of Barre, on a height commanding a fine prospect. Pop. 1,714. It has an oil-mill, a bleachery, and a copper-foundry.

VENTANA (SIERRA-), a mountain-ridge of Buenos-Ayres, in S lat. $38^{\circ} 5'$. It attains an alt. of at least 3,500 ft.

VENTAS-CON-PENA-AGUILERA, a village of Spain, in the prov. and 18 m. SW of Toledo, amid the mountains of that name. Pop. 1,150. The making of charcoal, and the granite quarries of the adjacent mountains, form the chief employments of the inhabitants.

VENTAS-DE-RETAMOSA, a town of Spain, in the prov. and 21 m. N of Toledo. Pop. 515.

VENTAVON, a commune of France, in the dep. of the Hautes-Alpes and cant. of Laragne, 21 m. SW of Gap. Pop. 1,100.

VENTEROL, a village of France, in the dep. of the Drome, cant. and 3 m. NW of Nyons, on the

slope of a hill. Pop. 1,458. It has an active trade in oil and in truffles.

VENTEUIL, a commune of France, in the dep. of the Marne, cant. and 7 m. NW of Epernay, near the Marne. Pop. 1,102. It has distilleries of brandy.

VENTIMIGLIA, a town of Sardinia, capital of a mandemento, in the prov. of San-Remo, 24 m. NNE of Nice, on the Roya, at its entrance into the gulf of Genoa. Pop. 5,000. It is the see of a bishop, and has a college, a theological seminary, an arsenal, and a small port. The fortifications, which were destroyed by the French, were renewed in 1832.

VENTIPUR, a village of Cashmere, on the r. bank of the Jelum, 22 m. SE of Sirinagar.

VENTLUE (La), a market-town of France, in the dep. of the Pas-de-Calais, 11 m. NE of Bethune. Pop. 3,950.

VENTNOR, a village on the SE coast of the Isle of Wight, in the Undercliff district, between Bonchurch and St. Lawrence. It occupies a fine commanding terrace on the cliff; and has rapidly risen into estimation as a watering-place. Pop. in 1851, 2,569.

VENTOLIENE, an island of Naples, in the prov. of the Terra-di-Lavoro, in the gulf of Gaeta, to the N of Ischia. Pop. 400. It has a harbour and extensive fisheries.

VENTOLO, an island of the South Pacific, in the group of the Admiralty islands, in S lat. $2^{\circ} 14'$, and E long. $148^{\circ} 10'$. It is surrounded by coral reefs, and from a distance appears a barren rock. It contains, however, some fertile tracts, and maintains a numerous population.

VENTOSA (La), a town of Spain, in the prov. and 15 m. NW of Cuenca, in a hilly but fertile locality. Pop. 686. It has an hospital and a fortress now in ruins. The spinning of yarn for the cotton manufactures of Cuenca forms the chief object of local industry.

VENTOSA-DE-LA-CUESTA, a town of Spain, in the prov. and 18 m. S of Valladolid, on an arid hill. Pop. 320. It has a distillery of brandy.

VENTOSA-DEL-RIO-PISUERGA, a town of Spain, in the prov. and 27 m. from Palencia, in a fine valley, near the Pisuerga. Pop. 300. It has several spinning-mills.

VENTOUX, a mountain of France, in the dep. of the Vaucluse, and cant. of Malaucene, to the NE of Carpentras. It forms a ramification of the Alps, running from E to W, and attains an alt. of 1,960 metres = 6,430½ ft. above sea-level. It derives its name from the violence of the winds which rage around its summit.

VENTRON, a commune of France, in the dep. of the Vosges, cant. and 5 m. E of Saussure. Pop. 1,118. It has manufactories of calico, and a considerable trade in cheese.

VENTROSA, a town of Spain, in the prov. and 33 m. from Soria, at the foot of the Sierra d'Orbica, near the Najerilla. Pop. 694.

VENTRUP, a village of Prussia, in the regency of Munster, and circle of Narendorf. Pop. 200.

VENTRY, a parish, containing a village of the same name, $3\frac{1}{2}$ m. WSW of Dingle, in co. Kerry. Area 4,439 acres. Pop. in 1841, 2,426.

VENTURA, an island of Brasil, in the bay of Angra-dos-Reis, in the prov. of Rio-de-Janeiro.

VENTURADA, a village of Spain, in the prov. and 27 m. of Madrid, in a sterile locality. Pop. 168. It suffered much from the French in 1808.

VENUS (Point), a headland forming the N point of the island of Tahiti or Otahete, in the S Pacific, near the bay of Matavae, in S lat. $17^{\circ} 29' 21''$, and W long. $149^{\circ} 29' 18''$.

VENUSBERG, a village of Saxony, in the gov. of Zwickau and bail. of Wolfenstein. Pop. 932.

VENWEGEN, a village of Prussia, in the regency and circle of Aachen. Pop. 448.

VENZOLASCA, a commune of France, in Corsica, capital of the cant. of Cavinca, in the arrond. and 17 m. S of Bastia. Pop. 728. It has a small port.

VENZONE, a town of Austria, in Lombardy, in the gov. of Venice, in the deleg. and 21 m. NNW of Udine, on the road thence to Tarvis, and on the Tagliamento. Pop. 3,380.

VEOVETZ, a town of Russia in Europe, in the gov. and 66 m. ESE of Grodno, and district of Honim.

VEP. See **WEPPENDORF**.

VEPRIK, a town of Russia in Europe, in the gov. of Poltava, district and 9 m. E of Gadrach.

VEPRINITZ, a market-town of Austria, in Illyria, in the gov. of Trieste, and circle of Istria, 3 m. SW of Castua.

VER, a commune of France, in the dep. of the Manche and cant. of Gavray, 15 m. S of Coutances, at the confluence of the Sienne and Airon. Pop. 1,188.—Also a village in the dep. of the Calvados, and cant. of Ryes, 10 m. NE of Bayeux. Pop. 1,400.—Also a village in the dep. of the Oise, cant. and 7 m. SW of Nanteuil-le-Haudouin. Pop. 650. It has a quarry of freestone. This village appears to be the *Palatium Venum* of ancient chronicles.

VERA, a judicial partido and town of Spain, in the prov. of Almería. The partido comprises 10 pueblos. The town is 42 m. NE of Almería, in a level tract near the sea, and enjoying, it is said, the mildest climate in Andalusia. Pop. 8,000. It has a parish-church, a convent, an hospital, and possesses numerous saltpetre works, manufactories of ropes and of pottery, and extensive fisheries. It has a small port, and carries on an active trade in corn. In the vicinity are the ruins of the ancient *Urci*. The adjacent Sierra-Cabrera contains mines of iron, lead, and ochre.—Also a market-town in the prov. of Navarra, 35 m. N of Pamplona, in the valley of Santisteban-de-Lerin. Pop. 1,888. It has a church, a convent, and an hospital. This town was taken and for a short time held by a party of Spanish constitutionalists, under General Mina, in 1830.—Also a market-town in the prov. of Barcelona, and 9 m. S of Tarragona, on the road thence to Calatayud. Pop. 648. It has a church and a convent.

VERACIEUX, or **VARACIEUX**, a village of France, in the dep. of the Isère, cant. and 5 m. WNW of Vinay. Pop. 1,000.

VERA-CRUZ (La), a federal prov. of Mexico, extending along the Mexican gulf, from the Rio-Baraderas—or de los-Lagartos—to the river of Panuco, which rises in the metalliferous mountains of San-Luis-Potosi. Its length, from the bay of Terminos, near the island of Carmen, to the port of Tampico, is 210 leagues; its breadth is in general from 25 to 28 leagues. It is bounded on the N by New Santander; on the E by the peninsula of Merida; on the S by the gulf of Mexico; and on the W by Oaxaca, Puebla, and Mexico. Its area has been estimated at 27,660 sq. m. Pop. in 1841, 250,380. The only rivers are those which form its limits on the E and W. All the W part of the prov. is covered with the eastern range of the Cordillera d'Anahuac. The E part presents a surface of wide and arid plains. All the W part of the prov. forms the declivity of the cordilleras of Anahuac. Here, in the space of a day, the inhabitants descend from the regions of eternal snow to the plains in the vicinity of the sea, where the most suffocating heat prevails. The order with which different tribes of vegetables rise above one another, in strata as it were, is no-

where more perceptible than in ascending from the port of Vera-Cruz to the table-land of Perote. The inferior limit of oaks warns the colonist who inhabits the central table-land, how far he may descend towards the coast without dread of yellow fever. Forests of liquid amber, near Xalapa, announce by the freshness of their verdure that this is the elevation at which the clouds suspended over the ocean come in contact with the basaltic summits of the cordillera. A little higher, near La-Banderilla, the nutritive fruit of the banana comes no longer to maturity. At the height of San-Miguel, pines begin to mingle with the oaks, which are found by the traveller as high as the elevated plains of Perote, where he beholds fields sown with wheat. At 2,600 ft. higher, the coldness of the climate will no longer admit of the vegetation of oaks; pines alone there cover the rocks, whose summits enter the limit of eternal snow. Thus within the compass of not many miles, the naturalist in this prov. ranges through the whole scale of vegetation. The prov. of Vera-Cruz is enriched by nature with the most precious productions. In the ever-green forests, at the foot of the cordillera, grows the tree of which the odoriferous fruit is employed for perfuming chocolate. The myrtle is produced in the forests which extend towards the Rio-Baraderas, in the E part of the prov. The cocoa of Acayucan would be in request if the natives were to apply themselves more assiduously to the cultivation of cocoa trees. On the E and S declivities of the Pic-d'Orizaba, in the valleys which extend towards the town of Cordoba, tobacco of an excellent quality is cultivated, which yielded an annual revenue to the crown of Spain of more than 18,000,000 francs. The smilax, of which the root is the true sarsaparilla, grows in the humid and umbrageous ravines of the cordillera. The cotton of the coast is celebrated for its fineness and whiteness. The sugar-cane here yields nearly as much sugar as in the island of Cuba, and more than in the plantations of St. Domingo; but the effect of the bounty of nature, and the facility of providing without effort for the most urgent wants of life, impedes the progress of industry. Although on the first arrival of the Spaniards, the coast of Vera-Cruz, and all the country from the river Alvarada to Huastecupan, was no doubt better inhabited and better cultivated than it now is, the conquerors found the old pop. of Mexico chiefly concentrated in the interior of the country, on the table-land. The Spaniards, who generally followed the traces of the civilization which they found established in the country, had very powerful motives for settling on the table-land of Anahuac. They dreaded the heat and the diseases which prevail in the plains. The search after the precious metals, the cultivation of European grain and fruit, and the analogy of the climate with that of the Castilles, all concurred to fix them on the ridge of the cordilleras. To this region, therefore, they transported great numbers of the Indians, either to work in the mines, or that they might be nearer the habitation of their masters. For two centuries also the trade in indigo, sugar, and cotton being next to nothing, Whites could by no means be induced to settle in the plains, where the true Indian climate prevails; and it will require centuries to re-people those deserts, in which spaces of many square leagues are now only occupied by two or three huts around which stray herds of half wild cattle. A small number of powerful families, who live on the central table-land, possess the greater part of the sea coasts of Vera-Cruz and San-Luis-Potosi. No agrarian law forces these rich proprietors to sell their estates, if they persist in refusing to bring the immense territories which be-

compliment, for no vegetation is to be observed even for miles around; and fish is the only article of provision not brought from a distance. The only water fit to drink is what falls from the clouds, and is preserved in tanks; that from the castle and the convent of Franciscans being the best. Though the markets are tolerably well supplied by the Indians, living at the hotels is expensive and very uncomfortable. Provisions are dear, with the exception of fish, which is in abundance and good. Milk is scarcely to be had, as not a cow is kept within many miles, and what is perhaps peculiar to Vera-Cruz, there is not a garden even near it. The absence of vegetation attests at once the poverty of the soil and the insalubrity of the climate. Water is found, on digging the sandy soil at the depth of 9½ ft.; but this water proceeds from the filtration of the marshes formed in the downs; it is rain water, which has been in contact with the roots of vegetables, and is of a very bad quality, being only used for washing. The want of good water has for centuries past been regarded as one principal cause of the unhealthiness of this place; and in 1764, a project was formed for conducting part of the river of Xamapa to the port. On this undertaking large sums have been expended. A stone aqueduct capable of furnishing a section of water of about 18 sq. inches, was constructed, for a length of about 2,000 ft.; yet notwithstanding all those exertions and expenses, the waters of the Xamapa are still more than 12 m. distant from the town of Vera-Cruz. There is about a mile's breadth of sea between the town of Vera-Cruz and the castle of San-Juan-de-Ulloa. The outer walls of the fortress are of immense thickness—upwards of 12 ft.; and in positions most exposed, the walls are 17 or 18 ft. in depth. They are formed of white stone, very porous, and rather soft, so that balls do not split or crack it so much as quietly imbed themselves. These outer walls have batteries all round. The inner walls are so constructed, that if the outer walls are gained it would still be at a slaughterous expense to the besiegers, if the garrison were at all competent to avail themselves of their position. "We entered the fortress," says a recent writer, "from below, at the principal gate, which was of great strength, and very skillfully contrived, and then went along a stone passage, which had several gateways, and cunningly devised narrow passes, with high stone walls on each side. This was terminated by a canal, or moat, with a drawbridge over it. We next arrived at flights of stairs, and passing up several vault-like ascents, we gained the top of the grand batteries. Their general characteristic is that of great strength, and plenty of room to work in. They mounted 120 long 24-pounders, all of brass, and for the most part in excellent condition. The mortars were of large calibre, though not in such good order as the guns. The powder-magazines were each literally a dry stone well, plugged at the top with blankets, and having a round metal lid over the mouth that opened upon the batteries. We next descended to the inner works, and gained the secondary walls by a circuitous route. Besides the necessity to the besiegers of having guides, who well knew every turn of the works, the excitement and smoke are almost certain to produce a confusion, in which the voice or presence of the guides would be lost, and the party dashing onward might only arrive at a dead wall, a gap looking out upon the sea, or the mouth of a 24-pounder. The circuitous route of descent from the upper to the lower range of walls, is entirely exposed to the batteries, the guns grinning at us all the way as we traversed stone causeways and nar-

row passes. Whole regiments might here be raked down, after they had conquered the outer walls. A wide and steep flight of stone stairs led us down into the grand castle square or little town, as one might almost call it. We entered at the bottom, through stone gateways, and found ourselves in a large open square, enclosed on all sides by lofty walls, the lower part of which displayed doors and entrances into barracks, guard-houses, and shops of various kinds for the sale of such articles as a garrison would need. The governor's house is at the further end. It was a genuine soldier's lodgment, and very bare of all ornament, except those of war, for it was riddled all over with the marks of shot and shell. Its strong covered balcony, intended to serve both as a protection from the broiling sun, and from the fall of missiles, was in many places torn in long gaps. All the towers and buildings of any elevation had also been knocked about and defaced by the shot and shells from Vera-Cruz, previous to the surrender of the castle. But the mutilations and destruction did not materially affect the strength of the place. Very few of the guns had been dislodged; even the outer batteries were not injured so as to render them ineffective, with the exception of a gap of ruins in one or two places. How strongly and skillfully this fortress is protected by art the reader has now some idea; but San-Juan-de-Ulloa is equally protected by nature; for, while the defences of art which I have briefly described are chiefly devoted to the side and angle facing the town, those angles which face the main ocean on the opposite side, or back of the castle, are protected by long successions of rocky reefs, utterly defying the approach of any vessels of war."

The habitual pop. of Vera-Cruz, without including the militia and seafaring people, was, under Spanish regime, 16,000; but upon the arrival of the flota from Old Spain, a fair was opened which lasted many weeks, and during this period there was a great resort of strangers to the place. The chief disadvantage of Vera-Cruz is its unhealthy situation and climate. The yellow fever generally begins its ravages when the mean temp. of the air rises to 24° of the centigrade therm., or to 75° of Fahrenheit. In December, January, and February, when the heat remains below this limit, the distemper generally disappears. The Mexicans who inhabit the high table land in the interior, where the climate is more temperate, and Europeans newly landed, are peculiarly liable to the infection. Every imaginable precaution has been taken for the safety of the inland inhabitants of the country, when they visit the coast, but hitherto without success. It has never been found that they were attacked by the distemper with less violence and rapidity than the soldiers, for whom none of these precautions were taken. In the season when the yellow fever rages, the shortest stay at Vera-Cruz is sufficient to communicate the contagion; inasmuch that the inhabitants of Mexico, who have merely passed through the town in a litter, and instantly embarked, have been attacked by the disease after they had sailed for Europe. The quantity of rain which falls annually at this port amounts to 73 inches, which, joined to the heat of the climate, is extremely favourable to the progress of disease. The ascent from the city into the interior of the country, which is an elevated plain more than 8,000 ft. above the level of the sea, being through difficult and narrow roads, the merchants of Vera-Cruz have constructed a magnificent causeway, which is continued into the interior as far as Mexico, a distance of more than 200 m. W. In 1825 the castle of San-Juan-de-Ulloa surrendered to the patriots after a long siege, during which its fire

greatly devastated the city. In 1829, it was taken by the French. It 1847, it was bombarded, along with the city, by the American forces, and capitulated within five days.

VERA-CRUZ, a small island in the Atlantic, on the coast of Brazil, at the entrance of the bay of Todos-Santos.

VERA-CRUZ (Old), a port of Mexico, in the province of Tlascala, 15 m. N of the present city of Vera Cruz. This is the port where Cortez landed in 1518. It stands in a very unhealthy situation, in a marsh, and on a river which is full of alligators.

VERAGUA, a province of New Granada, bounded on the N by the Caribbean sea; on the E by the prov. of Panama, which is separated from it by the ridge of Canatagua; on the S by the Pacific; and on the W by Costa-Rica. It is a mountainous, rugged country, covered with vast forests, interspersed with luxuriant and fertile valleys. V. was first discovered by Columbus in 1508; and was granted to him, as a reward for his services, with the title of duke. He gave the river which he ascended the appellation of Verdes-Aguas, on account of the colour of its waves; and this has gradually been corrupted into Veragua, and from this river the prov. takes its name. It is administratively divided into the 4 cantons of Santiago, La-Mesa, Remedios, and Alange. Pop. in 1840, 85,867.

VERAGUA (SAN JAGO DE), the capital of the above prov., is a handsome town, situated 20 m. N of Montijo bay, and 120 m. WSW of Panama. It has some trade in copper, cotton, and dye-woods. The Indians in the vicinity dye their cottons, manufactured by themselves, with the juice of shell fish found in the bay of Salinas and on the coast, affording a rich and delicate purple.

VERAMALLAY, a town of Hindostan, in the presidency of Madras, in the Carnatic, district and 27 m. WSW of Trichinopoly.

VERAN (SAINT), a village of France, in the dep. of the Côtes-du-Nord, cant. and 3 m. NNW of Merdrignac. Pop. 1,130.

VERAN-LA-VILLE (SAINT), a village of France, in the dep. of the Hautes-Alpes, and cant. of Aiguilles-en-Guerras. Pop. 625.

VERAND (SAINT), a commune of France, in the dep. of the Isère, cant. and $\frac{2}{3}$ of a mile from Saint-Marcellin. Pop. 1,041. It affords good wine.

VERANO, a village of Austria, in Lombardy, in the gov. and 17 m. NNE of Milan.

VERANS, a mountain of Sardinia, in the div. of Savoy, and prov. of Faucigny, near the r. bank of the Arve. It commands the village of St. Martin, opposite Sallanches, and has an alt. of 2,705 metres above the level of the Mediterranean. It consists chiefly of limestone and slate.

VERA-PAZ, a province of Guatemala, bounded on the N by Yucatan; on the E by Honduras, and the bay or gulf of Honduras; on the S by the prov. of Guatemala; and on the W by Guatemala and Tonitcapan. It is about 120 m. in length, and 74 in breadth. The surface, generally rough and broken, full of deep ravines, and covered with thick and impenetrable woods, is divided into two physical regions, the *Alta* or high country, and the *Baja* or low. The elevated country is cold and humid; the low, warm and dry. It is watered by the Motagua, the Usamasinta, and the Polochic. The chief productions are sugar, dye-woods, cacao, cotton, and cedar. The gulf of Dulce or Dulce, a sort of large lake, which communicates with the sea by means of the gulf of Amatique, might greatly facilitate the commerce of this prov. The capital, now called Coban, is situated on the Rio-Coban, which falls into the gulf of Dulce, 600 m. SE of Mexico.

VERAPELLE, or **VERAPOLI**, a town of Hindostan, in the pres. of Madras, prov. and 9 m. NE of Cochin. It stands on an island in a shallow lagoon; and has a cathedral, a seminary, and a Carmelite convent.

VERAT, a small island of the South Pacific, in the group of the Viti islands, in 8 lat. 17° 50', and E long. 180° 23'.

VERAUX, a river of France, in the dep. of the Creuse, which has its source to the SE of Cressat, and after a course in a generally N direction of 15 m. joins the Petite-Creuse, on the l. bank at Batisse.

VERAWOW, a village of Sind, 15 m. N of Naggur-Parker.

VERBA, a town of Russia in Europe, in the gov. of Volhynia, district and 12 m. SSW of Dubno.

VERBACZ, or **VERBAS**. See **VERBITZA**.

VERBENICO, a village of Illyria, in the gov. of Trieste, in the island of Veglia, 6 m. ENE of the town of that name. Pop. 1,200. It has an castle.

VERBERG, a village of Prussia, in the regency of Dusseldorf and circle of Krefeld. Pop. 360.

VERBERIE, a commune and town of France, in the dep. of the Oise, and cant. of Pont-Sainte-Maxence, 11 m. NE of Senlis, on the l. bank of the Oise, delightfully situated at the foot of a mountain. Pop. 1,321. It contains some handsome dwellings, and near the house named St. Corneille, from the abbey of that name to which it belonged, is a ferruginous spring. It has manufactories of chemical substances, oil, flour, and paper-mills, and tile-works. Onions and hemp are cultivated in the vicinity. There was formerly a castle belonging to the 1st dynasty of the kings of France, and in which the councils of 853 and 859 were held.

VERBICERO, a market-town of Naples, in the prov. of Calabria-Citra, district and 29 m. N of Paola, and 6 m. from the shore of the Tyrrhenian sea, in a fertile valley. Pop. 3,300.

VERBICZ, or **VERBUCA**, a town of Hungary, in the comitat of Lyptan, on the r. bank of the Waag, a little to the SE of St. Miklos. Pop. 1,100.

VERBITZA, **VERBACZ**, or **VERBAS**, a river of Turkey in Europe, in Bosnia, which has its source in the mountain of Vranja, on the N side of the Dinaric Alps; separates the sanj. of Croatian Turkey from that of Trawnik; passes Bagmaluka; and after a total course, in a N direction, of 120 m., joins the Save on the r. bank, 15 m. E of Gradiška. It is fordable at all seasons. The country through which it flows is fertile, well-cultivated, and abounding with fruit.

VERBO, **WERRAU**, or **WEROOWE**, a town of Hungary, in the gsp. and 27 m. NW of Neutra, on the Hollenska. Pop. 2,100. It has factories of cloth, and an extensive grain-market.

VERBOSCA, or **VERBOVSKO**, a market-town of Austria, in Croatia, in the gsp. of Agram, on the Dobra, 29 m. WSW of Carlstadt. Pop. 1,100. It has a castle.

VERBOVETZ, a small town of Russia in Europe, in the gov. of Podolia, 18 m. NE of Ouchitza.

VERCEL, a canton, commune, and town of France, in the dep. of the Doubs, and arrond. of Baume-les-Dames. The cant. comprises 30 com. Pop. in 1831, 10,061; in 1846, 10,579. The village is 14 m. S of Baume-les-Dames. Pop. 1,210. It has manufactories of hats and hosiery, and several tanneries.

VERCELLI, a province of Piedmont, stretching between the river Sesia on the E, which divides it from the prov. of Novara, and the Dora-Baltea, which divides it from the prov. of Biella on the W. It has an area of 1,421 sq. kilom., with a pop. in 1848 of 127,955. Its N portion is mountainous; its

a, a dead unbroken plain, generally covered with rich vegetation. Its productions are wheat, rice, barley, flax, hemp, fruit, walnuts, and wine. The cultivated land amounts to 112,000 hectares; 15,000 h. are under wood. The rearing of the silk-worm forms an important branch of rural industry. The prov. is divided into 12 mandamenti or districts, which are subdivided into 65 communes.—Its cap. of the same name is situated on the l. bank of the Sesia, at an alt. of 78 metres above sea-level. It is an archiepiscopal see, and contains a noble duomo or cathedral, and 9 other churches. Among the public buildings are the palace-of-justice, and the tribunal-of-prefecture. The city is well-paved, and has large markets. It contains 862 houses, and 4,205 families, with an aggregate pop. of 13,353.

VERCHENY, a village of France, in the dep. of the Drome, cant. and 4 m. NE of Saillians.

VERCHERES, a town of Lower Canada, on the r. bank of the St. Lawrence, 23 m. below Montreal.

VERCHERS (LES), a commune of France, in the dep. of the Maine-et-Loire, cant. and 4 m. SW of Doué, near Layon, on the r. bank of the Loire. Pop. 1,501.

VERCIEN, a village of France, in the dep. of the Isere, cant. and 11 m. NNW of Mirestel. Pop. 500.

VERDACHELLUM, a town of Hindostan, in the Carnatic, 44 m. SW of Pondicherry, on the r. bank of the Tripalapur.

VERDALL, a village of France, in the dep. of Tarn, cant. of Dourgne, on the Soult, 7 m. SW of Castes.

VERDAS-NOVAS, a village of Portugal, 4 m. NE of Oporto, remarkable only for an action between the van of the British and the rear of the French troops, in May 1809, at the commencement of Soult's retreat from Oporto.

VERDE (CAPE), a headland on the coast of the territory of Genoa, in N lat. 43° 50'.—Also a cape on the E coast of the straits of Magalhaens.

VERDE, a river of Ecuador, in the prov. of Esmeraldas, which runs into the Pacific in the bay of Tola.—Also a river of Peru, in the prov. of Tacunga, which runs S, and enters the Pastaza, near its source.—Also a river of Mexico, which runs S, and enters the Salado.—Also a river of Brazil, in the prov. of Minas-Geraes, which rises in the mountains of Gram-Mogol, near the coast, and flowing W, and then N, enters the Rio-Francisco.—Also a river of Brazil, in the prov. of Goyaz, which runs SE to the Parana.—Also a river of St. Domingo, which rises near the N coast, between the La Vega and Santiago, and running W, enters the Yaque.—Also a river of Paraguay, which runs SE, and enters the Amambay.

VERDE, a small island of New Granada, on the coast of the prov. of Cartagena, at the mouth of the Magdalena.—Also a small island of the Atlantic ocean, near the coast of Vera-Cruz, and not far from the island of Sacrifices.—Also a small island of the Atlantic, near the coast of Cumana, between the islands of Testigos and Frayles.—Also an island near the S coast of Luçon, in N lat. 13° 30', E long. 121° 2'.

VERDE (CAPE). See CAPE VERDE.

VERDE ISLANDS (CAPE). See CAPE-VERDE ISLANDS.

VERDELLO-MAGGIORE, a village of Austrian Lombardy, 7 m. SW of Bergamo.

VERDELOT, a village of France, in the dep. of Seine-et-Marne, cant. and 8 m. NE of Rebus, on the Petit-Morin.

VERDELPINO, a village of Spain, in the prov. of Cuenca, 3 m. from Hueta. Pop. 580.

VERDEN, a district of Hanover, bearing the

title of duchy, lying between Luneburg and Bremen. Its area is about 520 sq. m.; its population 28,000. Its surface is a continued level, and covered to a great extent with heath. It produces a little corn, but is better adapted to pasture. After being long a Catholic bishopric, it was secularized in 1648, and given to Sweden; but has belonged to Hanover since 1715. It is divided into the two bailiwicks of V. and Rotenburg.

VERDEN, the chief town of the above district, is situated on the r. bank of the Aller, 53 m. SW of Hamburg. Pop. 3,600.

VERDIER (LE), a village of France, in the dep. of Tarn, 7 m. NNW of Gaillac. Pop. 630.

VERDON, a river of France, dep. of Basses-Alpes, which rises in the Alps, to the SW of Barcelonetta; runs S; and falls into the Durance, on the l. bank, after a course of 110 m.

VERDOUBLE, a river of France, which rises in the dep. of Aude, near Mouthoumet; runs SSE; and joins the Gly, near Estagel.

VERDU, a town of Spain, in the prov. and 22 m. E of Lerida. Pop. 1,500. Linen is made here.

VERDUN, a village of Spain, in the prov. and 48 m. NNW of Huesca.

VERDUN, a town of France, dep. of the Meuse, 35 m. W of Metz, in N lat. 49° 9' 31", E long. 5° 22' 3". It is traversed by the Meuse, here in a comparatively early part of its course, and is divided into three parts, an upper, lower, and new town. The first forms the larger portion, and stands on an eminence sloping towards the Meuse. It is strongly fortified, and has a citadel situated on an eminence. It suffered severely in 1756, from the blowing up of a powder-magazine. It is better known to English readers as the place of confinement of their countrymen detained in France after the rupture of 1803. Its manufactures consist of woollens, leather, articles of confectionary, liquors, and jewellery. It is the see of a bishop.—Also a small town of France, situated at the confluence of the rivers Saone and Doubs, 12 m. N by E of Chalons-sur-Saone. Pop. 1,800.—Also a village in the dep. of Aveyron, cant. and 4 m. NE of Nancelle.

VERDUN-SUR-GARONNE, a town of France, in the dep. of Tarn-et-Garonne, on the Garonne, 20 m. NW of Toulouse. Pop. 3,500.

VERE. See TERVERE.

VERE, a parish of Jamaica, in the county of Middlesex, and forming the most southerly portion of the island. The E coast is flat and marshy, and presents numerous indentations, of which the principal forming West harbour is enclosed on the S by Portland Bridge—an extensive peninsula terminating in the SE in Portland point. The entrance to this harbour, in common with all this portion of the coast, is studded with reefs and islands. In the W part of the p. is the range of the Braziletto hills, and in the N Harrison's plain. The principal river is the Mintro or Dry river, which flows into the sea to the NW of Carlisle bay. The soil is fertile and well-cultivated.

VEREBELY, or WRABLANT, a town of Hungary, in the gsp. or comitat of Bars, 12 m. SE of Neutra, on the l. bank of the Taitva, in a richly agricultural district.

VERECZKE (ALSO), a market-town of Hungary, in the comitat of Beregh, 30 m. NE of Munkacs, at the foot of the Carpathian chain.

VEREIA, a town of Russia in Europe, cap. of a district of the same name, in the gov. and 64 m. WSW of Moscow, on both banks of the Protva. Pop. 6,800. The era of the foundation of this town, as well as of the name of its founder, is unknown; but it is of great antiquity, and has always been

known to have followed the fate of Moscow. It has been ravaged both by the Tartars and Poles, but the castle, which still stands, and the fortifications of which consist chiefly in a high earthen rampart and a ditch, has never been taken. V. contains four churches inclusive of the cathedral, which is a handsome edifice, a school, magazines of salt and brandy, and about sixty shops. The trade in hemp, tallow, wood, and corn, is considerable. Large numbers of fishing-nets are here made by the women, for export to the Ukraine, Don Cossacks, and Astrakhan. Onions are extensively grown in the environs.

VERENAY, a hamlet of France, in the dep. of the Rhone, cant. of Sainte-Colombe, near the r. bank of the Rhone. There is a lead mine in the vicinity.

VERESPATEK, a village of Transylvania, in the com. of Lower Weissenburg, 26 m. NW of Carlsburg. Gold is found in the vicinity.

VERESVAGAS, or OZERVENKA, a village of Hungary, in the com. of Saros, 14 m. SE of Epiries. In the vicinity is the only mine of the true opal in Europe.

VERETZ-SUR-CHER, a village of France, in the dep. of the Indre-et-Loire, cant. and 6 m. SE of Tours, on the l. bank of the Cher. Pop. 900. It has an ancient castle.

VERFEIL, a canton and commune of France, in the dep. of the Haute-Garonne, and arrond. of Toulouse. The cant. comprises 8 com. Pop. in 1831, 5,218; in 1846, 5,632. The town is 14 m. ENE of Toulouse. Pop. 2,420.—Also a commune in the dep. of the Tarn-et-Garonne, cant. and 8 m. ENE of St. Antonin. Pop. 1,103.

VERGA (Cape), a headland of Upper Guinea, on the Sierra Leone coast, in N lat. $10^{\circ} 18' 52''$.

VERGADA, a small island of Austria, in Dalmatia, in the circle of Zara, and channel of that name, and to the E of the island of Pasman. It contains a village of the same name, and about 200 inhabitants.

VERGARA, or BURGARA, a judicial partido and market-town of Spain, in the prov. of Guipuzcoa. The partido comprises 15 pueblos. The town is 23 m. SW of San-Sebastian, in a fertile valley on the r. bank of the Deva. Pop. 4,000. The streets are spacious and well-paved, and the houses generally well-built. It has two squares, in one of which is the town-house, a handsome edifice, supported by a range of 12 arcades, and contains also three parish-churches, several convents, a Jesuits' college, and a seminary. It has extensive iron and steel-works. This town is noted as the seat of the first patriotic society for the improvement of education in Spain. In the vicinity are several mineral springs.

VERGATO, a market-town of the Papal States, in the leg. and 14 m. SW of Bologna. Pop. 2,850.

VERGAVILLE, a commune and town of France, in the dep. of the Meurthe, cant. and 2 m. NE of Dieuze, on the Spin. Pop. 1,145.

VERGENNES, a town of Addison co., in the state of Vermont, U. S., 33 m. W by S of Montpelier, on Otter creek, which is here divided by two islands into three channels, and intersected by the Rutland and Burlington railway. Pop. 1,378.

VERGES, a market-town of Spain, in the prov. and 15 m. E of Gerona, on the road from that town to the port of the Escala. Pop. 1,500. It has several oil-mills.

VERGEZE, a commune of France, in the dep. of the Gard, cant. and 5 m. NW of Vauvert. Pop. 1,816. It has several mineral springs.

VERGNE (La), a village of France, in the dep. of the Charente-Inferieure, cant. and 3 m. NW of St. Jean d'Angely. Pop. 800.—Also a village in

the Lot, cant. and 2 m. NE of Gramat, on the r. bank of the Alzon. Pop. 700.

VERGNIES, a department and commune of Belgium, in the prov. of Hainault, and arrond. of Charleroi. Pop. 309.

VERGNIOZ, a village of France, in the dep. of the Isere, cant. and 6 m. NE of Roussillon. Pop. 400.

VERGORAZ, or VERGORATZ, a village of Austria, in Dalmatia, in the circle and 18 m. SE of Macaraca, between lakes Rastok and Jesero. Pop. 800. It has a productive pitch-mine.

VERGT, or St. JEAN-DE-VEROT, a canton and commune of France, in the dep. of the Dordogne, and arrond. of Perigueux. The cant. comprises 16 com. Pop. in 1831, 11,089; in 1846, 11,456.

VERIA, or KARA-VERIA, a town of European Turkey, in Macedonia, a few miles from the coast of the gulf of Salonika, and 38 m. W by S of that town. It contains about 8,000 inhabitants, mostly Greeks; and has extensive manufactories of cotton and cotton thread. The neighbouring country produces rice and fruit in abundance.

VERIN (SANTA-MARIA-DE), a judicial partido and town of Spain, in the prov. of Orense. The partido comprises 86 parishes. The town is 30 m. SE of Orense and 5 m. from the Portuguese frontier, on the Tamaga, which is here crossed by a substantial bridge, and at the foot of a mountain. Pop. 1,000. It has a church, two convents, a Bernardine priory, and a custom-house. The manufacture of linen, and the adjacent tin-mines, form the chief objects of local industry.

VERINA, a town of Venezuela, in the dep. of Maturin and prov. of Cumana, on the Atlantic. It is famous for its tobacco.

VERINES, a commune of France, in the dep. of the Charente-Inferieure, and cant. of La Garrie, 7 m. ENE of La Rochelle. Pop. 1,264.

VERISSIMO, or VIESSIMO, two rivers of Brazil, in the prov. of Goyas, both of which rise on the S side of the Serra-dos-Pireneos, and which, after a considerable course, throw their united waters into the Paranaiva.

VERJON, a village of France, in the dep. of the Ain, and cant. of Coligny, 13 m. NNE of Bourg. Pop. 500.

* VERKHNE, VERKHNI, or VERKHNAIA, a Russian adjective signifying 'upper.' For names to which it is prefixed not found amongst the subjoined, see the following word.

VERKHNE'DNIEPROVSK, a town of Russia in Europe, in the gov. and 36 m. WNW of Yekaterinoslav, on the r. bank of the Dnieper. Pop. 1,000.

VERKHNE-KOLYMSKI, a town of Russia in Asia, in the prov. of Yakutsk, on the Kolyma, 210 m. SSW of Sredne-Kolymsk.

VERKHNE-VILIOUISK, a town of Russia in Asia, in the prov. and 330 m. WNW of Yakutsk, on the r. bank of the Vilioni.

VERKHNI (SALLOV), a town of Russia in Europe, in the gov. of Kharkov, district and 18 m. SSW of Voltohanak. Pop. 1,500.

VERKHOIANSK, a town of Russia in Europe, in the prov. and 330 m. NNE of Yakutsk, on the l. bank of the Jana.

VERKHOLENSK, a town of Russia in Asia, in the gov. and 135 m. NNE of Irkutsk, on the Lena, near its source. Pop. 510.

VERKHO-BOSENSK, a town of Russia in Europe, in the gov. and 12 m. NW of Biriutak, and near the sources of the Tikhaia-Soena. Pop. 5,000. It contains four churches. It was founded in the reign of Alexis-Mikhailovitch, when it made part of the line of defence between Oskol and Korotoiak.

VERKHOTURIE, a district and town of Russia in Asia, in the gov. of Perm. The district com-

prises several copper-mines and iron-works.—The town is situated on the l. bank of the Tura, 210 m. ENE of Perm. It is walled, and conducts considerable transit-commerce with Siberia.

VERKHOVKA, a town of Russia in Europe, in the gov. of Podolia, 86 m. SE of Bratslav.

VERKHOWASHKOI, a town of Russia in Europe, in the gov. of Vologda. Pop. 1,540.

VERL, a parish and v. of Prussia, in the reg. of Minden, and circle of Wiedenbruck. Pop. 1,250.

VERLAINE, a department and commune of Belgium, in the prov. of Liege and arrond. of Huy. Pop. of dep. 1,260; of com. 819.

VERLAR, a village of Prussia, in the regency of Minden, and circle of Buren. Pop. 360.

VERLAUTENHEIDE, a village of Prussia, in the regency of Aachen. Pop. 630.

VERLEE, a department and commune of Belgium, in the prov. of Namur and arrond. of Dinant. Pop. 108.

VERLIEHAUSEN, a village of Hanover, in the prov. of Gottingen, near Uslar. Pop. 318.

VERLIKA, or **VERLICKA**, a market-town of Austria, in Dalmatia, in the circle and 48 m. NW of Spalatro, near the Cettina. Pop. 800.

VERLINGHEM, a commune of France, in the dep. of the Nord, cant. and 3 m. S of Quesnoy-sur-Deule. Pop. 1,915.

VERLORENWASSER, a village of Austria, in Silesia, in the circle of Troppau. Pop. 850.—Also a village of Prussia, in the regency of Breslau, and circle of Habelschwerdt. Pop. 520.

VERMAND, a canton, commune, and town of France, in the dep. of the Aisne, and arrond. of Saint-Quentin. The cant. comprises 24 com. Pop. in 1831, 13,880; in 1841, 14,270. The town is 7 m. NW of St. Quentin, near the Avignon. Pop. 1,100.

VERMANDOIS, formerly a district of France, in the arrond. and prov. of Picardy, comprising an area of 124,170 hect. and now divided between the depts. of the Aisne and Somme. Its chief towns were Saint-Quentin, the capital, Vermand, and Ham. It derived its name from the *Veromandantes*, a Gallic people, by whom it was inhabited. It was united to France under Philip Augustus.

VERMANTON, a canton and commune of France, in the dep. of the Yonne, and arrond. of Auxerre. The cant. comprises 14 com. Pop. in 1831, 11,218; in 1846, 11,160. The village is 14 m. SE of Auxerre, on the r. bank of the Aire. Pop. 2,616. It has an active trade in wine, casks, and faggots.

VERMDOE, an island of Sweden, in the Baltic, a little to the E of Stockholm, in N lat. 59° 20'. and E long. 16° 25'.

VERMEJA (*Sierra*), a range of mountains in Spain, on the confines of the provinces of Malaga and Cadix, in the Ronda chain. It consists of two parallel ranges, united at the base, one of which is reddish, from the colour of its soil, whence the name Vermeja; the other is white. The first, which is the loftier, is covered with pines, and the other is snow-capped throughout the greater part of the year. It has some oak plantations, and contains mines of iron and mineral springs.

VERMEJO, or **RIO-GRANDE**, a river which has its source in Bolivia, to the NW of San-Bernardo-Tarja, forms for some distance the boundary line of La Plata; traverses the N part of that territory; and after a course, in a generally SE direction, of about 1,200 m., joins the Paraguay, on the r. bank, 90 m. SSW of L'Assompoion.

VERMELEN, a lake of Sweden, in the prefecture of Carlstadt, to the N of Lake Wener, into which it discharges its waters.

VERMELHA (*Sierra*), a mountain-range of Bra-

zil, in the prov. of Piauhy, which runs from NE to SW, near the confines of the prov. of Pernambuco, and of the Rio-Itatimi.

VERMELHO, a river of Brazil, which rises near Villaboa, in the prov. of Goyaz; runs NW; and flows into the Araguay in S lat. 18° 85', after a course of 220 m.

VERMILLION, a county in the E part of Illinois, U. S. Area 1,208 sq. m. Pop. in 1840, 9,303; in 1850, 11,492. Its cap. is Dunville.—Also a county in the W part of Indiana. Area 280 sq. m. Pop. in 1840, 8,274; in 1850, 8,661. Its cap. is Newport.—Also a river of Louisiana, which rises in the district of the Opelousas, and after running a S course, discharges itself into Vermillion bay, in the gulf of Mexico, about 200 m. W of the mouth of the Mississippi. The bay is 20 m. in length, and has 10 or 12 ft. water.—Also a river of Louisiana, which runs into the tributary branches of the Missouri.—Also a river of Ohio, which falls into Lake Erie, 9 m. E of Huron river.—Also a river of Illinois, which runs into the Illinois river, 150 m. from the Mississippi.—Also a township of Huron co., Ohio, on Lake Erie, at the mouth of the Vermillion, about 40 m. W of Cleveland.

VERMO, a town of Austrian Illyria, in the prov. of Istria, 21 m. WSW of Fiume.

VERMONT, one of the northern United States, situated between 42° 44' and 45° N lat., and 71° 38' and 73° 26' W long. The boundary line that separates it from Lower Canada on the N is 90 m. long; on the E it is bounded by New Hampshire; on the S by Massachusetts; and on the W by Lake Champlain and New York. Its mean length from N to S is 157 m. The distance from the ocean to the nearest point of this state is about 80 m. Its area is stated at 10,212 sq. m., or 6,535,680 acres.

Physical features. The general character of this state is that of a hilly region. The Green mountains, from 10 to 15 m. in breadth, traverse its whole length. These mountains begin in Canada, whence they extend through the states of Vermont, Massachusetts, and Connecticut, and terminate within a few miles of the coast. Their general direction is from NNE to SSW; and their extent is not less than 400 m. in length. They run nearly parallel with the course of the Connecticut river, and are intersected by numerous valleys, the soil of which is deep, rich, and loamy. Towards the centre of the state, the range divides into two, the western of which continues to run N, and the eastern runs NE, near the base of Camel's Rump [alt. 4,188 ft.]. On the S side of Onion river, a line of road crosses the Green mountains from Burlington to Hartford. The most level tract occurs on the borders of Canada. Between the banks of Lake Champlain and the mountains there is a valuable tract of arable land, extending 100 m. in length and 30 m. in breadth. The surface in its natural state is thickly wooded. Along the banks of the rivers, white oak, beech, and elm are abundant. The higher parts are covered with white oak, sugar-maple, butternut, ash, and birch; and the mountains are clothed with evergreens to their summit. The highest summits of the Green mountains in Vermont, are Killington-peak, alt. 3,675 ft.; Camel's Rump, and Mansfield mountain, on the N side of Onion river, alt. 4,279 ft. above sea-level.—All the streams and rivers of V. have their origin among the Green mountains. About 30 of them have an easterly direction, and fall into Connecticut river; about 25 run westerly, and discharge themselves into Lake Champlain; and two or three, running in the same direction, fall into Hudson's river. In the NE part of the state are four or five streams which have a northerly direction to

lake Memphremagog, on the frontiers of Canada. The most considerable streams on the W side of the Green mountains are Otter-creek, 85 m. in length, Onion river, 80 m. in length, the Lamoille, and Michiscou or Missisque. On the E side of the Green mountains, the rivers are not so large as those on the west, but they are more numerous: the largest are Wantastitquek or West river, White river, and Pousoomsuck. The river Connecticut, into which these rivers fall, forms the E boundary of the state. Above two-thirds of Lake Champlain lie in this state. The islands in this lake, belonging to the state of V., constitute Grand Isle co. The principal territories on the lake are St. Alban's, Burlington, and Vergennes. A canal connects the S side of the lake with the Hudson river, and the New York and Erie canal. The N line of Vermont passes over the S part of Lake Memphremagog. This lake is about 40 m. in length, and 6 or 7 m. wide. The river St. Francis forms a communication between it and the St. Lawrence river. Round this lake there is a rich soil and a fine level country.

Climate.] The climate is subject to great extremes of heat and cold. The mean annual range of the therm. is 120°; the temp. of winter sinking sometimes to 25° below zero, while at of summer rises to 100°. Snow lies from the middle of December to the middle of March, during which period it is customary to travel in sledges. It disappears about the middle of April, except on the highest parts of the mountains, where it lies till May. It is generally permanent from the 10th or 12th of December to the beginning of April, when it suddenly dissolves by the influence of a warm sun. In the low grounds it remains till about the 20th of March. Wheat and oats are sown about the middle of April and are reaped about the middle of August. The frosts commence in the middle of September. Notwithstanding the severity of winter, which is 10° or 11° colder than in the same latitude in Europe, young trees are seldom killed by the frost. Lake Champlain is seldom totally frozen over before the beginning of February. The ice of lakes and stagnant waters, in the severest winter, seldom exceeds 30 inches in thickness. It generally dissolves in the last days of March. The most agreeable season is from the beginning of September to the middle of October, after which, to the close of November, there are frequent rains, winds, and snow. The N, NW, and W winds, which are the most prevalent, are dry, elastic, and invigorating; those from the S and SW are warm and relaxing.

Productions.] Iron ore exists in great abundance on the W side of the Green mountains, and near Lake Champlain. Lead, copper, and ochre are wrought. Porcelain clay is found, which retains its white colour in the fire; also soapstone, slate, granite, marble, clay for bricks, pipe-clay, mill-stones, and marl. There are lead, zinc, and copperas mines. Among the forest-trees are the pine, maple, buttonwood, elm, hemlock, oak, basswood, ash, and birch. The most common are the hemlock, elm, spruce, sugar-maple, and beech. On the summit of the highest mountains, the trees, which are chiefly spruce, hemlock, and pine, are very low, and their branches are interwoven so as to form an impenetrable thicket. There is a much greater proportion of evergreen trees on the W than on the E side of the mountains. Williams enumerates thirty-six species of quadrupeds in this state, of which the most remarkable are the bear, black-cat, wild-cat, catamount, deer, fox, hare, martin, ermine, mole, mouse, porcupine, rabbit, racoon, skunk, squirrel, weasel, wolf, wood-chuck, beaver, mink, musk-rat, and otter. In lakes Champlain and Memphre-

magog, and also in several rivers, are found bass, brook, chub, dace, eel, minnow, red-perch, white-perch, pickerel or pike, salmon, salmon-trout, shad, skinner, sturgeon, sucker, and trout.

Agriculture.] The soil of V. is rich and loamy, and well adapted to wheat, rye, barley, corn, oats, pease, flax, hemp, and culinary plants. The wheat crop in 1840 amounted to 495,800 bushels; in 1850, to 525,925 b. The oats raised in 1840 amounted to 2,222,584 b.; in 1850 to 2,807,714 b. The Indian corn crop in 1840 was 1,119,678 b.; in 1850, 2,032,016 b. In 1850, 176,297 b. of rye, 42,147 b. of barley, and 208,699 b. of buckwheat were raised. Spring-wheat, barley, oats, and pease, are sown from the 16th to the 20th of April. The first is ripe about the middle of August; barley on the 1st, and oats about the 20th of that month. Indian corn is sown about the middle of May, and is ripe towards the 1st of October. The natural pasture is excellent. In winter, the bees when grown are fed with hay, clover, turnips, pumpkins, &c., and the milk cows with wheat, bran, oats, and Indian corn. The sheep weigh 120 pounds, and yield three or four pounds of wool. When the acorn, beech-mast, and other nuts begin to fall, the swine are driven to the woods, where they fatten to an enormous size. In 1850, the extent of improved farm lands in this state was returned at 2,591,379 acres; of unimproved, 1,525,368 acres; and the number of farms at 29,687. The live stock in 1850 comprised 61,057 horses, 146,146 milk cows, 48,497 working oxen, 919,992 sheep, 66,278 swine.

Manufactures and commerce.] The manufactures in this state are not considerable. In 1850 the number of manufacturing establishments was 1,835, of which 9 were cotton factories, 72 woollen factories, 37 iron factories, and 152 tanneries. Pot and pearl ashes, and yellow ochre, are manufactured.—The exports consist of grain, flour, bar iron, nails, pot and pearl ashes, live cattle, horses, beef, pork, cheese and butter, lumber, peltry, and flax, which are sent to Montreal in Canada, and, by river and canal communication, to the cities and towns of New York, Portland, Hartford, and Boston. The value of the exports from V., which are chiefly made from Burlington on Lake Champlain, amounted, in 1799, to 20,480 dollars; in 1803 to 117,450 d.; in 1810 to 432,631 d.; in 1816 to 892,594 d.; in 1850 to 430,906 d., of which 404,749 d. were domestic produce.

Population.] The population of this state in 1790 was 85,416, including 272 Blacks; in 1800, 154,465, including 557 Blacks; in 1810, 217,895, Blacks 750; in 1820, 280,652, of whom 881 were Blacks; in 1830, 280,652; in 1840, 291,948; in 1850, 313,611 of whom 709 were free Blacks.—There are three colleges in V., one at Burlington founded in 1791; another at Middlebury founded in 1800; and a third at Norwich founded in 1834. Common schools are supported throughout the state, and in 1850 amounted to 2,594 with 90,110 scholars.—The principal denominations of Christians in V. are Congregationalists, who had, in 1850, 168 churches. Methodists, who had in 1850, 128 schools; and Baptists, who had 88 churches. There were 34 Universalist churches in the same year, 25 Episcopal, and 8 Roman Catholic.

Government.] The legislative power is vested in a house of representatives at present numbering 230 members, one from each town, and a senate of 30 members apportioned in the ratio of the pop., but each county is entitled to send one. Every town has the right to send one representative. The executive power is vested in a governor, lieutenant-governor and 12 councillors. All these officers,

together with the representatives, are chosen annually. The state sends 4 members to congress. Judges, sheriffs, and other officers are appointed for one year by the general assembly in ballot. The constitution prohibits slavery. Montpelier is the political capital.—The revenue of the state arises from taxes on persons, lands, and cattle, assessed in proportion to their value. The revenue in 1850 was 125,375 d.; the disbursements only 122,253 d. V. has no public debt.—The number of paupers in 1850 were 3,654, of whom 2,048 were natives. The expense of their support was 120,462 d.

History. The first settlements in this state began about the year 1774: in 1760 a number of towns were already formed by emigrants from New Hampshire, Massachusetts, and Connecticut. V. was considered as under the jurisdiction of New Hampshire till 1764, when, by act of parliament, it was annexed to New York, under the name of Cumberland and Gloucester counties; but the inhabitants finding, that by this union they would be obliged to purchase the lands they already occupied, and preferring to be incorporated with New Hampshire, remonstrated against this project. In the mean time, the war commenced against England, and the inhabitants seized the opportunity to declare themselves free and independent; a circumstance which inspired the English with the hope of detaching them from the American cause. Various means were employed to effect this, which were at last defeated by an arrangement with the state of New York, in 1790, as to their mutual claims, and by her admission into the federal union the year following. The new constitution of this state, which had been prepared and sanctioned in 1778, and was afterwards revised and improved in 1786 and 1792, was finally adopted in 1793; but has been modified at various subsequent periods.

VERMONTVILLE, a township and village of Eaton co., in Michigan, 24 m. W by S of Lansing. Pop. 324.

VERN, a commune and village of France, in the dep. of Ille-et-Vilaine, 5 m. SE of Rennes. Pop. 1,700.—Also a com. and v. in the dep. of the Maine-et-Loire, 15 m. NW of Angers.

VERNAISON, a village of France, in the dep. of Rhone, 9 m. S of Lyons, on the railway to St. Etienne. Pop. 950.

VERNAL, an island near the coast of Mexico, in 8 lat. 16° 35'.

VERNAMO, a village of Sweden, in the laen and 42 m. S of Jönköping.

VERNANTE, a town of Piedmont, on the great road from Nice to Turin, 11 m. S of Coni. Pop. of com., 3,171.

VERNANTES, a town of France, dep. of Maine-et-Loire, 13 m. SE of Baugé. Pop. 2,050.

VERNANTOIS, a village of France, dep. of Jura, cant. and 4 m. SSE of Lons-le-Saunier. Pop. 950.

VERNAZZO, a town of the duchy of Genoa, 5 m. SW of Spezia.

VERNEIL, a village of France, in the dep. of Sarthe, cant. and 3 m. SE of Mayet. Pop. 1,200.

VERNET, a town of France, dep. of Orientales-Pyrenees, 4 m. S of Prades.

VERNET (Le), a village of France, in the dep. of Pay-de-Dome, cant. and 10 m. SW of St. Amand-Talende. Pop. 1,000.

VERNET-SUR-SIOULE (Le), a village of France, in the dep. of Allier, cant. of Escurolles, on the r. bank of the Sioule.

VERNEUIL, a town of France, dep. of Eure, on the small river Arve, 30 m. SW of Evreux. It is still surrounded with a wall, but contains no buildings worthy of notice, with the exception of an old tower. Pop. 3,500. It has manufactures of woollens, cottons, druggets, leather, and paper.—Also a com. and v. of France, in the dep. of Haut-Vienne, 6 m. WNW of Limoges. Pop. 2,000.

VERNEUIL-SUR-OISE, a village of France, in the dep. of Oise, 6 m. NW of Senlis. Pop. 1,180.

VERNHAM-DEAN, a village of Hampshire, 8 m. W by N of Andover.

VERNON, a county of New South Wales, skirted

by the Macleay river on the NE, and intersected by the Apsley river.

VERNON, a town of France, dep. of Eure, on the l. bank of the Seine, and on the Paris and Havre railway, 28 m. S by E of Rouen. Pop. 3,950. It has an old castle, two churches, and an hospital. It has some manufactures of leather, cotton-caps, and velvet, and carries on a traffic with Paris in corn and meal.—Also a com. and v. in the dep. of Indre-et-Loire, 9 m. E of Tours. Pop. 1,800.

VERNON, a township of Tolland co., Connecticut, U. S., 6 m. WSW of Tolland. Pop. 2,900.—Also a county in the W of Missouri. Area 612 sq. m., drained by the Marais-des-Cygnes river.—Also a township of Oneida co., New York, 17 m. W of Utica. Pop. 3,098.—Also a township of Sussex co., New Jersey, 68 m. N by E of Trenton. Pop. 2,619.—Also a township of Trumbull co., Ohio, 20 m. NE of Warren. Pop. 828.—Also a township of Crawford co., Ohio.—Also a village of Windham co., Vermont, 105 m. S by E of Montpelier. Pop. 821.—Also a township of Jennings co., Indiana, 25 m. NW of Madison. Pop. 600.—Also a village of Sutter co., in California, on the E bank of Feather river, at its confluence with the Sacramento.

VERNON ISLES, a group of 3 small islands at the entrance of Clarence-strait, on the NW coast of Australia, in 8 lat. 12° 5'.

VERNOU, a village of France, in the dep. of Indre-et-Loire, cant. of Vouvray, on the Brenne, 6 m. E of Tours. Pop. 1,500.—Also a village of France, in the dep. of Deux-Sevres, cant. and 2 m. NW of Briou. Pop. 400.

VERNOUX, a town of France, dep. of Ardeche, 12 m. NE of Privas. Pop. 1,546. It has a trade in woollens and agricultural produce.

VERNOUX-EN-GATIVE, a commune of France, dep. of Deux-Sevres, 12 m. W of Parthenay. Pop. 1,400.

VEROCZA, or **VEROVITZ**, a county of Slavonia, comprising the NW of the province, and bounded by the Drave on the N, and by the Danube on the E. It has a territorial extent of nearly 1,800 sq. m., and is divided into 6 marches. Its surface is in general level, and is covered in many parts with extensive marshes; in general, however, the soil is fertile. The export of cattle forms a principal branch of trade. The capital is Esseek or Esseg.

VEROCZA, or **VEROVITICZA**, a small town of Austrian Slavonia, formerly the capital of the preceding palatinate, situated on the Drave, 62 m. WNW of Esseek, in N lat. 45° 51' 14". It was taken in 1626 by the Turks, and in 1684 by the Imperialists.

VEROLA-ALGHISE, a town of Austrian Italy, in the gov. of Milan, deleg. and 18 m. SW of Brescia, on the river Savorola.—About 1 m. to the E of this town is Verola-Vecchia.

VEROLENGO, a town of Piedmont, in the prov. and 18 m. NE of Turin. Pop. 4,000.

VEROLI, a town of the Papal states, 55 m. E by S of Rome. Though small, it is the see of a bishop, and stands at the foot of the Apennines, on the river Cosa, 22 m. N by E of Terracina.

VEROMILES (San), a village of the island of Sardinia, in the prov. of Busachi, 9 m. N of Oristano. Pop. 1,500. Lead, copper, and iron are wrought in the vicinity.

VERON, a town of France, dep. of the Yonne, 6 m. S of Sens. Pop. 1,160.

VERONA, a province of Austrian Italy, in the W part of the gov. of Venice, with a superficial extent of 1,330 sq. m. It is bounded on the N by Tyrol; on the E by the provs. of Vicenza and Padua; on the SE by the Polesina; on the S by Mantua; and on the W by the Lago-di-Garda. It is watered

from N to S by the Adige, and on the W by the Mincio; and though partly mountainous, it has an agreeable climate and fertile soil. The principal productions are corn, wine, oil, flax, silk and beautiful marble. Pop. in 1846, 802,902.

VERONA, the capital of the above province, and now the metropolis and seat of government of the Lombardo-Venetian kingdom, stands in N lat. 45° 26', 22 m. NE of Mantua, and 60 m. W of Venice. It occupies a pleasant and picturesque situation, partly on a declivity, partly on the border of a large plain which stretches far to the southward, and extends along the banks of the Mincio and the Po. To the N are the Tyrolean Alps, the first step to the ascent of which may be said to take place in this city. The Adige, descending from Tyrol, flows with a full and rapid stream and serpentine course through the city, dividing it into two unequal parts. The form of the city is irregular, the modern buildings extending considerably beyond the old walls. Its circuit is about 6 m. It retains its former fortification of a moat and earthen mound, and has also two castles on high ground, with a third on the plain. Its fortifications have been greatly strengthened of late years. The garrison of V. amounts at present to 16,000 or 18,000 men. At the side of the city, leading to Santa-Lucia, an immense plain has been laid out for military evolutions, and several important points have been strengthened by the erection of forts capable of containing 2,000 men. "V. is a complete military stronghold, and will certainly be the last place relinquished by Austria, in the event of its dominion in Italy being again disputed. It is surrounded on all sides by fortifications; and several new barracks are now being constructed in the interior of the town. It is the first place, leading towards the Tyrol, which bears decided marks of its vicinity to Germany. Though Italian is the predominant language, what with the military and the great number of German officials, you might fancy yourself in 'Faderland.' The town is externally quite Italian; but the signs over the shops are a true type of its present pop., for they are inscribed in both the Italian and German tongues." The interior of V. does not correspond with the beauty of its position, several of the streets being narrow and dirty; others, in particular that which leads to the Mantua gate, and the Corso, or street where horse-races are held, are spacious. The houses, though built in general in an antique style, are of good appearance, from the quantity of marble employed in their construction. The best buildings are in the principal square. V. contains a cathedral and a number of churches, some noted for their paintings, others for their architecture. The latter forms the characteristic of the church of San-Zeno, remarkable for its façade, its vast portal, and the rows of columns, each of a single piece of marble, which support its roof. The building called the royal palace has never been completed. The Palazzo-Bevilacqua, said to be the oldest building in V., is a stately edifice, but is going fast to decay. Opposite to it is the Palazzo-Cannossa, admired for its front, and the prospect it commands. The museum of the academy is admired for its portico, with its peristyle of large Ionic columns. Of all the monuments of V., the most interesting is the Roman amphitheatre, situated in the spacious square called the Piazza-del-Bra, one of the most magnificent remains of Roman architecture that has descended to modern times. The arena, in the centre and of an oval form, is 220 ft. in length, in breadth 130 ft. The seats rise in successive ranges to a height corresponding to the top of the second row of outward arches. These seats,

as well as the different passages, the stair-cases and galleries of communication, remain entire. The number of ranges of seats is 45; that of spectators which might be contained within them, about 22,000; the outward circumference of the amphitheatre 1,290 ft. The whole consists of vast blocks of marble, forming a solid mass, resting on a double row of massy vaults, which, in former ages, were appropriated to the custody of the lions, tigers, and other wild beasts. V. is the seat of one of the five sections of the imperial and royal institute of Austrian Italy. It contains, besides, a lyceum or great school, a gymnasium or classical school, an academy of painting, a public library, and several private collections. The pop. is about 45,000. Its principal manufacture is that of silk; the lesser manufactures are woollens, leather, gloves, and shoes.

History. The date of the foundation of V. is not known; but Julius Caesar established a colony here. On the decline of the empire, V. experienced the fate of the other towns in the north of Italy. It was taken by Charlemagne in 774; became subsequently a free town; fell, in the course of time, under the sway of leading families; and in 1405, was united to the territorial possessions of Venice. With these it enjoyed many ages of peace and tranquillity, until the year 1796, when Italy was invaded by the French. It was then added to the kingdom of Italy. In 1814 it again fell into the hands of Austria. A congress was held here in 1822. V. is the place which has profited most by the late revolutionary war: it has despoiled Milan and Venice of their official advantages, and reduced them to the humble rank of provincial cities. "It is the residence of the lieutenant-general—the office of viceroy being for the present suspended—and from it the mandates of the imperial cabinet flow, from the Tessin to the Po, and from Alp to Alp. Politically speaking, nothing can be wiser than this arrangement; for, as long as the forts on the hills which command the city are held by Austrian troops, the fidelity of the place is insured, and, no matter what event takes place in any other part of the kingdom, the seat of government cannot be disturbed. The campaign of 1848 shows that the line of the Adige is the true strategical position, and that, whilst it is preserved, even though the Adige, the Oglio, and the Mincio be lost, the imperial government need not despair."

VERONA, a township of Oneida co., New York, U. S., on Wood-creek, 20 m. W of Utica. Pop. in 1840, 4,504; in 1850, 5,568.

VERPELETH, a town of Hungary, in the com. of Heves, 9 m. SW of Erlau. Pop. 1,600.

VERPILLIERE (La), a canton, commune, and town of France, in the dep. of the Isere, and arrond. of Vienne. The cant. comprises 16 com. Pop. in 1841, 13,477; in 1846, 14,558.—The town is 17 m. NE of Vienne, on the Alliat. Pop. 1,186. The manufacture of sugar from beet-root forms the chief branch of local industry.

VERPLANK, a village of Westchester co., in the state of New York, U. S., on Hudson river, 42 m. from New York.

VERRE, a river of France, which has its source in the N part of the dep. of the Tarn, near Taix; runs first W, then NW; enters the dep. of the Tarn-et-Garonne; and after a course of about 30 m., joins the Aveyron, on the l. bank, at Bruniquel.

VERREBROCK, a department and commune of Belgium, in the prov. of E. Flanders, and arrond. of Termonde, watered by the Scheldt. Pop. of dep., 1,272; of com., 476.

VERRERIE, a rivulet of France, in the dep. of the Côte-d'Or, which has its source near that of the Tustie and the Junie, and after a course of about 3 m., joins the Seine, on the r. bank, between Billy and Oigny.

VERRES, a market-town of Sardinia, capital of a mandemento, in the div. and prov. of Aosta, on the Lovinson, near its confluence with the Dora-Balea, and 21 m. NW of Ivrea. Pop. 3,000. It has iron manufactories. Goitre and cretinism are here extremely prevalent.

VERRICO, a market-town of Naples, in the prov. of Abruzzo-Ultra, district and 20 m. NW of Aquila.

VERRIE, a village of France, in the dep. of the Vendée, cant. of Mortagne-sur-Sevre. Pop. 1,906.

VERRIERES, a commune of France, in the dep. of the Seine-et-Oise, cant. and 3 m. N of Palaiseau, on the Bievre. Pop. 1,011.—Also a com. in the dep. of the Loire, cant. and 5 m. SW of Montrichon. Pop. 1,175. It contains many handsome dwellings. The locality is noted for its bricks and tiles.—Also a com. in the dep. of the Marne, cant. and 3 m. S of Sainte-Menehould, near the l. bank of the Aisne. Pop. 1,051.—Also a com. in the dep. of the Vienne, cant. and 7 m. W of Lusseau-les-Châteaux. Pop. 783. It has blast furnaces and manufactories of agricultural implements.—Also a village in the dep. of the Orne, cant. and 5 m. E of Nocé. Pop. 1,060.—Also a village of Switzerland, in the cant. and 23 m. WSW of Neuchâtel, near the French frontier. Pop. 1,635.

VERRIERES (Lac), a village of France, in the dep. of the Charente, cant. and 5 m. SW of Segonzac. Pop. 740. It is noted for its brandy.

VERRIERES-SUR-ECOTAY, a village of France, in the dep. of the Loire, cant. and 5 m. SW of Montrichon. Pop. 1,900.

VERRIERES-DE-JOUX, a commune of France, in the dep. of the Doubs, cant. and 5 m. E of Pontarlier. Pop. 616. It has a custom-house, and possesses an active trade in horses. In the vicinity is a spring, called the Fontaine-Ronde, remarkable for its periodical flux and reflux.

VERRIERES-SOUS-CELLES, a commune of France, in the dep. of the Deux-Sevres, and cant. of Celles, 3 m. SE of Melle, on the Belle. Pop. 1,133.

VERRIZ, a parish and v. of Spain, in the prov. of Vizcaya, near Durango, in a mountainous locality. Pop. 1,200. It has a sulphureous spring.

VERRO, a small town of Russia in Europe, in the gov. of Livonia, in the district and 45 m. SSE of Derpt, 135 m. NE of Riga, on the r. bank of the Tonda, and enclosed on three sides by a lake and its outlet, by which it is connected with the Tonda. In the vicinity are the remains of a fortress.—A canal of the same name connects the Tonda, an affluent of Lake Pakov, and thus of the gulf of Finland, with the Aa, a tributary of the gulf of Livonia.

VERRUA, a fortified town of Sardinia, in the div. and prov. and 23 m. NE of Turin. Pop. 2,600. In 1610, this place successfully defended itself against a large Spanish force under Ferià.

VERRUCHIO, a market-town of the Papal states, in the deleg. and 27 m. SE of Forlì.

VERBUYE, a commune of France, in the dep. of the Deux-Sevres, cant. and 2 m. SE of Mazières. Pop. 1,555.

VERS, a town of France, in the dep. of Lot, cant. and 1 m. NW of St. Gery, on the river Lot. Pop. 1,000.

VERSAILLES, a city of France, in N lat. 48° 47' 56", at an alt. of 174 metres = 571 ft. above sea-level, in the dep. of Seine-et-Oise, 12 m. W by S of Paris. Pop. in 1789, 44,200; in 1846, 84,901. Its streets cross at right angles, and though less spacious than might have been expected in a town built so recently, and with such great advantages, they are wider than those of Paris. The market-places and squares are also larger than is common in France. The avenues leading to the palace divide the town into two parts, of which the one situated to the left is called the old, the other the new town. The latter contains the principal church, and the greater proportion of elegant buildings. The removal of the royal residence in 1789, was a great blow to the prosperity of V. A manufacture of fire-arms has been established here. Clocks and watches are also made; and the spinning and weaving of cotton, as

well as the bleaching of linen, are carried on on a small scale. V. is the see of a bishop, and has a cathedral, with eight churches. It has also a high school, several private seminaries of education, a library of 40,000 vols., a cabinet of natural history, and a botanical garden, and a royal college.—The arrond. of V., comprising 8 cants., has an area of 84,751 hectares. Pop. in 1846, 159,779.—In 1666, V. was little more than a village, with a hunting-lodge for the royal family, when Louis XIV., pleased with the situation, and desirous of residing out of Paris, began to erect a splendid palace, which required twelve years to build. Its front and wings are of polished stone, ornamented with statues, and a central colonnade of the Doric order. A broad central avenue, and two lateral ones, named respectively the Avenues de Paris, de St.-Cloud, and de Sceaux, converge in a large open space, 800 ft. broad, called the Place-d'Armes, into which project the outer gates of the palace. Passing these we stand in an open area called the Cour-des-Statues or the Cour-d'Honneur. This grand court, 380 ft. broad, is flanked by a plain range of buildings on each side, erected by Louis XIV. for the ministers of state. In front of these stand 16 marble statues, including those of Richelieu, Bayard, Colbert, Jourdan, Massena, Turenne, Du Guesclin, Sully, Lannes, Mortier, Condé, &c. In the midst, at the upper part of this outer court, is a fine colossal equestrian statue of Louis XIV. Beyond this and formerly separated from the great court by a railing, is the court proper of the palace, formerly named the Cour-Royale. This, and the inner court, stretch far into the body of the palace, whose wings clasp and enclose the courts. On the N side are a wing and pavilion in the Corinthian style, built under Louis XV.; on the S side, are those completed under Louis XVIII. Next comes the Cour-de-Marble, with its marble pavement, encircled by the old palace of Louis XIII. which is all of red brick coped with stone; crowned with balustrades and sculpture, and ornamented with vases, trophies, busts, and statues. The busts, nearly all of white marble and antique, number 80, and are placed on brackets between the windows. In the centre is a balcony of white marble, supported by eight Doric columns of beautifully coloured marble. The N wing is divided from the chapel by the Cour-de-la-Chapelle, its architecture being in the best style of the age of Louis Quatorze. It has Corinthian pilasters between the windows, with sculpture, and a balustrade crowned by statues. Its external dimensions are 148 by 75 ft., and 90 ft. high; and the height of its roof, richly ridged with iron work, enables it to be seen over the palace from almost every side. The western or garden-façade of the palace, the grandest specimen of the style in France, presents a large projecting central mass of building, with two immense wings; and consists of a ground floor and first floor in the Ionic style, and an attic. The wings each exceed 500 ft. in length; the central front is 320 ft. long, and each of its retiring sides 260 ft. The number of windows and doors is 375. The palace is open from eleven to four every Sunday, and on the first Sunday in the month, it is usual for the *petite cour*—the smaller fountains—to play; the great fountains only playing on great occasions, costing from 8,000 to 10,000 francs every time they play. From the vestibule of the chapel a fine view of the interior is had. Restored by Louis Philippe to its original splendour, when the grandeur and taste of the age of Louis XIV. were concentrated here, it still exhibits one of the most magnificent spectacles at Versailles. It is 114 ft. long to the altar, 60 ft. broad, and 86 ft. high, consisting of a nave and aisles, formed by

arches with finely sculptured spandrels, supporting side galleries fronted with Corinthian columns. The Grand Galerie-des-Batailles, 393 ft. long, 42 ft. broad, and 42 ft. high, is filled with battle pictures from that of Tolbiac, gained by Clovis, in 496 to that of Wagram, in July 1809. One room is devoted to celebrated academicians, inventors, and discoverers, and men of learning, in science and literature. The theatre or Salle de l'Opéra is 144 ft. long, divided into equal parts by the curtain; its breadth, 60 feet; height, 50 ft. Ionic columns, fluted and gilt, separate the upper boxes. The decorations are crimson and gold, with a profusion of mirrors and chandeliers. It required 10,000 wax candles to illuminate this theatre, and the cost of performing here a grand opera is said to be 100,000 francs. A gallery 300 ft. long contains the busts, statues, and monumental effigies of the kings, queens, and illustrious personages of France to the reign of Louis XV. In the middle of this gallery to the left, is the entrance to the Salles-des-Croisades, five splendid Gothic rooms, full of pictures of the crusades. V. having, from its situation, little water, it was necessary to bring a supply from a distance, by machinery. This was executed on a grand scale; and no city or royal residence can boast a greater display of reservoirs, fountains and canals. The spacious park and gardens situated behind the palace, contain parterres, jets-d'eau, cascades, and thickets in pleasant variety; also a magnificent orangery. At some distance from the palace, and in a retired spot, are the two Trianons, which may be termed royal residences in miniature,—seats to which the king and queen retired, when desirous to lay aside their rank and state.

VERSAILLES, the capital of Woodford co., Kentucky, U. S., situated on a creek running into Kentucky river, 12 m. SW of Lexington.—Also a village of Ripley co., in Indiana, 65 m. SE of Indianapolis. Pop. 800.—Also a village of Morgan co., in Missouri, 87 m. WSW of Jefferson. Pop. about 600.

VERSAM, a village of Switzerland, in the cant. of the Grisons and bail. of Glenner, to the S of Palendas. Pop. 529.

VERSBACH, a village of Bavaria, circle of Lower Franconia, presidial of Wurtzburg. Pop. 1,160.

VERSBUEHEL, a village of Austria, in Styria, in the circle of Bruck, near Rottenmann. Pop. 360.

VERSICIO, a village of Switzerland, in the cant. of Ticino, and bail. of Locarno. Pop. 347.

VERSHIRE, a township of Orange co., in the state of Vermont, U. S., 24 m. SE by S of Montpelier, and drained by Ompomponoosuc river. Pop. in 1850, 1,071.

VERSIGNY, a village of France, dep. of Oise, cant. and 8 m. NW of Nanteuille-Haudoutin. Pop. 412.

VER SIN, a village of Prussia, in the regency of Koslin and circle of Rummelsburg. Pop. 310.

VERSITZ, or **VERSCHITZ**, a free royal town of Hungary, in the gep. of Temes, 48 m. S of Temeswar, at the foot of a mountain of the same name. Pop. 16,550, of whom 10,190 are Greeks, and 538 Cath. It has a Greek gymnasium, an hospital, and large cavalry barracks. Wine, silk, and rice, are cultivated in the environs.

VERSMOLD, a town of Prussia, in the prov. of Westphalia, regency of Minden, circle and 9 m. W of Halle. Pop. 1,425. It has manufactories of linen and tobacco, and is noted for its butter.

VERSOIX, or **VERSOR**, a town of Switzerland, in the cant. and 7 m. N of Geneva, on the W bank of the lake of that name, and at the mouth of a small river also named Versoix. Pop. 937. It has a large square from which the streets, some of which are still unfinished, run in straight lines. It has exten-

sive manufactories of lamps and lackered ware. This town previous to 1816 belonged to France.

VERSON, a commune of France, in the dep. of the Calvados, cant. and 5 m. NE of Evreux, on the Odon. Pop. 1,190.

VERSOUD (LE), a village of France, dep. of the Isere, cant. and 4 m. NE of Domène. Pop. 600.

VERSOVAH, a town of Hindostan, in the presidency of Bombay and prov. of Aurungabad, on the W coast of the island of Salsette, and 15 m. N of Bombay. It has a small port.

VERT, a river of France, in the dep. of the Basses-Pyrenees, which has its source in the cant. and 11 m. S of Aramits, runs NNE, waters the valley of Barétous, and after a course of 19 m. throws itself into the Gave d'Oleron, 8 m. NW of Oleron.

VERT (CAPE). See **VERDE (CAPE)**.

VERTAISON, a canton and commune of France, in the dep. of the Puy-de-Dôme, and arrond. of Clermont-Ferrand. The cant. comprises 11 com. Pop. in 1831, 12,753; in 1846, 12,449. The village is 11 m. E of Clermont-Ferrand. Pop. in 1846, 2,470.

VERTAMBAZ, a village of France, in the dep. of the Jura and cant. of Clairvaux-les-Vaux-Dain, 11 m. SE of Lons-le-Saunier. Pop. 300. It has several iron-works.

VERTAVILLO, a town of Spain, in the prov. and 15 m. SE of Palencia.

VERTE (ISLAND), an island of Russian America, in Prince William's sound, in N lat. 60° 18', and W long. 146° 50'.

VERTEILLAC, a canton, commune, and town of France, in the dep. of the Dordogne, and arrond. of Ribérac. The cant. comprises 16 com. Pop. in 1831, 12,961; in 1846, 12,657. The town is 11 m. N of Ribérac. Pop. 1,076.

VERTENTIS, a river of Brazil, in the prov. of Matto-Grosso, an affluent of the Araguaya, which it joins on the L bank, 60 m. below the confluence of the São-João, opposite the island of Bananal.

VERTEUIL, a commune of France, in the dep. of the Charente, cant. and 4 m. S of Ruffec, on the r. bank of the Charente. Pop. 1,448. It has several tanneries, and carries on an active trade in grain and saffron. It is commanded by a castle erected in 1459, and had formerly a cordelier's convent, which, for upwards of 500 years, was the place of sepulture of the Rochefaucauld.—Also a commune in the dep. of the Lot-et-Garonne, cant. and 7 m. NW of Castelmoron. Pop. 1,818.

VERTEUIL, or **VERTHEUIL**, a commune of France, in the dep. of the Gironde, cant. and 6 m. NW of Pauillac. Pop. 1,000.

VERTH, a village of Prussia, in the regency and circle of Munster. Pop. 310.

VERTLIANSKAIA, a town of Russia in Europe, in the gov. of Astrakhan, on the r. bank of the Volga, between Tchernoiar and Enotsavak. It is surrounded by an earthen rampart and ditches.

VERTOLAYE, a village of France, in the dep. of the Puy-de-Dôme, cant. and 5 m. SE of Olliergue. Pop. 790.

VERTON, a village of France, in the dep. of the Pae-de-Calais, cant. and 7 m. SW of Montreuil-sur-Mer. Pop. 1,050.

VERTOU, a canton and commune of France, in the dep. of the Loire-Inferieure, and arrond. of Nantes, on the r. bank of the Sevre-Nantaise. Pop. in 1846, 5,635. It has a brick-kiln.

VERTOVA, a village of Austrian Lombardy, in the prov. and 11 m. NE of Bergamo, and district of Gandino, on the r. bank of the Serio, at the confluence of the Vertova. Pop. 1,544. It has manufactories of coarse cloth, and other woollen fabrics, and iron-works, and numerous flour and fulling-mills.

VERTRYCK, a department and commune of France, in the dep. of the Brabant, watered by the Velpe. Pop. of dep. 498. It has factories of beet-root sugar.

VERTUS (Les), a canton and commune of France, in the dep. of the Marne, and arrond. of Chalons-sur-Marne. The cant. comprises 29 com. Pop. in 1831, 8,519; in 1846, 8,576. The village is 18 m. WSW of Chalons-sur-Marne, in a plain at the foot of a hill. Pop. 2,900. The trade consists chiefly in wine, oil, and timber. This village is a place of considerable antiquity.

VERULAM, a township of Upper Canada, in the Colborne district. Towards its centre, stretching from E to W, is Sturgeon lake.

VERULAM, a village and settlement of the colony of Natal, in South Africa. The village is on the S side of the Umhloti, on the main road from the coast to the Zulu country.

VERVIERS, a town of Belgium, in the prov. of Liege, on the small river Wesdre, and on the railway to Oologne, 14 m. E of Liege, in a deep valley. Pop. in 1850, 20,000. It is a clean, cheerful town, with extensive manufactories of woollens. It has likewise, on a small scale, dye-works, and establishments for making soap, vitriol, and aquafortis. A visitor, in 1851, reports of V. that it is "the great seat of the woollen trade of Belgium. Its manufacture of cloths treads closely on the heels of that of England; and no inconsiderable portion of the industry of the place is devoted to the fabrication of cloths which are afterwards sold in America as the produce of English looms. It is extremely difficult," says this well-informed visitor, "to determine whether, in the main, the manufactures of V. are advancing or declining. Together with the greater portion of Belgian industry, the woollen manufacture has suffered from the active competition of England, and the negative opposition of continental rivals. V. was injured by the separation of Belgium and Holland, in the loss of the Dutch market, while the Zollverein also closed some very important channels for Belgian cloths; still, the present condition of affairs cannot be considered as unfavourable, if it be compared with the past. The exports of woollen cloths, which, during the whole of 1849 had amounted to 675,269 kilogs., very greatly exceeded that amount in 1850; but although there has been of late years a steady increase, the case is very different from what it was in 1831 and 1832, when Germany alone took 1,000,000 kilogs. of Belgian cloth. This, in fact, like so many other branches of Belgian industry, suffers from the want of an extended market. Deprived of the demand afforded by Dutch commerce, and excluded, or nearly excluded, from Germany, the Belgian manufacturer maintains an unequal competition with England and France in the general markets of the world."

VERVINS, a town of France, in the dep. of Aisne, arrond. and 23 m. NNE of Laon. Pop. 2,500. It has manufactories of linen and cambric.

VERWIG, a parish of Cardiganshire, 8 m. from Cardigan. Area 3,062 acres. Pop. 378.

VERYAN, a parish of Cornwall, 8½ m. SW of Tregony. Area 5,627 acres. Pop. 1,438.

VERZINO, a town of Naples, in Calabria-Ultra 2 da, 21 m. NW of Cotrone. Pop. 850.

VERZUOLO, or **VERZOLO**, a town of Piedmont, 2 m. S of Saluzzo. Pop. of com., 3,900.

VERZY, a town of France, dep. of Marne, 9 m. SE of Rheims. Pop. 1,200. Champagne wine is largely made here.

VESAY (CAFE), a headland on Lake Ontario, Upper Canada, the N point of Prince Edward's bay.

VESCOVANA, a town of Austrian Lombardy, in the prov. and 21 m. SSW of Padua. Pop. 3,200.

VESCOVATO, a town of Austrian Lombardy, in the Milanese, 8 m. NNE of Cremona. Pop. 2,400.

VESCOVIO, a town of Italy, in the States-of-the-Church, 12 m. S of Narni.

VESDRE, a river of Prussia, which rises near Roetgen, and flows into the Ourthe, 3 m. SE of Liege, after a course of 45 m.

VESDUN, a village of France, in the dep. of Cher, 12 m. E of Chateau-Meillant. Pop. 1,000.

VESE'GINSK, a town of Russia, in the gov. and 180 m. NE of Twer, on the river Mologa. Pop. 2,800. It has a traffic in salt and timber.

VESIN, a hamlet of France, in the dep. of Moselle, cant. and 4 m. NW of Longuyon.

VESLY, a village of France, in the dep. of Manche, 12 m. W of Caventan. Pop. 1,300.

VESOUL, a town of France, dep. of the Haute-Saône, situated near the small river Durgéon, 26 m. N by E of Besançon. Pop. 7,100. The town stands in a fertile district, corn and vines being cultivated around it; and has an active trade in iron, wine, corn, cattle, and skins.—At the adjacent village of Frotte there is a spring of the extraordinary width of 90 ft., and depth of 120 ft., from which water sometimes issues in such quantities as to overflow the surrounding country.

VESPOLATO, a town of Piedmont, 6 m. SSE of Novara. Pop. 1,800.

VESSEJESSGONSK. See **VESSE'GINSK**.

VESTENE, a town of Austrian Lombardy, in the prov. and 20 m. NE of Brescia. Pop. 1,300.

VESUVIUS, a celebrated volcanic mountain in the S of Italy, about 9 m. SSE of Naples, in N lat. 40° 49', E long. 14° 26'. It rises in a gentle swell from the bay of Naples, to an elevation of 3,642 ft. The view from its summit is very beautiful, including Naples, with its bay, its islands, and its promontories, as well as the scenery of the Campagna-Felice. "The larger crater encircles you entirely for a mile, cutting off the view of the sides of the mountain, and, from the elevation of the new cone, you look over the rising edge of this black field of smoke and cinders, and drop the eye at once upon Naples, lying asleep in the sun, with its lazy sails upon the water, and the green hills enclosing it clad in the indescribable beauty of an Italian atmosphere." [Wülke.] To the W the prospect loses itself in the immensity of the sea; to the E it extends far into the interior, until arrested by the Apennines. The upper part of the mountain, torn by a series of convulsions, is strewn with its own fragments; the part next in the descent, is mixed with dried lava extending in wide black lines over its surface; while the lower part is covered with villages and country-seats, fields of maize, groves of fruit-trees, and other luxuriant productions, displaying the great fertility given by the ashes to the soil. The summit has the form of a cone, and consists of masses of burned earth, ashes, and sand, thrown out in the course of ages by the volcano. It is steep, and difficult of ascent, from the looseness of the materials. The crater is nearly ½ m. in circumf., but has not above 350 ft. of depth or descent from the ridge. Its sides or interior surface have been progressively formed of ashes and cinders, intermixed with some rocks and dried lava. The lower part of the crater is a level spot, nearly ½ m. in circumf., composed of a sort of crust of brown burned earth, and containing several orifices emitting a thin vapour. Professor Silliman thus describes the great crater: "after passing through thick clouds of steam charged with the suffocating sulphurous acid gas which greatly annoyed our lungs, when the wind cleared our vi-

sion, we found ourselves on the narrow rim of the great crater. It was so narrow that only two persons could walk upon it abreast. Our present position was on the side of V. contiguous to Somma on the N. At this place the descent of the exterior surface of the mountain was very steep,—a rapid slope of cinders and loose lava, down to the deep and narrow valley—the Atrio-del-Cavallo—between V. and Somma—a descent on the slant of probably 1,800 ft. at an angle of 50 or 60 degrees. On the other side was the crater, whose angle of descent was not less. On this narrow rim we walked on a surface not more than 6 or 8 ft. wide, with the terrific crater, 1,000 ft. deep on one side, and the abrupt descent of 1,800 ft. on the other side, into the valley of Somma. It was a spectacle truly sublime, awfully grand and appalling. The heat below sent up, in throes and spasms, dense clouds of steam and sulphurous acid gas, which at short intervals, filled the crater, and all that appeared was a pillar of a cloud, in which we were often involved, and half suffocated; we stood with arms locked, for then it was unsafe to move until a whirlwind swept the crater clear, and we could see distinctly into its profound abysses. Nothing could be more perfectly formed than this crater. It was a magnificent hollow cone, whose nether apex opened into the great world of fire below; still the fire we did not see, although we had the most decisive proof of its existence and continued action in the violent ejection of steam and gas, filling every few minutes this vast funnel, whose diam. across from side to side was probably 1,000 ft.; but the dense cloud of steam and noxious gas which hovered to leeward over a large portion of the circular orifice, rendered it impossible to walk around it, or even to ascertain whether a continuity of surface, free from cross fractures and chasms, would render it practicable without the most imminent danger. The interior of the great crater appeared to be composed of stratified volcanic beds, resembling solid lava rocks, arranged in a rude stratification. There were tempting deposits of yellow sulphur, green chloride of copper, sal-ammoniac and other substances on the walls of the crater. By throwing large stones into the crater, we made several rough measurements of its probable depth inferred from the time consumed in the returning sound, and we judged in this way that the depth of the crater was from 1,000 to 1,100 ft." V., says Shelley, "is, after the glaciers, the most impressive exhibition of the energies of nature I ever saw. It has not the immeasurable greatness, the overpowering magnificence, nor, above all, the radiant beauty of the glaciers; but it has all their character of tremendous and irresistible strength. From Resina to the hermitage you wind up the mountain, and cross a vast stream of hardened lava, which is an actual image of the waves of the sea, changed into hard black stone by enchantment. The lines of the boiling flood seem to hang in the air, and it is difficult to believe that the billows which seem hurrying down upon you are not actually in motion. This plain was once a sea of liquid fire. From the hermitage we crossed another vast stream of lava, and then went on foot up the cone—this is the only part of the ascent in which there is any difficulty, and that difficulty has been much exaggerated. It is composed of rocks of lava, and declivities of ashes; by ascending the former, and descending the latter, there is very little fatigue. On the summit is a kind of irregular plain, the most horrible chaos that can be imagined; riven into ghastly chasms, and heaped up with tumuli of great stones and cinders, and enormous rocks blackened and calcined, which had been thrown from the volcano upon one another in

terrible confusion. In the midst stands the conical hill from which volumes of smoke, and the fountains of liquid fire, are rolled forth for ever. The mountain is at present in a slight state of eruption; and a thick heavy white smoke is perpetually rolled out, interrupted by enormous columns of an impenetrable black bituminous vapour, which is hurled up, fold after fold, into the sky with a deep hollow sound, and fiery stones are rained down from its darkness, and a black shower of ashes fell even where we sat. The lava, like the glacier, creeps on perpetually, with a crackling sound, as of suppressed fire. There are several springs of lava; and in one place it gushes precipitously over a high crag, rolling down the half-molten rocks and its own overhanging waves: a cataract of quivering fire. We approached the extremity of one of the rivers of lava; it is about twenty feet in breadth, and ten in height; and as the inclined plane was not rapid, its motion was very slow. We saw the masses of its dark exterior surface detach themselves as it moved, and betray the depth of the liquid flame. In the day the fire is but slightly seen; you only observe a tremulous motion in the air, and streams and fountains of white sulphurous smoke. At length we saw the sun sink between Capree and Inarime, and, as the darkness increased, the effect of the fire became more beautiful. We were, as it were, surrounded by streams and cataracts of the red and radiant fire; and in the midst, from the column of bituminous smoke shot up into the air, fell the vast masses of rock, white with the light of their intense heat, leaving behind them through the dark vapour trains of splendour." After the eruption of 1794, the cone lost much of its elevation, sinking down into the crater, and almost filling up the cavity. The fire having thus lost its upward vent, burst through the side, and poured out lava which rolled down the declivity all the way to the sea, burning up the cultivated ground, and covering with a fluid, which afterwards became solid and hard, the chief part of the town of Torre-del-Greco. "Both in ascending and descending this mountain," says Professor Silliman, "we are impressed beyond the power of language to describe, with the incalculable amount of lava which has been ejected from V. during the ages in which it has existed. It is mantled all over, with robe upon robe, of its own congealed overflowings, and the robes have flowed down its flanks, and covered its feet. Immense fields of bristling, ragged, black and billowy lava, now extend down the sides of V., quite to the plains, and the lava has often flowed across the towns at its base, and invaded the sea. In no position so well as from the summit can these vast tracts of lava be seen all in one view. Their thickness is enormous; probably several thousand feet near the mountain, which still rears far above them its venerable and beautiful form, and will probably continue for ages to come, as it has done for ages past, to afford a vent for the internal fires of this part of the globe until it shall be sealed up like Rocca-Monfina on the road to Rome, Mount-Vulturn in Apulia, or Mount-Epimeo in Iochia; and until a new orifice shall be formed wherever the fire shall force a passage. The height of V. varies with its eruptions, as the cone is elevated or depressed." The total number of great eruptions of V. on record is above 30, reckoning from the celebrated one of A. D. 79, which proved destructive to *Herculaneum*. One of the latest, though not most formidable eruptions, took place October 24, 1822, when the ashes emitted darkened the sky at Naples, and spread as far as Cassano, 105 m. distant. In 1855, a considerable eruption of V. took place. Professor Palmieri reporting on

this latest eruption states that some days before the commencement of that phenomenon, the most singular irregularity was observed in the dipping-needle, the variations of which became so strong and frequent during the last two days before the eruption as to amount to what the professor calls a magnetic storm. The magnetic vibrations continued with increased intensity during the eruption; and the electrical state of the atmosphere was equally remarkable, being greater than the maximum in ordinary times; its diurnal period was disturbed, greater electricity having often been observed during the night than during the day; and, what was still more singular, during the eruption of ashes the fixed conductors gave but slight indications of negative electricity, while the moveable ones gave the strongest possible signs of positive tension. In general the electrical current appeared to follow the course of the smoke. The barometer remained constantly low, the therm. on the side where the lava flowed rose eight degrees, and the wind kept veering round to all the points of the compass.

VESZPRIM, a palatinate in the W of Hungary, bounded on the N by Oldenburg and Raab; on the NE by Komorn; on the E by Stuhl-Weissenburg; on the S by Tolna, Schemegh, and Zarád; and on the W by Eisenburg. It has a superficial extent of nearly 1,600 sq. m. The forest of Bakony occupies the centre of this com. In the S is the lake of Balaton. The soil is fertile. The pop. is 152,000, mostly of Magyar descent, but with a few Slavonians and Germans.

Veszprém, the chief place of the preceding palatinate, is situated in N lat. 47° 5' 8", on the r. bank of the Séd, 60 m. SW of Buda. Pop. 9,000. It has a trade in salt, corn, wine, and timber. Being a bishop's see, it has a cathedral.

VETA, a village of New Granada, in the prov. and 18 m. ESE of Pamplona. It has productive gold-mines.

VETA-NEGRA-DE-SOMBRERETE, a village of Mexico, in the dep. of Zacatecas, near Sombrerete. It has silver mines, considered by Humboldt the richest known. They are now wrought by an English company.

VETERAN, a township of Chemung co., in the state of New York, U. S., 160 m. W by S of Albany. Pop. in 1850, 2,698.

VETERANISCHE-HOHLE, a grotto of Hungary, in the Banat, 8 m. SW of Alt-Orschova. It receives its name from the famous general Veterani, who with a small body of men defended himself here against the Turks in 1694. The grotto is in a lofty rock, on the l. bank of the river, above the village of Agradina, inaccessible on all sides except one. The entrance is only 4 ft. high, and 2 ft. broad, but the interior can afford accommodation to a thousand men, and is supplied by wells with fresh water.

VETERES, a Negro tribe who inhabit the Iasini territory, in Upper Guinea, on the Ivory coast.

VETERNICO, a town of Turkey in Europe, in the sanj. and 21 m. W of Trikala, in the midst of mountains.

VETKA, a village of Russia in Europe, in the gov. of Mohilev, district and 15 m. NE of Novo-Bieliza, on the Soj. It was originally a colony formed previous to the reduction of this territory by Russia, by a Russian religious sect named *rascolnits* or heretics, and numbering 40,000 individuals. The colony was broken up by order of the government in 1764, and 20,000 of the sectaries sent to Siberia.

VETLUGA, a river of Russia in Europe, which has its source in the W part of the gov. of Viatka, flows thence into that of Vologda, forms for some distance its dividing line from the gov. of Kostroma,

and also a portion of the E boundary of that of Nijni-Novgorod, and after a course of upwards of 300 m., first W, and latterly S, flows into the Volga a little below Kozmodemiansk. It takes its course to a great extent through vast forests. Vetluga and Varnavin are the chief places on its banks.—Also a town in the gov. and 186 m. E of Kostroma, on the river of the same name, at the confluence of the Neia and Kikschina. Pop. 1,200. Matting is its chief article of manufacture.

VETRALTA, a town of the Papal states, in the delegation and 6 m. SW of Viterbo. Pop. 1,020.

VETRANA. See **AVETRANA**.

VETSCHAU, a town of Prussia, in the regency of Frankfurt and circle of Kalan, 45 m. SW of Frankfurt on the Oder. Pop. 1,505.—Also a village in the regency and circle of Aachen. Pop. 220.

VETTELHOFEN, a village of Prussia, in the regency of Coblenz and circle of Ahrweiler. Pop. 250.

VETTELSCHLOSS, a parish of Prussia, in the regency of Coblenz, and circle of Neuwied. Pop. 400.

VETTER. See **WETTER**.

VETTEERNIG, a village of Austria, in Styria, in the circle of Cille. Pop. 450.

VETTIN, a village of Prussia, in the regency of Potsdam and circle of Ost-Priegnitz. Pop. 240.

VETTLAX, an island of Russia in Europe, in the gulf of Bothnia, off the W coast of Finland, in N lat. 59° 58', and E long. 40° 52'.

VETTWUSS, a village of Prussia, in the regency of Aachen and circle of Düren. Pop. 600.

VETZBERG, a village of Prussia, in the regency and circle of Wetzlan. Pop. 240. It has the ruins of a castle.

VEUIL, or **VOEUIL**, a village of France, in the dep. of the Indre, cant. and 4 m. SW of Valençay. Pop. 650.

VEULES, a commune of France, in the dep. of the Seine-Inferieure, cant. and 5 m. E of St. Valery-en-Caux, on the English channel. Pop. 1,552.

VEURDRE (Lx), a commune and town of France, in the dep. of the Allier, and cant. of Leury-Levy, on the Allier, at the confluence of the Biendre. Pop. 1,049. It has extensive iron-works, and carries on also an active trade in wood.

VEURNE. See **FURNES**.

VEUXAULLES, a village of France, in the dep. of the Côte-d'Or, cant. and 1½ m. E of Montigny-sur-Aube. Pop. 630. It has blast furnaces and forges.

VEUZAC, a village of France, in the dep. of the Aveyron, cant. and 2 m. NNE of Villefranche. Pop. 100. It has an iron-mine.

VEVAY, a village of Switzerland co., in the state of Indiana, U. S., on the Ohio, 88 m. SE by S of Indianapolis. Pop. in 1850, 1,500.

VEVAY, or **VIVAY**, a district and town of Switzerland, in the cant. of Vaud, on the NE bank of the lake of Geneva, at the mouth of the Vevayse, and 12 m. ESE of Lausanne, in N lat. 38° 46'. Pop. 5,201. This town, which is esteemed the prettiest in the cant., and next to Lausanne the most considerable, is built with great regularity, in the form of a triangle, with the longest side towards the lake. The streets are spacious and well-kept, and the houses, though generally low, are to some extent handsome. Its principal public edifices are the church of Saint-Clair, the town-house, the corn-hall with its range of marble columns, the bridge over the Vevayse, erected in 1808, the hospital, containing a public library, and the fountain, of which the most remarkable, surmounted by an obelisk, is near the market-place, a parallelogram 600 Parisian ft. in length, and 400 ft. in breadth, 8 sides of which are lined with handsome buildings,

and the fourth extending to the lake by ranges of trees. A delightful promenade runs along the lake, and another above the town round St. Martin's church. Its industry consists in the manufacture of chocolate and tobacco. It possesses an active transit trade. It is supposed to be the *Vibiscum* or *Viviscum* of the Romans. Under the house of Savoy it formed part of Chablais.

VEVAYSE, or VEVAISE, a river of Switzerland, in the cant. of Vaud, which has its source at the foot of the Moleson, in the cant. of Friburg; flows thence into the cant. of Vaud; and after a course through a picturesque valley, in a generally SW direction of about 15 m., throws itself into the cant. of Vaud at Vevay.

VEX, a village of Switzerland, in the cant. of Valais, 2 m. SE of Zion. Pop. 800.

VEVAINCOURT, a village of France, in the dep. of the Vosges, cant. and 13 m. NE of Raon.

VEVALA, an island of Russia in Europe, in the gulf of Bothnia, near the W coast of Finland, in N lat. 63° 30', and E long. 22° 20'.

VEXERA, a town of Spain, in the prov. and 33 m. SE of Cadiz, and 6 m. from the straits of Gibraltar.

VEVIN, formerly VEULOSIN, an ancient district of France, situated on the banks of the Epte, by which it was divided into two parts, distinguished as Vexin-Français and Vexin-Normand, and lying respectively in the provs. of the Isle of France and Normandy. The former, which was on the l. bank of the river, contained three towns, of which Pontoise was the capital. The latter, which was on the r. bank of the river, contained five towns, of which Rouen was the chief.

VEVIOE, a town of Sweden, capital of the stift of Kronoberg, and of the haered of Kinnevel, on the Gulds-Meltsbacke, by which it is divided into two parts, and on Lake Bergunda, 225 m. SW of Stockholm. Pop. 1,200. It is well-built, and has a gymnasium, carpet-factories, and in the environs several paper-mills.

VEYLATS, or VAYLAS, a village of France, in the dep. of the Lot, cant. and 6 m. E of Lalbenque. Pop. 660.

VEYLE, a river of France, in the dep. of the Ain, which has its source near Charlemont; traverses the centre and W of the dep.; runs first NNW, then W; and after a course of about 69 m., throws itself into the Saône, on the l. bank, a little below Macon. Pont-de-Veyle is the chief place on its banks.

VEYNES, a canton, commune, and town of France, in the dep. of the Hautes-Alpes, and arrond. of Gap. The cant. comprises 10 com. Pop. in 1831, 4,172; in 1846, 4,074.—The town is 14 m. W of Gap, on the r. bank of the Buech. Pop. 1,859. It has several tanneries, and carries on an active trade in wool. In the vicinity are the remains of the ancient *Mons-Selencus*, and a small village named Mont-Saleon.

VEYPAR, or BIPAR, a town of Hindostan, in the presidency of Madras, in the Carnatic district, and 54 m. NE of Tinnevely, near the mouth of the Veyp-Aru.

VEYPARU, a river of Hindostan, in the presidency of Madras, in the Carnatic, which descends from the Western Ghats; runs ESE; and after a course of 90 m., throws itself into the gulf of Maa-nar, near Veypar.

VEYRAC, a commune of France, in the dep. of the Hante-Vienne, cant. and 5 m. SW of Nienil. Pop. 1,518.

VEYRE, a river of France, which has its source in the dep. of the Cantal, to the N of Parlan; flows

thence into the dep. of the Lot, and after a course, in a generally SSW direction, of about 18 m., throws itself into the Selle, opposite Boulnech.

VEYRE, or VEYRE-MORON, a canton, commune, and town of France, in the dep. of the Puy-de-Dôme, and arrond. of Clermont-Ferrand. The cant. comprises 7 com. Pop. in 1831, 13,594; in 1846, 12,706. The town is 9 m. SE of Clermont-Ferrand. Pop. 2,987.

VEYRE. See VERE.

VEYROS, or VEIROS, a town of Brasil, in the prov. and 285 m. WSW of Para, and district of Xingutania, 48 m. above Porto-de-Moz, on the E bank of the Xingu, near the confluence of a small river of the same name.

VEYUT. See JELUM.

VEZELAY, a canton, commune, and town of France, in the dep. of the Yonne, and arrond. of Avallon. The cant. comprises 17 com. Pop. in 1831, 11,989; in 1846, 12,325.—The town is 8 m. W of Avallon, on a mountain, near the Cure. Pop. 1,193. The houses are old, and only tolerable in structure, and with the exception of a church, it has no edifice worthy of notice. It has some hardware factories and rope-works, and carries on an active trade in wine, cattle, and wood. V. is noted as the birth-place of Theodore-de-Beza, and its vicinity as that of Vauban. It was formerly fortified. In 1146, a council was held here in which St. Bernard preached the crusade. It was taken, and for some time held by the Protestants, in the reign of Charles IX.

VEZELISE, a canton, commune, and town of France, in the dep. of the Meurthe, and arrond. of Nancy. The cant. comprises 33 com. Pop. in 1831, 14,022; in 1846, 13,766.—The town is 18 m. SSW of Nancy, at the confluence of the Brenon and Uvry. Pop. 1,603. It has a church, the spire of which is remarkable for its height and delicacy of structure, and an hospital, and possesses manufactures of calico, muslin, and other cotton fabrics, and brocades, several oil and tan-mills, tanneries and bleacheries. Fine porcelain clay occurs in the vicinity.

VEZENBERK. See WESZENBERG.

VEZENOBRES, a canton, commune, and town of France, in the dep. of the Gard and arrond. of Alais. The cant. comprises 17 com. Pop. in 1831, 6,372; in 1846, 6,780. The town is 6 m. SSE of Alais. Pop. 1,066. It has a consistorial church.

VEZERE, a river of France, which has its sources in the dep. of the Corréze; waters the N and W part of the dep.; runs afterwards SE into that of Dordogne; and after a course, in a generally SW direction, of about 12 m., joins the Dordogne on the r. bank, at Limeuil. Its principal affluent is the Corréze, which it receives on the l., and thence becomes navigable.

VEZERE (HAUTE), a river of France, which has its source in the NW part of the dep. of the Corréze, in the cant. and to the NW of Uzerche; runs N into the dep. of the Dordogne; and after a course, in a generally SW direction, of 54 m., joins the Isle, on the l. bank, 6 m. E of Périgueux.

VEZERONCE, a village of France, in the dep. of the Isère, cant. and 2 m. S of Morestel. Pop. 800.

VEZEZON, a village of France, in the dep. of the Haute-Loire, cant. and 1 m. N of Anson, on the r. bank of the Allier. About 1,600 boats are annually constructed here for the trade of the river.

VEZIA, a village of Switzerland, in the cant. of Tessino and district of Lugano. Pop. 302.

VEZIN, a department and com. of Belgium, prov. of Namur. Pop. of dep., 1,161; of com., 456.

VEZINS, or VEZINS, a canton and commune of

France, in the dep. of Aveyron and arrond. of Millau. The cant. comprises three com. Pop. in 1831, 4,493; in 1846, 5,005. The village is 15 m. NNW of Millau. Pop. 648.—Also a commune and town in the dep. of the Maine-et-Loire, and cant. of Chollet, 18 m. SSE of Beaupreau. Pop. 1,825. It has a tannery and a dye-work.

VEZIR-KEUPRI, formerly GEDA-KARA, a town of Turkey in Asia, in the pash. of Sivas and sanj. of Djanik, on a small affluent of the Kizil-Ermak, 45 m. NW of Amasia. It contains 2,000 families, 13 mosques, two public baths, and a well-furnished bazaar. In the vicinity is Gouza, famous for its mineral wells and extensive ruins.

VEZOUZE, a river of France, in the dep. of the Meurthe, which has its source in the Vosges, in the cant. of Lorquin, where it is formed by the junction of two principal streams. Thence it flows W past Cirey, Blamont, and Luneville; and after a course of about 45 m., throws itself into the Meurthe, on the r. bank, a little below Luneville. Its principal affluents are the Chatillon, Blette, and Verdierette. On its banks are numerous mills.

VEZZANI, a canton and commune of Corsica, in the arrond. of Corte. The cant. comprises 8 com. Pop. in 1831, 5,174; in 1846, 5,252. The village is 12 m. ESE of Corte, on the Tagnone. Pop. 964.

VEZZANO, a market-town of Sardinia, in the div. of Genoa, prov. and 21 m. E of Levante, near Monte-Trebbiano. Pop. 1,038.

VIADANA, a town of Austrian Italy, 20 m. SSW of Mantua, on the r. bank of the Po. It has a small fort and several churches. Its manufactures of linen and leather are considerable. Pop. 6,200.

VADEIROS (SERRA-dos-), a mountain-chain of Brazil, in the prov. of Goyaz, between the rivers Maranhão and Paranaíba. It gives rise to the Tocantins-Pequeno, an affluent of the Maranhão.

VIA-GRANDE, a town of Sicily, on the SE slope of Mount Ætna, 7 m. NE of Catania. Pop. 3,100.

VAISON, a river of Savoy, which rises near Vernet; runs from SW to NE, and joins the Arve, opposite Pont-Notre-Dame.

VIALA (La), a village of France, dep. of Aveyron, cant. and 8 m. W of St. Affrique. Pop. 500.

VIALA-DU-TARN (La), a village of France, dep. of Aveyron, cant. and 8 m. SW of Levezow. Pop. 700.

VIALAS, a village of France, in the dep. of Lozère, cant. and 9 m. E of Pont-de-Montvert.

VIA-MALA, a celebrated defile in the Swiss cant. of the Grisons, extending along the Rhine from about 1 m. beyond Thusis, to the opening of the valley of Schams, a distance of about 4 m. It is a narrow gorge cleft in the mountain, the nearly perpendicular walls of which are in some places 1,600 ft. in height, while they are not above 30 ft. apart at the level of the road.

VIAMAO, a parish and village of Brazil, in the prov. of São-Pedro-do-Rio-Grande, near the E bank of a lake of the same name, and 7 m. ESE of Porto-Alegre. Pop. of district, 2,816.—The lake of V. extends between the mouth of the Rio-Jacui and the Lagos-dos-Patos, and is chiefly fed by the Sino, a navigable stream.

VIANA, a town of Portugal, in the prov. of Minho, on the N side of the river Lima, 42 m. N by W of Oporto. Pop. 8,000, whose chief employments are navigation, fishing, and trading in wine, corn, oil, and fruit. The river Lima is here of considerable depth, but its channel is so much obstructed by sand-banks, that ships do not come up to the town except at high water. The entrance is defended by two strong forts.—Also a town in the prov. of Alemtejo, 15 m. SSW of Evora. Pop. 1,500.

VIANA, a town of Spain, prov. and 4 m. NE of Logroño, near the l. bank of the Ebro. Pop. 3,150.

VIANA-DEL-BOLLO, a village of Spain, in the prov. and 45 m. SE of Orense.

VIANAZ, a village of Switzerland, cant. of Schwytz, on the l. bank of the Rhone, NW of St. Maurice.

VIANCE (SAINT), a village of France, in the dep. of La Corrèze, cant. and 4 m. WSW of Dordogne. Pop. 1,100.

VIANDEN, a town of Holland, in the prov. and 21 m. N of Luxemburg, on the Our. Pop. 800, employed in the manufacture of leather and woollens.

VIANE, a village and canton of Belgium, in the prov. of E. Flanders, arrond. of Alost. Pop. 1,556.

VIANEN, a town of Holland, in the prov. of S. Holland, on the branch of the Rhine called the Leck, in N lat. 51° 59' 35", 7 m. S by W of Utrecht. Pop. 2,500. In the vicinity is the Amaliabei castle and park, and the ruined Vakestein.

VIANNA, a parish and village of Brazil, in the prov. of Maranhão, 60 m. SSE of São-Luiz, near the Macacá, a tributary of the Pindaré.—Also a recently founded town in the prov. of Espírito-Santo, on the Cordilheira-dos-Aimores, 28 m. NE of Victoria.

VIANNE, a town of France, dep. of Tarn, 7 m. ENE of Castres. Pop. 1,600.

VIANOS, a village of Spain, in the prov. of Chinchilla, 8 m. N of Alcaraz, in a picturesque valley.

VIAREGGIO, a port of Italy, in the duchy of Lucca, 16 m. N by W of Leghorn. Pop. 5,850. It has several churches, one of which is of great size. The chief export is statuary marble.

VIARIGGI, a village of the Sardinian states, in the prov. and 9 m. S of Casale. Pop. 1,800.

VIAS, a village of France, in the dep. of Herault, cant. and 4 m. W of Agde. Pop. 1,400.

VIASST, a town of Prussian Silesia, in the gov. of Oppeln, 8 m. E by N of Kosel. Pop. 1,100.

VIATKA, a gov. in the E of European Russia, between the parallels of 55° 25' and 60°, bounded on the N by the gov. of Vologda; on the E by Perm; on the S by Nijni-Novgorod, Orenburg, and Kasan; and on the W by Kostroma. It has an area of 120,958 sq. versts, or nearly 54,000 sq. m. Pop. in 1846, 1,662,800. Of the surface, several thousand sq. m. are occupied by ramifications of the Ural mountains, and by marshes, or by immense forests. The soil is in general clayey, the only large tract of rich fertile mould is on the banks of the Kama. The climate is cold, particularly in the N; but a considerable part of the natives being of Finnish origin, are diligent cultivators, and a surplus of corn is annually exported. The other articles of export are wood, timber, tar, game, peltry, copper, iron, honey, and wax. Manufactures are altogether in their infancy; and though there are several navigable rivers, such as the Kama, the Viatka, the Tcheptza, and the Kilmes, the export trade is insignificant. This gov. is divided into 10 circles.

VIATKA, the capital of the above government, seated at the confluence of the rivers Viatka and Klinovitzka, in N lat. 58° 24', 420 m. ENE of Moscow, contains 8,000 inhabitants, and is the see of a bishop of the Greek church. It has a seminary for priests. The inhabitants are in possession of the larger share of the traffic of the prov., and send to Archangel country produce, corn, flax, linseed oil, tallow, honey, and wax.

VIATKA, a river of Russia, which rises in the E of the gov. to which it gives name; runs N, then SW, and then SE; and joins the Kama on the r. bank, near Mamaditch, after a course of 500 m., in which it passes V., Orlov, Kotelnitch, Malmisch, and Mamadich. Its principal affluents are the Kobra,

the Letka, the Velikaia, the Maloma, on the r.; and the Toheptza and Kilmes on the l.

VIATLSK, or **VELAK**, a town of Russia, in the gov. and 160 m. NNE of Vologda, on the l. bank of the Vaga.

VIAU (SAINT), a village of France, dep. of Loire-Inférieure, 2 m. SE of Paimbœuf.

VIAUR, a river of France, which rises near La Clau, in the dep. of Aveyron, and flows into the Aveyron, near Saint-Amans, after a course of 50 m.

VIAZMA, a town of Russia, in the prov. of Smolensk, at the junction of the rivers Viazma and Bobri, 110 m. E by N of Smolensk. Pop. 10,000. It has a number of tanneries, and exports leather, flax, flax-seed, and hemp to Riga and St. Petersburg. V. was on the road of the French, both in their advance and retreat in 1812, and was the scene of partial engagements on both occasions, in the course of which the town was burnt.

VIAZNIKI, a town of Russia, in the gov. and 84 m. ENE of Vladimir, on the Kliazma. Pop. 1,900.

VIBORG. See **WIBORG**.

VIBRAE, a village of France, dep. of Charente, cant. and 4 m. N of Chateaufauf, on the r. bank of the Charente. Pop. 500.

VIBRAYE, a town of France, dep. of the Sarthe, 25 m. E of Le Mans. Pop. 1,000. Iron is wrought in the vicinity.

VIC, a town of France, dep. of Meurthe, 4 m. S of Chateau-Salins, 21 m. ENE of Nancy. Pop. 3,500. It has considerable manufactures of stockings and needles. A mine of salt was discovered here in 1820. There are here the remains of a castle founded in 1190.

VIC, or **VICQ**, a commune and village of France, in the dep. of Haute-Vienne, cant. and 6 m. NW of Saint-Germain-les-Belles-Filles. Pop. of cant. 2,600.

VIC-EN-BIGORRE, a town of France, dep. of the Hautes-Pyrénées, 10 m. N of Tarbes. Pop. 8,500.

VICALBARO, a village of Spain, in the prov. and 4 m. from Madrid. Pop. 1,500.

VICARELLO, a town of the States-of-the-Church, 17 m. S of Viterbo. In the vicinity are hot-springs, the *Thermae Aureliae* of the Romans.

VICCHIO, a village of Tuscany, in the prov. and 21 m. NE of Florence.

VIC-DESSOS, a town of France, dep. of Ariège, 6 m. SW of Tarascon, on a stream of the same name, an affluent of the Ariège. Pop. 1,000.

VICENTE (SAN), an island of Brazil, in the prov. of São-Paulo, in the bay of Santos. It is about 15 m. in circuit; and has a town of the same name on its S coast, in S lat. 24° 1'.

VICENTE (SAN), a town of Spain, in the prov. and 27 m. from Ciudad-Real, near the frontier of Portugal. Pop. 8,000.

VICENTE (SAN), a settlement of New-Granada, in the dep. of Anseropica, in N lat. 6° 19'.

VICENTE (SAN), or **LORENZANA**, a town of San-Salvador, 40 m. E of San-Salvador. Pop. 8,000, chiefly employed in cultivating indigo and tobacco.

VICENTE (SAN), a settlement of Chili, a little to the N of the embouchure of the Biobio.

VICENTE (SAN), a city of Brazil. It formerly enjoyed a great commerce, and it has a commodious and secure port, with a good bottom. It is also defended by a castle. The cathedral church is handsome.

VICENTE-DE-LA-BARQUERA (SAN), a coast-town of Spain, in the prov. and 32 m. WSW of Santander. Pop. 8,000. It has certain fisheries.

VICENTE-DE-LA-SONSIERRA (SAN), a town of Spain, in the prov. and 15 m. NW of Logrono, near the l. bank of the Ebro. Pop. 2,200.

VICENZA, a prov. of Austrian Italy, in the gov.

of Venice; bounded on the NW by Tyrol; on the NE by the prov. of Belluno; on the E by Treviso; on the SE by Padua; and on the SW by Verona. It is 90 m. in length from N to S, and 84 m. in greatest breadth. Its surface is in general flat, though diversified in the N and W by a few spurs of the Alps, and in the S by the hills of Berici. The river Bacchiglione intersects the prov. and passes its cap; the Gua waters its W quarter; the Brenta, its E. It is a fertile and well-cultivated country, containing on a superficial extent of 51·12 German sq. m. 815,785 inhabitants in 1834; and 340,694 in 1850.

VICENZA, the capital of the above prov., is pleasantly situated between two mountains, at the confluence of the Becone with the Bacchiglione, 88 m. W by N of Venice, in N lat. 45° 32' 24". Pop. 30,000. Its circumf. is about 4 Italian miles; and though not a place of strength, it is surrounded by a double wall and dry moat, and is defended by a fort. It is in general regularly built, and contains several good streets, and has a market-place of an oblong form, of which the chief ornament is the front of the town-house. V. has several modern structures of elegance, in particular those of the celebrated Palladio, who was a native of this place. The principal are the town-house, which is equally remarkable for the beauty of its architecture, and for the paintings contained in it; the theatre, built in the ancient Roman taste, the seats forming a semi-circle, and rising one above the other; the bridge of San-Michele consisting of one lofty arch, resembling the Rialto at Venice. V. contains a number of churches and religious houses. The cathedral is a large edifice, encumbered by surrounding houses; the church Della Grazie, the work of Palladio, inferior in size, is far superior in design and execution. V. is the see of a bishop, and the seat of a lyceum or high school, a clerical seminary, and several hospitals. Of its manufactures, the chief are silks and linen, porcelain, and paper; woollens and leather are made to a small extent. V. was a Roman station, and suffered greatly on the irruption of the northern tribes. During the middle ages, it had a times an independent government, but passed, in the beginning of the 15th cent., into the hands of the Venetians, remaining in the enjoyment of peace until the invasion of Italy by Buonaparte in 1796. In November of that year, its vicinity was the scene of sanguinary conflicts between the French under that commander, and the Austrians under Alvinzi.

VICH, or **VIGU**, a town of Spain, in the prov. and 37 m. N of Barcelona. Pop. 10,667. It has large wide streets, a few houses of a superior class, and a cathedral. Its manufactures consist of linens, cottons, and coarse woollens.

VICHADA, a large and rapid river of New Granada, which flows down the mountains of Bogota; runs E through the plains of Casanare; and enters the Orinoco, on the l. bank, in N lat. 5° 6'.

VICHEGRAD, a town of Bosnia, in the nanj. of Novibasar, on the r. bank of the Drin, 48 m. ESE of Bosna-Serai.

VICHERA, a river of Russia, in the gov. of Perm, which rises on the W flank of the Urals; runs S, and then SW; and joins the Kama on the l., after a course of 240 m.

VICHI, a river of Bolivia, in the prov. of Atacames, which runs N, and enters the Guailabamba.

VICHNI-VOLOTSHOK, a town of Russia, in the gov. and 78 m. NNW of Tver, near the Tma, and on the canal which unites the Tvertza with the Tma, or the Caspian with the Baltic. Pop. 4,000.

VICHOTNA, a village of Hungary, 25 m. W by S of Kosmark. Pop. 1,300.

VICHTACH, a town of Bavaria, 86 m. E of Ratisbon. Pop. 1,800.

VICHY, a town of France, near the r. bank of the Allier, 14 m. SW of La-Palisse. Pop. 1,800. It is greatly resorted to for its hot medicinal waters, which were known to the Romans.

VIC-LE-COMTE, a town of France, in Auvergne, near the river Allier, 17 m. SE of Clermont.

VICIOSAS, a cluster of small islands near the coast of Honduras, in N lat. 15° 12'.

VICKSBURG, a town of the state of Mississippi, U. S., 40 m. WNW of Jackson, on the l. bank of the Mississippi, 400 m. above New Orleans. Pop. in 1840, 3,104; in 1850, 3,678. It has an excellent harbour for steamers. Its chief exports are cotton and tobacco.

VICO, a small town in Corsica, 28 m. NE of Ajaccio. Pop. 2,000. It has a trade in wine and oil.

VICO, a town of the States-of-the-Church, in the deleg. of Frosinone, 8 m. N of Alatri. Pop. 8,000. It stands on the E bank of a small lake of the same name, formed by the Rio-Ricano.

VICO, a considerable town of Naples, in the prov. of Capitanata, 10 m. W of Viesti, on Monte-Gargano. Pop. 9,000.—Also a village of Naples, in the prov. of Terra-di-Lavoro, 6 m. from Nola.

VICO, a village of Austrian Dalmatia, on the river Norin, near the town of Narenze, on the site of the ancient *Narona*. It contains a variety of antiquities, such as remains of Roman roads, aqueducts, baths, temples, walls, and private houses.

VICO-DELLA-BARONICA. See **TREVICO**.

VICO-DI-MONDOVI, a village of the Sardinian states, prov. and 2 m. SE of Mondovì. Pop. 2,000.

VICO-EQUANA, or **VICO-DI-SORRENTO**, a town of Naples, 15 m. SSE of Naples. Pop. 2,000. It is the see of a bishop, and the neighbouring country produces good wine. It suffered greatly by an earthquake in 1694.

VICO-MOSCANO, a village of Austrian Italy, prov. of Cremona, 1 m. E of Casale-Maggiore. Pop. 750.

VICO-PISANO, a town of Tuscany, in the prov. and 5 m. E by S of Pisa.

VICOSA, a town of Brazil, on the coast of the prov. of Bahia, in the comarca of Caravillas, on the S bank of the Rio-Pernhipe.—Also a town in the prov. of Ceara, on the Serra-Hibiapaba, 24 m. SE of Granja. Pop. of district 5,000, chiefly Indians.

VICO-SOPRANO, or **VESPRAN**, a village of Switzerland, in the cant. of the Grisons, near the l. bank of the Maira, 30 m. SSE of Coire. Pop. 287.

VICO-VARO, a town of the Papal States, 6 m. NE of Tivoli, with the title of a principality. Horace's villa stood in the neighbourhood of this place.

VICQ, a village of France, in the dep. of Allier, arrond. and 7 m. NW of Gannat. Pop. 1,000.—Also a village of Haute-Marne, 2 m. NW of Varennes.

VICQ (SAINT-ETIENNE-DE), a village of France, in the dep. of Allier, cant. and 7 m. SW of La Palisse, on the Mourgon. Pop. 650.

VIC-SUR-AISNE, a village of France, in the dep. of Aisne, arrond. and 9 m. W of Soissons. Pop. 500.

VIC-SUR-ALLIER, a town of France, in the dep. of Puy-de-Dôme, arrond. and 13 m. SE of Clermont-Ferrand, near the Allier. Pop. 2,000.

VIC-SUR-CERE, or **VIC-EN-CARLADÈS**, a village of France, in the dep. of Cantal, arrond. and 10 m. ENE of Aurillac, on the Cère. Pop. 2,000.

VIC-SUR-CHARTIER, a village of France, in the dep. of Indre, cant. and 4 m. NNW of La-Chatre.

VIC-SUR-GARTEMPE, a village of France, in the dep. of Vienne, cant. of Saint-Savin, on the l. bank of the Gartempe.

VIC-SUR-LOSSE, or **VIC-FREZENAC**, a town of France, in the dep. of Lers, arrond. and 18 m. NW of Auch, on the l. bank of the Losse. Pop. 2,700.

VICTOIRE ISLE, a small island in the Eastern seas, in N lat. 1° 89', E long. 106° 30'.

VICTOR, a village of Ontario co., New York, U. S., 9 m. NW of Canandaigua. Pop. 350.—Also a village of Clinton co., in Michigan, 13 m. NE of Lansing.

VICTOR (SAINT), a commune and village of France, in the dep. of Ardeche, arrond. and 9 m. WNW of Tournon. Pop. 1,500.—Also a com. and v. in the dep. of Aveyron, 8 m. NNW of Saint-Affrique.—Also a com. and v. in the dep. of Loire, cant. and 6 m. NE of Saint-Symphorien-de-Luy.

VICTOR-DE-BUTHON (SAINT), a village of France, in the dep. of Eure-et-Loir, cant. and 8 m. SW of La Loupe. Pop. 1,000.

VICTOR-DE-LA-CÔTE (SAINT), a village of France, in the dep. of Gard, cant. and 7 m. W of Roquemaure. Pop. 1,000.

VICTOR-DE-RENO (SAINT), a commune and village of France, in the dep. of Orne, cant. and 4 m. SE of Longny. Pop. 1,400.

VICTOR-L'ABBAYE (SAINT), a village of France, in the dep. of Seine-Inferieure, 18 m. S of Dieppe. Pop. 600.

VICTOR-SUR-LOIRE (SAINT), a village of France, in the dep. of Loire, cant. and 4 m. NW of Chambon. Pop. 1,100.

VICTOR-SUR-THIERS (SAINT), a commune and village of France, in the dep. of Puy-de-Dôme, cant. and 3 m. NNE of Saint-Remy. Pop. 1,500.

VICTORIA, formerly **PORT PHILLIP**, or **AUSTRALIA FELIX**, a British colony on the SE coast of Australia, the youngest of all the Australian provinces, but the progressive prosperity of which has been unparalleled by any colony in ancient or modern times. It lies between the parallels of 34° and 39° S, and the meridians of 141° and 150°, and has an area of 98,000 sq. m. In our general article on **AUSTRALIA**, we have sketched the features of this district, and inserted some statistical details; but the rapid and astonishing development of the resources of this colony, since its separation in 1850, from the colony of New South Wales, demands that it form the subject of a separate article in this work.

Physical features. The coast-line from Cape Howe to Cape Wilson, extends SW 200 m.; from Cape Wilson to the mouth of the Glenelg, on the 141st meridian, it runs NW and then W, 500 m. To the N of Cape Wilson is the settlement of Port-Albert, on Comer inlet. About 82 m. to the W of Cape Wilson lies Cape Western-port; and a line beyond it is the entrance to the noble bay of **PORT PHILLIP** and the harbour of **GEELONG**; see these articles. Cape Otway lies 60 m. to the SW of Port Phillip; and between this basin and Cape Wilson, the W coast of Portland bay, are numerous flourishing settlements on the coast.—The Australian Alps spread their ramifications over the E part of the prov. The lower elevations, known as the Pyrenees and the Grampians, fill up the Central and the W division with a series of gentle undulations; and divide the streams flowing N to the Murray, from those which flow directly towards the coast. It is amongst these hills that **MOUNT ALEXANDER**, the headquarters of the gold-diggings in this part of Australia, is situated [see that article].—The great river of this prov. is the Murray which skirts its northern frontier, and receives the Nutta-Nutta, the Loden, and the Owens, from the hills to the S. See article **MURRAY**. The Yarra-Yarra flows into the head of Port-Phillip and is navigable to the city of Melbourne, the cap. of the prov., 8 m. inland.

The Glenelg waters the W extremity of the prov. The site of the capital was chosen that the future inhabitants might enjoy the supply of fresh water afforded by the Yarra-Yarra. But the convenience seems to have been dearly purchased. The town is situated 9 m. by the river's course from the anchorage in the nearest point of Port-Phillip, and between Melbourne and the river's mouth there are two bars or shallows, having in general only about 9 ft. of water at full tide. The river, too, is so circuitous that from no direction will any one wind send a vessel up to the town. The light river craft have been found quite inadequate to satisfy the requirements of a commerce increasing with a rapidity beyond all calculation. The freight for goods has actually been doubled by the unfortunate necessity of ascending the petty stream of the Yarra after a long ocean-voyage, and the rate for the last 9 m. of the voyage from London to Melbourne has been equal to that of the first 14,000.

Climate, &c.] The climate is mild and agreeable, the annual range of the therm. on the coast not exceeding 19°. The one great drawback to the otherwise genial climate of the SE of Australia is the prevalence at certain periods of parching winds from the N, heated by traversing the vast desert of the interior. Victoria derived its old name of Felix, or 'the Happy,' from the boundless expanse of clear pasture well shaded with trees, but not overgrown with brushwood, which it presented to the eyes of its first explorers. Mr. Westgarth says: "V., and indeed Australia generally, has been by the natural features of the country more favoured than most others of our colonial settlements, as regards that preliminary physical drudgery of every new country, by which colonial society is long withheld, more or less, from the higher aspects of refinement and civilisation. The beauties of cultivation presented almost everywhere throughout England, as we rapidly traverse, by modern modes of travel, the varied surface of our noble country—the alternate park and garden, the every aspect of the arts and appliances of man, represent the accumulated achievements of human toil, graduated over centuries since the age when the forest, the bog, and the morass formed the conspicuous features. If we transfer our view to the backwoods of America, we perceive the recommencement, as it were, of the same labour, and a society depressed in its outward aspects by the daily sweat and toil in which it is continually immersed. But the free grassy surface of a great part of Australia, ready-made for the plough, has overstepped a long age of such customary colonial toil, and saved her fortunate sons from a century of physical warfare."

State of agriculture, &c.] An import trade in live stock in 1835 had become an export trade in 1838. The gold discoveries in 1851 gave a great impulse to the prosperity of this colony, and so enhanced the value of land that an allotment of the value of £50 in 1837 had risen in 1851 to the value of £4,000, and in 1853 had actually realized £15,000! The quantity of crown land sold in the colony of V. in 1852 was 258,144 acres, and the purchase-money upwards of £701,000. Previous to the discovery of the gold-fields, the staple commodity of the colony was wool. In 1852 the quantity of wool exported was upwards of 20,000,000 lbs. weight, valued at a little over £1,000,000. The live stock in the colony in 1852 was 6,551,501 sheep, 531,380 horned cattle, 34,021 horses. Another important article of export is tallow. The great increase in the flocks depreciated the price of a sheep to 2s. 6d., 1s., and eventually to 7d. a head; hence the origin of the practice of boiling down the carcase for the sake of the tallow. In

1850 the quantity of tallow exported was 4,489 tons; but the rapid increase of pop. since the gold discoveries had led to a greater demand for animal food, and consequently to a gradual falling off in the export of this commodity. The number of acres in crop in 1853, was 16,823 under wheat; 411 under barley; 2,947 under oats; 1,978 under potatoes; 14,107 under sown grasses; and 401 in green food for cattle. The produce of grain in the same year was 498,704 bushels of wheat; 61 b. of maize, 9,431 b. barley, 96,980 b. oats, 4,512 tons of potatoes, and 21,286 tons of hay. The number of acres planted with vines in 1853 was 107; the produce, 4,500 gallons of wine, and 500 gallons of brandy.

Geology and gold-diggings.] The conformity of the geological structure of the Australian mountain-ranges to those of the Ural mountains [see article URAL MOUNTAINS], led our distinguished countryman, Sir R. Murchison, to predict that extraordinary discovery which, since 1851, has enabled the squatters of V. to pass from the state of wandering nomades to that of a landed and wealthy interest. The rock structure, from the Glenelg on the W to beyond the Australian Alps on the E, exhibits great parallel bands of schistose and granitic rock, having a N and S strike, and a vertical position. Along the line of section, Mount-William, in the Grampians, consists of granite capped by sandstone formed of decomposed granite. Mount-Cole, in the Pyrenees, next in order, consists of hornblend schists. The valley of the Loddon and Forest-creek are on the edges of a band of argillaceous schists interlaminated with auriferous quartz. These schists constitute 'the great auriferous band,' extending N and S from Ballarat to Bendigo. The granite of Mount-Alexander succeeds, then the argillaceous band of the Campache valley, and the M'Ivor. Granite, 'the Goulburn auriferous band,' the granite of Violet-Town, 'the Ovens river auriferous band,' succeed in order to the eastward, and then the great granitic bands of the Australian Alps occasionally interlaminated with clay-slate, &c. The E flanks of the Alps are covered by thick unconformable beds of sandstone with thin seams of coal. The auriferous deposits are derived by decomposition from the edges of the quartz-rock, &c., and exist under various conditions of depth and material, according to the conformation of the surface and the structure of the rock. The richest diggings are carried along the N and S extension of the quartz ore bands. The quantity of gold exported from Victoria from August 1851, to April 1852, was 563,471 oz.; and it has been estimated that the quantity produced up to the end of 1852 was 4,991,000 oz. The total produce for 1853 was 3,090,342 oz., which, valued at 75s. per ounce, would give £11,588,782. Of this £9,365,468 was exported to the mother country. The annual report of the Melbourne Chamber of Commerce for 1853, has the following passage:—"The greater proportion of our colonial export produce now consists of gold, and it may readily be apprehended that a large quantity of this commodity is constantly being exported from the colony without any official record. The customs' returns gave 1,975,000 oz., as the quantity exported for the year 1852; but an additional quantity of 1,600,000 oz. had been traced into the adjacent colonies, or otherwise exported without official record. It may also be remarked that the quantity of gold as officially recorded, was valued at the very low rates that were then temporarily current. A careful estimate on this subject, exhibited in the minute alluded to, gave us the value of export produce raised in Victoria during the year 1852, as no less a sum than eighteen and a half millions sterling. But deducting the quantity of gold as

sumed to have been on hand throughout the colony at that date, this amount is reduced to £14,880,000, or about twice the amount set forth in the official records of the custom-house."

Commerce.] A return of the imports and exports each year since 1843, shows that the commercial resources of the colony have rapidly increased, but emigration up to the year 1851 did not advance sufficiently to develop its abundant resources. Since then the increase has been enormous, but it has been almost entirely absorbed by the attractions of the gold-fields. The following is a table of the imports and exports from 1844 to 1851, inclusive:—

	Imports.	Exports.	Total.
1844.	£151,000	£267,000	£408,000
1845.	248,000	464,000	712,000
1846.	314,000	425,000	741,000
1847.	438,000	669,000	1,107,000
1848.	274,000	675,000	1,049,000
1849.	480,000	745,000	1,225,000
1850.	745,000	1,042,000	1,787,000
1851.	1,066,000	1,423,000	2,479,000

The principal production of the colony, prior to June 1851, was wool, and the exports of this staple rapidly increased during the years above specified, as appears by the subjoined statement:—

QUANTITY OF WOOL EXPORTED.

1844.	4,326,229 lbs.
1845.	8,541,813
1846.	5,496,950
1847.	10,310,088
1848.	10,524,663
1849.	14,567,005
1850.	18,091,207
1851.	16,845,468

This return would appear to indicate that this important branch of commerce, after rapidly increasing up to 1850, received a check in the following year, caused by the discovery of gold, and the abstraction of labour from its accustomed pursuits to the lucrative attraction of the gold-fields. The total imports for the year 1852 were—from Great Britain, £1,752,316; from New Zealand, £25,499; other British colonies, £2,102,297; South Sea islands, £266; United States of America, £60,363; foreign states, £129,101. Total, £4,069,742. The total exports were:—Produce or manufacture of Victoria, £7,337,925; of the United Kingdom, £54,898; of British possessions, £6,434; of foreign states, £52,292. In all, £7,451,549. The exports were to the following places:—To Great Britain, £6,198,433; New Zealand, £1,775; other British colonies, £1,232,286; to foreign states, £19,105.

The quantity and value of grain, &c., imported into V. during 1852, was as follows:—Wheat, 87,570 bushels; maize, 81,182 bls.; barley, oats, and pease, 254,803 bls.; flour and bread, 23,101 tons; rice, 969,920 lbs.; potatoes, 3,475 tons; malt 2,621 bushels. Total value, £2564,881. The quantity and value exported in 1852 was—wheat 25,249 bushels; barley, oats, and pease, 627 bls.; rice, 81,696 lbs.; potatoes, 34 tons. Total value, £12,304.

The live-stock imported was 3,481 horses, 824 sheep, 430 cattle; total value, £34,805. The live-stock exported was—horses 29, horned cattle 4,645, sheep 24,876, pigs 10; total value, £36,129.

The value imported of manufactured leather was, £103,489; unmanufactured leather, £6,469; total value, £109,958. The value exported—hides, £7,523; manufactured leather, £2,256; unmanufactured leather, £663; total value, £10,442. The quantity of wool exported was 20,047,453 lbs.; value, £1,062,787. The quantity of tallow exported was 1,995 tons, 4 cwt.; value, £60,261. The native gold exported in 1852 was 1,988,526 oz. 10 dwts. 13 grs.; value, £6,126,728. The oil exported was—black, 160 gal-

lons, £40; salad, 2,210 gals., £517. Total value, £557. The vessels built and registered in 1852 were—2 schooners, 182 tons; 1 sloop, 21 tons. Vessels registered: 8 barques, 628 tons; 10 brigs, 1,474 tons; 9 brigantines, 1,171 tons; 1 hermaphrodite, 189 tons; 31 schooners, 2,360 tons; 7 sloops and cutters, 172 tons; 1 steamer, 44 tons. Totals—built, 3 vessels, 203 tons; registered, 62 vessels, 5,988 tons, 399 men.

The imports for 1853 amounted to £15,842,637, being at the rate of nearly £80 per head for a pop. averaging about 200,000. Of these imports, the principal articles were as follows:—

IMPORTS INTO VICTORIA IN 1853.

Beer and cider, 2,988,549 gallons,	£614,692
Bread and flour, 37,147 tons,	851,261
Building materials and houses,	2,004,796
Cotton, linen, silk, and woollen goods,	2,869,642
Furniture,	308,752
Horsefeed,	751,265
Iron, and iron manufactures,	1,069,261
Leather and leather manufactures,	461,994
Provisions and groceries,	1,460,245
Specie,	1,163,244
Spirits, 1,978,399 gals.,	1,045,053
Sugar and molasses, 17,455 tons,	456,614
Tea, 2,196,183 lbs.,	305,864
Tobacco, 1,836,179 lbs.,	387,896
Wine, 815,615 gals.,	573,529

THE COUNTRIES FROM WHICH EXPORTS WERE MADE WERE AS FOLLOWS:

Great Britain,	£3,288,226
West Indies (British),	14,973
North America (British),	13,563
Other British colonies,	5,086,311
United States of America,	1,688,806
Foreign States,	820,961

£15,842,637

THE EXPORTS IN 1853 AMOUNTED TO £11,061,543, OF WHICH THE PRINCIPAL ITEMS WERE:

Bread and flour, 6,891 tons,	£155,753
Cottons, silks, linens, woollens,	78,796
Gold, 2,497,723 oz. 15 dwt. 16 grs.,	8,644,529
Provisions and groceries,	69,411
Spirits, 115,357 gallons,	44,990
Tobacco, 311,907 lbs.,	40,023
Wool, 20,842,591 lbs.,	1,651,871

THE COUNTRIES TO WHICH IMPORTS WERE MADE WERE AS FOLLOWS:

Great Britain,	£3,875,624
British colonies,	942,741
United States of America,	19,646
Foreign States,	223,632

£11,061,543

Banking.] The astonishing progress of this colony cannot be shown better, or in a more striking light, than by its banking statistics. The following were the aggregate amounts, under the respective heads, of the banks existing here in the periods mentioned:—

	1851.	1852.
Notes in circulation,	£102,415	£242,545
Deposits (not bearing interest),	703,167	2,731,797
Total liabilities,	819,303	3,746,228
Coin,	273,185	952,923
Gold, valued at cost,	NIL	430,110
Bills discounted, &c.,	615,311	1,046,126
Total assets,	908,807	2,561,875

Mr. Westgarth, the compiler of the annual report of the Melbourne chamber of commerce for 1852, enters into the following striking comparative estimates of the progress of a colony, in which "eighteen years ago there was not a civilized human being residing. The value of the produce of this colony actually exported in 1852, was," he says, "in round numbers £15,000,000. With so encouraging a fact, we may venture upon an interesting research, and compare the results of the commerce of V. with those in several other instances that are

naturally suggested to the mind by our own present position and most recent history. 1. California is our great competitor in the production of gold. The latest statements that have come into my hands on the subject of the gold produce of that country are up to March of last year. California had then entered the sixth year of her golden harvest, while V. had attained the second. At that time the produce of gold, the sole export produce of California, amounted in value, by official record, to £12,000,000 annually, and to this quantity it was estimated that one-fourth should be added for the unrecorded export: making a total of £15,000,000, the amount which we have just ascertained to be the annual value of the export of this colony, about the same period. 2. Among British colonies those of India have hitherto stood first, as far exceeding all others in the magnificent scale of their wealth and commerce. The exports for the year 1851 from Calcutta, the capital and seaport of Bengal, the greatest of the Indian presidencies, amounted in value to £11,040,000 or rather less than three-fourths of the amount of the exports of this colony for the year succeeding. 8. To proceed to still higher standards of comparison, let us take the export commerce of Britain itself. The average annual value of the exports for the four years, 1848 to 1851, amount to £65,565,000; so that the value of the export produce of this colony already approaches to one-fourth of that of the parent state." When the railway to connect Melbourne with its harbour is opened, the perils, the waste of money and time to which the voyager to the land of gold was exposed in the last 9 m. of his course will exist no more. The navigation of the Yarra will be in a great measure superseded by the possibility of unloading at a sea-harbour, and then 10 minutes of a railway will take the eager traveller into the midst of the ugliest, worst-built, richest, and dearest town in the globe. Another railway, again, will soon connect Melbourne with Geelong. V. has now two capitals, each possessing some conveniences and advantages, and both labouring under some counterbalancing deficiencies; but when a railway has bound them together, each will share the advantages of the other. And these undertakings seem small and insignificant by the side of the great scheme which proposes to connect Melbourne with Sydney. A line is in contemplation which will first carry the digger to the gold rocks of Mount-Alexander, and then sweep away to the NE. The line will find an opening through the great chain of mountains by means of one of the passes that admit the waters of the Yass, and then, entering on the long valley which gives a channel to the Shoalhaven and the Hawkesbury, will terminate at the harbour of Port-Jackson. It will probably be some years before the London and Liverpool of Australia, as they have been termed, will be thus united; but colonial energy will not suffer the time to be a day longer than is absolutely necessary. Of the 500 m. over which the line is to extend, one half is said to be on a dead flat, and the gradients of the remaining half are by no means great.

Population. In 1846, the district of Port Phillip had a pop. of 32,879. In March 1851, the pop. was 77,845; on 26th April, 1854, it amounted to 286,798, of whom only 80,912 were females. The discovery of the gold fields in June 1851 attracted a vast number of persons to the colony. A return of immigrants who arrived in V. in 1852, distinguishing those who arrived at the public expense from those who arrived at their own expense, showed that the immigrants were 15,477; the unassisted, 79,187. Grand total: 94,664.

The countries from which the immigrants last came were as under:

England,	28,159
Scotland,	11,814
Ireland,	4,477
Other countries,	1,951
Australian colonies,	48,233
	94,664

The total number of schools in the province in 1852 was 115, at which attended 4,322 boys, 3,519 girls. Total, 7,841. Aid from Government, £7,763; amount paid from school fees, £5,731.—The number of churches and chapels in the colony on the 31st of December, 1852, was 49. Estimated to accommodate 16,060 persons, and attended generally by 14,520 persons. The churches and chapels belonged to the following bodies:—Church of England, 13; Presbyterians, 7; Wesleyans, 17; Independents, 3; Baptists, 2; Roman Catholics, 6; Jews' Synagogue, 1.—The council of the Melbourne University includes the bishop of Melbourne, and of the Roman Catholic church, two Presbyterian ministers, and lay members of different denominations. The university is incorporated by an act of council. Forty acres of valuable land to the N of the city have been appropriated to the use of the council; £30,000 have been granted for the building, and an endowment of £9,000 per annum. The four professors, for the Greek and Latin languages, Natural Science, Mathematics, and Logic, Modern Literature, and Political Economy, are to receive a salary of £1,000 per annum with chambers.

Government. The administration of this colony is now conducted by a governor, an executive council, and a legislative assembly, the latter of which is about to be divided into an upper and a lower house. The schedule for the upper house, which is to consist of 80 members, has been agreed to in committee; they are distributed according to the following arrangement, which also shows the administrative subdivisions of the province:

CENTRAL PROVINCE, including the city of Melbourne and the country extending three miles round the corporate limits of the city,
SOUTH PROVINCE, including the counties of Bourke, Evelyn, and Mornington,
SOUTH-WESTERN PROVINCE, including the counties of Grant, Grenville, and Polwarth,
WESTERN PROVINCE, including the counties of Ripon, Hampden, Heytesbury, Villiers, Normanby, Dundas, and Puffet,
NORTH-WESTERN PROVINCE, including the counties of Talbot and Dalhousie, and the Wimmera and Loddon districts,
EASTERN PROVINCE, including the county of Anglessey, the proposed county of Rodney, and the Murray and Gipps' Land districts.

The revenue in 1852 was £1,128,825, of which £558,500 was territorial. In 1853, the revenue was £1,577,181, of which £846,214 was territorial. The following is a return of the revenue of the colony in each of the four quarters of 1854 ending 30th September:—

	Quarters ending			
	Dec. 31, 1853.	March 31, 1854.	June 30, 1854.	Sept. 30, 1854.
Gold licenses,	£180,737	£92,082	£77,235	£30,639
Racort and Treasury fees,	18,122	14,659	16,456	16,570
Customs,	336,015	196,092	218,347	198,068
Port & harbour dues,	4,929	5,308	5,098	8,575
Postage,	8,421	9,828	12,465	24,309
Licenses,	5,875	7,814	67,049	47,420
Fines and forfeitures,	17,404	14,044	14,678	17,112
Fees of office,	7,098	7,744	11,308	12,746
Miscellaneous,	7,101	14,173	11,951	13,940
Land revenue,	548,884	231,075	377,301	511,643

The expenditure in 1853 was £784,961, of which the expenses of the civil establishment amounted to £298,273; of the judicial, to £18,990; of the police, £51,726; of the gaol and penal establishment,

£24,782; of the ecclesiastical establishment, £4,219; and of education, £7,591. The public works and buildings amounted to £96,977; and the military establishment to £2,873; while the gold-workings were debited with £146,335.

VICTORIA, a large river of Northern Australia, discovered by Stokes in 1839. Its estuary between Turtle-point and Pearce-point, in Queen's channel, is 26 m. wide, and it is navigable for large vessels at least 60 m. from its mouth. It has been traced to 135 m. from its mouth, where it was found flowing from the SE. It has recently been proposed to trace this important river to its source, and thence strike across the country, in a S direction, to Adelaide, if practicable; or if not, in an E direction to the SE corner of the gulf of Carpentaria. The advocates of this line of exploration argue that the mouth of this river is about the nearest point of Australia to England in a direct line. London (the straits of Dover excepted) will shortly, say they, be connected with Constantinople by means of railways. The passage is short and easy across the Dardanelles to Scutari. From Aleppo, either by the N or the S side of the range of the Kurin mountains, there are probably no difficulties which engineers will not in time overcome. Turning again to Mercator's chart, it will be found that from Aleppo to the great river Euphrates the distance does not exceed 60 m. Along the banks of that once famous and still noble river will, no doubt, be traced a comparatively easy road for railway communication to Bussora at the head of the Persian gulf. And along the NE shores of that gulf there do not appear to be any great engineering obstacles to the formation of a railway thence to Choubar, on the coast of Beluchistan. Thence the course would be across the Indus to Hyderabad, and through the important commercial districts of Cambay and Surat to Bombay. When at Bombay, a day and a-half or so, at any ordinary speed, would carry us by railway through Punah to the ancient city of Goa, and through Seringapatam to Cochin or to Cape Comorin, touching at Ceylon and at Sumatra, and Java if desirable, a steamer would reach the river V. in about 8 days, at the present rate of speed. From that part of the V. river we could, by means of railroads if the country is traversable, reach Adelaide, Melbourne, or Sydney in 2 or 3 days at the most. Thus our gold-fields in Australia may be reached from England, at only moderate rates of speed, by steam, in 22 days; and with that object in view, the V. river is likely to become the great hall door of Australia. Independent, however, of all this, and presuming that the interior of Australia is perfectly inaccessible—which we have no reason to suppose—and independent of the deep scientific interest attached to the proposed expedition, they believe there is every probability that such an expedition will open up new and valuable lands; and while the proposed starting point is the best for penetrating into the unknown parts of the interior, it is in itself a site of which it is desirable to have a better knowledge, since it promises to be an important station for the rapidly developing commerce between India, China, and the Indian archipelago. Further, the expedition could usefully survey a probable station for the steam communications which must yet be established between India, China, and New South Wales. The lands also upon the northern rivers of Australia promise to be suitable for many valuable purposes besides the ordinary pastoral business of that country, and especially for the growth of cotton. Again, the station which would there be formed would, in all probability, concentrate the trepang fishery and other existing trades, at present chiefly

in the hands of Malay adventurers. To these considerations it is replied by the advocates of another line of exploration that the merits of the V. river, as a central point from which our knowledge of the interior could most readily be extended, appear by no means equal to those of the gulf of Carpentaria. The only territory to which the V. offers peculiar facilities of access, is on the NW water-shed; and it is not unlikely that mountainous country may render access from its head-waters to the E and S difficult and perhaps impracticable. On the other hand, the S shores of the gulf of Carpentaria run inland to the extent of 500 m.; and the numerous rivers which flow into it command as close an approach to the NW water-parting as the V. In addition to this, the following immense sweep of country is most accessible from the gulf, viz. from the drainage area of the E coast of the continent, extending from Leichhardt's route to the gulf, W to Mitchell's furthest; thence to the central point attained by the expedition of Sturt; and so on, completing the unknown extent of the N water-shed and its relations to the vast centre, up to the comparatively limited range naturally approachable by the NW rivers. A series of movements radiating from the gulf along its numerous rivers, and connecting it with the line thus indicated, would, it is argued, intercept, in every case, the course intended to be traversed by the missing explorer, Dr. Leichhardt; and if this were the only advantage, it ought not to be overlooked. Captain Stokes, while recording the exploration of the Victoria, as well as that of the gulf and some of its rivers, often makes reference to the remarkable advantages offered by the gulf, both for exploration and settlement. This evidence in favour of the gulf comes from the experienced discoverer who explored the V. as well as the gulf, and it cannot therefore be considered *ex parte*. "It is of importance in the establishment of a settlement on the N coast of Australia," say the advocates of the gulf route of exploration, "that it should be accessible and attractive to the native navigators and traders of the adjacent Indian archipelago: all along that remarkable maritime channel which penetrates between two continuous and parallel chains of important islands, from Singapore to the gulf of Carpentaria, there is now no depot for British merchandise, eastward of Singapore. The smooth seas, the periodical winds, and land within sight, to which the native traders are accustomed, would render the boisterous ocean, within the region of hurricanes, through which the V. must be approached, an impediment to that important traffic. We must endeavour to take timely warning from the failure of Port-Essington, in proceeding to bring about any new settlement on the N coast. Recurring to the gulf of Carpentaria, it is but a prolongation of the frequented line of traffic through the archipelago. By way of the coast of New Guinea the line of land is scarcely interrupted between the archipelago and the shores of the gulf; and the native traders will derive from the land which surrounds the gulf that protection from violent winds to which they are accustomed amongst their own contiguous islands. Safe harbours, numerous rivers, rich soil, fine climate, and proximity to the eastern trade, must cause the territory around the gulf to be rapidly settled as soon as its merits are better known.

VICTORIA, a recently founded town, on the N side of the island of Hong-Kong, on Victoria bay. See article HONG-KONG.

VICTORIA, a district of Upper Canada, skirted on the S by the bay of Quinti, and watered by the Trent, the Moora, and the Salinas. Its district town is Belleville. Pop. in 1842, 15,842.

VICTORIA, a county in the SE of the state of Texas, U. S. Area 804 sq. m. It is intersected by the Guadalupe, and by the Garatas, the Zanilla, and the Casa-Blanca. Pop. 289.—Its cap. of the same name is situated on the E bank of the Guadalupe, 113 m. SSE of Austin, in N lat. 28° 56' 47", W long. 97° 7' 30".—Also a village in Knox co., Illinois, 87 m. N by W of Springfield.—Also a village of Davies co., in Missouri, 188 m. NW of Jefferson.—Also a village of Bolivar co., in Mississippi, 100 m. NNW of Jackson.

VICTORIA, a settlement of Brazil, in the prov. of Bahia, comarca of Urubú.—Also an island in the prov. of São Paulo, to the E of the island of São Sebastião, in S lat. 23° 47' 42".

VICTORIA, a town of Mexico, in the prov. of Tabasco, on the coast of the gulf of Campeachy. It has a small fort for its defence.

VICTORIA, a Dutch fort on the SW coast of the island of Amboyna, in S lat. 8° 41' 41".

VICTORIA (Cape), a cape on the W coast of Patagonia, in S lat. 52° 35'.

VICTORIA (Fort), a factory of the Hudson's Bay company, in Vancouver's island, on Esquimalt-bay on the SE coast of the island, in N lat. 48° 25'. The fort is an oblong stockade, with a blockhouse at the opposite corners, and a few guns in each. There are also some storehouses, and two wharfs, one of which has 18 ft. water alongside.

VICTORIA-HARBOUR, a large roomy inlet, on the S side of Choiseul sound, in the Falkland archipelago. It is formed by a long peninsula running parallel to the shore for about 7 m.

VICTORIA (Lake). See **ALEXANDRINA**.

VICTORIA-LAND, a recently discovered region in the southern Atlantic ocean, nearly upon the same meridian with New Zealand, and 2,000 m. further S, discovered by Sir James Ross. "On the morning of the 11th January 1841, when in S lat. 70° 41', and E long. 172° 36', land was discovered," says that gallant officer, "at the distance, as it afterwards proved, of nearly 100 m. directly in the course we were steering, and therefore directly between us and the pole. Although the circumstance was viewed at the time with considerable regret, as being likely to defeat one of the more important objects of the expedition, yet it restored to England the honour of the discovery of the southernmost known land, which had been nobly won, and for more than twenty years possessed by Russia. Continuing our course towards this land, for many hours we seemed scarcely to approach it. It rose in lofty mountain-peaks of from 2,000 to 12,000 ft. in height, perfectly covered with eternal snow; the glaciers that descended from the mountain summits projected many miles into the ocean, and presented a perpendicular face of lofty cliffs. As we neared the land, some exposed patches of rock appeared; and steering towards a small bay for the purpose of effecting a landing, we found the shore so thickly lined for some miles with bergs and pack-ice, and with a heavy swell dashing against it, we were obliged to abandon our purpose, and steer towards a more promising looking point to the S, off which we observed several small islands. On the morning of the 12th I landed, accompanied by Commander Crozier, and a number of the officers of each ship, and took possession of the country in the name of her most gracious majesty. The island on which we landed is composed wholly of igneous rocks, numerous specimens of which, with other imbedded minerals, were procured; it is in S lat. 71° 56', and E long. 171° 7'. Observing that the E coast of the main land trended to the southwards, whilst the N shore took a north-westerly direction, I was led to hope, that by penetrating to the south as far as practicable, it might be possible to pass beyond the magnetic pole, which our combined observations placed in 76° (?) nearly; and thence by steering W, complete its circumnavigation. We accordingly pursued our course along this magnificent land, and on the 23d of January, we reached 74° 18' S., the highest southern lat. that had ever been attained by any preceding navigators. Although greatly impeded by strong southerly gales, thick fogs, constant snow-storms, we continued the examination of the coast to the southward, and on the 27th we again landed on an island in S lat. 76° 8', and E long. 168° 12', composed, as on the former occasion, entirely of igneous rocks. Still steering to the southward, early the next morning, a mountain of 12,400 ft. above the level of the sea, was seen emitting flame and smoke in splendid profusion: this magnificent volcano, which received the name of Mount-Erebus, is in S lat. 77° 32', and E long. 167°. An extinct crater to the E of Mount-Erebus, of somewhat less elevation, was called Mount-Terror. The mainland preserved its southerly trending, and we continued to follow it, until, in the afternoon, when close in with the land, our further

progress in that direction was prevented by a barrier of ice, stretching away from a projecting cape of the coast, directly to the ESE. This extraordinary barrier presented a perpendicular face of at least 150 ft., rising, of course, far above the mast-heads of our ships, and completely concealing from our view everything beyond it, except only the tops of a range of very lofty mountains in a SSE direction, and in S lat. 79°. Pursuing the examination of this splendid barrier to the eastward, we reached the latitude of 78° 4' S., the highest we were at any time able to attain, on the 2d of February; and having, on the 9th, traced its continuity to the long. of 191° 23', in S lat. 78°, a distance of more than 300 m., our further progress was prevented by a heavy pack, pressed closely against the barrier; and the narrow lane of water, by means of which we had penetrated thus far, became so completely covered by rapidly-forming ice, that nothing but the strong breeze with which we were favoured enabled us to retrace our steps. When at a distance of less than half a mile from its lofty icy cliffs, we had soundings with 318 fath. on a bed of soft blue mud. With a temperature of 30° below the freezing point, we found the ice to form so rapidly on the surface, that any further examination of the barrier in so extremely severe a period of the season being impracticable, we stood away to the westward for the purpose of making another attempt to approach the Magnetic pole, and again reached its lat. 76° 8' (?) on the 14th of February, and although we found that much of the heavy ice had drifted away since our former attempt, and its place, in a great measure, supplied by recent ice, yet we made some way through it, and got a few miles nearer to that pole than we had before been able to accomplish, when the heavy pack again frustrated all our efforts, completely filling the space of 15 or 16 m. between us and the shore. For several days we continued to examine the coast to the westward, tracing the pack-edge along, until, on the 25th of February, we found the land abruptly to terminate in S lat. 70° 40', and E long. 165°, trending considerably to the S of W, and presenting to our view an immense space occupied by the newly-formed ice, so covered by recent snow as to present the appearance of one unbroken mass, and defying every attempt to penetrate it. The great southern land we have discovered, and whose continuity we have traced from nearly the 70th to the 79th degree of latitude, I am desirous to distinguish by the name of our most gracious sovereign Queen Victoria."

VICTORIA-LAND, a recently discovered tract of Arctic America, lying between the parallels of 70° and 72°, along the W side of Victoria strait, which separates it from Boothia Felix, and continuous with Wollaston-Land on the SW, and Prince Albert-Land on the NE. It was discovered by Mr. T. Simpson in 1838. Having passed the farthest point reached by Franklin in 1821, Simpson saw from a low cape, which he named Cape Franklin, a new land or crowded chain of islands of great extent, in many places high and covered with snow, stretching from W to NE. The mainland here turned off to ENE, which continued to be its general bearing for the three following days. It is flat in its outline, the path leading alternately over soft sand, sharp stones, and swampy ground. At the distance of from 1 to 2 miles the coast is skirted by a range of low stony hills partially clothed with dull verdure, which send down to the sea numberless brooks and small streams: none of the latter at that season (August) reached above the waist, though the deep and rugged channels of many of them showed that in the spring they must be powerful torrents. Two leagues inland, a hill—which was named Mount George, after Governor Simpson—rises to the height of 600 ft., and forms a conspicuous object for a day's journey on either side. The ice all along lay immovably aground upon the shallow beach, and extended in every direction as far as the eye could reach. The great northern land still stretched out before the explorers, and kept alive doubts of their being engaged in exploring an immense bay, which even the increase in the tides, the quantity of seaweed and shells, and the discovery of the remains of a large whale and of a Polar bear could not altogether dispel. These doubts seemed almost converted into certainty as they drew near, on the fourth evening, an elevated cape, and saw land apparently all around. With feelings of disappointment Simpson ascended the height from whose summit a splendid and unlooked-for view suddenly burst upon him. "The ocean, as if transformed by enchantment, rolled its free waves beneath and beyond the reach of vision to the eastward, islands of various shape and size overspread its surface, and the northern land terminated in a bold and lofty cape, bearing NE at least 40 m. distant, while the coast of the continent trended away to the south-east. I stood, in fact," continues Mr. Simpson, "on a remarkable headland at the E entrance of an ice-obstructed strait. The extensive land to the northward I have called 'Victoria Land,' in honour of our youthful sovereign; and its eastern extremity Cape Pelly, after the governor of the honourable company. To the promontory, where we encamped, I have attached the name of Cape Alexander, after an only brother, who would give his right hand to be the sharer of my journeys. The rise and fall of the tide there was about 3 ft., being the greatest observed by us in the Arctic seas. The coast here changes its character, the water becomes deep, the approach easy, and I have little doubt that the islands contain secure harbours for shipping. Next morning, at the distance of 8 or 9 m., we crossed another high cape, formed of trap rocks, in N lat. 68° 53' 18"-5, the variation of the compass being 6° E. The travelling had become more and more toilsome; our road

now passing over some miles of round loose stones, and then through wet mossy tracks, sown with large boulders, and tangled with dwarf willows. At our usual camping hour, we opened a large bay studded with islands, which ran in for 5 m. to the SSW, and then turned off in a bold sweep of rounded granitic hills dipping to the sight in the ESE, at the distance of 30 m. To walk round even the portion of the bay in view would have consumed three days: the time allotted for outgoing was already expired, and two or three of my men were severely lame from the fatigue of their burdens, the inequalities of the ground, and the constant immersion in icy cold water. The morning of the 29th of August was devoted to the determination of our position, and the erection of a pillar of stones on the most elevated part of the point. After which, I took possession of the country, with the usual ceremonial, in the name of the honourable company, and for the Queen of Great Britain. In the pillar I deposited a brief sketch of our proceedings, for the information of whoever might find it. Its situation is in N lat. $68^{\circ} 43'$, W long. $106^{\circ} 3'$. The compass grew sluggish and uncertain in its movements as we advanced eastward, and frequently had to be shaken before it would traverse at all. Two miles to the S of our encampment, a rapid river of some magnitude discharges itself into the bay, the shores of which seemed more broken and indented than those along which we had travelled."

VICTORIA (LA), a village of Venezuela, on the road leading from Caracas to Puerto-Cavello, in N lat. $10^{\circ} 15' 35''$. The principal ornament of the place is a handsome church, so large that it might well be termed a cathedral.

VICTORIA (NORTH AND SOUTH), two districts of British Caffraria, in S. Africa.

VICTORIA (NOSSA-SENHORA-DA), a town of Brazil, on an island off the coast of Espirito-Santo, in S lat. $20^{\circ} 18'$, W long. $40^{\circ} 0'$. It is well-built.

VICTORIA STRAIT, a channel of the Arctic ocean, separating Victoria-Land on the W, from Boothia-Felix on the E; and communicating on the N, by Ommaney inlet, with Barrow's strait.

VID, or **URAK**, a river of Turkey in Europe, in Bulgaria, which has its source in the sanj. of Sophia, on the N side of the Balkan, and to the NW of Ihlaman; flows thence into the sanj. of Rustchuk, and after a course in a generally NNE direction of about 150 m., joins the Danube on the r. bank, about 5 m. above the confluence on the opposite side of the Aluta.

VIDALIA, a village of Concordia parish, in the state of Louisiana, U. S., on the W bank of the Mississippi, opposite Natchez, and 77 m. N by W of Baton-Rouge.

VIDAUBAN, a commune of France, in the dep. of the Var, and cant. of Le Luc, 8 m. SSW of Draguignan, on the r. bank of the Argens. Pop. 2,203.

VIDDIN. See **WIDDIE**.

VIDEM, a village of Austria, in Styria, in the circle of Cilli. Pop. 260. It has a school and an Armenian institute.

VIDEBOE, an island in the NE part of the group of the Faröe islands, between the islands of Fuglöe and Bördöe. It is 9 m. in length, and nearly equal in breadth, and contains a village of the same name, with 600 inhabitants.

VIDEY, an island near the W coast of Iceland, a little to the NE of Reikiavick. It has a royal farm, formerly a monastery. The eider duck is found here in great numbers.

VIDIGUEIRA, a town of Portugal, in the prov. of Alemtejo, and comarca of Beja, delightfully situated. Pop. 2,400.

VIDIGULFO, a market-town of Austria, in Lombardy, in the prov. and 9 m. NNE of Pavia, and district of Landriano, in a fertile locality. Pop. 1,300. A victory was here gained over the Pavians by the Milanese in 1146.

VIDIO (CAFE), a headland of Spain, in the prov. of Oviedo, WSW of Cape Penas.

VIDOURLE, a river of France, which has its source in the W part of the dep. of the Gard, near Saint Hippolyte; forms for some distance the dividing line between this dep. and that of the He-

rault; divides into two branches, of which one joins the Canal-de-la-Radelle, and the other entering the dep. of the Herault, flows into the Etang-de-Mauguio. This river flows in a generally SSE direction, and has a total course of 51 m. Saint-Hippolyte, Sauve, Quissac, and Sommieres, are the chief places on its banks.

VIDRERAS, a market-town of Spain, in the prov. and 15 m. from Gerona, between that town and Barcelona, and near the coast. Pop. 1,600.

VIDZICHKI, a town of Russia in Europe, in the gov. of Vilna, district and 6 m. N of Vilkomir.

VIDZY, a town of Russia in Europe, in the gov. and 75 m. NE of Vilna, on a small affluent of the Dwina.

VIE, a river of France, which has its source in the dep. of the Orne, a little to the W of the village of Grand-Val; flows thence into the dep. of the Calvados; waters Vimoutiers, Livarot, and St. Julien-le-Faucon; and after a course of about 33 m., throws itself into the Dives, on the r. bank. It runs in a generally NW direction.—Also a river in the dep. of the Vendee, which has its source a little to the S of Belleville, in the cant. of Poire-sous-la-Roche; runs W; and after a course of 33 m., throws itself, with the Jauney, into the Atlantic, at the port of Saint-Gilles.

VIECHT (GROSS AND KLEIN), two villages of Bavaria, in the circle of Upper Bavaria. Pop. 260.

VIECHTACH, a village of Austria, in Upper Austria, in the circle of the Traun, on the Alm. It has several saw-mills, and a trade in timber.

VIECHTACH (OBER), a market-town of Bavaria, in the circle of the Upper Pfalz, and to the E of Raabburg. Pop. 1,225.

VIECHTACH (UNTER), a market-town of Bavaria, in the circle of the Regen, on the river of that name, and 47 m. NW of Passau. Pop. 1,600. It has a poor-house and an hospital, and contains manufactories of linen and of tobacco, dye-works, and breweries.

VIECHTENSTEIN, a village of Austria, in the circle of the Inn, and on the river of that name. Pop. 460. It has a castle.

VIECHT WANG, a village of Austria, in the circle of Traun, on the Inn. Pop. 1,400.

VIEHAN, a village of Prussia, in the regency of Breslau, and circle of Neumarkt. Pop. 360. It has a castle.

VIEHBACH (OBER AND UNTER), two villages of Bavaria, in the circle of Lower Bavaria, and containing respectively 260 and 300 inhabitants. They contain a convent and several mills.

VIEHHAUSEN, a village of Bavaria, in the circle of Upper Bavaria. Pop. 360. It has a castle.

VIEHHOFEN, a village of Austria, in the circle of the Upper Wienerwalde, and near St. Polten. It has a glass manufactory.

VIEHLAND, a bailiwick of Hanover, in the gov. of Stade and duchy of Bremen. Pop. 2,600. Schiffdorf is its chief place.

VIEIL-HESDIN. See **HESDIN-LE-VIEUX**.

VIEIL-SAINT-REING, a commune of France, in the dep. of the Ardennes, and cant. of Novron. Pop. 1,291.

VIEIL-SALM, a department and commune of Belgium, in the prov. of Luxembourg and arrond. of Marche, watered by the Glain. Pop. 2,961.

VIEJO, a market-town of Central America, in the state of Nicaragua, near a volcano of the same name, in the dep. and 80 m. NNE of Realajo. Pop. 3,000.

VIELANT, a village of the grand-duchy of Mecklenburg-Schwerin, in the prov. of Mecklenburg. Pop. 440.

VIELAU, a village of Saxony, in the circle of Zwickau. Pop. 750.

VIELBAUM, a village of Prussia, in the regency of Magdeburg and circle of Osterburg. Pop. 350.

VIELBRUNN, a market-town of Hesse, in the prov. of Starkenburg. Pop. 780.

VIELGOROD. See **BELGOROD**.

VIELGUT, a village of Prussia, in the regency of Breslau and circle of Oels. Pop. 724.

VIELIST, a village of the grand-duchy of Mecklenburg-Schwerin, and prov. of Mecklenburg. Pop. 240.

VIELITZ, a village of Prussia, in the regency of Potsdam and circle of Ruppín. Pop. 210.

VIELLA, a commune and town of France, in the dep. of the Gers, cant. and 5 m. SW of Riscle. Pop. 1,600. The locality affords good wine.

VIELLA, a judicial partido and market-town of Spain, in the prov. of Lerida. The partido comprises 34 pueblos. The town is 84 m. NNE of Lerida, in the valley of Aran, in the Pyrenees, on the l. bank of the Garonne. Pop. 700. It has a parish church and a custom-house. The manufacture of cotton and linen fabrics, and rearing of cattle form the chief objects of local industry.

VIELLA (Col. de), a pass of the Pyrenees, in Spain, on the S side of the valley of Aran, between Viella and Senet. The hospital of V. is near the S entrance to this pass.

VIELLE, or **VIELLE-AURE**, a canton and commune of France, in the dep. of the Hautes-Pyrenees, and arrond. of Bagnères-de-Bigorre. The cant. comprises 15 com. Pop. in 1831, 3,665; in 1846, 3,805. The village is 21 m. SE of Bagnères-de-Bigorre, on the Neste, in a valley of that name. Pop. 481.

VIELLE-LOYE, a commune of France, in the dep. of the Jura, and cant. of Montharrey, 9 m. from Dôle. Pop. 730. It has a bottle-work.

VIELLE-LYRE, a commune of France, in the dep. of the Eure, and cant. of Rugles, on the Rille, 27 m. SW of Evreux. Pop. 779. It has a foundry and blast furnace.

VIELLEVIGNE, a commune and town of France, in the dep. of the Loire-Inferieure, cant. of Aigrefeuille, on the Ognon. Pop. in 1846, 5,375.

VIELLY, a village of France, in the dep. of the Nord, cant. and 8 m. SW of Solesmes. Pop. 1,670.

VIELMANSDORF, a village of Austria, in Styria, in the circle of Bruch and bail. of Rottenmann. Pop. 210.

VIELMUR, a canton and commune of France, in the dep. of the Tarn and arrond. of Castres. The cant. comprises 9 com. Pop. in 1831, 5,508; in 1846, 6,276. The village is 8 m. W of Castres, on the r. bank of the Agout. Pop. 1,178. It has manufactories of hosiery.

VIELSK. See **VIATSK**.

VIELS-MAISONS, a commune of France, in the dep. of the Aisne, and cant. of Charly. Pop. 884. It has manufactories of articles in caoutchouc, of pottery, and of baskets, and a tannery.

VIELSTEDE, a village of Oldenburg, in the bail. of Delmenhorst. Pop. 550.

VIELVERGE, a village of France, in the dep. of the Côte-d'Or, cant. and 5 m. SE of Pontarlier.

VIENAN, a village of Prussia, in the regency of Magdeburg and circle of Salzwedel. Pop. 200. It has salt-works and several mills.

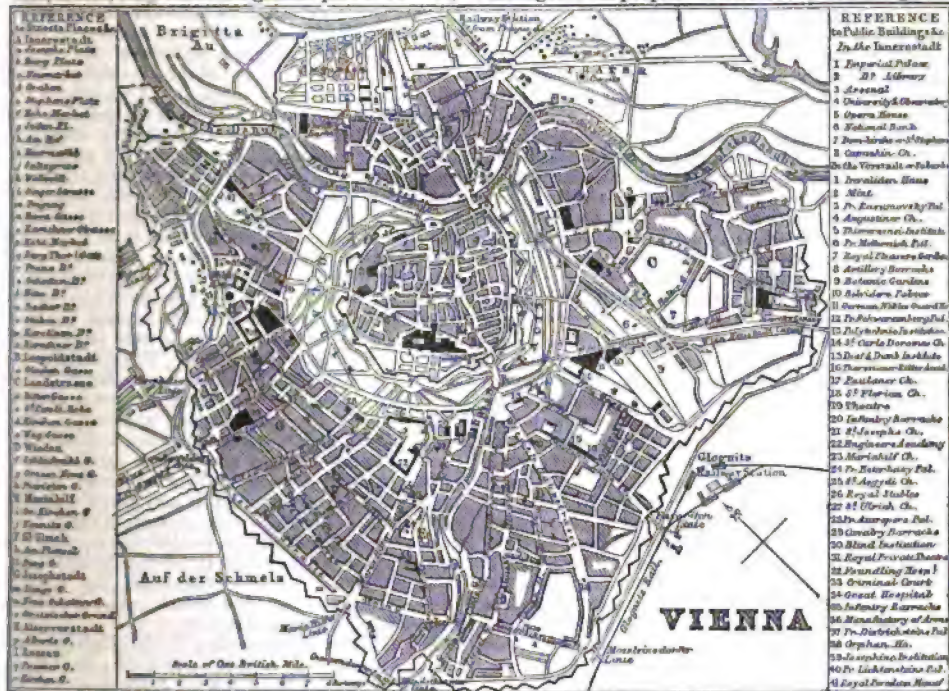

VIENENBURG, a village of Hanover, in the gov. and 33 m. SE of Hildesheim, on the Radan. Pop. 924.

VIENNA, [in German, **WIEN**; in French, **VIENNE**,] the capital of the Austrian empire, and the largest city in Germany, situated in the midst of a plain diversified by a number of picturesque eminences

and hills, near the r. bank of the Danube, where it receives a small stream called in German, the *Wien*—whence the city has its name—which passes through the city and suburbs, near the site of the ancient *Vindobona* in *Pannonia Superior*, in N lat. 48° 12', E long. 16° 23', at an alt. of 480 ft. above sea-level, 380 m. SSE of Berlin, and 650 m. E by S of Paris. To the E and N, the surrounding country is entirely level; but to the W and S is seen, at the distance of from 9 to 12 m., a range of mountains thickly planted with trees and vines. The Danube, which is here very wide, divides itself in the W part of the city into several arms forming islands covered with wood. The neighbourhood of this vast river, its agreeable islands, its variety of prospect, and the fertility of the soil along its banks, all concur to beautify the appearance of V., and would make it a very pleasant abode, if a variable climate and foggy atmosphere did not frequently overcast the cheerfulness of the scene. Few spots are so intersected with water as the vicinity of V. The Danube, broken into a variety of channels, loses its usual rapidity, and seems as if disposed to linger in this beautiful scenery; but scarcely has it left the neighbourhood of the capital, and advanced into the great level of Hungary, than it rolls along, in all its former impetuosity. One of the arms of this river, flowing between the city and the suburb of Leopoldstadt, serves for the purposes of navigation, and is crossed in four different places by wooden bridges. Its streets are unfortunately as narrow as those of any town in the south of Europe. It is divided into two great parts: viz. the *Innerstadt* or Vienna Proper, and the *Vorstadt* suburbs; and nothing can exhibit a greater contrast than these component parts of the same capital,—the suburbs surprising us by their extent and beauty, while the city disappoints us by its mean and irregular buildings. A stranger is perpetually impressed with the belief that the inhabitants of the *Innerstadt* are, as it were, imprisoned in their crowded dwellings; and this impression is confirmed by the impatience of the citizens to exchange them in the spring for the free air of the suburbs, where wide streets, extensive gardens, and large edifices, unite to enable the inhabitants to pass the summer to their satisfaction. In 1683, when V. was besieged by the Turks, the suburbs were only three or four in number; and a century ago, several of them were only villages or country-seats. Their increase has been chiefly owing to the abrogation by Joseph II., of the feudal rights possessed by the landed proprietors of the spot, after which the district became entitled to the same privileges as the rest of the capital. Fifty years ago, Vienna was considered to be well-fortified; having a rampart, twelve strong bastions, ten ravelins, deep and wide square ditches, and outworks of proportionable strength. The old works were said to be built with the money extorted by Leopold of Austria from the people of England, as the ransom of the gallant Richard-Cœur-de-Lion. With this sum, amounting to 140,000 marks of silver, Cologne weight, Leopold not only walled and fortified Vienna, but likewise the cities of Ens, Hainburg, and Neustadt. The entire extent of the lines enclosing both the city and suburbs is 16 m. Howitt, in his *Rural Life in Germany*, thus describes the city generally: "The city is great and compact, that is, so far as it is included within the walls, while far around there is an immense circle built upon, called the *Vorstädte* or suburbs, formed in segments radiating from the centre of the city, six-and-thirty in number. The city itself is still surrounded by its lofty walls and broad moat. Without this moat lies a broad open

space, [600 yds. wide] called the glacis, consisting of plots of grass divided by walks and roads, and by lines of trees; without this green open circle commences the Vorstädte. These are interspersed with gardens, public walks, churches, palaces, and theatres, so that as you walk round the ramparts, now converted into a public promenade surrounding the whole city, you behold within the city a dense mass of noble, though narrow streets, immense piles of princely buildings, and a crowding, bustling population. On the other hand, that is, outwardly, you overlook, wherever you are, a more scattered but wide-spread scene, as of an eastern city, with towers and domes, gardens and masses of trees: the suburbs, in fact, form the much greater part of V. "V."

says a lively American writer, "is an immense city, but its heart only is walled in. You may walk from gate to gate in twenty minutes. In leaving the walls you come upon a feature of the city which distinguishes it from every other in Europe: its rampart is encircled by an open park, called the glacis, a $\frac{1}{2}$ m. in width, and perhaps 3 m. in circuit, which is, in fact, in the centre of V. The streets commence again on the other side of it, and, on going from one part of the city to another, you constantly cross this lovely belt of verdure which girds her heart like a cæsus of health. The top of the rampart itself is planted with trees, and, commanding beautiful views in every direction, it is generally thronged with people. Between this and the glacis

lies a deep trench, crossed by draw-bridges at every gate, the bottom of which is cultivated prettily as a flower-garden. Altogether V. is a beautiful city. Paris may have single views about the Tuilleries that are finer than any thing of the same kind here, but this capital of western Europe, as a whole, is quite the most imposing city I have seen." [Wills.] "As you enter the streets of the city," says Mr. Howitt, "you are surprised at the life and stir. Streams of well-dressed people are pouring along them; handsome carriages and equipages are seen driving as rapidly as in London; the shops present brilliant fronts; cafés in open places project their cool awnings, and set out their scores of chairs for luxurious smokers; all is motion, life, splendour, and crowds; and you feel for the first time since you left London, as if you were once more in a great capital. You are made sensible, too, how far east you have got, and in the chief city of what a variously compounded empire you are. Picturesque groups of foreigners are seated at the doors of various coffee-houses and hotels, and the throng in the streets is brightly variegated with the costumes of Turks, Albanians, Tyrolese, Jews, Wallachians, Hungarians, Armenians, and Italians. There is no capital in Europe of the same extent in

which so much of what you want to visit, so many of the resorts of business or amusement, of literary or scientific institutions, are set down so near together. Palaces, theatres, houses of the nobility, libraries, collections of subjects of natural history, of arms, trophies, and jewellery, institutions for the education and assistance of its citizens, stand thickly, all within a very moderate space. The finest collections of works of art and of armour, with some palaces of the nobility, it is true, lie in the suburbs; but the imperial palace, the university, the arsenal, the treasure-chamber, the principal theatres and churches, lie within the walls. Within the walls, too, reside the highest classes chiefly; and wherever you go you obtain views of vast hotels of the nobles, built round courts, the splendour of which in a great measure is lost in the general view of the city, but which surprise you wherever you come upon them." Of the whole space occupied by the city, the Innere-stadt does not comprise a tenth part; but its pop. is of course denser than that of any other quarter. It is subdivided into 4 quarters: the Schotten-viertel on the W and NW; the Stuben-viertel on the NE; the Wimmer-viertel on the SE; and the Kärntner-viertel on the S. Its wall is pierced by 7 large and 5 small gates.

As a city, V. is a remarkable contrast to Berlin; the streets of the latter are very filthy, while those of V. are clean, thoroughly drained, and paved with great exactness, from the walls of the houses on one side to the walls on the other. There are no defined foot-paths for pedestrians, and in the narrow streets, especially, the vehicles frequently drive to within a few inches of the doors and windows on either side. As an imperial city, and the seat of government, the streets are pretty well occupied with private and public carriages, but of carts or waggons, very few are there to disturb either the comfort or safety of the multitudes who traverse the thoroughfares. The pavement of the street slopes from both sides to the centre, and hence, every falling shower carries every particle of dust and dirt to the gratings and drains in the centre. The city is crowded with public buildings, and some magnificent churches. V. contains 50 churches, 21 convents, several nunneries, 70 coffee-houses, 300 taverns, 5 theatres, and 6,518 houses, of which 1,887 are within the walls. Most of the houses are well-built of freestone, six stories high, with flat roofs; those of a different description are covered with pieces of timber shaped like tiles. Many of them have four cellars, one under another, with an open space in the middle of each arched roof for the purposes of ventilation; and from the lowermost there is a tube to the top, to let in air from the streets.

The principal places or squares of the city proper are the Josephplatz, the Burgplatz, the Stephensplatz, the Neumarkt, and the Hohemarkt, the Herrengrasse, and the Wallnergrasse. The dom-kirche or cathedral of St. Stephen, the protomartyr, in the centre of the Stephensplatz, is a fair and stately Gothic fabric, but somewhat gloomy, owing to the painted glass in the windows. It was founded by Henry I. of Austria, and finished by Henry II. The building, which is of freestone, is 342 ft. long, by 144 ft. broad. The steeple is 447 ft. high, and is one of the finest in Germany, and much stronger than that of Strasburg, though not so elegant.—The university of Vienna was founded in 1365, and is divided into four faculties, and four nations.—Austrian, Saxon, Hungarian, and Rhenish. Upwards of 5,000 students attend this university, which has a library of 90,000 volumes.—There are several other excellent libraries in Vienna, as the Theresianum, and the imperial and archducal libraries. Of these, the imperial library in the Josephplatz is by far the largest, whether for printed books or manuscripts. This building contains, according to the details of Balbi, about 270,000 volumes printed since the year 1500; 12,000 *incunabula* (books printed previous to the year 1500); 16,016 manuscripts, and 11,240 portfolios, containing one of the richest collections of engravings in Europe. These treasures are principally contained in one grand room, 240 (Vienna) ft. long, by 45 ft. wide, and 62 ft. high; having an oval dome of 80 ft. elevation above the general ceiling, and in five subsidiary rooms of smaller dimensions; but as the annual increase is from 3,500 to 3,800 volumes, the want of additional space is severely felt. This increase arises partly from the deposit of one copy of every work published in the Austrian territories, and partly from the purchase of foreign books—for which latter object, together with the cost of binding, and the purchase of engravings and manuscripts (the salaries of officers being paid separately), there is a fixed annual donation of 19,000 florins, or £1,900 sterling; besides such further funds as are required, and are readily granted by the government, for the purchase of any specific works of expense. For five hours in every day the library is open to the public. No introduc-

tion is requisite. The imperial palace, on the SW side of the Innerstadt, is an ancient and irregularly built structure. The imperial and the civil arsenals are of great extent. The imperial printing-office was founded by the late emperor Francis, for the purpose of supplying the printed returns, bulletins, and orders of the various branches of the administration; but it was also intended, under the auspices of the government, to give an impetus to, and become a kind of training school of the typographic and graphic arts in the empire. Its extent grew apace with its importance, and at the present moment, besides vast numbers of artists, men of science and mechanics, there are not less than 700 persons regularly employed in its various offices. It has, moreover, extended its influence to and established branch-offices in Lemberg, Temesvar, Salzburg, and other provincial capitals of the empire. The machinery department of the imperial printing-office is extremely well-supplied. An engine of 20-horse power moves not less than 48 printing and 24 copperplate presses, and 10 glazing machines. There are, moreover, 36 large and 12 small iron handpresses, 12 numbering and embossing machines, and 30 lithographic presses. A fresh supply of types is constantly supplied by 12 casting-machines and nine ovens, and 3,000 cwt. of type is kept on the premises. 500,000 sheets, or 1,000 reams of paper *per diem* are required for the consumption of the establishment. The botanic garden is on the SE of the city, a short distance beyond the open zone; and opposite the entrance gate is the chief residence of Prince Metternich. The garden is entered by an open iron gateway, from a court-yard, a short distance from the street or road, and on either side of the entrance are, apparently, well-worn public buildings, of not very imposing aspect. The form of the garden is a parallelogram, rather more than twice as long as broad, sloping to the north; and in extent, it may contain about 7 or 8 acres.—The faubourgs present, among their more remarkable buildings, the Belvidere palace, the Schwarzenberg palace, the Hotel-des-Invalides, the beautiful church of San-Borromeo, the Karmitt palace, the Auersperg, the grand hospital, and the imperial porcelain manufactory.

Population, &c. According to the official census, the pop. amounted, in 1839 to 289,785; in 1840, to 357,927, of whom 204,298 were Austrians, and the rest foreigners; the increase since 1837 being 23,427, chiefly foreigners, residing in the suburbs: the city, properly so called, having only 52,593 inhabitants. Dr. Ungewitter states the pop. in 1844 at 375,000. The garrison generally amounts to 8,000 or 12,000 men. The climate of V. is very variable, and can by no means be called healthy: the annual bills of mortality exhibiting a list of deaths, in the proportion of one in fifteen, according to De Serres; and one in nineteen, according to Nicolai. Various hypotheses have been framed to account for this extraordinary mortality. Nicolai attributes it to hard eating and drinking, as if all the people of Vienna were drunkards and gluttons. De Serres supposes it to arise chiefly from the resort of country invalids to the numerous hospitals and infirmaries of the capital; and affirms, in perfect contradiction to Nicolai, that the inhabitants are sober and temperate. The charitable institutions at Vienna are numerous and richly endowed. The Allgemeine-Krankenhaus, or great hospital, equal in extent to any in Paris or London, has 2,000 beds, and receives often 16,000 patients in the course of a year. There are separate hospitals for the soldiers, for Jews, for foundlings, orphans, and aged persons. Several of these charitable establishments are served by nuns. The

lying-in hospitals are also on a liberal plan, and under good management. V. is the seat of an archbishop.

Manufactures, &c. Manufactures in V., if not very extensive in any particular department, are of great variety, and comprise silks, ribbons, cottons, gloves, lace, saddlery, paper, earthenware, philosophical and musical instruments, cutlery, bronze goods, jewellery, liquors, chemical substances, maps, engravings, coaches, and carriages in general. The transactions of merchants, and the business conducted on commission and speculation, are also extensive, the consumption of the city being large, and the Danube giving it the benefit of navigation both to E and W. V. is the central place of commerce in the Austrian estates; the place for exchange operations, for extensive sales and purchases, for loans and contracts.

History. Vienna owes its first aggrandizement to Henry I. in 1122, who then made it the place of his residence, and in 1188 surrounded it with a wall. In 1198, it obtained its municipal privileges. In 1241 it was captured by Frederick II. In 1477 it was unsuccessfully besieged by the Hungarians, who took it, however, in 1485, under the command of Matthias Corvinus, their king. It sustained two sieges from the Turks, in 1683 and 1688, the last of which was infinitely more terrible than the first, as it lasted upwards of ten weeks. The road to Vienna was laid open to the Turks by Tekeli, whom Leopold would not subdue by clemency, and could not reduce by force. The garrison only consisted of 16,000 men, commanded by Count Stahrenberg. Never, till the days of Napoleon, was such an army as that of the Turks seen at Vienna. It consisted of 140,000 regular troops; 18,000 Wallachians, Moldavians, and Transylvanians, led by their respective princes; 15,000 Hungarians, under Tekeli; 50,000 Tartars under the famous Selim Gieray Khan: the whole, including volunteers, and the usual cumbersome appendages of an oriental army, amounting to 300,000 men, 31 pashas, and 5 sovereign princes, with 300 pieces of cannon; all under the command of Kara Mustapha, nephew of the great Cuproglu, but destitute of his abilities. The whole plain that encircles V., comprehending a space of three leagues, was filled in all its extent with the Turkish camp, which abounded in every thing necessary for so vast a multitude. The different quarters were commanded by pashas, who displayed the magnificence of kings; but all this magnificence was eclipsed by the pomp of the vizier, who combined in his character, the opposite extremes of avarice and prodigality. His retinue consisted of 4,000 officers and servants; and the park that enclosed his tents was as extensive as the city he besieged. The counterescarp was lost by the besieged; after a series of successive combats of 28 days' continuance; and on the 22d of August, the engineer, Capelliers, who had made an exact computation of his means of defence, judged that he could not hold out three days longer, if the Turks should make a general assault. No army had yet appeared to help the place; and Stahrenberg wrote these emphatic words to the duke of Lorraine: "No more time to lose, my lord; no more time to lose." But the avarice of the vizier proved the salvation of Vienna; for it is certain, that if he had given the orders for a general assault, the city must have fallen. Entertaining the notion that the capital of the German emperors must contain immense treasures, he was afraid of losing this imaginary wealth, if the city should be taken by storm; as in that case it would inevitably be subjected to universal and indiscriminate pillage. He therefore forbade the army to assault the place, but rather to wait patiently till it should surrender. This enraged the janizaries, and damped the ardour of the besiegers, who plainly saw that the vizier meant to be the sole gainer by the business. John Sobieski, with 24,000 men, at last arrived, on the 7th of September. On the 9th, the whole Christian army, 74,000 strong, was in motion. On the 12th, they approached the last heights of the Kahlenberg range. It was yet in the power of the vizier to repair his faults, for he had nothing to do but occupy the hill, and mask the defiles, in order to prevent the advance of the Christian army; but he neglected the opportunity. John Sobieski was appointed generalissimo of the Christian force; and in company with the duke of Lorraine, the electors of Saxony and Bavaria, and the other commanders, took the sacrament two hours before day-break of the 18th of September, a day that was to decide whether the cross or the crescent should prevail,—whether Vienna, under Mohammed IV., should share the fate of Constantinople, under Mohammed II.,—whether the star of the house of Hapsburg, or of Osman, should be lord of the secondant, and whether the western empire should be re-united to that of the east. The eventual problem was settled ere night, by the utter defeat of an army three times more than that of the assailants. V., though dreadfully damaged, was delivered; and Sobieski made a splendid entry, through smoking ruins, into the city, amidst the rapturous acclamations of a saved people. It was indeed a great political deliverance; for had Vienna been taken, the Christian churches, as was the case at Constantinople, would have been converted into mosques; the tide of conquest would have rolled

to the Rhine, and the power of Louis XIV. been the only opposing mound to the swell of Mussulman ambition. In 1797, V. was menaced by the French, but the treaty of Leoben saved it from the impending peril. In 1806, and again in 1809, it was taken by the French. In 1848, it was the scene of a revolutionary rising, which was for the moment successful. It was ravaged by pestilence in 1679 and 1713; and by cholera in 1831-2. See for further details the historical paragraphs of AUSTRIAN EMPIRE.

VIENNA, a village of Pickens co., in the state of Alabama, U. S., on the Tombigbee river, near the junction of the Sipsey, and 120 m. WNW of Montgomery. Pop. in 1850, 140.—Also a village of Dooly co., in the state of Georgia, on a branch of Flint river, and 78 m. SSW of Milledgeville.—Also a village of Johnson co., in the state of Illinois, 167 m. S by E of Springfield, on Cash creek. Pop. 142.—Also a village of Scott co., in the state of Indiana, 68 m. S by E of Indianapolis, and near the Jeffersonville railway.—Also a township of Kennebec co., in the state of Maine, 15 m. NW of Augusta, and watered by a branch of Sandy river. Pop. in 1840, 891.—Also a village of Dorchester co., in the state of Maryland, on the W side of Nanticoke river, and 49 m. SE of Annapolis.—Also a township of Oneida co., in the state of New York, 112 m. WNW of Albany, bounded on the SW by Oneida lake. It has an undulating surface, and is drained by Fish creek. Pop. in 1840, 2,530; in 1850, 3,393.—Also a township of Trumbull co., in the state of Ohio, 144 m. NE by E of Columbus. It has a good soil, and is drained by several streams.—Also a village of Philips township, Ontario co., in the state of New York, on the outlet of Canandaigua lake, at the junction of Flint creek. Pop. in 1840, 1,400.

VIENNA, a village of Upper Canada, in the township of Bayham, on Otter creek, 8 m. N of Port Burwell, in a hilly country. Pop. 300.

VIENNE, a river of France, which rises on the plateau of Millevalche, in the Limousin; flows northward, passing Limoges, Confolens, and Châteleraut; and joins the Loire, on the l. bank, in the dep. of the Indre-et-Loire, 2 m. above Saumur, after a course of 200 m. It gives name to two departments, and is navigable at some distance above its influx into the Loire.

VIENNE, a department in the NW of France, formed out of the ancient prov. of Upper Poitou, and bounded on the N by the deps. of Indre-et-Loire, and Maine-et-Loir; on the E by the dep. of Indre; on the S by Haute-Vienne and Charente; and on the W by Deux-Sevres. It has a superficial extent of 2,600 sq. m., and a pop. in 1846 of 508,391; in 1852, 517,305. The surface is for the most part level, or varied only by low hills. The principal rivers are the Vienne, the Charente, the Dive, the Clain, and the Creuse. The soil is somewhat light and sandy, partly fertile, partly covered with heath. About one-third of the surface is arable. The principal productions are corn, pulse, potatoes, hemp, flax, and wine. Agriculture is backward; and the wine, though made in large quantities, is of inferior quality, and is generally manufactured into brandy. Chestnuts form a great part of the food of the lower orders. The dep. contains mines of iron and marble, but its manufactures are inconsiderable. The dep. is divided into the arrondissements of Châteleraut, Civray, Loudun, Montmorillon, and Poitiers. The cap. is Poitiers.

VIENNE, a town of France, on the r. bank of the Rhone, in the dep. of Isère, 45 m. WNW of Grenoble, on the railway from Lyons to Avignon. It is pleasantly situated on the declivity and base of cultivated hills; but stands on uneven ground, and has streets in general narrow and steep. It contains several public buildings, a cathedral, erected on an eminence, two good churches, a small thea-

tre, a high school, and a museum. The pop. in 1846 was 18,610. It has manufactures of woollen, linen, hard-ware, leather, and coloured paper. There are here numerous Roman remains, several traces of aqueducts, and the piles of an ancient Roman bridge. V. was the seat of a church-council in the 14th cent., and has long been the see of an archbishop. Vines are cultivated in the neighbourhood, which produce excellent wine known as *Cote rotie*.

VIENNE (HAUTE), a department in the W of France, including the greater part of the Limousin; bounded on the N by the dep. of Vienne and Indre; on the E by Creuse; on the S by Correze and Dordogne; and on the W by Charente. It is traversed by the river Vienne flowing northward to the Loire. It has a superficial extent of 2,260 sq. m., and a pop. in 1846, of 814,739; in 1852, of 819,379. This dep. is mountainous, and produces comparatively little corn, but has extensive pasturages. Its highest summit, Mont-Jargeau, has an alt. of 8,116 ft. above sea-level. Its forests also are extensive, and its game abundant. Its mineral products consist of marble, coal, iron, lead, and antimony. The manufactures, necessarily limited in extent, consist of coarse woollens, nails, paper, pottery, and wax. The dep. is divided into the four arrondissements of Limoges (the capital), Bellac, Rochechouart, and St. Yrieix.

VIENNE-LE-CHATEAU, a commune and town of France, in the dep. of the Marne, and arrond. of Sainte-Menehould and cant. of Ville-sur-Tourbe, on the Biesme. Pop. 1,766. It has extensive manufactures of hosiery, bottle-works, and bell founderies.

VIENNOIS, formerly a district of France, in the ancient prov. of Dauphiny, and now comprised in the departments of the Drôme and Isère. Its capital was Vienne.

VIENS, a commune of France, in the dep. of the Vaucluse, cant. and 18 m. E of Apt, on the r. bank of the Calavon. Pop. 1,207.

VIERA, a tribe of Samoides, of Russia in Europe, who inhabit the gov. of Arkhangel, along the Timen coast, to the W of Petchora and near Cape Sviatol.

VILLAR-DE-SAN-CONSTANZO, a market-town of Sardinia, in Piedmont, in the prov. of Coni.

VILLARDON-PARDO, a town of Spain, in the prov. and 12 m. from Jaen, on the summit of a hill, near the Salado-de-Arjona and Salado-de-Porcuna. Pop. 660.

VILLARD-REYMOND, a village of France, in the dep. of the Isere, cant. and 1½ m. S of Bourg-d'Oisans. Pop. 270.

VILLARDS, a commune of France, in the dep. of Dordogne, and cant. of Champagnac, 9 m. S of Nontron. Pop. 1,710.

VILLAREAL, a judicial partido and town of

Spain, in the prov. of Castellon-de-la-Plana, 6 m. SW of Castellon-de-la-Plana, in a fertile plain, on the Mijares, which is here crossed by a bridge of 89 arches. Pop. 7,900. It is enclosed by old walls now much dilapidated, and has four gates and two suburbs, one of which is larger than the town. The principal street is straight and well-built. With the exception of the convents, one of which has a fine statue by Vergara, it contains no edifices worthy of note. It has several distilleries of brandy, and manufactures of tape. This town derived its origin from a royal palace erected by one of the kings of Aragon. In 1706 it was taken and to a great extent destroyed by Philip V.—Also a market-town of the prov. of Vizcaya, 24 m. SW of San-Sebastian, on the road from Irun to Vittoria, and a little to the S of the Urola. Pop. 800. It is of considerable extent, and contains some well-built streets, several fine residences belonging to the nobility, two large squares lined with handsome houses, and a fountain of excellent water. It has manufactories of hats, linen, coarse woollen fabrics, and cord, and several tile-kilns. In the vicinity are ferruginous springs, and quarries of marble.—Also a market-town in the prov. of Toledo, 6 m. from Ocana, on the plateau of that name. Pop. 600. It has a church, in which is the fine tomb of St. Raymond, founder of the order of Calatrava. Wool-spinning is its chief branch of industry.—Also a market-town of Portugal, capital of a comarca of the same name, in the prov. of Tras-os-Montes, 15 m. N of Lamego, on the Corgo, which is here traversed by a bridge. Pop. 4,250. It is the largest and finest town in the prov., and contains two churches, three convents, and an hospital. Pop. of comarca, 90,800.

VILLA-REAL-DA-CONCEIÇÃO, a town of Brazil, in the prov. of Mato-Grosso, near the l. bank of the Paraguay, 141 m. N of I'Assompcion.

VILLAREAL-DE-ALAVA, a town of Spain, in the prov. of Alava, and 9 m. N of Vittoria, in a mountainous locality. Pop. 645. It has the remains of walls and of a fortress. In the environs are quarries of marble, freestone, and sharpening-stone.

VILLAREAL-DE-EBRO, a town of Spain, in the prov. and 80 m. from Logrono, on a hill, 1½ m. from the Ebro. Pop. 2,000. It has two oil-mills, and manufactories of shoes and of linen.

VILLAREAL-DE-SAN-ANTONIO, or **VILLAREAL-DE-ARAULHA**, a town of Portugal, in the prov. of Algarva, comarca and 6 m. E of Tavira, at the mouth of the Guadiana, which here forms a port. Pop. 2,000. It is the residence of a military governor, and is fortified on the sea-ward side. The streets, which are spacious, straight and well-paved, cross at right angles, and form 40 equal squares. In the centre is a spacious square, adorned with a fine marble fountain, and with the custom-house, a magnificent edifice. It has little trade, and the harbour although spacious is wanting in depth, but has extensive fisheries. Wine is extensively cultivated in the environs. This town was founded in 1774 by the famous marquis of Pombal.

VILLY-EN-AUXOIS, a village of France, in the dep. of Cote-d'Or, cant. and 5 m. ENE of Vitteaux. Pop. 798.

VILLY-EN-TRODE, a village of France, in the dep. of Aube, cant. and 7 m. N of Bar-sur-Seine, on the Bodronne. Pop. 560.

VILM, a small island off the coast of Prussian Pomerania, to the SE of the island of Rugen. Pop. 10.

VILMANSTRAND, a fortified village of Russian Finland, in the gov. and 32 m. NW of Viborg, on the S bank of the Saima lake. Pop. 320. On the 23d of Aug. 1741, the Russians won an important victory over the Swedes in the vicinity of this place, which was followed by the treaty of Åbo.

VILNA, or **WILNA**, a government in the W of European Russia, comprising a portion of the ancient Lithuania, and extending from the parallels of $53^{\circ} 35'$ to $56^{\circ} 25'$ N. It is bounded on the N by the gov. of Courland; on the E by that of Minsk; on the S by the gov. of Grodno, and by Poland; and on the W by Prussia, and for a few miles by the Baltic. Its area is estimated at 12,325 geog. sq. m. Pop. in 1846, 863,700; in 1851, 898,000. Its surface is generally flat, and in some places marshy; in the E are a number of small lakes. All the rivers belong to the basin of the Baltic. The principal are the Niemen which separates this gov. from Poland; the Villia, the Mertschanka, the Western Berezina, the Svista, the Pevieja, the Dubiza, the Vindau, and the Southern Aa. Much of the surface is under wood. The soil is light, sandy, and fertile. Grain, hemp, and flax are largely grown. Iron ore occurs in several places. Manufacturing industry has received little development in this gov. hitherto. In 1833, there were 12 towns in this gov. with a united pop. of 64,213; and 191 villages, with a united pop. of 82,911. The gov. is administratively subdivided into 11 circles. This section of Poland was appropriated by Russia in the infamous partition of 1793.

VILNA, the capital of the above prov., is situated upon the Villia, or Vileika, in N lat. $54^{\circ} 41' 2''$, E long. $23^{\circ} 16' 16''$, 170 m. SSE of Riga. Pop. about 36,000.

It contains two or three squares or open places, and a few good houses, and large public buildings, but a great proportion of the inhabitants are still lodged in old wooden houses. Among the public buildings are an observatory of some repute, a museum, a library of 30,000 vols., a synagogue, and a Tartar mosque. The Roman Catholic educational institute has 11 professors, the medico-chirurgical academy, 23 professors. There were 37 public schools within the place in 1833, with 1,497 pupils. The academy of V. founded in 1578 was suppressed in 1832. The chief trade is connected with the transmission of agricultural and raw produce to the ports of Memel, Königsburg, and Riga. This town was founded in 1322, and rapidly rose into eminence. Its pop. about the middle of the 16th cent. was 100,000. It has suffered from fire in 1737, 1748, and 1749.

VILS, a river of Bavaria, which rises to the E of Erding; runs ENE; and falls into the Danube, on the right bank, at Vilshofen, after a course of 72 m. —Also a river of Bavaria, which joins the Raab, on the r. bank, after a course of 60 m. from N to S, at Kallmunn.

VILS, a village of Tyrol, on the Bavarian frontier, 4 m. SW of Fussen. Pop. 588.

VILSBIBURG, a town of Bavaria, on the Vils, 12 m. SE of Landshut. Pop. 1,250. The district of V. has an area of 12.5 German sq. m., with a pop. of 25,000.

VILSECH, a village of Bavaria, in the presidia and 12 m. NNW of Arnberg. Pop. 1,300.

VILSEN, a village of Hanover, in the county of Hoya, bail, and 2 m. SW of Alten-Bruchhausen, on the Eycher. Pop. 972, chiefly linen weavers.

VILSENDORF, a walled town of Bavaria, at the confluence of the Vils and the Danube, 15 m. WNW of Passau, in N lat. 48° 38' 20". Pop. 2,180.

VILTERS, a parish and village of the Swiss cant. of St. Gall, in the circle of Sargans. Pop. 1,659.

VILUENA (La), a town of Spain, in the prov. and 6 m. SW of Calatayud. Pop. 615.

VILVESTRE, a town of Spain, in the prov. and 52 m. WSW of Salamanca. Pop. 1,904.

VILVESTRE-DEL-PINAR, a village of Spain, in the prov. and 45 m. S of Burgos. Pop. 554.

VILVIESTRE-DEL-MUNO, a village of Spain, in the prov. and 12 m. WSW of Burgos. Pop. 270.

VILVORDE, a town of Belgium, in the prov. of S. Brabant, 7 m. NE of Brussels, at the influx of the Woluwe into the Senne, and on the canal to Brussels, and railway to Malines. Pop. 2,800, employed in manufactories of calicoes, glue, vermicelli, chemical substances, breweries, bleachfields, and oil and corn mills. The old castle of this town has been converted into a very extensive house-of-correction composed of 8 distinct buildings, each walled, and the whole surrounded by one large and strong wall. Tindal, the first English translator of the Bible, suffered martyrdom here in 1536.

VIMBUCH, a village of Baden, in the Middle Rhine circle, bail. of Buhl. Pop. 440.

VIMINES, a village of the Sardinian states, in Savoy, 3 m. SW of Chambéry. Pop. 1,140.

VIMIOSO, a village of Portugal, in the prov. of

Tras-os-Montes, 15 m. NW of Miranda, on the Sabor. Pop. 955.

VIMMERBY, a town of Sweden, in the prefecture and 75 m. NNW of Calmar, and haered of Seevedeo. Pop. 860.

VIMONT, a commune of France, in the dep. of Calvados, and cant. of Troarn, 9 m. ESE of Caen.

VIMOUTIERS, a canton, commune, and town of France, in the dep. of the Orne, and arrond. of Argentan. The cant. comprises 20 com. Pop. in 1831, 14,218; in 1846, 13,974.—The town is 18 m. NE of Argentan, on the Vire, in a valley. Pop. 4,200. It has manufactories of linen fabrics, numerous tanneries and bleacheries, and an active trade.

VIMY, a canton, commune, and town of France, in the dep. of the Pas-de-Calais, and arrond. of Arras. The cant. comprises 28 com. Pop. in 1831, 17,417; in 1846, 17,881. The town is 7 m. NNE of Arras. Pop. 1,075.

VINADIO, a town of Sardinia, capital of a mandamento, in the prov. of Coni, div. and prov. and 21 m. WSW of Coni, on the l. bank of the Stura. Pop. 2,600. It has thermal baths, and in the environs are mines of argentiferous lead.

VINAGRE (Rio), a river of New Granada, in the dep. of the Cauca, which descends from the volcano of Purace, and after a short course, in which it forms a cascade 869 Parisian ft. in depth, joins the Cauca.

VINAIGRE, a mountain of France, in the dep. of the Var, and arrond. of Draguignan, between Frejus and Cannes. It runs from NE to SW, and is crossed by a road, from the summit of which the snowy crest of the Alps is visible at the distance of about 20 leagues.

VINALMONT, a department and commune of Belgium, in the prov. of Liege and arrond. of Huy, watered by the Mehaigne. Pop. 243.

VINAMARCA, a lake of Peru, in the dep. of Cuzco, on the confines of Bolivia. It forms the SE part of Lake Titicaca, from which it is separated by a long narrow peninsula. It is 75 m. in length from NW to SE, and 30 m. in medium breadth.

VINARA, a settlement in the Argentine prov. of Tucuman, 56 m. NNW of San-Jago-del-Estero.

VINARÓZ, a judicial partido and town of Spain, in the prov. of Castellon-de-la-Plana; 9 m. NNE of Peniscola, to the SW of the embouchure of the Ebro. Pop. 10,000. It has no regularly formed port, but admits of the approach of small vessels, and has an active fishing and coasting trade, and a traffic in brandy and in salt.

VINASPREE, a town of Spain, in the prov. of Logrono, 9 m. SE of La-Guardia. Pop. 2,000.

VINAY, a canton and town of France, dep. of Isere, on the Trerey, 17 m. W of Grenoble. Pop. in 1846, 8,886. It has steel manufactories and iron-works.—The canton had a pop. of 10,814 in 1846.

VINCA, a canton and town of France, dep. of Pyrenees-Orientales, 4 m. ENE of Prades, near the r. bank of the Tet. Pop. of town, 2,020; of cant., 12,160.

VINCENNES, a town of France, situated near the confluence of the Seine and Marne, about 3 m. E of Paris. Pop. in 1846, 7,697. It has distilleries, and saltpetre works, and vinegar manufactories. It is remarkable for its castle, built in a remote age as a country-residence of the royal family, and after successive enlargements, finished in the 14th cent.; but since Louis XIV. removed the court to Versailles, it has been used as a state prison. It is still of considerable strength, being surrounded by a deep ditch, and having nine towers of great height and solidity. The largest is surrounded by a separate ditch of 40 ft. in depth. It was here that the unfortunate Duc d'Enghien was shot on 21st March,

1804. Adjoining to the castle is a fine park, of 732 hectares, and a forest called the Bois-de-Vincennes, a favourite resort of the Parisians. Among the public institutions at V. is the *Ecole Normale de Tir*, founded in 1845. In 1842, a school for rifle practice was established here, the object being to instruct the 10 battalions of chasseurs who were formed at that time, and whose name is now so well-known throughout Europe. In 1845, this school was made a normal school, with a view of instructing professors and soldiers, who should teach the various *corps d'armée* in the different parts of France. Subordinate establishments were also formed at Grenoble, St. Omer, and Toulouse. One uniform system of instruction in rifle-practice has been adopted, and a school formed in every regiment in the service, where this system was taught to the soldiers by persons educated at V. The *Ecole Normale de Gymnastique* established at La Faisanderie, near V., on the 11th of January, 1853, is presided over by a General officer; and soldiers from the different regiments are regularly sent there, who, after completing their gymnastic education, return to their corps, and impart to their comrades the instruction they have received. Branch-schools have also been established at Arras, Metz, Strasburg, and Montpelier. Each of these receives 200 pupils, who must be soldiers of good character and constitution, active and energetic, and not less than three years in the army.

VINCENNES, a town of Knox co., Indiana, U. S., on the E bank of the Wabash, here 230 yds. wide, 120 m. W of Louisville, in N lat. 38° 45', W long. 87° 25', 100 m. above its junction with the Ohio, in a direct line, and nearly 200 m. by the course of the river. Pop. in 1840, 2,000; in 1850, 2,070. The streets are wide, and cross each other at right angles. Among the public edifices are a Roman Catholic cathedral, and architectural seminary. It has considerable trade in furs and peltry. V. was first settled by the French from Lower Canada in 1730.

VINCENT, a township of Chester co., Pennsylvania, U. S., on the Schuylkill. Pop. 1,830.

VINCENT, a parish and hamlet in Monmouth co., Van Diemen's Land, skirted on the W and NW by the Clyde river; on the S by the cos. of Stradbroke and Henry.

VINCENT (SAINT), a very beautiful island in the British West India group, of which the capital, Kingston, on its S coast, lies in 13° 5' N lat., and 61° 15' W long. The island is about 17 m. long and 10 broad, and lies 95 m. W of Barbadoes. St. Vincent is in many parts very fertile; and is extremely well calculated to produce sugar of the best quality, and every other article cultivated in the neighbouring islands. It is watered by above 20 small rivers; the country is, however, in many parts mountainous, and has suffered by volcanic eruptions. A bold ridge of hills runs through it from N to S, at nearly equal distances, on both sides, from the coast. In its NW quarter is the celebrated volcanic mountain La Soufriere. The climate is humid. The principal productions are sugar, rum, molasses, arrow-root, and dye-woods. The island contained, in 1783, 61 sugar-estates, 500 acres in coffee, 200 acres in cocoa, 400 in cotton, 50 in indigo, and 500 in tobacco, besides land appropriated to the raising of provisions, such as plantains, yams, and maize. In 1800, the quantity of sugar made amounted to 16,518 hds. In 1812, the quantity and value of the productions were stated as follows: sugar, 17,491 hds.; rum, 7,358 punches; molasses, 2,718 casks; coffee, 8,740 lbs.; cotton, 208,690 lbs. Estimated value of the preceding arti-

cles, £541,220. Estimated value of miscellaneous articles, including cattle, esculents, and fruits, £270,861. Estimated value of exports to the United Kingdom, £472,815; to all other parts, £43,186. Estimated value of imports from the United Kingdom, £154,993; from all other parts, £42,098. In 1845, the exports were £189,241; in 1851, £218,521 in value; the imports in 1851 were £198,679. Among other articles of recent export is pozzolano, a description of earth with which the island abounds, and of a quality far superior to what may be had from any other island. Nearly 2,000 tons have been exported hence to Bermuda during the last three years, where it is used by government upon the erection of an extensive breakwater at Ireland island, and is found to be superior to anything hitherto used for similar purposes. It has also been recently analysed by eminent chemists in England, and pronounced by them an invaluable manure. The pop. in 1812 was 1,280 whites, 1,172 free coloured, and 27,156 slaves. The slave-pop. in 1825 amounted to 24,252. The pop. in 1844 was 27,248; in 1851, 30,128.—The gov. is vested in a governor, a council of 12, and a house-of-assembly of 19. The gov. of St. V. has attached to it 8 small islands: viz. Union, containing 2,150 acres; Bequia, 3,700; Canouane, 1,777; Mustique, 1,200; besides the smaller islands of Petit St. Vincent, Petit Martinique, Maillecreau, and Baliseau, each of which produces some cotton. Among these, Bequia is valuable, from the commodiousness of its fine harbour, called Admiralty bay.

History] St. V. was discovered by Columbus; but it does not appear that the Spaniards ever formally took possession of it. When discovered it was inhabited by the Yellow Caribbe, a warlike people, who were numerous on this island, attracted perhaps partly by its natural fertility, and partly by its affording them a point of rendezvous in their expeditions to the continent. About 1680, a ship from Guinea, with a large cargo of slaves, was either wrecked or run on shore upon the island of St. Vincent, when great numbers of the Negroes escaped into the woods and mountains. These people, in contradistinction to the aborigines, received the name of Black Caribbe, and, by intermarriages with the natives, and the accession of runaway Negroes from Barbadoes, became at length so very powerful, that in the early part of the last cent. they compelled the native Caribbe to evacuate in their favour the NW part of the island. In 1672, Charles II. attempted to assume the sovereignty of this and the neighbouring islands of St. Lucia, Dominica, and Tobago, and until 1748 great contentions prevailed between England and France respecting them; by the treaty of Aix-la-Chapelle, they were declared neutral, and such of the European proprietors as remained were left in undisturbed possession. The peace, however, which terminated the Seven years' war in 1763, gave to Great Britain in perpetuity the islands of St. V., Dominica, and Tobago, while the sovereignty of St. Lucia was allotted to France. In this treaty no mention was made of the Caribbe. In 1779, during the French American war, the island of St. V. was captured by a body of French troops sent from Martinique. The terms of capitulation, however, were favourable, and the island was restored to the dominion of Great Britain by the general pacification of 1783. The Caribbe continued to harass and distress the British from the time the island was first ceded in 1763, until their final removal in 1797. Instigated by the French residing on the neighbouring islands, who landed troops on St. V. in 1795, they waged a new war with the British settlers, which continued for more than two years. The ravages and devastations committed by them during this sanguinary war, cost the proprietors of the lands fully one-third of the value of their estates; but they were at length subdued, and removed by order of government to the island of Rattien. In the bay of Honduras, with provisions sufficient to subsist them for a time, and implements of husbandry to enable them to cultivate the land, and to raise that species of food to which they had been accustomed.

VINCENT, a small island in the N. Pacific ocean, at the entrance into Portlock's harbour, in N lat. 57° 48'.

VINCENT (SAINT), or SAO-VICENTE, one of the Cape Verd islands, in N lat. 16° 54' 42", W long 25° 1' 15" [*Raper*], 2,340 m. from Plymouth. It is about 12 m. in length, and 9 m. in breadth. It is an old volcano, and nearly the whole island is rocky, or covered with beds of lava, ashes, or sand; there are no trees left, and the little grass is generally wither-

ed up: sometimes no rain falls for a year and upwards. The water in the few wells is brackish. The harbour, Porto-Grande, however, is the best of the whole group; and being a coaling-place for the Brazilian, Cape, and Australian steamers, has become of some importance. There are a Portuguese governor, a few black soldiers, some prisoners, two or three Englishmen, including a consul, and a population of about 500 Negroes and their descendants, of all shades between jet black and whitey-brown. The inhabitants are of good stature, the complexion copper-colour, the hair dark and straight. A coarse woven material of peculiar manufacture is used as a dress. Their food consists of bananas, oranges, several kinds of vegetables, besides Indian corn, which they raise in small quantities. Their huts are formed of pieces of iron-stone, roofed with bamboo and thatched with grass. The language spoken is Portuguese.

VINCENT (SAINT), a village and fort of France, in the dep. of Basses-Alpes, cant. and 3 m. WNW of Barcelonnette, on the r. bank of the Ubaye. Pop. 700.—Also a commune and v. of France, in the dep. of Cantal, cant. and 6 m. NE of Salers, near the r. bank of the Mars. Pop. 1,400.—Also a commune and v. in the dep. of Herault, cant. and 2 m. W of Olargues. Pop. 1,500.—Also a commune and v. in the dep. of Haute-Loire, 7 m. N of Puy. Pop. 1,400.—Also a commune and v. in the dep. of Lot, cant. and 2 m. SE of Saint-Céré. Pop. 1,050.

VINCENT (CAPE SAINT), or **CASO-DE-SAO-VICENTE**, a rocky peninsula, forming the extreme W point of Portugal, and also of Europe, in N lat. $37^{\circ} 2' 54''$, W long. $9^{\circ} 0' 0''$. It is noted for the naval victory over a Spanish naval force gained off it on 14th February 1797, by Sir John Jarvis, afterwards Earl St. Vincent.—Also a cape on the W coast of Madagascar, in S lat. $21^{\circ} 54'$.

VINCENT (SAINT), a village of the Sardinian states, 2 m. E of Chatillon, at the foot of a high rock of the same name, in the prov. of Aosta.

VINCENT (POINT SAINT), a point of land on the W coast of Van Diemen's Land, in S lat. $43^{\circ} 25'$.

VINCENT-BAY (SAINT), a bay on the N coast of Tierra-del-Fuego, a little to the E of Cape St. Vincent. The country about the bay is in general flat.

VINCENT (GULF OF SAINT), a large inlet on the S coast of Australia, extending between the parallels of 34° and $35^{\circ} 40'$ eastward, about 45 m., and from thence in a N direction, about 60 m. further. It is separated from Spencer gulf by York peninsula on the W. At its mouth it is not more than 9 m. broad, but it afterwards widens to 40 m. See article **ADAM-LADE**.

VINCENT (POINT), a cape on the coast of New Albion, in the N. Pacific, in N lat. $33^{\circ} 44'$.

VINCENT D'ARDENTES (SAINT), a town of France, dep. of Indre, 7 m. E of Chateauroux. Pop. 1,800.

VINCENT-DE-CONOYAC (SAINT), a village of France, in the dep. of Dordogne, 7 m. SSE of Ribérac. Pop. 920.

VINCENT-DE-RHINE (SAINT), a commune and v. of France, in the dep. of Rhone, cant. and 4 m. WSW of Saint-Mexier. Pop. 2,516 in 1846.

VINCENT-DE-RIVEDOLT (SAINT), a commune and v. of France, in the dep. of Lot, 7 m. WNW of Cahors. Pop. 1,100.

VINCENT-DES-BARRES (SAINT), a village of France, in the dep. of Ardèche, cant. of Rochemaure, 7 m. SE of Privas. Pop. 500.

VINCENT-DES-LANDES (SAINT), a commune of France, in the dep. of the Loire-Inferieure, and cant. of Derval, 11 m. SW of Chateaubriant. Pop. 1,125.

VINCENT-DES-PRES (SAINT), a commune of France, in the dep. of the Sarthe, cant. and 6 m. SSE of Mamers. Pop. 1,236.

VINCENT-DE-TYROSSE (SAINT), a canton and commune of France, in the dep. of the Landes, and arrond. of Dax. The cant. comprises 12 com. Pop. in 1831, 10,105; in 1846, 10,723. The village is 14 m. WSW of Dax. Pop. 754.

VINCENT-DU-LOROUER (SAINT), a commune of France, in the dep. of the Sarthe, cant. and 4 m. S of Grand Luce, on the r. bank of the Veuve. Pop. 1,728.

VINCENT-SUR-GRAON (SAINT), a village of France, in the dep. of the Vendée and cant. of Moutiers-les-Maufaits. Pop. 4,100.

VINCENT-SUR-OUÏT (SAINT), a village of France, in the dep. of the Morbihan, cant. and 5 m. NE of Allaire. Pop. 1,000.

VINCENTON, a village of Burlington co., in the state of New Jersey, U. S., on the S branch of Rancocas river, at the junction of Stop-the-Jade creek, and 19 m. S of Trenton. Pop. in 1840, 200.

VINCENZO (SAN), a market-town of Naples, in the prov. of Terra-di-Lavoro and district of Piedimonte, cant. and to the W of Castellone. Pop. 800.

VINCHIATURO, a market-town of Naples, in the prov. of Sannio, district and 5 m. SSW of Campobasso, and cant. of Baranello, on a height. Pop. 3,100. It has two churches and a convent. In the environs are the abbey of Monteverde, and several mineral springs.

VINCHUTA, a village of Bolivia, in the prov. of Moxos, near the r. bank of the Paracti, an affluent of the Chapare, and 16 m. SSW of Chimore.

VINCI, a market-town of Tuscany, in the prov. and 15 m. W of Florence, and vicariat of Empoli, in the Val-di-Nievoli. Pop. 980. It is noted as the birth-place of Leonardo-di-Vinci.

VINCON, a river of France, in the dep. of the Haute-Vienne, which has its source 5 m. from Compreignac; runs first W, then NW; receives the Basine at Bellac, and, after a course of 22 m., joins the Gartempe on the l. bank, 3 m. W of Bellac.

VINCZ (FEL), or **OMER-VINCZ**, a town of Transylvania, capital of the stuhl and 4 m. S of Karlsburg, on the l. bank of the Maros. Pop. 3,500. Its industry is chiefly agricultural.

VINDAU, a river of Russia in Europe, which has its source in the NW part of the gov. of Vilna, to the SE of Telch, runs NW, and after traversing the W part of Courland, throws itself into the Baltic at Vindau, and after a course of about 180 m. It is joined at Niemen by a canal.—The town of V. is in the district and 36 m. NW of Goldingen, on the Baltic, on the l. bank of the embouchure of the river of the same name. Pop. 3,000. It has a fortress, and carries on an active trade in corn, timber, flax, hemp, and salted meat. This town is of considerable antiquity, and was formerly of importance.

VINDEFONTAINE, a commune of France, in the dep. of the Manche, and cant. of Lahaye-du-Puits, 36 m. N of Coutances. Pop. 1,050. It has numerous manufactories of pottery.

VINDEL, a town of Spain, in the prov. and 36 m. of Cuenca. Pop. 360.

VINDEL-ELV, a river of Sweden, in the prefecture of Western Bothnia, which has its source on the E side of the Doftines, runs SE and joins the Umea-Elf, 9 m. NW of the town of that name, and after a course of 240 m. It forms, in the upper part of its course, an extensive lake.

VINDEROD, a parish of Denmark, in the island of Seeland and bail. of Fredericksburg, on the N bank of Lake Arre, which is connected by a canal

with the gulf of Roskilde, and 80 m. NW of Copenhagen. It contains the village of Frederikswærk.

VINDHYA MOUNTAINS, a chain of mountains in Hindostan, extending from E to W, between the parallels of 22° and 24° N, from Benares to the gulf of Cambay. It separates the basin of the Ganges from that of the Nerbudda, parallel to the l. bank of which it runs in nearly its entire length. Its elevation is from 2,000 to 2,600 feet. Its highest points are the Chaizgur, alt. 800 metres, and the Ambawara, alt. 585 metres.

VINDICARI, a town and fort of Sicily, in the prov. of Syracuse, district and 9 m. S of Noto, on the Ionian sea. It has a small fort. In the vicinity is a group of islands of the same name.

VINDO, an island of the gulf of Bothnia, near the E coast of Sweden, in N lat. 59° 20', and E long. 38° 36'. It is comprised in the prefecture of Stockholm.

VINDUR, a river of Beluchistan, an affluent of Sonmeani bay. It forms, in rainy weather, an impetuous torrent, but in summer becomes dry.

VINEUF, a village of France, in the dep. of the Yonne, cant. and 7 m. W of Sergines. Pop. 1,120.

VINEUIL, a commune of France, in the dep. of the Loir-et-Cher, cant. and 2 m. E of Blois, near the r. bank of the Cosson. Pop. in 1846, 2,255.

VINEYARD-MILLS, a village of Huntingdon co., in the state of Pennsylvania, U. S., 65 m. W of Harrisburg.

VINGA. See **THERMIOPEL**.

VINGEANNE, a river of France, which has its source in the dep. of the Haute-Marne, flows thence into that of the Cote-d'Or, and after a course in a generally S direction of about 27 m., joins the Saône on the r. bank, 5 m. NE of St. Jean-de-Losne.

VINGER, a parish of Norway, in the diocese of Aggershuus and bail. of Hedemarten. Pop. 6,200.

VINGOADOMPY, a country of Upper Guinea, on the gold coast, in the empire of Ashantee, bounded on the S by the gulf of Guinea, and on the N by the kingdom of Assinie.

VINGORLA, a town of Hindostan, in the presidency of Bombay, prov. of Bejapur and district of Concan, 33 m. NNW of Goa, on the sea of Oman. It has a fort. Opposite are Burnt islands, a small rocky group surrounded by reefs.

VINHAES, a small town of Brazil, in the centre of the island of Maranhão, on a river of the same name. The houses are constructed of wood, thatched, and built with some regularity. Its inhabitants, who are chiefly Indians, manufacture mats and cordage.

VINHAES, a town of Portugal, in the prov. of Tras-os-Montes, comarca and 45 m. NW of Miranda. Pop. 525. It is enclosed by walls, with two gates, an old fort flanked with two towers, two parish-churches, a convent, and two hospitals, and carries on an active trade in wine and corn.

VINICZA, a market-town of Civil Croatia, in the comitat and 5 m. NW of Warasdin. It has a castle.

VINIEGRA-DE-ABAXO, a market-town of Spain, in the prov. and 39 m. from Soria, near the Najerilla. Pop. 855.

VINIEGRA-DE-ARRIBA, a market-town of Spain, in the prov. and 33 m. from Soria, in a cold and elevated situation. Pop. 508.

VINKOVCE, or **VINKOVIC**, a market-town of Austria, in Hungary, capital of the regimentary district of Brod, and 24 m. SSE of Essek, in a wild and picturesque situation on the Bossuth, in N lat. 45° 17' 38", and E long. 18° 51' 20". Pop. 2,288. It has a Greek and two catholic churches, and a German Normal school.

VINKOVITZY, a town of Russia in Europe, in the gov. of Podolia, district and 33 m. N of Onchitsa.

VINKRATH, a village of Prussia, in the regency of Dusseldorf and circle of Kempen. Pop. 560.

VINN, a village of Prussia, in the regency of Aachen, and circle of Heinsberg. Pop. 810.—Also a village in the regency of Dusseldorf and circle of Geldern. Pop. 246.

VINNEMER (SAINT), a village of France, in the dep. of the Yonne, cant. and 8 m. W of Cracy-le-Chatel, near the Armançon. Pop. 800.

VINNEN, a village of Hanover, in the principality of Osnabruck, and bail. of Ahremberg-Mep-pen. Pop. 350.

VINNESAS, a market-town of Spain, in the prov. and to the NW of Soria, on the Duero. Pop. 1,328. It has yarn and paper-mills.

VINNINGEN, a parish and village of Bavaria, in the Pfalz, and cant. of Pirmasens. Pop. 1,076. It has a paper-mill.

VINNITZA, a town of Russia in Europe, capital of a district in the gov. of Podolia, 84 m. NE of Kamenetz, on the r. bank of the Bug, in N lat. 49° 14' 16", and E long. 28° 27' 20". It is enclosed by a ditch, and has a castle, several Catholic churches, and, in the old Jesuits' college, a gymnasium. Pop. 2,000, of whom a large proportion are Jews.

VINNEUF, a commune of France, in the dep. of the Yonne, and cant. of Sergines, 18 m. N of Sens. Pop. 1,401. It has manufactures of hardware, and of cordage, and lime-kilns, and a considerable trade in cattle and in hemp.

VINNOVO, a village of Sardinia, in Piedmont, in the prov. of Turin. Pop. 3,007.

VINNUM, a village of Prussia, in the regency of Munster, and circle of Lidinghausen. Pop. 500.

VINSEBECK, a village of Prussia, in the regency of Minden, and circle of Horte. Pop. 660.

VINSOBRES, a commune of France, in the dep. of Drome, cant. and 5 m. SW of Nions, in a fertile locality. Pop. 1,576. It has a silk spinning-mill, and a considerable trade in olive-oil.

VINTAM, a town of Senegambia, in the kingdom of Fria, on a river of the same name, which a little below throws itself into the Gambia, near the mouth of that river, and nearly opposite fort James.

VIN-TAM-PHU, a trading town of Lower Cambodia, on the Pong-som river.

VINTIMIGLIA, or **VENTIMIGLIA**, a town of Sardinia, capital of a mandemento, in the div. and 20 m. ESE of Nice, and prov. of St. Remo, at the confluence of the Roya with the Mediterranean. Pop. 5,000. It has the remains of a fortress. The environs are noted for their oil, wine, and fruit.

VINTON, a county in the SE part of the state of Ohio, U. S., comprising an area of 416 sq. m. drained by Racoon creek and its affluents, and by branches of Scioto river, and intersected by the Scioto and Hooking valley, and by the Cincinnati and Marietta railways. It is hilly, but generally fertile, and has some coal. Pop. in 1850, 9,353.—Also a village of Benton co., in the state of Iowa, on a branch of Cedar creek.—Also a village of Gallia co., in the state of Ohio, on the W side of Racoon river, and 75 m. SE by E of Columbus.

VINUDAU, a mountain of British Guayana, in S lat. 1° 50'. W long. 0° 14', near the sources of the Takutu.

VINUELAS, a town of Spain, in the prov. and 15 m. NW of Guadaluara, in a fertile plateau. Pop. 340. It has manufactories of linen.

VINUESA, a town of Spain, in the prov. and 21 m. NW of Soria, on the l. bank of the Duero. Pop. 1,316.

VINXEL, a village of Prussia, in the regency of Cologne and circle of Sieg. Pop. 270.

VINZAGLIO, a market-town of Sardinia, in the div. of Novara, and prov. of Lomellina, 5 m. E of Vercelli, near the Sesia. Pop. 1,123.

VINZELBERG, a village of Prussia, in the reg. of Magdeburg, and circle of Gardelegen. Pop. 240.

VINZELLES, a village of France, dep. of the Puy-de-Dôme, cant. and 8 m. N of Lezoux. Pop. 560.

VINZENSENBRONN, a village of Bavaria, in the circle of Middle Franconia, and presidial of Radeisburg. Pop. 210.

VINZIER, a village of Denmark, in Holstein. Pop. 300.

VIOL, a parish of Denmark, in the duchy of Helsing, to the N of Husum. Pop. 1,400.

VIOLET, a township of Fairfield co., in the state of Ohio, U. S. Pop. in 1840, 2,378.

VIOLE, a commune of France, in the dep. of the Loire, cant. and 7 m. E of Neronde, 27 m. from Roanne. Pop. in 1841, 1,585.

VIOMENIL, a village of France, in the dep. of the Vosges, cant. and 8 m. NW of Bains, near the source of the Saône. Pop. 598.

VION, a village of France, in the dep. of the Ardèche, cant. and 5 m. NNW of Tournon, near the r. bank of the Rhone. Pop. 650.

VIONNAZ, a village of Switzerland, in the cant. of Valais, and bail. of Monthey. Pop. 776.

VIQUE. See **VICH**.

VIQUE. See **CRAB ISLAND**.

VIRA, a hamlet of Sweden, in the prefecture and 30 m. NE of Stockholm. There is here a government manufactory of fire-arms.

VIRANDEVILLE, a village of France, in the dep. of La-Manche, cant. and 6 m. SW of Octeville. Pop. 600.

VIRANTSHEPURA, a town of Hindostan, in the Carnatic, on the r. bank of the Palaar, 30 m. W of Arcot.

VIRAZEIL, a commune and v. of France, in the dep. of Lot-et-Garonne, cant. and 3 m. E of Marmande. Pop. 1,200.

VIRE, a river of France, which rises in the SW of the dep. of Calvados, and flows NNW, past Saint-Lô, to the English channel, into which it flows, near Isigny, after a course of 70 m. It is navigable to Coquet. Its principal affluent is the Aure.

VIRE, a town of France, dep. of Calvados, situated near the river Vire, 23 m. SE of Saint-Lô. Pop. in 1789, 6,786; in 1821, 8,453; in 1846, 7,658. It has extensive manufactories of woollens, chiefly of the coarser qualities, paper-mills, and cotton-yarn spinning-mills. In time of war, it supplies to government a large proportion of the army-clothing. —The arrond. of V., comprising 6 cant., has an area of 95,637 hectares. Pop. in 1846, 84,048.

VIREY, a commune and v. of France, in the dep. of Manche, cant. of Saint-Hilaire-du-Harcouet. Pop. 1,500.

VIRGIL, a township of Courtland co., U. S., 135 m. W of Albany. Pop. 2,410. —Also a township of Fulton co., in Illinois, 64 m. NW of Springfield.

VIRGIN, a river of Utah territory, U. S., which rises in the Wahatch mountains, and flows S to the Rio-Colorado.

VIRGIN (CAPE), a steep white cliff not unlike the North Foreland, which forms the N point of the entrance of the strait of Magalhães, in S lat. 52° 24'.

VIRGIN-GORDA, one of the Virgin islands, in the West Indies, in N lat. 18° 30'. It is of irregular figure, 8 m. in length from NE to SW. It lies 1½ nautical m. S of Anegada, and forms the easternmost islet of the main group. Primitive rocks predominate in its geological formation.

VIRGIN ISLANDS, a cluster of islands in the West Indies, situated to the E of Porto-Rico, between the parallels of 18° 5' and 18° 50' N. They are upwards of 90 in number, but for the most part desert and barren. The group extends 90 m. in length, and upwards of 30 m. in breadth. The English and Danes divide most of them; but the Spaniards claim those near Porto-Rico. The island of Virgin-Gorda, on which depend Anegada, Nicker, Prickley Pear, and Mosquito islands, Cammanoes, Dog-islands, the Fallen City, with the Round Rock, Ginger, Cooper's, Salt island, Peter's island, and Dead-Chest, belong to the English; they possess also Tortola, on which depend Jost, Van-Dyke's, Little Van-Dyke's, Guano, Beef, and Thatch islands. To the Danes belong St. Thomas's island, on which Brass, Little Saba, Buck island, Great and Little St. James, and Bird island, are dependent; with St. John, to which belong Lavango, Cam, and Witoh islands; they have also Santa or St. Croix. —The first possessors of such of these islands as now belong to the British government were a party of Dutch Buccaneers, who settled at Tortola about the year 1648, and built a fort for their protection. In 1666, they were driven out by a stronger party of the same class of adventurers, who, calling themselves English, pretended to take possession for the crown of England; and the English monarch, if he did not commission the enterprise, made no scruple to claim the benefit of it, for Tortola and its dependencies were soon afterwards annexed to the Leeward island government, in a commission granted by Charles II. to Sir William Stapleton. The Dutch had made but little progress in cultivating the country when they were expelled from Tortola; and the chief merit of its subsequent improvements was reserved for some British settlers from the little island of Anguilla, who, about the year 1694, embarked with their families, and settled in the V. islands. In 1756, the inhabitants, whose number amounted to 1,268 whites, and 6,121 blacks, wished to be put on the same footing as the other islands, by the establishment of a civil government and courts of justice; but in this expectation they were not gratified until the year 1778. The chief and almost the only productions of these islands are sugar and cotton. The cultivated acres of the English islands, in 1812, amounted to 12,000. The pop. at the same date was 300 whites, 400 free persons of colour, and 10,000 slaves. In 1825 the slave pop. was returned at 5,436; and in 1844 the total pop. at only 6,689.

VIRGIN-ROCKS, a cluster of rocks in the Atlantic, 60 m. SE of Cape Race, off the coast of Newfoundland, in N lat. 46° 20', W long. 50° 0'.

VIRGINAL-SAMME, a commune and v. of Belgium, in the prov. of Brabant, on the Samme, 16 m. S of Brussels. Pop. 1,200.

VIRGINIA, one of the United States of North America, situated between the parallels of 36° 30' and 39° 48' N, and between 75° 40' and 83° 33' W long. It is bounded on the N by Pennsylvania and Maryland; on the E by Maryland and Delaware bay; on the S by N. Carolina and Tennessee; and on the W by Kentucky and Ohio. Its length, from the Atlantic on the E, to the Cumberland mountains on the W, is 410 m. Its greatest breadth, from N to S, is 290 m.; its area is 64,000 sq. m., according to one computation; or 61,852 sq. m. according to another.

Physical features. The Blue ridge mountains divide V. from E to W; but the State-constitution recognises four physical districts, viz.: the Tidewater, or district below the lower falls of the larger rivers; the Piedmont, or district between these falls

and the Blue ridge; the Valley, or district between the Blue ridge mountains and the Alleghany; and the Trans-Alleghany, comprising all the country W of the mountain-ranges. The first of these districts, extending 100 m. inland, from the coast to the termination of tide at Fredericksburg, Richmond, &c., is low and flat, sometimes fenny, sometimes sandy, and on the margin of the rivers is composed of a rich loam covered with a luxuriant and even rank vegetation. This part is very unhealthy in the months of August, September, and October. The next division extends from the head of tide-water to the Blue ridge, 150 m. The surface of this division near tide-water is level; higher up the rivers it becomes swelling; near the mountains it is often abrupt and broken. The soil is here divided into sections of unequal quality, running parallel to each other, and extending throughout the state. The pop. of this section, especially near the mountains, is more robust and healthy than that of any other part of the state. The scenery of the upper part of this division is highly picturesque and romantic. The third division, or valley between the Blue ridge and North and Alleghany mountains, extends, with little interruption, from the Potomac, across the state, to N. Carolina and Tennessee. Its soil is a mould formed on a bed of limestone. The surface of the valley is sometimes broken by sharp and solitary mountains, the sides of which are nearly bare, or thinly covered with blasted pines. The bed of the valley is fertile, producing good crops of Indian corn, wheat, rye, oats, buckwheat, hemp, flax, and clover. This valley has inexhaustible mines of excellent iron ore. The fourth division, extending from the Alleghany mountains to the river Ohio, is wild and broken, in some parts fertile, but generally barren, but having mines of iron, lead, coal, and salt. The Blue ridge, although pierced by the Potomac, the James, and the Staunton rivers, constitutes a continuous chain of 250 m. in length, rising in the peaks of Otter to an alt. of 4,260 ft. The Kittatiny, or Blue mountain, forms the centre of the great table-land of V. To the W of this lie several detached masses; and still further W is the Alleghany chain, of which Powell's mountain [alt. 4,500 ft.] is an outlier or spur. To the W of the Alleghany, the surface slopes to the Ohio.

Rivers.] The principal rivers of this state are the Potomac, which after a course of 350 m. reaches the Chesapeake; the Shenandoah, a principal tributary of the Potomac; the Rappahannock, which reaches its tidal point at Fredericksburg; the James river, which is the principal river wholly belonging to this state, and is navigable to Richmond, 100 m. from its mouth, by vessels of 140 tons; the Nottoway and the Meherrin, which unite to form the Chowan; the great rivers of Western V. flowing to the Ohio are the Monongahela, the Kanawha, the Greenbrier, the Covington, and the Guyandotte. —The bay of Chesapeake extends inland 200 m., to its termination in Maryland. Between the capes, its width is 12 m.; a little above, it increases to 30 m.; and gradually diminishes to 5 m., at its northern extremity.

Climate.] The states of V. and Maryland lie between those parallels which include the finest climate in the old continent, viz.: Morocco, Fez, Syria, Asia Minor, Greece, Sicily, Naples, and the southern provinces of Spain. Jefferson, in his 'Notes on Virginia,' observes, that, proceeding on the same parallel of lat. westwardly, the climate becomes colder, till you reach the summit of the Alleghany ridge. Thence descending to the Mississippi, the temperature again increases, and to such an extent, that the climate is several degrees warmer than in the same lat. on the shores of the Atlantic. The total range of the therm. is from 6° below zero to 98°. Of late years, snow does not lie below the mountains more than a few days; the rivers seldom freeze, and the heat of summer is also more moderate. The temp. is much influenced by the winds; those from

the N and NW bringing cold and clear weather; those from the SE haziness, moisture, and warmth. The pleasantest months are May and June; July and August are intensely hot; September and October are generally rainy.

Productions.] The principal forest-trees in the state of V. are the wild or sweet-scented crab, ash, aspen, beech, black and white birch, catalpa, cherry, chestnut, horse chestnut, cucumber-tree, cypress, dogwood, elder, elm, fir-hemlock, spruce, fringe or snow-drop tree, sweet gum, hawthorn, hickory, Indus red-bud; juniper or Virginia cedar, laurel-swamp, linden or American lime, the locust, the sugar and red-flowering maple, red mulberry, black chestnut, red and white oak, *pacan* or Illinois nut, *persimon*, the black spruce, white and yellow pine, plane-tree, poplar, sassafras, spindle tree, and black and white walnut. The forests have little underwood; and it is easy to travel through them on foot or on horseback, except on the lowlands, in the eastern parts, which are covered with cedars, pines, and cypresses. A few wild animals are still found in the western parts, namely, the wolf, the bear, the deer, the racoon, the squirrel, and the opossum. At the approach of winter, the bear descends from the mountains in search of the fruit of the persimon tree, when it is pursued and taken by dogs. On the E side of the mountains, animals have become rare, and peltries are no longer an article of exportation.—Among the bird kind is the wild turkey, which is yet found on the branches of the Kanawha, and other streams, where they weigh, when full grown, from 12 to 80 lbs. Partridges are numerous. The shell-drake, or canvas back duck, is found on James river. The *sova*, or American ortolan, appears with the first white frost, early in September, and disappears with the first black or hard frost,—an interval which varies from one to nine weeks. The turkey-buzzard, so called from its red gills resembling those of a turkey, is nearly of the size of the eagle. The Virginia nightingale, or mocking-bird, derives its name from its extraordinary imitation of all other songsters. The red bird and the humming-bird are admired for their beautiful plumage.—The rivers contain sturgeon, cat-fish, herring, perch, drum, carp, bass, oysters, cod, sun-fish, and crabs, the sea-dog, gar, ray-fish, sword-fish, and frog-fish. Some of the largest sturgeon weigh from 100 to 200 lbs. The shell-fish are oysters, lobsters, crabs, land-turtle, sea-turtle, loggerhead, and terrepin.

Soil and agriculture.] The soil of V. though often highly fertile, has been exhausted in some of the older settlements by an injudicious system of tillage. The E and Piedmont sections are chiefly engaged in the production of Indian corn and tobacco. The produce of Indian corn is from 12 to 50 bushels an acre, according to the nature of the soil. Of wheat, which is much cultivated, the greatest produce is about 50 b. an acre; but the average crop does not exceed 15 b., owing to the previous exhaustion of the soil by tobacco and Indian corn. White buckwheat, or French wheat, is raised in considerable quantities; and rice on the borders of the Dismal swamp, where it is very productive. Hemp is cultivated to a considerable extent, and has become a great article of export to the northern states: on the borders of rivers, and between the ridges of mountains, it is raised of such a quality as to bring from 150 to 300 dollars a ton. Almost every planter cultivates cotton for his own use; and along the Roanoke it is found to be more profitable than any other crop. From 5,000 to 10,000 bags, averaging each 300 lbs., are yearly brought to market, chiefly at Petersburg, and fetch as good a price as any short staple cotton. The culture of indigo is

now abandoned. *Palma-Christi* is cultivated for the oil which it affords; and *benne*, from the seed of which, a fine oil is extracted in the proportion of 3 gallons to a bushel. The grasses are the white and red clover, which grow luxuriantly; the former natural to the country. Hay and oats are given for fodder; but not many years ago, leaves of Indian corn were chiefly used for this purpose. The following were the returns of the grain crops raised in the state in the years 1840 and 1850:

	1840.	1850.
Wheat, . . .	10,104,716 bush.	11,232,616 bush.
Indian corn, . . .	74,877,591	35,254,319
Oats, . . .	13,451,062	10,179,045
Rye, . . .	1,432,799	458,980
Barley, . . .	87,430	25,437
Buckwheat, . . .	243,872	214,898
Rice, . . .	2,586 lbs.	17,154 lbs.

Of miscellaneous crops, the returns in 1840 and 1850 were as follows:—

	1840.	1850.
Tobacco, . . .	75,347,106 lbs.	56,803,218 lbs.
Cotton, . . .	3,494,483	1,678,800
Hay, . . .	364,708 tons.	269,048 tons.
Hemp, . . .	10,597 lbs.	11,506 lbs.
Silk cocoons, . . .	3,191	517
Maple-sugar, . . .	1,541,833	1,277,665
Wine, . . .	18,911 galls.	6,498 galls.

The wool raised in 1850 was 2,860,765 lbs.; but-ter, 11,089,359 lbs.; cheese, 436,298 lbs.; value of slaughtered animals, 7,503,006 dols. The wool crop of 1840 was 2,538,374 lbs. The average crop per fleece in 1840 was 81.4 oz.; in 1850, 84.9 oz.

Minerals.] V. presents an immense field of mineral wealth. Iron-ore is in great abundance on the banks of James river. Brown scaly iron ore, or the brown oxide of iron, occurs on the Shenandoah. Plumbago, or carburet-of-iron, is in great abundance between the Blue ridge and the extremity of tide-water. Copper, in a native state, has been found in Orange co.; and the ore of this metal on both sides of James river, in Amherst co. Gold ore is found on both the North and Rapid-Ann rivers, the North and the South Anna, the Rivanna, and James river. Sulphuret-of-antimony is said to exist near Richmond. Manganese is found in Albemarle co., and also in Shenandoah, on the North mountain. Lead ore abounds on the banks of the Kanawha, and opposite the mouth of Cripple creek. Limestone is procured everywhere W of the Blue ridge. Talc, or soapstone, which is used for chimneys and tobacco pipes, is found; ochre occurs in different places, and when calcined, forms a valuable red paint. Coal is found in great abundance above Richmond, and on the Appomatox-branch of James river, where it extends in veins of 20 m. in length, and 10 m. in breadth, on an elevation of nearly 200 ft. above the level of the river. The coal of the Richmond basin is extensively wrought; that of the Wheeling basin, on the Ohio, is highly bituminous, and upwards of 16 ft. thick. A very rich coal bed occurs in the Great Kanawha. Saltpetre is found in considerable quantity. The salines of V. are almost wholly in the W part of the state, and important salt-works are situated on the Great and the Little Kanawha rivers. There are many mineral springs in V. The hot and warm springs of Bath co., the sweet springs of Monroe co., the sulphur-springs of Greenbrier and of Montgomery cos., and the baths of Berkeley co. are much frequented.

Manufactures.] In 1850, the state of V. contained 27 cotton-factories, 121 woollen factories, 122 iron manufactories, and 341 tanneries. Maple sugar is generally made, and distilleries and breweries are numerous. Ship-building is carried on to a considerable extent. There are rope-walks at Norfolk, Petersburg, Richmond, Alexandria, Fre-

dericksburg, and Lynchburg. Sugars are boiled, baked, and refined, at Norfolk and Alexandria. The total amount of manufactures in 1810, was estimated at 12,263,473 d., besides those of a doubtful kind, amounting to 5,715,252 d., and consisting of flour, meal, maple, sugar, and saltpetre. The total capital invested in manufactures in 1840 was 11,360,861 d. The amount of cotton sheeting produced in 1850 was 15,640,107 yards; of cotton-yarns, 1,755,915 lbs. The amount of woollen cloth produced in 1850 was 2,037,025 yards; and of woollen yarn, 898,705 lbs. The capital invested in these manufactures in 1850 was 1,776,171 d.; the value of all the raw material used, 1,046,769 d.; the produce, 22,163 tons of pig iron, 5,577 of wrought iron, and 15,928 of cast iron; and the total value of the year's produce 2,451,835 d.

Commerce and Exports.] In respect of foreign commerce, V. ranks seventh or eighth among the states of the union. The chief exports are tobacco, wheat, Indian corn, lumber, tar, pitch, turpentine, beef, and pork. From the south are sent to Europe tobacco, wheat, flour, Indian corn, cotton, pease, white oak, staves, tar, pitch, turpentine, pork, bacon, ginseng, rattle and black snake root, indigo, oak bark, charcoal, lamp-black, panther, wolf, and squirrel skins. From the northern parts, hemp, saltpetre, gunpowder, lead, coals, cypress, and pine shingles, to the N of Europe and West India islands. The following is the amount of the value of the exports and imports for different years:—

	Exports.	Imports.
1791, . . .	3,131,865 d.	...
1799, . . .	6,292,986	...
1802, . . .	3,978,363	...
1811, . . .	4,822,307	...
1816, . . .	8,212,860	...
1820, . . .	4,557,957	...
1824, . . .	3,277,564	639,787 d.
1830, . . .	4,791,644	405,739
1835, . . .	6,064,063	691,255
1840, . . .	4,778,220	545,665
1845, . . .	2,104,581	267,658
1850, . . .	3,415,646	426,699

The shipping employed in the foreign commerce which entered in 1850 was 157 vessels = 80,965 tons, of which 88 = 18,775 tons were foreign vessels. The shipping cleared in 1850 amounted to 74,971 tons.

Railroads and canals.] The railroads and canals of this state have their central points at Alexandria, Richmond, and Norfolk, on the Atlantic, whence they extend westwards towards Ohio, Kentucky, and Tennessee. In the NW several lines connect the railway-systems of Pennsylvania and Maryland with those of Ohio and the West. In the SE, the Roanoke railroad furnishes an important route into N. Carolina. The great northern lines of railroad pass through Fredericksburg, Richmond, and Petersburg, and are continued to Wilmington and Columbia.—The canals are the James river and Kanawha canal, the Dismal Swamp canal, and the Alexandria canal, in continuation of the Baltimore and Ohio canal from Georgetown to Alexandria. The Dismal Swamp canal, 28 m. in length, connects Chesapeake bay with Albemarle sound.

Towns, &c.] V. is divided into 137 counties. Richmond is the metropolis of the state. The other most considerable towns are Norfolk, Petersburg, Lynchburg, Fredericksburg, Winchester, Portsmouth, Williamsburg, Staunton and Wheeling. There are 10 colleges, and 8 professional schools in this state. William and Mary college, at Williamsburg, founded in 1692, is the oldest college; but that of Central college, at Charlottesville, or the university of Virginia, as it is now called, is the principal institute. There were 3,904 schools in

different parts of the state in 1850-1. The Methodists had, in 1850, 1,002 churches with 315,763 members; Baptists, 639 congregations with 241,689 members; the Episcopalians, 167 churches with 79,884 members; the Presbyterians, 296 churches with 101,625 members.

Government, &c.] The present constitution was ratified in 1851. It gives the right of voting to every white male citizen 21 years old, and resident in the state 2 years. The legislature is composed of a senate and house-of-delegates. The house-of-delegates consists of 152 members, chosen annually by districts, one-fourth being chosen every year. The senate consists of 50 members, one-half of whom are chosen biennially, two from each county, and one from several cities and boroughs. The governor is chosen annually, and holds office 4 years. There is also a lieutenant-governor, a secretary, a treasurer, and an auditor. At present V. elects 13 representatives to congress.—The judiciary is vested in a supreme court of appeal, district courts, and circuit courts.—The militia force in 1851 was returned at 125,128 men. All whites between 18 and 45 are subject to military duty.—The aggregate debt on 1st April 1851 was 11,248,962 dollars, exclusive of guaranteed bonds to the extent of 3,947,894 d.

Population.] The following table shows the decennial progress of the pop. as ascertained by census:

	Pop.	Slaves.	Increase.
1790,	748,308	including 298,427	
1800,	880,200	345,796	17½ per cent.
1810,	974,622	392,518	10 7
1820,	1,065,379	425,158	9 3
1830,	1,211,405	469,757	13 7
1840,	1,398,797	448,987	2 3
1850,	1,421,661	472,528	14 6

The number of foreign births in the pop. of 1850 was 22,394, of whom 2,998 were Englishmen, 11,643 Irish, 947 Scotch, 5,511 German, 321 French. The whole number of dwellings in 1850 was 165,815; of families, 167,530. The number of paupers in 1850 was 5,118, of whom 4,933 were natives of the state. The expense of their relief during the year was 151,722 d.

History.] The English attribute the discovery of this part of the American continent to John Cabot; the French to Verrazam, who took possession of it in the name of Francis I.; but the first settlements were made in 1607, by a company of English merchants, under the auspices of Sir Walter Raleigh, who, in 1604, had obtained a grant from Queen Elizabeth, for all remote barbarous and heathen lands he should discover and settle. In 1606, a company of adventurers, London merchants, having obtained a patent from James I. sent two vessels under the command of Captain Newport, with a number of men, who laid the foundation of James town on the peninsula which advances into the river of the same name. In 1609, two little colonies, of 120 persons each, proceeding from James town, established themselves, the one at Nansemond, the other at Powhatan, an Indian town, which had been purchased from the king of the country, whose name it bore. The Indians, being afterwards disturbed in their possessions, waged an active war against the new colonists, who, reduced by famine from 500 to 60 persons, were on the point of departing for Newfoundland, when the arrival of Lord Delaware, with 3 vessels, containing provisions and stores, induced them to remain. In 1611, Lord Delaware returned to Europe, leaving about 300 men, and was replaced, as governor, by Sir Thomas Dale, who brought with him 3 vessels containing provisions and new settlers. In 1619, the company of Virginia sent thither a fleet laden with cattle, provisions, and about 1,300 men. Under the governorship of George Hardy, the culture of tobacco was encouraged, and a council and general assembly were instituted. Some years afterwards, the concession made by the company at London was revoked, and the province was placed under the immediate government of the Crown. The track 8 of 36° 30' was separated from V. in 1630, and called Carolina; Maryland was taken from V. two years afterwards. In 1681, the laws of England were adopted as the provincial laws of V. The colonists suffered great injury in 1673, from a Dutch squadron which ravaged the coast, and also from insurrections, which broke out in 1675 and 1676. In 1764, Washington surprised and took Fort-du-Queens; but was afterwards obliged to yield to superior forces. V. showed great opposition to the arbitrary measures of the British government, in 1765 and 1769. In 1781, and again

in 1812, it became the theatre of war. V. has given no fewer than 7 presidents to the union.

VIRGINIA, a village in co. Cavan, 9 m. NW of Kells. Pop. in 1841, 965.

VIRGINIA, a village of Cass co., in the state of Illinois, U. S., 32 m. WNW of Springfield. Pop. in 1850, about 800.

VIRGINSTOW, a parish and hamlet of Devonshire, 6 m. NNE of Launceston. Area of p., 1,274 acres. Pop. in 1831, 136; in 1851, 173.

VIRIEU, a canton, commune, and town of France, in the dep. of the Isere, and arrond. of Tour-du-Pin. The cant. comprises 13 com. Pop. in 1831, 11,105; in 1846, 11,014. The town is 6 m. SSE of La-Tour-du-Pin, on the Bourbre. Pop. 1,825.

VIRIEUX-LE-GRAND, a canton, commune, and town of France, in the dep. of the Ain, and arrond. of Belley. The cant. comprises 13 com. Pop. in 1831, 7,748; in 1846, 7,953. The town is 8 m. NNW of Belley. Pop. 775. The locality affords good wine.

VIRIEUX-LE-PETIT, a village of France, in the dep. of the Ain, and cant. of Champagne, near the Seran and Arvrière. Pop. 618. In the vicinity is the fine cascade of Cerveysien.

VIRIVILLE, a commune of France, in the dep. of the Isere, cant. and 5 m. NNW of Roybon, on the Perouse. Pop. in 1846, 2,092.

VIRLE, a village of Austrian Lombardy, in the prov. and district and 8 m. E of Brescia. Pop. 918. In the adjacent mountain of Rizzato are quarries of freestone and marble.

VIRNAUGH, a village of Hindostan, in the prov. and 37 m. SE of Cashmere, in N lat. 34°, E long. 74° 13'.

VIRNEBURG, a market-town of Prussia, in the reg. and 24 m. W of Coblenz, and circle of Adenau, on the Eifel. Pop. 800. It has a stone-quarry.

VIRNHEIM, a town of Hesse-Darmstadt, in the prov. of Starkenburg, and bail. of Bensheim, 8 m. NE of Mannheim. Pop. 2,483.

VIROFLAY, a commune of France, in the dep. of the Seine-et-Oise, cant. and 3 m. E of Versailles. Pop. 1,025. It is surrounded by hills covered with coppice and wood, and numerous villas are scattered over it.

VIRTON, a department, commune, and town of Belgium, in the prov. of Luxemburg, and arrond. of Arlon. Pop. of dep. 1,701. The town is 13 m. SW of Arlon, on the Ton. It has several breweries, a cotton spinning-mill and potteries, and carries on an active trade in wood and iron.

VIRTY, or **VIRTZEV**, a lake of Russia in Europe, in the gov. of Livonia, between Derpt and Fellin. It is 30 m. in length from N to S, and 9 m. in extreme breadth, and is formed by the Embach, which issues from its NE extremity, and falls into Lake Peipus. On the NW it discharges itself by the Fellin into the Navaat, the latter of which streams flows into the gulf of Livonia.

VIRUA, a river of Brasil, in the N part of Ganyana, near the Serra-Pacarima.

VIRY, a village of France, in the dep. of the Saône-et-Loire, cant. and 5 m. NE of Charolles. Pop. 800.—Also a village of Sardinia, in the div. of Savoy and prov. of Carouge, mand. and 3 m. SW of St. Julien. Pop. 1,100.

VIRY-CHATILLON, a commune of France, in the dep. of the Seine-et-Oise, cant. and 5 m. ESE of Longjumeau, pleasantly situated on the slope of a hill. Pop. 404. It contains a fine castle, and many handsome villas. It has manufactories of white arms, and lime and gypsum-kilns, and is noted for its cream cheese. It possesses also considerable trade in coal and mill-stones.

VIRY-NOUREUIL, a commune of France, in the

dep. of the Aisne and cant. of Chauny, 27 m. W of Laon. Pop. 1,448.

VIRZON, an imperial chateau of Russia in Europe, in the gov. of Courland, and district of Mitau, on a river of the same name.

VISA. See VIZA.

VIS-ARNA. See SALENBURG.

VISAN, a commune of France, in the dep. of Vaucluse, cant. and 6 m. SSW of Valreas. Pop. in 1846, 2,280.

VISBECK, a parish and village of the duchy of Oldenburg, in the circle and bail. and 8 m. NE of Vechta. Pop. 2,400.—Also a village of Prussia, in the regency and circle of Arnberg. Pop. 200.

VISCARDO (CAPE), a headland of the island of Cephalonia, one of the Ionian islands, at the N extremity of the island, opposite Cape Ducato, the SW extremity of Santa Maura, and to the NW of the channel of the same name, in N lat. 38° 27' 10", and E long. 20° 33' 10".

VISCARDO, or CEPHALONIA (CHANNEL OF), a channel of the Ionian islands, between Cephalonia and Theaki. It is 15 m. in length from N to S, and 3 m. in medium breadth.

VISCARI. See BISCARI.

VISCH. See FISH RIVER.

VISCHBECK, a village of Hanover, in the principality of Osnabruck. Pop. 500.—Also a village of Hesse, in the prov. of Lower Hesse. Pop. 700.

VISCHNAVETZ, a village of Austria, in Styria, in the circle of Cilly. Pop. 240.

VISCHNEL. See VOLOTSCHOK.

VISCIANO, a market-town of Naples, in the prov. of the Terra-di-Lavoro, district and 5 m. E of Nola, on a mountain. Pop. 1,415. It has four churches, two convents, and a marble-quarry.

VISCOE, a village of France, in the dep. of the Hautes-Pyrenees, cant. and 2 m. NW of Luz, near the Gave-de-Barreges. Pop. 114. In the adjacent mountains are quarries of marble and a lead-mine.

VISE, or WISER, a department, commune, and town of Belgium, in the prov. and arrond. of Liege, watered by the Maese. Pop. of dep. 2,051. The town is 9 m. NE of Liege, on the r. bank of the Maese. Pop. 1,333. It has a fine town-house, and manufactories of beet-root sugar, tiles and hosiery, and several breweries.

VISERNY, a village of France, in the dep. of the Cote-d'Or, cant. and 6 m. SW of Montbard.

VISEU, or VIZU, a town of Portugal, capital of a comarca, in the prov. of Beira, 51 m. NE of Coimbra, and 168 m. NNE of Lisbon, in an elevated but fertile locality, covered with vines, olive plantations, and fruit-trees. Pop. 10,000. It is tolerably well-built, and is the residence of the governor of the prov. The cathedral, situated in the highest part of the town, is surmounted by two towers of Roman structure, one of which serves as a belfry. It contains also two parish-churches, two convents, two hospitals, and a college. The squares and promenades are spacious and handsome. The trade consists chiefly in cattle, and in articles of local manufacture. Pop. of comarca, 150,000.

VISEU, or VIZU, a village of Brazil, in the prov. of Para, and comarca of Bragança, near the shore of the Atlantic, and to the E of the embouchure of the Tocantins. It is inhabited by Indians, who employ themselves in fishing, and in the culture of the soil.—Also a village in the prov. of Mato-Grosso, on the l. bank of the Rio-Corumbiara, an affluent of the Guapore. It is inhabited by Indians of the Gurajau tribe.

VISGE, a river of France, which rises near Lavillate, in the dep. of Orense, and joins the Taurion, near St. Martin, after a course of 20 m.

VISINADA, a village of Illyria, in the gov. and 30 m. S of Trieste.

VISINGEN, a parish and v. of Sweden, in the laen and 18 m. NNE of Jönköping, occupying the island of Visingsö in Lake Wetter.

VISK, a town of Hungary, in the com. of Marmaros, 9 m. SE of Honth, on the Theiss. Pop. 2,000. It has a trade in cattle and flax.

VISNIO, a town of Hungary, in the com. of Borsod, 7 m. NE of Apatfalva.

VISO-DEL-ALUR, a town of Spain, in the prov. and 15 m. E of Seville. Pop. 4,400.

VISO-DE-LOS-PEDROCHES, a town of Spain, in the prov. and 86 m. NNW of Cordova. Pop. 2,600.

VISO (EL), a neatly-built town of Spain, in the prov. and 40 m. N of Cordova. Pop. 2,700.

VISO (MONT), a lofty mountain of the Cottian Alps, between Piedmont and France, in N lat. 44° 39' 44", E long. 7° 5' 11". It has an alt. of 1,945 toises = 4,150 yds. above sea-level.

VISONE, a town of the Sardinian states, situated at the confluence of the Carmagna and the Bormida, 8 m. E of Acqui. Pop. 500.

VISP, or VISPACH, a town of Switzerland, in the Valais, on the Visp or Visbach, 25 m. E of Sion.

VISTAVILLE-DEL-MAESTRAZGO, a town of Spain, in the prov. and 27 m. NW of Castellon-de-la-Plana. Pop. 1,300.

VISTRITZA, a river of European Turkey, the *Astrous* of the ancients, which issues from Lake Ostrovo in Romelia, and falls into the Vardar, a little above the influx of the latter stream into the gulf of Salonika, after an ESE course of 50 m.

VISTULA, or WEICHEL, the great river of Poland, which rises in Austrian Silesia, at the foot of the Carpathians, in the outlying spur of the Schafberg, at an alt. of about 2,000 ft. above sea-level; and flowing eastward, enters Poland on the S frontier; passes Cracow; and after bathing the walls of Sandomir, receives, in the San, a great addition to its waters. Turning NNW, it traverses a considerable tract of country to Warsaw, at some distance from which it receives the Bug, a river almost equal to itself in magnitude, and bringing with it the waters of the SE and the N of Poland. The V., now become one of the great rivers of Europe, continues to hold a N course inclining to W; enters Prussia; passes the towns of Thorn and Culm; and after flowing with a wide channel and undiminished volume, 10 m. below Marienwerder, divides into two branches, of which one, called the Nogat, and another the Old Vistula, flow NE to the Frischehaff, while the largest stream preserves the name of V., and turning W, falls into the Baltic at Dantzic, after a course of 680 m. The V. flowing generally through a level country, is navigable as far up as Cracow. It is the great channel for the conveyance of corn and other products from the interior of Poland. It is connected by canal with the Netze, an affluent of the Oder. See articles DANTZIC, POLAND, and PRUSSIA.

VIT (SAINT), a village of France, in the dep. of Doubs, cant. and 4 m. WNW of Bouasiers. Pop. 780.

VITA, a town of Sicily, to the SW of Palermo. Pop. 2,800.

VITAGLIANO (SAN), a village of Naples, in the prov. of Terra-di-Lavoro, 3 m. W of Nola.

VITCHEGDA, a river of Russia, which, rising near the NE frontier of the prov. of Vologda, flows W to the Dwina, into which it falls at Solvitshegodsk, after a course of 400 m.

VITCHUGA, a village of Russia, in the gov. of Kostroma, 18 m. SW of Kineshma. It wholly belongs to the Tatitchev family, and is handsomely planned and laid out.

VITENZ, or **CHTELNITZA**, a town of Hungary, 35 m. NNE of Presburg.

VITEPSK, a government of European Russia, bounded on the N by Pskov; on the NW by Livonia; on the E by Smolensk; on the S by Minsk and Mohilev; and on the W by Livonia, lying between 55° 0' and 57° 20' N lat. Its territorial extent is about 18,000 sq. m. Pop. in 1851, 742,811, partly Poles, Lithuanians, and Letts, partly Russians, Germans, and Jews. The surface is generally flat, and, though in the NE, the elevation is considerable. There are no mountains, and hardly any hills. Its chief rivers are the Dwina, which traverses its S part, the Ula, the Drissa, the Svoiana, the Lovat, and the Viteba, all belonging to the basin of the Baltic. The forests are very extensive; and potash is made in large quantities for exportation; hemp and flax are also raised for exportation. The pastures are good: cattle are reared and exported. There is also some traffic in honey and bees' wax. The manufactures consist of iron, brandy, woollen cloth, leather, pottery-ware, and glass.

VITEPSK, the capital of the above government, stands on the Dwina, at the influx of the Viteba, which divides it into two parts, in N lat. 55° 11' 43", 330 m. S of St. Petersburg. Pop. 17,000, of whom a considerable proportion are Jews. The town is surrounded by a wall, but made no regular defence in the campaign of 1812, having been alternately occupied by French and Russians, according to their superiority in the field. Though not well-built, it contains a proportion of neat wooden houses. Its principal manufactures consist of woollen and linen cloth.

VITERBO, a town of the States-of-the-Church, the capital of a deleg. of the same name, situated at the foot of Monte-Cimone, on the Arclona, in N lat. 42° 25', 39 m. NNW of Rome. Pop. 14,000. It is a place of antiquity, and is supposed by some to be the representative of the ancient *Fanum Volturnum*. It is still surrounded with a wall, and a number of round towers. Its streets are broad and well-paved, its market-place neat, and several of the principal buildings are constructed with taste. It is the see of a bishop, and has some manufactures on a small scale, and a trade in sulphur and in iron. Its chief attractions to strangers are the warm mineral springs in the neighbourhood, and the number of villas belonging to families of rank in Rome. About a $\frac{1}{2}$ m. from the town is a small lake, called Bulicame, the waters of which emit a sulphureous smell, and appear to be in a state of continual agitation.—The deleg. has an area of 818 geog. sq. m., with a pop. of 121,000. The surface is mountainous towards the N. The lake of Bolsena lies near the centre of the deleg., and discharges itself by the Marta into the Tyrrhenian sea.

VITERSSEN, a town of Denmark, in the duchy of Holstein, 6 m. W of Pinneberg.

VITEZ, a town of Bosnia, in the sanj. and 7 m. ESE of Traunick, on the Lashva.

VITH (SANT), a village of Prussia, in the reg. and 34 m. S of Aix-la-Chapelle. Pop. 868.

VITICUSO, a village of Naples, in the prov. of Terra-di-Lavoro, 4 m. NW of Venafro.

VITIGUDINO, a village of Spain, in the prov. and 30 m. W of Salamanca. Pop. 1,000. Coarse linens are made here.

VITI-LEVU, the largest of the Fiji islands, in the S. Pacific, in S lat. 18° 11', W long. 178° 31'. It is about 80 m. in length by 50 m. in breadth, and appears to have a considerable population.

VITIM, a river of Asiatic Russia, which rises in the mountains skirting Lake Baikal on the E; runs NE and then NNW; and joins the Lena on the r.

bank, after a course of 650 m. Its principal affluents are the Karengha, Kazatchia, Jaugha, Tsipa, Nerpa, and Nijniaia-Mama.

VITIMSK, a town of Asiatic Russia, on the Lena, at the confluence of the Vitim, 590 m. NNE of Irkutsk.

VITO (SAN), a town of Austrian Lombardy, in the prov. and 22 m. SW of Udino, on the Lemone. Pop. 4,000.—Also a town of Naples, in Abruzzo-Citra, 6 m. NE of Lanciano. Pop. 2,000.—Also a town of Naples, in Calabria-Ultra 2da, 15 m. SSW of Catanzaro.—Also a village of Sicily, 18 m. NE of Trapani.

VITO-DEGLI-SCHIAVI (SAN), a town of Naples, in the prov. of Terra-d'Otranto, 15 m. W of Brindisi. Pop. 3,600.

VITOLANO, a town of Naples, in the Principato-Ultra, 21 m. NW of Avellino. It has considerable manufactures of leather and woollen goods.

VITORCHIANO, a village of the Papal States, in the deleg. and 7 m. NNE of Viterbo. Pop. 1,000.

VITORIA, a town of Spain, the capital of the prov. of Alava, situated 30 m. SSE of Bilbao, partly on the slope of a hill, partly at the entrance of a beautiful valley watered by the Zadora. Pop. 10,000. It is surrounded by a wall, but is, with some exceptions, a scattered and ill-built place. It has various manufactories, amongst which are paper, pottery, leather, cabinet-ware, hardware, combs, and mirrors. Its trade consists chiefly in the transit between Castile and the northern provinces. The vicinity of this town was the scene of a general engagement on 21st June 1813, in which the French, under Jourdan, were defeated by Wellington.

VITRAC, a village of France, in the dep. of Cantal, cant. and 3 m. S of Mamet. Pop. 700.—Also a village in the dep. of Charente, cant. and 4 m. NW of Montembœuf.

VITRE, a walled town of France, in the dep. of Ville-et-Vilaine, situated on the Vilaine, which is here a small stream, 20 m. E of Rennes. Pop. 6,800. Though an ill-built place, it has considerable manufactures of woollens, serge, flannel, canvas, casks, wooden-ware, and linen; also tanneries and manufactures of leather. In January 1817, it suffered severely by fire.

VITREY, a town of France, dep. of Haute-Saône, 6 m. W of Jussey. Pop. 1,300.

VITROLLES, a village of France, in the dep. of Bouches-du-Rhône, 12 m. SW of Aix.

VITRY, a town of France, dep. of Pas-de-Calais, situated on the Scarpe, 4 m. SW of Douay.

VITRY-AUX-LOGES, a village of France, in the dep. of Loiret, cant. and 6 m. N of Chateaufort.

VITRY-LE-BRULE, a village of France, dep. of Marne, 3 m. NE of Vitry-le-François, on the Orlaine.

VITRY-LE-FRANÇOIS, a town of France, in the dep. of Marne, cant. and 21 m. SE of Chalons, on the Marne, which here becomes navigable for barges. Pop. 7,389. It is still surrounded by a wall, and though built chiefly of wood, has a pleasant appearance; its largest square being neat and regular, and its principal church built in the Italian style. The addition of Le François to its name is derived from Francis I., in whose reign it was built. It was the scene of important military operations in 1814. It has a trade in corn, wool, wood, and charcoal.

VITRY-SUR-SEINE, a town of France, in the dep. of Seine, 2 m. SE of Paris. Pop. 2,500.

VITTEAUX, a town of France, dep. of Cote-d'Or, on the Brenne, 31 m. W of Dijon. Pop. 2,000. It has woollen-factories.

VITTEFLEUR, a village of France, in the dep. of Seine-Inferieure, cant. and 2 m. N of Cany, on the l. bank of the Durdan.

VITTEL, a town of France, dep. of Vosges, 14 m. SW of Mirecourt.

VITTORE (MONTI), a summit of the Apennines, in the Papal States, deleg. of Spoleto, to the N of the Monte-della-Sibilla. Alt. 2,478 metres = 8,293 ft.

VITTORE (SAN), a village of Naples, in the prov. of Terra-di-Lavoro, 6 m. SE of San-Germano.

VITTORIA, a town of Sicily, in the Val-di-Noto, 40 m. SW of Syracuse. Its population has been stated at 11,000, a number rendered probable by the fertility of the surrounding country, and the special privileges enjoyed by the whole of the adjacent district, called the Contado-di-Modica.

VITTORIA, a village of Upper Canada, in Norfolk co., 7 m. N of Simcoe. Pop. 600.

VITTORINO (SAN), a village of Naples, in Abruzzo-Ultra 2da, 6 m. NW of Aquila.

VITZELS, a town of Asiatic Turkey, in the pash. and 60 m. ENE of Trebizond.

VITZENBURG, a village of Prussian Saxony, reg. of Merseburg, 6 m. SSW of Querfort. Pop. 600.

VIU, a town of Piedmont, on the river Stura, 4 m. NW of Turin, at an alt. of 782 metres above sea-level. Pop. 3,745. It occupies an elevated position, commanding splendid views, and is much resorted to in summer by families from Turin.

VIVARAIS, an ancient district of France, in the NE of Languedoc, now included in the dep. of Ardeche. The cap. was Viviers.

VIVEL, a town of Spain, in the prov. of Valentia, district of Morella, 27 m. W of Castellon-de-la-Plana, near the Palencia river. Pop. 2,000.

VIVERO, a town of Spain, in the prov. and 45 m. N of Lugo, on the coast, near the embouchure of the Landrova, which forms a capacious harbour. Pop. 4,000. It is a walled place, and has some public buildings. The trade is chiefly coasting.

VIVEROLS, a town of France, dep. of Puy-de-Dome, 9 m. SSW of Ambert.

VIVIERS, a town of France, dep. of Ardeche, cant. and 13 m. SE of Privas, situated on the Rhone. Pop. 1,700. Though a small and ill-built place, it is the see of a bishop, and has manufactures of woolen, linen, and silk.

VIVIERS-LES-MONTAGNES, a village of France, in the dep. of Tarn, 4 m. SW of Castres. Pop. 1,200.

VIVIERS-SUR-CHIER, a village of France, dep. of Moselle, cant. and 4 m. N of Longuyon. Pop. 600.

VIVOIN, a village of France, dep. of Sarthe, cant. and 1 m. NE of Beaumont-le-Vicomte, on the r. bank of the Sarthe.

VIVONNE, a town of France, dep. of Vienne, on the Clain, 12 m. S by W of Poitiers. Pop. 1,470.

VIX, a town of France, dep. of La Vendée, 9 m. S of Fontenay.

VIZA, a town and sanjak of Turkey, in Romelia. The town is 72 m. NW of Constantinople, on a small stream which flows into the Black sea. It is walled and slightly fortified.—The sanj. is bounded on the SE by the straits of the Dardanelles; on the NE by the Black sea; and is watered by the Erkene, an affluent of the Maritza.

VIZAGAPATAM, a town of Hindostan, the capital of a district of the same name, on the coast, in N lat. 17° 41', E long. 83° 24', 40 m. NE of Madras. There are a fort, an arsenal, and cantonments here.—The district has an area of 7,650 sq. m., with a pop. of 1,254,272. It stretches between the Eastern Ghats and the Orissa coast, from the parallel of 17° 15' to 19° 3'.

VIZIADRUG, a port on the Malabar coast of Hindostan, 160 m. S of Bombay.

VIZIANAGROM, a town of Hindostan, 85 m. NNE of Vizagapatam.

VIZILLE, a town of France, dep. of the Isere, 9 m. SSE of Grenoble. Pop. 2,500. It has manufactures of linen and paper, and in the neighbourhood are extensive quarries.

VIZZINI, a town of Sicily, in the Val-di-Noto, in a mountainous district, on the road from Calatagirone to the coast, 28 m. SW of Catania. Pop. 9,000.

VLAARDINGEN, a town of Holland, in the prov. of South Holland, on the l. bank of the Maese, 6 m. W by S of Rotterdam. Pop. 7,600. It has extensive fisheries, and is the principal place of rendezvous of the Dutch herring-vessels.

VLADIKAIUKAS, a Russian fortress in Circassia, on the r. bank of the Terek, 120 m. N of Tiflis, commanding the route from Caucasus into Georgia.

VLADIMIR, a government of European Russia, bounded on the N by the gov. of Jaroslav and Kostroma; on the E by Nijni-Novgorod; on the S by Riazan; on the W by Moscow; and on the NW by Tver. Area 864.6 German sq. m. Pop. in 1851, 1,168,303. It presents in general a flat surface, fertile, and sloping towards the E, but woody in the W. The chief rivers are the Volga, the Kliasma, and the Oka. Rye, barley, and oats are cultivated, and fruit is abundant. Iron, linen, and woollen goods are manufactured.—Also a town of the gov. of Volhynia, on the r. bank of the Loula, an affluent of the Bug. Pop. 2,000.

VLADIMIR, on the river Kliasma, the capital of the above government, is 112 m. E by N of Moscow, and 500 m. SE of St. Petersburg, in N lat. 56° 8', E long. 38° 1'. Pop. 4,000. It has manufactories of silk goods, earthenware, leather, and soap.

VLADIMIRETZ, a town of Russia, in the gov. of Volhynia, 60 m. NE of Lutsk.

VLAEMERTINGHE, a town of Belgium, in the prov. of E. Flanders, 3 m. W of Ypres. Pop. 2,500.

VLASKA, a district of Upper Wallachia, bounded on the NE by the district of Imbrovitza; on the SE by the Danube; on the SW by the district of Teliorma; and on the NW by that of Mountchel. It is a fertile and chiefly pastoral region intersected by the Koman.

VLASSANITZA, a town of Bosnia, 80 m. NE of Bosna-Serai.

VLETEREN (Oost), a town of Belgium, in the prov. of W. Flanders, 9 m. NW of Ypres.

VLIAN, a town of Austrian Dalmatia, on the island of St. Michael.

VLIE, or **FLIZ**, the passage from the Zuyder-zee into the German ocean, between the islands of Schelling and Vlieland.

VLIELAND, a small island of Holland, at the entrance of the Zuyder-zee, about 5 m. NE of the Texel. It is about 10 m. long, and 3 m. broad. It had formerly two villages, East and West V., but the latter is now covered by the sea. Pop. 800.

VLODZIMIRZ. See **VLADIMIR**.

VLODZIMIRZETZ, a town of Russia, in the gov. of Volhynia, on the river Styry, 155 m. WNW of Zytomiers.

VLOTHO, a town of Prussian Westphalia, in the co. of Ravensburg, 6 m. S of Minden, on the l. bank of the Weser. Pop. 1,600.

VOBARNO, a town of Austrian Italy, in the gov. of Milan, near the river Chiese, 13 m. NNE of Brescia.

VOBURG, or **VOHUBURG**, a town of Bavaria, on the Danube, 10 m. E of Ingolstadt. Pop. 900.

VOCKLABRUCK, a town of Upper Austria, on the Vockla, 36 m. SW of Linz, near the confluence of the Vockla and the Agger. It has manufactures of ticking and coarse linen. Pop. 1,200.

VODABLE, a village of France, in the dep. of Puy-de-Dôme, 6 m. WSW of Issoire. Pop. 750.

VODE, or **VUDE**, a river of Upper Wallachia, which rises to the NW of Pitesti; runs SE; and flows into the Danube near Ruscuhuk, after a course of 120 m.

VODINA, or **VODENA**, a town of Turkey, in the sanj. of Salonika, on the Vistritza, 50 m. WNW of Salonika. It has manufactories of cotton and woolen fabrics. Pop. 12,000.

VODLA, a river of Russia, in the gov. of Olonetz, which flows from a lake of the same name, in a SSE and then in a SSW direction, to Lake Onega, into which it falls after a course of 100 m.—The lake lies to the NNE of Pudoj, and is 26 m. in length from N to S, and 14 m. in breadth.

VODOLAGA, a village of Russia, in the gov. and 27 m. SW of Charkov.

VODONIKO, a village of European Turkey, in Macedon, near the Venetiko, 40 m. N by W of Joannina.

VOEL (Loon), a lake of Perthshire, in the p. of Balquhiddy, about 3 m. long, and 1 m. broad; the source of the river Balvaig, one of the principal branches of the Teith.

VOEUIL, a village of France, in the dep. of Charente, cant. and 4 m. S of Angouleme. Pop. 300.

VOGEL (La), a small island in the Eastern seas, to the E of Hoorn island, in 8 lat. 5° 12'.

VOGEL ISLANDS, a cluster of small islands near the W coast of Siam, in N lat. 7° 38'.

VOGELSBURG, a lofty mountain of the Swiss cant. of the Grisons, 35 m. ESE of the Saint Gothard, having an alt. of about 10,280 ft. above the level of the sea.

VOGELSBURG, a range, or rather group of mountains in the W of Germany, between Upper Hesse-Fulda and the Wetterau, on the basin of the Main and that of the Weser. It is connected on the SE with the Rhone-Gebirge; on the SW with the Hoheberg; and on the NW with the Rothhaargebirge. It is productive in flax, and has good pasturage. The Oberwald, its highest point has an alt. of 2,500 ft.

VOGHERA, a province of the Sardinian states, bounded on the N and NE by the Po; on the E by the duchy of Piacenza; on the S by the prov. of Bobbio; and on the W by that of Tortona. Area 797-35 sq. chilom. Pop. 97,162. About five-sevenths of the surface are plain; the remainder is covered with hills; but all is under cultivation. The agricultural produce consists of wheat, Indian corn, barley, and oats; wine, flax, hemp, and silk, are also cultivated. Sulphur, chalk, and limestone, are wrought. This prov. was formerly annexed to Pavia, and was denominated Oltrepo-Pavise; by the treaty of Worms, it was transferred to Sardinia. It comprises 12 mandamenti, which are subdivided into 77 communes.

VOGHERA, the chief place of the preceding prov., is situated on the river Staffora or Iria, at an alt. of 426 ft. above sea-level. Pop. 10,766, in 1,045 houses, and 2,241 families. It is tolerably built, having a good market-place, an hospital, and six churches and convents, a civic palace, and extensive barracks. It is the see of a bishop, and its cathedral, rebuilt in the 17th cent., is a noble structure. The principal branches of industry are the spinning and weaving of silk. V. was formerly a fortified place of considerable strength, but public walks now occupy the place of the fortifications.

VOGOGNA, a town of the Sardinian states, in the prov. of Novara, 12 m. NE of Casale, near the confluence of the Anza with the Toccia. It is a place of high antiquity.

VOGOUILIA, a river of Asiatic Russia, in the gov. of Tobolsk, which rises on the E flank of the Ural; runs E; and flows into the Soeva on the I.

VOGTLAND, or **VOIGTLAND**, a circle or district of the kingdom of Saxony, occupying an area of 700 sq. m., in the SW corner of the kingdom, between the parallels of 50° 10' and 50° 42'. It is a mountainous territory, and bears a great resemblance to the adjoining circle of the Erzgebirge, except that it has fewer mines, and that the great branch of employment is the weaving of mualin. The streams belong to the basin of the Elbe. The principal river is the Elster. The chief town is Plauen.

VOGUE, a village of France, in the dep. of Ardèche, cant. and 5 m. WSW of Villeneuve-de-Berg.

VOGULS, a Finnish race inhabiting the gova. of Perm and Tobolsk in Asiatic Russia. They are supposed by some to be a branch of the Ostiaks. They are of small stature, but of a robust constitution, and frequently live to an advanced age. Their chief subsistence is derived from the herds of cattle which they rear, and from fishing.

VOHBURG, a town of Bavaria, in the circle of Regen, 9 m. E of Ingolstadt, on the r. bank of the Danube. Pop. 1,300.

VOHEMARO (CAPE), a cape on the E coast of the island of Madagascar, in S lat. 18° 20'.

VOHENSTRAUB, a town of Bavaria, 45 m. N by E of Ratibon. Pop. 1,100.

VOHL, a town of Hesse-Darmstadt, on the Auel, 80 m. NE of Marburg. Pop. 1,200.

VOHRENBUCH, a village of Baden, in the bail. of Neustadt, on the Bregenz, 50 m. N of Constanx.

VOHRINGEN, a village of Hohenzollern-Sigmaringen, 7 m. N of Sigmaringen, on the Lauchart. Pop. 700.

VOIAVAT, a town of Asiatic Turkey, in the sanj. and 50 m. ENE of Kastamuni, on an affluent of the Kizil-Irmak. Pop. 2,000.

VOID, a town of France, in the dep. of the Meuse, 6 m. NW of Commercy, on the Meholle.

VOIDE (Le), a commune and village of France, in the dep. of Maine-et-Loire, 1 m. NNW of Vilher.

VOIGTBERG, a village of Saxony, in the Voigtland, 6 m. SSE of Plauen, on the r. bank of the Elster.

VOIKER, a river of Asiatic Russia, which takes its rise in the Ural chain, and falls into the Obi in N lat. 65° 50'.

VOIRON, a town of France, dep. of Isere, on the river Morges, 14 m. NW of Grenoble. Pop. 5,630. It is the staple place for linen manufactured here and in the surrounding villages. It has likewise bleaching-grounds, paper-mills, tanneries, and steel-works, where arms are manufactured.

VOIRONES (MONT), a mountain of Switzerland, on the borders of the lake of Geneva, having an alt. of about 8,400 ft. above the level of the lake.

VOISENES, a village of France, in the dep. of Yonne, cant. of Villeneuve-L'Archeveque. Pop. 700.

VOISEY, a commune of France, in the dep. of Haute-Marne, cant. and 4 m. NE of La Ferté.

VOISSAU, a village of France, dep. of Isere, cant. and 4 m. NE of Saint-Geoire.

VOISSENON, a village of France, in the dep. of Seine-et-Marne, cant. and 8 m. NNE of Melun. Pop. 840.

VOITEUR, a town of France, dep. of the Jura, 6 m. N of Lons-le-Saulnier. Pop. 900.

VOITSBERG, a village of Styria, in the circle and 12 m. W of Gratz. Pop. 800.

VOIVRES (La), a village of France, in the dep. of Vosges, cant. and 8 m. NE of Bains. Pop. 620.

VOIUSSA, a river of Albania, which rises in Mont Zigor; runs NW; passes Konitza; and flows into the Adriatic a little to the N of the gulf of Avlona, after a course of 120 m.

VOIVE, a river of France, in the dep. of Haute-Marne, which flows into the Aube, on the r. bank, opposite Molins, after a W course of 24 m.

VOJE, a lake of Russia, in the E part of the gov. of Novgorod, to the NE of Lake Bielo. It is 28 m. in length from N to S, and 13 m. broad.

VOLA (Cape), a cape of South America, on the N coast of Venezuela, in N lat. 12°, W long. 72°.

VOLANON, a small town of the States-of-the-Church, on the Adriatic, 28 m. E of Ferrara.

VOLARNO, a village of Venetian Lombardy, in the prov. of Brescia, 2 m. WNW of Salo.

VOLCANELLO, or **VULCANO**, a small islet of the Mediterranean, belonging to the Lipari group. It is of volcanic origin, and though formerly separated from the larger island of Volcano by a narrow channel, it is now connected with it by a neck of land which was formed during a violent eruption. It is of a triangular form, and uninhabited. It continues to emit smoke from different parts of its surface.

VOLCANO, or **VULCANO**, an island of the Mediterranean belonging to Sicily, in N lat. 28° 21', the most southern of the Lipari group, situated between the island of Lipari and the N coast of Sicily, and separated from the former by a channel 2 m. in breadth. It consists of a single volcanic mountain of rather more than a $\frac{1}{2}$ m. in height, which descends by successive gradations till it loses itself in the sea, where the circumf. of its base, and consequently of the island, is about 12 m. In all parts of the island, the traces of fire are distinctly visible. The portion of it opposite to Lipari is without the smallest trace of vegetation; towards the S and E, however, it is covered with trees and other vegetable productions. The mountain called Monte-Aria, presents the appearance of a cone, and is about 3,000 ft. in height. Its orator is oval, and in circuit about 1 m. It has no opening of consequence, but a smooth surface throughout, emitting smoke and vapour.

VOLCANO, an island in the Pacific, about 24 m. N of Egmont island, one of those called Queen-Charlotte's islands, in S lat. 10° 17', E long. 165° 4'. Its summit rises above 2,000 ft. above the level of the sea, and sometimes emits a bright flame.—Also an island in Dampier's straits, off the NE coast of Papua, in S lat. 5° 30', so named from its being the seat of a volcano, which was in an active state in 1792.—Also an island in the N. Pacific, in N lat. 34° 5', E long. 189° 35'.

VOLCANO-BAY, an extensive bay in the SE extremity of the island of Jesso, so called by Captain Broughton from the volcanoes on its shore. This bay is very capacious; its entrance is between the parallels of 42° and 42° 30', and it has 50 fath. water in the centre. The N side of the bay presents an agreeable diversity of rising grounds.

VOLCHOV. See **VOLKHOV**.

VOLCKACH, a town of Bavarian Franconia, on the Main, 15 m. E by N of Wurtzburg. Pop. 1,500.

VOLCONDA, a town of Hindostan, in the Carnatic, 50 m. NNE of Trichinopoly.

VOLCZYK, a town of European Russia, in the gov. of Podolia, district of Kaminiac.

VOLENDAM, a village of Holland, in the prov. of N. Holland. Pop. 800.

VOLGA, or **VOIEGA**, a river of Russia, which has the longest course, and, with the exception of the Danube, the largest volume of water of any river in Europe. It rises among the Valdai mountains, in Lake Selingher, in N lat. 57°, E long. 33° 10', at an alt. of 550 ft. above sea-level, and takes a direction in general to the eastward, but with many windings, until it reaches the city of Kazan. The rivers that flow into it above Kazan are, if we except the Oka,

of second rate magnitude; but below Kazan it receives the Kama, which brings to it the tribute of a great extent of country. It now flows southward, with a great volume of water, and forms the boundary between Europe and Asia for several hundred miles, till reaching Tzarystyn, it turns E, approaches the Caspian, and after separating into a number of branches, estimated at from 60 to 70, discharges itself into that sea, 86 versts = 564 m. below Astrakhan. Its course is computed at 2,700 m.; and the area of its drainings at 400,000 sq. m. The vast tract of country through which it flows being in general level, it is navigable, after passing Tver, in the early part of its course. In May and June its waters receive great increase from the melting of the snow and ice; and the boatmen take advantage of the increased depth, to descend its current, and avoid those shallows and islands which at other seasons obstruct their course. From the vicinity of Tver northward, a communication is opened to the Msta, a river flowing N to the Nieva; and steam-boats ply between Tver and the Caspian. The principal rivers which join the V. are the Tvertza, the Mologa, the Sestra, the Soscha, the Oka, the Sura, the Kasanka, the Kama, the Sok, and the Samara. Its waters abound in fish, particularly sturgeon. See article **RUSSEA**.

VOLHYNIA, or **VOLYNIE**, a government of Russia, lying between the parallels of 49° 25' and 52° 10' N; and bounded on the N by the gov. of Minsk and Grodno; on the E and SE by Kiev; on the S by Podolsk; on the SW by Austrian Galicia; and on the W by Poland. Area 1800·4 German sq. m. Pop. in 1851, 1,469,442. The surface is low towards the N; but diversified by a few hills towards the S. The river Bug skirts it on the W; the other principal rivers are the Styr and the Gorin. While Poland was independent, V. formed a prov. of that kingdom, which bordered with the Ukraine on the SE. The soil is generally chalky, but in some places marshy, and in some a rich vegetable mould. The climate is temperate. The produce consists in wheat, millet, and rye; hops and fruit are also grown. Pasturages are extensive, but a great part of the surface is still forest land. Hemp, potash, pitch, tar, iron, hides, cattle, tallow, honey, and wax are exported. From its situation on the frontier of Poland, V. has often been exposed to the evils of invasion. Since 1793, it has been in the possession of Russia. Its chief town is Jitomir.

VOLIANO, a town of Tuscany, in the prov. of Florence, vicariat and 10 m. E of Montepulciano, on the l. bank of the Chiana-Pontifica, which is here crossed by a bridge.

VOLINIA, a township of Cass co., in the state of Michigan, U. S., 85 m. SW of Lansing. Pop. in 1840, 411; in 1850, 607.

VOLIESO, a village of Turkey in Asia, on the W coast of the island of Chio, and a little to the N of a bay of the same name.

VOLKACH, a town of Bavaria, capital of a pre-sidial, in the circle of Lower Franconia, on the l. bank of the Main, 15 m. NE of Wurtzburg. Pop. 1,984.

VOLKARDINGHAUSEN, a village of the principality of Waldeck, district of Twiste. Pop. 240.

VOLKARLSHAIN, a village of Hesse, in the prov. of Upper Hesse, and circle of Nidda. Pop. 270.

VOLKEGEM, a department and commune of Belgium, in the prov. of E. Flanders, and arrond. of Audenarde. Pop. of dep. 747. It has linen factories.

VOLKEN, a village of Switzerland, in the cant. of Zurich, and bail. of Andelfingen. Pop. 385.

VOLKENODA, a village of the duchy

of Saxe-Coburg-Gotha, and principality of Gotha. Pop. 100.

VOLKENSCHAGEN, a village of the grand-duchy of Mecklenburg-Schwerin, in the circle and bail. of Rostock. Pop. 220.

VOLKERMARKT, a town of Illyria, in the gov. of Laybach, circle and 20 m. E of Klagenfurt, on the l. bank of the Drave. Pop. 1,000.

VOLKERODE, a village of Hanover, in the bail. of Göttingen. Pop. 300.—Also a village of Prussia, in the regency of Erfurt, and circle of Heiligenstadt. Pop. 364.

VOLKERSDORF, a village of Prussia, in the regency of Liegnitz and circle of Lauban. Pop. 705. It was formerly famous for its manufacture of garnets, and has several linen factories.—Also a village of Saxony, in the regency of Dresden, and circle of Moritzburg. Pop. 330.

VOLKERSHAUSEN, a village of the grand-duchy of Saxe-Weimar, and circle of Eisenach, 8 m. SE of Vach. Pop. 1,000.

VOLKERSHEIM, a village of the duchy of Brunswick, in the circle of Wolfenbüttel. Pop. 760.—Also a village of Württemberg, in the circle of the Danube. Pop. 329.

VOLKERTSHAUSEN, a village of the grand-duchy of Baden, in the circle of the See, bail. and 6 m. WSW of Stockach, on the Aach. Pop. 328. It has a forge, a paper-mill, and a bleachery.

VOLKERTSHOVEN, a village of Bavaria, in the circle of Swabia. Pop. 200.

VOLKESFELD, a village of Prussia, in the regency of Coblenz, and circle of Mahen. Pop. 280.

VOLKETSWEIL, a village of Switzerland, in the cant. of Zurich, and bail. of Uster. Pop. 2,028.

VOLKHOV, a river of Russia in Europe, which issues from Lake Ilmen, in the gov. of Novgorod, a little above the town of that name, which it intersects; thence it runs NNE; and after traversing the E part of the gov. of St. Petersburg, throws itself into the S part of Lake Ladoga, near Novala-Ladogo, and after a total course of about 150 m. This river is deep and rapid, but except when its waters are low, when it forms cascades, it is navigable.

VOLKHOUSKI, a chain of low woody mountains, in Russia in Europe, in the gov. of Tver, to the SW of the Valdai chain. It makes part of the ridge which forms the great water-shed of Europe.

VOLKMANNSDORF, a village of Prussia, in the regency of Appeln, and circle of Neisse. Pop. 961.—Also a village of Saxe-Weimar, in the circle and bail. of Neustadt.

VOLKMANSGRUN, a village of Bavaria, in the circle of Upper Franconia, and presidial of Naila. Pop. 310.

VOLKMARITZ, a village of Prussia, in the regency of Merseburg, and circle of the See. Pop. 200.

VOLKMARSDORF, a village of the duchy of Brunswick, and circle of Helenstadt. Pop. 210.—Also a village of Saxony, in the bail. and near Leipzig. Pop. 1,751.

VOLKMARSEN, a town of Hesse-Cassel, capital of an amt in the prov. of Lower Hesse, circle and 9 m. NW of Wolfagen, on the Twiste. Pop. 2,970. It is enclosed by walls, with four gates, and has two churches and an hospital, and the ruins of the ancient fortress of Kugelburg. It has manufactories of woollen fabrics and hosiery, and several tanneries. Pop. of bail., 6,760.

VOLKOVISK, a town of Russia in Europe, capital of a district in the gov. and 48 m. SSE of Grodno, on a small affluent of the Niemen.

VOLKSHAGEN, a village of the grand-duchy of Mecklenburg-Schwerin, circle of Wendisch, and

bail. of Nibnitz. Pop. 350.—Also a village of Prussia, reg. of Stralsund, and circle of Rugen. Pop. 200.

VOLKSTEDT, a village of the principality of Schwarzburg-Rudolstadt, bail. and 2 m. SSW of Rudolstadt, on the l. bank of the Saale. Pop. 300. It has a manufactory of porcelain.

VOLLEGE, a village of Switzerland, in the cant. of Valais, and bail. of Entremont. Pop. 369.

VOLLEKIRCHEN, a village of Prussia, in the regency of Coblenz, and circle of Mettlar. Pop. 230.

VOLLENBORN, a village of Prussia, in the regency of Erfurt, and circle of Worbis. Pop. 330.

VOLLENHOVEN, a town of Holland, in the prov. of Ober-Yssel, 14 m. NNW of Zwolle, on a headland of the Zuider-zee, in N lat. 52° 40' 51". Pop. 2,300. It has an active trade. In the vicinity are the ruins of the castle of Tontelburg.

VOLLORE, a town of France, dep. of Puy-de-Dome, arrond. and 6 m. SE of Thiers. Pop. 4,300.

VOLMA, a town of Russia, in the gov. and 30 m. W of Minsk.

VOLMAR, a town of Russia, in the gov. of Livonia, 65 m. NE of Riga, on the r. bank of the Aa. It has suffered repeatedly from fire. Pop. 1,700.

VOLME, a small river of Prussian Westphalia, which falls into the Roer.

VOLMERSTEIN, a village of Prussian Westphalia, in the co. of Mark, 8 m. SW of Schwiet, at the confluence of the Volme and the Ruhr. Pop. 400.

VOLMUNSTER, a village of France, in the dep. of Moselle, 56 m. E of Metz.

VOLNAY, a town of France, in the dep. of Cote-d'Or, cant. and 4 m. SW of Beaune. Pop. 650.—Also a commune and v. in the dep. of Sarthe, cant. and 4 m. SE of Bouloire, on the Hanes. Pop. 1,200.

VOLNEY, a township of Oswego co., New York, U. S., 50 m. W of Rome. Pop. in 1850, 5,310.

VOLO, a town of European Turkey, in Thessaly, situated on the gulf of Volo, 32 m. SE of Larissa, in N lat. 39° 24'. Pop. 5,000. Its harbour is large, and is resorted to by vessels from Egypt, Candia, and Smyrna. In 1685, it was taken and partly destroyed by the Venetians. It occupies the site of the ancient *Demetrias*.

VOLO (GULF OF), a gulf of the Archipelago, on the coast of Thessaly, between the parallels of 39° and 39° 25' N, and intersected by the meridian of 23° E, to the NW of Negropont, from which it is separated by the channel of Trikeri, having the peninsula of Zagora on the E, and that of Trikeri on the SE. It is the *Sinus Pelagicus* of the ancients.

VOLOCSA, a town of Austria, in the territory of Istria, 7 m. NNW of Fiume. It has two harbours, and a traffic in fruit and in wine.

VOLOGDA, a vast province of European Russia, lying between the parallels of 58° 20' and 64° 30' N; and bounded on the N by the gov. of Arkhangel; on the E by the Uralian chain; on the S by the govs. of Perm, Viatka, Kostroma, and Yaroslavl; and on the W by those of Novgorod and Olonetz. Area estimated at 6,967 German sq. m., or 337,111 sq. versts. Pop. in 1853, 893,000. The surface is generally flat. Mountains are rare, but a succession of hill and dale is very common; and in many places these inequalities produce scenery which is not deficient in beauty. Nearly all the rivers belong to the basin of the Arctic ocean. The principal are the Northern Dwina, the Sukhona, the Louza, Vega, Vithegda, Mosen, Pisega, and Petchora. A small portion of the S part of the gov. is drained by affluents of the Volga. To the N the trees lose their leaves in August, and the rivers are frozen over from the end of October to the middle of April. In the S there are large tracts occupied by forests, lakes, and morasses. Agricul-

ture is followed to a certain extent, but the severity and changeable state of the weather render it precarious, though a considerable quantity of wheat and barley is grown. The produce of the pasture-grounds, of the chase and fishing, tend to make up for this uncertainty, and the woods supply potash, tar, and other materials for export, as well as domestic use. The gov. is administratively divided into 10 circles.

VOLODA, the capital of the above province, stands on the river Vologda, in N lat. 59° 15' 0", E long. 40° 11', 350 m. E by S of St. Petersburg. Pop. 12,000. It is a bishop's see, and has a theological seminary, and a gymnasium. The inhabitants appear to be enterprising, having established a number of manufactures, such as silk, linen, canvas, dye-stuffs, white-lead, candles, and leather; and they carry on a considerable trade with St. Petersburg and Arkhangel, China, and the Aleutian islands.

VOLOGDA, a river of Russia, which rises in a marsh in the gov. of the same name; and flows into the Sukhona, on the r. bank, after a course of 90 m.

VOLOGEN, a town of Russia, in the gov. of Vilna, 36 m. SE of Otczmiana.

VOLOGUE, a river of France, in the dep. of Vosges, which rises in a series of small lakes, and flows into the Moselle, on the r. bank, at Jarneuil, after a course of 36 m.

VOLOKOLAMSK, a town of European Russia, 73 m. WNW of Moscow, on the Lama. Pop. 2,600.

VOLONNE, a town of France, dep. of Basses-Alpes, 6 m. SSE of Sisteron, near the Durance.

VOLOTSCHINSK, a town of European Russia, in the gov. of Volhynia.

VOLPE (CAPE), a cape on the N coast of Sardinia, in N lat. 40° 4'.

VOLPEDO, a town of the Sardinian states, in the prov. of Tortona, on the small river Curone, 6 m. E of Tortona. Pop. 1,070.

VOLPERSDORF, a village of Prussian Silesia, 14 m. S of Glatz. Pop. 1,100.

VOLPIANO, a town of Piedmont, in the prov. and 12 m. N by E of Turin. Pop. 1,000; of district, comprising 4 communes, 3,663, in 437 houses. Corn, wine, fruit, and silk are produced in this district.

VOLSK, a town of European Russia, in the gov. and 70 m. NE of Saratov, on the Volga. Pop. of district, 11,000; of town, 3,500. It has manufactures of earthenware and tile-works; but the principal employments are agriculture, and the sale of its produce.

VOLTA, a town of Milan, near the Mincio, 12 m. N by W of Mantua. Pop. 4,000.

VOLTA (RIO), or **ASWADA**, a considerable river of Western Africa, rising in the mountains of Kong; flowing SE to Addah; and forming the boundary between the Gold and Slave coasts. It overflows its banks in the rainy season. The channel is obstructed with rocks and sand-banks, and does not admit ships of burden. Its chief affluents are the Senne and the Loka.

VOLTAGGIO, a town of the Sardinian states, in the prov. and 15 m. N of Genoa, at the foot of the Borchetta. Pop. 2,100.

VOLTAIRE (CAPE), a headland of N. Australia, in S lat. 14° 15', E long. 125° 43'.

VOLTAS (CAPE), a headland on the coast of S. Africa, at the mouth of the Gariep or Orange river, in S lat. 28° 44', E long. 16° 32'.

VOLTERA, a town of Tuscany, 32 m. SW of Florence. Pop. 4,600. It is built on a lofty sandstone rock, which is touched by the Era on the N, and by the Cecina on the S, at an alt. of 1,870 ft. above sea-level. It contains a cathedral, an hospi-

tal, a palazzo-pubblico containing a museum, and several churches. It is the see of a bishop, has a public seminary of education, and appears from its monuments, particularly its walls of Etruscan construction, to have been a place of great antiquity. It is generally identified with the *Velitrus* or *Volturna* of the Etruscans. At present its citadel serves as a state prison; and the chief employment of the inhabitants is derived from the sale of the produce, corn, wine, and olive oil, of the adjacent country. Here are also quarries of alabaster, marble, and gypsum, and considerable salt-works.

VOLTORINO, a town of Naples, in the prov. of Capitanata, cant. and 3 m. E of Volturava.

VOLTOYA, a river of Spain, which rises to the W of Epinar, on the Sierra-de-Guadarama; flows W, and then N; and joins the Eresma, near Coca, after a course of 60 m.

VOLTRI, a small town of the Sardinian states, 9 m. W of Genoa, at the entrance of the Ceruso. Pop. 3,000.

VOLTSCHANSK, a town of European Russia, in the Slobolsk-Ukraine, 50 m. NE of Charkov. Pop. 2,500.

VOLTURARA, a town of Naples, in the Capitanata, 27 m. W of Foggia, on a spur of the Apennines. Pop. 2,200.—Also a town in the prov. of Principato-Ultra, 15 m. WNW of San-Angelo-di-Lombardi. Pop. 4,000.

VOLTURNO, a river of Naples, which takes its rise in the Apennines; flows SSE, and then W; and falls into the gulf of Gaeta, 20 m. NW of Naples, after a course of 90 m.

VOLUNTOWN, a township of Windham co., Connecticut, U. S. 16 m. N by E of Norwich. Pop. 1,064.

VOLUSKA, a small port of Austrian Illyria, in Istria, 6 m. W of Fiume, at the bottom of the gulf of Quarnero.

VOLUTZA, a mountain of Turkey, on the frontier of the sanjaks of Monastro and Trikala, between the bases of the Salembria and the Jnje-Karasu, and connected on the E with Mount Olympus.

VOLVIC, a town of France, in the dep. of Puy-de-Dome, cant. and 4 m. WSW of Riom. Pop. 2,400. Lava is largely quarried in the vicinity.

VOMANO, a river of Naples, in Abruzzo-Ultra 1ma, rising to the NE of Aquila; running NW, and then E, and flowing into the Adriatic, 6 m. NE of Attri.

VOMO, one of the Fiji group, in S lat. 17° 29', E long. 177° 18'.

VONC, a village of France, in the dep. of Ardennes, cant. and 1 m. E of Attigny, near the r. bank of the Aisne. Pop. 1,100.

VONIZZA, a town of European Turkey, in Epirus, at the foot of Mount Zoromeros, on the S coast of the gulf of Arta, in N lat. 39° 15'. It is supposed to be the ancient *Anactorium*, and is built at the bottom of a bay between two promontories. It has a good roadstead for vessels, and carries on a little trade in oil and grain, but is important chiefly for the quantities of wood for ship-building produced in its territory.

VOORBURG, a village of Holland, in S. Holland, 2 m. E of the Hague, and on the railway from Delft. Pop. 1,700.

VOORDE, a village of Belgium, in E. Flanders, 22 m. SSE of Ghent. Pop. 1,100.

VOORN, an island of Holland, situated between the Old Maese and the Haringvliet. It is about 18 m. in length, and 5 m. in breadth, and is divided into East and West Voorn. It is tolerably fertile in corn. The chief place is Brielle.

VOORSCHOTEN, a village of Holland, 3 m.

SSW of Leyden, on the railway to Rotterdam. Pop. 1,000.

VOORST, a town of Holland, in the prov. of Gelderland, 12 m. E of Arnheim.

VORARLBERG, a mountainous district of the Austrian states, bounded on the NNE by Bavaria; on the NE by the Ober-Innthal; on the S by the Swiss cant. of the Grisons; on the W by the principality of Lichtenstein, and the cant. of St. Gall; and on the NW by the lake of Constanx. It has an area of 746 geog. sq. m. Pop. in 1849, 98,531. It takes its name from a mountain-ridge called Arlberg, which separates it from Tyrol and forms a branch of the Alps. It is watered by the Aach, the Ill, the Fussach, the Lech, and the Iller. The Rhine skirts it on the NW. The V. consisted of a number of petty lordships, which were ceded to Bavaria at the peace of Presburg in 1806, but were restored after the fall of Buonaparte. It now forms a circle of Tyrol. The V. sends out masons and housebuilders to nearly the whole of Switzerland, and the neighbouring provinces of France. They leave early in spring, and live sparingly during the summer; and they return home in autumn, where they have little to do during winter, excepting to fell wood in the forests and other chance work. The children leave the country at the same time in thousands to herd cattle in Suabia and Bavaria, and return with nearly the whole of their earnings. The women who remain, and the elder men, cultivate the land, and the girls and many of the young men weave, and are employed in manufactures. The chief town is Bregenz.

VORAU, a town of the Austrian states, in Styria, 61 m. S by W of Vienna. Pop. 600.

VORAY, a village of France, in the dep. of Haute-Saône, cant. and 7 m. S of Riez. Pop. 600.

VORDATE, an island of the Eastern seas, in S lat. 7° 50'; in the Timor-Laut group.

VORDE, a village of Prussian Westphalia, 21 m. S of Arensburg.

VORDEN, a village of Holland, in the prov. of Gelderland, 15 m. E by S of Zutphen.—Also a town of Hanover, 15 m. N by E of Osnabruck. Pop. 700.—Also a village of Prussian Westphalia, circle and 7 m. NW of Hoxter, on the Brucht. Pop. 750.

VORDENBERG, a town of the Austrian states, Upper Styria, 4 m. N of Leoben. It has iron-works.

VORDINGBORG, a port of Denmark, in the island of Ziealand, situated on a bay opposite to Falster, 53 m. SSW of Copenhagen.

VORDONI, a small town of the Morea, situated on the river Vasilipotamo, 7 m. S by E of Misitra.

VOREPPE, a town of France, dep. of Isère, on the river Roise, 9 m. NW of Grenoble. Pop. 1,300. It has manufactures of hats, leather, oil, and glass.

VOREY, a town of France, dep. of Haute-Loire, 11 m. NE of Le-Puy.

VORIA, a river of Russia, which rises near Jar, in the gov. of Smolensk, and flowing SSW joins the Ugra, after a course of 60 m.

VORMS, an island at the entrance of the gulf of Finland, in N. lat 59°, E long. 23° 12', to the E of Dago. It is 9 m. in length from E to W, and has a pop. of 1,000, chiefly of Swedish descent.

VORNHAGEN, a village in the principality and 1 m. S of Waldeck.

VORNY, a village of Russia, in the gov. and 150 m. NW of Vilna.

VORONA, a river of European Russia, which rises in the gov. of Penza, and joins the Kheper on the r. after a course of 200 m. It is navigable through the chief part of its course.

VORONEJ, or Voronza, a river of European Russia, which rises on the frontier of the gov. of

Tambov; runs W, past Lipetzk; and flows into the Don on the l., after a course of 250 m. It is connected by a canal with the Riasa, a tributary of the Oka, and runs into the Volga.

VORONEZ, or WOROZZSK, a prov. or gov. in the interior of European Russia, bounded on the N by the gov. of Tambov; on the NE by Saratov; on the E and SE by the country of the Don Cossacks; on the S by Ekaterinoslav; and on the W by Charkov and Kurak. Its area, equal to that of Scotland, is nearly 20,000 geog. sq. m. Pop. in 1851, 1,691,000. It has in general a good soil and climate. It is traversed by three navigable rivers, the Don, the Voronez, and the Donetz, besides a number of smaller streams. The chief objects of tillage are corn, flax, hemp, and, in a small degree, tobacco. Immense herds of cattle and sheep are also reared. Various kinds of fruit are raised, and water-melons. Manufactures are confined to woollens, linen, brandy, and hard-ware for home consumption. The gov. is administratively divided into 12 circles.

VORONIZ, the capital of the above government, situated in N lat. 51° 40' 30", 130 m. E of Kursk, on the r. bank of the river Voronez. Pop. 20,000. It is the see of an archbishop, and its principal buildings are the cathedral, the residence of the governor, and the public offices of the province. Here are a number of manufacturing establishments, for woollens, leather, soap, vitriol, and hardware, but each on a small scale. It also exports iron, sailcloth, oil, flour, wine, and lime. The trade of the place is carried on by the Voronej, on the banks of which a quay, with docks for barges, was built by Peter I.—Also a town in the gov. of Chernigov, 21 m. S of Novgorod-Sieverskoi.

VORONKI, a town of Russia, in the gov. of Poltava, 18 m. SW of Lohovitz.

VORONOV, a town of Russia in Europe, in the gov. of Grodno, district and 21 m. N of Lida.

VORONOVITZA, a town of Russia in Europe, in the gov. of Podolia, district and 27 m. NW of Bratslav.

VOROSPATAK. See VERESPATAK.

VOROSVAGAS. See CHERVENTEZA.

VOROSVAR, or EISENTHURN, a town of Hungary, in the comitat of Eisenburg, 18 m. SW of Guns, on the Pinka. Pop. 600.

VOROTYNSK, a town of Russian Europe, in the gov. of Kalouga, district and 12 m. from Peremyschl, on the Vissa. It is enclosed by an earthen rampart. Pop. 1,200.

VOROUX-GOREUX, a department and commune of Belgium, prov. and arrond. of Liège. Pop. 260.

VOROUX-LEZ-LIERS, a department and commune of Belgium, in the prov. and arrond. of Liège. Pop. 259. It has several oil and flour-mills.

VORRA, a village of Bavaria, in the circle of Upper Franconia, and presidial of Burgebrach, on the Ebrach. Pop. 214. It has a brewery.—Also a village in the circle of Middle Franconia, and presidial of Pegnitz. Pop. 450.

VORSBACH, a village of Prussia, in the regency of Cologne, and circle of Mülheim. Pop. 524.

VORSCHIEDT, a village of Prussia, in the regency and circle of Aachen. Pop. 932.

VORSEC, a village of Württemberg, in the circle of the Danube, and bail. of Ravensburg. Pop. 120.

VORSFELDE, a market-town of the duchy and 21 m. NE of Brunswick, district of Shoninger, and circle of Helmstadt, on the Aller. Pop. 1,448. It has several distilleries and tanneries. Tobacco, hops, and flax are cultivated in the vicinity.

VORSKLA, a river of Russia in Europe, which has its source in the gov. of Kharkov, to the NW of the town of that name, traverses the SE part of the

gov. of Poltova, passing Poltova and Kobiliaki, and after a course in a generally SW direction of about 150 m., joins the Dnieper on the l. bank, 36 m. below Kremenchoug.

VORSELAER, a department and commune of Belgium, in the prov. of Antwerp and arrond. of Turnhout, watered by the Aa.

VORST, a department and commune of Belgium, in the prov. of Antwerp, and arrond. of Turnhout, watered by the Beke and Laek. Pop. 1,818.—Also a village of Prussia, in the regency of Dusseldorf, and circle of Kempen. Pop. 1,208.—Also a village in the circle of Gladbach. Pop. 370.

VORST-HARDT, a village of Prussia, in the reg. of Dusseldorf, and circle of Gladbach. Pop. 370.

VORWALDE, a village of Hanover, in the principality of Osnabruck, and bail. of Wittlage-Hunteburg. Pop. 520.

VORWEIDEN, a village of Prussia, in the regency and circle of Aachen. Pop. 448.

VORWERK, a village of Austria, in Bohemia, in the regency of Böhmisch-Leipa, and bail. of Rumburg. Pop. 500.—Also a village of Prussia, in the regency of Königsberg, and circle of Mohrungen. Pop. 300.

VORWERK (NEU), a village of Prussia, in the regency of Breslau and circle of Ohlau. Pop. 350.—Also a village in the regency of Stettin, and circle of Demmin. Pop. 300.

VORWERK (GROSSE AND KLEIN), two villages of Prussia, in the regency of Leignitz and circle of Glogau. Pop. 520.

VORWOHLDE, a village of Brunswick, in the circle of Holzminden. Pop. 290.

VOSGES, or **WASSGAU**, a chain of mountains in the E of France, extending from N to S, in a line nearly parallel to the course of the Rhine, from Bale to Spire. It may be regarded as a continuation of the Jura mountains, for it begins on the SE, in the Ballon-d'Alsace, nearly where the latter end, and is separated from them only by a valley. The length of the main chain of the V., running from SSW to NNE, is about 180 m.; but a farther chain or range, called the Faucilles, extends westwards, traversing the dep. of the Vosges, and ending, near Sedan, in the hills and forest land of the Ardennes. The V. have in various parts an elevation of 4,000 or 5,000 ft., and are covered with snow during eight or nine months in the year. They form a natural barrier between France and Germany; and although Alsace, situated on the German side, has been a century and a half in the possession of France, the language of the country is still German. Great part of the V. mountains are covered with forests; and they contain copper, lead, salt, and coal. The Thure, the Techt, the Liepvrette, the Brucht, the Wissig, the Zorn, the two Zontzels, the Moselle, the Surbach, the Lauter, the Queich, the Speyerbach, the Elise, and the Sels, all rise on the E flank of the V. The W flank gives birth to the Meurthe, the Sarre, the Erbach, and the Lantern. The great rivers leading from the V. to the sea are the Meuse and the Moselle. The Ill forms the principal channel from them to the Rhine.

VOSGES, a department in the NE of France, formed of part of the old prov. of Lorraine, and bounded on the N by the depts. of Meuse and Moselle; on the E by Haut-Rhin and Bas-Rhin; on the S by Haute-Saône; and on the W by Haute-Marne. Its area is about 2,400 sq. m. Pop. in 1836, 897,987; in 1846, 427,894; in 1852, 427,409. The surface is rugged, consisting of mountains and forest-land, interspersed with valleys of greater or less extent. Several large rivers, amongst which are the Meuse, the Moselle, the Meurthe, and the

Saône, have their source in this dep. The smaller streams and mountain-torrents are numerous, as are the mineral waters, of which the best known are those of Plombières. The soil on the mountains is often stony; in the plains chalky and sandy. Oats, barley, rye, potatoes, flax, and hemp are raised; in the more fertile tracts, wheat, and in situations of favourable exposure, vines. The rearing of cattle and sheep forms the principal employment. The mineral products are iron, lead, copper, and, in a few situations, silver, marble, and potter's-earth. The cap. is the small town of Epinal. The pop., chiefly agriculturists, is far from dense, and would be still less, did not the iron-mines afford work to a number of hands. The cheapness of provisions, and consequently of labour, has led to the introduction of linen manufactures, and cotton cloth, the spinning of yarn, the making of lace, and likewise the manufacture of steel and iron goods. These articles furnish, along with cattle, butter, cheese, paper, leather, glass, earthen-ware, and timber, the chief exports of the dep.

VOSKOPOLIE, a town of Turkey in Europe, in the sanj. and 86 m. SSW of Okhrida.

VOSKRESENSK, a town of Russia in Europe, in the gov. and 36 m. WNW of Moscow, and district of Zvenigorod, on the l. bank of the Istra. Pop. 1,000. It was originally a village which was purchased by the patriarch Nikon, for the monastery of New Jerusalem, founded by him in the locality in 1656, on the plan of the Holy Sepulchre in Jerusalem.

VOSKRESENSKAIA, a town of Russia in Europe, in the gov. of Orenburg, district and 105 m. E of Tcheliabinsk, on the l. bank of the Mias. Pop. 1,000.

VOSNACKEN, a village of Prussia, in the reg. of Dusseldorf, and circle of Elberfeld. Pop. 360.

VOSNES, a commune of France, in the dep. of the Côte-d'Or, and cant. of Nuits. Pop. 501. It is noted for its wine.

VOSPORSKOI-PROLIO. See **YENIKALE**.

VOSSELAER, a department and commune of Belgium, in the prov. of Antwerp, and arrond. of Turnhout. Pop. 750.

VOSSELAERE, a department and commune of Belgium, in the prov. of East Flanders. Pop. 944. It has manufactures of linen.

VOSSEM, a department and commune of Belgium, in the prov. of Brabant, and arrond. of Louvain, watered by the Voer. Pop. 878.

VOSSENACK, a village of Prussia, in the regency of Aachen, and circle of Montjoie. Pop. 654.

VOSSEVANGEN, a parish of Norway, in the diocese of Bergen, and bail. of Southern Bergenshuus. Pop. 6,000.

VOSTITZA, or **BOSTITZA**, a town and port of Greece, capital of the deme of the same name, N coast of the diocese of Achaia, on the gulf of Lepanto, and 20 m. E of Patras. Pop. 2,500. It has a custom-house, and carries on an active trade in cheese, grapes, silk, brandy, wine, cochineal, and gum. This town occupies the site of the ancient *Ægium*, of which some traces still remain.

VOSTZBERG, a village of Prussia, in the regency of Stettin, and circle of Saatrig. Pop. 530.

VOSTZWINKEL, a village of Prussia, in the regency and circle of Arnberg. Pop. 480.

VOSTROI-KAMEN, one of the principal summits of the Ural chain in Russia, gov. of Perm.

VOTIAKS, a half-civilized tribe of Finnish descent, who are scattered through the Russian provs. of Viatska, Orenburg, and Kazan, or that part of Russia in Europe which adjoins Russia in Asia. They take the names of Udi and Mordl, and are said to have preserved in a great measure their original language, as well as their former distinction into tribes. By the Slaves, they

are called Votes; and by the Tartars, Ara. Their number is considerable, being computed at 30,000 in the gov. of Orenburg, and 60,000 in that of Viatska. They are cultivators of the soil.

VOTKA, a town of Russia in Europe, in the gov. of Viatska, and district of Sarapoul, on the Ij. Pop. 10,000. It has an imperial manufactory of arms of great extent, an arsenal, provision magazines, an hospital, a prison, and a school.

VOTTAN, or BIRROW, a town of Moravia, in the circle and 17 m. WSW of Znaym, on the Zelitawa, near its confluence with the Thaya. Pop. 300.

VOTTEM, a department and commune of Belgium, in the prov. and arrond. of Liege. Pop. 1,675. It has a forge, a manufactory of arms, and several coal-mines.

VOUGA, a river of Portugal, in the prov. of Beira, which has its source in the Serra-de-Arad; runs E; joins the Ovar, and forms a small lake, and after a total course of about 99 m. throws itself into the Atlantic below Aveiro, of which it forms the port, and 48 m. from the embouchure of the Douro.

VOUGAY (SAINT), a commune of France, in the dep. of the Finistere, and cant. of Plouzevede. Pop. 1,255.

VOUGEOT, a commune of France, in the dep. of the Côte-d'Or, and cant. of Nuits, 11 m. SSW of Dijon. Pop. 263. It is noted for its wine.

VOUGY, a commune of France, in the dep. of the Loire, and cant. of Charlien, near the r. bank of the Loire. Pop. 1,911.

VOUGA. See Vig.

VOUIHA, a district in the SW part of the island of Paou, in the Viti archipelago. It is noted for its sandal-wood.

VOUILLE, a commune of France, in the dep. of the Deux-Sevres, cant. and 5 m. N of Praheocq. Pop. 1,895.—Also a canton and com. in the dep. of the Vienne, and arrond. of Poitiers. The cant. comprises 11 com. Pop. in 1831, 11,657; in 1846, 3,110. The village is 11 m. WNW of Poitiers, near the r. bank of the Anzance. Pop. 1,435. The locality is noted for a battle between Clovis and Alaric in 507.

VOUILLE-LES-MARAIS, a commune of France, dep. of the Vendee, and cant. of Chaille-les-Maraix, 11 m. SW of Fontenay-le-Comte. Pop. 1,517.

VOUILLON, a village of France, in the dep. of the Indre, cant. and 11 m. SW of Issoudun. Pop. 450. In its vicinity is an iron-mine.

VOUIMARA, a town of Madagascar, in the Betainsinares territory, to the S of Foulpoint.

VOUISE, a river of France, in the dep. of the Creuse, which has its source a little to the NW of Chénérailles, passes Gouzou, and after a course of 21 m. throws itself into the Tardes, on the l. bank, at Chambon.

VOUJAUCOURT, a commune of France, in the dep. of the Doubs, and cant. of Audincourt, 4 m. SW of Montbéliard, near the l. bank of the Doubs. Pop. 525. It has a large harbour, communicating with the junction canal of the Rhône and Rhine, and carries on an active trade in wood and other mountain productions.

VOULAINE, a village of France, in the dep. of the Côte-d'Or, and cant. of Recey, 11 m. SE of Châtillon-sur-Seine, near the r. bank of the Ource. Pop. 715. It has two forges and a blast-furnace.

VOULE, a small island of the gulf of Finland, near the N coast of Esthonia, in Russia in Europe, near Revel, in N lat. 59° 34', and E long. 24° 43'. It is inhabited by Swedes, who employ themselves in agriculture.

VOULLEDJ, a town of Arabia, in Yemen, 60 m. NE of Hodeida.

VOULOUN-VILON, a lofty summit of Madagascar, in the central chain of the island.

VOULPAIX, a village of France, in the dep. of the Ain, cant. and 4 m. W of Vervins. Pop. 1,050.

VOULTE (LA), a canton, commune, and town of France, in the dep. of the Ardeche, and arrond. of Privas. The cant. comprises 11 com. Pop. in 1831, 11,670; in 1846, 12,353. The town is 11 m. ENE of Privas, on the r. bank of the Rhone, at an alt. of 893 yds. above sea-level. Pop. in 1846, 3,155. It is commanded by an old castle. It has a consistorial Calvinist church, and possesses several forges, blast-furnaces and founderies. The vine and mulberry are cultivated, and large numbers of pigs are reared in the environs.

VOULX, a commune of France, in the dep. of the Seine-et-Marne, cant. and 5 m. NE of Lorette-Bocage. Pop. 1,170.

VOUNEUIL-SOUS-BIARD, a village of France, in the dep. of the Vienne, cant. and 4 m. SW of Poitiers. Pop. 700.

VOUNEUIL-SUR-VIENNE, a canton and commune of France, in the dep. of the Vienne, and arrond. of Poitiers. The cant. comprises 8 com. Pop. in 1831, 8,276; in 1846, 8,737. The village is 15 m. NE of Poitiers, on the l. bank of the Vienne. Pop. 1,326.

VOURCANO, a mountain of Greece, in the Moraea, in Messenia, near the r. bank of the Piraxia, connected on the WSW with Mount Elias.

VOUREY, a village of France, in the dep. of the Isere, cant. and 3 m. S of Rives. Pop. 1,050.

VOURLA, or DURLAK, a town of Turkey in Asia, in Anatolia, in the sanj. of Saghala, 24 m. WSW of Smyrna, and about 3 m. S of the gulf of Smyrna, on which it has a port. A little to the N of V. is supposed to be the site of the ancient Clazomenae.

VOURLES, a village of France, in the dep. of the Rhône, and cant. of St. Genis-Laval. Pop. 930.

VOUSINSK, a mountain of Turkey in Europe, in the N part of Bosnia, between Bosna on the E, and Okrina on the W, and between Dobor and Derbent.

VOUSSAC, a village of France, in the dep. of the Allier, and cant. of Chautel-le-Chateau. Pop. 1,100.

VOUTE (LA), a canton and v. of France, in the dep. of Ardeche, arrond. and 9 m. ENE of Privas, on the r. bank of the Rhine. Pop. 1,500.—Also a v. of France, in the dep. of Hérault, cant. and 3 m. NE of Olargues. Pop. 1,200.

VOUTENAY, a village of France, in the dep. of Yonne, cant. of Vezelay, 8 m. NW of Avallon, near the Cure. A bloody engagement was fought here in 842, in which Lothaire, son of Louis-le-Debonnaire, was defeated by his two brothers.

VOUTE-SUR-ALLIER (LA), a village of France, in the dep. of Haute-Loire, 9 m. S of Brioude.

VOUTEZAC, a town of France, in the dep. of Correze, cant. of Jaillac, 10 m. NNW of Brives-la-Gaillarde. Pop. 2,200.

VOUTOIRY, a small river of France, which rises to the SE of Saint-Michel-de-Vesce, and flows into the Creuse, on the l. bank, at Chave, after a course of 9 m.

VOUTRE', a village of France, in the dep. of Mayenne, cant. and 6 m. SE of Evron.

VOUVANT, a village of France, in the dep. of La Vendee, cant. of La Chataignerie, 9 m. SSW of Fontenay-le-Comte. Pop. 500. Coal is wrought in the vicinity.

VOUVRAY-SUR-LOIRE, a canton and town of France, in the dep. of Indre-et-Loire, 9 m. W of Amboise, at the confluence of the Gize and the Loire. Pop. 2,500.

VOUZAILLES, a village of France, in the dep. of Vienne, cant. and 7 m. SW of Mirebeau.

VOUZIERES, an arrondissement, canton, and town

of France, in the dep. of Ardennes.—The arrond., comprising 8 cant., has an area of 140,101 hectares, with a pop. in 1846 of 42,374.—The cant. had a pop. of 9,744.—The town is situated on the l. bank of the Aisne, 27 m. S of Mesieres. It has a traffic in grain, wine, and iron. Pop. in 1881, 2,008; in 1846, 2,771.

VOUZON, a commune and v. of France, dep. of Loir-et-Cher, 27 m. NE of Romorantin. Pop. 1,300.

VOVES, a canton and v. of France, in the dep. of Eure-et-Loire, 15 m. SSE of Chartres. Pop. 1,200.

VOWCHURCH, a parish of Herefordshire, 10 m. WSW of Hereford. Area 2,690 acres. Pop. in 1841, 355; in 1851, 823.

VOY-DE-PONAS (SAINT), a canton and v. of France, in the dep. of Haute-Loire, cant. and 6 m. SSW of Tenac. Pop. 2,400.

VRACAS, an island of the Pacific, in the N part of the Marianne archipelago, in N lat. 20° 45'.

VRACHIE, a town of Belgium, in the prov. of E. Flanders, arrond. and 12 m. N of Dendermonde. Pop. 5,600. It is a well-built place, with dye-works, and active factories, and a considerable trade in agricultural produce.

VRACHORI, town of Greece, 24 m. NW of Lepanto, 5 m. NW of a lake of the same name, about 5 m. in length, and 4 m. in breadth, the *Trichonis* of the ancients.

VRAIN (SAINT), a commune and v. of France, in the dep. of Nièvre, cant. and 4 m. SSW of Saint Amand. Pop. 800.

VRATTA, a river of the Sardinian states, which rises on the E flank of the Maritime Alps, and flows E, and then NE to the Po, into which it falls, on the r. bank, after a course of 60 m.

VRANA, a town of Austria, in Dalmatia, in the circle and 15 m. SE of Zara, on the N bank of the lake of that name. It has the ruins of a fortress destroyed by the Venetians, and was the residence of the Grand-master of the Templars.—Also a village of Greece, in Livadia, near the plain of Marathon, and 21 m. NE of Athens. It appears to occupy the place by which the l. flank of the Athenians was covered in the battle of Marathon.

VRANA, VIVARINA, or IVARINA, a town of Turkey in Europe, in Rumelia, in the sanj. and 48 m. WNW of Ghinstendil, on a small river of the same name, an affluent of the Morava. Pop. 3,000. It has extensive manufactories of arms, and in the vicinity are the celebrated iron mines of Olasina.

VRANCOURT, a village of France, in the dep. of the Pas-de-Calais, and cant. of Croisilles, and com. of Vaulx-Vrancourt. Pop. 1,715.

VRANDOUK, a small town of Turkey in Europe, in Bosnia, in the sanj. and 17 m. NE of Trawniki, on the l. bank of the Bosna. It is circular in outline, and enclosed by a wall, which still exhibits the breaches made by the Turks in taking the town. It is commanded by a fortified tower. The environs are populous, and well-cultivated.

VRANGEL, or VRAANG, two islands of the gulf of Finland, distinguished as Great and Little, belonging to the Russian gov. of Esthonia, and to the NE of Revel. The larger is in 59° 37' N lat., and 24° 57' E long. They are both inhabited by Swedes, who employ themselves in rearing cattle, and in fishing.

VRANJA, a mountain of Turkey in Europe, in Bosnia, 12 m. S of Trawniki. It belongs to one of the N branches of the Dinaric Alps.

VRANOGRAKH, a fortress of Turkey in Europe, in Bosnia, in the sanj. of Croatia, 72 m. WNW of Bagaluka, and near the Austrian frontier.

VRASSELT, a village of Prussia, in the regency of Düsseldorf and circle of Rees. Pop. 408.

VRATZA, a market-town of Turkey in Europe, in Bulgaria, in the sanj. of Sophia, and near the confines of that of Widden, on the r. bank of the Insika, and 21 m. ESE of Berkovatz.

VRECOURT, a commune of France, in the dep. of the Vosges, and cant. of Bulguéville, 14 m. from Neufchâteau, on the Mouzon, which is here crossed by a fine bridge. Pop. 981. It has several cotton factories, tanneries, and blast furnaces.

VREDEN, a town of Prussia, in the regency of Münster, circle and 9 m. SW of Ahaus, on the Berkel. Pop. 2,920. It has manufactories of linen, and cloth, and of chicory.

VREES, a village of Hanover, principality of Osnabrück, bail. of Ahrenberg-Meppen. Pop. 420.

VREESWIJK, a village of Holland, in the prov. and to the S of Utrecht, on the Leek. Pop. 800.

VREM, a market-town of Austria, in Illyria, in the gov. of Laibach, circle and 14 m. S of Adelsberg, on the Reka.

VRENDE, a department and commune of Belgium, in the prov. of Brabant and arrond. of Antwerp. Pop. 750.

VRESSE, a department and commune of Belgium, in the prov. of Namur and arrond. of Dinant, watered by the Somoi. Pop. 126.

VRETA, a parish of Sweden, in the prefecture of Linköping and haerad of Gullberg.

VRETOT (LA), a commune of France, in the dep. of the Manche, and cant. of Briquebec, on the l. bank of the Scie. Pop. 1,216.

VREXEN, a village of the principality of Waldeck, and bail. of Diemel, on a river of that name, at the confluence of the Urbe, 8 m. N of Rhoden. It has a paper-mill.

VRIES, a village of Holland, in the prov. of Drenthe, to the N of Assen. Pop. 1,759.

VRIES STRAIT, a channel of the Kurile islands, between those of Iturup and Urup.—On the NE coast of the former island is Cape Vries.

VRIESEVEEN, a village of Holland, prov. of Ober-Yssel, cant. and 5 m. N of Almelo. Pop. 2,893.

VRIESLAND. See FRIESLAND.

VRIGNE-AUX-BOIS, a commune of France, in the dep. of the Ardennes, cant. and 5 m. NW of Sedan, on the Vrigne. Pop. 1,115. It has extensive iron-works, and manufactories of iron-ware.

VRIN, a river of France, in the dep. of the Yonne, which has its source to the SE of Fourolles; runs N; and after a course of 21 m., throws itself into the Yonne, on the l. bank, at Cery, and 4 m. WNW of Joigny.—Also a village of Switzerland, in the cant. of the Grisons, and bail. of Glenner, in the Lugnetz-thal. Pop. 520.

VRITZ, a village of France, in the dep. of the Loire-Inferieure, and cant. of St. Mars-de-la-Jaille. Pop. 1,900.

VRÖENHOVEN, a department and com. of Belgium, in the prov. of Limburg, and arrond. of Tongres. Pop. 1,314.

VROI, an island of Denmark, near the N coast of that of Seeland.

VRON, a commune of France, in the dep. of the Somme, and cant. of Rue, 21 m. NW of Abbeville. Pop. 1,370. It has manufactories of porcelain.

VSELIQUB, a town of Russia in Europe, in the gov. of Grodno, district and 9 m. N of Novogrodek.

VUACHE (MONTAGNE DA), or DES VACHES, a mountain of Sardinia, in the W part of the div. of Savoy, and to the SE of Fort-de-l'Ecluse, which, from the similarity of geological structure, appears to have formed part of the Jura chain previous to its separation by the Rhone. It runs from NW to SE, a distance of 8 m., and rises at the central point to the height of 800 metres above the level of the Rhone.

It is almost entirely covered with wood, in which bears and wild boars are frequently to be met with.

VUADENS, a village of Switzerland, in the cant. of Freiburg, and bail. of Greierz. Pop. 948.

VUARRENS, a village of Switzerland, in the cant. of Vaud, district and 5 m. N of Echallens, and 12 m. N of Lausanne. Pop. 520.

VUCHERENS, a village of Switzerland, in the cant. of Vaud, and bail. of Milden. Pop. 458.

VUCHIN, or **MASIN**, a town of Civil Slavonia, in the comitat and 17 m. SSE of Verovitz, on the Vuchinszka, an affluent of the Karaschitzka.

VUCHT, a department and commune of Belgium, in the prov. of Limburg, and arrond. of Tongres, on the Maas. Pop. 391.

VUE, a commune of France, in the dep. of the Loire-Inferieure, and cant. of Le Pellerin, 11 m. SE of Palmbeuf. Pop. 1,235.

VUERSTEIN, a village of Austria, in Styria, and circle of Celli. Pop. 400.

VUFFLENS-LA-VILLE, a village of Switzerland, in the cant. of Vaud, and bail. of Cossonay. Pop. 315.

VUFFLENS-LE-CHATEAU, a village of Switzerland, in the cant. of Vaud, and bail. of Mordec. Pop. 247.

VUFLLENS, a village of Switzerland, in the cant. of Vaud, bail. of Sron. Pop. 461.

WAHRLANG, a village of Prussia, in the regency of Koelin, and circle of Neustettin. Pop. 240.—Also a village in the regency of Stettin, and circle of Uckerunde. Pop. 320.

WAHRSOM, a village of Mecklenburg-Strelitz and circle of Ratzburg. Pop. 200.

WAHSALCH, a range of mountains in Utah Territory, U. S., extending in a SSW direction from the Green river range of the Rocky mountains, to the Sierra Nevada range of California.

WAIBLINGEN, a town of Würtemberg, capital of a bail. of the circle of the Neckar, 8 m. NE of Stuttgart, on the l. bank of the Rems. Pop. 3,131. It has manufactories of cloth, tanneries, and extensive tile-kilns. This town is of great antiquity, and is said to have been the birthplace of the emperor Frederick Barbarousse. From this town also the Hohenstaufen party received the name of Webelingen or Ghibelins. Pop. of bail., 27,947.

WAIBSTADT, a town of Baden, in the circle of the Lower Rhine, and bail. of Neckar-Bischofsheim, on the Rodenbache. Pop. 1,874.

WAIDERSFELDEN, a town of Upper Austria, 12 m. E of Freystadt.

WAIDHOFEN (BAYERISCH), a town of Lower Austria, on the l. bank of the Ips, 72 m. W by S of Vienna. Pop. 3,500. It is noted for its manufactures of hardware.

WAIDHOFEN (BOHEMISCH), a town of Lower Austria, on the river Thaya, 65 m. WNW of Vienna. Pop. 1,400. It has manufactures of linen and tape.

WAIGIOU, or **WARGEOU**, an island of the S. Pacific, to the NW of New Guinea, the SE point of which is placed by Raper in S lat. 0° 21', E long. 131° 18'. It is 70 m. in length from E to W, and 20 m. in breadth. It is inhabited by Malays, Alforas, and Papuans.

WAIHOU, a river of the North island of New Zealand, which runs SSE, and flows into the ocean in S lat. 42° 41'.

WAIKATO, a river of the N. island of New Zealand, which rises in Lake Taupo; flows N, NW, and W; and enters a narrow channel on the W coast, 30 m. S of Manukas, after a total course of 140 m., of which 100 m. are navigable by vessels of 30 tons.

WAIMATE, a settlement on the W coast of the North island of New Zealand, 15 m. W of the Bay-of-Islands.

WAINFLEET, a town of Lincolnshire, situated on a creek at the E part of the county, 4 m. above its entrance into the Wash, 14 m. NNE of Boston. The creek is navigable for vessels of small burden. The town is neat and well-built. Pop. in 1841, 2,117; in 1851, 2,255.

WAINGAROA, a harbour on the W coast of the North island of New Zealand, in S lat. 35°, consisting of a long inlet into which two rivers empty themselves.

WAIKAPA POINT, a headland on the E coast of the Middle island of New Zealand, in 42° 9' S lat.

WAIKAPAPA POINT, a headland on the S coast of the Middle island of New Zealand, in N lat. 46° 40'. E long. 168° 54'.

WAIKARA, a river of the Middle island of New Zealand, which rises in the Snowy Alps, and flows ENE into Cloudy bay, in S lat. 42° 30'. Its chief tributary is the Waipai, which joins it on the r. bank a little above its embouchure.

WAIKARA, a river of the North island of New Zealand, which flows into Kaipara harbour.

WAIKANGI, a river of the Middle island of New Zealand, which flows into a considerable estuary on the E coast, in S lat. 44° 38'.

WAIKANGI BAY, a deep bay on the W coast of Chatham island, in S lat. 43° 58', W long. 176° 58'. It presents good anchorage in 5 faths., and on firm sand.

WAIKING, a parish of Lincolnshire, 7 m. SSE of Great Grimsby. Area 780 acres. Pop. in 1841, 49.

WAIKINGFIELD, a township of Washington co., Vermont, U. S., 18 m. SW of Montpelier. Pop. in 1840, 1,048.

WAIKING RIVER, a river of Vermont, U. S., which runs into the Connecticut, 12 m. below Well's river.

WAIKING, or **WACK**, a town of Hungary, beautifully situated on a bend of the Danube, 19 m. N of Pest, and 95 m. E of Presburg, in N lat. 47° 47'. It is a place of antiquity, having been a bishop's see in 1074. It is tolerably built, and contains a square of some extent. The public structures are a cathedral, several Catholic, and a Protestant church, a government-house, an episcopal seminary, and a Piarist college, and a military school.

WAIKINGKIRCHEN, a town of Upper Austria, 19 m. W of Linz.

WAIKIDA, a village of Tlemcen, in Algiers, 25 m. SW of Tlemcen.

WAIKORA, a village of Kaarta, in Central Africa, in N lat. 14° 48'.

WAKAMBA, a territory of Central Africa, lying between the Kiskambutia mountains and the Kilimandjaro chain, and intersected by the river Adi. It is inhabited by a people of comparatively fair complexion, who have commercial intercourse with Kaffa and Enarea.

WAKASASA BAY, a bay on the SW coast of Florida, which receives several rivers, and contains a number of islands.

WAKASP, a river of the Middle island of New Zealand, which flows into False bay, on the W coast, in S lat. 44° 20', E long. 168° 24'.

WAKATOMIKA, a river of Ohio, U. S., which runs SE, and joins the Muskingum, 13 m. above Zanesville.

WAKE, a central co. of the state of N. Carolina, U. S., comprising an area of 1,018 sq. m., drained by Neuse river and its branches, and intersected by North Carolina Central, and Gaston and Raleigh railways. Pop. in 1840, 21,118; in 1850, 24,887. Its capital is Raleigh.

WAKEFIELD, a parish and a municipal and parl. borough, in the wapentake of Agbrigg, W. R. of Yorkshire. The p. contains the town of W., the chapelries of Horbury and Stanley, and the townships of Alverthorpe, Thorne, Wakefield, and Wrenthorpe; and is intersected by the Manchester and Leeds railway, which is here carried over the Calder at Broadreach by a viaduct of three arches, each 63 ft. 7 ins. on the skew. The North Midland railway, from Derby to Leeds, joins the Manchester and Leeds line a little to the east of Wakefield. Area of p. 9,311 acres. Pop. of p. in 1801, 16,597; in 1831, 24,538; in 1851, 33,117. The church, origi-

nally erected in 1329, is in a mixed style of architecture, 156 ft. in length by 69 ft. in breadth; with a square embattled tower, and an octagonal spire 237 ft. in height. The interior consists of a nave and aisles, divided by pointed arches. The township of W. comprises the greater part of the town: on the SW side of the township, the buildings of the town advance, in a continuous street, into the neighbouring agricultural township of Alverthorpe. The town—which in many respects may be considered the capital of the West Riding—is situated on the N or E bank of the Calder, on a sloping eminence, nearly in the centre of the parish. It is built with considerable regularity, and contains many large and lofty houses chiefly of brick. In Wood-street is a handsome structure, containing a library and news-room, with rooms for concerts and assemblies. The market-place is not of great extent; but a handsome corn-exchange, with a saloon over it, was erected in Westgate in 1838. The river is here crossed by a stone-bridge of eight arches, erected in the reign of Edward III. In the centre of the bridge, projecting over the eastern side, and partly resting on the starlings, is a chapel, which is commonly supposed to have been erected by Edward IV. on the site of a more ancient building. It is a beautiful structure, about 30 ft. long by 18 ft. broad. The court-house is a very elegant edifice, with a Doric portico. The house-of-correction for the West riding, is an extensive structure at the bottom of Westgate. The new gaol, a grand massive imposing building, is the largest prison in England, accommodating on the separate system, 732 prisoners. It stands on about 14 acres of ground, and cost £120,000. The Reform act conferred the privilege on W. of returning one member to parliament. The East moor, the village of Thorne, and parts of the townships of Alverthorpe and Stanley, are included within the boundaries of the parl. borough, of which the pop. in 1851 was returned at 22,067. The number of electors registered in 1837 was 733; in 1852, 850. W. is also a polling-station in the election of members for the West riding.—W. was formerly celebrated for its manufactures of woollen cloth and worsted yarn, but both these, though still considerable, have greatly declined. There are dyeing works, breweries, foundries, and starch works in the town. The chief trade now consists in the export of corn, coal, and wool. The wool is sent to factors in this town for sale from various parts of England. The coals are sent down the Calder, and thence by the Ouse to York, and by the Humber to Hull. The corn market is the most important in the north of England. The river was rendered navigable to W. in 1698; and in 1760 the navigation was extended to Salter-Hebble near Halifax. The town is, by railway, distant from Leeds 12½ m.; from Manchester 57½ m. It is supposed that a town existed on the site of W. in the time of the Romans. A battle was fought here on the 24th of December, 1460, between the princess Margaret of Anjou, wife of Henry VI., and Richard, duke of York, in which the latter was defeated and slain, with upwards of 8,000 Yorkists. During the Parliamentary wars W. suffered severely, having been alternately in the hands of the royalist and parliamentary parties.

WAKEFIELD, a township in Carroll co., New Hampshire, U. S., 46 m. NE of Concord. Pop. in 1840, 1,396; in 1850, 1,405.—Also a village of Kingston township, in the state of Washington, Rhode island, 11 m. WSW of Newport.

WAKEFIELD (PORT), a village and port of S. Australia, on the gulf of St. Vincent. It is a shipping-place for the adjacent northern districts, and

especially for the export of the London copper-smelting company. The tonnage at Port W., in 1851, was in excess of 20,000 tons.

WAKEMAN, a township of Huron co., in the state of Ohio, U. S., 89 m. NNE of Columbus, and intersected by the Toledo, Norwalk, and Cleveland railroad. Pop. in 1840, 702; in 1850, 704.

WAKENDORF, a village of Denmark, in the duchy of Holstein, and bail. of Georgerthal. Pop. 200.—Also a village of the bail. of Segeberg. Pop. 480.—Also a village of the bail. of Traventhal. Pop. 240.

WAKENETZ, a river which issues from the N extremity of Lake Ratzeburg, on the confines of the Dutch territory of Lauenburg, and territory of Lubeck; enters the latter; runs NNW; and after a course of 12 m., throws itself into the Trave, on the r. bank, at Lubeck.

WAKERING (Great), a parish in Essex, stretching along the coast, at the mouth of the Thames. The v. is 5 m. SE of Rochford. Area of p., 5,484 acres. Pop. in 1831, 834; in 1851, 905.

WAKERING (Little), a parish in Essex, 4 m. E by N of Prittlewell. Area 5,862 acres. Pop. in 1831, 297; in 1851, 292.

WAKERLEY, a parish in Northamptonshire, 8 m. NE of Rockingham. Area 2,180 acres. Pop. in 1831, 218; in 1851, 232.

WAKRU, a village of the district of Martaban, on a small river of the same name, about 10 m. E of Amherst. It is said to have formerly been a place of importance, and is still a valuable outpost.

WAKULLA, a county in the N part of the state of Florida, U. S., comprising an area of 492 sq. m., drained by branches of Ocktockany river, and generally fertile. Pop. in 1850, 1,955. Its capital is Newport.

WALACHIA, or **WALLACHIA** [Germ. *Walachei*; French, *Valachie*], a northern principality of European Turkey, which derives its name from its inhabitants, the *Vlaques* or *Wallachians*. The Turks call it *Eflak*; the Walachians, *ZARA-RUMANASKA*, and themselves *RUMUNI* or *ROMANS*. It lies between the parallels of 43° 40' and 45° 40' N; and is bounded on the NW by the Austrian principality of Transylvania; on the NE by Moldavia; on the SE by the sanjak of Silistria; on the S by the sanjak of Nicopol; on the SW by the sanjak of Widin; and on the W by the military frontiers of Hungary. Hassel and Balbi estimate the superficial extent at 25,231 sq. m.; Ritter at 25,310, and Sulzar at 29,767 sq. m. It is surrounded on the W and NW by high mountains belonging to the Carpathian system, which separate the country from Austria. The advanced ridges of these heights extend into the country on the W, as far as to the banks of the Danube; on the E side they form a narrow ridge. The rest of the surface is an extensive plain, through which large rivers, descending from the Carpathian range, flow slowly towards the Danube. This plain is diversified by some forests; but is scarcely broken by a single eminence. Thornton describes the appearance of both principalities in rapturous terms: the fertility of the soil,—the torrents rushing down the precipices and winding through the valleys,—the fragrance of the lime-flower, and of the herbs crushed by the browsing flocks,—the solitary huts of the shepherd on the brow of the mountains,—the mountains themselves rising far above the clouds with their snow-clad summits, and beneath adorned with lofty and majestic trees,—all constitute ever-present elements of beauty in the landscape. Many of the mountain summits are composed of gneiss and mica-schist. There are five important passes between W. and Transylvania. The Danube is the

principal river; its main tributaries are the Schyl, the Aluta, the Arjish, the Dumbrovitz, and the Jalomnita. "These rivers," says Mr. O'Brien, "could, at a small comparative expense, be made navigable for the passage of rafts. The mountains in which they have their source are covered to their summits with magnificent forests. At the base of the mountains are oaks, midway up are beech-trees, and above these are pines of extraordinary height and girth. All this wealth of wood lies utterly useless, and trees and branches blown down by the storm rot where they fall for want of the means of transport. In the Moldavian parts of the Carpathians, the case, however, is not exactly the same. The river Sereth, which separates the two principalities, is larger and deeper than the rivers flowing through W., and its waters are consequently covered during the season with immense rafts of wood, consisting chiefly of oak and pine, both of which are good in building and masting ships." There are no lakes of any considerable size, but numerous ponds and marshes.—The climate is temperate, though not so mild as on the S side of the Balkan; the Danube occasionally freezes, and winter, commencing in November, lasts till March. The spring is rainy. During three months the heat of summer is very great, and thunder-storms are frequent. Autumn is the finest season of the year. Earthquakes sometimes occur; in 1802 the city of Bucharest was nearly destroyed by one. The nights are cold and attended with copious dews. In general the air is healthy; but in the mountain districts goitre is occasionally seen. Bilious fevers and agues are common but not dangerous.

Soil and Productions. The soil is productive in the valleys between the mountains; and of luxurious fertility in the plains. It is, however, very indifferently cultivated, the inhabitants generally preferring the life of herdsmen to the occupations of the agriculturist. The possessors of land all reside in Bucharest, and care nothing about their property or the people who cultivate it, so long as the rents are regularly paid. The farmers usually occupy much smaller pieces of ground than in England, and seldom get rich; indeed, they are rather serfs than farmers. The arrangement between them and the landlords is made at stated periods of five years, fixed by government. If the farmer does not like his landlord, he must give one year's notice that he is going to leave his village, and under no circumstances can he leave it except at the expiration of one of these quinquennial periods. He is forced to cultivate ground somewhere, and consequently the cultivators are nearly tied to the soil, as every obstacle is thrown in the way of their changing landlords. The rent is paid partly in kind, partly in money, and partly in labour. The landlord gets the tenth part of all corn which is grown, and the corn may not be removed until he has taken his share. The people appear very poor, much more so than the Bulgarian pop. on the S of the Danube, under the Mussulman government. The latter grow rich frequently in spite of the oppression they may be sometimes individually subjected to, and their cottages and the furniture and cooking utensils are always much better than those of the corresponding class in W. Mr. O'Brien, in his recent account of this country, says of its resources: "There is certainly not in Europe a soil more rich, and scarcely a climate more favoured than that of W. The country is literally overflowing with grain of every sort, and out of France I have never drank a *vin ordinaire* as good as in this country. The common white wine of W., when kept for two or three years in bottle, is equal to anything of the kind produced on

the banks of the Rhine. The rich meadow-lands afford pasturage to numberless herds of cattle and flocks of sheep, whilst in the neighbourhood of the forests there are immense herds of swine. It is on account of this great abundance of meat of all kinds, that Mr. Goldner's successors have established themselves in the neighbourhood of Galatz, and that another English establishment largely engaged in the pork trade has been formed at Kalafat. The proprietors of both these establishments find, that notwithstanding the high wages they are forced to give their English workmen, and the expenses of transport, they can sell their merchandise cheaper in England than if they purchased the materials for their trade in any of the markets of Great Britain or of Ireland. Game of almost all kinds abound in W. Wild turkeys are met with in hundreds in the steppes or great open plains. Hares were sold until lately in the market of Bucharest at 4d. each, and a brace of blackcock at about the same price. There is also an abundance of fish in the inland rivers, and some of it of very exquisite flavour." Turkish corn is the grain most extensively cultivated; but a good deal of excellent wheat also is raised and exported; melons form a principal article of food, and fruit is excellent and abundant. Wine might be extensively manufactured in this country if the people were industrious. The principal wine districts are Dragishan, Cemez, Greca, and Lacuisni. There are extensive forests, which are peopled with flocks of singing-birds, particularly nightingales. The pastures are good, and support a number of cattle. The native oxen are all white, small, thin, and long-haired. The horses are small, but swift and strong. The wool is excellent, the number of sheep in the country exceeds 3,000,000. Upwards of 100,000 are yearly exported to Constantinople. There are three species of sheep fed in this country: the *sar-kam* with long and coarse wool; the *sigey* with short and fine wool; and the Tartarian breed with enormous tails and a middling fleece. Game, as already observed, is abundant; but the *bojards* or lords of the soil—as in more civilized countries—reserve to themselves the exclusive privilege of hunting. All the forests and fastnesses abound in wolves, bears, wild-boars, and deer. Bees are kept in great quantities, and leeches are exported. There are three mines of rock-salt in W. which yield 20,000,000 okas, of 2 lb 14 oz., annually. Gold occurs in the sands of several rivers. Mercury abounds in the vicinity of Piteshti. Iron occurs at Bara, Annua, and elsewhere. At Gesseni there are coal-mines. Good building-stone is scarce; chalk is abundant. There is little manufacturing industry. The common people make their own clothes and tools; the rich are supplied with articles of luxury from abroad.

Commerce.] The two principalities export annually nearly 4,000,000 hectolitres of grain. Notwithstanding the impediments at the mouth of the Sulina, and the difficulties laid in the way of trade at Braila, 1,128 ships were laden in 1851. British ships alone carried 345,000 hectolitres of grain, whilst 850,000 hectolitres were conveyed to England in foreign vessels. In 1852, upwards of 700 ships were laden at Galatz. The following is a recent estimate of the importations: Viennese and Transylvanian wares, 3,200,000f.; manufactures of Leipzig, 6,000,000f.; Russia, 360,000f.; the Levant, 4,600,000f.; British manufactured iron wares, 2,000,000f. From Vienna the principalities import cloth, shoes, gloves, carriages, musical instruments, and glass; from Transylvania, coarse linens and leather; from the Levant, colonial wares, coffee, sugar, tobacco, cotton twist, British and French manufactures, and British iron; from Russia, salt-fish and

furs; from England, iron, steel, machinery, and utensils; from France, silk cloths, perfumery, fashionable articles, and books. The commerce of the principalities is free from prohibition. The custom-house taxes hitherto amounted to 3 per cent. for both importation and exportation: they have lately been raised to 5 per cent. In 1847 the custom-houses were let out for the annual sum of 1,200,000f. To the Danube W. is indebted for the greater part of its commerce, and for the means of communicating both with the E and W. Vienna is not more than six days' distant from Giurgevo, and the Black sea not more than three. It is at once the channel through which W. disposes of the raw materials and the immense quantities of corn which have procured for her and Moldavia the designation of the granary of Europe, and through which W. receives the products of European art and industry. As yet, however, the Walachians take hardly any part in its navigation, which remains wholly in the hands of Austria, if we except the wretched flat-bottomed boats which bring a few necessities from Galatz to other points on the river, or transport the immense masses of salt, which form one of the principal items in Walachian commerce to Bulgaria, Hungary, and Servia. The steamboats of the Austrian Lloyd keep up a regular communication, in time of peace, between Vienna and Constantinople. Three stations in W. are established—Turnu-Severin, Giurgevo, and Ibraila, where they have agents, who are mostly Austrian consuls as well. On issuing from W. the Danube is divided into numerous branches, separated by islands of greater or less dimensions. The most remarkable of these meads are those of Kilia, St. George, and Sulina. In the old and golden days of the East, the Genoese had a factory at Kilia; but at this point the river has now dwindled into insignificance. The St. George mouth is accessible only to fishing-boats, and as regards Sulina, everybody knows how successfully Russia has managed to destroy it also, so as to drive the trade of this quarter into Odessa. In the best of times, this mouth required considerable care to keep it open, and a project was at one time set on foot to run a canal across, between Rassova and Kustendje, the expenses of which Austria offered to bear, so as to render the navigation independent of the shifting sands of the river.

Population, religion, &c.] Mr. Wilkinson, the English consul, estimated the total pop. of W. at only 1,000,000. Stein in 1826 estimated the pop. at 950,000. A census taken in 1853, returned the pop. at 2,324,484. The latter census returned the number of married priests at 5,454; deacons married, at 840; monks, 2,860; nuns, 2,050; titled boyards, whose nobility is not hereditary, 3,807; hereditary nobility (cultivators), living in the villages, 5,510; persons exempt from capitation for services rendered to the state, 509; persons holding privileges of various sorts for the same reason, 6,041; merchants holding patents or licenses to trade, 17,634; tax-paying cultivators or peasants, 389,907; *Czigany* or gipsies belonging to the government, but emancipated and paying taxes, 18,273; ditto, slaves of private individuals, 20,500; foreigners, 4,297; maimed, deformed, or infirm, 80,000; persons without any fixed residence, 741; Jews living only in the towns, 4,700; artisans, 5,600.—The Walachians are descendants of the ancient Romans, Dacians, Moesians, and Bulgarians. They are an indolent and superstitious race of men, knowing no better amusement than to dance to the sound of the pipe under the shade of their woods. Their dress consists of a large loose shirt fastened by a belt, wide trousers, a sheep-skin cloak, and sandals of untanned leather.

The Greek portion of the pop. are wealthier and more active. Turks are not allowed to settle in the principality. The Gypsies amount to about 50,000. The Walachians and Greeks generally belong to the Greek church; the head of which in this country is the archb. of Bucharest. The Roman Catholics are under the bishop of Nicopolis. The clergy possess a third part of the landed property in the country; and the annual income of their archbishop is said to be equal to 400,000 piastres. The abbeys and dioceses are exposed to sale, and the price is put into the coffers of the hospodar. The church property in W. is very large, and might be diminished with great advantage. Reformers complain that the highest and most valuable offices in the church are, through the medium of Russian influence, filled by Greeks, men who do not understand one word of the language, and are therefore utterly unfitted for a pastoral charge among the people where they are sent. Nay, more, in some instances they are not qualified for their holy office even by the correctness of their lives and deportment, and, after debauchery in private during the eight or ten years they reside in the country, return with large fortunes to their native land. The Walachian is not the written language: the only books used are printed in Greek, and Greek is also taught in the schools. There are no country schools; the only seminaries of education are to be found in the towns; and such is the prevailing ignorance, that even Greek bishops are occasionally found who can neither read nor write. It is, or very recently was customary in this country, to open the sepulchres of the dead every seven years, and if the body had not returned to its kindred dust, the relations judged that the soul that once animated it was in a state of condemnation, or that the deceased had become a vampire. The rich boyards either employ foreign tutors, or send their sons to Germany or Italy for their education. Marriages are easily dissolved.

Government, revenue, &c.] "The territories of the old Byzantine monarchy, which the Turks appropriated, had been bounded on the N by the Danube, but, as the power of the Ottoman sovereigns increased, they carried their conquests beyond this frontier, and established themselves for a considerable period even in the capital of Hungary. Among the states in these parts which they reduced to obedience were two principalities of some antiquity termed W. and Moldavia, governed by rulers of their own, and comprising very nearly the same districts which they include at the present day. These were brought by the great Solymán into a species of subjection to the Ottoman crown. That the conquest was in itself incomplete is not very probable, considering the strength of the Turks at that period; but, for some reason or other, the provinces in question were never actually incorporated in the Ottoman empire, but were left under their own princes, with a reservation only of sovereignty and tribute to the Sublime Porte." W. and Moldavia were governed by native princes, under the authority of the Sublime Porte, until 1781, when the divan deposed the indigenous princes and clothed the Fanariotes in their spoils. The divan did not deprive the natives of all influence in the government; and various posts were reserved for the native boyards, such as those of chief-justice, mayor, secretary-general of the districts and cantons. But the situation of minister of the interior and for foreign affairs, of the police, the sheriffs, the military officers, and a multitude of other posts, were usually given to the Fanariotes in the suite of the hospodar, who from the moment of their appointment took the title of boyar or boyard. The only allegiance which W.

owns to the sultan, under latter arrangements, is an annual payment of £50,000 as tribute, and the necessity of having his approbation of the person who may be elected as prince. The prince is elected by a council of about 60 persons, half of whom are elected by the landed proprietors of the various districts, and the other half consists of the most influential boyards in Bucharest and the ministers of state. When they have made choice of any one, his name is sent to the emperor of Russia and the sultan for approbation, without which he cannot assume office. The Russians exert every means of intrigue to secure the election of a person in their interest, and they had obtained such influence in the country of late years that they were always sure of gaining their point. The W. noblesse dates its origin from the year 1241. Previous to that time the country had been desolated by the continued incursions of the Tartars; the pop. was terribly reduced in numbers,—the slaves only ventured to make head against the enemy; and W. and Moldavia put themselves under the protection of Hungary, then great and flourishing, under Louis I. In the year above mentioned the Walachs of Transylvania, no longer able to endure the inroads of the Tartars, emigrated into their old fatherland under the command of Roddoulou Negro, or Black Rodolph, as he is called in W. annals. He was accompanied by a considerable number of warriors of greater or less renown, to whom he confided the principal charges and dignities of his new state, and in these personages, says tradition, you will find the origin of the boyards or nobles. The word *boyard*, or *boier*, is, according to some, Slavonic, and means 'soldier,' or 'armiger;' others derive it from the Latin *boe*, 'an ox,' and affirm it was the designation in the old Roman times of the large farmers, distinguished beyond their neighbours by the possession of great herds of cattle. The prince, and the boyards, are alike distinguished from their inferiors by the length of their beards; the latter are also easily discernible from a common inhabitant by the enormity of their *kalpaks*, or head-dress, which is composed of black lamb-skins in the form of a balloon. By the porte, the hospodar is allowed a limited revenue arising from a tithe upon sheep, bees, altogether valued at only £800 a year: in a short time, however, he generally contrives to amass immense treasures. The hospodar has not the military force of the prov. at his disposal like the pashas; his divan or court is modelled after that of the Byzantine emperors.—There is no written code of laws; sometimes indeed reference is made to the Basilian and Roman law; but the hospodar is always supreme judge, and all legal proceedings are very summary. The native militia used to consist of about 6,000 men; occasionally reinforced by a body of Albanians.—The revenue must be considerable to supply the enormous drain occasioned by the rapacity of the hospodars, and the demands of the porte. The revenue nominally paid to Turkey used to be 600 purses or 800,000 piastres; but seldom fell short of 500,000 piastres. The inhabitants were likewise obliged to supply the Turkish capital every year with 8,000 horses, 28,000 sheep, and 187,500 quarters of wheat. The tributary peasants in 1817 paid 1,800,000 piastres, or £360,000. A complete system of bribery and corruption pervades all the departments of government, and especially that which has charge of the administration of justice. In a lawsuit the poorer is always sure to have the worst of it, and even the lower class of boyards say that it is useless for them to carry a dispute with one of the higher nobility into court. All the officers of state are poorly paid—a minister only gets £600 per annum

—but they make it up by other means. There have been very large sums laid aside from the state revenues, and subscribed by private individuals, for keeping the streets of Bucharest well paved, but their present state is ruinous to carriage springs, and most uncomfortable for those inside.

Topography.] W. is divided into W. Proper, comprising Upper and Lower W. on the E of the Aluta; and Little W., sometimes called the Banat of Crayova, on the W of the same river. Bucharest is the capital of W. Proper. Fokahani, or Foktchan, situated on the r bank of the Milkov, was once a considerable commercial town: but was burned in 1822. In the neighbourhood of Waleni are the extensive salt-mines of Stanikul, which recently furnished 900,000 cwts. of that article annually. The Transylvanian trade is chiefly conducted by way of Kimpina, a town on the Braova. Brahilow or Ibrail, situated on the Danube, near the mouth of the Sereth, is the capital of a district, and has a strong citadel. This city capitulated to the Russians in 1828, after a gallant defence.—Giurgevo, Djordjova, or Jerkoki, which politically belongs to the sanjak of Rutchuk, is situated on the l. bank of the Danube nearly opposite Rutchuk,—forming the *tete-de-pont* of that town. The citadel is situated on the island of Hobodye.—Tergovisto, the ancient residence of the waivodes, is situated upon the Jalonitza.—Little W. was ceded to Austria in the peace of Passowitz; but given back to the Turks by the treaty of Belgrade in 1789. Crajova, the capital, is situated at a little distance from the l. bank of the Schiul.

History.] This prov. was unknown in authentic history, until its invasion and conquest by the Romans in the reign of Trajan. That prince sent hither several colonies, who cultivated tracts of land, and built, in prescribed situations, towns and villages. On the decline of the empire, W. shared the fate of other frontier provinces, being alternately in possession of the Greek emperors and the barbarians. The 9th cent. is said to have been the era of their embracing the doctrines of the Greek church; while the early part of the 13th is given as the date of the foundation of Bucharest, the capital, and of some smaller towns. In the 13th and 14th cents. W. was in some degree subject to Hungary. In the beginning of the 15th, the Turks penetrating in this direction, long before they accomplished the conquest of Constantinople, laid waste the country, and subjected it to a tribute. The conditions imposed upon the principalities were mild. The prince of W. occupied the *suzerainty* of the Porte, and agreed to pay an annual tribute; but at the same time preserved the right of declaring peace or war, and the other prerogatives of an independent ruler. "The other conquests of the Sultan to the N of the Danube were all ultimately lost, but 'the Danubian principalities,' as they were denominated, remained under relations with the Turkish monarchy until its fortunes began to be affected by the ascendancy of Russia. Peter the Great was contented with obtaining the support or connivance of their princes in his contests with the sultan; but, as the ambition of the czars expanded, it became a leading object of Russian policy to detach these semi-independent states from the Turkish dominion altogether, and to transfer to St. Petersburg, by gradual encroachments, the allegiance due to Constantinople. These designs were aided by a concurrence of favourable circumstances. As the Ottoman power declined, the independence of W. and Moldavia became somewhat more substantial, and, as their pop. was exclusively Christian, the pretext of a protectorate was brought plausibly into requisition. The Russian government affected, therefore, to defend against the Porte, the rights and immunities constitutionally reserved to the principalities, and so successfully were the operations of Russia conducted that, in the end, the authority of the sultan was practically divided for the benefit of the czar: every victorious war was made to contribute its impulse to this consummation. As long ago as 1792, it was stipulated and agreed that the governors, or, as they are styled, 'hospodars' of the Danubian principalities, should neither be appointed nor removed without license obtained from the Russian court, and so rapidly since that time has the work of encroachment proceeded, that the sultan now stands debarred by his own surrenders from most of the privileges of a supreme lord. The 'sovereignty' of the provinces, it is true, still nominally pertains to him, but no Turk can settle in them, nor can any Turkish troops be quartered there, except under specified circumstances." The court of St. Petersburg had, however, hitherto contented itself with simply detaching the principalities from their old allegiance without openly claiming any sovereignty of its own. It pretended merely to secure their "independence." The invasion of the principalities

could easily enough be effected by Russia without any military difficulties, and, practically speaking, without opposition. To invade Turkey proper, Russia would have to cross the Danube—always an arduous operation—or to effect a landing at some point of the Black Sea coast, and in either of these cases she would be brought into inevitable collision with the Ottoman forces. But by simply occupying Walachia and Moldavia, she confines her expedition to an unresisted march, encounters no enemy, and can reckon upon retiring without damage when her desires have been satisfied for the time. Hence the Russians have repeatedly invaded the principalities: "They have been in and out of them, in fact, for the last 80 years. As long ago as 1806, they were there, and found means to prolong their occupation in spite of opposition. They were upon the point of entering in 1821; they actually entered in 1828; and on the 26th September 1848, they entered again. It was on the last occasion that a special treaty was signed between Russia and the Porte, stipulating the particular circumstances under which either power might occupy the provinces in question for the future, and it is this treaty which the czar violated." The convention of Balta-Liman, on 1st May 1849, recognised the right which had always been denied to Russia of military occupation of the two principalities and of interference in their internal administration. The privileges which the Moldo-Walachian principalities acquired from their capitulations with the Turks, and which were recognised by subsequent treaties, are (1) The right of electing their hospodars; (2) Administrative and legislative independence; (3) Inviolability of their territories. The rights of sovereignty appertaining to the Porte: (1) The purely honorary right of confirming the hospodars elected by the nation. (2) An annual tribute of 3,000,000 of Turkish piastres from the two principalities. The right of Russia is confined to preventing the Porte from trespassing on the privileges accorded to the Moldo-Walachians, and which the latter had guaranteed by the treaty of Adrianople. The convention of Balta-Liman maintains the following principles: "two committees will be appointed to revise the organic laws, whose labours are to be submitted to the examination of the Ottoman government, which, after coming to an understanding on the subject with the court of Russia, will promulgate them in the form of a *hatti-scherif*." (Art. 2).—Each of the two governments will maintain in the principalities armies numbering from 30,000 to 30,000 men, until the entire pacification of the country; subsequently to the pacification, and until the completion of the constitution, for the principalities, each of the two powers is to reduce its army to 10,000 men; immediately afterwards the two powers will completely and simultaneously evacuate the principalities. (Art. 4).—It is evident then that the convention of Balta-Liman not only violated all the privileges of the Moldo-Walachians, but also gave to Russia equal rights of sovereignty with those possessed by the Porte. See articles MOLDAVIA and TURKEY.

WALBECK, a town of Prussia, in the prov. of Saxony, regency and 27 m. WNW of Magdeburg, and circle of Gardelegen, on the Allier. Pop. 1,200. It has manufactories of pipes and of potash.

WALBERSWICK, or **WALDESWICK**, a parish in Suffolk, at the mouth of the river Blyth, 2 m. SW of Southwold. Area 1,960 acres. Pop. in 1851, 357.

WALBERTON, a parish in Sussex, 3½ m. WSW of Arundel. Area 1,722 acres. Pop. in 1851, 578.

WALCHBERG, a mountain of Austria, in Styria, in the circle and 36 m. NW of Judenburg. It has mines of sulphur and of argentiferous copper.

WALCHEN-SEE, or **WALLER-SEE**, a lake of Bavaria, in the circle of Upper Bavaria, and presidial of Weilheim. It is 5 m. in length from NE to SW, and 2 m. in breadth, and discharges itself by the Jaishna into the Isar. It abounds in fish.

WALCHEREN, or **WALCHEREN**, an island of Holland, in the prov. of Zealand, situated in the German ocean, at the mouth of the Scheldt, and separated from the islands of Beveland by a narrow channel called the Sloe. Pop. 48,000. If not the largest, it is the most populous and best-cultivated of the different islands composing the prov. of Zealand. It is of an oblong form; in length from NW to SE about 12 m.; in breadth from NE to SW, 8 m. It lies low, and would be subject to inundations from the sea, were it not protected by strong dykes. The dyke of West-Cappel, in particular, is of great size and strength. The greater part of the surface is rich meadow. This island contains the towns of Middleburg, the capital, Flushing, and Veere. The villages are numerous. Agues and bilious complaints prevail in spring and autumn, in consequence probably of the quantity of fresh water in

the canals with which the island is intersected: hence the sickness prevalent among the British troops during their occupation of it in 1809.

WALCHFING, a village of Bavaria, in the circle of Lower Bavaria, and presidial of Vilshofen. Pop. 410.

WALCHOW, a village of Prussia, in the regency of Potsdam, and circle of Ruppín. Pop. 240.

WALCHUM, a village of Hanover, in the principality of Osnabrück, and bail. of Ahremberg-Mippen. Pop. 230.

WALCHWYL, a village of Switzerland, in the cant. and bail. of Zug. Pop. 1,089.

WALCOT, or **WALCOT-FALKINGHAM**, a parish in Lincolnshire, $\frac{1}{4}$ m. NW of Falkingham. Area 1,747 acres. Pop. in 1831, 183; in 1851, 152.

WALCOT, or **WALCOT-BILLINGHAY**, a hamlet and chapelry in the p. of Billingham, Lincolnshire, 2 m. N of Billingham. Pop. in 1831, 514; in 1851, 617.

WALCOT, a parish partly within the city of Bath, Somersetshire. Area 1,023 acres. Pop. in 1831, 26,023; in 1851, 25,457.

WALCOT-CUM-MEMBRIS, a hamlet in the p. of Holy-Cross, Worcestershire, 2 m. NE of Pershore. Pop. in 1831, 375; in 1851, 506.

WALCOTT, a parish in Norfolk, 5 m. E by N of North Walsham. Area 785 acres. Pop. 187.

WALCOURT, a department, commune, and town of Belgium, in the prov. of Namur, and arrond. of Dinant. Pop. of dep., 910. The town is 29 m. SSW of Namur, on the Heure. Pop. 461. It is enclosed by walls, and has an ancient church, noted as a resort of religious devotees. It possesses extensive iron-works. It is a place of great antiquity. In 1615 it was reduced to ashes.

WALD, a village of Bavaria, in the circle of Upper Bavaria, and presidial of Alt-Setting. Pop. 200.

—Also a village in the presidial and 12 m. SW of Burghausen, on the r. bank of the Alz. Pop. 260.

It has a royal castle.—Also a village of the circle of Middle Franconia, and presidial of Gunzenhausen. Pop. 300.—Also a market-town of the circle of Swabia, and presidial of Furthheim. Pop. 640. It has a castle in ruins.—Also a village of Austria, in the regency of Salzburg. Pop. 240.—Also a village in Syria, in the circle of Bruch. Pop. 640.—Also a village in the circle of Judenburg. Pop. 420.—Also a village of Tyrol, in the circle of the Imst. Pop. 410.—Also a village of Prussia, in the regency and 14 m. ESE of Düsseldorf, and circle of Solingen. Pop. 700. It has woollen, linen, and cotton factories, iron founderies, manufactories of copper, steel and iron-ware, of ribbon, and tobacco.—Also a village in the circle of Geldern. Pop. 790.—Also a village of Saxony, in the circle of Bautzen, and bail. of Lobau. Pop. 896.—Also a village of Switzerland, in the cant. of Appenzell, on the Sitter. Pop. 1,432.—Also a town in the cant. of Zurich, and bail. of Hinwil. Pop. 8,808. It has cotton and silk factories.

WALD (**OBER** and **NIEDER**), two villages of Austria, in Styria, in the circle of Gratz. Pop. 700.

WALDAI. See **VALDAI**.

WALDALGESHEIM, a village of Prussia, in the regency and 30 m. SSE of Coblenz, and circle of Kreuznach. Pop. 840.

WALDAMORNBACH, a village of Hesse, in the prov. of Starkenburg, and bail. of Höchst. Pop. 300.

WALDANBACH, a village of Nassau, in the bail. of Herborn. Pop. 240.

WALDANGELOCH, a village of the grand-duchy of Baden, in the circle of the Upper Rhine, and bail. of Hoffenheim. Pop. 1,000.

WALDASCHAFF, a village of Bavaria, in the circle of Lower Franconia, and presidial of Rothen-

buch, at the source of the Aschaff. Pop. 1,324. It has several iron-works.

WALDAU, a village of Anhalt-Bernburg, in the circle of Bernburg. Pop. 600.—Also a village of Baden, in the circle of the Upper Rhine, and bail. of Freiburg. Pop. 250.—Also a village of Bavaria, in the circle of the Upper Pfalz, and presidial of Vohenstrauß. Pop. 379.—Also a village of the circle of Upper Franconia, and presidial of Culmbach. Pop. 240.—Also a village of Electoral Hesse, and prov. of Lower Hesse, circle and $\frac{1}{4}$ m. S of Cassel, on the Wahlebach. Pop. 810.—Also a village of Prussia, in the regency of Erfurt, and circle of Schleusingen. Pop. 401.—Also a village of the regency of Liegnitz, and circle of Bunzlau. Pop. 2,560. It has a castle, and contains several mills, factories, and bleacheries.—Also a village in the regency and circle of Liegnitz. Pop. 625.—Also a village in the regency and circle of Königsberg, between two lakes. Pop. 280.—Also a village in the regency of Marienwerder, and circle of Flatow. Pop. 300.

WALDAU (**NEU**), a village of Prussia, in the regency of Liegnitz, and circle of Sagan. Pop. 688.

WALDBACH, a village of Württemberg, in the circle of the Neckar, and bail. of Weinsberg. Pop. 698.—Also a village of Hungary, in the district of Kovar.

WALDBACH (**OBER** and **UNTER**), two villages of Bavaria, in the circle of Swabia, and presidial of Burgau, containing respectively 608 and 81 inhabitants.

WALDBILLIG, a town of Belgium, prov. of Luxemburg, and com. of Grevenmacher. Pop. 560.

WALDBOCKELHEIM, a village of Prussia, in the circle of the Rhine, regency of Coblenz, circle and 8 m. WSW of Kreutznach. Pop. 1,168.

WALDBREDIMUS, a village of Belgium, in the prov. of Luxemburg, and com. of Grevenmacher. Pop. 380.

WALDBROL, a circle and village of Prussia, in the prov. of the Rhine, regency and 32 m. ESE of Cologne. Pop. of circle, 19,609; of village, 350. It has lead and iron-mines.

WALDBRUNN, a village of Bavaria, in the circle of Lower Franconia, and presidial of Würzburg. Pop. 550.

WALDBURG, a village of Württemberg, in the circle of the Danube, and bail. of Ravensburg. Pop. in 1840, 241.—It has a castle which belongs to the ancient and formerly powerful family of the same name.

WALDBUTTELBRUNN, a village of Bavaria, in the circle of Lower Franconia, and presidial of Würzburg. Pop. 550.

WALDCAPPEL, a town of Electoral Hesse, in the bail. of Bischhausen, circle and 8 m. WSW of Eschwege, and 30 m. SE of Cassel. Pop. 1,000.

WALDDORF, a market-town of Baden, in the circle of the Lower Rhine, and bail. of Heidelberg, 17 m. SE of Mannheim. Pop. 1,800.—Also a village of Württemberg, in the circle of the Schwarzwald, and bail. of Nagold. Pop. 1,140. It has cloth factories.—Also a village in the bail. and 81 m. NE of Tübingen. Pop. 1,404. It has manufactories of linen, and of cutlery.—Also a village of Prussia, in the regency of Oppeln, circle of Neisse. Pop. 700.

WALDDORF (**GRÖß** and **KLEIN**), two villages of Prussia, in the regency and circle of Danzig, on the Mottlau. Pop. 400.

WALDECK, a principality in the W of Germany, consisting of the two counties of Waldeck and Pyrmont, having a united area of 460 sq. m., with a pop. in 1843 of 58,753; in 1852, 59,697.—The county of W., forming the chief part of the princi-

pality, has an area of 424 sq. m., and is bounded on the W and N by Rhenish Prussia; and on the E and S by Hesse-Cassel. It is one of the most elevated districts in Germany. The climate is cold. The mountainous tracts contain iron, copper, and lead. The rivers are the Eder on the N, and the Diemel on the S.—Pyrmont lies wholly detached from W., and about 80 m. to the N of its frontier. It had a pop. of 6,623 in 1852.

WALDECK, a market-town of Bavaria, in the circle of the Upper Pfalz, and presidial of Kemnath, on the Hor, 20 m. ESE of Bayreuth. Pop. 450.—Also a village of Silesia, in the circle of Troppau, near Johannsburg. Pop. 620.—Also a village of Prussia, in the regency of Königsberg, and circle of Preuss-Eilan. Pop. 200.—Also a village of the grand-duchy of Saxe-Weimar, in the principality of Weimar, and circle of Weimar-Jena, 11 m. E of Jena. Pop. 270.—Also a town of the principality of Waldeck, 20 m. W by S of Cassel. Pop. 1,000.—Also a village of Bohemia, in the circle of Leitomisch. Pop. 300.

WALDEGRAVE'S ISLANDS, two small rocky islands, lying off the S coast of Australia, in S lat. 33° 35'. They are included by Flinders under the general title of the Investigator's Group.

WALDEN, a township of Caledonia co., Vermont, U. S., 22 m. NE of Montpelier. Pop. 910.—Also a village of Orange co., in New York, 80 m. S by W of Albany.

WALDEN (King's). See **KING'S WALDEN**.

WALDENBACH, a village of Bavaria, in the Upper Palatinate, on the Regen. Pop. 800.

WALDENBUCK, a town of Württemberg, 10 m. S by W of Stuttgart, on the Aach. Pop. 2,000.

WALDENBURG, a town of Württemberg, principality of Hohenlohe, 7 m. NW of Hall.—Also a town of Saxony, 49 m. WSW of Dresden, on the l. bank of the Mulde, in N lat. 50° 52'. Pop. 2,553. It is divided by the river into a new and old town. It has manufactories of woollens, linen, cotton, and earthen-ware.—Also a town of Prussian Silesia, 10 m. WSW of Schweidnitz. Pop. 3,500. It has a trade in linen and linen yarn.—Also a town of Switzerland, in the cant. of Bale, at the foot of the Hauenstein, 15 m. NE of Soleure. Pop. 756.

WALDENRATH, a village of Prussian Westphalia, in the duchy of Juliers, circle of Hemsberg. Pop. 630.

WALDEN-SAFFRON, or **SAFFRON-WALDEN**, a market-town and parish in Essex, 40 m. NNE of London. Area of p., 7,416 acres. Pop. in 1801, 3,181; in 1831, 4,762; in 1851, 5,911. The church is a beautiful and conspicuous edifice, 200 ft. in length and 82 ft. in breadth, with a tower and spire 193 ft. high. It consists of a nave, chancel, and side-aisles of mixed decorated and perpendicular Gothic architecture.—The town is supposed to have derived its name from the Saxon *weald*, 'a wood,' and *den*, 'a valley.' The adjunct *Saffron* is derived from the once extensive culture of that plant in the neighbourhood. It was formerly called Waldenburg. The situation of the town is a narrow tongue of land encompassed with a valley in the form of a horse-shoe, enclosed by distant hills. On the bottom of the tongue stand the ruins of a castle, and on the top the church, round which, on the side of the hill and in the valley, the town is built. The houses are principally of lath and plastered brick; but some of them are very ancient. The market-place has been rendered spacious, and contains a handsome town-hall. There is a considerable trade carried on here in malt and barley, and an extensive general retail trade.—The borough is co-extensive with the p., and includes the hamlets of Little

Walden, Sewer's End, North End, and Audley-End, a magnificent structure, situated about 1 m. W of the town. It was erected in the time of James I., and was long regarded as the largest mansion in the kingdom. Only a small part of the original building is now remaining, and this portion forms the splendid mansion of Audley-End, the seat of Lord Braybrooke.

WALDENBERG, a village of Hesse-Cassel, in the co. of Isenburg, built by Protestant refugees from Piedmont, towards the close of the 17th cent. Pop. 800.

WALDENSEN. See **PIEDMONT**.

WALDEN-ST. PAUL'S, a parish in Hertfordshire, 5 m. NW of Welwin. Area 3,678 acres. Pop. in 1831, 1,058; in 1851, 1,175.

WALDEN-STUBBS, a township in the p. of Womersley, Yorkshire, 7 m. SE of Pontefract. Area 1,350 acres. Pop. in 1831, 139; in 1851, 185.

WALDERNBUCH, a village of Nassau, in the bail of Hadamar. Pop. 530.

WALDERSHARE, a parish in Kent, 5 m. N by W of Dover. Area 1,242 acres. Pop. in 1851, 105.

WALDERSHOP, a town of Bavaria, 62 m. N of Ratisbon. Pop. 1,000.

WALDFEUCHT, a village of Prussia, in the reg. of Aachen, circle of Heinsberg. Pop. 925.

WALDFISCHBUCH, a village of Bavaria, on the Pfalz, circle of Pirmasens. Pop. 723.

WALDGREBWEILER, a village of Bavaria, on the Pfalz, circle of Rockenhausen. Pop. 540.

WALDHAUSEN, a village of Upper Austria, 4 m. ESE of Zwettl.—Also a village of Baden, in the circle of the Lower Rhine, bail of Adelsheim. Pop. 420.—Also a v. of Nassau, in the bail of Weilburg. Pop. 470.—Also a v. of Prussia, in the reg. and circle of Arnberg. Pop. 300.—Also a village of Württemberg, in the Danube circle, bail of Geislingen, on the Alp. Pop. 1,240.

WALDHEIM, a town of Saxony, on the river Zschoppan, 31 m. W of Dresden. Pop. 4,000. It has manufactories of linens and woollens.—Also a v. of Bohemia, 44 m. W of Pilsen, in the bail of Tachau. Pop. 1,490.

WALDHUTTE, a village of Lower Austria, near Burkersdorf. Pop. 1,200.

WALD-HWOZD, a mountainous district of Bohemia, in the circle of Prachin, on the confines of the Upper Palatinate.

WALDINGFIELD (GREAT), a parish in Suffolk, 8 m. NE of Sudbury. Area 2,423 acres. Pop. 659.

WALDINGFIELD (LITTLE), a parish in Suffolk, 5 m. NE of Sudbury. Area 1,574 acres. Pop. 404.

WALDITCH. See **WALLDITCH**.

WALDITZ (GROSS and KLEIN), villages of Prussian Silesia, in the circle of Lowenberg. Pop. 1,323.

WALDKAPPEL, a parish and v. of Kur-Hesse, in the circle of Eschwege. Pop. 1,304.

WALDKIRCH, a parish and v. of Switzerland, in the cant. of St. Gall, on the l. bank of the Sitter. Pop. 2,681.

WALDKIRCHEN, a town of Baden, on the l. bank of the Elz, 8 m. NE of Freiburg. Pop. 2,500.

—Also a town of Bavaria, 14 m. NNE of Passau.—Also a v. of Saxony, in the circle of Zwickau, 7 m. SE of Chemnitz. Pop. 1,200.

WALD-LEININGEN, a town of the Bavarian circle of the Rhine, in the district of Spire.

WALDMICHELBAH, a village of Hesse Darmstadt, 15 m. NNE of Heidelberg. Pop. 1,600.

WALDMOHR, a town of Bavaria, in the duchy and 11 m. N of Deux-Ponts on the Glau. Pop. 1,200.

WALDMUNCHEN, a town of Bavaria, in the Upper Palatinate, 31 m. NE of Ratisbon. Pop. 2,132. It has manufactories of linen and glass.

WALDNIEL, a town of Prussian Westphalia, in the duchy of Juliers, 2 m. E of Buremond. Pop. 1,200.

WALDO, a village of Prussia, in the reg. of Frankfort, cant. of Luckau. Pop. 362.

WALDO, a county in the S of Maine, U. S., drained by the Marsh and St. George river. Area 961 sq. m. Pop. in 1850, 47,230. Its cap. is Belfast.—Also a township and v. in Waldo co., 37 m. E by N of Augusta. Pop. 812.

WALDOBOROUGH, a port of Lincoln co., Maine, U. S., 22 m. ENE of Wiscasset. Pop. in 1840, 3,661; in 1850, 4,199. The shipping belonging to this port, in 1816, amounted to 19,743 tons; in 1850, to 96,380 tons. In 1851, 28,632 tons of shipping were built here.

WALDORF, a village of Prussia, in the reg. of Coblenz, circle of Ahrweiler. Pop. 788.—Also a v. in the reg. of the Rhine, circle of Bonn. Pop. 939.

WALDRIDGE, a township in the p. of Chester-le-Street, co.-palatine of Durham, 5½ m. N by W of Durham. Area 795 acres. Pop. in 1851, 747.

WALDRINGFIELD, a parish in Suffolk, 3½ m. S by E of Woodbridge. Area 1,156 acres. Pop. in 1831, 166; in 1851, 169.

WALDEON, a parish situated on the Forestridge, Sussex, 6 m. ESE of Uckfield. Area 6,218 acres. Pop. in 1831, 997; in 1851, 1,106.

WALDSASSEN, a town of Bavaria, in the Upper Palatinate, 69 m. N by E of Ratisbon. Pop. 1,522. It has manufactories of paper, and of woollen and cotton stuffs.

WALDSEE, a town of Württemberg, 32 m. SW of Ulm. Pop. 1,570.

WALDSHOT, a town of Baden, on the Rhine, at the entrance into the Black Forest, 20 m. W by S of Schaffhausen. Pop. 1,500.

WALDSTADT, a parish and v. of Switzerland, in the cant. and 4 m. WNW of Appenzell. Pop. 983. There are mineral baths here.

WALDSTADTER-SEE. See LUZERN (LAKE OF).

WALDSTETTEN, a town of Bavaria, 7 m. SW of Burgau. Pop. 758.—Also a village of Württemberg, 29 m. E of Stuttgart. Pop. 1,500.

WALDTHARM, a village of Württemberg, in the Jart circle, near Grailsheim.

WALDTHURN, a village of Bavaria, near the borders of Bohemia, 24 m. NE of Amberg. Pop. 874.

WALDUBBA, a tract of hot and level country, extending along the N frontier of Abyssinia, upon the banks of the Tacasse. It is about 80 m. long, and 30 m. in breadth. Its marshy districts are occupied by bands of savage Shangalla.

WALDUEN, a town of Baden, 30 m. WSW of Wurzberg. Pop. 3,200.

WALDWIMMERSBACH, a parish and v. of Baden, circle of the Lower Rhine, bail. of Neckar-gemünd. Pop. 554.

WALDZELL, a village of Bavaria, in the Lower Rhine circle, bail. of Rothenfels. Pop. 260.

WALEN (EL), a town of the Sahara, in Central Africa, in the district of Twat, 115 m. W of Ghadames.

WALES, a broad and sweepingly indented peninsular principality, projecting from the W side of England, and bounded on the N by the Irish sea and the estuary of the Dee; on the E by Cheshire, Shropshire, Herefordshire, and Monmouthshire; on the S by the Bristol channel; and on the W by St. George's channel. Its E boundary is traced to a considerable extent by the river Dee toward the N,—still more by the river Rumney toward the S,—and over various distances by the Vrynwy, the Wye, and other intermediate streams. The principality, while uninterrupted washed on three sides by the

sea, or by broad estuaries, is so formed that its own territorial length constitutes the breadth of its peninsula; the country extending in length from N to S, and the peninsula projecting towards the W. It lies between the parallels of 51° 40' and 53° 26' N, and the meridians of 2° 41' and 4° 56' W. Its length, in a straight line from N to S, is 115 m.; its breadth averages about 60 m., and varies between 37 m. and a little upwards of 90 m.; but, in a general view, it may be regarded as a slender oblong of about 46 m. in breadth, subtended westward at the two ends by two large projections. The oblong is contiguous along all its E side with England, and is washed along the central part of its W side by the long sweep of Cardigan bay; the S projection is a semi-ellipsoidal peninsula, about 55 m. in length, and 27 m. in mean breadth, indented at its extremity by St. Bride's bay, and comprehending all Pembroke-shire, and about the half of Cardiganshire and Caermarthenshire; the N projection forks into two parts, the one extending NW, and consisting of the county of Anglesea, or islands of Anglesea and Holyhead, and the other extending SW, and consisting of the elongated and intricately outlined peninsular portion of Caernarvonshire.—The area of the country is usually stated at 5,206,900 acres, or 8,125 sq. m.; but it is estimated in the reports to the Board of agriculture at 5,100,000 acres, and is alleged in the third report of the Emigration committee of the House of Commons, to comprise only 7,425 sq. m., or 4,752,000 acres. According to the reports to the Board of agriculture, 900,000 acres are in tillage, 2,500,000 are under pasturage, 700,000 are uncultivated, but capable of cultivation, and 1,000,000 are wholly unprofitable; and according to the report of the Emigration committee, 3,117,000 are arable and pastorally cultivated, 530,000 are uncultivated, but capable of cultivation, and 1,105,000 are wholly unprofitable.

Surface.] North W. is imposingly mountainous, South W. grandly hilly, and both are a land of soaring heights and magnificent acclivities,—of limited plains, narrow vales, and gorgy ravines,—of uplands endlessly varied in contour, and intersecting stripes and patches of lowland, rich in the dresses of river, lake, and woodland scenery. The mountains, however distributed, dissevered, or occasionally isolated among themselves, are so closely connected as to constitute one system, and are divided from the high grounds of England by the champaign territory of the plains of Cheshire and Salop, and the valley of the Lower Severn; yet the valley of the Upper Severn, from the boundary with England SW to Llanidloes, and the valley of the Dyfi, from Machynlleth, or from a point 15 m. NW by W of Llanidloes to Cardigan bay, cut the system into two sections very nearly coincident with the political divisions of North and South W., or leave them to be connected by an intermediate mountain-band of only 15 m. in breadth. The mountains of the northern section, or of North Wales—which includes Anglesey, Carnarvon, Denbigh, Flint, Merioneth, and Montgomeryshires—rise from all sides of the country towards a great central five-sided tabular upland; or bear a relation to it whose character may be fancifully described as intermediate between that of radii and buttresses. The five sides of the central plateau are, in a general view, continuous mountain-ridges; and apart from their elongations beyond the limits of contact with the plateau, they measure respectively 10, 10, 20, 25, and 25 m. in length. The NW side is the Snowdon range, sending up the triple summit which constitutes the loftiest ground in South Britain, and extending from a point a few miles NW of the N angle of Cardigan bay

to the mouth of the river Conway; the N side is formed from the point of intersection with the Snowdon range to the town of Llanrwst on the Conway, by a range which comes in from Caernarvon on the Menai Strait, and is prolonged eastward from Llanrwst to the Hiraethog mountains; the NE side is formed by a chain of hills which flanks the Conway river, is cloven through by the river Dee at its confluence with the Alwen, 1 m. above Corwen, and falls by prolongation upon the Berwyn range at the SW ascent of the summit of Mool-Ferna; the SE side is formed by the Berwyn range which begins at Mool-Ferna, a mile or two S of the Dee, extends to the head of the valley of the Dyfi, and is thence prolonged down the r. bank of that stream; and the W side is an irregular line of heights commencing at the summit of Cader-Idris off the Berwyn range, proceeding along the numerous lofty summits which extend between the rivers Maw and Dwyrhyd, at a distance of about 5 m. from Cardigan bay, and falling upon the Snowdon range not far from the village of Beddgelart. The country included within these five sides, comprehends about one-fourth of the whole area of North Wales; lies, with very slight exceptions, upon a basis of probably not less than 600 ft. of alt. above sea-level; and consists of a congeries, a segregation, a sea of hills, generally rapid in acclivity, yet seldom equal in elevation to the summits of either the Snowdon, the Berwyn, or the west boundary ranges; while the country lying exterior to the plateau, among the numerous spurs and elongations of the ranges which form it, or between the seranges and the sea, or at the subversion of the country's upland upon the margin of the Cheshire and Shropshire plains, presents ramifications of hill and intersections of valley and ravine far too multitudinous and intricate to be succinctly indicated.—South W., which comprehends Brecon, Cardigan, Caermarthen, Glamorgan, Pembroke, and Radnor shires—though decidedly inferior to North W., in both the amassedness and the alt. of its mountains, possesses not a few conspicuous summits, and several lofty and far-stretching chains of upland. A range of high ground, so broad as to be a kind of plateau, extends from the vicinity of Llanfair, in the E division of Montgomeryshire; sends up, on the N frontier of South W., the proud and lofty crest of the celebrated Plynlimmon; subsides in the course of a long stretch to the W, and stoops precipitously down in the abrupt cliffs which bound Cardigan bay in the vicinity of Aberystwith. An extensive range, whose most conspicuous eminences are the group called 'the yellow mountains,' Cwn Rhysglog, Pen-y-cader, Mynydd-castel, Newydd 'Carreg Wen, and Llanvernach, commences at Bledvra-forest, to the NE of Llandinrod-wells in Radnorshire, crosses the N part of Brecknockshire, extends SW through Caermarthenshire, and terminates in the bold and prominent mass of Procelly, near the centre of the N division of Pembrokeshire. Another line or band of heights commences in the Fothoc hills on the E side of Brecknockshire, and is prolonged westward, with various degrees of ridgy regularity, but not without intersections of water-course to the W extremity of the Mynydd-Dhrau or Black mountains, and the high table-land closed by the isolated mountain of Penbre-hill, in the county of Caermarthen. Of the principal summits in both sections of the principality, Snowdon has an alt. above sea-level of 3,571 feet, Cader Idris 2,914, the Beacons 2,862, Cader-Ferwin 2,563, Plynlimmon 2,463, and many from 1,500 to 2,300 ft. The lengths of single or twin mountains, and the elongations of minor ridges, and of great ranges, are prevalingly in the direc-

tion of NW to SE; and their escarpment, or more water-worn declivities abrupt descent, generally faces the NW.—Green and luxuriant vales, while the seat of pop., are the boast of the inhabitants, and often present a delightful contrast to the wood-clad declivities, the rugged ascents, the frowning cliffs, and the soaring peaks, by which many of them are enclosed and sheltered. "In these," says a well-informed and judicious contemporary, "a fine deep soil is not unfrequently found, and abundant harvests often reaped. The vale of Clwyd in North W. is not less remarkable for the noble panorama of natural graces displayed in a length of 30 m., than for the verdure of its pastures and the value of its grain harvests. This, however, is the elysium of Wales. The vale of Eideirnion is also fruitful, but less extensive and less beautiful; and the vale of the Conway is a grassy mead of 20 m. in length, where some of the best cattle brought into England annually are reared. Though less interesting from the tameness of the impending mountains, the vales of South Wales are still to be classed among the characteristic features of the country. There is more breadth between the hills, less accession from the accompaniment of waving wood, and less grandeur of height and variety of form in the mountain chains. The celebrated vale of Glamorgan, extending along the shores of the Bristol channel, does not belong to the class of natural enclosures here alluded to, but is merely a vast sloping bank, falling gradually from the mountain base to the water's edge, and basking in a southern sun. There is yet another species of valley which appears almost peculiar to North Wales: it is called in the native language *cwm*, a hollow, and is a perfect amphitheatre or basin-formed glen, accessible only by descent, and sometimes through a small gap, occurring, as it were, in the imperfect or broken rim of the great crater."—[Gorton.]

Climate. The climate of W. aggregately possesses a much closer resemblance to that of the W. division of Scotland, than to that of by far the greater portion of England: and, in detail, it is not a little various,—bleak and severe on the mountain tablelands, sharp on the hills, moderate in the smaller inland vales, mild in the great interior valleys, and genial on the southern seaboard or vale of Glamorgan. Snow is almost everywhere more frequent than in England, accumulates to a greater depth, and lies during a much longer period,—often sheeting for days together the sides of the E frontier hills, when the plains of Cheshire and Salop and the Lower Severn are all green, and usually covering the tops of the loftiest mountains during a succession of many months in the year. Rain is frequent, not in winter only, but in the three other seasons, and is believed to fall to the average depth of 34 in., while the fall in England averages only 32. Yet the air, though humid, is in general highly salubrious; and so powerfully does it operate, in conjunction with the simple and frugal dietetics of the country, to prolong life, that scarcely a cemetery in the principality is destitute of some monumental testimony to the longevity of the inhabitants.

Islands. Anglesey, with its adjunct of Holy Island, differs so much in contour from the other five coas., and, at the same time, is so strictly insular, and constitutes so large an area, that it has not been included in our general view of the principality's surface; yet, in its character of a county, it is so fully noticed in its own place in our alphabetical arrangement, that even a sentence respecting it here would be idle repetition. Excepting Anglesey, the islands of Wales are few and tiny; in no instances entitled to be called more than islets, and in most constituting mere skerries or rocks. The islets and rocks called *skerries*, off the NW extremity of Anglesey, are noticeable chiefly for their lighthouse, and for their hazards to navigation. Bardsey Island, off the W point of the Carnarvonshire peninsula, supports a few fishermen, feeds some cattle, has a lighthouse, and gives name to the sound between it and the mainland; St. Tudwall's islets, off the E side of the eastern point of the same peninsula, are also grazing ground, and have a few inhabitants. Of the numerous islets which straggle seaward from the N side of the entrance of St. Bride's bay, Ramsey is inhabited; the Bishop and his Clerks are the most menacing group of rocks in St. George's channel; and all possess a melancholy interest in the annals of navigation. The Skomer and the Skokham islands, seaward of the S side of the entrance of St. Bride's bay and the Caldy islets, off the SE extremity of Pembrokeshire, are partly grazing grounds, and partly perilous rocks. Barry Island, near the Glamorgan shore, SW of Llandaff, possesses some antiquarian interest; Sully Island,

two or three miles further E, is little known; and nearly all other inlets than we have noticed, however dignified in local or topographical nomenclature, are little else than dots of land upon the sea.

Bays and Harbours.] Natural harbours are in W. fewer and aggregately less commodious than in an equal extent of coast in most other northern countries of mountainous character; yet such as occur are in some instances important and excellent, and in others artificially improveable. The estuary of the Dee is dotted up to the head of its Welsh side by a series of shipping quays. Various creeks, small bays, and the embouchures of streams between the Dee and Great Orme-head, are shipping-places of collieries, lime-works, and the general agricultural market. The narrow but somewhat prolonged estuary or tidal space of the Conway river is believed to be rapidly undergoing natural improvement by the diminution of the bar across its entrance, and might easily be improved into the best post of communication on the North W. coast, with the metropol of Ireland. Beaumaris bay, while capacious, is well-sheltered, and contains a good roadstead; and its interior expansion of Port-Pearlyn, at Bangor, though small, is so covered and screened as to be a retreat from nearly all winds. Numerous creeks serrate the outline of Anglesey; yet possess even inferior importance only, in the aggregate, and in a few instances offer safe berths for coasting-vessels employed in the export of mining produce and cattle. Holyhead bay, between Anglesey and Holy Island, forms on its W. side the small but sheltered and well-improved harbour which has the peculiar distinction of being the station of the Irish packets. The S end of the Menai strait is obstructed at its entrance by a shifting bar; but, when this has been passed, it presents, in the ramified and generally landlocked expansion S of Carnarvon, a thoroughly sheltered and safe anchorage-ground. The Carnarvonshire creeks of Nevin and Portdinlleyn admit small craft; its bay of Aberdaron is larger but not so important; its still more capacious and almost semicircular bay of Hell's mouth, appeals by its very name; its bay of St. Tudwall's road is commodious, safe, and a good outlet; and its creeks at Pwllheli and Port-Madoc are of note, the former as a place from which ships sail, and the latter as the place of shipment for the Festiniog steels. Four small estuaries are the only noticeable marine inlets on the coast of Merionethshire; and but two of these, the estuaries of the Maw and the Dyfi, are ports of any consequence. The embouchure of the Ystwyth and the small estuary of the Tyfi form tiny harbours, and the chief scenes of the Cardiganshire commerce. Newport and Flagguard bays, on the N of the Pembroke coast, are comparatively expansive, and witness considerable traffic. Pwllcrochen bay, on the same coast, is of no note. St. Bride's bay, farther S in Pembroke, is a miniature gulf in area, totally unsheltered from the wild winds of the west, and replete with appalling historical associations. Milford haven, the next great opening, flaunts from 4 or 5 to 15 or 16 m. into the interior, in a series of ramifications; presents a landlocked, natural harbour, sufficiently capacious to hold all the navy of Britain; and, but for the sinuosity of its entrance, and the remoteness of its local position, would have been adopted as a principal naval station. Carmarthen bay is a miniature sea, open, expansive, and destitute of shelter; but its offshoots, the small estuaries of the Tawe and the Towy, the Gwendraeth-Fawr, and the fine estuary of the Barr, or Llwchwr river, are safe retreats for shipping, and the scenes of much commercial stir. All the inlets hence, to the E boundary of the principality, are, with the single exception of Swansea bay, small bays, or mere creeks, possessing little character as either landscapes or natural harbours, yet in some instances improved by art to subserve, on a small scale, the purposes of commerce. "Swansea bay," remarks the writer from whom we quoted before, "is a scene of matchless beauty: it is frequently compared to the scenery of the bays of Dublin and Naples. Pennarth harbour, the most easterly on the coast, is also artificial: from this the manufactures of Merthyr-Tydvil are sent forth to the public market, and the commercial affairs of Cardiff are transacted."

Rivers and Lakes.] The Dee rises in two head-streams on the S frontier of Merionethshire; receives, on its l. bank, the tributary of the Alwen; and on its r. bank the Ceirog; and, debouching from among the mountains, turns N, passes into England, expands into estuary, and thence continues on the boundary to the sea.—The Clwdd rises on the confines of Denbighshire and Merionethshire; glides past St. Asaph; receives the Elwy; washes the castle-walls of Rhyddlan; and 3 m. below, falls into the Irish sea.—The Conway issues from Llyn-Conway near the junction of Denbigh, Merioneth, and Carnarvon cos.; descends into the beautiful vale of Nant-Conway; receives about 20 affluents, the chief of which are the Machno, the Lledder, and the Lingwy; washes the town of Llanwryst; flows in beautiful curvatures to Trefrihw; and, thence to the mouth of its little estuary at Aberconway, is tidal and navigable.—The Ogwen, entirely a rivulet

of Carnarvonshire, forms the cove of Penrhyn at Bangor, on Beaumaris bay.—The Sciout, cradled among the loftiest uplands of Snowdon, traverses the two beautiful lakes of Llanberis; laves the ancient *Sigontium* and the modern Carnarvon; and forms a safe and commodious little harbour on the Menai strait.—The rivulets of Anglesey, though many in number and profuse in irrigation, are all so small and prosaic as to challenge only collective notice.—Criccieth and Pwllheli rivers, and other streams of the Carnarvonshire peninsula, are also inconsiderable in both character and volume.—The Gwynedd tumbles from the SE side of the Snowdonian alps; and forms the commodious estuary at the NE corner of Cardigan-bay, called the Traeth-Mawr.—The Drwydd rises near Bwlch-Carreg-y-fran, in the mountainous district of Merionethshire; flows along the picturesque vale of Festiniog; and forms the estuary of Traeth-Vach, a twin expansion with the Traeth-Mawr.—The Maw or Avon rises SW of the source of the Dee; receives from the N the Mowddoc; and expands into the prolonged and slender estuary whose mouth forms the harbour of Barmouth or Barmaw.—The Dyfi springs from the foot of Arran-Fowddy; traverses a fine vale from Dinas-y-mowddu to Machyalleth; is joined by the Ceiriog; and forms an elongated estuary to the middle of the Cardigan bay coast at Aberyst.—The Rheidiol rises on the Cardigan side of Plynlimmon, within 4 m. of the sources of the Severn and the Wye; and seeks the sea in the port of Aberystwith.—The Ystwith has a common embouchure with the Rheidiol, and runs nearly parallel to it in direction.—The Eiron or Aeron traverses a lofty hill-screened valley to the sea at Aberiiron.—The Tyfi or Tivy rises among the mountains of the NE corner of Cardiganshire; traverses the plain of Llanbodor; and passes Newcastle-Emlyn; and finally moves across low ground, to the sea below Cardigan. This stream is navigable from the sea to Lampeter, a distance of nearly 30 m.—The Nevern and the Gwyn form, at their respective embouchures, the harbours of Newport and Fishguard.—The Western Cleddau, the Eastern Cleddau, and various other streams, enter the inner ends of various ramifications of Milford haven; and the two Cleddaus are navigable respectively to Haverford-West and to Canaston-bridge.—The Taff or Tawe rises on the E side of the Precelly mountain, and runs to Carmarthen bay, a little below the town of Llanharne. The Towy issues from a lake near Cwn-Berwyn, in the SE of Cardiganshire; becomes tidal and navigable at Carmarthen; and forms a partially conjoint estuary with the Taff at the head of Carmarthen bay.—The Llwhwr, Lwghor, or Loughor, divides the counties of Carmarthen and Glamorgan; and loses itself in the capacious eastward projection of Carmarthen bay, called the Burry river.—The Tawy and the Neath run SSW from the base of the Black mountains in Brecknockshire; traverse a rich and various mining district; and fall into the bay of Swansea.—The Avon rises in Glen-Corwg; runs SW to the coal and copper-mining field of Aberavon; and 3 m. thence glides over a bar into the east side of Swansea-bay.—The Ogmore runs S from among the central uplands of Glamorganshire; is joined by the Lany and the Ewenny; and falls into the British channel below Merthyr-Mawr.—The Taffe exceeds most of the Welsh rivers in the wildness of its features, and the vagaries of its course; it runs prevailing SE from the S base of Tre Beddw mountain; enters the vicinity of Merthyr-Tydvil; debouches into the plain of Llandaff; and rolls past Cardiff to the Bristol channel near the point of Penarth.—The

Rumney or Rhymny rises in Glyn-Colwyn, near the junction of the counties of Glamorgan, Brecknock, and Monmouth, runs S. and enters the Bristol channel about 3 m. N. of Penarth point.—Most of the streams we have named, from the Taffe and the Towy to the Rumney, though very limitedly or not at all navigable as rivers, are valuable feeders, or even ultimate outlets of different lines of canal navigation, formed, for the accommodation of the extensive mining and manufacturing districts of Glamorgan, Carmarthen, Pembroke, and Brecon. The Usk rises on the N side of the Black mountain; runs E to a confluence with the Honddy at Brecknock; and hence into Monmouthshire, and becomes a river of England.—The Wye rises on the S side of Plynlimmon about 1 m. from the source of the Severn; flows past the town of Rhayader, commences at Hay to trace for 3 or 4 m. the boundary with England, and passes away into the spacious plain of Herefordshire.—The Severn gushes from a spring on the NW side of Plynlimmon; passes the towns of Llanidloes and Newtown; receives the Rhiw, and various other tributaries; and, at its confluence with the Vyrnwy, leaves the principality, enters the great plain of Salop, and begins to wear the lofty distinction of the second river of England.—To describe, or even to enumerate, all the lakes of Wales, would be both a thankless and a very difficult task. The most distinguished for extent or beauty, or a combination of both, are, in North Wales, Llynaiw-Nantle, Llyn-Cywelin, Llynaiw-Llanberis, Llyn-Conway, Pembre-meer, and Tullyllyn; and, in South W., Llyn-Bychlyn in Radnorshire, and Llyn-Savathan in Brecknockshire. The lake of Bala, the most extensive in the principality, is only 8 m. long and 1 m. broad. The lakes of Llanberis lie amidst the sublime scenery of the Snowdon mountains; and, jointly with a few other lakes and pools of Carnarvonshire, monopolize probably four-fifths or more of the entire beauty and fame of Welsh lake scenery.

Minerals.] Anglesey, on its W side, exhibits granite, mica-slate, and serpentine; in its central district, it consists prevaillingly of slate; and on its SE side it has a small coal-field, apparently incumbent on mountain-limestone. A remarkable trap dyke intersects the rocks of the island. The Snowdon mountains, with their offshoots to the Bivals, at the S extremity of Carnarvon bay, consist principally of clay-slate, chlorite-slate, other schists, and felspar porphyry. Many of the mountains which range from Snowdon into Merionethshire are composed of porphyritic trap. On some of the Carnarvon mountains, at an alt. of 1,400 ft. above sea-level, beds of sand and gravel have been observed, intermixed with marine shells, said to resemble broken shells found on the sea-beach. A great part of the counties of Denbigh, Montgomery, Radnor, Cardigan, Carmarthen, and Pembroke, and the N division of Brecknock, display great sameness of geognostic and mineral character, and consist chiefly of the formations which convenience, till modern theories became better adjusted, requires still to be called greywacke or transition rocks. The formations continuous with the great transition district, and extending from Pembroke to Shropshire, are various beds of old red sandstone, alternating in the upper part with beds of greenish limestone and mountain limestone, and occasionally passing into greywacke, imperfect porphyry, and schistose sandstone. A range of beds of the lower transition limestone runs along the northern margin of the old red sandstone from Carmarthen to the boundary with Shropshire, in the direction of Wenlock edge. A considerable extent of mountain limestone, often resting on a thick bed of coarse conglomerate, and containing many valuable lead-mines, occurs in the Denbigh and Flint sections of the E side of North Wales. A coal-field, nearly 100 m. in length from east to west, and 5 to 30 m. in breadth, the most extensive coal-field in Great Britain, covers the transition rocks of the southern border of South W., from the boundary with England to the interior of Pembroke, and, except in Swansea and Carmarthen bays, is almost everywhere surrounded by mountain limestone and old red sandstone. If a view, full, minute, and in the phraseology of the most recent theories, be desired of the geognosy of Wales, particularly of its great transition district, the ordinary reader will find quite as ample a one as he can use in the work of B. J. Murchison, Esq. Silver ore is obtained in considerable quantities, in combination seriously with lead ore, spar, quartz, and copper. Copper occurs diffusely and in considerable plenty. Parys mountain in Anglesey, disco-

vered in 1768 to be richly metallic, was long supposed to consist wholly of copper, in a state of either native copper, sulphate, black ore, or malachite; but, though for many years singularly productive, it has lost its high fame, and is in a great degree abandoned. A richer ore than that of Parys, such as yields from 8 to 10 per cent. of the pure metal, is found at Llanberis, in Carnarvonshire; and ores of various value and extent occur near the extremity of the E screen of Beaumaris bay, at Ewcer Vraith in Cardiganshire, at Llanymynich in Montgomeryshire, and in several other localities. The sales of copper in W., in the year ending 30th June 1853, amounted to 29,344 tons; but a very large proportion of this was foreign copper. Lead is extensively diffused, particularly in the coa. of Flint, Denbigh, Cardigan, Carnarvon, Carmarthen, and Montgomery. A mineral tract in Cardiganshire was not long ago esteemed the richest in lead of any in Britain; but it has suffered greater declension in fame than even the Parys copper mountain, and has been wholly abandoned. In 1823, the lead mines of Flintshire were the most productive in the principality, those of Denbighshire the second in productiveness; and, in common with all other lead mines in the country, they yielded a total of 12,000 tons of pig lead. The lead ore raised in W. in 1853 amounted to 14,379 tons of ore, yielding 13,706 tons of lead. Iron-ore, in the various forms of hematites, brown ironstone, black ironstone, bog-ore, and pyrites, is partially diffused through Denbighshire, occurs to a noticeable amount in other parts of North W., and is abundant in the geognostic secondary district of South W. Though the ironstone is poorer than the ores of Staffordshire, and of other parts of England, its inferior richness is more than compensated by the contiguity of coal, and the comparatively high facility of mining. Iron-works were commenced at Merthyr-Tydfil, Aberdare, and Cyfartha in Glamorganshire, and at various places in Brecknockshire, not long after the middle of last century, others about 35 years ago at Rhiwabon in Denbighshire, and some, at various other places in the intervals; and so steadily and greatly have they succeeded that, in 1836, they were estimated to produce 2,000 tons more than the iron mines of all England,—the produce of England being 300,000 tons, that of South Wales 377,000 tons, and that of North Wales 25,000 tons. The iron made in W. in 1848 was 16,120 tons in North W., and 706,690 tons in South W.; or 722,810 tons in all. The total for England, Wales, and Scotland being 1,996,569 tons.—The great coalfield of the S division of South W. is so rich and extensive as to have been pronounced inexhaustible. Coal is raised in vast quantities, from this field, in the counties of Glamorgan, Brecknock, and Carmarthen; and occurs, in the vicinity of the upper ridge of limestone, in many parts of Pembroke-shire. The coal of North W. is inferior in quality, very much less in extent, and aggregately much more impracticable in position than that of South W. Roofing-slates are a very plentiful mineral production of North W.; and the quarrying and dressing of them constitute a chief support of the operative classes of the community. The largest quarries are in the hills over Dolauwen or Llandegall, and export their enormous produce from the town of Bangor. Quarries at Llanberis are connected by railway with Moel-y-Don, on the Mersey strait; quarries Llanfyllin, Cyllwyn, and adjacent places, make their shipments at Carnarvon; the Feethlog quarries, at Port Madoc and Maentwrog; the quarries of Llanrhydydd, at Trethfyll; and even the far inland and inconveniently situated quarries of the parish of Penmachno are able, from the superior quality of their produce, to hold free and brisk connection with the general market.

Botany and Zoology.] So numerous are the rare plants of W., and so profuse the variety of the more common kinds, that to name the whole would be to compose a botanical nomenclature of probably two-thirds or more of the whole British Flora. Almost every mountain and hill possesses natural memorials of having formerly been covered with wood; and during two generations past, many square miles of upland have been annually laid under plantation. Though large tracts of waste or feebly pastoral land are still bare, wood is aggregately abundant, and, at the same time, so rapidly increases as to exhibit promise of soon acquiring as much of its ancient dominion as cannot be profitably subjected to the plough, or disposed in pasture. Ash, beech, Welsh elm, walnut, sycamore, mountain-ash, holly, willow, and some other trees and shrubs are indigenous; oak acquires a good size in half-a-century; and the larch, though unknown in the country at the close of the last century, is the tree most approved, quickest in growth, and most extensively planted.—Wolves anciently infested the principality, but were attacked by system and premium, and, about a century and a-half ago, were exterminated. The wild goat, larger in size, and finer in hair than in most other mountainous countries, continued to bound from

crag to crag during years after the commencement of the present century; but is now completely banished. Roebucks were anciently numerous; but, so far back as 50 years ago, they were confined to the most intricate parts of the country, and could very rarely be seen. The martin, an old inhabitant, still haunts the woods of Merioneth and Caernarvon. The beaver, described by Giraldus as a native of Wales, and distinctly named in the Welsh laws, has long ceased to be traceable. The otter is a constant attendant on the banks of fishy secluded lakes and streams. Wild cats, weasels, badgers, squirrels, hedgehogs, hares, and rabbits are very numerous. Foxes are comparatively few. Seals are noticed by Pennant as natives of the coasts, and as seen most frequently between Llyn in Carnarvonshire, and the northern parts of Anglesey. Nearly the whole of the feathered tribe of W. are common to it with England; and the eagle, the falcon, the kite, and the hawk, are both more numerous and of rarer species. The golden eagle has his eyry among the mountains of Snowdon; the peregrine falcon breeds prolifically among the rocks of Llanidno; and the smerlus or merlin autumnally migrates from Wales to England. The long-eared owl, if not peculiar to the country, is characteristic. The nutcracker was once seen in Flintshire; and the shag has occasionally appeared on the shore near Holyhead. Game is aggregately abundant; grouse least plentiful, pheasants more so, and woodcocks and partridges very numerous. Reptiles and insects are of the kinds known in England. The chief fish which have been claimed as peculiar to Wales, but some of which are found in either England or Scotland, are the *Beaumaris* shark, the trifurcated hake, the gattorugine, and the trimaculated with the striped and gibbous wrasse, the crooked perch, the *salmo erwn* or sewin, the deformed trout of the river Eyniaon, the samlet, the torogoch, or red char, the gilt or silver char, and the *salmo lavaretus*, or gwyniad. The domestic animals aggregately present little peculiarity in either species or breed.

Agriculture.] Forty years ago, when agricultural enterprise was careering athwart England, and wearing the laurels of a successful revolution, a well-informed writer asserted that "Wales, in a general view, may be considered a century at least behind England as to its state of agriculture." Improvements in Welsh agriculture have been fewer, slower, and less expansive, than in the agriculture of almost any other section of the empire, and have hitherto worked out such limited results as, in the words of Macculloch, to leave "the agriculture altogether bad." "Wales in general," say Messrs. Kennedy and Grainger, "does not produce half what it is capable of doing under proper management." A proper rotation of crops continues to be limitedly known, or but seldom introduced. Black oats are the prevailing cereal crop on high arable grounds; and oats of several varieties are elsewhere cultivated far more extensively than other grains. The vales of Glamorgan and the Clwyd, and some other low grounds of rich argillaceous or otherwise alluvial soil, are the main or only grounds on which wheat is raised. The cultivation of the potato and the turnip is extending,—of the potato, rapidly,—and of the turnip, considerably. The farms are in some instances large, in the great majority small; and average, in South W., from 50 to 60 acres. Leases, though not uncommon, are usually so devoid of restrictions as to management, that, before they expire, the lands held under them are scourged almost into sterility. Horses, cattle, and sheep are larger in size, and more intermixed with introduced breeds in the vales than in the uplands. Merlins—the

small, hardy, sure-footed, native Welsh ponies—are still reared in considerable numbers in Merionethshire, and in less considerable numbers in Montgomeryshire, but are elsewhere generally superseded or neglected. A superior breed of horses has long been reared in the vales of Montgomeryshire. Black cattle are a main object of Welsh husbandry, and are principally depended on for the means of paying rent and other current demands. The upland sheep are in high repute for their mutton; the total stock of sheep in the principality is estimated at 1,250,000; and the total annual produce in wool is supposed to be upwards of 10,000 packs. The total rental of land in W. in 1810-11 was £1,622,986 or an average of 6s. 10d. per acre; in 1841, it was £2,206,148, or an average of 9s. 3d. per acre; the average for England being 19s. 2d. per acre.

Manufactures and commerce.] Metallic, lapidose, and earthy subjects of manufacture, figure largely in the principality's productive industry; but in the great majority of instances, or in their connection with native mining, they have been already noticed in the section on minerals. The Welsh are equal to the best, and superior to the most, of the other divisions of British population, in all the arts of smelting and refining ores; hence, though tin is not a native metal, Wales is a great seat of the manufacture of tin-plate or white iron; and almost all the copper raised in Cornwall is carried to Swansea and other places in the South Wales coalfield to be smelted. A manufacture of writing-slates, slate chimney-pieces, slate inkstands, and other articles formed of slate, makes a prominent figure in Bangor.—The woollen manufacture, in the articles of hosiery, strong cloth, small cloth, but principally the well-known Welsh flannel, is diffused, in one or more of its departments, over the whole principality; yet, while everywhere visible, is most prominent in Montgomeryshire. Thirty years ago strong cloth was made principally in the neighbourhood of Dolgelly and Machynlleth in Merionethshire; small cloth, in the large parish of Glynn in Denbighshire; flannel, in Montgomeryshire, and within a circle of about 20 m. round Welshpool; and stockings, wigs, socks, gloves, and other small knit articles, in the town and neighbourhood of Bala. Considerable manufactures of cotton and cotton twist were established 50 years ago or upwards, in the counties of Flint and Denbigh; and principal factories continue to be in operation at Northop, Greenfield, Sea-viog, Denbigh, Holywell, and Caerwys. The silk manufacture was several years ago introduced. Notwithstanding its great extent of sea-coast, the number of its harbours, the excellence of many of its roadsteads and landing-places, the facility of its communication all round with the open sea, and the great aggregate amount of its interior productive industry, W. has surprisingly little commerce. Its exports are principally the produce of its mines, its black cattle, and its woollen fabrics; and its seaward trade, with a small total of exceptions, chiefly at Swansea and Caernarvon, all terminates in British ports. Few of the Welsh ports possess vessels of very considerable tonnage.

Divisions and Towns.] W. was anciently bounded, nearly all the way on the E, by the Dee and the Severn; and is now minus its ancient extent, the whole of Monmouthshire, and part of Gloucestershire, Herefordshire, Salop, and Cheshire. In the time of Llewellyn ap Gruffydr, the last prince of North Wales, it was divided into the three dynasties of Gwynedd, Deheubarth, and Powysland. Gwynedd, or North W., comprehended Anglesey, Caernarvon, and part of Merioneth, Denbigh, and Flint. Deheubarth, or South W., comprehended Cardigan,

Pembroke, Carmarthen, Glamorgan, Monmouth, and part of Brecknock, Radnor, Gloucester, and Hereford; and Powysland, or East W., comprehended part of Merioneth, Denbigh, Flint, Radnor, Brecknock, Salop, and Chester. In 940, the whole tripartite country was consolidated under one great government; but, previous to its falling under the power of the Anglo-Normans, it was partitioned into the divisions which it still retains of North and South W.; at some period not well ascertained, but supposed to have been about the epoch of the Anglo-Norman possession, it was subdivided into counties; and it then retained, and continues still to do so, a much earlier distribution into *cantref*s or hundreds, and *commotes*, *comots*, or communities. North W., according to the present civil division, comprehends the six cos. of Anglesey, Carnarvon, Merioneth, Denbigh, Flint, and Montgomery; and South W., the 6 cos. of Cardigan, Radnor, Brecknock, Glamorgan, Carmarthen, and Pembroke. The parishes do not correspond with the civil divisions; they are variously stated in number at 751 and 869; and they are included in the dio. of St. Asaph on the NE, that of Bangor on the NW, that of St. David on the SW, and that of Llandaff on the SE.—The number of principal or returning boroughs is 14; and of market-towns is 58; the largest towns in the order of pop. are Merthyr-Tydvil, Swansea, Pembroke, and Cardiff; and the principal coast-towns are Bagillt, Rhyl, Aberconway, Bangor, Beaumaris, Amlwch, Holyhead, Carnarvon, Nevin, Pwllheli, Port-Madoc, Barmouth, Aberfydi, Aberystwith, Cardigan, Newport, Fishguard, Milford, Haverford-West, Tenby, Carmarthen, Kidwelly, Oxwich, Swansea, and Cardiff.

Statistics.] Two members of parliament are returned by each of the cos. of Carmarthen, Denbigh, and Glamorgan; one by each of the other nine counties; one by each of the boroughs of Brecknock and Merthyr-Tydvil; and one by each of the districts of boroughs whose principal or returning individuals are Beaumaris, Carmarthen, Cardigan, Carnarvon, Denbigh, Flint, Cardiff, Swansea, Montgomery, Pembroke, Haverford-West, and Radnor. The total number of members returned is thus 29.—The sum expended for the relief of the poor, in 1836, was £255,549; in the year ended March 25, 1841, it was £266,000. The rate of expenditure for relief of the poor, per head of pop., in the latter year, was 5s. 10d. The total amount of money levied by assessment, in name of poor rates, in this last year, was £342,264. The total number of in-door and out-door paupers relieved throughout Wales during the quarter ending Lady-day, 1841, was 73,406, or a proportion of 9 per cent. to pop. in 1851, it was 68,224.—The annual value of real property, in 1815, was £2,328,970.—Houses assessed to hearth-tax, in 1690, 77,291; inhabited houses in 1841, 188,196; in 1851, 200,087. Pop. in 1700, 866,500; in 1750, 450,200; in 1801, 541,546; in 1821, 717,438; in 1831, 805,236; in 1841, 911,321; in 1851, 1,005,721.—The total number of persons committed for trial or bailed, throughout Wales, in 1848 was 570; in 1841, 628; in 1838, 441; in 1834, 442.

History.] Ancient Wales, or all the country west of the Dee and the Severn, was inhabited, at the period of the Roman invasion, by the *Ordovices*, the *Silures*, and the *Dinetae*; and owing to these tribes having been Celtic in origin, and known under the comprehensive name of *Cymri* or *Cimbri*, the country received from the Romans, and long continued to wear the appellation of *Cambria*. The Romans encountered fierce and prolonged resistance from the Cambrian tribes; but eventually subdued them, took possession of their country, dignified it with the name of *Britannia Secunda*, and proceeded, as they had previously done in Britannia Prima, to build towns, appoint and garrison stations, construct iters, and establish jurisdictions. After the Roman abdication, Cambria was for many years con-

valued with intestine feuds, yet it acquired consolidation and strength from the necessity of checking the predatory incursions of the Saxons, and was long enabled to maintain a rude but sturdy independence. From the date of the arrival of the Saxons, till 708, a succession of pendragons, or sovereign princes, held their court at Diganway on the river Conway, and at Caer Segont near Carnarvon; and aided by the *regyn* or toparchs of six principalities, into which Cambria was divided, waged a various but generally successful warfare of resistance against the Saxons. The Cambrians, in the course of the prolonged war, seemed so repugnant to an union with their would-be masters, that they were now designated by them Welsh,—a name which has been variously supposed to mean strangers, wanderers, runaways, Celts. In 708, the Cambrian pendragons, or imperial sovereignty, terminated at the death of Cadwallader; and about 90 years after, Offa, king of Mercia, conquered a belt of the country along the E, erected the celebrated artificial boundary from the Wye to the mouth of the Dee, which is still called *Clawdd Offa*, or *Offa's Dyke*, and thus compressed the principality within nearly its present limits. Yet, in spite of the great frequency of their inroads, and the apparent security of their eventual partial conquest, the Saxons appeared to have acquired no permanent footing, and, with the exception of the work of Offa, have left to modern times scarcely a vestige of their presence. The tripartite division of Wales terminated in the accession to their several thrones of the reputedly benevolent prince and wise legislator Edwin Dda, or the Good, who died in 948. After Edwin's death, the Danes and the Saxons alternately, or at different points, scattered anarchy and murder athwart the country; and, in 1091, Robert Fitzhamon, a Norman baron, commenced a course of invasion which terminated in the subjugation of Glamorganshire, the conquest of all other low grounds of Wales, and the establishment of an absolute jurisdiction and a grinding despotism, administered by nobles who were called *Lords Marchers*. The resolute Cambrians still and long continued to struggle for independence; they performed deeds of the most heroic courage, and made a persevering and lion-hearted stand for liberty unsurpassed in the annals of almost any nation in the world; yet, in spite of oft renewed efforts, and a sort of dropping fire maintained for ages, they virtually lost all independence, in 1282, at the death of their last reigning prince, *Llewellyn ap Gryffith*. Edward I., who completed their subjugation, allowed them to retain possession of their estates, and to enjoy as much liberty as comported with the laws of England. But the *Lords Marchers* practically annulled his benign provisions, and the Welsh did not experience relief till the enactment, in Henry VIII's reign, of the statute which enjoined the appointment of justices-of-peace, justices-of-the-quorum, and justices-of-gaol-delivery, invested with the same powers as those of England, and which originated the system of judicature called the great sessions of Wales, and superseded only in the year 1831.

WALES, a parish partly within the E. R., and partly in the W. R. of Yorkshire, 7 m. SE of Rotherham. Area 1,950 acres. Pop. in 1851, 266.

WALES, a township of Kennebec co., in the state of Maine, U. S., 18 m. SW of Augusta. Pop. in 1850, 612.—Also a township of Hampden co., in the state of Massachusetts, 63 m. WSW of Boston, drained by a head stream of Quinnebaug river. Pop. in 1840, 686; in 1850, 711.—Also a township of Erie co., in the state of New York, 248 m. W of Albany. It has an undulating surface, drained by Seneca creek, and is generally fertile. Pop. in 1840, 1,987; in 1850, 2,124.—Also a township of St. Clair co., in the state of Michigan, 98 m. E by N of Lansing. Pop. in 1850, 189.

WALES (New South). See NEW SOUTH WALES.

WALESBY, a parish in Lincolnshire, 2½ m. E of Market-Raisen. Area 2,580 acres. Pop. in 1831, 247; in 1851, 381.—Also a parish in Nottinghamshire, 3 m. NE of Ollerton. Area 1,260 acres. Pop. in 1831, 340; in 1851, 362.

WALESVILLE, a village of Whitestone township, Oneida co., in the state of New York, U. S., 90 m. WNW of Albany.

WALFISH. See WALFISCH.

WALFORD, a parish in Herefordshire, 2½ m. SW of Ross. Area 4,241 acres. Pop. in 1831, 1,158; in 1851, 1,217.—Also a joint township with Letton and Newton, in Leintwardine p., Hereford. Pop. in 1831, 212.

WALGAU, a village of Bavaria, in the circle of Upper Bavaria, and presidial of Werdensfels. Pop. 220.

WALGHERTON, a township in the p. of Wyburnbury, Cheshire, 3½ m. SE by E of Nantwich. Area 838 acres. Pop. in 1831, 231; in 1851, 213.

WALGRAVE, a parish in Northamptonshire, 7 m. NW of Wellingborough. Area 2,040 acres. Pop. in 1831, 575; in 1851, 618.

WALHAM-GREEN, a chapelry in the p. of Fulham, Middlesex, 6 m. SW by W of St. Paul's. Pop. in 1851, 4,380.

WALHAM-SAINT-PAUL-SART-LEZ-WALHAM, a department and commune of Belgium, in the prov. of Brabant, and arrond. of Nivelles, watered by the Hain. Pop. of dep. 1,705; of com. 972.

WALHAUSEN, a village of Prussia, in the reg. of Erfurt, and circle of Heiligenstadt. Pop. 528.

WALHONDING, a river of the state of Ohio, U. S., formed in the NW part of Holmes co., by the confluence of the Muddy and Black forks; flows first S, then E; joins the Tuscarawas at Coshocton, and thence takes the name of Muskingum.

WALINCOURT, a commune of France, in the dep. of the Nord, and cant. of Clary, 9 m. SE of Cambrai. Pop. in 1846, 2,602. It has a silk factory.

WALJERS, a lake of New South Wales, near the l. bank of the Lachlan, about 100 m. above the confluence of that river with the Murrumbidgee, and connected on the NW with Lake Boyongoo.

WALKENAAM, or **WAKENAAM**, an island of British Guayana, at the mouth of the Essequibo, to the NW of Leguan island, in 8 lat. 7° 5'. It is well-cultivated, and produces sugar and coffee in great abundance. Near the N extremity is a village named Zelandia.

WALKENRIED, a town of Brunswick, in the circle and 36 m. SW of Blankenburg, at the foot of the Hartz, on the Wieda. Pop. 507. It is enclosed by walls, and has an ancient abbey and an hospital. In the vicinity are coal and agate mines.

WALKER, a county in the N part of the state of Alabama, U. S., comprising an area of 1,687 sq. m., drained by Mulberry fork of Black Warrior and its branches, Sipsey river, and Blackwater and Lost creeks. It is hilly, but is in some parts fertile, producing cotton in considerable quantities. Pop. in 1840, 4,032; in 1850, 5,124. Its capital is Jasper.—Also a county in the NW part of the state of Georgia, comprising an area of 700 sq. m., drained by Chattooga and Chickamanga rivers, and intersected by the Western and Atlantic rivers. It has a diversified surface, but is generally fertile. Pop. in 1840, 6,572; in 1850, 12,109. Its capital is Lafayette.—Also a county in the S part of the state of Texas, comprising an area of 1,042 sq. m., drained by head branches of San Jacinto river, and by affluents of Trinity river, by which it is bordered on the NE. The surface is hilly, but affords fine pasturage. Pop. in 1850, 3,964. Its capital is Huntsville.—Also a township of Centre co., in the state of Pennsylvania, 60 m. NW of Harrisburg, drained by Little Fishing river. Pop. in 1840, 11,810.—Also a lake of Mallard co., Utah Territory, 358 m. W of Fillmore, at the base of the Sierra-Nevada range. It is 80 m. in length, and 7 m. wide, and receives a river of the same name.

WALKER, a township in the p. of Long-Benton, Northumberland, on the N bank of the Tyne, 8 m. E of Newcastle-upon-Tyne. There are extensive chemical works and iron foundries here. Pop. in 1851, 3,968.

WALKER (CAPE), a headland forming the NE extremity of Russell island, at the western entrance of Barrow strait, in the Arctic ocean, in N lat. 74° 10', W long. 96° 10'.

WALKERIA, a settlement of Western Africa, on the Rio Nunes, 35 m. from the mouth of the river, which 2 m. above this settlement is much interrupted by a series of basaltic rocks.

WALKERINGHAM, a parish in Notts, 4 m. NW of Gainsborough. Area 3,000 acres. Pop. 608.

WALKERN, a parish in Hertfordshire, 4 m. E by N of Stevenage. Area 2,924 acres. Pop. 758.

WALKERVILLE, a town of South Australia, in the co. of and 3 m. from Adelaide.

WALKHAMPTON, a parish in Devon, 4 m. SE of Tavistock. Area 10,540 acres. Pop. in 1851, 751.

WALKI. See **VALKI**.

WALKINGTON, a parish in the E. R. of Yorkshire, 2½ m. SW of Beverley. Area 5,460 acres. Pop., with the township of Provost's-Fea, in 1801, 403; in 1831, 558; in 1851, 699.

WALKREN. See **WALCHEREN**.

WALL, a chapelry in the p. of St. John Lee, Northumberland, 3 m. N of Hexham. Area 1,623 acres. Pop. in 1831, 495; in 1851, 474.

WALLABOUT BAY, an indentation of the coast of New York, U. S., between Brooklyn and Williamsburg.

WALLABY, a river of Tasmania, in the co. of Monmouth, an affluent of Coal river.—Also a group of islands, two in number, in the Abrolhos, distinguished as East and West Wallaby.

WALLACE, a parish of Van Diemen's Land, in the co. of Monmouth, bounded on the E by the Jordan.

WALLACEBURGH, a settlement of Upper Canada, in the township of Sombra, at the forks of Bear creek, 9 m. from the river St. Clair. Pop. 60.

WALLACETOWN, a modern but populous suburb of Ayr, in Ayrshire, situated on the E side of Newton-upon-Ayr, forming with it one compact town, and separated from the royal burgh only by Ayr river. See **AYR**.

WALLAGORING, a lake of New South Wales, in the co. of Argyle.

WALLAU, a village of Nassau, in the bail. of Hochheim. Pop. 770.—Also a village of Hesse-Darmstadt, in the prov. of Upper Hesse, and 27 m. NNW of Geissen. Pop. 790. It has a paper-mill.

WALLAROBBA, a village of New South Wales, in the co. of Durham, on a creek of the same name.

WALLASEY, **WALLASEA**, or **WALL-FLEET ISLAND**, a peninsula about 4 m. in length and 1 m. in breadth, between Paglesham and the river Crouch, in the hundred of Rochford, Essex.

WALLAWALLAU, a river of Oregon territory, which has its source in the Blue mountains; flows first N, then W, and joins the Columbia river near Fort Wallawalla.

WALLAZEY, anciently called **KIRKBY-IN-WALLLEY**, a parish in the co.-palatine of Chester, 20 m. NE of Chester, containing the townships of Liocard, Poulton-with-Seacombe, and W., and forming the NW peninsular corner of the county. Area 17,775 acres. Pop. in 1831, 3,247; in 1851, 3,339.—A creek of the Mersey, known as Wallasey-pool, runs inland a considerable way in this p. It has been projected to erect a bridge across this pool,—an undertaking of no slight importance to the inhabitants on the other side of the water, as it will have the effect of shortening the distance between Birkenhead, Seacombe, and New Brighton about 7 or 8 m. An embankment at Wallasey-Leasowes was commenced about 25 years ago, to resist the encroachments of the sea. It is situated on the Cheshire coast, about half-way between New Brighton and Hoylake, and equi-distant between the Dee and the Mersey, where a tract of land, running for the most part parallel with the coast, and comprising 1,400 Cheshire or nearly 3,000 statute acres, is below the level of a tide 25 ft. above the old dock-sill at Liverpool. The owners of this area of land pay one moiety of the expenses of constructing this embank-

ment, and the corporation of Liverpool the other. The latter do this in order to preserve the port, since, had it not been for the embankment, the sea would, ere this, have forced a passage over the flats, in the direction of Wallasey-pool, and the channels of navigation would have been choked by accumulations of silt, and the formation of banks.

WALLBACH, a village of Baden, in the circle of the Upper Rhine, and bail. of Sackingen. Pop. 418.—Also a village of Hesse-Darmstadt, in the prov. of Starkenburg and presidial of Hochst. Pop. 226.—Also a village of Saxony, in the circle of Leipsic, and bail. of Leisnig. Pop. 298.—Also a village of Saxe-Meiningen, and bail. of Wasungen. Pop. 270.—Also a village of Switzerland, cant. of Aargau, and bail. of Rheinfelden. Pop. 651.

WALLBERG, a village of Austria, in Moravia, in the circle of Olmutz. Pop. 570.

WALL-BOTTLE, a township in the p. of Newburn, Northumberland, 4 m. W by N of Newcastle-upon-Tyne. Pop. in 1831, 688; in 1851,

WALLBURG, a village of Baden, in the circle of the Upper Rhine, and bail. of Ettenheim. Pop. 550.

WALLDITCH, a parish in Dorsetshire, 2 m. E by S of Bridport. Pop. in 1831, 164.

WALLDORF, a village of Baden, in the circle of the Lower Rhine, and bail. of Wiesloch. Pop. 2,140.—Also a village of Hesse-Darmstadt, prov. of Starkenburg, and presidial of Langen. Pop. 560.—Also a village of Austria, in Moravia, in the circle of Iglau. Pop. 240.—Also a village of Prussia, in the regency of Dantzic, and circle of Elbing. Pop. 240.—Also a village of Saxe-Meiningen, and bail. of Meiningen. Pop. 1,570.

WALLDURN, a cant. and town of Baden, in the circle of the Lower Rhine, in the Odenwalde. Pop. of bail., 11,000. The town is 15 m. SW of Wertheim. Pop. 2,980. It has a castle, a church, and a Capuchin convent.

WALLE, a village of Hanover, in the district of Ostfriesland. Pop. 290.—Also a village in the prov. of Slade, and bail. of Verden. Pop. 270.—Also a village in the prov. of Bremen. Pop. 615.

WALLEFELD, a village of Prussia, in the reg. of Cologne, and circle of Gummersbach. Pop. 930.

WALLEGA, an extensive district to the S of Abyssinia, stretching from the Dedhesa river westwards to the river Baro. Its surface is described as level and chiefly desert.

WALLEN, a village of Prussia, in the regency of Königsberg, and circle of Ortelburg. Pop. 220.—Also a village in the regency of Arnberg, and circle of Mescheda. Pop. 815.

WALLENBERG, a mountain of Switzerland, in the cant. of Glaris, near Mollis. It is covered with wood, affords fine pasture, and has a mineral spring.

WALLENBON, a valley of Prussia, in the regency of Treves, and circle of Daun. Pop. 290.

WALLENBRUCK, a village of Prussia, in the regency of Minden, and circle of Herford. Pop. 1,100.

WALLENDORF, a village of Prussia, in the regency of Breslau, and circle of Ratibslau. Pop. 400.

—Also a village in the regency of Königs, and circle of Niedenburg. Pop. 272.—Also a village in the regency and circle of Merseburg. Pop. 180.—Also a village in the regency of Treves, and circle of Bittsburg. Pop. 490.—Also a village of Saxe-Meiningen, in the principality of Saalfeld, on the Lichte. Pop. 778. It has manufactories of porcelain and of colours.—Also a village of Nassau, in the bail. of Herborn, near Beilstein.

WALLENDORF, or **OLASZ**, a town of Hungary, in the comitat of Zips, near the l. bank of the Herma, and 12 m. SE of Lutschau. Pop. 3,000. It has a Catholic and a Lutheran church.

WALLENFELS, a market-town of Bavaria, in the circle of Upper Franconia, and presidial of Kronach, on the Rodach, 26 m. N of Bayreuth. Pop. 1,121. It has several saw-mills, and quarries of sharpening stones. Agates are found in the vicinity.

WALLENHAUSEN, a village of Bavaria, circle of Swabia, and presidial of Rogenburg. Pop. 396.

WALLENHORST. See **WALLENHOFER**.

WALLENRIED, a village of Switzerland, in the cant. of Freiburg, and circle of the See. Pop. 220.

WALLENROD, a village of Hesse-Darmstadt, in the circle of Upper Hesse, and presidial of Lauterbach. Pop. 760.

WALLESEN, a market-town of Hanover, in the principality of Kalenberg, and bail. of Lauenstein, on the Saale, 27 m. SSW of Hanover. Pop. 580.

WALLENSTADT (LAKE OF), a lake of Switzerland, in the cant. of Glarus and St. Gall, 9 m. SE of the lake of Zurich, at an alt. of 1,385 ft. above sea-level. It is 11 m. long, and 2 m. wide, and communicates with that of Zurich by the river Limmat. It has a depth of 500 ft., and is surrounded on all sides, except at the two extremities, with lofty rocks and mountains, interspersed with forests, meadows, and villages. Its chief feeder is the Seez. Its navigation is occasionally attended with hazard from sudden squalls.

WALLENSTADT, a town of Switzerland, in the cant. of St. Gall, situated near the E extremity of the lake of Wallenstadt, 40 m. ESE of Zurich. Pop. 1,800. The trade between Zurich and Italy is carried on chiefly through this town.

WALLERN, a town of Bohemia, 85 m. SSW of Prague. Pop. 2,100.

WALLER-SEE, a small lake of Upper Austria, in the circle of Salzburg.

WALLERS, a village of France, in the dep. of Nord, 6 m. NW of Valenciennes. Pop. of com., 2,700.

WALLERSTEIN, a town of Bavarian Franconia, 4 m. N of Nordlingen. Pop. 1,950.

WALLHAUSEN, a town of Prussian Saxony, on the river Helme, 4 m. W of Sangarhausen.

WALLI, a small kingdom of Western Africa, extending along the N bank of the Gambia, having Yani on the W, and Woolli on the E.

WALLINGA, a village of New South Wales, in the co. of St. Vincent, on the coast.

WALLINGFORD, a parl. borough in the hund. of Moreton, Berks, containing four parishes, with the liberty of the Castle, and the liberty of Clapcott. Area 821 acres. Pop. in 1801, 1,744; in 1831, 2,467; in 1851, 2,819.—The town is situated on the W bank of the Thames, about 3 m. from the high road between London and Oxford and on the road between Reading and Oxford, 46 m. from London. The river is here crossed by a stone-bridge about 800 yds. in length. Having no manufactures, and little thoroughfare, its chief importance is derived from being the market-town for the surrounding county. There is some small trade in malt, and in corn and flour. It has canal-communication through the Thames, with Bath, Bristol, and Birmingham. This town was a borough by prescription, and returned 2 members to parl. since the 23d Edward I. By the Reform act its representation was reduced to one; and the several ps. of Brightwell and Sotewell, with part of the p. of Cholsey and Clapcott liberty, all adjoining; with the ps. of North and South Moreton, and parts of Aston-Tirrell, and Aston-up-Thorpe, all in Berkshire; and the ps. of Bensington, Crowmarsh, and Newnham-Murton, in Oxfordshire, were united with it. The pop. within the boundaries of the parl. borough, in 1831, was 7,159; in 1851, 8,064. The number of electors in 1852 was 428.—The name of this town is supposed

to be derived from the British word *Gualen*, or the Roman *Vallem*, each signifying 'a fort,' combined with the circumstance of there having anciently been a ford over the Thames at this place.

WALLINGFORD, a township of Rutland co., Vermont, U. S., 32 m. W of Windsor. Pop. 1,600.

—Also a township of New Haven co., Connecticut, 12 m. NNE of New Haven. Pop. 2,200.

WALLINGROVE, a village of New South Wales, in the district of New England, on a branch of the Severn.

WALLINGTON, a parish in Hertfordshire, 8 m. E by S of Baldock. Area 1,950 acres. Pop. in 1831, 218; in 1851, 254.—Also a parish in Norfolk, 3 m. N by E of Downham. Area 1,460 acres. Pop. with Thorpland in 1831, 47; in 1851, 58.—Also a hamlet in the p. of Beddington, Surrey, 3 m. WNW of Croydon, on the banks of the Wandale. Pop. in 1831, 933; in 1851, 881.—Also a township in the p. of Hartburn, Northumberland, 3 m. SW of Hartburn. Area 1,781 acres. Pop. in 1831, 183; in 1851, 204.

WALLIS. See **VALAIS**.

WALLIS, a lake of New South Wales, in the co. of Gloucester, near Cape Hawke.—Also a creek in the co. of Northumberland, an affluent of the Hunter.—Also a plain in the same co., to the S of the Hunter, and W of Wallis creek.—Also an island of Port Hunter, at the entrance to Fullerton Cove.—Also an island near the NW coast of Australia, in S lat. 10° 51' 25".

WALLISCHBICHEN, a town of Bohemia, in the circle of Prachin. Pop. 2,100. It has tile works, distilleries, and woollen and linen factories.

WALLIS'S BAY, a bay in the straits of Magal-haan, 12 m. NE of Cape Forward.

WALLIS'S ISLAND, a small island near the SE coast of New Ireland, at the entrance of Gower's harbour, 9 m NW of Cape St. George.

WALLIS'S ISLANDS, a group of 9 islands, in the S. Pacific, in S lat. 13° 24', discovered by Wallis in 1767. The inhabitants are robust and active.

WALLKILL, a township of Orange co., New York, U. S., 20 m. W of Newburgh. Pop. 4,200.

WALLKILL, a river of North America, which rises in Sussex co., in New Jersey, U. S., and flows NNE into the Rondoutkill, 7 m. above the entrance of the latter into the Hudson.

WALLOE, or **WORO**, a small port on the Ivory coast of Africa, in N lat. 5° 20'.

WALLOOSTOOK, a river of Maine, U. S., which rises in Somerset co., and flows NNE to the St. Francis river.

WALLOP-NETHER, a parish in Hants, 4 m. W by N of Stockbridge. Area 7,201 acres. Pop. in 1831, 900; in 1851, 962.

WALLOP-OVER, a parish in Hants, 5½ m. WNW of Stockbridge. Pop. in 1841, 481.

WALLRABONSTEIN, a village in the duchy of Nassau, 4 m. NW of Idstein. Pop. 300.

WALLS-AND-FLOTA, a united parish at the SW extremity of Orkney. W. consists of the S half of the island of Hor [which see]; and is about 8 m. long, and 7 m. broad. Flota consists of the islands of Flota, Fara, Cava, and Gransey [see Flota]; and, including intervening marine straits, is about 5½ m. long, and 4 m. broad. The inhabitants are small farmers and fishermen, and are dispersed over the parish. Pop. in 1831, 1,436; in 1851, 1,667.

WALLS-AND-SANDNESS, a united parish in Shetland, consisting of the districts of Walls and Sandness on the mainland; and of the islands of Fowla, Papa-Strou, and Vala: which see. The mainland districts lie in the most westerly part of

the mainland. They are jointly about 7½ m. long from N to S; and about 5 m. broad. The inhabitants, as elsewhere in Shetland, all unite the vocations of farming and fishing. The rocks are gneiss, granitic porphyry, quartz rock, and old red sandstone. Pop. in 1831, 2,148; in 1851, 2,442.

WALLSDORF, a village in the duchy of Nassau, 4 m. NNE of Idstein. Pop. 600.

WALLSEL, a village of Austria, on the r. bank of the Danube, 45 m. W of Saint-Polten. Pop. 500.

WALLSEND, a parish of Northumberland, 4 m. ENE of Newcastle, stretching along the Tyne, and intersected by the Newcastle and N. Shields railway. It is about 1½ m. in breadth from N to S; and 8 m. in length from E to W; and contains the townships of Howden-Pans, W., and Willington. Area 2,787 acres. Pop. in 1801, 3,120; in 1831, 5,510; in 1851, 5,721. The v. situated near the Shields road, is large and well-built; contains several good houses, and has a spacious green in the centre. Extensive coal-mines exist in the neighbourhood; and the place gives its name to an excellent variety of coal, immense quantities of which are shipped for London. Near W. church, a four-inch pipe connected at the pit bottom with an insulated portion of coal strata of about 4 acres, is carried up as high as the head-gear; and from the orifice of this tube there constantly issues an ignited stream of gas forming a flag of flame 8 or 9 ft. in length. Mr. Lyell calculates that ten times as much gas is evolved annually by this pipe as is used in illuminating the town of Sheffield.

WALLSTOWN, a parish in co. Cork, 3 m. E by S of Doneraile. Area 3,056 acres. Pop. 950.

WALL-TOWN, a township in the p. of Haltwhistle, Northumberland, 2½ m. NW of Haltwhistle. Here, according to Hedley, was the site of the Roman station *Vindolano*. Area 2,956 acres. Pop. in 1831, 96; in 1851, 81.

WALLUBGHUR, a hill-fortress of Hindostan, in the prov. of Bejapur, district of Darwar.

WALMER, a parish and town in Kent, on the high road from Deal to Dover. Area of p. 1,079 acres. Pop. in 1831, 1,779; in 1851, 2,165.—The town, which is much resorted to for sea-bathing, and contains several good houses and marine villas, is situated on a rising ground, about 1 m. S of Deal, and ½ m. from the sea-shore. Close to the shore stands Walmer castle, erected by Henry VIII. at the same time with those of Deal and Sandown, for the defence of the coast. It consists of 4 round lunettes of very thick arched stone-work, with large port-holes; and a round tower in the centre; the whole being compassed by a fosse. This fortress, which is the residence of the lord-warden of the cinque-ports, and was fitted up in modern times for that functionary's use, commands a fine view of the Downs, the adjoining channel, and, in a clear day, of the cliffs of Boulogne and Calais. The duke of Wellington, who held the office of warden, died in this castle on the 14th September, 1852.

WALMERSLEY, a township and chapelry in the p. of Bury, co. palatine of Lancaster, 2½ m. N of Bury. There are coal-mines and extensive spinning-mills here. Area, 5,056 acres. Pop. in 1831, 3,456; in 1851, 4,560.

WALMESGATE, or **WALMSGATE**, a parish in Lincolnshire, 8 m. NNW of Spilsby. Area 920 acres. Pop. in 1831, 72; in 1851, 79.

WALMESLEY, or **WALMSLEY**, a chapelry in the township of Turton, p. of Bolton-le-Moors, co. palatine of Lancaster, 4½ m. N of Bolton.

WALNEY (ISLE OF), an island and chapelry in the p. of Dalton-in-Furness, co. palatine of Lancaster. Pop. in 1831, 848; in 1851, 921. The island

is about 10 m. in length from NW to SE, and almost touches the mainland at its N extremity. There is a road to it, across the sands at low-water, from Hawcoat. It lies on a bed of moss, and all round the island moss is found by digging through a layer of sand and clay which covers it. It has the appearance of a bank or wall in the sea; hence it was called by the Saxons Waghney, Woney, or Walney, 'a walled island.' It contains two hamlets, Biggar and Scale. The castle, known as the 'Pile of Fowdrey,' stands on the N extremity of the island, and is also insulated at high-water. There are, indeed, several insulated portions of land or rock around it, which appear connected with it at low-water. On the S end of W. is a light-house, in N lat. $54^{\circ} 2' 54''$, W long. $8^{\circ} 10' 30''$. There are some curious intermitting springs in this island, which, though perfectly fresh, ebb and flow with the tide.

WALNUT, a township of Juniata co., in Pennsylvania, U. S., 35 m. NW of Harrisburg.—Also a township of Jefferson co., Iowa, 48 m. SW of Iowa.

WALNUT (BIG), a river of Ohio, which rises in Delaware co., and joins the Scioto, about 10 m. below Columbus.

WALNUT-COVE, a village of Stoke co., in N. Carolina, 100 m. WNW of Raleigh.

WALNUT-CREEK, a river of Ohio, which runs into the Scioto, 6 m. above Circleville.—Also a township of Holmes co., in Ohio, 74 m. NE of Columbus. Pop. 1,077.—Also a v. in Buncombe co., N. Carolina.

WALNUT-GROVE, a village of Knox co., Illinois, 91 m. N by W of Springfield.—Also a village of Mercer co., New Jersey, 41 m. N of Trenton.—Also a village of Kanawha co., in Virginia.

WALNUT-HILL, a village of La Fayette co., Arkansas, U. S., 180 m. SW of Little Rock.—Also a v. of Marion co., Illinois, 95 m. S by E of Springfield.

WALNUT-VALLEY, a township of Warren co., in New Jersey, 52 m. N by W of Trenton.—Also a village of Rock-Island co., in Illinois, 120 m. NNW of Springfield.

WALPOLE, a township of Talbot district, in Upper Canada, skirting on the S on Lake Erie, and on the NE on Tuscarora township.—Also an island in the NE part of Lake St. Clair, in Upper Canada. It is 10 m. in length by $8\frac{1}{2}$ m. in breadth, and is inhabited chiefly by Indians, whose number in 1842 amounted to 1,140.—Also a township and village of Norfolk co., in Massachusetts, U. S., 18 m. SW of Boston. Pop. 1,929.—Also a township and v. in Cheshire co., New Hampshire, U. S., 41 m. WSW of Concord. Pop. 2,034.

WALPOLE, a parish in Suffolk, 2 m. SW of Halesworth. Area 1,750 acres. Pop. in 1851, 563.

WALPOLE-ST.-ANDREW, a parish in Norfolk, 7 m. W by S of Lynn-Regis. Area 3,494 acres. Pop. in 1831, 514; in 1851, 787.

WALPOLE-ST.-PETER, a parish in Norfolk, 8 m. WSW of Lynn-Regis. Pop. in 1851, 1,361.

WALSALL, a parish and parl. borough in the S division of the hund. of Offlow, co. of Stafford, comprising the chapelry of Bloxwich, and the township of Walsall-Foreign, as distinguished from Walsall-Borough. Area of p. 8,182 acres. Pop. in 1821, 11,914; in 1831, 15,066; in 1851, 26,822.—The town, situated on a bold eminence, at the foot of which flows a small stream, falling into the river Tame, is distant by coach-road 8 m. N by W of Birmingham; 6 m. E of Wolverhampton; 87 m. SE of Liverpool; and 119 m. NW of London. It consists of several handsome streets, and presents the general appearance of a compact and flourishing town. It ranks as the second manufacturing town

in the county. Among its staple manufactures are bridle-bits, stirrups, spurs, saddle-trees, spoons, snuffers, buckles, plated ware, locks, coach-harness, and every description of saddlers' and coachmakers' ironmongery; there are also several brass and iron foundries; and the p. contains extensive iron, coal, and lime-works. The trade and commerce of the town are greatly facilitated by an extension of the old Birmingham canal, which, passing the W side of the town, joins the Wyrley and Essington canal, and sends off several ramifications to different eligible points in the town and parish. The Grand Junction railway passes within $1\frac{1}{2}$ m. on the SW. The nearest station, that of Beccott-bridge, is $9\frac{1}{2}$ m. from Birmingham, and 88 from Liverpool or Manchester by railway. W. under the reform act returns one member to parliament. The boundary of the parl. and of the municipal borough corresponds with that of the ancient borough, with the exception of not including Walsall-wood. Pop. of the parl. borough in 1831, 15,066; of whom 6,401 resided in the Borough, and 8,665 in the Foreign; in 1851, 25,680. Parl. constituency in 1835-6, 679; in 1839-40, 837; in 1852, 1,026. W. is a polling-station for the southern division of the county.

WALSALL-FOREIGN, a township in the above p., including the W and S parts of the town itself, and a number of villages and hamlets stretching 3 m. northwards. Area 7,820 acres. Pop. in 1831, 6,665; in 1851, 12,442.

WALSHAM (NORTH), a parish and town in Norfolk. Area of p. 4,252 acres. Pop. in 1831, 2,615; in 1851, 2,911. The church is a spacious structure, 156 ft. in length, by 68 ft. in breadth, situated in the central area of the town. The town is pleasantly built on a declivity sloping to the river Ant, which flows about 1 m. N of the town, and is navigable from it to Yarmouth. On the 25th of June, 1600, it was terribly devastated by fire.

WALSHAM (SOUTH), a considerable village and district in Norfolk, containing two parishes: that of St. Mary and that of St. Lawrence. Area of both ps. 8,149 acres. Pop. in 1831, 575; in 1851, 669. The village is 11 m. NW by W of Yarmouth.

WALSHAM-IN-THE-WILLOWS, a parish in Suffolk, 5 m. E of Ixworth. Area 2,800 acres. Pop. in 1831, 1,167; in 1851, 1,397.

WALSH-TOWN, a village in the p. of Temple-na-carriga, 5 m. NNW of Middleton, co. Cork. Pop. in 1841, 252.

WALSINGHAM (GREAT), or OLD WALSINGHAM, a parish in Norfolk, containing the united ps. of All-Saints and St. Peter. United area 2,170 acres. Pop. in 1831, 434; in 1851, 476. The v. of Old Walsingham is about 1 m. N of the town of New Walsingham.

WALSINGHAM (LITTLE), or NEW WALSINGHAM, a parish and market-town in Norfolk, 28 m. NW of Norwich. Area of p. 860 acres. Pop. in 1831, 1,067; in 1851, 1,307. A famous chapel here, founded in 1061, appears to have been in as great repute as that of "our Lady of Loretto," or St. Thomas à Becket at Canterbury. Some interesting ruins of this once magnificent edifice still exist in the pleasure-grounds of W. abbey.—The market-town is situated in a picturesque and rugged valley, on the banks of the Stiffkey, 5 m. S by E of Wells, and 27 m. NW of Norwich. Here is a house-of-correction, which has recently been enlarged. The family of De Grey takes the title of baron from this place.

WALSINGHAM (CAPE), a headland of British North America, on the E coast of Cumberland Island, to the S of Exeter sound, in N lat. 66° , and W long. $60^{\circ} 50' 10''$.

WALSLEBEN, a village of Prussia, in the regency of Magdeburg and circle of Osterburg, on the

Uchte. Pop. 320.—Also a village in the regency of Potsdam, and circle of Ruppin. Pop. 460.—Also a village in the regency of Stettin, and circle of Nangard. Pop. 320.

WALSMUHLEN, a village of Mecklenburg-Schwerin, in the prov. of Mecklenburg, and bail. of Schwerin. Pop. 210.

WALSOKEN, a parish and village in Norfolk. The v. is about 1 m. E of Wisbeach, and is almost joined to that town by a pleasant suburb called New Walsoken. Area of p. 4,658 acres. Pop. in 1831, 1,856; in 1851, 2,740.

WALSRODE, a town of Hanover, in the gov. and 47 m. SW of Luneburg, and bail. of Rethem, on the Bohme. Pop. 2,100. It has a suburb, and contains a convent. It possesses manufactories of cloth, articles in straw, thread, cordage, and saltpetre, paper and flour-mills, and carries on an active trade in wool, gin, hats, and articles of local manufacture.

WALSTON, a small parish in the upper ward of Lanarkshire. It lies high; Walton Black mount is said to stand fully 1,500 ft. above the level of the sea. There are two small villages, viz., Walston and Elsidrigill, or Elsrinkel. Pop. in 1831, 429; in 1841, 493; in 1851, 497.

WALTENBERG, ZILLENMARKT, or ZILAH, a town of Transylvania, capital of the gov. of Kozep-Eszolnok, 39 m. NW of Klausenburg, near the source of the Zilah, an affluent of the Krasna, and at the foot of the Mezesza. Pop. 8,450. It has a Calvinist gymnasium.

WALTENDORF, a village of Austria, in Styria, in the circle of All. Pop. 260.

WALTENHAUSEN, a village of Bavaria, in the circle of Swabia, and presidial of Krumbach. Pop. 380.

WALTENSBURG, a village of Switzerland, in the cant. of the Grisons and bail. of Glenner, on the l. bank of the Vorder-Rhein. Pop. 443.

WALTENSWEIL, a village of Switzerland, in the cant. of Aargau, and bail. of Muri. Pop. 684.

WALTERBORO, a village of Colleton district, in the state of South Carolina, U. S., 94 m. S by E of Columbia. Pop. in 1850, 300.

WALTERKEHMEN, a village of Prussia, in the regency and circle of Gumbinnen. Pop. 350.

WALTERMENBURG, a village of Prussia, in the regency of Magdeburg, and circle of Jerichow. Pop. 598. It has a castle.

WALTERSBERG, a village of Bavaria, in the circle of Middle Franconia, and presidial of Beilngries. Pop. 200.

WALTERSBRUCH, a village of Hesse, in the prov. of Lower Hesse, and circle of Fritzlar, on the Schwalin. Pop. 500.

WALTERSCHLAG, a village of Austria, in Moravia, in the circle of Igla. Pop. 450.

WALTERSDORF, a village of Austria, in the country below the Ens, and lower circle of the Wienerwald, 18 m. S of Vienna, on the Riesenbach. Pop. 500. It has a paper-mill.—Also a village in the lower circle of the Manhartsberge, on the March. Pop. 300.—Also a village in the circle of Staatz. Pop. 230.—Also a village of Bohemia, in the regency of Pardubitz, and bail. of Landsfron. Pop. 1,700.—Also a village of Moravia, in the circle of Olmutz, lordship of Goldenstein. Pop. 365.—Also a village in the lordship of Karsberg. Pop. 500.—Also a village in the lordship of Fulnek. Pop. 515.

—Also a village of the archb. of Lebengut. Pop. 1,500. It has mills and bleacheries.—Also a village of Styria, in the circle of Gratz. Pop. 440. It has an Armenian institute.—Also a village of Prussia, in the regency of Königsberg, and circle of Mohrungen. Pop. 410.—Also a village of the circle of

Heiligenbeil. Pop. 315.—Also a village of the regency of Liegnitz, and circle of Sohonau. Pop. 540.—Also a village of the circle of Sprottau. Pop. 1,810.—Also a village of the circle of Lowenburg. Pop. 320. It has a castle, mills, and salt-works.—Also a village of the regency of Frankfurt, and circle of Coran. Pop. 440.—Also a village of the circle of Luckau. Pop. 345. It has three mills.—Also a village of the regency of Potsdam, and circle of Telton. Pop. 260.—Also a village of the regency of Erfurt, and circle of Weissensee. Pop. 220.—Also a village of Reuss-Schleiz, in the circle of Jera. Pop. 250.—Also a village of Saxony, in the circle of Zwickau, and bail. of Annaberg, on the Zschopau. Pop. 266. It has two mills.—Also a village in the circle of Dresden, and bail. of Pirna, near Barenstein. Pop. 242.—Also a village near Prossen. Pop. 275.—Also a village of Saxe-Altenburg, and bail. of Altenburg. Pop. 250.—Also a village of Saxe-Weimar, and bail. of Neustadt. Pop. 550.

WALTERSDORF (ALT), a village of Prussia, in the regency of Breslau, and circle of Habelschwert. Pop. 1,070. It has several mills and salt-works.—The v. of New W. in the vicinity has a pop. of 900.

WALTERSDORF (ALT and NEU), two adjoining villages of Saxony, in the circle of Bautzen, and bail. of Lobau, near Zittau. Pop. 2,000. They have manufactories of linen and woollen fabrics.

WALTERSDORF (LANG), a village of Prussia, in the regency of Breslau, and circle of Waldenburg. Pop. 830. It has two churches, and a work house, and possesses manufactories of woollen and linen fabrics, and bleacheries.

WALTERSDORF (NIEDER), a village of Prussia, in the regency of Breslau, and circle of Waldenburg. Pop. 200. It has several mills.

WALTERSDORF (ROTH), a village of Prussia, in the regency of Breslau, and circle of Glatz. Pop. 660. It has several mills and salt-works.

WALTERSDORF (WUSTE), a village of Prussia, in the regency of Breslau, and circle of Waldenburg. Pop. 1,500. It has a castle, a workhouse, several mills, and bleacheries.

WALTERSHAUSEN, a village of Bavaria, in the circle of Lower Franconia, and presidial of Königshofen. Pop. 600. It has a castle and several mills.—Also a town of Saxe-Coburg-Gotha, in the principality and 8 m. WSW of Gotha, on the Bodewasser, at the foot of the Burgberg. Pop. 3,400. It is enclosed by walls with four gates, and has four suburbs, two churches, two hospitals, and several schools. It possesses manufactories of linen and woollen fabrics, tanneries, breweries, paper-mills, and tile-kilns.

WALTERSHOF, a market-town of Bavaria, in the circle of the Upper Pfalz, and presidial of Waldsassen, 26 m. E of Bayreuth. Pop. 1,200. It has manufactories of woollen and linen fabrics, breweries, and iron-works.

WALTERSHOFEN, a village of Baden, in the circle of the Middle Rhine, and bail. of Freiburg. Pop. 988.

WALTERSKIRCHEN, a village of Austria, in the country below the Ens, circle of the lower Manhartsberge, and presidial of Feldsberge. Pop. 630.

WALTERSLEBEN, a village of Prussia, in the regency and circle of Erfurt. Pop. 280.

WALTERSMUHL, a village of Prussia, in the regency of Königsberg, and circle of Heilsberg. Pop. 870.

WALTERSTONE, a parish in Herefordshire, 15 m. SW of Hereford. Area 1,241 acres. Pop. 147.

WALTERSTOWN, a parish in co. Kildare, 8½ m. SSW of Kildare. Area 1,501 acres. Pop. 376.

WALTERSWEIER, a village of Baden, in the circle of the Middle Rhine, and bail. of Offenburg. Pop. 458.

WALTERSWEIL, a village of Switzerland, cant. of Berne, and bail. of Trachselwald. Pop. 850.

WALTHAM, or **TEMPLE-WALTHAM**, a parish and v. of Kent. Area of p., 3,215 acres. Pop. 576.

WALTHAM, a parish in Lincolnshire, $3\frac{1}{2}$ m. S by W of Great Grimsby. Area 2,350 acres. Pop. in 1831, 545; in 1851, 782.

WALTHAM, a township and village of Middlesex co., in Massachusetts, U. S., 8 m. WNW of Boston. Pop. in 1840, 2,504; in 1850, 4,464.

WALTHAM-ABBEY, or **HOLY-CROSS**, a parish and market-town in Essex, 12 m. S by E of London. Area of p., including the hamlets of Hallfield or Holy-field, Sewardstone, and Upshire, 10,876 acres. Pop. in 1831, 4,104; in 1851, 4,303. The town, which is large and irregularly built, is 12 m. S by E of London. It is situated near the river Lea, which here divides into diverse streams, and is skirted by low meadows partly occupied by government for gunpowder-mills and other works which have been erected here, and which give employment to many of the inhabitants. Here are several malt-kilns, a pin-manufactory, and a silk-mill.—The convent of W. appears to have been originally founded in the reign of Canute. Harold is commonly stated by historians to have been killed at the battle of Hastings, and interred in W. abbey, where, during a long period, a tomb was shown as the sepulchral monument of the last of our Saxon kings; but Palgrave seems to consider this tomb as merely a cenotaph.

WALTHAM (BISHOP'S), a parish and market-town in Hants, 10 m. ENE of Southampton. Area 7,388 acres. Pop. in 1831, 2,181; in 1851, 2,265. The town is situated on the high road from Winchester to Portsmouth, in the midst of a fertile country. The ancient palace of the bishops of Winchester stands on the SW side of Waltham, and still exhibits traces of its former magnificence.

WALTHAM-BRIGHT, a parish in Berks, 5 m. WSW of East Ilsey. Area 2,038 acres. Pop. in 1831, 442; in 1851, 465.

WALTHAM (GZMAT), a parish in Essex, $4\frac{1}{2}$ m. N by W of Chelmsford, including the hamlet of North-End. Area 7,335 acres. Pop. in 1851, 2,335.

WALTHAM-ST. LAWRENCE, a parish in Berks, $5\frac{1}{2}$ m. SW of Maidenhead, in the line of the Great Western railway. Area 3,468 acres. Pop. in 1831, 739; in 1851, 783.

WALTHAM (LITTLE), a parish in Essex, $4\frac{1}{2}$ m. N by E of Chelmsford, on the river Chelmer. Area 2,227 acres. Pop. in 1831, 674; in 1851, 651.

WALTHAM (NORTH), a parish in Hants, 6 m. SW by W of Basingstoke. Area 1,938 acres. Pop. in 1831, 458; in 1851, 506.

WALTHAM (UP), a parish in Sussex, $6\frac{1}{2}$ m. SSW of Petworth. Area 1,245 acres. Pop. 67.

WALTHAM-ON-THE-WOLDS, a parish in Leicestershire, 5 m. NE of Melton-Mowbray. Area 2,870 acres. Pop. in 1831, 653; in 1851, 732.

WALTHAMSTOW, a parish in Essex, 6 m. NE by N of London, on the river Lea, here navigable, and in the line of the Eastern Counties railway. Area 4,436 acres. Pop. in 1831, 4,258; in 1851, 4,959. The village, which is chiefly inhabited by wealthy merchants of the metropolis, stands in a pleasant situation on the border of Epping-Forest, and consists of numerous detached houses, encompassed with trees and woodland.

WALTON, a county in the central part of the state of Georgia, U. S., comprising an area of 354 sq. m., drained by the head branches of Oconee and

Ocmulgee rivers, and intersected by the Georgia railroad. It has an undulating surface, and is extremely fertile. Pop. in 1840, 10,309; in 1850, 10,821. Its capital is Monroe.—Also a county in the W part of the state of Florida, comprising an area of 1,157 sq. m., drained by Yellow and Shoal rivers, and by White and Alequa creeks. It has an undulating surface, and is generally fertile. Pop. in 1840, 1,401; in 1850, 1,379. Its capital is Uchee Anna.—Also a township of Delaware co., in the state of New York, 78 m. SW by W of Albany, drained by the W branch of Delaware river and its affluents. Pop. in 1840, 1,840; in 1850, 2,271.

WALTON, a parish of Bucks, 2 m. NE of Fenny-Stratford. Area 757 acres. Pop. in 1831, 114; in 1851, 95.—Also a parish in Cumberland, 3 m. N by W of Brampton, containing the townships of High and Low W. Area 3,592 acres. Pop. in 1831, 481; in 1851, 455.—Also a chapelry in the p. of Chesterfield, Derbyshire, 3 m. SW by W of Chesterfield. Pop. in 1831, 935; in 1851, 1,114.—Also a hamlet in the p. of Knaptoft, Leicestershire, 4 m. NE by E of Lutterworth. Pop. in 1831, 234; in 1851, 223.—Also a hamlet in the p. of Paston, Northamptonshire, $2\frac{1}{2}$ m. NNW of Peterborough. Pop. in 1831, 160; in 1851, 216.—Also a township in the p. of Old Radnor, co. of Radnor. Pop. in 1831, 186; in 1851, 207.—Also a parish in Somersetshire, $3\frac{1}{2}$ m. SW by W of Glastonbury. Area 2,502 acres. Pop. in 1831, 732; in 1851, 768.—Also a parish in Suffolk, 10 m. SE by E of Ipswich, on the coast of the North sea. Area 1,988 acres. Pop. in 1831, 887; in 1851, 897.—Also a parish in the E. R. of Yorkshire, 2 m. E of Wetherby. Area 1,670 acres. Pop. in 1831, 237; in 1851, 245.

WALTON-CARDIFF, a parish in Gloucestershire, 1 m. SE by E of Tewkesbury. Area 650 acres. Pop. in 1831, 57; in 1851, 60.

WALTON-LE-DALE, a chapelry in the p. of Blackburn, co.-palatine of Lancaster, 2 m. SE of Preston, on the banks of the Derwent, near the Wyre and Preston railway. Area 4,630 acres. The inhabitants are principally employed in the cotton manufacture. Pop. in 1831, 5,767; in 1851, 6,865.

WALTON (EAST), a parish in Norfolk, $7\frac{1}{2}$ m. NW of Swaffham. Area 2,459 acres. Pop. in 1851, 202.

WALTON (EAST), a parish in Pembrokeshire, $6\frac{1}{2}$ m. NE of Haverford-West. Area 1,893 acres. Pop. in 1831, 229; in 1851, 279.

WALTON-IN-GORDANO, a parish in Somersetshire, $11\frac{1}{2}$ m. W of Bristol. Area 1,315 acres. Pop. in 1831, 297; in 1851, 225.

WALTON-ON-THE-HILL, a parish in the co.-palatine of Lancaster, 3 m. N by E of Liverpool, in the line of the Leeds and Liverpool canal, comprising the chapelries of Everton, Formby, Kirby, West Derby, Kirkdale, and Bootle, and the townships of Fazakerley, Simonswood, and W. In consequence of its proximity to Liverpool, it contains many elegant mansions—the residence of merchants, manufacturers, and retired tradesmen. Area of p. 29,233 acres. Pop. in 1831, 22,575; in 1851, 46,302.—Also a parish in Surrey, $4\frac{1}{2}$ m. S by E of Epsom. Area 2,592 acres. Pop. in 1831, 352; in 1851, 426.

WALTON (INFERIOR and SUPERIOR), townships in the p. of Runcorn, co.-palatine of Chester, 2 m. S of Warrington, in the line of the Grand Junction railway, and of the Mersey and Irwell canal. Area of both 961 acres. Pop. in 1831, 578; in 1851, 575.

WALTON-LE-SOKEN, a parish in Essex, 12 m. SE by E of Manningtree, on the sea-coast. The village, which is romantically situated on the cliffs next the sea, has obtained considerable celebrity as

a watering-place. Area 3,260 acres. Pop. in 1831, 469; in 1851, 729.

WALTON-ON-THAMES, a parish in Surrey, 14 m. NE by N of Guildford, in the line of the South-Western railway. The p. contains the divisions of Commonsides, Hersham, Burnwood, and Town. Area 6,834 acres. Pop. in 1851, 2,861.

WALTON-ON-TRENT, a parish in Derbyshire, 4 m. SW of Burton-upon-Trent, near the Birmingham and Derby railway. Area, 2,809 acres. Pop. in 1831, 408; in 1851, 465.

WALTON (Wæst), a parish in Norfolk, 3 m. NE by N of Wisbeach. Area 5,219 acres. Pop. in 1831, 905; in 1851, 999.

WALTON (Wæst), a parish in Pembrokeshire, 5½ m. SW of Haverford-West. Area 1,408 acres. Pop. in 1831, 411; in 1851, 518.

WALTON-ON-THE-WOLDS, a parish in Leicestershire, 4 m. E of Loughborough, on the river Soar. Area 1,720 acres. Pop. in 1851, 260.

WALTON-WOOD, a parish in Huntingdonshire, 6 m. N by W of Huntingdon. Area 3,830 acres. Pop. in 1831, 305; in 1841, 273.

WALTONHAM, a village of St. Louis co., in the state of Missouri, U. S., 9 m. NW of St. Louis. Pop. in 1840, about 50.

WALTRA, a village of Austria, in Styria, in the circle of Gratz. Pop. 260.

WALTRACH, a village of Prussia, in the regency and circle of Treves. Pop. 688.

WALTRINGEN, a village of Prussia, in the regency of Arnberg, and circle of Goest. Pop. 300.

WALTRINGHAUSEN, a village of Hesse, prov. of Lower Hesse, and circle of Rinteln. Pop. 420.

WALTROP, a village of Prussia, regency of Munster, and circle of Recklinghausen. Pop. 1,108.

WALTROWITZ, a village of Austria, in Moravia, in the circle of Znaim. Pop. 410.

WALTRUP, a village of Prussia, in the regency of Munster, and circle of Steinfurt. Pop. 300.

WALTWELDER, a department and commune of Belgium, in the prov. of Limburg, and arrond. of Tongres. Pop. 604.

WALVISCH, or **WALFISCH BAY**, a large bay on the SW coast of Africa, the S point of which is in S lat. 22° 52'. It forms the estuary of the Kiusip, but that river is only a periodical one, having its waters frequently dried up before it reaches the sea. From the coast of this bay, which presents an excellent harbour, a journey of 16 hours across sand, takes the traveller to Oosop, on the Swakop river, in S lat. 22° 45' 38". Communication has recently been opened between this bay and Lake N'gami in the interior.

WALWORTH, a township in the p. of Heighington, co.-palatine of Durham, 4 m. NW of Darlington. Area 2,132 acres. Pop. in 1831, 155; in 1851, 142.

WALWORTH, a chapelry in the p. of Newington-Butts, Surrey, 2½ m. S of St. Paul's. Pop. 29,861.

WALWORTH, a county in the SE part of the state of Wisconsin, drained by Turtle creek and Fox river and their affluents, and intersected by the Chicago and Wisconsin, the Milwaukee and Mississippi railways, and the Racine and Janesville plank-road. It has a diversified surface and contains several lakes. Pop. in 1840, 2,611; in 1850, 17,861.

—Also a township of the same co., 46 m. SE of Madison, bordered on the E by Geneva lake. It has a diversified surface, and is highly cultivated. Pop. in 1840, 226; in 1850, 987.—Also a township of Wayne co., in the state of New York, 168 m. W by N of Albany. It has an undulating surface, and is drained by affluents of Lake Ontario. Pop. in 1840, 1,734; in 1850, 1,981.

WALWYN'S-CASTLE, a parish in Pembrokeshire, 6 m. SW of Haverford-west. Area 2,904 acres. Pop. in 1831, 311; in 1851, 353.

WALXHEIM, a village of Württemberg, circle of the Danube, and bail of Ellwangen. Pop. 215.

WALZEN (GRAFLICH AND SCHLOTZ), two villages of Prussia, in the reg. of Oppeln, circle of Neustadt, containing respectively 599 and 328 inhabitants.

WALZEN (UNTER), a village of Prussia, in the regency of Oppeln, and circle of Neustadt. Pop. 880.

WALZENHAUSEN, a village of Switzerland, in the cant. of Appenzell, bail. and NE of Trogen. Pop. 1,794.

WAMBACH, a village of Nassau, in the bail. of Langenschwalbach. Pop. 299.—Also a village of Prussia, in the regency of Coblenz, and circle of Altenkirchen. Pop. 275.

WAMBEKE, a department and commune of Belgium, in the prov. of Brabant, and arrond. of Brussels. Pop. of dep. 1,514; of com. 746.

WAMBELN, a village of Prussia, in the regency of Arnberg, and circle of Dortmund. Pop. 880.—Also a village in the circle of Hamm. Pop. 300.

WAMBERG, a town of Austria, in Bohemia, in the regency of Gotschin, and bail. of Reichenau. Pop. 2,500.

WAMBRECHIES, a commune and town of France, in the dep. of the Nord, cant. and 4 m. N of Lille. Pop. in 1846, 3,542. It has manufactories of thread, of beet-root sugar, and oil; a distillery of gin, a tannery, and building-docks.

WAMBROOK, a parish in Dorset, 2 m. SW of Chard. Area 1,857 acres. Pop. in 1851, 245.

WAME, a river of Belgium, which takes its rise in the prov. of Luxemburg, flows thence into that of Namur, and after a course, first in a N direction and afterwards to the W, joins the Homme, on the r. bank, at Gamelle.

WAMEKON, a village of Mecklenburg-Schwerin, in the prov. of Mecklenburg, and bail. of Enwitz. Pop. 200.

WAMEL, a village of Prussia, in the regency of Arnberg, and circle of Goest. Pop. 260.

WAMLITZ, a village of Prussia, in the regency of Stettin, and circle of Randow. Pop. 200.

WAMMER, an island of the Austral ocean, in the group of the Aru islands, to the SW of Wofan.

WAMMONT, a department and commune of Belgium, in the prov. of Liege and arrond. of Huy. Pop. 435. It has manufactories of beet-root sugar.

WAMPACH (OBER), a commune and town of Belgium, in the prov. of Luxemburg, arrond. and 15 m. W of Diekirch. Pop. 818.

WAMPHRAY, a parish in Upper Annandale, Dumfries-shire, skirted on the W by the river Annan. It has an area of about 12,000 acres. Pop. in 1831, 580; in 1851, 523.

WAMPU, an island of China, in the bay of Canton.

WAN, a district and town of China, in the prov. of Chih-le, and div. of Paou-ting-fu, in N lat. 38° 50', and E long. 115° 15'.—Also a district and town in the prov. of Ho-nan, and div. of Hwae-ting-fu, in N lat. 30° 57', and W long. 108° 32'.

WANBOROUGH, a liberty in Surrey, 4 m. W of Guildford. Area 156 acres. Pop. in 1831, 111; in 1851, 308.—Also a parish in Wilts, 3½ m. E by S of Swindon. Area 4,440 acres. Pop. in 1831, 1,016; in 1851, 964.

WAN-CHANG, and district and town of China, in the prov. of Kwang-ting, and div. of Keun-chu-fu, or island of Hae-nan, of which it occupies the eastern part. The town is a little to the N of the Wan-chang-keang, which is here crossed by a bridge; and, although small, is fortified, in N lat.

19° 36', and E long. 110° 43'. To the N of the town is the temple of Ling-wang, and to the SE is the fine monument of Chao-ting, said to be the place of sepulture of a king of Cochinchina. Pop. in 1819, 116,784.—Also a district and town in the prov. of Che-keang, and div. of Gen-chu-fu, in N lat. 35° 50', and E long. 114° 20'.

WAN-CHU, a district and town of China, in the prov. of Kwang-ting, and div. of Keun-chu-fu, or island of Hae-nan, in N lat. 18° 49', and E long. 110° 20'. It is enclosed by brick walls from 18 to 20 ft. in height, and of great thickness; and the parapets, about 4 ft. in height, are pierced with numerous embrasures, separated by loop-holes. The gates, 4 in number, open to the four cardinal points. The streets, which are paved, are narrow, and the houses, although built of brick and stone, are only a single story in height, and have a mean appearance. There are some temples of handsome structure, and several triumphal arches, and there are various indications of the town having formerly been one of great importance. The environs are fertile and well cultivated. They abound in game, and contain several villages.

WAN-CHU-FU, a div. and town of China, in the prov. of Che-keang. The div. comprises 6 districts. The town is on a small bay of the China sea, at the mouth of a river, 180 m. SSE of Hang-chu-fu, in N lat. 28° 2' 15", and E long. 120° 49' 37".

WANDERSLEBEN, a town of Prussian Saxony, in the gov. and 10 m. SW of Erfurt. Pop. 914.

WANDIA, a town of Hindostan, in the prov. of Cutch, on the N side of the Runn, opposite the fortress of Mallia, in N lat. 23° 8'.

WANDIPORE, a town and fortress of Bhotan, in N lat. 27° 51', E long. 89° 57'. It stands on the narrow extremity of a rock, between three rivers whose streams, uniting at its point, form a river of considerable magnitude called the Chantchieu, which, continuing its course to the southward, enters the district of Rungipur, where it takes the name of Gudhadhar, and at last falls into the Brahmaputra. The town is principally inhabited by *gyilongs* or priests of the Grand Lama.

WANDIWASH, a town and fortress of Hindostan, in the Carnatic, in N lat. 12° 30', E long. 79° 38'. In September, 1759, the British troops, in an attack on this place, were repulsed with great slaughter, but in November following, it was taken by Sir Eyre Coote, with scarcely any loss. In January 1760, a decisive battle was fought in the vicinity of this town, between the British and the French, with their respective allies, in which the latter were defeated. The fortress was demolished by orders of General Stuart, in 1783.

WANDLE, a small river, which, rising near Carshalton, in Surrey, flows N till it falls into the Thames at Wandsworth.

WANDORF, a village of Hungary, on the borders of Lower Austria, 2 m. from Oedenburg. Coal is extensively wrought in the vicinity.

WANDRE, a canton and village of Belgium, in the prov. and 4 m. NE of Liege. Pop. 2,700. It has iron-works.

WANDSBECK, a town of the duchy of Holstein, 3 m. NE of Hamburg, on the Wanne, an affluent of the Alster. Pop. 4,000. It has manufactures of cotton and linen stuffs.

WANDSWORTH, a parish in Surrey, 6 m. SW of London, on the river Wandle. The South Western railway passes across Wandsworth common. Area 2,478 acres. Pop. in 1831, 6,879; in 1851, 9,611.—The village is finely situated on the declivities of two hills, and contains many handsome houses. Here are manufactories of hats, and bolt-

ing cloths for dressing flour. There are also distilleries, vinegar-works, mills for the preparation of iron, white-lead, and linseed oil, besides flour-mills, and establishments for calico-printing. The environs are adorned with elegant mansions, commanding fine views of the Thames, the metropolis, and a great part of Middlesex.—About 1½ m. from the Clapham station of the South-Western railway, a fine astronomical tower has been erected. The building consists of a central tower of brick, the walls of which are about 18 inches in thickness, the height 64 ft., and the diam. 15 ft. It is erected upon a solid bed of concrete. By the side of this tower hangs a gigantic telescope, the immense tube of which, measuring 85 ft. in length, is shaped something like a cigar. At one end is the eye piece, at the height of about 5 ft. from the ground, and at the other the dew-cap, or covering, the object of which is to prevent the absorption and condensation of moisture, which takes place during the night when the instrument is most in use. The exterior is of bright metal, and the interior painted black to absorb the divergent rays of light. The instrument has a focal distance which varies from 76 to 85 ft.; its greatest circumf. is 13 ft., the widest portion of the tube being about 24 ft. from the object-glass. The lower end of the tube is supported on a wooden frame work, to which wheels are attached, and these wheels traverse a circular iron railway at a distance of 52 ft. from the base of the tower. The other end is suspended by a strong iron chain, capable of sustaining a weight of 15 tons, from the top of the tower, and this chain, which passes across to the other side through the top over pulleys, can be elevated or depressed by means of a windlass, so as to raise or lower the tube from azimuth to an angle of 80° of elevation with as much ease and rapidity as an ordinary telescope. The instrument has an object-glass of 2 ft. aperture.

WANFERCE'E-BAULET, a commune and v. of Belgium, in the prov. of Hainaut, 8 m. NE of Charleroi. Pop. 2,540. Coal is wrought in the vicinity.

WANFRIED, a town of Hesse-Cassel, on the r. bank of the Werra, 30 m. E by S of Cassel. Pop. 2,400.

WANGANIN, a river of the North island of New Zealand, which flows into the sea, on the W coast, 60 m. SE of New Plymouth.

WANGARA, a country of Central Africa, much celebrated in the early descriptions of that continent, and represented by Arabian travellers in the 12th cent. as the grand source of African wealth. Edrisi describes it as traversed and intersected by branches of the Nile of the Negroes, which form it into a species of island, 300 m. in length, and 150 m. in breadth. Modern geographers identify this region with

WANGARI-BAY, a bay on the E coast of the North island of New Zealand, 65 m. NNW of Auckland.

WANGEN, a town of France, in the dep. of Bas-Rhin, 12 m. WNW of Strasburg.—Also a town of Switzerland, in the cant. of Berne, on the r. bank of the river Aar, 5 m. NE of Soleure.—Also a village of Switzerland, in the cant. and 6 m. NE of Zurich.—Also a town of Wurtemberg, 11 m. NNE of Lindau. Pop. 1,680. It has manufactories of linen, paper, and fire-arms.—Also a village of Baden, 6 m. SSW of Radolfzell. Pop. 500.

WANGENHEIM, a village of Saxe-Coburg, in the principality and 6 m. NNW of Gotha, on the Nesse. Pop. 500.

WANGERIN, a town of Prussian Pomerania, 22 m. NE of Stargard, between two small lakes. Pop. 1,638.

WANGEROOG, an island on the coast of the duchy of Oldenburg, about 4 m. from the mainland. Pop. 356, chiefly Friesian fishermen. It is 12 m. in circumf. It has a light-house, which is in N lat. 58° 49' 36", E long. 7° 51' 30".

WANGFORD, a parish in Suffolk, 8 m. NW of Southwold, containing the hamlet of Henham. Area 2,600 acres. Pop. in 1831, 792; in 1851, 814.—Also a parish in Suffolk, 3½ m. SW by W of Brandon-Ferry. Area 3,252 acres. Pop. in 1851, 33.

WANGWELL, a small island in the Pacific, near the S coast of Waygiu, in S lat. 0° 23'.

WANJL, a commune and village of the Swiss cant. of Thurgau, on the Murg, 5 m. SE of Frauenfeld. Pop. 1,586.

WANKANIER, a fortified town of Hindostan, prov. of Gujerat, on an angle formed by the conflux of the rivers Muchu and Pataliah, in N lat. 22° 57'. It contains about 500 houses, and a very handsome mosque, but is commanded by a range of lofty mountains.

WANKUM, a village of Prussia, prov. of Cleves, 7 m. S by W of Guelthers. Pop. 1,000.

WANLIP, a parish in Leicestershire, 3½ m. SE by S of Mount Sorrel, on the river Soar, which is here crossed by a bridge. Area 952 acres. Pop. 137.

WANLIN, a village of Belgium, in the prov. of Namur, cant. of Beauraing. Pop. 229.

WANLOCK-HEAD, a large mining-village at the head of the Wanlock, a head-branch of the Crawick, 1½ m. S of Leadhills, and 8½ m. ENE of Sangubar, Dumfries-shire, situated close on the wild boundary with Lanarkshire, at an alt. of about 1,380 ft. above sea-level. The mines, which alone maintain the v., are continuous with the mines of Leadhills, on the Crawford or Lanarkshire side of the frontier, and jointly with these, shoot out to a circumf. whose diam. is about 2½ m. The mines are said to have been discovered by a German in the reign of James V. The veins, five in number, have been worked to the depth of from 60 to 136 fathoms, and measure from a few inches to 4 ft. in thickness. Along with the lead ore or lead glance, are small quantities of manganese, ochre, blende, brown hematite, copper pyrites, green lead ore, white lead ore, and lead-vitriol. Pop. in 1851, 872.

WANNE, a commune and v. of Belgium, in the prov. of Liege, cant. of Chevron. Pop. 854.

WANNEBECQ, a village of Belgium, in the prov. of Hainault, 24 m. NE of Nams. Pop. 1,052.

WANNEGEM-LEDE, a canton and v. of Belgium, in the prov. of E. Flanders, cant. of Cruys-hantem. Pop. 1,493.

WANSBECK. See **NORTHUMBERLAND**.

WANSEN, a town of Prussian Silesia, in the reg. of Oppeln, 22 m. S by E of Breslau. Pop. 1,500.

WANSFORD, or **WALNESFORD**, a parish in Northamptonshire, 89 m. N by W of London. Area 469 acres. Pop. in 1831, 179; in 1851, 184.—Also a township in the p. of Nafferton, Yorkshire, 8 m. ESE of Great Driffield, on the river Hull. There is a considerable cotton and carpet manufactory at this place. Pop. in 1831, 378; in 1841, 242.

WANSTEAD, a parish in Essex, 7 m. NE of London, on the river Rodon, or Roding. The p. contains many handsome houses,—the abodes of opulent merchants and tradesmen of London, and a large orphan asylum. Area 2,004 acres. Pop. in 1831, 1,403; in 1851, 2,207.

WANSTROW, a parish in Somersetshire, 5 m. N by E of Bruton, including the hamlet of Weston. Area 2,054 acres. Pop. in 1831, 410; in 1851, 472.

WANTAGE, a parish and market-town of Berks, 60 m. W of London, on a branch of the river Ock. A branch of the Wilts and Berks canal, affording a

communication with Bath, Bristol, and London, comes up to the town; and the Great Western railway passes about 3 m. to the N of it, and has an intermediate station here 68½ m. distant from the London terminus, and 7½ m. from Shrivenham. The p. comprises the hamlets of Charlton and Grove. Area 7,530 acres. Pop. in 1831, 3,282; in 1851, 3,860. The town, which is situated on the margin of the Vale of White-horse, is irregularly built. The inhabitants are principally employed in the manufacture of coarse cloth and twine, and in the flour and malt trade. W. was a royal seat in the Saxon times, and appears to have been then of some consequence. King Alfred was born here in 849.

WANTESDEN, a parish of Suffolk, 4½ m. NW by W of Orford. Area 2,126 acres. Pop. 107.

WANTSUM, a branch of the river Stour, in Kent. See **KENT**.

WANTZENAU, a town of France, in the dep. of Bas-Rhin, 6 m. NE of Strasburg, at the influx of the Ill into the Rhine. Pop. 2,343.

WANZER (GROSS and KLEIN), two villages of Prussia, in the reg. of Magdeburg, circle of Oesterburg. United pop. 584.

WANZLEBEN, a town of Prussian Saxony, in the reg. and 10 m. WSW of Magdeburg. Pop. 3,200. It has breweries and flour-mills.—In the immediate vicinity is the v. of Klein-W., with a pop. of 508.

WAPAKONETTA, or **WAPAGKANETTA**, a town of Allen co. in Ohio, U. S., on the Anglaise river, at the head of navigation, 7 m. SE of Taway. Pop. 504.

WAPELLO, a county in the SE of Iowa, U. S. Area 432 sq. m. Pop. in 1850, 3,471. Its cap. is Ottamwa.—Also a village of Louisa co., in Iowa, 30 m. SE by S of Iowa. Pop. 1,000.

WAPENBURY, a parish of Warwickshire, 5 m. NNW of Southam. Area 1,550 acres. Pop. 271.

WAPESSAGA, a lake of Canada, in N lat. 48° 10', W long. 71° 40'.

WAPITWAGO ISLANDS, a cluster of islands near the S coast of Labrador, in N lat. 50° 4'.

WAPLEY, or **WAPELEY**, a parish of Gloucestershire, 2 m. SW by S of Chipping Sodbury. Area 2,448 acres. Pop. with Codrington, in 1851, 305.

WAPNO, a village of Bohemia, in the reg. of Gitschin, circle of Chlumetz. Pop. 260.

WAPPENHAM, a parish of Northamptonshire, 5 m. WSW of Towcester. Area 2,980 acres. Pop., with Astwell, in 1831, 456; in 1851, 599.

WAPPING, a parish in the Tower division, Middlesex, 2 m. ESE of St. Paul's cathedral, forming an extensive portion of the metropolis, and sometimes called the port of London. Area 80 acres. Pop. in 1831, 3,564; in 1851, 4,477. It was originally a low district overflowed by the waters of the Thames, and was not properly recovered till the reign of Queen Elizabeth, when it was drained, enclosed with walls, and converted into a kind of meadow-ground under the name of Wapping-Wash. Besides numerous streets, it now contains some of the most extensive and important of the metropolitan docks and warehouses: see article **LONDON**. The inhabitants are chiefly employed in various manufactures connected with shipping.

WAPPINGER'S CREEK, a river of the state of New York, U. S., which runs into the Hudson, 8 m. S of Poughkeepsie. Length 33 m.

WAPPO, a small port on the Grain coast of Africa.

WAPPOCOMO, a river of Virginia, U. S., which runs into the Potomac, 9 m. ESE of Fort Cumberland.

WAPUWAGAN ISLANDS, a cluster of islands near the coast of Labrador, in N lat. 50° 2'.

WARA, or **HARA**, a city of Central Africa, the capital of the kingdom of Borgu or Wadai, in about N lat. 13° 30'. It is a well-built town.

WARADIN. See **GROSSWARDEIN**.

WARANG. See **FORMOSA**.

WARANKUL, or **WARANGOL**, a city of Hindostan, in the prov. of Hyderabad, belonging to the Nizam, in N lat. 17° 54'. It was formerly the capital of the kingdom of Telingana, and was first taken by the Mahomedans in about the year 1323.

WARASDIN, a county of the Austrian states, in Croatia, having Military Hungary on the NE; the com. of Agram on the E; and Syria and Illyria on the SW and W. Its area is about 720 sq. m.. Its population, about 158,000 in number, are partly Catholics, partly of the Greek church. The river Drave forms the N boundary of the prov. The other rivers are the Socta, Kropina, Behnya, and Plitvitz.

WARASDIN, the capital of the above county, is situated on the N bank of the Drave, in N lat. 46° 18' 20", 38 m. NNE of Agram. The town proper is small, but the suburbs, being more extensive, the total population is about 9,000. The chief public structure is the court-house, or place of meeting of the county diets. Its traffic in silk, wine, and vinegar is pretty active. In the neighbourhood there are warm mineral springs.

WARASDIN (**GENERALATE OF**), a district of Croatia, adjoining to Slavonia, and separated from Hungary by the Drave. More extensive, but less populous, than the county of the same name, this district contains 1,440 sq. m., with only 70,240 inhabitants. Its physical aspect is chiefly that of a great valley, surrounded by mountains sloping towards the Drave. Its cap. is Belovar.

WARBERG. See **OURBERG**.

WARBERG, a village of Brunswick, in the circle of Konigsutter. Pop. 560.

WARBLETON, a parish of Sussex, 6½ m. N by E of Haylesham. Area 5,763 acres. Pop. 1,509.

WARBLINGTON, a parish of Southamptonshire, 1 m. ESE of Havant. Area 3,848 acres. Pop. in 1831, 2,118; in 1851, 2,302.

WARBOROUGH, a parish of Oxfordshire, 10½ m. SE by S of Oxford. Area 1,673 acres. Pop. 729.

WARBOYS, a parish of Huntingdonshire, 4 m. SSE of Ramsey. Area 8,300 acres. Pop. 1,996.

WARBSEN, a village of Brunswick, in the circle of Holzminden, bail. of Zorstbuche. Pop. 320.

WARBSTOW, a parish of Cornwall, 8½ m. NE of Camelford. Area 4,104 acres. Pop. in 1851, 470.

WARBURG, a town of Prussian Westphalia, on the l. bank of the Dymel, 22 m. SE of Paderborn. Pop. 3,925. It has linen manufactories.—The circle of W. has an area of 936 German sq. m. Pop. 84,668.

WARBURTON, a parish of the co. of Chester, 9½ m. NNW of Nether Knutsford. Area 1,747 acres. Pop. in 1831, 510; in 1851, 489.

WARCOING, a commune and village of Belgium, in the prov. of Hainault, on the Scheldt, 32 m. WNW of Meux. Pop. 1,100.

WARCOP, a parish of Westmoreland, 3 m. W by N of Brough. Area 10,020 acres. Pop. in 1851, 740.

WARD, a rivulet of co. Dublin, an affluent of the Swords or Broadmeadow.—Also a parish in co. Dublin, 4½ m. NNW of Finglass. Area 1,349 acres. Pop. in 1831, 251; in 1841, 175.

WARD, a township of Worcester co., Massachusetts, U. S., 45 m. WSW of Boston.

WARD'S CREEK, a river of Virginia, U. S., which runs into James river, in N lat. 37° 10'.—Also a river of Maryland, which runs into the Chesapeake, in N lat. 38° 8'.

WARDE, a town of Denmark, near the W coast of Jutland, on a river of the same name, 20 m. NNW of Ribe. Pop. 1,600. It has manufactories of pottery.

WARDE (**POINT**), a cape on the W coast of North America, at the upper end of Prince Ernest's sound, in N lat. 56° 9'.

WARDEIN. See **GROSSWARDEIN**.

WARDEN, a parish of Kent, 6 m. E of Queenborough. Area 796 acres. Pop. in 1831, 27; in 1851, 58.—Also a township in Northumberland, 3 m. NNW of Hexham. Area 3,122 acres. Pop. 646.

WARDEN. See **CHIPPING-WARDEIN**.

WARDEN (**OLD**), a parish in Bedfordshire, 3½ m. W by S of Biggleswade. Area 3,330 acres. Pop. in 1831, 660; in 1851, 627.

WARDER, a village of Denmark, in the duchy of Holstein, on a small lake of the same name, to the NW of Segeberg, in N lat. 55° 58'. Pop. 350.

WARDINGTON, a chapelry in the p. of Cropredy, Oxfordshire, 4½ m. NE by N of Banbury. Area 2,600 acres. Pop. in 1851, 862.

WARDLAW, a hill of Selkirkshire, in the p. of Etterick, elevated 1,986 ft. above the level of the sea.

WARDLE, a township in the p. of Banbury, in Lancashire, 3 m. NNE of Rochdale. Pop. with Waerdle, in 1831, 6,754; in 1851, 7,855.—Also a township in the p. of Nantwich, co. Chester, 5 m. NW of Nantwich. Area 1,036 acres. Pop. 178.

WARDLEWORTH, a township in the p. of Rochdale, Lancashire. Pop. in 1851, 14,103.

WARDLEY, a parish of Rutlandshire, 3 m. WSW of Uppingham. Area 1,550 acres. Pop. 59.

WARDLOW, a township in the p. of Hope, Derbyshire, 2 m. E by S of Tideswell. Area 629 acres. Pop. in 1831, 149; in 1851, 191.

WARDOE, an island on the W coast of Norway, in the bishopric of Drontheim, 70 m. E by S of Hammerfest. Pop. 200.

WARDOEHUUS, the chief town of the above, in N lat. 70° 23', E long. 31° 7'. It is inhabited by fishermen.

WARDSBOROUGH, a township of Windham co., Vermont, U. S., 20 m. NE of Bennington. Pop. 1,125.

WARE, a parish and town in Hertfordshire, 3 m. ENE of Hertford, and 21 m. N of London, on the river Lea, which is here navigable. Area of p., 4,700 acres. Pop. in 1801, 2,950; in 1831, 4,214; in 1851, 5,088.—The town, situated on the river Lea, which flows here with considerable rapidity, consists of several streets, one of which is about a mile in length. The principal trade consists in malt and corn, which is carried on to a great extent. In the neighbourhood are springs, which, under the superintendence of the New river company, supply the metropolis with a portion of its water.

WARE, or **WEAR-GIFFORD**, a parish in Devonshire, 2½ m. NNW of Great Torrington. Area 1,587 acres. Pop. in 1831, 547; in 1851, 551.

WARE, a county in the SE of Georgia, U. S., intersected by the Santilla river. Area 1,652 acres. Pop. in 1850, 3,888. Its cap. is Wareboro'.—Also a township of Hampshire co., Massachusetts, 60 m. W of Boston. Pop. in 1840, 1,890; in 1850, 3,785. Also a river of Worcester co., Massachusetts, which runs SW, and unites with the Chicapee.—Also a river of Virginia, which runs into the Chesapeake, in N lat. 37° 25'.

WAREBRIDGE. See **WADEBRIDGE**.

WAREHAM, a borough and market-town, containing the three parishes of the Holy Trinity, Lady-St.-Mary and Out-parish, and St. Martins, with the liberty of Stoborough, in the S division

of Dorset, 18½ m. ESE of Dorchester. Area of p., 8,366 acres. Pop. in 1801, 1,627; in 1831, 2,325; in 1851, 3,078.—The town, situated between the mouths of the rivers Frome and Piddle, is laid out with considerable regularity. It consists chiefly of four principal streets diverging at right angles, and several smaller ones. The S entrance to the town is over a bridge of 5 arches which crosses the Frome. The N entrance, in like manner, crosses a bridge of 3 arches over the Piddle. A great proportion of the females of the town are employed in the manufacture of straw-plait, stockings, and shirt-buttons. Pipe-clay is found in the neighbourhood in great abundance; about 10,000 tons of it are annually exported to London, Hull, Liverpool, and Glasgow. W. was formerly a port of some repute, but its harbour has been destroyed by the retreat of the sea.—The parl. borough, which returns one member to parliament, had a pop. of 7,218 in 1851. Electors in 1852, 418.

WAREHAM, a township of Plymouth co., Massachusetts, U. S., at the head of Buzzard's bay, 17 m. S of Plymouth, and 45 m. SSE of Boston. Pop. in 1840, 2,002; in 1850, 3,186.

WAREHORNE, a parish of Kent, 7½ m. S by W of Ashford. Area 2,870 acres. Pop. 507.

WAREMME, a town of Belgium, in the prov. of Liege, on the Jaar or Geer, 13 m. W by N of Liege. Pop. 1,488.

WAREN, a town of Mecklenburg-Schwerin, in the principality of Schwerin, to the N of the Murricee. Pop. 4,624. It has woollen and linen manufactures.

WARENDORF, a town of Prussian Westphalia, on the Ems, 15 m. E of Munster. Pop. 4,480. It is a place of active manufacturing industry.

WARESLEY, a parish of Huntingdonshire, 5½ m. SE of St. Neot's. Area 1,979 acres. Pop. 295.

WARFFUM, a village of Holland, in the prov. and 12 m. N of Groningen. Pop. 1,200.

WARFIELD, a parish of Berkshire, 4½ m. ENE of Workingham. Area 3,239 acres. Pop. 1,374.

WARFORD (GREAT), a township in Alderley p., Cheshire, 5 m. E by S of Nether-Knutsford. Area 1,272 acres. Pop. in 1831, 349; in 1851, 343.

WARGITTEN, a village of Prussia, in the reg. of Königsberg, circle of Heilsberg. Pop. 370.

WARGOLSHAUSEN, a village of Bavaria, in the circle of Lower Franconia, landgraviate of Neustadt. Pop. 364.

WARGÓWO, a village of Prussia, in the reg. of Posen, circle of Obornik. Pop. 210.

WARGRAVE, a parish and village of Berkshire, 6½ m. NE by E of Reading. Area of p., 4,314 acres. Pop. in 1831, 1,423; in 1851, 1,773. The v. was formerly a market-town, and has a ferry over the river Thames.

WARHAM (ALL-SAINTS), a parish of Norfolk, 3 m. N of Walsingham. Area 1,774 acres. Pop. 343.

WARHAM (ST. MARY), a parish adjoining the above. Area 3,066 acres. Pop. 61.

WARHEM, a commune and v. of France, in the dep. of Nord, 6 m. SE of Dunkirk. Pop. 2,500.

WARI, a country of Western Africa, situated to the SE of Benin, near the river Formosa. The surface is covered to a great extent with an impenetrable forest growing upon land which forms a complete marsh, being covered with water, even in the dry season, to nearly the depth of a foot. The capital is situated on an island in the river.

WARIN, a town of Mecklenburg-Schwerin, in the principality and to the SW of Schwerin. Pop. 1,038.

WARING, a village of Austria, a little to the W of Vienna, with a number of villas.

WARINGSTOWN, a town in the p. of Donaghcloney, co. Down, 2½ m. SSW of Magheralin. Pop. in 1841, 825. There is a considerable manufactory of cambrics here.

WARISOULX, a canton and town of Belgium, in the prov. and arrond. of Namur. Pop. 2,024.

WARK, a parish and village in Northumberland, situated on the North Tyne, 12 m. NW of Hexham. Area of p., 22,986 acres. Pop. in 1851, 866.

WARKA, a town of Poland, 30 m. S of Warsaw, on the river Pilica. Pop. 2,000.

WARKEN, a village of Holland, in the bishopric of Diekirch, in Luxemburg. Pop. 200.

WARKLEIGH, a parish of Devonshire, 5½ m. WSW of South Molton. Area 2,451 acres. Pop. in 1831, 283; in 1841, 337.

WARKOTSCH, a village of Prussia, in the reg. of Breslau, circle of Strehlen. Pop. 200.

WORKSBURN, a township of Northumberland, 13 m. NW of Hexham. Area 9,929 acres. Pop. in 1831, 278; in 1851, 217.

WARKTON, a parish of Northamptonshire, 2 m. ENE of Kettering. Area 1,810 acres. Pop. 309.

WARKULLEN, a village of Prussia, in the reg. and circle of Gumbinnen. Pop. 280.

WARKWORTH, a parish in Northumberland, 7 m. SE of Alnwick, on the river Coquet, comprising the townships of Amble, Acklington, Acklington-Park, Birling, Botherick, Bullockshall, High and Low Buston, East and West Chivington, Gloster-hill, Hauxley, Hadston, Morrick, Starton-Grange, Walk-Mill, W., and the liberty of Togston. Area 19,365 acres. Pop. in 1831, 2,478; in 1851, 4,439. There are quarries within the parish of coal and limestone, and two woollen mills. The v., near the sea, and almost surrounded by the river Coquet, which is here crossed by an ancient stone-bridge, consists principally of one street. Breakwater piers are erected at the mouth of the Coquet. The castle of W. stands on the S side of the river, and about 1 m. from its mouth, and presents a more perfect representation of the stronghold of a feudal baron of the 14th and 15th centuries, than any other castle on the borders. The greater part of the outer walls, enclosing the castle-yard, are yet standing; and the walls of the keep and its adjoining towers are, for the most part in comparatively good repair.

WARLEGGAN, a parish of Cumberland, 5½ m. ENE of Bodmin. Area 2,055 acres. Pop. 295.

WARLEY, a township in the p. and 3 m. W of Halifax, Yorkshire. Area 3,980 acres. Pop. in 1831, 5,685; in 1851, 6,408. There are woollen mills and iron foundries here.

WARLEY (GREAT and LITTLE), adjoining parishes of Essex, 3½ m. S of Brentwood. Area of Great W., 2,793 acres. Pop. 952. Area of Little W., 1,651 acres. Pop. 344.

WARLEY-WIGORN, a township of the p. of Hales-Owen, Worcestershire, 3 m. N by E of Hales-Owen. Pop. in 1851, 989.

WARLIN, a village of Mecklenburg-Strelitz, in the circle of Stargard. Pop. 240.

WARLINGHAM, a parish in Surrey, 5 m. SSE of Croydon. Area 1,777 acres. Pop. 505.

WARLOW, a village of Mecklenburg-Schwerin, in the bail. of Neustadt. Pop. 490.—Also a village of Prussia, in the reg. of Oppeln, circle of Lublinitz. Pop. 270.

WARLOY-BAILLON, a canton and v. of France, in the dep. of Somme, arrond. and 19 m. NE of Amiens. Pop. 2,742.

WARMAERDE, a canton and v. of Belgium, in W. Flanders, arrond. of Courtray. Pop. 1,075.

WARMBRUNN, a town of Prussian Silesia, in the reg. of Liegnitz, among the Riesengebirge

mountains, 60 m. WSW of Breslau. Pop. 1,930. It has warm baths.

WARMENSTEINACH, a village of Bavaria, in Upper Franconia, in the landgraviate of Weidenberg. Pop. 760.

WARMFIELD, a parish in the W. R. of Yorkshire, 3 m. E of Wakefield. Area 2,618 acres. Pop. in 1831, 995; in 1851, 960.

WARMINGHAM, or **WARMICHAM**, a parish of Cheshire, 3½ m. W of Sandbach. Area 4,730 acres. Pop. in 1831, 1,167; in 1851, 1,271.

WARMINGHURST, a parish of Sussex, 6½ m. NW of Steyning. Area 1,051 acres. Pop. 116.

WARMINGTON, a parish of Warwickshire, 5½ m. ESE of Kineton. Area 1,750 acres. Pop. in 1831, 470; in 1851, 523.—Also a parish of Northamptonshire, on the river Nen, 3 m. NE of Oundle. Area 3,150 acres. Pop. in 1831, 617; in 1851, 671.

WARMINSTER, a parish and market-town in Wilts, 20 m. WNW of Salisbury. Area 6,370 acres. Pop. in 1831, 6,115; in 1851, 6,285. The town, situated on the river Willey, consists principally of one street about 1 mile in length. The principal trade is that of malting. The clothing manufacture, at one time carried on here extensively, has declined of late years. Camden supposes this town to have been the *Verulucio* of the Romans.

WARMINSTER, a township of Bucks co., Pennsylvania, U. S.—Also a township of Nelson co., Virginia, on James river, 70 m. above Richmond.

WARMISRIED, a village of Bavaria, in the prov. of Suabia, landg. of Mindelheim. Pop. 340.

WARMOND, a town of Holland, in the prov. of S. Holland, 4 m. N of Leyden. Pop. 1,100.

WARMSDORF, a bailiwick and village of Anhalt-Dessau, on the Wipper. Pop. 1,100.

WARMSROTH, a village of Prussia, in the reg. of Coblenz, circle of Kreuznach. Pop. 220.

WARM-SPRING MOUNTAINS, a ridge of the Alleghany mountains, in Bath and Pendleton cos., Virginia, U. S., remarkable for warm springs. Warm Spring, in Bath co., issues in a very bold stream, sufficient to keep its basin, which is 30 ft. in diam., at the warmth of 96°.

WARM-SPRINGS, a village of Buncombe co., N. Carolina, U. S., 237 m. W of Raleigh.

WARMSWORTH, a parish of the W. R. of Yorkshire, 3 m. SW of Doncaster. Area 1,042 acres. Pop. in 1831, 362; in 1851, 389.

WARMWELL, a parish of Dorsetshire, 5½ m. SE by S of Dorchester. Area 1,531 acres. Pop. 149.

WARMUNKOWITZ, a village of Prussia, in the regency of Oppeln, circle of Gross-Strelitz. Pop. 250.

WARNA, a river of Mecklenburg, which flows W, NW, and N, and falls into the sea near Warnemünde.

WARNANT, a village of Belgium, in the prov. of Namur, arrond. of Dinant, on the Maaz. Pop. 308.

WARNBOROUGH (South), a parish of Southamptonshire, 3 m. SW by S of Odiham. Area 2,569 acres. Pop. in 1831, 374; in 1851, 410.

WARDON, or **WARMEDON**, a parish of Worcestershire, 3 m. NE by E of Worcester. Area 988 acres. Pop. in 1831, 171; in 1851, 193.

WARNE, a river in Northumberland, which falls into the German ocean, about 4 m. S of Holy island.

WARNEMÜNDE, a town and fort of Germany, in the duchy of Mecklenburg-Schwerin, district and 6 m. NW of Rostock, in N lat. 54° 10', at the mouth of the Warne. It has a small harbour, at which, in 1849, 435 vessels cleared; in 1853, 613.

WARNER, a township of Hillsborough co., New Hampshire, U. S., 17 m. WNW of Concord. Pop. 2,038.—Also a river of New Hampshire, which runs into the Contoocook.

WARNETON, a town of Belgium, in the prov. of W. Flanders, on the river Lys, 10 m. SE of Ypres. Pop. 6,000. It has considerable manufactures of linen and lace, and extensive distilleries.

WARNFORD, a parish of Southamptonshire, 6 m. NE of Bishop's Waltham. Area 3,057 acres. Pop. in 1831, 418; in 1851, 414.—Also a hamlet in the p. of Bamborough, Northumberland.

WARNHAM, a parish of Sussex, 3 m. NNW of Horsham. Area, 4,920 acres. Pop. in 1851, 1,016.

WARNING (Mount), a mountain of New South Wales, in S lat. 28° 24'. Alt. 8,300 ft.

WARNITZ, a village of Prussia, in the regency of Frankfort, circle of Königsberg. Pop. 417.—Also a v. in the reg. of Stettin, circle of Pyritz. Pop. 240.

WARNITZA, a village of Austria, in Steiermark, in the circle of Marburg. Pop. 370.

WARNOW, a village of Mecklenburg-Schwerin, in the bail. of Greismühlen, on the Sartover-see. Pop. 341.—Also a v. of Prussia, in the reg. of Stettin, circle of Wollin. Pop. 270.

WARNSDORF (Old), a town of Bohemia, in the circle of Letmeritz, 4 m. SE of Romburg. Pop. 4,800.—Also a town of Moravia, in the regency of Olmutz, division of New-Titschein. Pop. 1,180.

WARNSVELD, a town of Holland, in the prov. of Gelderland, 2 m. E of Zutphen. Pop. 1,948.

WARP (New), a town of Prussian Pomerania, 24 m. NW of Stettin. Pop. 1,800.

WARPSGROVE, a parish of Oxfordshire, 7½ m. E of Stadhampton. Area 460 acres. Pop. 80.

WARREN, a parish of Pembrokeshire, 4 m. from Pembroke. Area 1,169 acres. Pop. in 1851, 124.

WARREN, a county in the NE of Georgia, U. S. Area 436 sq. m. Pop. in 1840, 9,789; in 1850, 12,425. Its cap. is Warrenton.—Also a co. in the NW of Pennsylvania. Area 832 sq. m. Pop. in 1840, 9,278; in 1850, 13,671. Its cap. of the same name is situated on the Alleghany, 158 m. NW of Harrisburg. Pop. in 1840, 797; in 1850, 1,013. The Alleghany is here 150 yds. wide, and the Connnewango 100 yds. There is a safe and easy harbour abreast the town, at which almost all boats and rafts descending the Alleghany from Olean, or the Connnewango from Chataque lake stop.—Also a co. in the NW of Illinois. Area 540 sq. m. Pop. in 1840, 6,739; in 1850, 8,176. Its cap. is Monmouth.—Also a co. in the SW of Ohio, traversed by the Little Miami. Area 400 sq. m. Pop. in 1840, 23,141. Its cap. is Lebanon.—Also a central co. of Iowa. Area 432 sq. m. Pop. in 1850, 961. Its cap. is Indianola.—Also a co. of Kentucky. Area 546 sq. m. Pop. in 1840, 15,446; in 1850, 15,128. Its cap. is Bowling-Green.—Also a co. in the W of the state of Mississippi. Area 570 sq. m. Pop. in 1840, 15,820; in 1851, 18,121. Its cap. is Vicksburg.—Also a co. in the NW of New Jersey. Area 474 sq. m. Pop. in 1840, 20,836; in 1850, 22,858. Its cap. is Belvidere.—Also a co. in the NE of North Carolina. Area 439 sq. m. Pop. in 1840, 12,919; in 1850, 13,912. Its cap. is Warrenton.—Also a central co. of Tennessee. Area 372 sq. m. Pop. in 1840, 10,803; in 1850, 10,179. Its cap. is M'Monnsville.—Also a township of Lincoln co., Maine, on St. George's river, 30 m. E by N of Wiscasset. Pop. in 1850, 2,428.—Also a township of Addison co., Vermont, 20 m. SW of Montpelier.—Also a township of Grafton co., New Hampshire, 11 m. SE of Haverhill. Pop. 872.—Also a town of Bristol co., Rhode Island, on the NE part of Narraganset bay, 10 m. S of Providence. Pop. in 1840, 2,437; in 1850, 3,103. It carries on considerable trade, and is remarkable for ship-building.—Also a township of Litchfield co., Connecticut, 9 m. W of Litchfield. Pop. in 1850, 831.—Also a township of Herkimer

co., New York, 10 m. S of Herkimer. Pop. 1,756.—Also a township of Franklin co., Pennsylvania.—Also a township of Albemarle co., Virginia, on the river James, 10 m. NE of Warminster.—Also a township of Cuyahoga co., Ohio, 8 m. ESE of Cleveland. Pop. 1,408.

WARRENBURG, a township of Warren co., New York, U. S., on Scroon river, 7 m. NW of Caldwell. Pop. 1,874.—Also a township of Green co., Tennessee. Pop. 100.

WARREN'S ISLAND, a high island in the N. Pacific ocean, in N lat. 55° 56', near the middle of the entrance into the Duke of Clarence's straits, so named by Vancouver, in honour of Sir John Borsalae Warren.

WARRENPOINT, a parish containing a small town of the same name, in co. Down. Area 1,178 acres. Pop. in 1831, 1,573; in 1841, 2,045.—The sea-port town stands at the embouchure of the Narow or Newry into the head of Lough Carlingford, 2 m. W of Rostrevor. It has been almost wholly built since 1780; and owes its prosperity, partly to the beauty of its situation, partly to its numerous attractions for sea-bathers and occasional visitors, and partly to its facilities for serving as a sub-port to Newry. Pop. in 1831, 1,856; in 1841, 1,540.

WARRENTOWN, a village in the p. of Knockmark, co. Meath, 24 m. WNW of Dunshaughlin.

WARRENSVILLE, a township of Du-Page co., in Illinois, U. S., 158 m. NE by N of Springfield.

WARRENTON, the capital of Fauquier co., Virginia, U. S., 40 m. NNW of Fredericksburg. Pop. 1,300.—Also the capital of Warren co., N. Carolina, 56 m. NNE of Raleigh. Pop. 750.—Also the cap. of Marshall co., in Alabama, 137 m. N of Montgomery.—Also the cap. of Warren co., Mississippi, on the E bank of the Mississippi, 18 m. below Walnut hills.—Also a township of Warren co., Georgia, 55 m. NNE of Milledgeville.—Also a township of Jefferson co., Ohio, on the Ohio, 13 m. below Steubenville. Pop. 300.

WARRI, or **SAWUNT-WARRI**, a district of Hindostan, in the prov. of Bejapur, situated between the sea and the Western Ghats. It is about 40 m. in length, by 25 m. in breadth, forming what in old maps is designated 'the pirate coast.' For a number of years, the inhabitants of this rocky sterile stripe of coast land were excessively troublesome to British commerce, till at length, in 1818, an expedition entered the country, took the capital and the fortresses of Rairi and Newti, and put an end to the government.

WARRICK, a county in the SW of Indiana, U. S., watered by the Ohio. Area 370 sq. m. Pop. 8,911. Its cap. is Bonneville.

WARRINGTON, a parish and parliamentary borough in the hund. of West Derby, co. palatine of Lancaster, on the river Mersey, which is here crossed by a stone-bridge, and in the line of the Grand Junction section of the Great North-Western railway, equidistant, 16 m., from Manchester and Liverpool, by railway. Besides the township of W., the parish contains the chapelry of Burtonwood, and the townships of Poulton-with-Fearnhead, Rixton, and Woolston-with-Martinscroft. Area of p., 12,168 acres. Pop. in 1831, 19,155; in 1851, 23,561. Area of township, 2,600 acres.—The town consists chiefly of several streets, some of which are open, and contain handsome buildings; while others are long and narrow. Amongst the public buildings, besides the places of worship, are a town-hall, market-hall, cloth-hall, assembly-rooms, and theatre. The position of the town is highly favourable for trade. Besides its water communication through the Mersey from Liverpool in vessels of 80 to 100

tons burthen; and through the Manchester and Irwell navigation and the Sankey canals, the formation first of the Manchester and Liverpool, and then of the Grand Junction railways, have opened up unlimited communication in every direction. In the 17th cent. it was noted for its coarse linens and checks. These manufactures were afterwards superseded by that of sail-cloth; but latterly fustian weaving has superseded all others here as the staple trade. W. also possesses manufactures of hardware goods, and the files made here are celebrated throughout Europe. There are also extensive tanneries and soap manufactories; and ale is made both for consumption and export. Under the reform act W. returns one member to parliament. The borough boundaries include the respective townships of Warrington and Latchford, and also those two detached portions of the township of Thelwall which lie between the boundary of the township of Latchford and the river Mersey. The number of electors registered in 1837 was 635; in 1852, 701. W. is supposed by some to have been a British town, even before the Roman invasion, and to have been converted by Agricola into a Roman station. In 1648 it was the scene of an obstinately fought contest between General Lambert, commanding the forces of the parliament, and a body of Scottish troops, in retreat after the battle of Ribblesdale, under the duke of Hamilton. The battle, in which 1,000 men were slain, terminated in favour of the parliamentarians, who again, in 1651, met the royalists here under Charles II., and again defeated them with great loss.

WARRINGTON, a township of Bucks co., Pennsylvania, U. S., 90 m. E of Harrisburg.—Also a township of York co., Pennsylvania.—Also a township of Escambia co., Florida, 182 m. W by N of Tallahassee.

WARRIOR'S MARK, a township of Huntingdon co., Pennsylvania, U. S., 60 m. WNW of Harrisburg. Pop. 2,000. There are iron-works here.

WARRUNA, a town of Hindostan, prov. of Berar, in N lat. 19° 37'.

WARRUS, a village of Prussia, in the reg. of Gumbinnen, circle of Heidekrug. Pop. 210.

WARSAW, the **WARZAWA** of the Poles, and **WARSCHAU** of the Germans, a large city, formerly the capital of the whole of Poland, and now of the Russian kingdom of that name, situated on the l. bank of the Vistula, in N lat. 52° 18' 5", E long. 21° 2' 14", 320 m. E of Berlin. It covers a great extent of ground, the length of the town and suburbs being between 3 and 4 m.; its breadth between 2 and 3 m.; but large spaces are occupied by gardens. A rampart and fosse surround the city, and the Russians have constructed a large citadel for its defence. The pop., it is said, before it lost—in 1795—its character of capital of the whole of Poland, exceeded 90,000. In subsequent years, when the Polish court was feebly replaced by a Prussian or Saxon viceroy, it fell to 70,000; when again, after 1815, rendered the resort of a legislative body, the pop. increased; and in 1851, it was returned at 164,115, of whom one-fifth were Jews. The garrison usually numbers 20,000.

The town is divided into an old and a new quarter, exclusive of four suburbs, of which one, Praga, lies on the r. bank of the river. The old town, consisting of one main street, with some smaller streets joining it on either side, is miserably built, with the exception of a few public edifices, such as the council-house, the cathedral of St. John, and a collegiate church, belonging formerly to the Jesuits. The new town extends along the banks of the Vistula to the extent of nearly 3 m. It contains several churches,

public buildings, and barracks, an hotel-de-ville, and the Jardin-de-Saxe. The castle stands near the river, and is a large quadrangle, with halls where the diet and senate held their sittings. "W. is, upon the whole," says a recent writer, "a splendid city. Viewed from Praga, as it slopes upwards on the l. bank of the Vistula, the general effect is very imposing; and a nearer examination of its numerous churches and fine public buildings, which there is plenty of room to see to advantage, as well as of the palaces of the nobility, confirms the first favourable impressions of its architectural magnificence. A closer acquaintance, however, will dispel much of the pleasure with which a stranger will be disposed to regard the external appearance of the streets and buildings. On passing the arched gateway which pierces many a noble-looking front, he will be surprised to see the mean and irregular erections which compose the rest of the quadrangle, and his sight will not be the only sense which will receive an unpleasant shock. Though admirably situated for drainage, there being hardly a street in the city in which there is not a good natural fall, W. has no sewers. The streets are tolerably well paved, but seldom swept, and gas has not yet been introduced." The suburbs are less badly built than the old town. Praga is memorable in history for the assaults made on it in the autumn of 1794, by the Russian army under Suwarow. Of the castles or mansions in the vicinity, one of the most remarkable is that which was once the residence of Sobieski, and is still remarked for its beautiful gardens and statues. About 2 m. W of the town is the village and field of Wola, the scene, in former ages, of the assemblage of the national diet. The course of the Vistula is here from S to N; its depth is less than that of the Thames at London; but its breadth is fully equal. The bridge across it from the suburb of Praga is a floating bridge, 3,000 ft. in length.

Of the public establishments of Warsaw, the principal are the offices of government, especially the government palace, an immense building of recent construction. Towards the end of 1816, there was established here a university, consisting, like those of Germany, of classes in theology, law, philosophy, and several of the sciences, including political economy; but this institution has been suppressed. There are schools for surgery and drawing, a lyceum or high school, a college for the sons of the Catholic nobility, a military academy, and a Piarist college.—The situation of W. is favourable to trade; and the improvements in the river navigation, and the opening up a communication by railroad with Berlin and Leipzig, bid fair to increase its commercial activity. The Vistula, here near the middle of its course, is navigable to a great extent upwards as well as downwards: at some seasons, however, great inconvenience is experienced from the extent of its inundations, and at others from the shifting of sand-banks. The middle of summer, and during the interval that the channel is full without overflow, it is computed that nearly 100 boats or barges, laden with the produce of the country, corn, spirits, and wine, are daily sent down its stream. The manufactures consist of cotton and woollen stuffs, jewellery, paper, chemical substances, carriages, harness, and carpeting. Since 1817, two annual fairs have been established here, on the plan of those of Frankfort, and other towns of Germany.

History. W. is a town of old date, but was a place of insignificant till the annexation of Lithuania to Poland; after which the territory of the republic being extended to the west. Cracow was no longer sufficiently central to be the capital. In 1596, the diet was transferred from the old to the new capital of Poland. In the war with Sweden, in the middle of the 17th cent., W. was

occupied by the invaders. When Charles XII. advanced in 1708 to W., it surrendered to him without opposition. In 1793, the Russian garrison that occupied it was expelled by the Poles, on receiving intelligence of the success of Kosciuszko near Cracow. That gallant leader, when obliged to change the scene of contest, retreated on W., and defended it with success against the Prussians, during the summer of 1794, obliging them eventually to raise the siege. A different fate awaited Warsaw on the arrival of Suwarow and the Russians. Praga being taken by assault, and delivered to pillage, the capital submitted without opposition. On the final partition of Poland in 1795, this part of the country fell to the share of Prussia, and W. had no other rank than that of capital of a province, until the end of 1806, when the overthrow of Prussia led to the formation of an independent state, called the duchy of Warsaw. Of this state it continued the capital, until the evacuation of Poland by the French in January 1813. Since 1815, it has, in a manner, retained its character of a capital, being the residence of a viceroy representing the emperor of Russia.

WARSAW, a township of Hancock co., in Illinois, U. S., 100 m. WNW of Springfield.—Also the cap. of Kosciuszko co., in Indiana, 100 m. N by E of Indianapolis. Pop. 300.—Also the cap. of Galatin co., in Kentucky, on the Ohio, 36 m. N of Frankfort. Pop. 700.—Also the cap. of Wyoming co., in New York, 200 m. W of Albany. Pop. 2,624.

WARSAW, a village of Mecklenburg-Schwerin, in the circle of Mendisch, bail. of Neukaiden. Pop. 210.—Also a v. of Mecklenburg, in the bail. of Hagenow, on the Tude. Pop. 280.—Also a v. of Prussia, reg. of Stettin, circle of Randow. Pop. 400.

WARSLIBEN, a village of Prussia, in the reg. of Gumbinnen, circle of Niederung. Pop. 260.

WARSLOW, a township in the p. of Alstonfield, in Staffordshire, 6 m. ENE of Leek.

WARSOP-CHURCH, a parish of Nottinghamshire, 5 m. NNE of Mansfield. Area 6,710 acres. Pop. in 1831, 1,203; in 1851, 1,398.

WARSTEIN, a town of Prussian Westphalia, in the gov. and 14 m. E of Arnsberg. Pop. 1,720.

WARTA, a river of Poland, which rises about 30 m. NW of the city of Cracow; flows N through Kalisch; then taking a direction W, traverses the grand-duchy of Posen, and part of Brandenburg, and joins the Oder at Custring, on the r. bank, after a course of 400 m.—Also a town of Poland, on the Warta, 104 m. W by S of Warsaw. Pop. 2,650.

WARTAU, a town of Switzerland, in the cant. of St. Gall, 20 m. N of Sargans. Pop. 2,087.

WARTBERG, a village of Styria, in the circle of Bruck, on the l. bank of the Mur, in N lat. 47° 31'.

WARTBERG, or SZENEC, a town of Hungary, 13 m. ENE of Presburg. Pop. 1,700.

WARTENBERG (POLNISC), a town of Prussian Silesia, 82 m. ENE of Breslau. Pop. 2,600.

WARTENBURG, a town of East Prussia, 60 m. S of Königsberg, on the Fisch. Pop. 3,500.

WARTER, a parish of Yorkshire, 5 m. E by N of Pocklington. Area 7,000 acres. Pop. 488.

WARTHAUSEN, a village of Württemberg, in the Danube circle, on the Ritz. Pop. 451.

WARTHE, a village of Prussia, in the reg. of Stettin, circle of Uesedom-Wollin. Pop. 220.—Also a v. in the reg. of Potsdam, circle of Templin. Pop. 200.

WARTHILL, a parish of the N. R. of Yorkshire, 5½ m. NE by E of York. Area 860 acres. Pop. 169.

WARTHOLM, a small island in Orkney, near S. Ronaldshay.

WARTLING, a parish of Sussex, 4½ m. E by S of Haylsham. Area 4,736 acres. Pop. 1,039.

WARTON, a parish of Lancashire, 8 m. N by E of Lancaster. Area 11,141 acres. Pop. in 1851, 2,099.—Also a township in the parish and 3 m. from Kirkham. Area 3,939 acres. Pop. 473.—Also a hamlet in the p. of Rothbury in Northumberland, 14 m. SW by W of Alnwick. Area 624 acres. Pop. in 1851, 59.

WARTSENSTADT, a village of Prussia, in the bail of Wohldenburg. Pop. 206.

WARUPOHNEN, a village of Prussia, in the reg. of Gumbinnen, circle of Pillkullen. Pop. 800.

WARWASCHAU, a village of Bohemia, in the reg. of Pilsen, circle of Mirowice. Pop. 880.

WARWICK, a parliamentary borough, the capital and locally situated in the 8 division of the co. of Warwick, 90 m. NW of London, 20 m. SE of Birmingham, on the banks of the Avon, and in the line of the Birmingham and Warwick, and Warwick and Napton canal. The Warwick and Leamington railway, running from Warwick and Leamington to Coventry, $8\frac{1}{2}$ m. in length, forms a junction with the London and Birmingham section of the Great North-Western line. Area of the borough, 5,360 acres. Pop. in 1801, 5,592; in 1831, 9,109; in 1851, 10,973. The town is finely situated, in the midst of a richly diversified country, on a rocky eminence which rises abruptly from the N side of the Avon. About the close of the 17th cent. it was nearly destroyed by fire, and that part which has been rebuilt is regular and well-arranged, and contrasts strikingly with the small part of the ancient town which still remains. The principal street, which runs parallel with the river, and at a short distance from it, is of considerable length, and contains many handsome houses. It is intersected by a wide street and several smaller ones. At each end of the main street is a gateway; that on the W being surmounted by an ancient chapel. The court-house, erected shortly after the fire, is a respectable building. The county-hall is an elegant structure in the Corinthian order of Grecian architecture. The county-jail is a substantial modern fabric, surrounded by a brick wall 23 ft. high. The environs of the town are adorned with several elegant modern villas. The castle, exhibiting, as it does, the beau ideal of a feudal fortress, is in point of grandeur and completeness second to none in the kingdom; and its accompaniments are in true keeping with the character of the building. It is situated on the SE side of the town, on the solid rock, at an elevation of nearly 100 ft. higher than the level of the river, which washes the foot of the rock, although on the N side it is even with the town. The church is a magnificent pile, in a mixed style of architecture, erected in the 14th cent. Among those parts of the original edifice which escaped the conflagration, is the beautiful Beauchamp chapel. W. returns 2 members to parliament. Electors registered in 1837, 1,018; in 1852, 723. The town is not noted for its manufactures. An iron foundry has been established, and the manufacture of hats is carried on to a considerable extent. The general trade, which is good, is greatly augmented by the proximity of the town to Leamington. In 1312, Warwick castle was repaired by the celebrated Guy, earl of Warwick, who here beheaded Piers Gaveston. During the great civil war the castle was garrisoned for the parliament. A large portion of the town was burnt, as already noticed, in 1694.

WARWICK, a parish in Cumberland, 5 m. E by N of Carlisle, on the river Eden, which is here spanned by a bridge of four arches, and in the line of the Carlisle and Newcastle railway. Area 1,845 acres. Pop. in 1831, 686; in 1851, 863.

WARWICK, a township of Upper Canada, in the Western district, intersected by the N branch of Bear creek, and watered also by branches of River Aux Sables. Pop. in 1845, 1,235.

WARWICK, a county in the SE part of the state of Virginia, U. S., comprising an area of 55 sq. m., drained by affluents of James river. It has a level surface, and is tolerably fertile. Pop. in 1840, 1,456;

in 1850, 1,546. Its capital, which bears the same name, is 58 m. SE by E of Richmond.—Also a township of Franklin co., in the state of Massachusetts, 68 m. WNW of Boston. It is hilly, but affords good pasturage. Pop. in 1840, 1,071; in 1850, 1,021.—Also a township of Kent co., in the state of Rhode Island, on the Stonington and Providence railroad, and 8 m. S of Providence, bounded on the E by Narraganset bay, and drained by Pawtuxet river. Pop. in 1840, 6,726; in 1850, 7,740.—Also a township of Orange co., in the state of New York, 24 m. SW of Newburg, drained by Wallkill river, and by tributaries of Passaic river. Pop. in 1840, 5,113; in 1850, 4,902.—Also a township of Bucks co., in the state of Pennsylvania, 5 m. SE of Doylestown. It has a hilly surface, and is drained by Nishamung creek. The soil is sandy loam and gravel. Pop. in 1840, 1,259.—Also a township of Lancaster co., in the same state, 9 m. N of Lancaster. It has a rolling surface, and is drained by Great Chiques, Hanmer, Cocalico, and Marovia creeks. Pop. 3,725.—Also a township of Tuscarawas co., in the state of Ohio, 7 m. S of New Pennsylvania. Pop. 846.

WARWICK-BRIDGE, a township in the p. of Wetheral, Cumberland, 5 m. E of Carlisle. Area, with Great Corby, 2,747 acres. Pop. 1,180.

WARWICK-PLAINS, a level tract of New South Wales, in the co. of Bathurst, on the river Lachlan, and 170 m. from Sydney.

WARWICKSHIRE, an inland county of England, bounded on the NE by Leicestershire; on the E by Northamptonshire; on the SE by Oxfordshire; on the SW by Gloucestershire; on the W by Worcestershire; and on the NW by Staffordshire. An insulated portion of it lies in Worcestershire, and another in Gloucestershire; while it includes within its limits a portion of Worcestershire, a few miles S of Stratford-on-Avon. The extreme length of this co. from N to S is about 50 m.; breadth 35 m. The area of the whole is 902 sq. m., or 577,280 square acres. It is subdivided into 209 parishes, containing, exclusive of the borough of Coventry, 1 county-town, Warwick; 2 par. boroughs, Warwick, and Birmingham; and 10 market-towns, Atherstone, Alcester, Coleshill, Henley, Kineton, Nuneaton, Rugby, Southam, Stratford-on-Avon, and Sutton-Coldfield. The pop. in 1801, was 208,109; in 1831, 336,610; in 1841, 402,121; in 1851, 475,013.

Rivers.] The co. is watered by numerous streams, the principal of which are the Avon and the Tame. The Avon, which rises in Northamptonshire, enters this county near Clifton-upon-Dunsmore, runs with a tortuous course towards the W and SW, and passes into Worcestershire, a short distance below Salford. Its current is gentle, and vessels of 40 tons burden can sail up to Stratford. Its tributary streams are the Dove, the Sow, and the Leam. The Stour rises to the E of Long-Compton, and runs in a NW direction, receiving many small tributary streams, and joins the Avon a few miles below Stratford-upon-Avon. The Aline rises near Baddesley-Clinton, and joins the Avon near the SW angle of the county. The Tame rises in Staffordshire, enters the county a few miles to the N of Birmingham, runs nearly due N, and leaves the co. at Tamworth. The Blythe runs with a devious course towards the N, and falls into the Tame near Lea-Marston. W. possesses an extensive artificial navigation.

Climate, Soil, and Aspect.] The insulated position of this co., and its freedom from any great inequalities of surface, render the climate mild and the vegetation early. The soil is fertile and of great variety; indeed, nearly every description of soil, except that incorporated with chalk and flint, is to be met with. The only extensive commons

are those of Sutton-Coldfield and Sutton-park. The highest points of land are near Corley, and in the vicinity of Pakington. A ridge on the SE, comprising the Brailes and Edge-hills, is also much elevated, and commands a variety of picturesque views. The whole county is in general well cultivated. The meadow and pasture-lands are computed at 235,000 acres, and 60,000 acres are covered with sown grasses. The tracts of permanent pasture abound chiefly on the borders of Leicestershire.

Minerals and Manufactures.] The mineral productions of the co. consist chiefly of coal, limestone, iron-stone, free-stone, and a kind of blue flag-stone. Manufactures of various descriptions are extensively carried on, particularly at Birmingham, which has long been celebrated for the variety and excellence of its hardware goods, especially muskets, swords, army accoutrements, and machinery. The manufacture of watches at Coventry has so greatly increased within the last 40 or 50 years, that the number of watches annually made there far exceeds that furnished by the metropolis. In the city of Coventry and suburbs, the ribbon trade gives employment to between 17,000 and 18,000 persons. There are considerable flax-mills in different parts of the county. Fish-hooks and needles are extensively manufactured at Alcester, and horn combs at Kenilworth. The principal exports consist of manufactured articles. See articles BIRMINGHAM and COVENTRY.

Roads and Railways.] Of the principal lines of road crossing this co., one enters near Long Compton, and, passing Shipston-on-Stour, divides into two great branches, one of which passes Warwick, Kenilworth, Coventry, and Nuneaton, leaving the county near Hinckley; the other, passing Stratford-on-Avon, Henley-in-Arden, and Birmingham, enters Staffordshire at Hackley-Brook. The London and Birmingham section of the Great North-Western railway enters the co. near Hill-Moreton, and passes through Rugby, Coventry, Hampton-in-Arden, to Birmingham. At Rugby a junction is formed with the Midland Counties line, which leaves this co. at Willy. The Birmingham and Derby Junction railway starts from the Hampton station on the London and Birmingham line, and after passing through Coleshill, Kingsbury, Tamworth, Walton-on-Trent, and Burton-on-Trent, forms a junction with the Midland and North Midland Counties line at Derby. The Birmingham and Gloucester railway leaves the county near Edgbaston. The Warwick and Leamington Union railway joins the Great North Western line at Coventry.

Franchise, &c.] Since the passing of the reform act, 4 members are returned for the co.; 2 for the N division, who are polled for at Coleshill, Nuneaton, Coventry, Birmingham, and Dunchurch, the principal place of election being Coleshill; and 2 for the southern, who are polled for at Warwick, Kineton, Stratford, Henley, and Southam, the principal place of election being at Warwick. The number of electors registered for the county in 1837, was 10,985; in 1853, 11,182. The city of Coventry and the boroughs of Birmingham and Warwick also return 2 members each. The county is included in the Midland circuit. The assizes and quarter-sessions are held at Warwick. The greater part of Warwickshire, comprising the deaneries of Arden, Coventry, Marton, and Stonely, in the archd. of Coventry, formerly lay within the diocese of Lichfield and Coventry. By order in council, however, of date 22d December 1836, the archd. of Coventry was transferred to the dio. of Worcester, within which the co. is now wholly included. The poor-rate returns for 3 years to Easter, 1750, show an average expenditure of £10,445 on the poor of this co.; in 1840 the expenditure was £109,522.

History.] The N part of Warwickshire, at the period of the Roman invasion, was in the territory of the *Cornavii*, or *Cornabii*, and the southern in that of the *Wipantes*, or *Wiccii*. On the establishment of the Saxon overlordship W. formed an integral part of the kingdom of Mercia, or of the middle Angles. In the civil wars in the reign of Charles I., the inhabitants of this co. almost unanimously sided with the parliament.

WARY. See CARLSBAD.

WARZA, a village of Saxo-Coburg, in the bail. of Gotha. Pop. 480.

WARZENBACH, a village of Hesse-Darmstadt, in the circle of Marburg. Pop. 420.

WARZENOW, a village of Prussia, in the reg. of Danzig, and circle of Karthaus. Pop. 300.

WARZENRIED, a village of Bavaria, in the circle of Lower Bavaria, and presidial of Kotzing. Pop. 580.

WASA. See VASA.

WASAGY, a small low island of the South Pacific, near the W coast of the island of Waigiu, to the NW of New Guinea. It is covered with trees.

WASBECK, a village of the duchy of Holstein, in the bail. of Neumünster. Pop. 280.

WASCHELWITZ, a village of Prussia, in the regency of Oppeln, and circle of Neustadt. Pop. 260.

WASCHENBACH, a village of Hesse, in the prov. of Starkenburg, and bail. of Lichtenberg. Pop. 275.

WASCHENBEUREN, a town of Württemberg, in the circle of the Jaxt, and bail. of Lorch, 26 m. E of Stuttgart. Pop. 1,000.

WASCHGRUN, a village of Austria, in Bohemia, in the regency of Eger, and bail. of Plau. Pop. 200.

WASCHKE, a village of Prussia, in the regency of Posen, and circle of Kroben. Pop. 215.

WASCHLEITHEN, a village of Saxony, in the circle of Zwickau, and bail. of Grünhain. Pop. 316.

WASCHON. See VASONY (NAGY).

WASCHULKEN, a village of Prussia, in the regency of Königsberg, and circle of Neidenburg. Pop. 215.

WASDALE, or NETHER WASDALE, a chapelry in the p. of St. Bees, 7 m. NNE of Ravenglass. Pop. 200.

WASDALE - HEAD, or UPPER WASDALE, a chapelry in the p. of St. Bees, Cumberland, 11 m. SW by S of Keswick, at the head of Wast-Water. Area 7,000 acres. Pop. 47.

WASEN, a village of Switzerland, in the cant. of Bern, and bail. of Trachselwald, E of Summiswald. Pop. 5,564.—Also a village in the cant. and bail. of Uri, on the Reuss. Pop. 1,394.

WASEN-HANSCHAG. See HANSAG.

WASENBACH, a village of Nassau, in the bail. of Dietz. Pop. 280.

WASENBERG, a village of Hesse-Darmstadt, in the prov. of Upper Hesse, and bail. of Ziegenhain. Pop. 700.

WASENWEILER, a village of Baden, in the circle of the Upper Rhine. Pop. 724.

WASH (THE). See NORFOLK.

WASHBOURNE (GREAT), a parish in Gloucestershire, 4½ m. NNW of Winchcomb. Area 470 acres. Pop. in 1881, 87; in 1851, 117.

WASHBROOK, or GREAT BELSTRAID, a parish in Suffolk, 4 m. W by S of Ipswich. Area 1,445 acres. Pop. in 1831, 418; in 1851, 514.

WASHFIELD, a parish in Devonshire, 1½ m. NNW of Tiverton. Area 3,319 acres. Pop. 452.

WASHFORD-PYNE, a parish in Devon, 8½ m. N by W of Crediton. Area 1,140 acres. Pop. 192.

WASHINGBOROUGH, a parish in Lincolnshire, 3½ ESE of Lincoln, near the river Witham. Area 5,190 acres. Pop., with the township of Heighington, in 1831, 1,124; in 1851, 1,180.

WASHINGLEY, a parish in Huntingdonshire, 1½ m. NW of Stilton. Area 1,260 acres. Pop. 58.

WASHINGTON, the federal capital and seat of the supreme government of the United States, situated on the E bank of the Potomac, in N lat. 38° 55' 48", and W long. 77° 1' 30". Pop. in 1800, 8,210; in 1840, 23,364; in 1850, 40,001. "The situation of the city, chosen by Washington himself,

at the junction of the Potomac and of its eastern bend, the Anacosta, is really worthy the metropolis of a great empire. The finely-wooded hills of Virginia, seen across the river; the forest-clad ranges indented with valleys, which appear on the Maryland side; and the beautiful heights above Georgetown encircle the smooth plain upon which the city is placed, and which is relieved from dullness, and lighted up with life, by the passage through it of a noble river, fringed by belts of trees, and lively traces of high cultivation." The ground on which W. is built is elevated about 40 ft. above the river, from which it has a gradual ascent. It is regularly laid out in streets running due N and S, intersected by others at right angles. Besides these streets, which are from 80 to 110 ft. wide, there are 15 avenues from 180 to 180 ft. wide, which diverge from centres in various parts of the city, crossing the other streets transversely, and named after the several earlier states of the Union. The streets which run E and W, are named after the letters of the alphabet, as A street east, B street west, &c.; those which run N and S are numbered 1, 2, 3, &c., as First street north, and Second street south, &c. At the points from which the avenues diverge, are spacious squares. The ground embraced in the plan of the city is very extensive, but only a small portion of it is yet occupied by buildings. Five of the avenues radiate from the president's house, and five from the capitol, which afford ready communication from all parts to these central and important points. Pennsylvania avenue, extending between these edifices, is the most compactly built and the handsomest thoroughfare of the city. "W. is well entitled the 'city of magnificent distances;' for it has been laid out, on the most extensive scale, with streets of miles in length, and magnificent in width. But alas! as there is but little to be 'got out of it,' except in congress time, and then by hungry politicians only—for there are no manufactures, and no large back country to feed it—the city may boast of its future rather than of its present. Seen from the Capitol, it presents long lines of broad streets, diverging from the Capitol like rays, with smaller streets crossing and encircling them again almost to the limit of vision. But though around the Capitol, and along the Pennsylvania and other main avenues, both sides of the streets present fine blocks of building, houses, shops, hotels—as the eye wanders further, it sees a gradually decreasing quantity of stone and brick; first, a street with one side only, then blank spaces of increasing width, till at last the actual city shades off in white dots of houses, standing in proud individuality, as if waiting for coming companions; while beyond the utmost limit marked by any residence, the streets provided for posterity stretch out into the distance. The whole looks very much like a spider's web half filled with flies." The whole area of the city is about 8,016 acres; its circumference, about 14 m.

The Capitol, which is finely situated on an eminence, commands a view of every part of the city, and is a grand and imposing structure. It stands on an elevation of 72 ft. above tide-water, and is the first object that attracts the eye on approaching the city. The building is of white free-stone, and occupies an area of $1\frac{1}{2}$ acre. Including the wings, which are each 100 ft. front, it is 362 ft. long, and 121 ft. in depth. The projection on the E or main front, inclusive of the steps, is 85 ft., and on the W, 83 ft. The first is ornamented with a portico of 22 Corinthian columns; the latter, with a like portico supported by 10 columns. The building is surmounted by a dome 120 ft. high, under which, in the middle of the building, is the rotunda, 95 ft. in

diameter and 95 ft. in height. The room is also adorned with various alto-relievo groups, each representing some great national event. A colossal statue of Washington, by Greenough, is placed in the rotunda. The congressional library-room, on the W of the rotunda, is 92 ft. long, 34 ft. broad, and 36 ft. high, and previous to the recent fire contained from 50,000 to 60,000 volumes, and a collection of medals, paintings, and statuary. The Senate-chamber, in the N wing of the building, is 78 ft. long and of a semi-circular form. Under this is the room in which the supreme court sits. The house-of-representatives is in the opposite wing, and is somewhat larger than the senate chamber, and semi-circular. These several apartments are ornamented with statuary and paintings. An extension of the building is now making by the addition of two wings at the ends of the present building, with which they will be connected by corridors 44 ft. long and 50 ft. wide. The wings are to be each 143 ft. from N to S, by 238 ft. from E to W, exclusive of the porticoes and steps. The entire length of the whole building, when completed, will be 751 ft., including porticoes and steps; its area on the ground 153,112 superficial ft., or over $3\frac{1}{2}$ acres,—the additions covering nearly 2 acres. These additions are to be constructed of white marble. The general style of architecture will be consistent with that of the present building, with such projections and porticoes upon all the disconnected sides as tend to produce an agreeable composition with the present structure. They will contain nearly 100 additional rooms, for the accommodation of committees and other purposes connected with legislation. The new representative hall, which will be located in the second story of the south wing, will have 800 seats within the bar.

The White House, the residence of the President of the United States, is situated at the junction of Pennsylvania, New York, Connecticut and Vermont avenues. It is a splendid free-stone edifice, 170 ft. long, 85 ft. deep, and two stories high. It is ornamented on the front, facing on La-Fayette square, with an Ionic portico, and the garden front is embellished by a circular colonnade of 6 Ionic columns. Adjoining the president's mansion are extensive buildings appropriated by the department of war, navy, state, and treasury. The new treasury building is 300 ft. long, and in the rear is a wing 100 ft. long. Along the front is a colonnade supported by 82 columns of massive dimensions. The General Post-office is a large marble building 204 ft. in length, with two wings 116 ft. deep, highly adorned by large fluted columns of marble. The Patent-office is a large and splendid building, and exhibits great architectural skill. The Smithsonian Institute is a splendid edifice of reddish free-stone, 450 ft. in length, and 140 ft. in width.

The Navy-yard, situated on the Anacosta branch of the Potomac, about three-quarters of a mile from the capitol, has an area of 27 acres, and is enclosed by a substantial brick wall. Within this enclosure are the officers' quarters, shops, warehouses, two large ship houses, and an armory. These are all fine establishments of their kind, and are kept in the best of order. The navy magazine is an extensive building of brick, in which are employed a large number of artisans for the manufacture of combustibles for warlike purposes.—Within the limits of the city there are numerous churches belonging to the different denominations. There are two orphan asylums, the Washington and St. Vincent's, which are supported, one by the ladies of the city, and the other by the Sisters of Charity. Among the public buildings of Washington, the theatres

and places of amusement are not the least important. The Washington theatre, the National theatre, the Assembly Rooms, are conspicuous in this class. Columbia college is situated on an elevation, commanding a splendid view of the surrounding country. The Theological seminary, the Columbian institute, the American historical society, the Columbian horticultural society, the City library, the Athenæum, the National institution for the promotion of science, and some others, afford to the citizens every advantage in the pursuit of knowledge, and the edifices are highly ornamented and rich in taste and design. The City-hall, intended for the use of the corporate authorities of Washington, is a magnificent structure. The penitentiary and city jail are large buildings.

The Congressional cemetery occupies an area of 10 acres, near the E branch of the Potomac, about 1½ m. from the capitol. The grounds are surrounded by a high brick wall, and have a considerable elevation above the river, commanding an extensive prospect of the beautiful scenery which surrounds the city. They are tastefully laid out with ornamental trees and shrubbery. Washington is connected with the N and S by railway, and is accessible from the Atlantic for ships of the largest class.

WASHINGTON, a county in the SW part of the state of Alabama, U. S., comprising an area of 1,049 sq. m., bounded on the E by Tombigbee river, and watered by its branches, and by Escatawpa creek. It has an undulating surface, and possesses considerable fertility. It is intersected by the Mobile and Ohio railway. Pop. in 1840, 5,300; in 1850, 2,718. Its capital is Washington.—Also a county in the NW part of the state of Arkansas, comprising an area of 929 sq. m., drained by the Illinois, and by a head branch of White river. The surface is mountainous, but the soil fertile. Pop. in 1840, 7,148; in 1850, 9,849. Its cap. is Fayetteville.—Also a county in the state of Columbia. **SEA DISTRICT OF COLUMBIA.**—Also a county in the W part of the state of Florida, comprising an area of 1,500 sq. m., bounded on the SW by the gulf of Mexico, and on the W by Choctawhatchee, and drained by affluents of that river, and by the Econfinia. The surface is level, and the soil generally poor. Pop. in 1840, 859; in 1850, 1,960. Its cap. is Roche's Bluff.—Also a central co. in the state of Georgia, comprising an area of 962 sq. m., drained by branches of Oconee and Ogeechee rivers, by which it is bounded on the NE and W. The surface is diversified, but the soil is chiefly of a light sandy nature. It is intersected by the Georgia Central railroad. Pop. in 1840, 10,565; in 1850, 11,766. Its cap. is Sandersville.—Also a county in the SW part of the state of Illinois, comprising an area of 583 sq. m., drained by Elkhorn and Muddy creeks, and by branches of Kaskaskia, by which it is bounded on the NW, and intersected by the Illinois Central and Sangamon and Massac railroad. Pop. in 1840, 4,810; in 1850, 6,953. Its cap. is Nashville.—Also a county in the S part of the state of Indiana, comprising an area of 540 sq. m., drained by Muscatatuck, the E fork of White river, Lost river, and the head streams of Blue river, and intersected by the New Albany and Salem railway. It has a finely diversified surface. Pop. in 1840, 15,269; in 1850, 17,040. Its cap. is Salem.—Also a county in the SE part of the state of Iowa, comprising an area of 569 sq. m., intersected by Iowa river and its branches, by Skunk river, and by Long and Crooked creeks. The surface is undulating, and the soil generally fertile. Pop. in 1840, 1,594; in 1850, 4,957. Its cap., which bears the same name, is on the E side of Adam's creek, 25 m. S by W of Iowa city,

and intersected by the Dubuque and Keokuk railway. Pop. in 1840, 100; in 1850, 742.—Also a central county of the state of Kentucky, comprising an area of 307 sq. m., drained by Chaplin's fork of Salt river and its branches. The surface is level, and the soil generally fertile. Pop. in 1840, 10,596; in 1850, 12,194. Its cap. is Springfield.—Also a parish in the NE part of the state of Louisiana, comprising an area of 858 sq. m., drained chiefly by Bogue Chitto and Chifuncto rivers. It has a hilly surface, and possesses little fertility. Pop. in 1840, 2,649; in 1850, 3,408. Its cap. is Franklinton.—Also a county in the SE part of the state of Maine, comprising an area of 2,470 sq. m., drained by Machias, Pleasant, and Naraquagas, and intersected by the Franklin, the European, and North American, and the Calais and Baring railroads. It has a hilly surface diversified with lakes, and is in some parts very fertile. Pop. in 1840, 28,327; in 1850, 38,810.—Also a county in the W part of the state of Maryland, comprising an area of 518 sq. m., bounded on the E and NE by the Patuxent, and on the SW by the Potomac rivers, and drained by the Piscataway, Broad, Conecocheague, and other creeks, and intersected by the Baltimore and Ohio, and the Franklin railways, and by the Chesapeake and Ohio canal. It has a diversified surface, and is in some parts extremely productive. Pop. in 1840, 28,850; in 1850, 30,848. Its cap. is Hagerstown.—Also a county of Minnesota, separated by the St. Croix from the Wisconsin territory, and bounded on the S by the Mississippi. It has a level surface, drained by affluents of the St. Croix, and well-cultivated. Pop. in 1850, 1,066. Its cap. is Hillwater.—Also a county in the W part of the state of Mississippi, comprising an area of 1,219 sq. m., drained by Williams, Bayou, and Sunflower river, and other affluents of Yazoo river. It contains numerous lakes, is generally diversified, and very fertile. Pop. in 1840, 7,287; in 1850, 8,389. Its cap. is Greenville.—Also a county in the SE part of the state of Missouri, comprising an area of 937 sq. m., drained by Big river and its branches, and by the headwaters of St. Francois and Big Blackwater rivers. It contains the celebrated Iron Mountain, which has an alt. of 300 ft. above the plain, and yields from 70 to 80 per cent. of good metal. It is in some parts level and very fertile, and is intersected by Iron Mountain railway. Pop. in 1840, 7,231; in 1850, 8,811. Its cap. is Potosi.—Also a county in the NE of the state of New York, comprising an area of 807 sq. m., drained by Hoosick and Battenkill rivers, affluents of the Hudson, and by Pawlet and Poultney rivers, Wood creek, and Mosekill, and intersected by the Rutland and Washington and the Saratoga and Washington railways, and by the Champlain canal. It is finely diversified, and generally fertile. Pop. in 1840, 41,080; in 1850, 5,666. Its cap. is Salem and Sandy Hill.—Also a county in the SE part of the state of Ohio, comprising an area of 612 sq. m., intersected by Muskingum and Muskingum rivers, and by Duck, Wolf, Bear, and Cat creeks, and by the Cincinnati and Marietta, and the Cincinnati and Belpré railroads. The banks of the rivers are level and fertile. Pop. in 1840, 20,823; in 1850, 29,540. Its cap. is Marietta.—Also a county of Oregon territory, bounded on the NE and E by the Columbia and Willamette rivers, and comprising an area of 5,000 sq. m. Pop. in 1850, 2,651. Its cap. is Hillsboro.—Also a county in the E part of the state of North Carolina, drained by affluents of Lake Phelps in the E, and Albemarle in the N. It is in many parts low and swampy. Pop. in 1840, 4,525; in 1850, 5,666.—Also a county in the SW of Pennsylvania, com-

prising an area of 795 sq. m., bounded on the E by the Monongahela river, and drained by Buffalo, Raccoon, and Cross creeks, and intersected by Pittsburg, and Steubenville, and Hempfield railways. Its capital, which bears the same name, is 170 m. W of Harrisburg. Pop. in 1840, 2,062; in 1850, 2,662.—Also a county in the S part of the state of Rhode Island, comprising an area of 867 sq. m., drained by Pawcatuck, and Charles, and Wood rivers, and intersected by the Providence and Stonington railroad. Pop. in 1840, 14,342; in 1850, 16,430. Its cap. is Kingston.—Also a county in the E part of the state of Tennessee, comprising an area of 512 sq. m., drained by Nolichucky river and its affluents, and by branches of Watunga river. It is in some parts hilly, but generally fertile. Pop. in 1840, 11,751; in 1850, 13,821. Its cap. is Jonesboro.—Also a central county in the Texas, drained by Gagua, Jackson, New Year's, and Caney creeks. It is generally fertile. Pop. in 1850, 5,983. Its cap. is Brenham.—Also a central county in the state of Vermont, comprising an area of 550 sq. m., drained by Onion river and its branches, and intersected by the Vermont Central railroad. Pop. in 1840, 23,506; in 1850, 24,654. Its cap. is Montpelier.—Also a county in the SW part of the state of Virginia, comprising an area of 547 sq. m., bounded on the NW by Blue Ridge, and intersected by the Virginia and Tennessee railroad, drained by New river, and by branches of Great Kanawha and Clinch rivers. Pop. in 1840, 13,001; in 1850, 14,612. Its cap. is Abingdon.—Also a county of Utah territory, extending 35 m. in width along the S confines of the Ter between the Rocky mountains, to the Californian frontier, and drained by the Colorado.—Also a county in the E part of the state of Wisconsin, comprising an area of 663 sq. m., drained by Milwaukee and Menomonee rivers. Pop. in 1840, 343; in 1850, 19,484. Its cap. is Port Washington.—Also a township of Lincoln co., in the state of Maine, 22 m. ESE of Augusta, drained by branches of Damariscotta and Muscongus rivers. Pop. in 1840, 1,600; in 1850, 1,756.—Also a township of Sullivan co., in the state of New Hampshire, 27 m. W by S of Concord, drained by Ashuelot and Contoocook rivers. Pop. in 1840, 1,103; in 1850, 1,054.—Also a township of Orange co., in the state of Vermont, 15 m. SE of Montpelier, watered by Jarl branch of Winooki or Onion river, and by branches of Waits and White rivers. Pop. in 1840, 1,359; in 1850, 1,348.—Also a township of Berkshire co., in the state of Massachusetts, 128 m. W of Boston, watered by branches of Westfield and Housatonic rivers, and intersected by the Western railway. Pop. in 1840, 991; in 1850, 953.—Also a township of Litchfield co., in the state of Connecticut, 32 m. W by S of Hartford, drained by Shepaug river. Pop. in 1840, 1,622; in 1850, 1,802.—Also a township of Dutchess co., in the state of New York, 60 m. S of Albany, drained by several small creeks. Pop. in 1840, 2,833; in 1850, 2,805.—Also a township of Bergen co., in the state of New Jersey, 37 m. N by W of Trenton, drained by Muskonetong river, and by Pohatcong creek. Pop. in 1850, 1,567.—Also a township of Gloucester co., in the same state, 12 m. W of Woodbury, drained by Pensauken and Cooper's creeks, and several affluents of Atsion river. Pop. in 1840, 1,545.—Also a township of Morris co., in the same state, drained by the S branch of Raritan river. Pop. 2,451.—Also a township of Luzerne co., in the state of Pennsylvania. Pop. in 1840, 1,255.—Also a township of Berks co., in the same state. Pop. 1,210.—Also a township of Franklin co., in the same state, 11 m. SW of Chambersburg, bounded on the E by South

Mountain, and drained by two branches of Anticlim creek. Pop. 2,404.—Also a township of York co., in the same state. Pop. 1,226.—Also a township of Fayette co., in the same state. Pop. 1,515.—Also a township of Cambria co., in the same state, drained by a branch of Kiskiminetas. Pop. 1,266.—Also a township of Erie co., in the same state. Pop. 1,551.—Also a township of Greene co., in the same state, drained by branches of Ten Mile creek. Pop. 936.—Also a township of Indiana co., in the same state, drained by Crooked and Plum creeks. Pop. 1,893.—Also a township of Jefferson co., in the same state. Pop. 367.—Also a township of Westmoreland co., in the same state, 16 m. N of Greensburg, drained by White Deer Hole and Black Hole creeks. Pop. 2,004.—Also a township of Allen co., in the state of Ohio. Pop. 457.—Also a township of Belmont co., in the same state, drained by Captina creek. Pop. 1,387.—Also a township of Brown co., in the same state, 12 m. NE of Georgetown. Pop. 848.—Also a township of Carroll co., N of Carrollton. Pop. 1,024.—Also a township of Clermont co., in the same state, bounded on the S by the Ohio, and containing two villages. Pop. 2,100.—Also a township of Clinton co., in the same state. Pop. 1,170.—Also a township of Coshocton co., in the same state. Pop. 1,029.—Also a township of Columbiana co., in the same state. Pop. 8,112.—Also a township of Darke co., in the same state. Pop. 889.—Also a township of Franklin co., in the same state, bounded on the E by Scioto river. Pop. 843.—Also a township of Guernsey co., in the same state. Pop. in 1840, 1,353; in 1850, 1,729.—Also a township of Hancock co., in the same state. Pop. in 1840, 809.—Also a township of Hardie co., in the same state. Pop. 203.—Also a township of Harrison co., in the same state. Pop. 1,022.—Also a township of Hocking co., in the same state. Pop. 1,124.—Also a township of Holmes co., in the same state. Pop. 1,461.—Also a township of Jackson co., in the same state. Pop. 481.—Also a township of Licking co., in the same state. Pop. 1,348.—Also a township of Marion co., in the same state. Pop. 880.—Also a township of Mercer co., in the same state. Pop. 214.—Also a township of Montgomery co., in the same state. Pop. 2,210.—Also a township of Monroe co., in the same state. Pop. 583.—Also a township of Pickaway co., in the same state. Pop. 1,194.—Also a township of Sandusky co., in the same state. Pop. 1,074.—Also a township of Shelby co., in the same state, watered by a branch of Miami river. Pop. 1,688.—Also a township of Muskingum co., in the same state. Pop. 1,488.—Also a township of Preble co., in the same state. Pop. 2,459.—Also a township of Richland co., in the same state, to the S of Mansfield. Pop. 1,914.—Also a township of Scioto co., in the same state, bounded on the S by the Ohio, and on the E by Scioto river, and intersected by the Ohio canal. Pop. 653.—Also a township of Tuscarawas co., in the same state. Pop. 978.—Also a township of Miami co., in the same state. Pop. 1,161.—Also a township of Starke co., in the same state. Pop. 1,889.—Also a township of Union co., in the same state. Pop. 151.—Also a township of Van Wert co., in the same state. Pop. 47.—Also a township of Wood co., in the same state. Pop. 196.—Also a township of Williams co., in the same state. Pop. 98.—Also a township of Adams co., in the state of Indiana. Pop. 262.—Also a township of Allen co., in the same state. Pop. 595.—Also a township of Blackford co., in the same state. Pop. 143.—Also a township of Brown co., in the same state. Pop. 584.—Also a township of Clay co., in the same state. Pop. 1,046.—Also a township of

Gibson co., in the same state. Pop. 640.—Also a township of Grant co., in the same state. Pop. 539.—Also a township of Hamilton co., in the same state. Pop. 1,285.—Also a township of Harrison co., in the same state. Pop. 721.—Also a township of Marion co., in the same state. Pop. 1,859.—Also a township of Noble co., in the same state. Pop. 259.—Also a township of Putnam co., in the same state. Pop. 1,872.—Also a township of Randolph co., in the same state. Pop. 1,219.—Also a township of Rush co., in the same state. Pop. 1,168.—Also a township of Tippecanoe co., in the same state. Pop. 809.—Also a township of Wayne co., in the same state. Pop. 1,935.—Also a township of Washington co., in the same state. Pop. 1,992.—Also a township of Davies co., in the same state, 4 m. E of the White fork of White river. Pop. in 1840, 650; in 1850, 2,578.—Also a township of Macomb co., in the state of Michigan, 76 m. E of Lansing, drained by branches of Clinton river. Pop. in 1840, 1,314; in 1850, 1,641.—Also a township of Buchanan co., in the state of Missouri. Pop. in 1840, 484.—Also a township of Clark co., in the same state. Pop. 314.—Also a township of Johnson co., in the same state. Pop. 476.—Also a township of Lafayette co., in the same state. Pop. 458.—Also a township of Livingston co., in the same state. Pop. 167.—Also a township of Monroe co., in the same state. Pop. 1,367.—Also a township of Polk co., in the same state. Pop. 417.—Also a township of Taney co., in the same state. Pop. 275.—Also a township of Sevier co., in the state of Arkansas. Pop. 516.—Also a village of Rappahannock co., in the state of Virginia, 87 m. NNW of Richmond. Pop. in 1840, 375; in 1850, 400.—Also a village of Beauford co., in the state of North Carolina, on the N side of Tar river, and 91 m. E by S of Raleigh. Pop. in 1840, 1,200; in 1850, 1,300.—Also a village of Wilkes co., in the state of Georgia, 52 m. NE by N of Mill-edgeville. Pop. in 1840, 800; in 1850, 850.—Also a village of Antanga co., in the state of Alabama, on the N side of the Alabama river, 10 m. below Montgomery. Pop. in 1840, 200.—Also a village of Adams co., in the state of Mississippi, 6 m. NE of Natchez. Pop. in 1840, 400.—Also a village of Landry co., in the state of Louisiana, on the SW of Bayou Beche. Pop. in 1840, 125; in 1850, 250.—Also a village of Rhea co., in the state of Tennessee, on the W side of Tennessee river, and 184 m. ESE of Nashville. Pop. in 1840, 110; in 1850, 150.—Also a village of Wills township, Guernsey co., in the state of Ohio, 85 m. E of Columbus. Pop. in 1840, 500.—Also a village of Taxewell co., in the state of Illinois, 71 m. N of Springfield. Pop. in 1840, 350.—Also a village of Golo co., in the state of California, on the W bank of the Sacramento.—Also a village of Mason co., in the state of Kentucky, 60 m. ENE of Frankfort, and intersected by the Lexington and Maysville railroad. Pop. in 1850, 650.—Also a village of Washington co., in the state of Texas, on the W bank of Branes river, opposite the mouth of Navasote river, and 94 m. E of Austin city.

WASHINGTON (TERRITORY OF), a district of the United States, which, until 1853, formed a portion of Oregon territory, occupying all the country lying between the parallels of 46° and 49° N, and extending from the Rocky mountains on the E, to the Pacific ocean on the W. The Columbia river forms the S boundary below the line of 46° to the sea. It comprises somewhat more than one-third of the original territory, or about 130,000 sq. m. It includes the waters of Puget's sound. Vancouver's island and the gulf of Georgia indent its north-western extremity. The Columbia river is its great interior

water-course, and there are numerous other important streams which empty either into Puget's sound or into the Pacific. Fort Nesqually and Olympia, at the S extremity of Puget's sound, are already important places. The interior has been as yet but imperfectly explored.

WASHINGTON, a parish in the co.-palatine of Durham, 5 m. SE by S of Gateshead, comprising the townships of Barmston, Great and Little Usworth, and W. Area 5,335 acres. Pop. in 1831, 2,673; in 1851, 3,485. The inhabitants are chiefly employed in collieries.—Also a parish in Sussex, 4 m. W by N of Steyning. Area 3,162 acres. Pop. in 1851, 884.

WASHINGTON (CAPE), a headland of the Antarctic continent, in S lat. 74° 37', E long. 165° 10'.

WASHINGTON (MOUNT), a summit of the White mountains, in New Hampshire, U. S., having an alt. of 6,265 ft. above tide-level.

WASHINGTON-POINT, a point of land formed by the junction of the S and E branches of Elizabeth river, Virginia, 1 m. S of Norfolk.

WASHINGTONVILLE, a village of Sandy Creek township, in Oswego co., in the state of New York, U. S. Pop. 250.—Also a v. of Orange co., New York, 10 m. W of Newburgh. Pop. 200.

WASHITA, or ODACHITTA, a large river of Arkansas and Louisiana, U. S., which rises between the Arkansas and Red rivers, in N lat. 34° 30', about 70 m. to the W of the Mississippi, and falls into Red river, 80 m. above its junction with the Mississippi, after a winding course of more than 500 m. It is sometimes called the Black river, from its junction near the Tenzas; and it only receives the name of the Washita, at the point where its waters unite with those of the Catahoula and the Tenzas. Its current is gentle, and in many places the river does not exceed 80 yds. in breadth. The river is navigable for large boats at all times of the year, except in very dry seasons.—Also a parish of the state of Louisiana, U. S., situated in a valley of the Washita, in the NE part of the state. Area 2,090 sq. m. Pop. in 1840, 4,640; in 1850, 5,008. Its cap. is Monroe.

WASHMINSKER ISLANDS, a cluster of islands, near the S coast of Labrador, in N lat. 50°.

WASHTENANO, a county in the SE of Michigan, U. S. Area 920 sq. m. Pop. in 1840, 23,571; in 1850, 25,567. Its cap. is Ann-Arbor.

WASING, a parish in Berks, 7½ m. SE by E of Newbury. Area 682 acres. Pop. in 1851, 58.

WASKEMASHIN, an island in the gulf of St. Lawrence, near the coast of Labrador, in N lat. 50° 3'.

WASKUACHAOUIPIOU, a river of Canada, which runs into the Saguenay, in N lat. 48° 20'.

WASLING, a parish of Berkshire, 7½ m. ESE of Newbury. Area 682 acres. Pop. 88.

WASLUI, a town of Moldavia, on the Birlad, 33 m. S of Jassy.

WASMES, a canton and town of Belgium, in the prov. of Hainault, 6 m. W of Mons. Pop. 6,000.

WASMES-BRIEFOEL, a town of Belgium, in the prov. of Hainault, 7 m. ESE of Tournay. Pop. 1,100.

WASMUNSTER, a town of Belgium, in East Flanders, on the Durme, 16 m. W by N of Ghent.

WASNIOW, a village of Poland, in the woivode of Sandomir, 36 m. S of Radom. Pop. 200.

WASPERTON, a parish of Warwickshire, 4 m. SSW of Warwick. Area 1,619 acres. Pop. 292.

WASPIK, a village of Belgium, in the prov. of N. Brabant, 10 m. NW of Breda.

WASS, a township of Kilbrun p., Yorkshire, 6¼ m. SW of Helmesley. Pop. 133.

WASS ISLAND, an island of the Atlantic, near the coast of America, in N lat. 44° 28'.

WASSAH, a town of Hindostan, in the prov. of Gujerat, district of Cambay, in N lat. 22° 39'.

WASSAW (Great), an island in the Atlantic, near the coast of Georgia, in N lat. 32° 52'. It is 16 m. in circumf.—Little W. lies to the SW.

WASSAWA LAKE, a lake in the SW of La Pointe co., in Wisconsin, U. S. It is 7 m. in length and 4 m. in breadth, and discharges itself into the St. Croix.

WASSEIGES, a village of Belgium, in the prov. of Liege, arrond. of Huh. Pop. 832.

WASSELA, a mountainous country of Senegambia, in Central Africa, situated to the E of Kong, and having to the N and W Manding and Bambarra.

WASSELONNE, a commune and town of France, in the dep. of Bas-Rhin, on the Mussig, 14 m. NW of Strasburg. Pop. 4,400. It has woollen and cotton-yarn mills.

WASSEN, a village of Switzerland, in the cant. of Uri, on the Reuss. Pop. 1,349.

WASSENAER, a village of Holland, in the prov. of S. Holland, 5 m. W by S of Leyden. Pop. 1,768.

WASSENBERG, a town of Prussia, in the prov. of Aachen, on the Roer, 9 m. ESE of Ruremond. Pop. 1,100.

WASSER (Alt), a village of Prussia, in the reg. of Brieslau, circle of Waldenburg. Pop. 1,068.—Neu W. is a village in the reg. of Koalin, circle of Schlawa. Pop. 270.

WASSERBURG, a town of Bavaria, on the Inn, 28 m. ESE of Munich. Pop. 2,238. It has a trade in hops and hemp.—Also a v. of Bavaria, on a point of land projecting out into the lake of Constanx. Pop. 800.

WASSERLEBON, a village of Prussian Saxony, in the reg. and 12 m. SW of Magdeburg, on the Ilse. Pop. 1,100.

WASSERMUNGENAU, a village of Bavaria, in Middle Franconia, landg. of Heilbronn. Pop. 429.

WASSER-TRUDINGEN, a town of Bavarian Franconia, on the Wernitz, 19 m. S of Anspach. Pop. 2,017.

WASSIBU, a small town of Bambarra, in Central Africa, 75 m. ESE of Benown.

WASSIGNY, a town of France, dep. of Aisne, on the small river Vanx. Pop. 1,100.

WASSOTAH, a celebrated fortress of Hindostan, in the prov. of Bejapur, 30 m. SSW of Saturah. There are two forts, about 1,000 yds. from each other, both situated on rocks nearly 3,000 ft. high. The adjacent scenery is of the grandest description.

WASTWATER, a lake of Cumberland, at the foot of Scawfell. It is nearly 8 m. in length, and about a $\frac{1}{2}$ m. broad, and discharges itself by the Irt. It is environed by lofty and very precipitous mountains, and has a stern and gloomy aspect.

WASUNGEN, a town of the duchy of Saxe-Meiningen, on the Werra, 6 m. N of Meiningen. Pop. 2,500.

WASZILKOW, a town of Russian Poland, 5 m. N of Bialystock. Pop. 900.

WATAB, a village of Benton co., in Tennessee, U. S., on the E bank of the Mississippi, 72 m. NW of St. Paul.

WATAGUAKI, a river of Labrador, which runs into the gulf of St. Lawrence, in N. lat. 50° 12'.

WATANGA, a county in the NW of North Carolina, U. S. Area 548 sq. m. Pop. in 1850, 8,400.

WATCH-POINT, a cape on the E coast of Rhode Island, U. S., in N lat. 41° 13'.

WATCHER ISLANDS, a cluster of small islands in the straits of Macassar, near the W coast of Celebes, in S lat. 0° 27'.

WATCHER (Sourra), a small island in the straits

of Macassar, near the W coast of Celebes, in S lat. 0° 3'.

WATCHET, a seaport in the co. of Somerset, situated on the Bristol channel, 15 m. NW of Taunton. Pop. in 1841, 916.

WATCHFIELD, a hamlet in the p. of Great Farrington.

WATERBEACH, a parish of Cambridge, $5\frac{1}{2}$ m. NNE of Cambridge. Area 5,556 acres. Pop. 1,440.

WATERBOROUGH, a township of York co., Maine, U. S., 25 m. N of York. Pop. 1,989.

WATERBURY, a township of Washington co., Vermont, U. S., on Onion river, 12 m. NW of Montpelier. Pop. 2,352.—Also a township of Newhaven co., Connecticut, 20 m. NNW of Newhaven. Pop. in 1840, 3,608; in 1850, 5,137. There are pin manufactories and corn and rolling-mills here.

WATERDEN, a parish of Norfolk, 4 m. W of Little Walsingham. Area 763 acres. Pop. 89.

WATER-EATON, a hamlet of Bucks, adjoining to Fenny-Stratford, in Bletchley p. Area 1,040 acres. Pop. 241.—Also a hamlet of Oxfordshire, $3\frac{1}{2}$ m. N of Oxford, in the p. of Kidlington. Area 1,630 acres. Pop. 119.

WATEREE. See CATABAW.

WATERFALL, a parish of Staffordshire, 7 m. SE of Leek. Area 1,580 acres. Pop. 521.

WATERFORD, a maritime county of Ireland, in the SE of the prov. of Munster, bounded on the N by the cos. of Tipperary and Kilkenny; on the E by Wexford; on the S by the Atlantic; and on the W by the co. of Cork. The greatest length of the co., in a line due W from Croden-head in Waterford-harbour, to a point near that at which the river Blackwater enters Waterford from Cork, is 39 $\frac{1}{2}$ m.; its greatest breadth from a point on the Suir 2 $\frac{1}{2}$ m. above Clonmel, southward to Ram-head, is 22 $\frac{1}{2}$ m. Its area comprises 325,345 acres of arable land, 105,496 of uncultivated land, 23,408 of continuous woods, 1,525 of towns, and 5,779 of water—in all, 461,553 acres. A broad, boldly-featured range of mountains, called the Cumberagh or Monavoulagh mountains, rises suddenly up from the vicinity of Clonmel, and extends nearly quite across the co., to within about 2 m. of Dungarvan. The river Suir flows in a NE and latterly S direction to the ocean. The Nier runs W to the Suir at nearly the point of that river's first contact with the county. The Clodagh runs E to the Suir. The Mahon flows SSE to the ocean. The Tay also flows SSE to the ocean. The Blackwater comes in from co. Cork with majestic volume, and flows E past Lismore to Cappoquin, and thence S to the head of Youghal harbour. The Bride also comes in from co. Cork, and flows E past Tallow. The Goish flows WNW to the Blackwater, at a point a little above the influx of the Bride. The only navigations within the county, or upon its boundaries, are the Suir to Clonmel, the Blackwater, for small craft, to a point above Cappoquin, and the Bride for small craft to the vicinity of Tallow. Transition rocks, consisting principally of clay slate, greywacke, and greywacke slate, constitute the greater portion of the eastern half of the co.; rocks of old conglomerate, and of purple, red, green, and grey clay slate, constitute the greater portion of the western half. Slate quarries occur at Whitfield. Silver ores are found in the vicinity of Waterford, at Don-Iale, and at Bonmahon. Lead ores occur in the vicinity of Waterford, at Annewstown, at Bonmahon, at Kilkeamy, and in the vicinity of Lismore. Iron ores are found in the Cumberagh mountains, at Ardmore, and in the vicinity of Lismore. Copper ores are found at Bonmahon, at Annewstown, at Dromana, and in the vicinity of Lismore. The mineral district at Bou-

mahon and its vicinity, round the mouth of the rivulet Mahon, ranks as the most valuable in Ireland.

Agriculture.] A large proportion of the land capable of cultivation is in tillage. The common Irish cow is the general dairy stock. Most of the sheep are of a large coarse breed. The horses are light-boned, active animals. In 1841, there were within the rural districts of the co. 15,902 horses and mules, 2,407 asses, 42,980 cattle, 46,511 sheep, 67,547 pigs, and 185,487 poultry. Estimated value of live stock in the rural districts of the co., £549,226. The plantations within the co., in 1841, amounted to 26,536 acres.

Manufactures and Trade.] The principal seats of manufacture and productive industry are the city of Waterford and the towns of Portlaw, Dungarvan, Bonmahon, Lismore, and Cappoquin; and the leading facts respecting the most prominent departments of manufacture and productive industry are stated in the articles on these towns and those of Clonmel and Carrick-on-Suir.

Towns, &c.] The towns and principal villages are Dunmore, Cheekpoint, and Passage, in Gualtier barony; Tramore and Annewstown, in Middlethird; Portlaw, Carrickbeg, Rathgormack, Scronthea, and part of Clonmel, in Upperrthird; Bonmahon, Dungarvan, Kilmacthomas, Kill, Knockmahon, and Stradbally, in Decies-without-Drum; Aglish, Villierstown, Ardmore, Clashmore, and Ringville, in Decies-within-Drum; and Lismore, Cappoquin, Tallow, Tallow-bridge, and Ballyduff, in Coshmore and Coshbride.—The co. is ecclesiastically divided into the dio. of Waterford and the larger part of the dio. of Lismore. The assizes are held at Waterford; courts of quarter-sessions at Dungarvan, Lismore, Waterford, and Carrickbeg. The county sent 10 members to the Irish parliament, or 2 from the county at large, 2 from the city of Waterford, and 2 from each of the boroughs of Dungarvan, Lismore, and Tallow; but—irrespective of its small portion of the borough of Clonmel—it sends only 5 to the imperial parliament, or 2 from the county at large, 2 from the city of Waterford, and 1 from the borough of Dungarvan. Constituency of the county at large, in 1844, 880; in 1851, 3,248. Pop. in 1831, exclusive of the co. of the city, 148,233. Houses, 21,234. Families employed chiefly in agriculture, 15,202; in manufactures and trade, 3,535; in other pursuits, 5,627. Pop. in 1841, exclusive of the municipal district of the city, 172,971. First-class inhabited houses, 610; second-class, 6,225; third-class, 11,116; fourth-class, 7,416. Pop. in 1851, 138,574.

History.] In the time of the geographer Strabo, near the middle of the second century, a people called the *Menappii*, whose origin and character are matter of much dispute among antiquaries, inhabited the territories which now constitute the counties of Waterford and Wexford. The next people we meet with in this county were a powerful clan called the *Desii*. In 1169, Melaghlin O'Feolain, prince of the Desii, was taken prisoner by Earl Strongbow when the city of Waterford was stormed. In him ended the chieftainry of the Desii, and no traces of consequence remain of this territory, except in the large extended barony of Desles in this county, which was soon after established.

WATERFORD, a city and parl. borough, the capital and near the SE extremity of co. Waterford, on the river Suir, 6 m. NNE of Tramore, and 75½ m. SSW of Dublin. The river Suir, while passing the town, has a breadth of from 230 to 350 yds. The northern façade and chief thoroughfare of the city, which assumes the name of the Quay, and which has a noble appearance, measures one statute mile in length; but over the 320 yards of its extent above the bridge, it consists of a series of buildings pressing down to the water's edge, and bisected by three or four narrow lanes. The Mall extends 300

yds. SW from the Quay, and is the most spacious street in the interior of the city. The principal streets in the vicinity of the Quay and the Mall, and particularly the Quay and the Mall themselves, possess the best houses, and are the scene of the chief trade and the principal attractions of the city. The cathedral is a light and beautiful building, 170 ft. in length. The largest of the Roman Catholic chapels, and that which serves as the cathedral of the dio., stands in Barron-stradstreet, is capable of accommodating 11,000 persons, and is said to be one of the largest buildings in Ireland. It was erected at the cost of £20,000. It displays a beautiful architectural front of hewn stone in the Ionic order. The present great timber-bridge, so prominent and singular a feature in all the river views of the city, was built in 1793-4. It measures 832 ft. in length, and 42 ft. in breadth; has 40 sets of piers, each of seven pieces, besides cut-waters. A draw-bridge exists at the S end of the bridge, to permit the transit of river-craft to Carrick-on-Suir and Clonmel. The depth of the Suir directly in front of the quay, varies from 20 to 65 ft. at low water, and from 37 to 82 ft. at high water, of the greatest spring-tides. A brisk trade in cattle and butter was, at an early period, carried on with the English colonies and with Spain; but it was eventually destroyed, in consequence chiefly of the establishment of close commercial relations between the West Indies and America. The manufactures consist of glass, starch, and beer. A large and excellent ship-yard, with a patent slip, possesses considerable celebrity. The old borough is co-extensive with the quondam county of the city, and continues also to be the parl. borough. It has an area of 10,059 acres. The municipal borough, or existing district of the liberties of the city, includes little more than the actual town, and comprises an area of only 668 acres. The parl. borough sends two members to the imperial parliament. Constituency, in 1841, 1,499; in 1852, 1,135.

The Diocese.] The dio. of W. is alleged to have been founded in the 11th cent. The see of W. and Lismore has been united, in terms of the church reform bill, to the sees of Cashel and Emlly. The episcopal income amounts to £3,933. The diocese of W. is, in territorial extent, the smallest diocese in Ireland, and lies wholly in the eastern portion of the county of Waterford. Its length is 13 statute miles; its breadth is 9 statute miles; and its area is 513,239 acres. Pop. in 1831, 45,730. Number of parishes, 29. The Roman Catholic dioceses of Waterford and Lismore remain mutually consolidated as before the Reformation; but, in other respects, continue unannexed, and are regarded as constituting one diocese. This united diocese is distributed into 37 parishes. In 1649, Cromwell proceeded to invest W., which was surrendered to him on the 10th of August 1650. W. gives the title of Earl, in the peerage of Ireland, to the noble family of Talbot; and the title of Marquis, in the peerage of Ireland, to the noble family of De La Poer Beresford.

WATERFORD, a village of Upper Canada, township of Townsend, 7 m. from Simcoe. Pop. 200.

WATERFORD, a township of Oxford co., Maine, U. S., 12 m. SW of Paris. Pop. 1,448.—Also a township of Caledonia co., Vermont, on the Connecticut, 14 m. E of Danville. Pop. 1,412.—Also a township of New London co., Connecticut, 4 m. NW of New London. Pop. 2,262.—Also a township and village of Saratoga co., New York, on the W bank of the Hudson, 10 m. N of Albany. Pop. in 1840, 1,824; in 1850, 2,683.—Also a township of Erie co., Pennsylvania, on French creek, 15 m.

SSE of Erie. Pop. 1,300.—Also a township of London co., Virginia. Pop. 500.—Also a township of Washington co., Ohio, on the Muskingum, 16 m. S of Erie. Pop. in 1840, 1,166; in 1850, 1,698.

WATERFORD - HARBOUR, either the joint estuary of the rivers Suir and Barrow, between co. Waterford, Munster, and co. Wexford, Leinster, or likewise the portion of the river Suir downward from the city of Waterford, partly through the county of Waterford, Munster, and partly between that county and the county of Kilkenny, Leinster. The estuary is entered from the ocean between Hook-head on the E and Swiney-head on the W. The entrance to the harbour is open, sufficiently facile, and comparatively very safe; but Tramore bay, situated a short distance to the W of it, has frequently been mistaken for it. The E shore trends $2\frac{1}{2}$ m. NNE to the head of Oldtown bay; $3\frac{1}{2}$ m. N by W to Duncannon-fort; $2\frac{1}{2}$ m. in the direction of NW by N, to a point about 1 m. above Ballyhack; and $2\frac{1}{2}$ m. N to a point about $1\frac{1}{2}$ m. N of Cheek Point, and at the extremity of a small ramified lagoon, formed to the N and the NE of Cheek Point. Most of the shore is rocky, yet interspersed with sandy beach, and belted at low water with a portion of strand.

WATERGRASSHILL, a village of co. Cork, 9 m. NE of Cork. Pop. 451.

WATERHEAD, a hamlet of Cumberland, 24 m. NE of Carlisle.—Also a village of Lancashire, 2 m. E by N of Oldham.

WATERHOUSE, a small island lying off the N coast of Van Diemen's Land, in S lat. $40^{\circ} 45'$. It is about 4 m. in length, and rises abruptly to a moderate elevation.

WATERHOUSE (Point), a cape on the N coast of Van Diemen's Land, forming the W point of Ringarooma bay.

WATERINGBURY, a parish of Kent, 5 m. W by S of Maidstone. Area 1,470 acres. Pop. 1,448.

WATERINGEN, a village of Holland, in the prov. of South Holland, 12 m. NW of Rotterdam. Pop. 1,450.

WATER-KEY, a small island in the bay of Honduras, near the coast of Mexico, in N lat. $17^{\circ} 30'$.—Also a small island in the Caribbean sea, near the Mosquito shore, in N lat. $12^{\circ} 15' N$.

WATERLAND, a district of Holland, in the prov. of N. Holland, to the N of Amsterdam, and SE of Alkmaar.

WATERLAND, an island in the S. Pacific, in S lat. $14^{\circ} 45'$, discovered by Le Maire and Schouten, in 1616. It is low, sandy, and full of rocks.

WATERLAND-OUDENAU, a commune and village of Belgium, in the prov. of E. Flanders, arrond. of Ecclloo. Pop. 681.

WATERLOO, a commune and village of Belgium, 10 m. S of Brussels, on the road from Brussels to Namur. Pop. 2,756. The village is now nearly joined to that of Mont St. Jean, memorable for the greatest, and let us hope, the last battle in which the French and British measured their strength against each other, fought on the 18th of June 1815. The forces engaged were, until late in the evening, nearly equal, the French reckoning 71,000 men, while the troops under Wellington were about 54,000, of whom 32,000 were British, and those under Bulow, who came up early in the afternoon, were about 15,000. The ground on which the British were drawn up was a gentle ascent from a shallow valley, the corresponding ridge, on the opposite side, forming the French position. The contest opened by Napoleon ordering an assault towards the right of the British, on the Chateau-de-Goumont, or Hougoumont, a post which, as the key of the British position, was defended with

such firmness, that the French could gain possession only of the plantation, and failed in their attempts to drive the British from the chateau. This encounter, which took place between 11 A. M. and 1 P. M., was followed by a more serious onset on the British left and centre. The British plan of battle, as regarded the infantry, was defensive. Their battalions drawn up in squares, and protected by a number of field-pieces, awaited attack, as at Vimiera and Talavera; but their cavalry stood ready to seize any favourable opening to attack the advancing enemy. This occurred on more than one occasion, in the early part of the battle; and conflicts took place with that varied result which will always prevail when, in armies of equal, or nearly equal discipline, there remain regiments in reserve, to fall on a body of their opponents disordered even by success. A charge made by a body of British horse, on the flank of a French column, when marching from left to right, was attended with great success; but this was soon found to be dearly purchased, when fresh regiments of the enemy galloped up against the disordered line of the British; the field was covered with a number, apparently equal, of French and British uniforms; and the French cavalry were repulsed only by the arrival of a fresh body of British dragoons. On the part of the British infantry, the defensive plan being strictly followed, the resistance was almost uniformly successful. The French generals witnessed a dreadful carnage; but observing that the British never advanced, and being unable to see clearly the whole of their battalions, they ventured between 4 and 5 o'clock P. M., to do what should never be hazarded against highly disciplined infantry until fatigued and disordered, they brought forward to the charge their cavalry-reserve of the imperial guards. Twice did this "fiery mass of living valour" rush on the British field-pieces and battalions; though partially successful against the former, they failed against the latter; and were obliged each time to retreat with heavy loss. "This charge," said Bonaparte, who stood on high ground at some distance, "is too early by an hour!" "Ney," rejoined Soult, "commits us as he did at Jena!" After two hours more of firing and partial attacks, Napoleon thought it time to bring forward his final reserve, the imperial foot-guard. This took place at 7 o'clock, and brings us to the most remarkable juncture of the battle, that juncture in which, on almost every former occasion, whether against Austrians, Prussians, or Russians, the attack of a corps fresh and high-spirited, caused the rout of the opposing line. Here, however, the case was different; the British troops had been well supported; and though fatigued were not shaken. The blanks in their ranks had been successively filled by drafts from the reserve; and, if few expected victory, all were determined rather to fall than yield. Wellington alone had higher hopes; he knew that the Prussian main body was approaching; and making his squares dissolve order, and form into a continuous line, obtained, in their musketry fire, a great advantage over an enemy formed chiefly in close column. Affairs were now drawing to a crisis. Lord Wellington, observing the march of Blucher, ordered a forward movement; and the French, seeing on one side the British advance, on the other that the high road in their rear was on the point of being forced by the Prussians, relinquished the field of battle, and sought safety in retreat. Napoleon is stated to have criticised the position of W., and to have observed that it had a very material defect—namely, that of only having one communication to the rear across the forest of Soignes, and consequently the total ruin of Wellington's

army must have taken place had his grace been found to retreat. From the position of W., however, so far from there being only one road towards Brussels,—there are several. From Brain-la-leud—to begin with the r.—there is a direct road, and almost the whole of it a good *chaussée*; then comes the Waterloo *chaussée*. Close to W. are the small villages of Raupart and Rambuck, from both of which there are good cart roads across the forest. From La-Roche, a little more than 2 m. to the l. of Rambuck, and only about 3 m. from W., there is a *chaussée* to Brussels; from Wavre a *chaussée* leads to the same city. The forest of Soignes is the place whence the inhabitants of Brussels draw their fuel. There is no under-wood: it is composed entirely of beech, and intersected in every direction by vistas and alleys in which the nobility and gentry of Brussels ride and drive. The forest is practicable for cavalry, artillery, and infantry, in almost every direction. "If the allied army," says Sir James Carmichael Smyth, "had been obliged to fall back from W., what steps the duke of Wellington might have thought proper to take, it is impossible to say; but the loss of the army does by no means appear to have necessarily followed as the consequences of a retrograde movement, as has been insinuated. The roads from Brain-la-leud, from W. and from Wavre, meet upon very strong ground, about $1\frac{1}{2}$ m. in front of Brussels. There exists a very excellent position, extending across these three *chaussées*, the right of which may be said to be at Weill, upon the Senne, its centre at Vleugat, and its left thrown back to Exilles, and on which the Netherlands troops from Brain-la-leud, the British from W., and the Prussians from Wavre, might have been assembled without any great difficulty. As the division from Tubice, and the Netherlands corps under Prince Frederick of Orange, would in that case have fallen back by the *mons chaussée* towards Brussels, they might have occupied the right of the new position, and in which, supposing the French to have been successful at W., they might have found an army more numerous than that with which they had been engaged, drawn up, and in readiness to receive them."

WATERLOO, a village of Seneca co., New York, U. S., on Seneca river, 14 m. W of Auburn. Pop. of t. in 1840, 3,036; in 1850, 3,795.—Also a v. of Fayette co., in Indiana, 52 m. E by S of Indianapolis. Pop. 1,000.—Also a township of Jackson co., in Michigan, 29 m. SE by S of Lansing. Pop. 1,090.—Also a township of Jefferson co., in Wisconsin, 22 m. E by N of Madison.

WATERLOO, a township in Wellington district, Upper Canada, intersected by Grand river.—Also a village in the township and 3 m. W of Kingston, Upper Canada.—Also a v. in the township of Bertie, on Niagara river.

WATERLOO, a village of Lancashire, 5 m. NW of Liverpool, at the mouth of the Mersey. Pop. 750.

WATERMAEL-BOITSFORT, a commune and village of Belgium, in Brabant, 4 m SE of Brussels.

WATER-MILLOCK, a chapelry in the p. of Greystock, Cumberland, 7 m. SW of Penrith, on the NW bank of Ullswater. Pop. in 1841, 524.

WATER-NEWTON, a parish of Southamptonshire, near Peterborough.

WATER-OVERTON, a hamlet of Warwickshire, $2\frac{1}{2}$ m. NW of Coleshill.

WATER-PERRY, a parish of Oxfordshire, $5\frac{1}{2}$ m. W of Tame. Area 2,620 acres. Pop. in 1851, 258.

WATERS (Point), a cape on the W coast of North America, in N lat. $60^{\circ} 5'$.

WATERSAY, one of the Hebrides, lying to the S of the island of Barra, from which it is distant

about 1 m. It is about 3 m. long, and in some places tolerably fertile. It possesses an excellent harbour for vessels of any burden, sheltered from all storms by the island of Sanderay, and Muldonich or the Deer island.

WATERSTOCK, a parish of Oxfordshire, 5 m. W of Tame. Area 653 acres. Pop. 141.

WATERSTREET, a village of Huntingdon co., Pennsylvania, U. S., on the Juniatta river, 70 m. WNW of Harrisburg.

WATERTOWN, a township of Middlesex co., Massachusetts, U. S., on Charles river, 7 m. W of Boston. Pop. in 1840, 1,810; in 1850, 2,837.—Also a township of Litchfield co., Connecticut, 12 m. SSE of Litchfield. Pop. 1,583.—Also a capital of Jefferson co., New York, at the mouth of Black river, 145 m. NW by W of Albany. Pop. in 1840, 5,027; in 1850, 7,201. It has large woollen and cotton factories, and is a place of deposit for the military stores of New York.

WATERVILLE, a township and village of Kennebec co., Maine, U. S., on the W side of the Kennebec, opposite Winslow, and 17 m. NNE of Augusta. Pop. in 1840, 2,971; in 1850, 3,965. It is finely situated at the head of boat-navigation, opposite Ticonic falls, which present a majestic and beautiful cascade of 18 ft. in height, extending across the river and affording immense water-power.—Also a village of Haven co., in Connecticut, 22 m. WNW of New Haven.—Also a v. of Oneida co. in New York, 86 m. W by N of Albany. Pop. 1,000.—Also a v. of Louisville co., in Vermont, 13 m. W by N of Montpelier.

WATERVLIET, a town of Belgium, in the prov. of E. Flanders, 12 m. NW of Ghent.

WATERVLIET, a town of Albany co., New York, U. S., on the W side of the Hudson, 6 m. N of Albany. Pop. in 1840, 10,141; in 1850, 16,675.

WATFORD, a parish and market-town in the county of Hertford, in the line of the London and Birmingham railway, on which there is here a principal station, $17\frac{1}{2}$ m. from London. The Birmingham line here passes through the Watford tunnel, which is 1 mile and 70 yds. in length, 25 ft. in height, and 24 ft. in width, and is cut through an earth composed of sand and gravel. The parish includes the hamlets of Cashio, Levesden, Oxhey, and Town. Area 10,792 acres. Pop. in 1801, 3,530; in 1831, 5,293; in 1851, 6,546.—The town consists of a well-built and paved street nearly 1 m. in length, rising on a hill with a gentle ascent and nearly surrounded by the Colne, on the banks of which are several mills. The principal manufacture is the throwing of silk. The Grand Junction canal, which passes within 1 m. to the W of the town, and the London and Birmingham line of railway, open up an extensive communication with the northern parts of the kingdom as well as with the metropolis.—Also a parish in Northamptonshire, 5 m. NNE of Daventry, in the line of the London and Birmingham railway, and the Union canal. Area 3,080 acres. Pop. in 1831, 353; in 1851, 503.

WATH, a parish, comprising the chapelries of Norton-Conyers, Melmerby and Middleton-Quernhow, with the township of W., in the wapentake of Hallikeld, all in the N. R. of the county of York, on the River Ouse, and at an average distance of 4 m. N of Ripon. Area 3,568 acres. Pop. in 1831, 730; in 1851, 747.—Also a township in the p. of Hovingham, N. R. of the co. of York.

WATHLINGEN, a village of Hanover, in the gov. of Lüneberg, near the l. bank of the Fusa, 8 m. SSE of Celle. Pop. 599.

WEIER, a village of Bavaria, on the Pfalz, cant. of Edenkyben. Pop. 799.—Also a v. of Baden, circle of the Middle Rhine, bail. of Burchsal. Pop. 739.

WEIHERS, a village of Bavaria, in Lower Franconia. Pop. 824.

WEI-HWUY-FU, a division and town of China, in the prov. of Ho-nan. The div. comprises 19 districts. The town is in N lat. 35° 27' 40", and E long. 114° 16'.

WEIKENDORF, a town of Lower Austria, 16 m. NE of Vienna. Pop. 1,700.

WEIKERSDORF, a town of Lower Austria, 22 m. WNW of Vienna. Pop. 1,250.

WEIKERSHEIM, a town of Württemberg, on the Tauber, in the bail. of Mergentheim. Pop. 1,923.

WEIL, a town of Württemberg, on the river Wurm, 11 m. WSW of Stuttgart. Pop. 1,900. The celebrated Kepler was born here.—Also a town of Switzerland, in the cant. of Aargau, circle of Bruggarten. Pop. 485.—Also a village in the cant. of Basle, 2 m. N of Basle. Pop. 779.

WEILBUCH, a village of Bavaria, in Lower Franconia, lordship of Amorbach, on the Mudau. Pop. 926.—Also a v. of Nassau, in the bail. of Hochheim. Pop. 735.

WEILBURG, a town of the duchy of Nassau, in the circle of Hadamar, on an eminence on the Lahn, 35 m. N by E of Mentz. Pop. 2,680.

WEILER, a village of Baden, in the Lake circle, bail. of Radolphzell. Pop. 223.—Also a v. in the bail. of Pfürzheim, on the Pfenz. Pop. 510.—Also a v. in the circle of Kreuznach. Pop. 650.

WEILERSBUCH, a village of Baden, in the Lake circle, bail. of Bellingen. Pop. 480.—Also a v. of Bavaria, in Upper Franconia. Pop. 680.

WEILHEIM, a village of Baden, in the Upper Rhine circle, bail. of Waldshut. Pop. 732.—Also a town of Württemberg, 19 m. ESE of Stuttgart. Pop. 710.—Also a village of Upper Bavaria, on the Amper, 26 m. SW of Munich. Pop. 2,500.

WEILMUNSTER, a village of the duchy of Nassau, 29 m. N by E of Mentz. Pop. 1,321.

WEILNAU, a village in the duchy of Nassau, 18 m. NE of Mentz. Pop. 260.

WEILTINGEN, a village of Bavaria, 42 m. SW of Nuremberg. Pop. 821.

WEIMAR (Saxe). See **SAXE-WEIMAR**.

WEIMAR, the capital of the grand-duchy of Saxe-Weimar-Eisenach, situated on the l. bank of the Ilm, 50 m. WSW of Leipzig, and 13 m. W of Erfurt, in N lat. 50° 59' 12". Pop. 12,000. It stands in a valley, with a wooded mountain on the N, and hills of some elevation to the S and E, while the river winds along the S side of the town, which is built in a plain and somewhat antique style, but the

number of walks and gardens which adorn and separate its different quarters, justify Madame de Stael's description of it as "not so much a town, as the country with houses in it." Its public buildings are a work-house, an hospital, two Lutheran churches, of which one, the Stadtkirche, is deserving of notice as the burying-place of the reigning family. The grand ducal residence is finely situated to the E of the town, with a park extending along the banks of the Ilm, and open to the public. Its imposing architecture has been completed by a wing recently built. The four principal halls are consecrated to Wieland, Herder, Schiller, and Goethe. The first is the most remarkable for its paintings. On a red ground detached medallions represent in fresco the principal scenes of 'Oberon,' the great work of the German Voltaire. The hall of Herder was executed by Jolger. On an escutcheon in the centre of the porquet a winged lyre is represented, the arms granted to Herder by Charles Augustus. The hall of Goethe is illustrated by scenes from his principal works. A mythological scene from the second part of 'Faust' covers a considerable portion of the walls. The Belvedere, another residence of the reigning family, is situated on an eminence to the S. W. has long held the same rank in Germany for literature, as Dresden for the fine arts; and in consequence of the liberal patronage of the court, a number of the best writers of Germany have either been educated or residents here. In the early years of the present cent., W. reckoned among its residents Schiller, Goethe, Herder, and Wieland, to all of whom statues and monuments have been erected here. Goethe's house is a large building, whose exterior presents nothing to strike the attention. Arrived in the vestibule, however, we discover a staircase adorned with antique statues and bas-reliefs; while marbles, frescoes and mouldings, strike the eye, and form an imposing entrance to the gallery containing the collections. A vast number of statues and busts outline all the apartments. Around the first hall, glass cases are arranged, which contain antique gems, bas-reliefs, Etruscan vases and a collection of David's medallions. Between the windows of the next gallery a rich collection of ancient engravings bound in immense folios is disposed. Between the massive bookcases, which contain these, glasses containing a collection of the medals of all nations are arranged. The gallery is painted in fresco, after the manner of Pompei. In the same room are some of Canova's figures, and a bust of Goethe himself, which although inferior to that of David is more like the original. The garden is tolerably large, but laid out rather for utility than refined enjoyment. A wooden summerhouse, which stands before the door with the air of a Swiss chalet, gives a peculiar character to the whole. The public institutions of W., if not numerous or extensive, are well managed. The inhabitants derive their support chiefly from the residence of the court, their manufactures being insignificant.

WEIMAR (OBER), a village of the grand-duchy of Saxe-Weimar, bail. and 1 m. SE of Weimar, on the Ilm. Pop. 550. It has an agricultural and educational establishment.—Also a village of Hesse, in the prov. of Ober Hesse, and circle of Marburg. Pop. 302.

WEISSMAIN, a town of Bavaria, in Upper Franconia, on the White Main, 14 m. NNE of Bamberg. Pop. 1,050.

WEISSPÖDL, a village of Bohemia, in the reg. of Pardubitz, circle of Czeslau. Pop. 485.

WEISSWASSER, a town of Austrian Silesia, 4 m. SW of Patschkau. Pop. 1,100.—Also a town of Bohemia, 6 m. NW of Jung-Bunzlau, on the Bila. Pop. 1,100.—Also a town of Moravia, 60 m. NW of Troppau.

WEISSWEIL, a village of Baden, 17 m. NW of Freyburg, near the r. bank of the Rhine. Pop. 1,635.

WEISSWEILER, a village of Prussian Westphalia, in the circle of Duren, on the Jude. Pop. 110.

WEISTRITZ, a river of Prussian Silesia, which rises in the Riesengebirge, passes Schweidnitz, joins the Polnitz, and flows into the Oder, on the l. bank.

WEIT, a village of Illyria, in the gov. of Laybach, 9 m. N of Klagenfurt.

WEITEN, a town of Lower Austria, in the circle of Upper Mannhartsberg, 18 m. WSW of Krems.

WEITENAU, a village of Bavaria, 8 m. NW of Immerstadt.

WEITERODE, a village of Kur-Hesse, near the river Fulda, in the circle of Rotenburg. Pop. 820.

WEITERSTADT, a village of Hesse, in the prov. of Starkenburg, landg. of Langen. Pop. 600.

WEITRA, or WEITRACH, a town of Lower Austria, 75 m. WNW of Vienna. Pop. 1,150.—Also a

town of Austria, in the circle of the Upper Wiewerwald, on the Leinsitz. Pop. 1,800.

WEITZ, a town of Austria, in Styria, 11 m. NE of Gratz. Pop. 1,000.

WEITZENKIRCHEN, a village of Austria, on the Hansruck, near Linz. Pop. 600.

WEI-YUEN, a district and town of China, in the prov. of Kan-suh, and div. of Lan-chu-fu, in N lat. 35° 8', and E long. 104° 16'.—Also a district and town in the prov. of Szechuen, and div. of Keatsing-fu, in N lat. 29° 39', and E long. 104° 40'.

WEI-YUEN-TING, a district and town of China, in the prov. of Yunnan, and div. of Tsin-unh-fu, or Pu-urh-fu, in N lat. 23° 29', and E long. 101° 5'.

WELBORN, a township of Conway co., in Arkansas, U. S. Pop. 683.

WELBORNE, a parish of Norfolk, 6½ m. NNW of Wymondham. Area 3,270 acres. Pop. 265.

WELBOURNE, a parish of Lincolnshire, 9½ m. NW of Sleaford. Area, 3,270 acres. Pop. 592.

WELBURN, a township in the p. of Balmer, N. R. of Yorkshire, 5 m. SW by W of New Malton. Area 750 acres. Pop. in 1851, 520.—Also a township in the parish and 4½ m. E of Helmesley.

WELBURY, a parish in the N. R. of Yorkshire, 6½ m. NNE of Northallerton. Area 2,569 acres. Pop. in 1841, 266; in 1851, 249.

WELBY, a township in the parish of Melton-Mowbray, Leicestershire, 2½ m. NW by W of Melton-Mowbray. Area, 1,582 acres. Pop. in 1851, 141.—Also a parish of Lincolnshire, 4½ m. E by N of Grantham. Area 2,740 acres. Pop. 481.

WELD, a township of Franklin co., Maine, U. S., 47 m. WNW of Augusta. Pop. 1,045.

WELDON (GREAT), a market-town and parish of Northampton, near the river Willy, 4½ m. ESE of Rockingham. Area 2,350 acres. Pop. 321.

WELDON (LITTLE), a hamlet of Northamptonshire, adjoining the village of Great Weldon. Area 1,330 acres. Pop. in 1851, 537.

WELDON, a village of Halifax co., in N. Carolina, U. S., 95 m. NE of Raleigh, on the SW side of the Roanoke, at the great falls, which are passed by a canal 12 m. in length, with a lockage of 100 ft. Pop. 600.

WELFORD, a parish of Berkshire, 5 m. NW of Speenhamland. Area 5,173 acres. Pop. 1,115.—Also a parish of Gloucester, 9 m. N of Chipping-Campden. Area 3,550 acres. Pop. 659.—Also a hamlet in the parish of Kempford, Gloucestershire.

WELFORD, or WELLESFORD, a parish of Northamptonshire, 15 m. NNW of Northampton. Area 3,650 acres. Pop. in 1851, 1,153.

WELHAM, or WELLANDHAM, a parish of Leicestershire, 4 m. NE by N of Market-Harborough. Area 1,109 acres. Pop. in 1851, 68.

WELHAM, a hamlet of Yorkshire, 1½ m. S of New Malton.

WELIKOWA, a village of Moravia, in the circle of Hradisch, lordship of Lukow. Pop. 330.

WELITZCHNA, a town of Hungary, 32 m. N of Neusohl.

WELKA, a town of Moravia, in the circle of Hradisch. Pop. 1,600.

WELKERSDORF, a town of Prussia, in the reg. of Liegnitz, circle of Lowenberg. Pop. 1,488.

WELL, a parish of Lincolnshire, 1½ m. SSW of Alford. Area 2,110 acres. Pop. in 1851, 80.—Also a parish of the N. R. of Yorkshire, 5 m. S of Bedale. Area 6,451 acres. Pop. in 1851, 1,044.

WELLAND, a parish of Worcestershire, 3 m. WSW of Upton-upon-Severn. Area 2,027 acres. Pop. 582.

WELLAND, a river of England, which takes its rise in the co. of Northampton; flows NE, passing

Rockingham and Stamford; turns N, and passes Market-Harborough, Market-Deeping, and Spalding; and below the latter place enters the Wash, after a total course of 70 m. It is navigable by locks from Stamford downwards.

WELLAND, or **CHIPPewa**, a river of Upper Canada, which flows through a fertile country in an E course of 60 m., to the Niagara, and forms a part of the canal navigation known as the Welland canal, 28 m. in length, formed to connect Lakes Erie and Ontario, and avoid the falls of Niagara. Up to January 1851 this canal had cost £954,824. Its revenue in 1852 was £58,272.

WELLCOMBE, a parish of Devonshire, 17 m. SW by W of Bideford. Area, 1,751 acres. Pop. in 1851, 234.

WELLESBOURNE-HASTINGS, a village and parish of Warwickshire, $5\frac{1}{2}$ m. NW of Kineton. Pop. 797. Area, with W. Mountford, 4,740 acres.

WELLESLEY'S ISLANDS, a group so called by Flinders, at the head of the gulf of Carpentaria, on the N coast of Australia. They consist of Mornington isle, Pisonia, Bentinck, Sweer's island, and several other small and rocky islets.

WELLFLEET, a town and port of Barnstable co., Massachusetts, U. S., on a bay of the same name, 31 m. ENE of Barnstable, and 97 m. SE of Boston. Pop. in 1840, 2,377; in 1850, 2,411.

WELLHAUGH, a township in the parish of Falstone. Area 29,475 acres. Pop. in 1831, 272; in 1851, 333.

WELLIN, a department, commune, and town of Belgium, in the prov. of Luxemburg, and arrond. of Neufchateau. Pop. 494.

WELLING, a village of Prussia, in the regency of Coblenz, and circle of Mayen. Pop. 800.

WELLINGBOROUGH, a parish and town of Northampton, 10 m. NE of Northampton. Area of p., 4,490 acres. Pop. in 1831, 4,688; in 1851, 5,297.—The town consists of four good streets, diverging from the market-place. The inhabitants were formerly occupied in the manufacture of worsted stuffs; but this employment declined, and of late years they have been chiefly engaged in the manufacture of boots and shoes, and bobbin-lace.

WELLINGDORF, a village of Denmark, in the duchy of Holstein, on the Schwentine. Pop. 366.

WELLINGEN, a village of Prussia, in the regency of Treves, and circle of Merzig. Pop. 250.—Also a village of Würtemberg, in the circle of the Danube, and bail. of Kirchheim. Pop. 320.

WELLINGERODE, a village of Hesse-Darmstadt, in the prov. of Lower Hesse, bail. of Abterode, on the Kupferbache. Pop. 363.

WELLINGHAM, a parish in Norfolk, 6 m. SW by S of Fakenham. Area 1,066 acres. Pop. 163.

WELLINGHOFEN, a village of Prussia, in the reg. of Arnsberg, circle of Dortmunde. Pop. 462.

WELLINGHOLZHAUSEN, a village of Hanover, in the principality of Osnabruck, and bail. of Groningen. Pop. 934.

WELLINGORE, a parish in the co. of Lincoln, $9\frac{1}{2}$ m. NW by N of Sleaford. Area 2,400 acres. Pop. in 1831, 752; in 1851, 914.

WELLINGSBUTTEL, a village of Denmark, in the duchy of Holstein, near Homberg. Pop. 320.

WELLINGTON, a county of New South Wales, bounded on the NW and NE by the Cudgeegong, by which it is separated from the counties of Bligh and Phillip; on the SE by the co. of Roxburgh, from which it is divided by the Turon; on the S by the co. of Bathurst; and on the W by the Bell, an affluent of the Macquarie, by which the co. is intersected from S to N. It is traversed by several mountain ranges. In the W., near the junction of

the Bell and Macquarie rivers, is a fine valley of the same name. The pop. in 1851 was returned at 1,609. The chief town, Mudgee, is on the Cudgeegong, 150 m. from Sydney.—Also a district comprising an area of about 10,000,000 acres, extending between the Lachlan and Macquarie, and adjacent to the counties of Wellington and Bathurst. Pop. in 1851, 1,512.—Also a co. of Western Australia, bounded on the N by the co. of Murray; on the E by that of Wicklow; on the S by the co. of Nelson; and on the W by the Pacific. It is intersected from N to S by the Roe Range, a portion of the Darling chain, and is watered by several streams, the principal of which are Murray river in the NE corner, and Preston and Brunswick rivers, affluents of Leschenault inlet, a considerable sheet of water separated from the sea by a narrow tongue of land, and opening to the E of Point Casuarina into Koombanah bay. The shore is generally low, and is studded with lagoons.—Also a parish of Van Diemen's Land, in the co. of Buckingham, bounded on the N by the Derwent.—Also a mountain which rises above Hobart-Town to an alt. of 4,000 ft. above sea-level.

WELLINGTON, a parish in Hereford, $5\frac{1}{2}$ m. N of Hereford. Area 2,588 acres. Pop. in 1831, 630; in 1851, 689.—Also a township and village in the p. of Walls-End, Northumberland, 3 m. W by S of North Shields, on the river Tyne, and in the line of the Newcastle and North Shields railway. There are extensive collieries in the vicinity.—Also a parish and market-town in Salop, 11 m. E of Shrewsbury, containing the townships of Aston, Hodley, Horton, Ketley, Lawley, and Walcott. Area 8,757 acres. Pop. in 1831, 9,671; in 1851, 11,544. The town is about 2 m. S from the Wrekin. The parish is well supplied with coal, ironstone, and limestone; and the town has long been the seat of extensive operations in the manufacture of iron and iron articles, particularly of nails.—Also a parish and market-town in Somersetshire, 150 m. WSW of London. Area of p., 5,195 acres. Pop. in 1831, 4,762; in 1851, 6,415. It consists of several streets, the principal of which is upwards of 1 m. in length. Druggets and serges were formerly manufactured here to a considerable extent; but these branches have of late years considerably fallen off. Arthur Wellesley was created Viscount Wellington on the 4th September, 1809; Earl on the 28th February, 1812; Marquis on the succeeding 18th of August; and Duke on the 3d May, 1814.

WELLINGTON, a settlement on the SW coast of the North island of New Zealand, extending along the crescent-shaped beach of Port Nicholson. The town, which is a long straggling village of wooden houses often far apart, but chiefly near the beach on the W and S sides of the splendid harbour or basin, had a pop. of 2,649 in 1848. See articles **PORT NICHOLSON** and **NEW ZEALAND**.

WELLINGTON, a district of Upper Canada, consisting of the co. of Waterloo, and comprising 26 townships. It is watered by the Grand River and some of its affluents, and contains some of the best farms in the prov. Pop. in 1841, 13,851; in 1848, 36,865.—Also a village partly in the township of Hillier and partly in that of Hallowell.

WELLINGTON, a township of Piscataquis co., in the state of Maine, U. S., 53 m. NE of Augusta. Pop. in 1840, 722; in 1850, 600.—Also a township of Lorain co., in the state of Ohio, 89 m. NNE of Columbus, drained by the W branch of Black river, and intersected by the Cincinnati, Cleveland, and Columbus railroad. Pop. in 1840, 781; in 1850, 1,556.

WELLINGTON-CHANNEL, an arm of the Arctic ocean leading from Barrow strait north-

v. 7

ward along the W side of North Devon, between the parallels of $74^{\circ} 30'$ and 77° . Beechey island, the scene of Franklin's first winter encampment, in the last and ill-fated expedition, lies at the SE extremity of this channel. It has been supposed that Franklin may have gone up this channel, if he could not get to the westward, and found it comparatively free from ice. Sir Edward Parry, the discoverer of this channel or strait, says: "When I was going up westward from Melville island we saw Wellington strait perfectly free from ice, and so I marked it on my chart. It was not my business to go N as long as I could get W; and therefore we ran past, and did not examine it; but it had always been a favourite idea of those who imagined that the NW passage was to be easily made by going N. That we know was the favourite idea of Franklin, and we know he did intend, if he could not get westward, to go up Wellington channel. We have it from his own lips. My belief is still that after the first winter he did go up that channel, and that, having steam power—which I had not in my time—it is possible he may have gone up in a favourable season. For anything more different than a favourable and an unfavourable season in those regions cannot be imagined, or the changes that take place in the ice there. I have been sometimes beset for two or three days together by the ice in such a way that from the masthead I could not see sufficient water to float a bottle in; and in 24 hours there was not a bit of ice to be seen. Therefore in a favourable season he may have gone up that inlet, and may, by the power of steam and favourable circumstances, have got so far to the NW that in an ordinary season he could not get back again. And those who knew Franklin know this—that he would push on year after year so long as his provisions lasted. Nothing could stop him. He was not a man to look back if he believed the thing was still possible." The last we know of the expedition is that it passed the winter of 1845-6 in a small cove between Cape Riley and Beechey-island, facing Lancaster-sound; and in the neighbourhood of Wellington-channel traces of a travelling party were subsequently discovered, which seems to have been despatched from the same expedition. From these facts, it has been inferred by some geographers, "that Franklin's expedition never got far up Wellington strait; that they had, near its mouth, or in attempting to proceed westward, been embedded in the ice; that they had clung to their ships till their provisions began to fail, and then commenced their dreary journey to the southward, for they were in want of provisions when met by the Esquimaux. The date of these events cannot be later than 1850, when the solitary traces of the party were found at Cape Riley and Beechey-island. They may have happened as late as 1849, for to that time, according to letters from Franklin, he thought his provisions might be stretched out."

WELLINGTON-ISLAND, an island of the Patagonian archipelago, extending between the gulf of Penas, by which it is separated from the peninsula of Tres-Montes on the N, and the gulf of Trinidad on the S, and divided from the continent on the E by the Messier and Wide channels. It lies between $47^{\circ} 30'$ and $50^{\circ} 20'$, and is 138 m. in length, but of small comparative breadth.

WELLINGTON-SQUARE, a village of Upper Canada, in the township of Nelson, on Lake Ontario, 81 m. from Hamilton. Pop. 400.

WELLMICH, a market-town of Nassau, in the bail of St. Goarshansen, on the Rhine. Pop. 492.

WELLOW, a parish in Notts, $1\frac{1}{2}$ m. SE of Ollerton. Area 991 acres. Pop. in 1831, 473; in 1851,

597.—Also a parish in Somersetshire, 4 m. S by W of Bath, containing the hamlets of Beggeridge, Hassage, Peglineh, Shascombe, Stony-Littleton, Twinney, or Twynio, Whiteoxmead, and Woodborough. Area 5,292 acres. Pop. in 1851, 1,142.

WELLOW (EAST), a parish in Hants, 4 m. W of Romsey. Area 2,373 acres. Pop. in 1851, 289.

WELLOW (WEST), a parish in Wilts, $4\frac{1}{2}$ m. W by N of Romsey. Area 1,344 acres. Pop. 407.

WELLS, a parish and seaport town in Norfolk, 5 m. N by W of Walsingham, and 32 m. NW by N of Norwich. Area of p., 4,510 acres. Pop. in 1831, 3,624; in 1851, 3,675. The town, situated on a small creek which has a winding course of about 2 m. in length, through salt marshes, to the German ocean, consists chiefly of two main streets. The entrance to the harbour has been rendered difficult by the gradual accumulation of silt and other obstructions; but it has of late been considerably improved under the inspection of harbour-commissioners. Spring tides rise 11 ft. at the quay, and vessels of 150 tons can come up at high water. The exports consist chiefly of grain, malt, and oysters.

WELLS, a city and borough in Somersetshire, 19 m. S of Burton, and 19 m. SW of Bath, on the south side of the Mendip hills. The town, which is small, has an interesting appearance, from the number of ancient ecclesiastical edifices which it contains, particularly its magnificent cathedral. It consists chiefly of four principal streets. There is a large stocking manufactory which sometimes employs as many as 1,500 persons; the market for corn is no longer considerable; but the cheese market is the greatest in the west of England. The pop. in 1831 was 4,603; in 1851, 4,734. The burgh returns 2 members to parliament. Electors in 1852, 325. Bishop Robert, about the year 1139, decided that the diocesan should be styled bishop of Bath and Wells, and be enthroned, on his admission, in both churches. At the Reformation, the chapter of Bath was dissolved; and the election of the bishops has ever since been vested in the dean and chapter of Wells. The cathedral church, a magnificent cruciform structure, chiefly in the earliest style of English architecture, stands at the E extremity of the city. Its form is the usual one of a cross, extending from E to W, in extreme length, 415 ft.; the transept measuring 155 ft. From the intersection springs a quadrangular tower, 178 ft. in height; and two towers, each 126 ft. in height, rise from the N and S sides of the W entrance. The most remarkable portion of the building is the west front, which is covered with elaborate sculpture of light and airy design. The choir is 108 ft. in length. The Lady-chapel is an architectural gem 52 ft. in length. The episcopal palace is an ancient castellated mansion to the S of the cathedral, surrounded by a wall and moat, enclosing a space of 7 acres, and communicating with the cathedral through a venerable gateway leading over a bridge.

WELLS, a parish in cos. Carlow and Kilkenny, partly in the barony of Gouran, but chiefly in that of West Idrome. Area 2,726 acres. Pop. 1,298.

WELLS, a parish of Tasmania, in the co. of Devon, bounded on the E by the Tamar.—Also a town of South Australia, in the co. of Flinders, on an arm of Coffin bay.—Also a town in the co. of Hindmarsh, on Encounter bay.

WELLS, a port on the N coast of Russian America, in the NW part of Prince William's strait, in N lat. 61° , and W long. $147^{\circ} 27'$.

WELLS, a central county of the state of Indiana, U. S., comprising an area of 372 sq. m. drained by Upper Wabash and Salamonie rivers, and intersected by the Fort Wayne and Southern railway. Pop. in

1840, 1,822; in 1850, 6,152.—Also a township of York co., in the state of Maine, 81 m. SSW of Augusta. It is low and marshy, drained by affluents of the Atlantic, and intersected by the Portland, Saco, and Portsmouth railway. Pop. in 1840, 2,978; in 1850, 2,945.—Also a township of Hamilton co., in the state of New York, 69 m. NNW of Albany, drained by the Sacandaga river. Pop. in 1840, 365; in 1850, 400.—Also a township of Rutland co., in the state of Vermont, 67 m. SSW of Montpelier. It has a diversified surface, and contains a large lake. Pop. in 1850, 804.—Also a township of Bradford co., in the state of Pennsylvania, drained by South creek and by a branch of Seely creek. Pop. in 1840, 1,492.—Also a township of Macon co., in the state of Missouri. Pop. 680.—Also a river of the state of Vermont, which has its source in Long Pond, in Groton, and joins the Connecticut in the NE of part of Newbury.

WELLSBORO', a village of Tioga co., in the state of Pennsylvania, U. S., 102 m. N by W of Harrisburg. Pop. in 1850, 620.

WELLSBURG, a village of Chenning co., in the state of New York, U. S., on the Erie railway, 276 m. from New York.—Also a village of Brook co., in the state of Virginia, on the E side of the Ohio, at the mouth of Buffalo creek. Pop. in 1840, 2,000; in 1850, 2,200.

WELLSEE, a village of Denmark, in the duchy of Holstein, near Kiel, on a small lake of the same name. Pop. 278.

WELL'S ISLAND, an island of Jefferson co., in the state of New York, U. S., and one of the largest of the Thousand Islands, in the St. Lawrence.

WELLSPIITZ, a village of Austria, in Moravia, in the circle of Brunn. Pop. 660.

WELL'S RIVER, a village of Orange co., in the state of Vermont, U. S., on the W side of the Connecticut, at the mouth of a river of the same name, 26 m. ESE of Montpelier, and on the Boston, Concord, and Montreal railroad.

WELLSTRASSE, a village of Prussia, in the regency and circle of Munster. Pop. 200.

WELLSVILLE, a village of Scioto township, Alleghany co., in the state of New York, U. S., 227 m. W by S of Albany, and on the E side of Genesee river. Pop. in 1840, 240.—Also a village of Yellow Creek township, Columbiana co., in the state of Ohio, on the W bank of the Ohio, 126 m. ENE of Columbus, and on the Cleveland and Pittsburg railroad. Pop. in 1850, 1,549.

WELLWITZ, a village of Prussia, in the regency of Marienwerder, and circle of Flatow. Pop. 270.

WELLWOOD, a town of New South Wales, in the co. of and near Bathurst.

WELMLINGEN, a village of Baden, in the circle of the Middle Rhine, and bail. of Lorrach. Pop. 345.

WELMSCHLOSS, a village of Austria, in Bohemia, in the regency of Eger, and bail. of Saatz. Pop. 390. It has a castle.

WELNA, a village of Prussia, in the regency and 24 m. N of Posen, and circle of Obernik, on a small river of the same name, an affluent of the Warthe. Pop. 428.

WELNETHAM (Great), a parish in Suffolk, 4 m. SSE of Bury-St.-Edmunds. Area 1,493 acres. Pop. in 1831, 422; in 1851, 552.

WELNETHAM (Little), a parish in Suffolk, 4 m. SE of Bury-St.-Edmunds. Area 592 acres. Pop. in 1831, 180; in 1851, 178.

WELNEY, a chapelry in the p. of Upwell, partly in Cambridgeshire, and partly in Norfolk, 6 m. ENE of March. Area 5,292 acres. Pop. in 1851, 1,206.

WELNITZ, a village of Austria, in Bohemia, in the regency of Bohm-Leipa, and bail. of Haida. Pop. 800.

WELPER, a village of Prussia, in the regency of Arnberg, and circle of Bochum. Pop. 290.

WELPLAGE, a village of Hanover, in the principality of Osnabruck, and bail. of Wittlage-Hunteburg, near Lemförde. Pop. 824.

WELS, a town of Austria, capital of the circle of Hausruck, on the l. bank of the Traun, 18 m. SW of Linz, and 120 m. W of Vienna, in N lat. 48° 9' 32", and E long. 14° 1' 13". Pop. 5,550. It is regularly built, and contains two castles belonging to the princes of Auersberg and Polhaim, several handsome churches, a Protestant chapel, a large hospital, and several schools. It has manufactories of cotton fabrics, tanneries, and copper and powder-mills, and carries on an active trade in wood, corn, and cattle.

WELSBACH (Großes and Kleins), two villages of Prussia, in the regency of Erfurt, and circle of Langensalza. Pop. 480.—Also a village in the circle of Treves, and circle of Saarbrück. Pop. 280.

WELSBURG, a village of Austria, in Tyrol, in the prov. of Brixen, and circle of Bruneck, on the Rienz. Pop. 660.

WELSCHBILLIG, a town of Prussia, in the reg. and circle and 11 m. NNW of Treves. Pop. 698.

WELSCH-BIRKEN, a market-town of Austria, in Bohemia, in the regency of Pilsen, and circle of Frachin, to the NW of Hufflez. Pop. 458.

WELSCHHEID, a village of Belgium, in the prov. of Luxemburg, and bail. of Diekirch. Pop. 260.

WELSCH-KONFINEN. See ROVZANO.

WELSCHENNEXT, a village of Prussia, in the regency of Arnberg, and circle of Olpe. Pop. 330.

WELSCHENROHR, a village of Switzerland, in the cant. and to the NE of Soleure, and bail. of Balstale. Pop. 721. It has an iron-mine.

WELSCHNEURUTH, a village of Baden, in the circle of the Middle Rhine, and bail. of Karlsruhe. Pop. 700.

WELSCH-STENIACH, a village of Baden, in the circle of the Middle Rhine, and bail. of Haslach. Pop. 460.

WELSE, a river of Prussia, in the regency of Potsdam, and circle of Angermünde, an affluent of the Oder.

WELSEDE, a village of Hesse-Darmstadt, in the circle of Kinteln, and bail. of Oldendorf. Pop. 463.

WELSHEIM, a market-town of Bavaria, in the circle of Middle Franconia, and presidial of Eichstadt. Pop. 500. It has a castle.

WELSHOFEN, a village of Bavaria, in the circle of Upper Bavaria, and presidial of Dachau. Pop. 220.

WELSHPOOL, or POOL, anciently TRALLWOG, a borough and parish in Montgomeryshire, North Wales, 170 m. NW of London. Area 6,801 acres. Pop. in 1831, 4,588; in 1851, 4,891.—The town, situated in a valley near the banks of the Severn, in the vicinity of the Montgomeryshire canal, consists in fact of two towns, Pool town and Welsh town; which are however so united as to form a continuous town. The Ellesmere canal, which passes close on the E side of the town, communicates with Chester and Liverpool; and the Severn is navigable to a place called the Pool stake, 200 m. from its mouth, and within a short distance of the town, during several months of the year. The inhabitants are partly employed in the manufacture of flannels. W. was anciently a borough, and contributed with Montgomery in returning a member to parliament, but was disfranchised in 1728. The parl. borough, which comprises the whole of the p. of Pool, and the township of Gunrog-Fechan, in the parish of Guilsfield, is now contributory with Montgomery, Llanfyllin, Llanidloes, Machynlleth, and Newtown, in returning one member to parliament.

WERDORF, a village of Prussia, in the regency of Coblenz, and circle of Mettlar, on the Dill. Pop. 734.

WERDUM, a village of Hanover, in the gov. of Aurich, and bail. of Eesens. Pop. 400.

WERECHOV, a village of Austria, in Bohemia, in the regency of Pilsen, and bail. of Strakonitz. Pop. 260.

WEREHAM, a parish in Norfolk, 2 m. NW of Stoke-Ferry. Area 2,281 acres. Pop. 609.

WEREJA, a town of Russia in Europe, in the gov. of Moscow, on the Protwa. Pop. 6,000. It has a trade in hemp, corn, and other agricultural produce.

WERENZHAIN, a village of Prussia, in the regency of Frankfurt, and circle of Luckau. Pop. 340.

WERESZYCA, a river of Galicia, which has its source in the NW part of the circle of Lemberg, traverses the W part of that circle, and the NE of that of Sambor, and after a course in a generally S direction of about 45 m., in which it forms several lakes, joins the Dniester, on the l. bank. Grudek and Komarno are the chief places on its banks.

WERFEN, a town of Upper Austria, in the circle of Salzburg, on the river Salza, 26 m. SSW of Salzburg. Pop. 1,510.—Also a village of Prussia, in the reg. of Minden, circle of Herford. Pop. 400.

WERGELA, or **WUGLA**, a town of the Beled-el-Jerid, 800 m. S of Algiers.

WERHENDAM, a village of Holland, in the prov. of N. Brabant, 24 m. NW of Hertogenbosch. Pop. 1,500.

WERKEL, a village of Kur-Hesse, in Lower Hesse, circle of Fritzlar. Pop. 640.

WERKLEIZ, a village of Prussia, in the reg. of Magdeburg, circle of Kalbe, on the Saal. Pop. 320.

WERL, a town of Prussian Westphalia, 19 m. WSW of Lippstadt. Pop. 4,000. There are large salt-works in the vicinity.

WERLTE, a village of Hanover, in the prov. of Osnabruck, near Meppen. Pop. 1,100.

WERM, a village of Belgian Limburg, in the cant. of Cortesse, arrond. of Tongres. Pop. 208.

WERMELSKIRCHEN, a village of Prussian Westphalia, in the duchy of Berg. Pop. 1,100. It has manufactories of coarse woollens.

WERMSDORF, a village of Moravia, in the circle of Olmutz, near Weisenberg. Pop. 1,200.—Also a town of Saxony, 22 m. ESE of Leipzig. Pop. 1,600.

WERNE, a river of Prussian Westphalia, in the principality of Paderborn, which falls into the Weser.—Also a town of Prussian Westphalia, on the Lippe, 19 m. S of Munster. Pop. 1,790, chiefly linen weavers.

WERNECK, a village of Bavarian Franconia, 18 m. NNE of Würzburg. Pop. 460.

WERNERSDORF, a village of Prussia, in the reg. of Danzig, circle of Marienburg. Pop. 410.—Also a village of Bohemia, circle of Gitschin. Pop. 1,100.

WERNERSREUTH, a village of Bohemia, in the circle of Elbogen, on the Elster. Pop. 1,050.

WERNETH, a township and village in the parish of Stockport, co.-palatine of Chester, 4 m. ENE of Stockport. Area 1,560 acres. Pop. in 1831, 3,462; in 1851, 3,635. The manufacture of cotton goods and calico-printing is carried on here.

WERNIGERODE, a district, with the title of county, in Prussian Saxony, lying between the principality of Halberstadt and the states of Brunswick and Hanover. Its area is about 100 sq. m.; its population 13,000. It lies in the Harz forest, and is consequently covered with mountains. Its principal streams are the Ilse and the Ecker. The capital, of the same name, stands on a small stream called the Zilllicherbach or Holzemme, at the N extremity of the Harz, 12 m. WSW of Halberstadt, in N lat. 51° 50' 34". It is divided into an old and a new town, and the suburb of Nessenrode. Pop. 5,600. It has a considerable trade in corn, chicory, and spirituous liquors; also in woollens, which are manufactured in the town. Adjoining to the town is a castle, the residence of the prince.

WERNITZ, a river of the Bavarian states, which rises near Rothenburg, 14 m. W of Anspach; flows SSE; and runs into the Danube, near Donauwert, after a course of 60 m.

WERNSDORF, a small town of Saxony, in the circle of Zwickau, 28 m. E of Leipzig. Pop. 400.—Also a village of Bohemia, in the circle of Saatz, 3 m. NW of Kadan. Pop. 806.

WERNSTADTL, a town of Bohemia, 38 m. N of Prague. Pop. 1,700. It has extensive cotton manufactures.

WERRA, a river of Germany, which has its source in the forest of Thuringia, 16 m. N of Coburg, at an alt. of 2,179 ft. above sea-level; flows WSW, and then NNW, traversing most of the principalities of the house of Saxe, and part of the electorate of Hesse; at Allendorf it becomes navigable for small boats; and at Münden, after a course of 140 m., joins the Fulda, after which the united stream takes the name of the Weser. Its chief affluents are the Nessa and the Ulster.

WERRAGEBIRGE, a name sometimes given to the northern portion of the Rhangebirge, in Kur-Hesse, the highest point of which is the Meisser, 2,184 ft. above sea-level.

WERRAY, a river of Cardiganshire, which runs into the Irish channel, near Arth, about 7 m. S of Aberystwith.

WERRE, a small river of Germany, which rises in Lippe-Detmold; flows NW and WNW; and falls into the Weser, on the l. bank, after a course of 40 m. The Bega and the Else are its chief affluents.

WERRIBI, a river of S. Australia, which flows

into Port Phillip, 16 m. SW of Melbourne, after a SE course of 60 m.

WERRINGTON, a parish of Devonshire, 2 m. N of Launceston. Area 5,000 acres. Pop. in 1831, 661; in 1851, 657.—Also a chapelry in Northamptonshire, 3½ m. NW of Peterborough. Pop. 669.

WERRUFELD (GROSS and KLEIN), two villages of Bavaria, in Lower Franconia. United pop. 720.

WERSE, a small river of Prussian Westphalia, in the principality of Munster, which falls into the Ems near Telligt.

WERSMENINGKEN, a village of Prussia, in the reg. of Gambinnen, circle of Tilsit. Pop. 420.—Also a v. in the same reg., circle of Pillkallen. Pop. 540.

WERSTADT, a town of Hesse-Darmstadt, district of the Rhine. It is neatly built. Pop. 1,200.

WERTACH, a river of Bavaria, which rises on the frontiers of Tyrol; flows NNW; and falls into the Lech below Augsburg.

WERTH, a village of Prussia, in the reg. of Munster, circle of Borken, on the Yssel. Pop. 575.—Also a village in the reg. and circle of Coblenz. Pop. 728.—Also a town in the reg. of Dusseldorf, circle of Elberfeld. Pop. 2,020.—Also a lake of Carinthia, in the circle of Klagenfurt.

WERTHEIM, a town of Baden, the capital of the circle of the Maine and Tauber, and of the county of the same name, situated in a narrow valley at the confluence of the Maine and the Tauber, 20 m. W of Wurzburg. Pop. 4,900. It is surrounded with a wall, and is divided into four quarters. The ancient residence of the counts of Wertheim, situated on a hill outside the town, is now in a decayed state; but the counts have two modern buildings for their residence.

WERTHER, a town of Prussian Westphalia, 5 m. NNW of Bielefeld. Pop. 1,901.

WERTINGEN, a town of Bavaria, on the Zueren, 14 m. NNW of Ulm. Pop. 1,500.

WERVICK, a canton and town of Belgium, in the prov. of W. Flanders, 8 m. SE of Ypres, on the Lys. Pop. 5,700. It is a place of considerable trade, and has manufactories of starch, leather, ropes, and oil.

WESCHNITZ, a small river of Germany, which rises in the Odenwald; passes Weinheim; and falls into the Rhine near Stein.

WESSEL, or **LOWER WESSEL**, a town of Prussia, in the duchy of Cleves, at the confluence of the Lippe and the Rhine, 28 m. ESE of Cleves, in N lat. 51° 39'. It is a place of old date, having formerly belonged to the Hanseatic confederacy; but in consequence of wars and other calamities, its population was reduced in 1740 to 5,700; and in 1770 it did not exceed 4,500; in 1849 it amounted to 16,328. Its manufactures are considerable, particularly those of woollens, hosiery, and spirituous liquors. It is strongly fortified, and has a good citadel.

WESSEL (ONER), a town of Rhenish Prussia, in the gov. and 22 m. SE of Coblenz, on the l. bank of the Rhine. Pop. in 1852, 3,686.

WESELA, a village of Bohemia, in the reg. of Budweis, 52 m. S by E of Prague. Pop. 470.

WESSELBERG, a village of Bavaria, in the Pfalz, canton of Waldsteebach. Pop. 350.

WESLERWALD, a village of Prussia, in the reg. of Dusseldorf, circle of Rees. Pop. 240.

WESLICHE, a town of Bohemia, in the reg. of Budweis, district of Muhlhausen. Pop. 1,460.

WESLEY, a town of Moravia, on an island in the March, 40 m. S of Olmutz. Pop. 2,530.—Also a town of Bohemia, in the reg. of Budweis, at the confluence of the Luscheritz and the Nescharka, in N lat. 49° 11' 3". Pop. 1,800.

WESEN, a town of Switzerland, in the cant. of St. Gall, at the W extremity of the lake of Wallenstadt, 7 m. S of Uznach. Pop. 642. The inhabitants are employed partly in fishing, partly in the transit-trade over the lake to Zurich. The town has of late received injury from the inundations of the lake.

WESENBERG, a village of Mecklenburg-Strelitz, circle of Stargard, bail. of Alt-Strelitz, on the Havre. Pop. 1,310.—Also a village of Holstein, in the bail. of Reinfeld, on the Trave. Pop. 254.

WESENCARL, a village of Belgium, in the prov. of S. Brabant, near Lowen. Pop. 1,100.

WESENITZ, a small river of Saxony, which falls into the Elbe near Pirna.

WESENSTEDT, a village of Hanover, in the prov. of Oberhova, bail. of Ehrenburg. Pop. 400.

WESENSTEIN, a village of Saxony, on the Elbe, 8 m. SSE of Dresden.

WESER, one of the principal rivers of Germany, in Hanover, formed by the junction of the Werra and the Fulda, at Munden. From the point of confluence, it flows in a NW and WNW course through the territories of Hanover, Brunswick, Prussia, Bremen, and Oldenburg; and reaches the German ocean, by an estuary 24 m. wide, between the last mentioned principality and the prov. of Bremen, after a course of 280 m. Ships go up the stream as far as Vegesack, and boats navigate its whole course. At Munden it has a breadth of 300 ft.; at Minden, of 420 ft.; at Bremen, of 700 ft.; and at Vegesack, of 2,000 ft. Its affluents on the l. are the Diemel, the Werra, the Bastan, the Aue, the Ochte, and the Hunte; and on the r. the Aller, Wumme, Dreyte, Lühne, Geeste, and Lessum. This river flows through a rich and fertile region, with a dense pop.; but the bordering states have so greatly neglected the navigation, that it is, says a correspondent of the *Daily News*, "no longer navigable for the larger descriptions of inland vessels, and scarcely even for small ones; for the sand and detritus of rocks washed down from the mountains have been allowed to accumulate so shamefully in the more level part of the country, where, of course, the current is not so strong as in the mountainous regions, that barges and steamers drawing only 18 inches of water are frequently unable to navigate the W., particularly in the summer. It is only below Bremen that the river becomes really important: above that city it is nowhere wider than the Isis at Oxford, and the navigation is so impeded by low bridges, and locks and weirs, to say nothing of the fiscal regulations and duties, that the only wonder is that commercial people should think it worth while at all to use it as a highway of communication for the transit of merchandise. These fiscal enactments are enforced by virtue of the convention of the 10th September, 1823, entered into between the seven states bordering on the W., together with the supplementary treaties of 1825 and 1839. But the stipulations of these conventions have exclusive reference to the amount of toll which each state is empowered to levy on the unfortunate skippers, and not at all to the general regulations affecting the navigation of the river. The consequence is that each state acts with such sovereign independence of the rest, that between Hanoverian Münden and Bremerhafen the navigation is subject to no less than 35 different codes of regulations. The inhabitants of Bremen have found out that, for the modern requirements of commerce, they are located some 50 m. too far from the sea, as the river will not admit of vessels drawing more than 10 or 12 ft. water going up to the town. Fortunately for them they some years ago induced the Hanoverian

government—when Hanover was united to the British Crown—to cede to them a few hundred acres of marsh land near the mouth of the Weser, where they have founded a port and town called Bremerhafen, and made extensive docks and other works, capable of affording ample accommodation to the largest ships, and where the greater part of the Bremen trade is carried on."

WESERAM, a village of Prussia, in the reg. of Potsdam, circle of Westhausland. Pop. 300.

WESERITZ, a village of Bohemia, in the reg. of Eger, district of Plau. Pop. 960.

WESLEY, a township of Washington co., Maine, U. S., 169 m. E of Augusta.—Also a village of Washington co., Ohio, 94 m. ESE of Columbus.

WESSELHUREN, a town of Holstein, in North Ditmarschen, to the W of Herde. Pop. 1,300.

WESSEL'S ISLANDS, a chain of islands which extend from the NW entrance of the gulf of Carpentaria, in a NE direction about 50 m. The N extremity of the chain is in S lat. 10° 59', E long. 176° 45'.

WESSEM, a town of Dutch Limburg, on the Maese, 22 m. N by E of Maestricht. Pop. 2,500.

WESSINGTON, or WASHINGTON, a township in the p. of Crick, in Derbyshire, 3½ m. NW by W of Alfreton. Area 958 acres. Pop. in 1851, 575.

WEST, a township of Huntingdon co., in Pennsylvania, U. S., 8 m. N of Huntingdon. Pop. 1,629.—Also a township of Columbiana co., in Ohio. Pop. 1,915.—Also a river of Maryland, which flows, by a large estuary, into Chesapeake bay, in the S part of Anne-Arundel co.

WEST (CAPE), a headland of New Zealand, in S lat. 45° 54', E long. 166° 32'.

WEST-ACRE, a parish in Norfolk, 5½ m. NW by N of Swaffham. Area 3,400 acres. Pop. 475.

WESTALL (POINT), a headland of South Australia, in S lat. 32° 52', E long. 133° 59'.

WEST-ALMOND, a township of Alleghany co., in New York, U. S., 6 m. E of Angelica. Pop. 976.

WEST-ALTON, a village of Belknap co., in New Hampshire, U. S., 28 m. NE of Concord.

WEST BEND, a township and village of Washington co., in Wisconsin, U. S., 68 m. ENE of Madison. Pop. 672.

WESTBERE, a parish in Kent, 3½ m. NE by E of Canterbury. Area 1,185 acres. Pop. 197.

WEST BÉRGEN, a village of Genesee co., in New York, U. S., 22 m. from Rochester.

WEST BETHEL, a village of Oxford co., in Maine, U. S., 54 m. W of Augusta.

WEST BLOOMFIELD, a village of Ontario co., in New York, U. S., 198 m. W of Albany. Pop. 1,698.—Also a v. of Essex co., in New Jersey, 48 m. NE of Trenton.

WESTBORO', a village of Worcester co., in Massachusetts, U. S., 28 m. W by S of Boston. Pop. 2,376.

WESTBOROUGH, a parish in Lincolnshire, 8 m. NW of Grantham. Area 890 acres. Pop. 236.

WESTBOURNE. See BOURNE (WEST).

WEST BOYLSTON, a village of Worcester co., in Massachusetts, U. S., 36 m. W of Boston. Pop. 1,749.

WESTBROMWICH. See BROMWICH (WEST).

WEST BROOK, a village of Middlesex co., in Connecticut, U. S., 36 m. S by E of Hartford. Pop. 1,298.

WEST BROOKFIELD, a village of Worcester co., in Massachusetts, U. S., 57 m. W by S of Boston. Pop. 1,344.

WESTBURTHHAUSEN, a village of Prussia, in the regency of Minden, circle of Halle. Pop. 321.

WESTBURY, a parish in Bucks. Area 2,547

acres. Pop. in 1831, 391; in 1851, 458.—Also a parish in Salop, 3½ m. W by S of Shrewsbury, containing the chapelry of Minsterley, and the township of W. Area, 11,274 acres. Pop. in 1831, 2,228; in 1851, 2,485.—Also a parish in Somersetshire, on the river Ax, which separates it from Wedmore, 4 m. NW by W of Wells. Area 2,968 acres. Pop. in 1831, 681; in 1851, 625.—Also a hamlet joined to that of Peake, in the p. of East Meon, Hants, 6½ m. W of Petersfield.—Also a borough and parish in Wiltshire, comprising the chapelries of Bratton and Dilton, and the townships of Leigh, Hawkeridge, and Haywood. Area 11,901 acres. Pop. of the p. in 1821, 6,846; in 1831, 7,324; in 1851, 7,029.—The town, which lies in the centre of the parish, consists of three streets irregularly built, and is 34 m. NW by W of Salisbury. Broad cloths and kerseymeres are manufactured here to a considerable extent. The whole p. is included in the borough for parliamentary purposes. Pop. of the borough in 1801, 1,837; in 1831, 2,495; in 1851, 7,029. Electors in 1852, 314.

WESTBURY-ON-SEVERN, a parish in Gloucestershire, 3 m. NE of Newnham. Area 8,695 acres. Pop. in 1831, 2,032; in 1851, 2,498.

WESTBURY-ON-TRIM, a parish in Gloucestershire, 8 m. NW of Bristol, containing the chapelry of Shirehampton, and the tithing of Bishop's-Stoke. Area 5,456 acres. Pop. in 1831, 4,263; in 1851, 6,728.

WESTBY-WITH-PLUMPTONS, a joint township in the p. of Kirkham, co.-palatine of Lancaster. Area 3,426 acres. Pop. in 1851, 707.

WEST CALDER. See CALDER (WEST).

WEST CAMBRIDGE, a village of Middlesex co., in Massachusetts, U. S., 6 m. NW of Boston. Pop. in 1840, 1,363; in 1850, 2,202.

WEST CANADA CREEK, a river of New York, U. S., which flows by a SW and S course into the Mohawk, 1 m. below Herkimer, forming Trenton falls, 20 m. above its mouth.

WESTCAPPELLE, a village of Belgium, in W. Flanders, 8 m. NE of Bruges.

WEST CHESTER, a county in the SE of New York, U. S., containing 470 sq. m. Pop. in 1840, 48,686; in 1850, 58,263. Its cap. is Bedford.—Also a township and v. in the same co., 123 m. SW of Albany. Pop. in 1850, 2,492.—Also the cap. of Chester co., in Pennsylvania, 70 m. E by S of Harrisburg. Pop. 2,500.

WEST-CLIFFE, a parish in Kent, 3 m. NE of Dover. Area 1,194 acres. Pop. in 1851, 129.

WEST CONCORD, a village of New Hampshire, U. S., 3 m. WNW of Concord.—Also a v. of Essex co., in Vermont.

WEST CORNWALL, a village of Litchfield co., in Connecticut, U. S., 36 m. W by N of Hartford.

WESTCOTE, a parish in Gloucestershire, 4 m. SE by S of Stow-on-the-Wold. Area 1,503 acres. Pop. in 1831, 188; in 1851, 242.—Also a hamlet in the p. of Waddesdon, Bucks, 7 m. WNW of Aylesbury. Pop. 273.

WESTCOVE, a hamlet in the p. of Dunkerrin, co. Kerry, on the N side of the Kenmare estuary, 7 m. SW of Sneem.

WEST DEDHAM, a village of Norfolk co., in Massachusetts, U. S., 12 m. SW of Boston.

WESTERAA, or VESTERAS, a laen of Sweden, bounded on the N by Fahlun and Gefle; on the E by Upsala; on the S by the Mälär lake; and on the W by the laen of Oerebro. It has an area of 2,000 geog. sq. m. Pop. in 1833, 91,800; in 1845, 94,850.—The cap. of the same name, is situated on the N side of Lake Mälär, in N lat. 59° 37', 54 m. NW of Stockholm. Pop. 3,800. It has a trade in timber and iron.

WESTERBECK, a village of Prussia, in the regency of Munster, circle of Warendorf. Pop. 380.

WESTERBOKUM, a village of Oldenburg, in the circle and bail of Vechta. Pop. 260.

WESTERBOTTEN. See UMEA.

WESTERBURG, a town of Nassau, in the bail of Rennerode. Pop. 1,538.

WESTERBUTTEL, a village of Holstein, in South Dithmarsch, bail of Meldorf. Pop. 350.

WESTERDALE, a parish in the N. R. of Yorkshire, $7\frac{1}{2}$ m. SE of Guisborough. Area 15,930 acres. Pop. in 1831, 281; in 1851, 286.

WESTERFELDE, a village of Bavaria, in the regency of Arnsberg, circle of Dortmund. Pop. 200.

WESTERFIELD, a parish in Suffolk, $2\frac{1}{2}$ m. NNE of Ipswich. Area 1,071 acres. Pop. in 1851, 324.

WESTERHAM, a parish and market-town in Kent, 22 m. W of Maidstone. Area of p. 5,676 acres. Pop. in 1831, 1,985; in 1851, 2,113. The town is situated on a gentle declivity, on both sides of the river Darent, which rises in the vicinity.

WESTERHAUSEN, a town of Prussia, in the regency of Magdeburg, circle of Aschersleben. Pop. 1,645.

WESTERHOFEN, a village of Württemberg, in the Jaxt circle, bail of Ellwangen. Pop. 370.

WESTERHUSEN, a village of Prussia, in the regency of Magdeburg, circle of Wanzleben, on the Elbe. Pop. 710.

WESTERKIRK, a parish of Eskdale, in Dumfriesshire. Area 27,307 acres. Pop. in 1851, 658.

WESTERLEIGH, a parish in Gloucestershire, 8 m. SW of Chipping-Sodbury. Area 4,009 acres. Pop. in 1831, 1,709; in 1851, 1,679. There is a railway 9 m. in length between the floating-dock in Bristol, and Coal-pit-heath in this parish.

WESTERLOO, a township and village of Albany co., in New York, U. S., 17 m. SW of Albany. Pop. 2,860.

WESTERLY, a township and village of Washington co., in Rhode island, 26 m. W by S of Newport. Pop. in 1850, 2,766.

WESTERN AUSTRALIA. See AUSTRALIA.

WESTERN PORT, a natural harbour of South Australia, 35 m. SE of Melbourne, 12 m. SE of Port-Phillip. It is about 20 m. in length, and 5 m. in width at its mouth.

WESTERNPORT, a village of Alleghany co., in Maryland, U. S., on the N side of the Potomac, 135 m. W by N of Annapolis.

WEST FAIRFIELD, a village of Westmoreland co., in Pennsylvania, 115 m. W of Harrisburg. There are iron-works here.

WESTFIELD, a parish of Norfolk, 8 m. S of Dereham. Area 569 acres. Pop. in 1831, 127; in 1851, 143.—Also a parish in Sussex, $4\frac{1}{2}$ m. E by S of Battle. Area 4,272 acres. Pop. in 1851, 900.

WESTFIELD, a township and village of Hampden co., in Massachusetts, 74 m. W by S of Boston. Pop. in 1840, 3,526; in 1850, 4,186.—Also a township of Essex co., in New Jersey, 36 m. NE of Trenton. Pop. 1,575.—Also a township of Chautauque co., in New York, 57 m. from Buffalo, by railway. Pop. 3,100.—Also a township and village of Monroe co., in Ohio, 31 m. N of Columbus. Pop. 1,414.—Also a township of Tioga co., in Pennsylvania, 117 m. W by N of Harrisburg. Pop. 1,000.—Also a township of Orleans co., in Vermont, 41 m. N of Montpelier. Pop. 502.

WEST FINLEY, a township of Washington co., in Pennsylvania, U. S., on Wheeling creek. Pop. 1,200.

WESTFORD, a township and village of Middlesex co., in Massachusetts, U. S., 23 m. NW of Boston. Pop. 1,473.—Also a township of Otsego co.,

in New York, 53 m. W of Albany. Pop. 1,428.—Also a township of Chittenden co., in Vermont, 81 m. NW of Montpelier. Pop. 1,458.

WEST GREENVILLE, a village of Mercer co., in Pennsylvania, U. S., 190 m. NW of Harrisburg.

WEST GREENWICH, a township and v. of Kent co., in Rhode island, U. S., 23 m. NW of Newport. Pop. 1,350.

WESTHALL, a parish in Suffolk, 4 m. NE of Halesworth. Area, 2,316 acres. Pop. in 1851, 496.

WESTHAM, a parish in Sussex, $5\frac{1}{2}$ m. SE of Hailsham. Area 4,718 acres. Pop. in 1851, 761.

WESTHAMPNETT. See HAMPNETT (West).

WESTHARTREE. See HARTREE (West).

WEST HARTFORD, a township and village of Windsor co., in Vermont, U. S., 41 m. S by E of Montpelier.

WEST HAVEN, a township and v. of Rutland co., in Vermont, U. S., 58 m. SW of Montpelier. Pop. 718.

WESTHEIM, a village of Württemberg, in the Jaxt circle. Pop. 459.—Also a village of Bavaria, in Middle Franconia, bail of Heidelberg. Pop. 524.

WEST HOBOKEN, a village of Hudson co., in New Jersey, U. S., $3\frac{1}{2}$ m. NW of New York.

WEST HOFEN, a town of Hesse-Darmstadt, 20 m. S of Mainz, on the Seebach. Pop. 1,850.—Also a town of France, in the dep. of Bas-Rhin, 5 m. W of Strasburg. Pop. 2,500.

WESTHORPE, a parish in Suffolk, 7 m. N of Stow-Market. Area 1,322 acres. Pop. 240.

WEST INDIES. See INDIES (West).

WESTINGTON, a hamlet of Chipping-Camden p., in Warwickshire. Pop., with Combe, 146.

WEST JAMES, a township and village of Westchester co., in New York, U. S., 126 m. S of Albany. Pop. 4,436.

WESTKAPELLE, a town of Holland, in the prov. of Sieland, 7 m. NW of Middleburg. Pop. 1,820.

WESTLEIGH. See LEIGH (West).

WESTLETON, a parish in Suffolk, $2\frac{1}{2}$ m. E of Yoxford. Area 6,103 acres. Pop. in 1851, 993.

WESTLEY, a parish in Suffolk, 2 m. W by N of Bury-St.-Edmunds. Area 1,216 acres. Pop. 575.

WESTLEY - WATERLESS, a parish in Cambridgeshire, 5 m. SW of Newmarket. Area 1,102 acres. Pop. in 1831, 158; in 1851, 214.

WEST LINTON, or LEVINGTON, a township in the p. of Kirk-Linton, Cumberland, 4 m. SE of Longtown. Pop. in 1831, 629; in 1851, 575.

WESTMALLE, a commune and village of Belgium, in the prov. and 12 m. NE of Antwerp. Pop. 1,000.

WESTMANN, or WESTMANNA ISLANDS, a group of islets off the coast of Iceland, in N lat. $63^{\circ} 20'$, W long. $20^{\circ} 30'$. They are 14 in number, but only 4 of them produce any vegetation or pasture, and of these only one, called Heimæy or Home island, is inhabited. It is 15 m. from the coast, and has a harbour partly encircled by a high perpendicular rock. A precipitous path leads to the top of the island, where the people, with their habitations, a few sheds, and their little church, remain 2,000 ft. above the ocean. The islands are basaltic, like Fingal's cave and the Giant's causeway; but instead of being 100 or 200 ft. in height, rise like immense columns, nearly a $\frac{1}{2}$ m. above the sea. The inhabitants draw their entire subsistence from the ocean and the cliffs, catching codfish and killing sea-birds, myriads of which haunt the rocks of their sea-girt shores. The sea-fowls furnish them feathers; some sorts are used for food, and some for fuel. They split them open, dry them, and then burn them, feathers and all. These islands, called

in Icelandic *VESTMANNEYJAR*, were settled by a colony of Irish in 875. A Norwegian pirate cruising in the Atlantic came upon the coast of Ireland, landed, and captured 40 or 50 persons, men, women, and children, whom he carried off as slaves. Before he got home they rose on their captors, slew them, and went ashore on the first land they met. This was the largest of the Westmann islands, and that name was given them by the Icelanders as these people came from the West.

WESTMEATH, an inland county in the W part of the Irish province of Leinster; bounded on the NW by co. Longford; on the N by co. Cavan; on the NE and E by co. Meath; on the S by King's co.; and on the W by co. Roscommon. The greatest length of the co., in a line drawn SW, is 33 m.; its greatest breadth, SE, is 16½ m. Its area comprises 365,218 acres of arable land, 56,392 of uncultivated land, 8,803 of continuous woods, 628 of towns, and 22,427 of water,—in all, 453,468 acres. W. was pronounced by Wakefield the most beautiful co. in Ireland next to Kerry, Fermanagh, Wicklow, and Waterford. Its surface may, in a general view, be characterized as a luxuriant plain, diversified with swells, gravelly ridges, and a few considerable hills,—sombrely patched, in various large districts, particularly in the south and east, with bog,—and largely and beautifully gemmed in the N, on the W, and S through the centre, with handsome and expressive lakes. Mountains do not exist; and hills are, for the most part, mutually isolated, and considerably apart. The basis elevation above sea-level varies from 125 ft. in the W, to about 328 ft. in the centre, and probably averages about 265 ft.—The principal lakes are Lough Ree, on the W boundary; Lough Glen or Deerin, on the NW; Loughs Sheelin and Kinnail on the N; and Loughs Deravaragh, Ennel, Owheh, Lane, and Iron, in the interior. The river Inny, one of the chief tributaries of the Shannon, traverses the NW district; several tiny affluents of the Shannon, drain the remainder of the W. The Brosna, another chief tributary of the Shannon, rises in the interior, and drains a large proportion of the centre and all the S into King's co.; and the rivulets Stonyford and Deel drain the E district into Meath toward a confluence with the Boyne. The eastern district of the county thus belongs to the basin of the Boyne; and all the other districts belong to the basin of the Shannon.

Soil and agriculture.] This co. presents much less variety of surface-rock than any other co. of Ireland, and, at the same time, excels every other in the aggregate wealth of the prevailing substrata of its soils. Mr. Wakefield, who wrote in 1812, and distributed all Ireland as to its agricultural condition into nine districts, classified W. with Meath, Louth, Dublin, Kildare, and Kilkenny. Considerable improvements have been effected in the practices of husbandry since Mr. Wakefield wrote; but the agricultural condition of the co. is still much inferior to that of the best districts of England and Scotland, and unworthy of the opulent character of the soil. In 1841, there were within the rural districts of the co., 4,266 farms of from 1 acre to 5 acres, 4,076 of from 5 to 15 acres, 1,648 of from 15 to 30 acres, and 1,385 of upwards of 30 acres. The black cattle of W. are among the best in Ireland, and are held in high repute. The horses are, in general, of very superior breeds. The sheep include some excellent specimens of the long-woolled breed. The estimated value of live stock in the rural districts in 1841 was £505,105.

Population, &c.] Pop., in 1831, 136,872; in 1841, 141,300. Inhabited houses, 24,002. First-class inhabited houses, 529; second-class, 4,796; third-

class, 10,841. Families employed chiefly in agriculture, 18,090; in manufactures and trade, 4,860; in other pursuits, 2,743. Families dependent chiefly on property and professions, 804. Males who could neither read nor write, 28,000; females who could neither read nor write, 36,938. Pop. in 1851, 111,409. The towns and principal villages are Moate, in Clonlunan barony; part of Athlone, in Brawney barony; Glasheen and Auburn, in Kilkenny-West; Ballymore, Rathconrath, and Moyvare, in Rathconrath; Ballinacarrig and Rathowen, in Moygoish; Finea, Castle-Pollard, Coole, and Fore, in Demifore; Ballinalack and Multifarnham, in Corkaree; Castletown, Kilbeggan, Ballinagore, and Killavally, in Moycashel; Tyrrel's-Pass, Rochfort Bridge, and Milltown, in Fartullagh; Mullingar, in Moyasheh and Magheradermon; Castletown-Delvin, Clonmellon, and Drumcree, in Delvin; and Kinnegad, Killucan, Raharney, and Rathwire, in Farhill.—In the ecclesiastical divisions, W. lies partly in the diocese of Ardagh, but chiefly in that of Meath. The head-quarters of the constabulary are at Mullingar. The assizes are held at Mullingar, and quarter sessions at Mullingar and Moate.—The county sent 10 members to the Irish parliament, or two from the county at large, and two from each of the boroughs of Athlone, Mullingar, Kilbeggan, and Fore; and though it continues to send 2 members to the imperial parliament from the county at large, it now contains no parl. borough except part of Athlone. County constituency in 1841, 1,125; in 1851, 3,132.

History.] Westmeath afforded one of the earliest settlements to the Anglo-Normans in the 12th cent., and constituted a portion of the palatinate of Hugh de Lacy. The O'Meaghlinas were ancient sovereigns of the kingdom of Meath, which territory comprised the district comprising in modern times East and West Meath, with part of the King's co. and co. Dublin. The Anglo-Norman settlers uniformly derived under Hugh de Lacy, lord and earl of Meath, who partitioned his prov. amongst his relations and followers, many of whose descendants remain in high consideration at the present time.—W. gives the title of Marquis, in the peerage of Ireland, to the family of Nugent.

WEST-MESTON, a parish in Sussex, 7 m. NW of Lewes. Area 4,074 acres. Pop., exclusive of that of the chapelry of East-Chiltington, in 1801, 205; in 1831, 236; in 1851, 617.

WEST MILFORD, a township and village of Passaic co., in New Jersey, U. S., 60 m. NE of Trenton. Pop. 2,624.

WESTMILL, a parish in Hertfordshire, 1½ m. S by E of Buntingford. Area 2,137 acres. Pop. 380.

WESTMINSTER. See London.

WESTMINSTER, the capital of Carroll co., in Maryland, U. S., 47 m. NW of Annapolis. Pop. 635.—Also a township and village of Worcester co., in Massachusetts, 45 m. W by N of Boston. Pop. 1,916.—Also a village of Windham co., in Vermont, 84 m. S by E of Montpelier. Pop. 1,721.

WEST MONROE, a township of Oswego co., in New York, U. S., 140 m. NW of Albany. Pop. 1,197.

WESTMORE, a township of Orleans co., in Vermont, U. S. Pop. 130.

WESTMORELAND, an inland county in the north of England; bounded on the N by Cumberland; on the NE by Durham; on the E and SE by Yorkshire; on the S and SW by Lancashire; and on the W by Cumberland. It extends from 54° 11' to 54° 42' N lat., and from 2° 20' to 3° 12' W long.; and contains 763 sq. m., or 488,320 square acres, of which 40,000 acres are computed to be in tillage, and 140,000 in pasturage. It is divided into the two baronies of Kendal and Westmoreland; that of Kendal being divided into the wards of Kendal and Lonsdale; and that of Westmoreland, which is occasionally called the barony of Appleby, or 'the Bottom' of Westmoreland, into the East and the West

ward. It contains 32 parishes, one parliamentary borough, Kendal; and 8 market-towns, Appleby, Ambleside, Brough, Burton, Kendal, Kirkby-Lonsdale, Kirkby-Stephen, and Orton.—The pop. in 1801, was 41,617; in 1831, 55,041; in 1841, 56,469; in 1851, 58,287.

Climate, Soil, &c.] The climate of this co. is exceedingly humid, owing to its contiguity to the western ocean, from which the winds blow during two-thirds of the year, carrying along with them exhalations which fall in rain on the mountains. On an average of five years the quantity of rain which fell amounted to 64 ins. The air, however, is remarkably pure and healthy, though, in the mountainous districts, it is cold and piercing. The general aspect of the county is marked with immense tracts of mountains,—beautiful but contracted valleys,—extensive lakes,—and large rocky districts presenting high, steep, and projecting crags on every side. Farm-houses, and small villages covered with blue slate, and whitened with lime-wash, are scattered about the base of the hills, and their small irregular fields spreading up the sides of the mountains, are almost always divided by stone walls,—a circumstance which gives the country a naked appearance. Several low heathy commons are seen towards the E side of the county; the W is characterized by high rugged prominences, and large tracts of low flat peat-moss. The occurrence of numerous trees in the mooses proves that W. was originally a wooded district; and several extensive tracts, especially on the NE boundary, still retain the name of forests. Wood, however, at present exists chiefly in plantations, and in detached groves round the country-seats and farm-houses. In some districts, considerable portions of land are covered with coppice which chiefly consist of oak, alder, ash, birch, and hazel. These underwoods are cut down usually every 16th year, and are either converted into hoops or into charcoal for the iron furnaces in the vicinity.—Helvellyn, a mountain rising, according to the Ordnance survey, to the height of 3,055 ft., is more particularly noted as a Cumberland height. Carterfell, High-street, and Kidsey-pike, are stupendous heights, within a few miles of the southern end of Haws-water. Langdale-pikes, in the W corner of the county, are conical hills of great height, with pyramidal rocky tops. The chain on the E, which is continued N and S through the adjoining counties, is regular, with mossy and heathy tops, except two or three conical green hills opposite Appleby. In other districts the hills are partly heathy, but more generally green, dry, and rocky. The soils of this co. are in general dry and gravelly: in some parts, particularly in the E and N, sand and hazel mould appear. The soil that rests on limestone is esteemed the most profitable.

Rivers.] The principal rivers are the Eden, Eamont, Lowther, Lune, and Kent. The Eden rises in one of the hills at the top of Mallerstang, near the SE extremity of the county; and runs at first in a NE direction, passing Kirkby-Stephen; it then turns NW, in which direction it proceeds by Appleby, to Brougham, where it enters Cumberland.—The Eamont takes its rise in Ulleswater lake, and flows in a NE direction along the Cumberland border to the Eden, into which it falls at the point where the co. is quitted by that river.—The Lowther rises at the foot of the Shap-fells in the middle of the co., and flowing at first NE, and gradually afterwards due N, joins the Eamont at a point about 2 m. SE of Penrith.—The Lune rises in Ravenstone-dale; flows for a few miles towards the N, and then turning suddenly towards the W reaches Tebay, where it again turns, and enters Lan-

cashire near Kirkby-Lonsdale.—The Kent rises on the S side of High-street, and proceeds in a direction gradually becoming SE to the town of Kirkby-Kendal, whence it flows nearly due S to the spacious bay of Morecambe. No portion of the Kent is navigable until it enters the sands of Morecambe bay. Besides those already noticed, there are numerous minor streams, such as the Brathay and the Rothay, which fall into Windermere near its head, and the Troutbeck, which falls into the same lake near Cullgarth.—The principal lakes are Windermere, situated partly in Lancashire; Ulleswater, extending a little into Cumberland; Haws-water, between Ulleswater and Shap; and Grasmere, a few miles north of Ambleside. There are various smaller lakes, the principal of which are Rydal-water, below Grasmere; Elter-water, 2 m. W of Ambleside; Broadwater, at the head of Patterdale; Kentmere-tarn, in Kentmere dale; Skeggles-water, about 3 m. NE of Kentmere tarn; Sunbiggin tarn, near Orton; and Whinfell tarn, near Kendal.—The only line of inland navigation in this co. is the Lancaster and Kendal canal, which enters the co. from Lancaster, near Burton-in-Kendal, and runs N to Kirkby-Kendal. A ship canal was projected by the Port-Fleetwood company, to run from Bardsea, through Ulverstone to the foot of Windermere lake, at Newby-bridge, so as to permit steamers to ply direct from Fleetwood to Ambleside Waterhead, and thus open up a new route to the lakes of Westmoreland and Cumberland, with the aid of a good road over the steep ascent of Kirkstone to Patterdale. The road from London to Glasgow and Edinburgh, by Carlisle, enters the co. from Yorkshire, a little to the SE of Brough, passes through that town and Appleby, and leaves the county near Penrith. The London road to Carlisle, through Lancashire, enters at Burton-in-Kendal, and runs N by Milnthorpe, Kendal, Shap, and Clifton into Cumberland, by Penrith. A railway runs from Lancaster, by Penrith to Carlisle; and a branch railway connects Kendal and Windermere with this line.

Agriculture.] Turnip and clover husbandry have made some progress in this co., and considerable quantities of wheat are now annually grown, though oats are principally cultivated. Fold-yard dung, and peat-ashes, are almost the only manures; for though the limestone of the county is inexhaustible, the want of coal for burning it prevents the general use of this manure. The farms are in general small, and the rents are chiefly made up by the sale of cattle, sheep, wool, butter, eggs, and hams. The wool is used in the manufactures of Kendal, and of Bradford in Yorkshire; part of it is wrought into knitted stockings about Kirkby-Stephen, Orton, and Ravenstonedale. The cattle bred in this county are long-horned, much resembling the Lancashire breed; and, when kept to a proper age, they grow to a great size. The breed of sheep on the mountains and commons is either native or a cross with Scottish rams. They are horned, dark or grey-faced, and thickly pitted with coarse, strong, hairy wool. Geese are bred on the mountains in great numbers, and afford an article of exportation. Grouse and other game are also abundant on the mountains. Veins of metallic ore, chiefly copper and lead, have been occasionally discovered; and some attempts have been made to work them, but many of these lie so deep, or are so minutely situated, that not having in general paid the expense, the greater part have been abandoned. The strata of coal in this co. are too compact in their nature to afford much prospect of a large supply of pit-coal being raised, and, in general the quality is inferior. The mountainous parts abound

with various sorts of slate, the best of which are either carried by sea to London, Liverpool, Lynne, or Hull, or by land, into the adjoining counties of Durham, Cumberland, Lancaster, and Northumberland. The general colour of the slate is blue, varying in tint from a pale to a very deep blue.

Commerce and manufactures.] W. can scarcely be said to be either a commercial or a manufacturing county. Its manufactures are principally confined to Kendal and its vicinity, and mainly consist of a kind of coarse woollen cloth, and worsted stockings. See article KENDAL. The exports of the co. are principally cloths and other articles of home-manufacture, with numbers of cattle, sheep, geese, gunpowder, hoops, charcoal, and hams.

Franchise, &c.] Previous to the passing of the reform act, 2 members were returned for the shire, and 2 for Appleby. Under the reform act Appleby has been disfranchised, and Kendal returns one member. The county still returns 2 members, who are polled for at Appleby, Kirkby-Stephen, Shap, Ambleside, Kendal, and Kirkby-Lonsdale. The number of electors registered for the county in 1837 was 4,683; in 1852, 4,062. W. is included in the northern circuit. The assizes are held at Appleby. The barony of Westmoreland, constituting the deanery of Westmoreland, is in the dio. of Carlisle; that of Kendal, which is divided into the two deaneries of Kendal and Kirkby-Lonsdale, is in the dio. of Chester.—Prior to the arrival of the Romans, this county was occupied by the tribes of the Brigantes, the eastern parts being possessed by the *Voluntii*, and the western by the *Sixuntii*. During the Roman government, it was included in their province of *Maxima Caesariensis*, which reached from the Humber to the Tyne. When Alfred made the division of his kingdom into counties, this co., with those of Northumberland and Cumberland, were not mentioned, and are therefore supposed to have then belonged to the Scots.

WESTMORELAND, a county in the SW of Pennsylvania, U. S. Area 989 sq. m. Pop. in 1840, 42,699; in 1850, 51,726. Its cap. is Greensburg.—Also a co. in the NE of Virginia. Area 162 sq. m. Pop. in 1840, 8,019; in 1850, 8,080. Its cap., of the same name, is 50 m. NE of Richmond.—Also a township of Cheshire co., in New Hampshire, 45 m. SW of Concord. Pop. 1,677.—Also a township of Oneida co., in New York, 98 m. NW of Albany. Pop. 3,291.

WESTOE, a township and chapelry in the p. of Jarrow, co.-palatine of Durham, forming a populous suburb to South Shields. Pop. in 1841, 13,990; in 1851, 19,349.

WESTON, a township in the p. of Runcorn, co.-palatine of Chester, 2 m. NNW of Frodsham. Area 1,282 acres. Pop. in 1831, 532; in 1851, 933.—Also a chapelry and township in the p. of Wybunbury, co.-palatine of Chester, 6 m. E by N of Nantwich, near the Grand Junction railway. Area 1,851 acres. Pop. in 1831, 401; in 1851, 514.—Also a tything in the p. of Stalbridge, Dorset, 7½ m. E by N of Sherborne. Pop. in 1831, 225; in 1851, 250.—Also a parish in Hertfordshire, 4 m. NE by N of Stevenage. Area 4,530 acres. Pop. in 1831, 1,046; in 1851, 1,186.—Also a parish in Lincolnshire, 4 m. NE of Spalding. Area 5,386 acres. Pop. in 1831, 567; in 1851, 759.—Also a parish in Somersetshire, 1½ m. NW by W of Bath, on the N bank of the river Avon, at the point at which a small tributary stream rising on Lansdown hill, joins that river. Area 2,650 acres. Pop. in 1831, 2,560; in 1851, 3,068.—Also a parish in Suffolk, 3 m. S of Beccles. Area 1,550 acres. Pop. in 1831, 233; in 1851, 243.—Also a parish in the W. R. of

Yorkshire, 2 m. NW by W of Otley, on the river Wharfe. Area 4,552 acres. Pop. in 1851, 492.

WESTON, a village of Upper Canada, 10 m. NW of Toronto. Pop. 550.

WESTON, a township and village of Missouri, U. S., 160 m. WNW of Jefferson.—Also a township and v. of Fairfield co., in Connecticut, 60 m. SW of Hartford. Pop. 1,968.—Also a v. of Middlesex co., in Massachusetts, 11 m. W of Boston. Pop. 1,200.—Also a v. of Lewis co., in Virginia, 188 m. NW of Richmond.

WESTON-WITH-ALCONBURY, a parish in Hunts, 6 m. NW of Huntingdon. Area 1,540 acres. Pop. in 1831, 441; in 1851, 516.

WESTON-UPON-AVON, a parish partly in Warwickshire, and partly in Gloucestershire, 9 m. N by E of Chipping-Camden. Area 1,540 acres. Pop. in 1831, 108; in 1851, 115.

WESTON-BEGGARD, a parish in Herefordshire, 5 m. E of Hereford. Area 934 acres. Pop. in 1831, 281; in 1851, 267.

WESTON-BAMPFYLDE, a parish in Somersetshire, 5 m. SSW of Castle-carey. Area 631 acres. Pop. in 1831, 123; in 1851, 119.

WESTON-BIRT, a parish in Gloucestershire, 4 m. SW by W of Tetbury. Area, with Lashborough, 1,904 acres. Pop. in 1831, 138; in 1851, 234.

WESTON (COLD), a parish in Salop, 7½ m. NE by N of Ludlow. Area 670 acres. Pop. 28.

WESTON-COLVILLE, a parish in Cambridgeshire, 6 m. NNE of Linton. Area 2,943 acres. Pop. in 1831, 444; in 1851, 574.

WESTON-CONEY, a parish in Suffolk, 7 m. SW of East Harling. Area 1,741 acres. Pop. 266.

WESTON-COYNEY, a joint township with Hulme, in the p. of Caverswall, Staffordshire, 5 m. W of Cheadle. Pop., with Hulme, in 1851, 778.

WESTON-SUB-EDGE, a parish in Gloucestershire, 2 m. W by N of Chipping-Camden. Area 2,633 acres. Pop. in 1831, 367; in 1851, 358.

WESTON-FAVELL, a parish in Northamptonshire, 2½ m. ENE of Northampton. Area 1,050 acres. Pop. in 1831, 443; in 1851, 508.

WESTON-IN-GORDANO, a parish in Somersetshire, 10 m. W by N of Bristol. Area 733 acres. Pop. in 1831, 124; in 1851, 203.

WESTON-ON-THE-GREEN, a parish in Oxfordshire, 4½ m. SW by W of Bicester. Area 2,466 acres. Pop. in 1831, 494; in 1851, 517.

WESTONING, or WESTON-INGE, a parish in Bedfordshire, 4 m. S by W of Amptill. Area 1,715 acres. Pop. in 1831, 627; in 1851, 782.

WESTON-LAURENCE, a tything in the p. of Henbury, Gloucestershire, 5½ NW by N of Bristol. Pop. in 1831, 329; in 1851, 334.

WESTON-UNDER-LIZARD, a parish in Staffordshire, 5½ m. NE by E of Shifnal. Area 2,396 acres. Pop. in 1831, 257; in 1851, 248.

WESTON-MADOC, a township in the p. of Church-Stoke, Montgomeryshire, 3¼ m. SE of Montgomery. Pop. 273.

WESTON-MARKET, a parish in Suffolk, 7 m. S of East Harling. Area 1,063 acres. Pop. 317.

WESTON-SUPER-MARE, a parish and watering-place in the co. of Somerset, 9½ m. NW by W of Axbridge, and 20 m. SW of Bristol, and within 1½ m. of the Bristol and Exeter railway, with which it is connected by a branch here. Area of p., with the hamlets of Ashcombe and Milton, 2,770 acres. Pop. in 1831, 1,310; in 1851, 4,034. The purity of its air, combined with a smooth and extensive sand-beach, of nearly 3 m. in extent, added to its vicinity to Bath and Bristol, have within these few years raised W. from a small fishing-village to the rank of a handsome watering-place containing nearly 600 houses,

and supplied with accommodation for numerous visitors, and possessing two churches and five dissenting chapels.

WESTON (Old), a parish in Hunts, 8 m. N of Kimbolton. Area 2,012 acres. Pop. in 1851, 432.

WESTON-PATRICK, a parish in Hants, 4½ m. SW by W of Odiham. Area 1,402 acres. Pop. 215.

WESTON-UNDER-PENYARD, a parish in Herefordshire, 2 m. ESE of Ross. Area 3,142 acres. Pop. in 1831, 639; in 1851, 733.

WESTON-PEVERELL, or **PENNY-CROES**, a chapelry in the p. of St. Andrew, Devon, 3 m. N by W of Plymouth. Area 1,281 acres. Pop. 321.

WESTON-UNDER-RED-CASTLE, a chapelry in the parish of Hodnet, Salop, 4 m. E of Wem. Area 1,389 acres. Pop. in 1851, 302.

WESTON-RHYN, a joint township with Bron-y-gath, in the p. of St. Martin, Salop, 3 m. N of Oswestry. Pop., with Bron-y-gath, in 1851, 1,165.

WESTON (Sours), a parish in Oxford, 3 m. S by E of Tetworth. Area 560 acres. Pop. in 1851, 198.

WESTON-UPON-TRENT, a parish in Derby, on the river Trent, 7 m. SE by S of Derby. Area 1,820 acres. Pop. in 1831, 387; in 1851, 399.—Also a parish in Stafford, on the river Trent, 4½ m. NE of Stafford. Area 825 acres. Pop. in 1831, 608; in 1851, 570. This p. is the seat of extensive operations in the preparation of salt. The brine is conveyed to the works by means of pipes across the Trent from the p. of Ingestre, where it is raised by machinery. About 1,400 hogheads of brine are daily consumed, and the weekly quantity of salt produced is about 250 tons.

WESTON-TURVILLE, a parish in Bucks, 2½ m. N by W of Wendover. Area 2,450 acres. Pop. in 1831, 637; in 1851, 748.

WESTON-UNDERWOOD, a parish in Bucks, 1½ m. WSW of Olney, on the N bank of the river Ouse. Area 1,300 acres. Pop. in 1851, 405.—Also a township in the p. of Stanton-by-Dale, Derby, 5½ m. NW by N of Derby. Area 1,300 acres. Pop. in 1831, 272; in 1851, 405.

WESTON-ZOYLAND, a parish in Somersetshire, 4 m. ESE of Bridgewater, on the N bank of the river Parret, which separates it from North Petherton. Area, with the hamlets of Bussex and Liney, 2,729 acres. Pop. in 1851, 1,007.

WESTOUTRE, a village of Belgium, in W. Flanders, 32 m. W of Bruges. Pop. 1,222.

WESTOW, a parish in the E. R. of Yorkshire, 5½ m. SSW of New Malton, near the river Derwent, containing the townships of Eddlethorpe, Firby, Menethorpe, and W. Area 2,917 acres. Pop. 592.

WESTPALSTOWN, a parish in co. Dublin, 3½ m. S of Naull. Area 1,595 acres. Pop. in 1841, 169.

WEST-PANS, a village on the coast of the p. of Inverack, Edinburghshire, 1½ m. ENE of Musselburgh. Pop. 300.

WESTPHALIA, a province belonging to the western division of the Prussian monarchy; bounded on the NW by Holland; on the N by Hanover; on the E by Hanover, Schaumburg, Lippe-Detmold, Brunswick, and Hesse-Cassel; on the SE by Hesse-Cassel, Waldeck, and Hesse-Darmstadt; and on the SW and W by the province of the Rhine. Its total area is 5,888 geog. sq. m. The northern part of this prov. belongs to the great plains of the north of Germany, and has only a few small elevations running from the Egge to the Weser. The southern part from the S side of the Lippe, consists in numerous ridges of small mountains and hills. The soil in the N is mostly sandy, with some large moors, heaths, and bogs. In the S, the soil, though not sandy, is frequently stony, and not very productive. The mountains of the prov. belong to the lower chains of

the Harz. The most remarkable are the Weser mountains; the Teutoburgerwald, a remarkable chain, which runs like a wall from the Rhine to almost the middle of the Ems; and the Porto-Westphalien, a beautiful picturesque chain, which has been abruptly cleft by water, about 1 m. to the S of Minden. This opening forms the celebrated Porto-Westphalien, or pass of Westphalia. The largest river is the Weser, but it only flows on the W side of the prov., where it forms the boundary for about 60 m. It then breaks through the Porto-Westphalien, and runs for 28 m. through the district of Minden. It receives several small rivers as the Diemel and the Emmer. The next river is the Ems, which is not navigable, and receives no river of considerable size. The Lippe is partly navigable. The Rühr, which falls into the Rhine, was made navigable by Frederic II; the Vechta runs through the Netherlands into the Zuydersee. There are no lakes or ponds, but a number of bogs, and some mineral springs. The climate is temperate and healthy; the air is colder but more pure in the S than in the N, where there are many bogs. The winter is everywhere cold and damp; in summer the heat is sometimes very great. Horses, and the common domestic animals, swine, in great number, fowls, game, corn, potatoes, vegetables, fruit, hemp, flax, copper, lead, iron, marble, lime, salt, peat, and coals, are the productions of this prov. Agriculture is everywhere the principal branch of industry. The richest corn-districts are the vicinity of Paderborn, the N part of the duchy of W., and some districts of Minden and Münster. There are other parts where the soil is so stony that nothing but oats can be cultivated. Rye is the most common corn; from it is prepared the brown bread called *pumpernickel*, celebrated throughout Germany. The rearing of cattle is considerable, particularly herds of swine, which furnish the celebrated Westphalian hams. There are extensive salt-works; iron and linen are the most important articles of manufacture. The inhabitants, returned at 1,464,921 in 1849, and 1,516,046 in 1853, are all of the Low-German race. In a great part of the country the inhabitants live dispersed in small isolated farms. The Catholics have two universities, one at Münster, and one at Paderborn; they have also seminaries for the clergy, gymnasia, and elementary schools. The Protestants have gymnasia, and city and parochial schools; but the state of general information, and school establishments, is here decidedly inferior to those of other Prussian provinces. Westphalia is divided into the three governments of Münster, Minden, and Arnsburg, which are subdivided into circles. It contains 128 towns, 60 boroughs, and 4,045 villages. The chief town of the prov. is Münster, on the Aa.

WEST POINT, a village of Troup co., in Georgia, U. S., 120 m. W by S of Milledgeville. Pop. 450.

WEST POINT, a village of Orange co., in the state of New York, U. S., on the W bank of the Hudson, 53 m. from New York, in N lat. 41° 33' 31", W long. 73° 57' 03". The military academy of the Union was founded here in 1802. The 'Point' consists of an irregular angle or point, elbowing the Hudson into the sharpest curve of its entire navigable course. A plain of about 160 acres, elevated over 150 ft. above the river, crowns this point, while the limiting bluffs and slopes coming down to the water's edge offer many beautiful clusterings of foliage and out-looking granite spurs. On the plain is the academic hall, the chapel, hospital, library, cadet-barracks, and mess hall, the houses of the professors and officers, and an open area for military evolutions. Under a hill to the NW lies the quarter known as Campdown, which consists of the soldiers' barracks, and various small tenements demanded by the motley academic retainers of all minor degrees. In the rear or to the W, the plain is shut in by a range of hills, Mount Independence being just abreast. About 1 m. W, Redoubt hill rises still higher, and between this and lordly Crow's Nest winds the valley threaded by the Canterbury road. Across the river is Constitution island, crowned with ruins. Fort Montgomery is about 6 m. below the

Point. The new cadet barracks compose a noble edifice in the Elizabethan style, with towers, battlements, and embrasures. The academic hall contains the recitation, and drawing-rooms, the picture gallery, the cabinets of engineering and geology, the laboratory, the fencing-rooms, and the riding-hall. The library building has an imposing appearance. The library-room, which is used for the examinations and for winter concerts, contains a valuable selection of 15,000 volumes. The observatory, which occupies three towers, possesses a fine transit instrument, and a large mural circle and an indifferent equatorial. The hospital, hotel, professors' houses, laboratory, and storehouse, the dragon stables, the commissaries' store, the band and engineer barracks, and various minor tenements complete the buildings of the establishment. For each congressional district one cadet is allowed, whose appointment is practically in the gift of the representative in Congress from that district. Contingencies considered, a vacancy occurs about once in three years for each district. The corps of cadet usually numbers about 250, and is organised into a battalion of 4 companies, all officered by cadets. Over these is the commandant of cadets, an army captain, who is the immediate military head of this battalion; also four army lieutenants, commanding the four companies, as assistant instructors of tactics. The cadet first class furnishes the requisite cadet captains and lieutenants; the second class, the sergeants; and the third class, the corporals; all other cadets serve indiscriminately as privates. The usual staff of teachers consists of the superintendent, 2 officers in the engineering department, 3 in philosophy, 6 in mathematics, 2 in chemistry, 3 in ethics, 2 in drawing, 4 in practical engineering, 3 in French, 5 in infantry tactics, 4 in artillery and cavalry, an adjutant, a surgeon, and an assistant-surgeon; being 38 in all. These officers are all detached from the regular army for the duty at West Point, and are in turn greatly instructed by the necessities of teaching. The system is excellent in always keeping the academy young and vigorous, while the army is leavened by the higher progress in science thus wrought out among its officers, who are in time returned to their field-duties.

WESTPORT, a market-town, and nominally a seaport, in the p. of Aughavel, co. Mayo, $6\frac{1}{2}$ m. S of Newport. It is one of the most regular small towns of Ireland. The commerce, which belongs rather to Westport-Quay than to the town itself, consists in the export of corn, meal, and flour, provisions, spirits, wool, linen, and flax and tow. Pop. in 1831, 4,448; in 1841, 4,365.

WESTPORT, a village of Fairfield co., in Connecticut, U. S., 55 m. SW of Hartford, on the Sanguituck river. Pop. in 1840, 1,808; in 1850, 2,649.—Also a township and village of Bristol co., in Massachusetts, 51 m. S of Boston. Pop. 2,795.—Also a township and v. of Essex co., in New York, 106 m. N by E of Albany. Pop. 2,352.

WESTPORT BAY, the south-eastern arm or offset of Clew bay, co. Mayo. The S side of the small island of Innisgort, which is surmounted by a lighthouse, and is situated $5\frac{1}{2}$ m. WNW of Westport-Quay, marks the entrance. The channel, after passing about 2 m. up from Innisgort, expands into a lagoon nearly 2 m. wide, and almost perfectly landlocked; after this lagoon is passed, the bay gradually contracts, up to its termination at the village of Westport-Quay.

WESTPORT-QUAY, a seaport village in the p. of Aughavel, co. Mayo, at the head of Westport bay, 1 m. W of the town of Westport, and the port of that town. Pop. in 1841, 547.

WESTPORT-ST. MARY, a parish in Wilts, adjacent to Malmesbury. Area 2,036 acres. Pop. 1,661.

WEST RANDOLPH, a village of Orange co., in the state of Vermont, U. S., 25 m. S of Montpelier, and on the Vermont Central railway.

WESTRAY, an island at the NW extremity of the Orkney group, $9\frac{1}{2}$ m. NW of Costa-head, the nearest point of Pomona, and $4\frac{1}{2}$ m. N of Rousay, from which it is separated by the Westray frith. Within distances of from $\frac{1}{2}$ to $2\frac{1}{2}$ m. from its E and SE coasts lie Papa-Westray, Eday, Faray, and Farayholm. Its extreme length, from NNW to SSE, is 9 m.; and its extreme breadth is 4 m. Pop. in 1811, 1,396; in 1831, 1,712; in 1851, 2,063.

WESTRAY AND PAPA-WESTRAY, a united parish in the NW of Orkney, comprehending the parish and island of Papa-Westray, and North and

East, or Mary and Lady parishes, which divide between them the island of Westray. Pop. 2,459.

WEST ROCKHILL, a township of Bucks co., in the state of Pennsylvania, U. S., 33 m. NNW of Philadelphia, drained by Perkiomen creek and a branch of Tobicon creek. Pop. in 1840, 1,631.

WESTRUTHER, a parish lying debateably between Lauderdale and Lammermoor in Berwickshire. Its superficial extent is about 224 sq. m. The village of W. stands in the centre of the parish, 7 m. E of Lauder. Pop. in 1831, 830; in 1851, 791.

WEST RUTLAND, a village of Rutland co., in the state of Vermont, U. S., on the W side of Otter creek, 51 SSW of Montpelier, and intersected by the Rutland and Washington railroad.

WEST SPRINGFIELD, a township of Hampden co., in the state of Massachusetts, U. S., on the W side of Connecticut river, and 82 m. W by S of Boston, intersected by the Western railway. Pop. of township in 1840, 3,626; in 1850, 2,979.

WEST STOCKBRIDGE, a township of Berkshire co., in the state of Massachusetts, U. S., drained by Williams river, and intersected by the Western and Stockbridge railway. Pop. in 1850, 1,713.

WEST TOWNSEND, a village of Middlesex co., in the state of Massachusetts, U. S., on a branch of Nashua river, 41 m. NW by W of Boston, and intersected by the Peterboro and Shirley railroad.

WEST TROY, a village of Albany co., in the state of New York, U. S., on the W bank of Hudson river, and 6 m. N by E of Albany. Pop. 7,564.

WEST UNION, a village of Adams co., in the state of Ohio, U. S., 79 m. S by W of Columbus. Pop. in 1840, 500; in 1850, 462.

WESTWARD, a parish in Cumberland, 3 m. SE by S of Wigton, on the W bank of the river Wampool, containing the townships of Brocklebank, with Stonerale, Rosley, and Woodside. Area 13,120 acres. Pop. in 1831, 1,253; in 1851, 1,233.

WEST WAREHAM, a village of Wareham township, Plymouth co., in the state of Massachusetts, U. S., on Cape Cod branch railroad, and 46 m. SSE of Boston.

WEST WATERTVILLE, a village of Kennebec co., in the state of Maine, U. S., on the Androscoggin and Kennebec railroad.

WESTWELL, a parish in Kent, 2 m. ESE of Charing. Area 5,199 acres. Pop. in 1831, 861; in 1851, 1,030.—Also a parish in Oxfordshire, 2 m. WSW of Burford. Area 890 acres. Pop. 186.

WEST WHITELAND, a township of Chester co., in the state of Pennsylvania, U. S., 72 m. from Harrisburg, and drained by Southern Valley creek. Pop. in 1840, 1,085.

WESTWICK, a parish in Norfolk, $2\frac{1}{2}$ m. S. of North Walsham. Area 1,043 acres. Pop. 204.

WEST WINSTED, a village of Litchfield co., in the state of Connecticut, U. S., on Mad river, and at the terminus of the Nangatuck railroad.

WEST WOODVILLE, a village of Claremont co., in the state of Ohio, U. S., on the W side of Stonelick creek, and near the Cincinnati, Hillsboro, and Parkersburg railroad.

WESTWOOD-WITH-IFORD, a parish in Wilts, 2 m. S of Bradford, containing the hamlet of Iford. Area 813 acres. Pop. in 1831, 890; in 1851, 605.

WESUWE, a village of Hanover, in the principality of Osnabruck, near Mippen. Pop. 300.

WESZE, a village of Austria, in Moravia, in the circle of Iglan. Pop. 220.

WESZENINGKEN, a village of Prussia, in the reg. of Gumbinnen, circle of Ragnit. Pop. 220.

WESZMAR, a village of Prussia, in the regency and circle of Merseburg. Pop. 230.

WESZPRIM. See **VESPRIM**.

11. 7. 440

WETERE, a town of New South Wales, in the district of Murrumbidgee, on the N bank of the river Murray, in E long. 148°.

WETERSCHAN, a village of Austria, in Moravia, in the circle of Brunn. Pop. 670.

WETHAU, a village of Prussia, in the regency of Merseburg, and circle of Naumburg. Pop. 332.

WETHEN, a village of Waldeck, in the bail of Diemel. Pop. 543.

WETHERAL, a parish in Cumberland, 5 m. ESE of Carlisle, on the river Eden, including the townships of Camwhinton with Coathill, Scooby, Wetheral, Great Corby, and Warwick-bridge. Area 11,778 acres. Pop. in 1831, 4,149; in 1851, 3,165.

WETHERBY, a market-town and chapelry in the p. of Spofforth, W. R. of York, 13 m. W of York, on the river Wharfe, over which is a handsome stone-bridge of 6 arches. Area 1,570 acres. Pop. in 1831, 1,321; in 1851, 1,494. The town consists chiefly of one street, and is situated in a fine agricultural district.

WETHERDEN, a parish in Suffolk, 4½ m. NW of Stow-market. Area 1,830 acres. Pop. 541.

WETHEREDVILLE, a village of Baltimore co., in the state of Maryland, U. S., on Gwynn's Falls, 4½ m. WNW of Baltimore. Pop. in 1850, 750.

WETHERINGSET, a parish in Suffolk, 5 m. ESW of Eye, in the projected line of the Eastern Counties railway. Area 3,788 acres. Pop. in 1841, 1,065; in 1851, 1,101.

WETHERSFIELD. See **WEATHERSFIELD**.

WETHERSFIELD, a township of Hartford co., in the state of Connecticut, U. S., on the W side of Connecticut river, 3½ m. S of Hartford. Pop. in 1840, 3,824; in 1850, 2,523.—Also a township of Wyoming co., in the state of New York, 235 m. W of Albany. Pop. in 1840, 1,728; in 1850, 1,489.—Also a township of Trumbull co., in the state of Ohio, 169 m. NE of Columbus, drained by Mahoning river, and intersected by the Pennsylvania and Ohio canal. Pop. in 1840, 1,447.

WETHERSFIELD SPRINGS, a village of Wethersfield township, Wyoming co., in the state of New York, U. S. Pop. in 1850, 160.

WETLER, a town of Prussia, in the prov. of Westphalia, regency of Arensburg, and circle of Hagen, 11 m. S of Dortmund. Pop. 540. It has a china manufactory, and coal mines.

WETLIN, a town of Prussia, in the prov. of Saxony, in the regency and 20 m. NNW of Merseburg, on the r. bank of the Saale. Pop. 2,540. It is enclosed by walls, with 3 gates, and has 4 suburbs, a castle, the ancient residence of the Counts of Wetlin, 2 churches, a Lutheran and a reformed, and an hospital. It contains several breweries, and coal-mines are wrought in the vicinity.

WETLUGA, a town of Russia in Europe, in the gov. of Kostroma, on a river of the same name, an affluent of the Volga. Pop. 1,800.

WETSCHEN, a village of Hanover, in the bail of Diepholz. Pop. 461.

WETSCHWELL, a village of Prussia, in the reg. of Düsseldorf, circle of Gladbach. Pop. 280.

WETTAU, or **WETTER**, a large island of the Eastern seas, lying to the N of Timor, from which it is separated by a channel 35 m. wide. Its E point is in S lat. 7° 40', E long. 126° 45'. It is 57 m. in length from ENE to WSW, and 25 m. broad; and is generally high and bold.

WETTERBERGEN, a village of Hanover, in the bail of Wenningsen, near Hanover. Pop. 378.

WETTE (*Deutsch* and *Polnisch*), two villages of Prussia, in the regency of Oppeln, and circle of Niesse, and containing respectively 532 and 426 inhabitants.

WETTEBORN, a village of Hanover, in the bail of Bilderlake, near Lamspringin. Pop. 398.

WETTEL, a village of Austria, in Bohemia, in the circle of Prague, bail of Raudnitz. Pop. 270.

WETTELBRÜNN, a village of Baden, circle of the Upper Rhine, bail of Staufen. Pop. 378.

WETTELDORF, a village of Prussia, in the regency of Treves, and circle of Prum. Pop. 280.

WETTELRODE, a village of Prussia, in the regency of Merseburg, and circle of Sangershausen. Pop. 380.

WETTELSHEIM, a village of Bavaria, in the circle of Middle Franconia. Pop. 731.

WETTEN, a village of Prussia, in the regency of Düsseldorf, and circle of Geldern. Pop. 609.

WETTENHALL, a township and chapelry in the parish of Over, co-palatine of Chester, 7 m. NNW of Nantwich. Area 1,954 acres. Pop. 294.

WETTENHAUSEN, a village of Bavaria, in the circle of Swabia, on the Kamlach. Pop. 542.

WETTER, a village of Prussia, in the regency of Arnberg, and circle of Hagen, on the Ruhr. Pop. 550. It has manufactories of china, and several iron-works.—Also a town of Hesse-Cassel, capital of a bail, in the prov. of Upper Hesse, circle and 7 m. NNW of Marburg, on the Wettschaft. Pop. 1,516. It contains a fine abbey, and an hospital, and has several paper-mills.—Also a river of the grand-duchy of Hesse-Darmstadt, which has its source near Laubach, in the prov. of Upper Hesse; runs first W, then S, and after a course of about 36 m. joins the Nidda, a little to the SW of Assenheim. It gave its name to the district of Wetteran.

WETTER. See **WETTAU**.

WETTER (LAKE), a lake of Sweden, between the parallels of 57° 47' and 58° 53' N, and stretching nearly 85 m. from NNE to SSW, with a medium breadth of 15 m., at an alt. of 290 ft. above sea-level. It is united, through the small lake of Viken, and by the West Gotha canal, with Lake Wever; and by the Motala canal with the Baltic.

WETTERAU, or **WETTERGAU**, a district of Germany, watered by the Wetter, which gives it its name. It comprises a great part of Upper-Hesse, Hesse-Darmstadt, and of the territory of Frankfort-on-the-Main. Its chief towns are Friedberg, Vilbel, and Staaden.

WETTERBURG, a village of Waldeck, in the bail of Twiste, and circle of Arolsen. Pop. 540.

WETTEREN, a department, commune, and town of Belgium, in the prov. of West Flanders, arrond. and 11 m. W of Dendermond or Termond, on the r. bank of the Scheldt. Pop. of dep., 8,705; and of com., 3,802. It has manufactories of linen and woollen fabrics, and of lace.

WETTERFELD, a village of Bavaria, in the circle of the Upper Pfalz, and presidial of Roding. Pop. 337.—Also a village of Hesse-Darmstadt, in the prov. of Upper-Hesse, 14 m. ESE of Giessen, on the Wetter. Pop. 496.

WETTERHORN, a mountain of Switzerland, in the cant. of Berne, between the valleys of Hasle and Grindelwald, and in the N spur of the Bernese Alps, in N lat. 46° 38' 22". It is pyramidal in form, and has an alt. of 12,154 ft. above sea-level. The summit of this mountain was attained, for the first time on the 28th of Aug. 1844, after a toilsome ascent of three days from the valley of the Grindelwald. On the N, says Mr. Spiers, we perceived from the summit of the peak, "the Faulhorn and the chain of mountains which borders the lake of Brienne, and behind them the pass of Brunig; then the lakes of Lungerne and Lucerne, on the banks of which rose the Righi and Mount Pilate, whose summits appeared to us like molehills. On the E, the

eyes wandered over an indefinite chain of mountain-peaks. On looking towards the S, we perceived on that side the two monarchs of the Bernese Alps, raising their heads side by side—viz., the Rosenlani and the Berglistock. Separated from them by the neck of Lauteraar, we described the red Schreckhorn, very properly called the 'Peak of Terror,' whilst the last of the groups, the Finsteraarhorn, appeared to overtop its companions. On the right of these two peaks was seen the brilliant Vischerhorn, the nearest of all, beyond which we discovered the three rival peaks, the Eiger, the Mönch, and the Jungfrau, rising together to a height of more than 12,000 ft. At the base of these gigantic mountains lay the Wengern of the Alps, which looked like a mere undulation, whilst we could scarcely distinguish, far beneath us, the village of Grinderwald and the river of Lutchinen, winding like a silver thread in the midst of the valley. On all sides of the peak upon which we were stationed (and on the summit of which 12 persons could hardly find room) we had before our eyes vast and profound precipices, at the foot of which were stretched the plains of snow, and the numerous glaciers, situated still lower down. On our left were observed the higher glaciers of Grinderwald, and those of Lauteraar; and on the right, those of Gauti, Reufen, and Rosenlani, above which rose the peaks of Wellhorn, Losenhorn, and Engelhornet."

WETTERINGEN, a village of Prussia, in the regency of Munster, and circle of Steinfurt. Pop. 583.

WETTERSTEIN, a mountain of Bavaria, in the circle of Upper Bavaria, and presidial of Werdenfels, which has an alt. of 9,619 ft. above sea-level.

WETTERSALDA, a village of Saxony, in the circle of Meissen, bail, and 4 m. N of Oschatz.

WETTERWITZ, a village of Saxony, in the circle of Dresden, and bail. of Meissen. Pop. 350.

WETTESINGEN, a village of Hesse-Cassel, in the prov. of Lower-Hesse, circle of Wolfhagen, and bail. of Wolfmarsen. Pop. 776.

WETTIN, a town of Prussia, in the regency and 27 m. NNW of Merseburg, and circle of the Saal, on the river of that name. Pop. 3,200. It has manufactories of chicory, tobacco, and oil.

WETTINGEN, a village of Switzerland, in the cant. of Aargau, bail, and 3 m. SE of Baden, on the Limmat. Pop. 1,612. It has a Benedictine abbey.

WETTENSTADT, a village of Brunswick, in the circle of Brunswick. Pop. 220.

WETTMANNSTETTIN, a village of Austria, in Styria, in the circle of Marburg. Pop. 210.

WETTMAR, a village of Hanover, in the principality of Lüneburg, and bail. of Burgweddel, near Hanover. Pop. 516.

WETTOLSHEIM, a commune of France, in the dep. of the Haut-Rhin, and cant. of Wintzenheim, 3 m. SW of Colmar. Pop. 1,392.

WETTON, a parish in Stafford, 7½ m. NW by N of Ashbourne. Area 2,600 acres. Pop. 466.

WETRINGEN, a village of Bavaria, in the circle of Middle Franconia, and presidial of Rothenburg, near a branch of the Tauber. Pop. 553.—Also a village of Lower Franconia, in the presidial of Hofheim. Pop. 260.

WETTRUP, a village of Hanover, in the principality of Osnabruck, and bail. of Freeren. Pop. 553.

WETSCHUTZ, a village of Prussia, in the regency of Liegnitz, and circle of Glogau. Pop. 260.

WETSLATTEN, a village of Bavaria, in the circle of Upper Bavaria, and presidial of Ingolstadt. Pop. 500.

WETTSWEIL, a village of Switzerland, in the cant. of Zurich, and bail. of Affoltern. Pop. 317.

WETTZEL, a village of Bavaria, in the circle of

Upper Bavaria, and presidial of Oberriechthach. Pop. 290.

WETUMPKA, a town of Montgomery co., in the state of Alabama, U. S., 110 m. SE of Tuscaloosa, on the E side of Corra river. Pop. in 1840, 2,600.

WETWANG, a parish in the E. B. of Yorkshire, 5½ m. W by N of Great Driffield, including the township of W., and the chapelry of Finber. Area 5,740 acres. Pop. in 1831, 621; in 1851, 750.

WETZ, a village of Prussia, in the regency of Coblenz, and circle of Wetzlar. Pop. 400.

WETZAWINKEL, a village of Austria, in Styria, circle of Gratz, and bail. of Freiburg. Pop. 310.

WETZBACH, a village of Prussia, in the regency of Coblenz, and circle of Wetzlar. Pop. 280.

WETZDORF, a village of Austria, in Bohemia, in the regency of Gitschin, and bail. of Seftenberg. Pop. 610.—Also a village of Saxe-Weimar, in the district of Weimar, and bail. of Burgel. Pop. 200.

WETZEL, a county in the NW part of the state of Virginia, U. S., comprising an area of 558 sq. m., drained by branches of the Ohio, and intersected by the Baltimore and Ohio railroad. Pop. 4,284.

WETZELSDORF, three villages of Austria, in Styria, in the circle of Gratz. United pop. 1,200.

WETZENDORF, a village of Bavaria, in the circle of Middle Franconia, and bail. of Nurnberg. Pop. 250. It has tobacco-mills.—Also a village of Prussia, in the regency of Merseburg, and circle of Ouerfurt. Pop. 260.

WETZHAUSEN, a village of Bavaria, in the circle of Lower Franconia, and presidial of Holstein. Pop. 240. It has a castle, an hospital, and hot baths.

WETZISREUTE, a village of Württemberg, in the circle of the Danube, and bail. of Ravensburg. Pop. 200.

WETZLAR, a circle and town of Prussia, in the prov. of the Rhine, and regency of Coblenz. Pop. of circle, 41,666. The town is 45 m. NE of Coblenz, on a height, and near the r. bank of the Lahn, at the confluence of the Dille, and at an alt. of 417 ft. above sea-level. Pop. in 1831, 4,677; in 1840, 5,146; in 1849, 5,250. It is enclosed by walls, with five gates, and has two suburbs. It contains several churches, both Catholic and Protestant, an hospital, a Lutheran and a Catholic gymnasium, a school of industry, and an institute for the poor. In the vicinity are the ruins of the castle of Kalschmitt or Carlsmund. Leather is its chief article of manufacture. An engagement between the French and Austrians took place under its walls in 1796.

WETZLAS, a village of Austria, in the prov. of Lower Austria, and upper circle of the Mannhartsberg, 8 m. W of Krumau. It has an observatory situated in N lat. 48° 36' 30", E long. 15° 19' 45".

WETZLOS, a village of Hesse-Cassel, principality of Fulda, and circle of Hunfeld. Pop. 200.

WEVELGHEM, a department and commune of Belgium, in the prov. of West Flanders, arrond. and 4 m. WSW of Courtrai, watered by the Lys. Pop. of dep., 4,045. It has manufactories of linen and cotton fabrics, and a trade in colza and flax.

WEVELINGHOVEN, a town of Prussia, in the regency and 11 m. SW of Dusseldorf, and circle of Grevenbroich, near the r. bank of the Erft. Pop. 2,400. It contains several breweries, distilleries, vinegar-works, and manufactories of linen and woolen fabrics.

WEVERTON, a village of Frederick co., in the state of Maryland, U. S., on the W side of the Potomac, at the confluence of Israel creek, 66 m. WNW of Annapolis, intersected by the Chesapeake and Ohio canal, and the Baltimore and Ohio railroad.

WEVLSFLETH, a village of Denmark, in the

duchy of Holstein, and bail. of Steinburg, on the Stora, near its confluence with the Elbe, and to the N of Gluckstadt. Pop. 1,100. It has a custom-house, building docks, numerous breweries and distilleries, and manufactories of casks.

WEWELSBURG, a village of Prussia, in the regency of Minden, and circle of Buren. Pop. 899.

WEWER, a village of Prussia, in the regency of Minden, and circle of Paderborn. Pop. 720.

WEXFORD, a maritime county in the SE of the Irish province of Leinster, bounded, on the N, by co. Wicklow; on the E, by the Irish sea and St. George's channel; on the S, by the Atlantic; and on the W, by cos. Waterford, Kilkenny, and Carlow. The area comprises 510,702 acres of arable land, 45,501 of uncultivated land, 14,325 of coniferous woods, 2,392 of towns, and 3,668 of water,—in all, 576,588 acres.—The coast, along all the E and all the S, is low, and, for the most part, beachy. A lofty, magnificent, and boldly characterized range of mountains extends along most of the boundary with the county of Carlow, and forms an imposing background to a large proportion of the larger landscapes within the co. of Wexford. Tara-hill makes a conspicuous figure on the N portion of the E coast. A series of lofty hills, both too broad and too straggling to be called either range, chain, or group, commences 3½ m. S by W of New Ross, and extends about 10½ m. to the NE. The district S of the Forth mountain is almost a dead level. The whole of the E and S maritime frontier presents a district in many parts consisting of a deep alluvial soil well adapted for tillage,—abounding in various species of marl, calcareous sand, and, in some situations, limestone. In the more internal parts of the co., the river Slaney, traversing the country in a direction from NW to SE, marks out a district of great beauty and fertility on both sides of its verdant banks. The district to the eastward stretches to the sea-coast, abounds in marl, and is productive in grain.

The river Slaney flows a brief distance upon the NW boundary, and then runs SSW through the interior to the head of Wexford-harbour. It is navigable for river-craft to Enniscorthy. The Derry comes down from co. Wicklow, and runs a few miles on the NW boundary to a confluence with the Slaney. The Bann rises on the NE frontier, and drains the larger portion of the NE district to the Slaney. Three confluent rivulets, constituting the Corug, run to the head of Bannow-bay. The Barrow, large in volume, facile for navigation, fluctuating with the tide, and receiving, in its progress from co. Kilkenny, the magnificent tributary of the Nore, flows along the whole of the boundary with Kilkenny.

Minerals and Soil. A band of lofty granitic country, forming part of the great granite district of the counties of Carlow, Wicklow, and Dublin, constitutes all the higher portion of the Mount Leinster and Blackstairs mountains within co. Wexford. Carboniferous limestone constitutes the surface rock of the Hook peninsula. The surface rocks throughout all the vast remainder of the co. are of the transition series, and consist principally of clay slate, greywacke, and greywacke slate. A lead mine is in operation at Cairne. A small vein of copper ore, of the kind called malachite, or carbonated green copper ore, occurs at Kirlogue, in the vicinity of Wexford. The soil, generally speaking, cannot boast of the superior degrees of fertility which is found in many other districts in Ireland, being mostly of a cold clayey nature.

Climate and Agriculture. The E and S districts of the county of Wexford, in consequence of lying

low and quite open to the sea, enjoy a much milder climate than the adjoining counties of Carlow and Kilkenny. The average climate of the county appears to be somewhat more genial than the average climate of the portions of Wales and England situated within the same parallels. The harvests of W. are sometimes finished when those of Haverford-west and Carmarthen in South Wales, and the district around Barnstaple in the N of Devonshire, are only in progress. The county of W. and the S part of the county of Wicklow constitute one of the nine agricultural districts into which Mr. Wakefield distributed the whole of Ireland. The quantity of wheat used for seed in this district he states at 186 lbs. per acre, and the produce at 2,020 lbs.; the quantity of barley used for seed at 296 lbs. per acre, and the produce at 2,614 lbs.; the quantity of oats used for seed at 368 lbs. per acre, and the produce at 2,606 lbs.; the quantity of potatoes used for seed at 2,632 lbs. per acre, and the produce at 21,140 lbs.; and the produce of flax per acre at 896 lbs. "Happily," say Mr. and Mrs. Hall, in their recent work on Ireland, "W. is, in one respect, highly privileged—few of its landed proprietors are absentees. There are no huge estates, over which several agents must of necessity be placed; and as very few of its gentry have involved properties, it follows, as matter of course, that the tenants are in easy circumstances, and are neither rack-rented nor pressed for sudden payments." In 1841, there were within the rural districts of the county 5,219 farms of from 1 acre to 5 acres, 6,313 of from 5 to 15 acres, 4,151 of from 15 to 30 acres, and 2,457 of upwards of 30 acres. The totals of live stock, together with their respective estimated value, in 1841, were 27,474 horses and mules, £219,792; 2,891 asses, £2,891; 55,449 cattle, £360,419; 65,670 sheep, £72,237; 71,354 pigs, £89,192; and 251,929 poultry, £6,298. Grand total of estimated value of live stock in the rural districts, £750,829.

Manufactures and Trade. The commerce of probably three-fourths of the county is identical with that of the port of Wexford; and the commerce of the remainder may be estimated by assigning to it a proportion of the exports and imports of New Ross and Waterford.

Communications. The Barrow navigation is available to the southern part of the W side of the county; and the Slaney navigation is available to the districts around Enniscorthy, and thence down the valley of the Slaney to the sea. A railway has been proposed to connect the town of Wexford with the Dublin and Kilkenny railway, in the immediate vicinity of Carlow, and pass up the valley of the Slaney by way of Enniscorthy and Newtown-Barry. Another has been projected to connect Wexford on the one hand with Wicklow and Dublin, and on the other hand with New Ross, Waterford, Clonmel, Limerick, Cork, and Valentia; and this, if executed, would place the southern counties of Ireland in easy communication, by Wexford, with the Irish Wales railway,—the distance between Fishguard and Wexford being short, and favourable as to tides and prevailing winds.

Divisions, Towns, &c. The towns and principal villages are Ballycanew, Cooleraney, and part of Gorey, in the barony of Gorey; Riverchapel, Balaghkeen, Ballinamuddagh, Blackwater, Oilgate, Ford, Oulart, and parts of Gorey and Enniscorthy, in the barony of Ballaghkeen; Wexford and Broadway, in the barony of Forth; Tullycanna, Carrick, Duncormack, and Kilmore, in the barony of Bargie; Fethard, Churchtown, Slade, Arthurstown, Ballyhack, Duncannon, Ramsgrange, and Saltmilla, in the barony of Shelburne; New Ross, Clonroche,

and Maudlins, in the barony of Bantry; Ferns, Newtown-Barry, Cloghamon, Watchhouse, Camolin, and part of Enniscorthy, in the barony of Scarewalsh; Taghmon and Foxmills, in the barony of West Shelmallee; and Castle-bridge, in the barony of East Shelmallee. Pop. in 1831, 182,718. Males, 87,995; females, 94,718; families, 82,856. Inhabited houses, 29,923; uninhabited complete houses, 790; houses in the course of erection, 529. Families employed chiefly in agriculture, 21,465; in manufactures and trade, 6,155; in other pursuits, 5,236.—Pop. in 1841, 202,033. Males, 97,918; females, 104,115; families, 36,594. Families residing in first-class houses, 1,413; in second-class houses, 10,611; in third-class houses, 16,165; in fourth-class houses, 3,405. Families employed chiefly in agriculture, 24,664; in manufactures and trade, 8,147; in other pursuits, 3,783. Families dependent chiefly on property and professions, 985. The population by the last census (1851), was 179,793—viz., males, 86,770; females, 93,020. The decrease of pop., therefore, in the ten years, amounts to 22,243. The total number of inhabited houses, in 1851, was 29,479; of uninhabited, 1,776; and building, 60. The result of the return, therefore, shows a decrease of pop. of 22,243; of inhabited houses, 3,828.—The county gaol is at Wexford; and bridewells are at Gorey, Enniscorthy, and New Ross. The assizes are held at Wexford; quarter-sessions at Wexford, Gorey, Enniscorthy, and New Ross. The county sent no fewer than 18 members to the Irish parliament; or 2 from the county at large, and 2 from each of the boroughs of Wexford, Enniscorthy, Gorey, New Ross, Fethard, Bannow, Clonmines, and Taghmon; but it sends only 4 to the imperial parliament, or 2 from the county at large, one from the borough of Wexford, and one from the borough of New Ross. Constituency of the county at large, in 1841, 1,739; in 1851, 5,917.

History. The Danes, previous to the Anglo-Norman period, held similar possession of the county of W., to that which they held of the counties of Waterford and Dublin. Wexford-harbour was one of the four principal stations which the Danes used for their fleets, and one of the fords or havens to which they gave permanent designations. The name Wexford is thus a corruption of the Danish *Wess-ford*, signifying "West-Haven." The little adventurous advanced body of the army of the Anglo-Norman invasion, under Robert Fitzstephen, Maurice Fitzgerald, and Hugh de Montmorency, landed at Bagenbon-Head near the SW extremity of this county. Dermot MacMurrough, king of Leinster, who invited and aided the Anglo-Norman invasion, had previously the seat of his court and government at FEXAS: which see. In 1210, the whole territory was erected into a county by King John. Cromwell, on his arrival in Ireland, found her sons here engaged in cutting each other's throats with the same blind fury which has so often rendered her energies of no avail. He dispossessed all the descendants of the old Anglo-Norman proprietors, long since become more Irish than the Irish themselves, and divided their lands amongst his followers, in the possession of whose descendants they still remain. In 1774, the county was disturbed by the illegal associations called Whiteboys; in 1793, it was again disturbed by the illegal associations called the Defenders; and in 1798, it acquired permanent and most painful notoriety as the scene of the bloodiest and worst acts of the rebellion.

WEXFORD, a parliamentary borough, and the capital of the county of Wexford, barony of Forth, situated on the W shore of the upper part of Wexford harbour, 3 m. S by W of Castle-Bridge, 29 m. ENE of Waterford, and 64 m. S by W of Dublin. The site of most of the town is low, flat ground along the shore of the harbour; that of the remainder is part of the NE skirts of the Forth mountains. The harbour, at a point about $\frac{1}{2}$ m. above the town, begins to expand northward to the vicinity of the village of Castle-Bridge; and at a point about 2 m. WNW of the upper extremity of the town, makes a rapid and final contraction to mere fluvial breadth, and is there crossed by the romantic bridge of Ferrycarrig. The W and SW environs of the

town, consisting of the range, offsets, and skirts of the Forth mountain, are broken and picturesque, and command a noble prospect of the town, the harbour, and the circumjacent country. The quay and some of the modern parts of the town present an appearance, occasionally respectable, and generally pleasant; portions of even the old streets contain a number of well-built and respectably inhabited houses; and several of the scattered and isolated edifices in the outskirts appear cheerful and handsome; yet the town, as a whole, is in most of its thoroughfares orientally narrow, and multitudes of its houses are squalid and disgusting. The most interesting and conspicuous ecclesiastical ruin in Wexford, is the abbey of St. Peter and St. Paul, usually called Selsker-abbey, situated in the N district of the compact portion of the town. The present parish-church of St. Iberius is a plain edifice, surmounted by a small cupola. The parish-church of St. Selsker is connected by a small vestibule with the massive tower and other architectural remains of the old abbey. The meeting-houses for Presbyterians, Independents, and Methodists, are plain buildings; and the Roman Catholic chapel of St. John, and the chapel attached to the Franciscan friary, are unornamental structures. St. Peter's college, adjoining the parochial Roman Catholic chapel of St. Peter on Summerhill, rises conspicuously over the general elevation of the town's architecture, and forms an arresting feature in the general landscape of the town and environs. The bridge of W. is in itself an interesting and picturesque object. It consists of two raised causeways of respectively 650 and 188 ft. in length at the ends, a timber bridge of 733 ft. in length in the middle, and a drawbridge, for admitting vessels up and down the Slaney, near the town end. The county court-house faces the bridge. The custom-house is a small structure. The poor-law union workhouse occupies a conspicuous site near the N entrance of the town; and is a handsome building. The gaol is situated in the NW outskirts of the town. A magnificent monumental column on Carrig-a-Dagon, though not properly belonging to the town, is too arresting a feature to be unworthy of incidental notice. It is a copy of Pompey's pillar at Alexandria in Egypt; and was erected to commemorate the conquest of Egypt by the army under Sir Ralph Abercromby. During 1843, 653 sailing vessels, of aggregately 36,662 tons, entered the port coastwise; 469 sailing vessels, of aggregately 23,878 tons, cleared coastwise; 82 steam-vessels, of aggregately 14,542 tons, entered coastwise; 83 steam-vessels, of aggregately 14,770 tons, cleared coastwise; 10 British vessels, of aggregately 2,165 tons, entered from the colonies; 7 British vessels, of aggregately 1,582 tons, cleared for the colonies; 2 British vessels, of jointly 231 tons, entered from foreign ports; and 1 British vessel, of 280 tons, cleared for a foreign port. In 1851, 647 sailing vessels = 38,531 tons, and 45 steamers = 10,434 tons, entered coastwise. Weekly communication is maintained with Liverpool by steam navigation. The shops of the town are good; and the retail trade is extensive. The borough sent 2 members to the Irish parliament; but it sends only 1 member to the imperial parliament. Constituency of the borough in 1841, 301; in 1851, 343. Pop. in 1831, 10,673; in 1841, 11,252; in 1851, 11,819. Since the arrival of the English in the 12th century, the inhabitants of W. have been principally composed of the descendants of Frisians, Anglo-Saxons, Anglo-Normans, and a few Welsh. Cromwell, soon after his sanguinary reduction of Drogheda and his immediately subsequent successes, marched toward W., which was hastily surrendered

by treachery, and became the scene of a horrible carnage. In 1798, the town fell under the power of the rebels, and while in their possession was the scene of a horrible massacre of Protestant prisoners.

WEXFORD, a county in the NW part of the southern peninsula of the state of Michigan, U. S., comprising an area of 576 sq. m., drained by the Manistie river and its branches.

WEXFORD-HARBOUR, an estuarial lagune in co. Wexford, communicating with the Irish sea by a mouth only 7 furl. wide, between Roslare point on the S. and Raven-point on the N; and elsewhere separated from the sea by two long and narrow peninsulas of sandhills, which appear to have been formed by the conflict of the tidal currents from without, and the fluvial currents from within. The distance from the mouth of the harbour direct to the town of Wexford is only $3\frac{1}{2}$ m.; but the distance from the extreme N to the extreme S is $6\frac{1}{2}$ m. Most of the expanse of this great lagune, except along a belt from Wexford to its mouth, swept by the fluvial and the tidal currents of the Slaney, is so very shallow as to be dry at low water. So high a bar stretches across the mouth of the harbour, that vessels of more than 200 tons burden cannot cross, even at high water of spring tides, without being lightened of part of their cargo.

WEXHAM, a parish in Bucks, $1\frac{1}{2}$ m. NE of the Slough station on the Great Western railway. Area 670 acres. Pop. in 1831, 181; in 1851, 201.

WEXIO, a laen of Sweden, bounded on the N by the laen of Jönköping; on the E by that of Kalmar; on the S by Carlscrona and Christianstad; and on the W by Helmstadt. It has an area of about 2,900 geog. sq. m., and formed part of the ancient division of Småland. Pop. in 1833, 111,500; in 1843, 129,186.—The capital, of the same name, is situated on the Södre, 210 m. SW of Stockholm. Pop. 1,844.

WEYBOURNE, a parish in Norfolk, $3\frac{3}{4}$ m. NE of Holt, near the coast of the North sea. Area 1,680 acres. Pop. in 1831, 273; in 1851, 301.

WEYBREAD, a parish in Suffolk, 2 m. SSW of Harleston, on the southern side of the river Waveney. Area 2,476 acres. Pop. in 1851, 745.

WEYBRIDGE, a parish in Surrey, 12 m. NE by N of Guildford, on the river Wey, a small affluent of the Thames. Area 1,292 acres. Pop. 1,225.

WEYDA, or **WEIDA**, a town of the grand-duchy of Saxe-Weimar, in the circle and 14 m. ENE of Neustadt, on a small river of the same name, an affluent of the Auma, by which it is divided into two parts, distinguished as the old and new town. Pop. 3,800. It has an hospital, and a school, and contains manufactories of cloth, coarse woollen fabrics, and sailcloth, shoes and pottery, and several paper-mills. On an adjacent height is the castle of Osterburg. Pop. of bail., 17,000.

WEYER, a department and commune of Belgium, in the prov. of Limburg, and arrond. of Hasselt. Pop. 453. It has a brewery.—Also a village of Bavaria, in the circle of Lower Franconia, and district of Sulzheim. Pop. 240.—Also a village of Nassau, in the bail. of Runkel. Pop. 768.—Also a village in the bail. of St. Goarshausen. Pop. 370.—Also a market-town of Austria, in the circle of the Traun, 20 m. SE of Stoyer, on the r. bank of the Enns. Pop. 1,350. It has extensive iron-works.—Also a village of Austria, in Styria, in the circle of Judenburg. Pop. 200.—Also a village of Prussia, in the regency of Aachen, and circle of Schleiden. Pop. 340.

WEYERIGG, a village of Austria, in the circle of Hansruck, on the Attersee. Pop. 310.

WEYERSBACH, a village of Oldenburg, in the circle of Birkenfeld. Pop. 240.

WEYERSHEIM, or **WIRSCHEN**, a commune of France, in the dep. of the Lower Rhine, and cant. of Brumath, 17 m. N of Strasburg. Pop. in 1846, 2,125. It has an oil-mill.

WEYERSWEIL, a village of Switzerland, in the cant. of Thurgau, and bail. of Weingelden. Pop. 316.

WEYHE, a village of Hanover, in the principality of Hoya, and bail. of Syke. Pop. 800.

WEYHILL, a parish in Hants, 3 m. W by N of Andover. Area, with Pen-Grafton, 1,888 acres. Pop. in 1831, 429; in 1851, 419. A great fair for sheep is held here on October 10th; and for horses, leather, hops, and cheese, on the five following days.

WEYLAND (CAFE), a headland of South Australia, in Eyre Land, on the N side of Anxious bay, in S lat. $33^{\circ} 14'$, and E long. $134^{\circ} 31' 45''$.

WEYMOUTH, a parliamentary borough and port in the county of Dorset, on a small bay in the English channel, at the mouth of the river Wey, 8 m. S by W of Dorchester, and 128 m. SW by W of London. Area of chapelry of Weymouth, 52 acres; of the p. of Melcombe-Regis, 1,548 acres. Pop. of Weymouth, in 1801, 1,267; in 1831, 2,529; in 1851, 2,957. Pop. of Melcombe-Regis, in 1801, 2,350; in 1831, 5,126; in 1851, 5,273. The two portions of this fashionable and celebrated watering-place,—namely, Weymouth and Melcombe-Regis,—are separated by the narrow mouth of the Wey, and connected by a handsome stone-bridge of two arches, with a swivel in the centre, to admit of the entrance and exit of the shipping. Weymouth stands on the SW, and Melcombe on the NE, side of the river; the former at the foot of a considerable eminence; the latter on a peninsula, the isthmus of which separates the waters of the bay from those of the river estuary within. The streets in Melcombe-Regis are chiefly disposed along the margin of the sea, near which are many elegant edifices, especially on the esplanade, one of the finest promenades in England, nearly a mile in length. Weymouth still retains a good deal of the character of the fishing town, in which the modern watering-place originated. The channel to the tidal harbour is about 14 ft. deep at high water; at the quays at each side the vessels lie aground at low water. The bay is well sheltered by the surrounding hills, and there is an excellent beach of uniform depth. As the distance between the English-channel and Bridgewater bay on the Bristol-channel does not at this point exceed 60 m., W. enjoys many of the advantages of an ocean climate, the seasons being temperate and equable. Weymouth with Melcombe returns 2 members to parliament, till the passing of the Reform act, the united borough returned 4 members. The number of electors registered for the borough, in 1837, was 629; in 1852, 679. Weymouth was a place of considerable trade at an early period; and its commerce with France, Spain, and Newfoundland sustained the maritime importance of the town. About the year 1763, it became resuscitated in the form of a watering-place; and since that period its trade has revived.

WEYMOUTH, a township and village of Norfolk co., in the state of Massachusetts, U. S., 11 m. SSE of Boston, watered by affluents of Boston harbour, and intersected by the South Shore railroad. Pop. in 1840, 3,738; in 1850, 5,369.

WEYMOUTH BAY, a bay of North-east Australia, between Cape Fair on the NW, and a headland of the same name, by which it is separated on the SE from Lloyd bay, in S lat. $12^{\circ} 35'$, and E long. $143^{\circ} 23'$. The bay is about 18 m. in length, and 5 in breadth.—Also a town on the N coast of

Tasmania, in the co. of Dorset, at the mouth of Piper's river.

WEYPERT, a town in Bohemia, in the regency of Eger, circle and 26 m. NE of Ellbogen. Pop. 3,400. It has mines of silver and cobalt, 2 paper-mills and manufactories of small arms.

WEYRA, a village of Saxe-Weimar, in the circle of Nenstadt. Pop. 730.

WEYRE, a town of Hindostan, in the prov. and 50 m. W of Agra, and principality of Bhurtpoor. It is enclosed by an earthen wall, flanked with bastions, and by a spacious ditch. It contains an old castle, and some other ancient buildings.

WEYROW, a village of Austria, in Bohemia, in the reg. of Pilsen, and bail. of Kralowitz. Pop. 270.

WEYSCHITZ, a village of Austria, in Bohemia, in the reg. of Pilsen, and bail. of Brzesnitz. Pop. 300.

WEYWANOWITZ, a village of Austria, in Bohemia, in the regency of Pardubitz, and bail. of Chrudim. Pop. 340.

WEZEREN, a department and commune of Belgium, prov. of Liege, and arrond. of Huy. Pop. 125.

WEZIKON, a district and village of Switzerland, in the cant. and 14 m. ESE of Zurich, and bail. of Hinwil. Pop. 3,364.

WEZ-VELVAIN, a department and prov. of Belgium, in the prov. of Hainault, and arrond. of Tournai. Pop. 942.

WHAAL. See **WAAL**.

WHADDON, a parish in Bucks, 5 m. S by E of Stony-Stratford. Area 3,730 acres. Pop. in 1851, 987.—Also a parish in Cambridge, $\frac{1}{4}$ m. N of Royston, intersected by the river Cam. Area 1,468 acres. Pop. in 1831, 339; in 1851, 340.—Also a parish in Gloucestershire, 3 m. SW of Gloucester. Area 727 acres. Pop. in 1831, 152; in 1851, 120.—Also a parish in Wilts, $\frac{1}{2}$ m. NE of Trowbridge, intersected by the river Avon, and the Kennet and Avon canal. Area 438 acres. Pop. in 1851, 44.

WHALAN, a creek of New South Wales, an affluent of the river Darling.

WHALE-HEAD, a headland of Tasmania, on the S coast, between South Cape and Recherche bays.

WHALE ISLANDS, a group off the coast of Greenland, in N lat. $68^{\circ} 59' 15''$, W long. $53^{\circ} 13' 0''$, on the S side of, and close to, Disco. They present bare masses of dark rock, with no vegetation save short grass, and coarse brown moss. A few Esquimaux inhabit the most verdant of the group, from whom the Danes collect oil and skins.

WHALEY, a joint-township with Yeardsley, in the p. of Taxall, co. palatine of Chester, $\frac{1}{4}$ m. SE of Stockport, in the line of the Peak-forest canal. Area 1,820 acres. Pop. in 1831, 408; in 1851, 693.

WHALLEY, a very extensive parish of Lancashire, containing the borough and market-town of Clitheroe; the market-towns of Burnley and Colney; the chapelries of Old Accrington, Altham, Bacup, Chatburn, Christ-church, Cliviger, Downham, Fence-in-Pendle, Goodshaw, Habergham, Holme, Marsden, Newchurch-in-Pendle, Newchurch-in-Rossendale, Padiham, Rawtenstall, and Worsthorn. Altogether this immense parish contains about 50 market-towns, chapelries, and townships; and is about 30 m. in length, and 15 m. in breadth, having an area of 104,689 acres; yet it is by no means so considerable in size as it formerly was, having anciently included those districts which are now the parishes of Blackburn, Chipping, Mitton, Ribchester, Rochdale, and Elaidburn. The rivers Ribble and Calder unite their waters near the W extremity of the parish, and it is intersected by the Liverpool and Leeds canal. Pop. of the entire parish in 1831, 97,869; in 1851, 134,196. Area of the township of W., 1,890 acres. Pop. in 1801, 876; in 1831, 1,151;

in 1801, 940. The village, 14 m. ENE of Preston, has an ancient church in the early English style of architecture. In the interior are 18 stalls of ancient workmanship, and some fine screen-work.

WHALTON, a parish in Northumberland, 6 m. SW by W of Morpeth, intersected by the rivers Blythe and Howburn, and containing the townships of Newham, Ocle or Ogle, Riplington, and W. Area 5,918 acres. Pop. in 1831, 548; in 1851, 461.

WHAMPOA, an island and town of China, on the canton river, and 10 m. SE of the town of Canton. The foreign shipping trading with Canton have their chief anchorage here, 19 m. above Tiger island.

WHAND, a village of Lower Sind, 30 m. NE of Omersote.

WHAPLODE, a parish in Lincolnshire, $\frac{1}{2}$ m. W of Holbeach. Area with Whaplode-Drave, 10,164 acres. Pop. in 1831, 1,993; in 1851, 2,564.

WHARFE, a river of Yorkshire, which rises in Langstrath dale; flows SE to near Ilkley, and then E to Wetherby, 13 m. above York, where it enters upon a plain of nearly a dead level, through which it flows SE to Tadcaster, and joins the Ouse, on the l. bank, 9 m. below York. It is navigable to Tadcaster.

WHARRAM-PERCY, a parish in the E. R. of Yorkshire, 8 m. SE of New Malton. Besides the township of W., it contains those of Raisthorpe-with-Birdall, Thixendale, and Towthorpe. Area 9,017 acres. Pop. in 1831, 330; in 1851, 685.

WHARRAM-LE-STREET, a parish and township in the E. R. of Yorkshire, $\frac{1}{2}$ m. SE by E of New-Malton. Area 2,024 acres. Pop. 131.

WHARTLEE, a mountain of Hindostan, 7 m. NE of Kotegur, in N lat. $31^{\circ} 5'$, and E long. $77^{\circ} 29'$. It has an alt. of 10,673 ft. above sea-level, and is wooded to the summit.

WHARTON, a county in the SE part of the state of Texas, U. S., comprising an area of 1,256 sq. m., drained by Colorado river and by branches of the San Bernardo, and is generally level. Pop. in 1850, 1,242. Its chief town, which bears the same name, is on the NE of the Colorado, 117 m. SE by E of Austin city.—Also a township of Fayette co., in the state of Pennsylvania, 11 m. SE of Union Town, bounded on the E and N by the Goughiogheay river, and watered by its branches. Pop. in 1840, 1,325.—Also a township of Potter co., in the same state, 179 m. WSW of Harrisburg, watered by a branch of Sandy creek. Pop. 171.

WHARTON, or **WINSFORD**, a township in the p. of Davenham, co. palatine of Chester, $\frac{1}{4}$ m. WNW of Middlewich, in the line of the Grand Junction railway, the Middlewich canals, and the river Weaver. Area 1,224 acres. Pop. in 1851, 1,775.

WHASHTON, a township in the p. of Kirkby-Ravensworth, Yorkshire, 4 m. W of Richmond. Area 1,195 acres. Pop. in 1831, 159; in 1851, 104.

WHATCOTE, a parish in Warwickshire, $\frac{1}{4}$ m. NE of Shipton-on-Stour. Area 1,400 acres. Pop. in 1831, 219; in 1851, 177.

WHATELEY, a township of Franklin co., in the state of Massachusetts, U. S., 80 m. W of Boston, bounded on the E by the Connecticut, and intersected by the Connecticut River railroad. Pop. 1,101.

WHATFIELD, or **WHRATFIELD**, a parish in Suffolk, $\frac{1}{2}$ m. SE of Bilestone. Area 1,570 acres. Pop. in 1831, 377; in 1851, 380.

WHATLEY, a parish in Somerset, $\frac{1}{2}$ m. W by S of Frome. Area 1,259 acres. Pop. in 1851, 361.

WHATLINGTON, a parish in Sussex, 2 m. N by E of Battle. Area 1,255 acres. Pop. in 1851, 438.

WHATTON (Loxe), a parish in Leicestershire, $\frac{1}{4}$ m. NW by W of Loughborough. Area 2,050 acres. Pop. in 1831, 855; in 1851, 838.

WHATTON-UPON-SMITE, a parish in Notts, 3 m. E of Bingham, containing the chapelry of Aslacton. Area 3,100 acres. Pop. in 1851, 764.

WHEATACRE-ALL-SAINTS, a parish in Norfolk, 4½ m. NE by E of Beccles, between the river Waveney and the Lowestoft navigation. Area 1,163 acres. Pop. in 1831, 186; in 1851, 180.

WHEATENHURST, or **WHITMINSTER**, a parish in Gloucestershire, 8 m. NW by W of Stroud, on the S bank of the river Severn, and intersected by the Gloucester and Berkeley and the Thames and Severn canals. Area 1,247 acres. Pop. 380.

WHEATFIELD, a parish in Oxfordshire, 2 m. S of Tetworth. Area 778 acres. Pop. 85.

WHEATFIELD, a township of Niagara co., in the state of New York, U. S., 12 m. W of Lockport, bounded on the W by the Niagara, and drained by Tonawanda creek. Pop. in 1840, 1,057.—Also a township of Perry co., in Pennsylvania. Pop. 617.

WHEATHAMPSTEAD, a parish in Hertfordshire, 4½ m. WSW of Welwyn, intersected by the river Lea. Area 5,033 acres. Pop. in 1851, 1,908.

WHEATHILL, a parish in Salop, 9½ m. NE by E of Ludlow. Area 1,415 acres. Pop. in 1831, 123. in 1851, 143.—Also a parish in Somerset, 4 m. W by S of Castle Cary. Area 314 acres. Pop. 36.

WHEATLAND, a township of Monroe co., in the state of New York, U. S., 214 m. W by N of Albany, drained by Allen's creek. Pop. in 1840, 2,871; in 1850, 2,917.—Also a township of Kennebec co., in the state of Wisconsin, 71 m. SE by E of Madison. Pop. in 1850, 1,193.—Also a township of Hillsdale co., in the state of Michigan, 88 m. SW of Detroit. Pop. in 1840, 164.

WHEATLEY, a chapelry in the p. of Cuddesden, Oxfordshire, 5½ m. E by S of Oxford. Area 970 acres. Pop. in 1831, 976; in 1851, 1,037.

WHEATLEY (North), a parish in Notts, 5½ m. NE of East Retford. Area 2,181 acres. Pop. 427.

WHEATLEY (South), a parish in Notts, 5½ m. NE by E of East Retford. Area 641 acres. Pop. in 1831, 35; in 1851, 34.

WHEATON-ASTON, a chapelry in the p. of Lapsley, Staffordshire, 5½ m. W by S of Penkridge, in the line of the Birmingham and Liverpool Junction canal. Pop. in 1801, 563; in 1851, 711.

WHEELER, a township of Steuben co., in the state of New York, U. S., 187 m. W of Albany. It has a hilly surface, drained by Five Mile creek, and by the branches of Conhocton river. Pop. 1,471.

WHEELERSBURG, a village of Scioto co., in the state of Ohio, U. S., on the Ohio, 56 m. S by E of Columbus. Pop. in 1840, 200; in 1850, 300.

WHEELING, a city, port of entry, and capital of Ohio co., in the state of Virginia, U. S., 247 m. NW of Richmond, in N lat. 40° 7', and W long. 80° 42'. Pop. in 1810, 914; in 1820, 1,567; in 1830, 5,221; in 1840, 7,885; in 1850, 11,391. It is finely situated on the E bank of the Ohio, at the confluence of the Wheeling creek, which is here crossed by a fine bridge, and at the terminus of the Baltimore and Ohio railroad. A suspension bridge of great dimensions also crosses the Ohio.—Also a township of Belmont co., in the same state, drained by Indian Wheeling creek. Pop. in 1840, 1,389.—Also a township of Guernsey co. Pop. 909.

WHELOCK, a township of Caledonia co., in the state of Vermont, U. S., 29 m. NE of Montpelier, drained by branches of Patuxet river. Pop. 885.

WHELOCK, a township in the p. of Sandbach, co.-palatine of Chester, 1½ m. SSW of Sandbach, in the line of the Grand Trunk canal, and the Manchester and Birmingham railway. A small river of the same name passes through the p., and falls into the Dane below Middlewich. On both sides of this

river, at the distance of about 60 yds. from the bed, large quantities of salt are procured from the brine which is found upon digging to the proper depth. Area 666 acres. Pop. in 1831, 440; in 1851, 548.

WHEEL PONDS, a group of ponds in New South Wales, in the district of Liverpool plains. They discharge themselves into the Gwyder.

WHEELTON, a township in the p. of Leyland, co.-palatine of Lancaster, 4 m. NE of Chorley. Area 1,669 acres. Pop. in 1831, 1,519; in 1851, 1,041.

WHELDRAKE, a parish containing the township of Langwith, partly in the E. R. of Yorkshire, 7½ m. SE of York. Area 4,921 acres. Pop. 722.

WHENBY, a parish in the N. R. of Yorkshire, 8 m. E of Easingwold. Area 1,010 acres. Pop. 128.

WHEPSTEAD, a parish in Suffolk, 4½ m. SSW of Bury-St.-Edmunds. Area 2,670 acres. Pop. 652.

WHERRY, or **FERRANE**, a parish in King's co., containing the greater part of the town of FERRANE: which see. Area 18,556 acres. Pop. in 1841, 3,841.

WHERSTEAD, a parish in Suffolk, 3 m. S by W of Ipswich. Area 2,154 acres. Pop. 238.

WHIERWELL, a parish in Hants, 3½ m. SSE of Andover, intersected by the rivers Ande and Test. Area, with Westover and Fallerton and the chapelry of Bullington, 3,546 acres. Pop. in 1851, 632.

WHESSAL, or **WHESSOE**, a township in the p. of Houghton-le-Skerne, co.-palatine of Durham, 2½ m. NW by W of Darlington, and in the line of the Great North of England, and the Stockton and Darlington railways. Area 1,412 acres. Pop. in 1851, 110.

WHETSTONE, a parish in the co. of Leicester, on the SE bank of the river Soar, 2 m. distant from the Wigston station. Area 1,680 acres. Pop. in 1831, 903; in 1851, 986.

WHICHAM, or **WHITEHAM**, a parish in Cumberland, 10 m. SSE of Ravenglass. Area 7,502 acres. Pop. in 1831, 285; in 1851, 329.

WHICHBURY, a parish in Wilts, and partly in Hants, 8½ m. N by W of Fordingbridge. Area 1,850 acres. Pop. in 1831, 183; in 1851, 170.

WHICHFORD, a parish in Warwickshire, 6 m. SE of Shipston-on-Stour, containing the hamlets of Ascot and Stourton, or Stowerton. Area 3,100 acres. Pop. in 1831, 638; in 1851, 744.

WHICKHAM, a parish in the co.-palatine of Durham, 3 m. WSW of Gateshead, containing the townships of Fellside, Lowside, Swalwell, and W. Area 3,963 acres. Pop. in 1851, 5,565.

WHIDBEY, an island near the coast of New Georgia, in the SE part of the gulf of Georgia, and to the N of the entrance of Admiralty gulf, in N lat. 48° 7', and W long. 122° 20'.

WHIDBEY, or **LA PLACE POINT**, a headland of South Australia, in Eyre Land, in the co. of Flinders, at the E side of Avoid bay.—Also a group of islands near the entrance of Avoid bay, and to the SSW of Whidbey Point, in S lat. 34° 40', and E long. 135° 15'.

WHIDDY, an island near the head of Bantry bay, co. Cork, Munster. It extends SW, and lies at the distance of from a ½ m. to 1½ m. of the SE coast. Its length is 2½ m.; and its extreme breadth is a little upwards of 1 m.

WHILTON, a parish in Northamptonshire, 5 m. ENE of Daventry, intersected by the London and Birmingham railway, and the Grand Junction canal. Area 1,270 acres. Pop. in 1831, 397; in 1851, 357.

WHIMPLE, a parish in Devon, 4½ m. WNW of Ottery St. Mary. Area 3,019 acres. Pop. 704.

WHINBURGH, or **WHINBERGH**, a parish in Norfolk, 3½ m. SSE of East Dereham. Area 1,241 acres. Pop. in 1831, 219; in 1851, 262.

WHINFELL, a township in the p. of Kirkby-in-

Kendal, Westmoreland, $6\frac{1}{2}$ m. NE by N of Kendal. Pop. in 1831, 214; in 1851, 181.

WHIPPINGHAM, a parish in the Isle of Wight, $3\frac{1}{2}$ m. N by E of Newport. Area 5,208 acres. The hamlet of East Cowes, separated from West Cowes by the river Medina, is within the parish; also the smaller hamlets of Burton, Coombly, and Fairlee. Pop. in 1831, 2,229; in 1851, 3,100.

WHIPPSNADE, a parish in Bedfordshire, 3 m. S by W of Dunstable. Area 1,205 acres. Pop. 183.

WHISSENDINE, a parish in Rutlandshire, $4\frac{1}{2}$ m. NW by N of Oakham. Area 3,870 acres. Pop. in 1831, 800; in 1851, 795.

WHISSONSETT, a parish in Norfolk, 5 m. S of Fakenham. Area 1,344 acres. Pop. in 1851, 666.

WHISTON, a township in the p. of Prescott, co-palatine of Lancaster, 1 m. S of Prescott, in the line of the Liverpool and Manchester railway. Area 1,793 acres. Pop. in 1831, 1,468; in 1851, 1,825.—Also a parish in Northamptonshire, $6\frac{1}{2}$ m. E by S of Northampton. Area 809 acres. Pop. in 1831, 64; in 1851, 69.—Also a township in the p. of Kingsley, Staffordshire, $3\frac{1}{2}$ m. NE of Cheadle. Pop. in 1831, 549; in 1851, 675.—Also a parish in the W. R. of Yorkshire, $2\frac{1}{2}$ m. SE of Rotherham. Area 3,190 acres. Pop. in 1831, 927; in 1851, 1,050.

WHITACRE (NETHER), a parish in Warwickshire, $8\frac{1}{2}$ m. NE of Coleshill, on both sides of the river Tame. Area 2,210 acres. Pop. in 1851, 517.

WHITACRE (OVER), a parish in Warwickshire, $8\frac{1}{2}$ m. ENE of Coleshill. Area 1,875 acres. Pop. in 1831, 288; in 1851, 316.

WHITBECK, or WHITEBECK, a parish in Cumberland, $8\frac{1}{2}$ m. SSE of Ravenglass, near the foot of Black-Comb hill. Area 5,372 acres. Pop. in 1831, 234; in 1851, 217. The sea has gained on the land in many places in this parish, and old roads and hedges have been visible a considerable way beyond water-mark.

WHITBOURNE, a parish in Herefordshire, 5 m. E by N of Bromyard. Area 3,056 acres. Pop. in 1831, 899; in 1851, 826.

WHITBURN, a parish and village in the co-palatine of Durham, $3\frac{1}{2}$ m. N of Sunderland, on the sea-coast, containing the township of Cleodon. Area 4,594 acres. Pop. in 1831, 1,001; in 1851, 1,203. The village is frequented as a sea-bathing place, and many lodgings have been erected for the accommodation of visitors.

WHITBURN, a parish and village in the SW of Linlithgowshire. Area 18 sq. m. Pop. in 1831, 2,075; in 1851, 3,792. The village is 21 m. WSW of Edinburgh, with a station on the Edinburgh and Glasgow railway.

WHITBY, a sea-port and parliamentary borough in the N. R. of the county of York, on the coast of the North-sea, at the mouth of the river Esk, in N lat. $54^{\circ} 29' 42''$, W long. $0^{\circ} 36' 45''$, 22 m. NNW of Scarborough, and 246 m. N of London. Besides the town of W., the parish comprises the chapelry of Eakdaleside, part of the township of Aislaby, and the townships of Hawsker-with-Stainsacre, Newholme-with-Dunsley, Ruswarp, and Ugglebarnby. Area 15,918 acres. Pop. in 1801, 10,974; in 1831, 11,725; in 1851, 12,875. The appearance of the town is that of a substantial and wealthy sea-port town. A part of it is situated on the E bank of the river Esk; but the larger and better built portion has been erected on the western. The two parts are connected by a bridge, the middle of which is moveable, for the purpose of allowing ships to pass through. The town contains many excellent houses; but there are few public buildings worthy of notice. The port of W. must have been of considerable consequence at the period of the Conquest. The discovery

of an alum mine at the close of Elizabeth's reign, was the original cause that raised Whitby from its obscurity, and, by opening a channel for commerce, enabled the town to attain a degree of maritime consequence. The trade of the port was so greatly increased by the improvements in the harbour about the beginning of last century, that, in 1734, no fewer than 180 vessels, of 80 tons burden, belonged to W., and in that year three spacious dry docks were constructed on the E side of the Eake. In 1850, 625 sailing vessels = 27,256 tons, and 47 steam-vessels = 2,115 tons entered this port coastwise; 3 = 881 tons entered from the colonies; and 22 sailing vessels = 2,400 tons, and 6 foreign vessels = 386 tons, entered from foreign ports. There are here bonded warehouses for all foreign goods, except East India goods and tobacco, unless brought coastwise for home use and ship stores. The exports to foreign parts consist principally of alum, whale-oil, and dried fish. The imports are chiefly articles of Baltic produce, comprehending timber, deals, hemp, flax, and ashes. The coasting trade is also considerable, and the shipments made hence to other parts of England consist principally of freestone from the quarries at Aislaby, alum, sail-cloth, butter, bacon, grain, and leather. The town now returns a member to parliament. Electors in 1837, 484; in 1852, 454.

WHITBY, a town of Upper Canada, on the N shore of Lake Superior, 28 m. E of Toronto. Pop. 1,700. It has a good harbour, and conducts a large lumber trade.

WHITCHURCH, a parish and village of Bucks, $4\frac{1}{2}$ m. N by W of Aylesbury. Area 1,586 acres. Pop. in 1831, 928; in 1851, 915.—Also a parish in Devon, $1\frac{1}{2}$ m. SE of Tavistock. Area 5,079 acres. Pop. in 1831, 791; in 1851, 1,156.—Also a parish in Glamorganshire, 4 m. NW of Cardiff, in the line of the Taffvale railway, near the Taff and the Merthyr canal. Area 3,192 acres. Pop. in 1831, 1,184; in 1851, 1,661.—Also a parish in Oxfordshire, $6\frac{1}{2}$ m. NW of Reading, on the river Thames, and in the line of the Great Western railway. Area 2,070 acres. Pop. in 1831, 745; in 1851, 893.—Also a parish and town in Hants, 12 m. N by E of Winchester, on the river Teste, a noted troutling stream. Besides the village, the parish comprises the tythings of Charlecot, Cold Henley, and Freefolk with Freefolk-Prior. Area 6,142 acres. Pop. in 1831, 1,674; in 1851, 1,911. The town consists of one street only, but of late years it has been much improved. The inhabitants are chiefly employed in the manufacture of shalloons and serges, and in a large paper-mill at which most of the paper used for the Bank of England notes has been made. Before the passing of the reform act W. returned 2 members to parliament. Under the provisions of the reform act it has been disfranchised.—Also a parish in Warwickshire, $5\frac{1}{2}$ m. SSE of Stratford-on-Avon, near the Moreton and Stratford railway, comprising the hamlets of Broughton, Crimscoot, and Wimpstone. Area 1,942 acres. Pop. in 1831, 261; in 1851, 257.

WHITCHURCH, or EOLWRE-WEN, a parish in Pembrokeshire, 8 m. SE of Cardigan. Area 3,138 acres. Pop. in 1831, 377; in 1851, 1,252.

WHITCHURCH, or TRE-CROWE, a parish in Pembrokeshire, $12\frac{1}{2}$ m. WNW of Haverford-West, near St. David's, on the shore of St. Bride's bay. Area 3,138 acres. Pop. in 1831, 1,028; in 1851, 1,253.

WHITCHURCH, or BLANCHEMINSTER, a market-town and parish partly in Salop, and partly in the co-palatine of Chester, 20 m. N by E of Shrewsbury. Part of the p. which is in Chester contains only part of the township of Wirswall; the other portion includes the townships of Alkington, Great

Ash, Little Ash, Black Park, Broughall, Dodington, Edgeby, Hinton, and Hollyhurst with Chinnal, the chapelry of Tilstock, the town of W., and part of Wirwall. Area 14,445 acres. Pop. in 1801, 4,618; in 1831, 5,902; in 1851, 5,976. The town is well-built, and stands on a gentle eminence with many fine points of view in the vicinity. Its trade is principally in grain and malt.

WHITCHURCH, or **FALTON**, a parish in Somersetshire, 3 m. N of Pensworth, 2 m. SW of the Great Western railway. Area 2,194 acres. Pop. 428.

WHITCHURCH-CANONICORUM, a parish and town of Dorset, 5 m. WNW of Bridport, containing Abbotsworton, Barn, Vale, and Wild-Quarters. Area 6,113 acres. Pop. in 1851, 1,532.

WHITCOMBE, a parish in Dorset, 2½ m. SE of Dorchester. Area 540 acres. Pop. in 1851, 61.

WHITCOMBE-MAGNA, a parish in Gloucestershire, 3½ m. NE by N of Painswick. Area 918 acres. Pop. in 1831, 174; in 1851, 167.

WHITE, a creek of New South Wales, in Camden co., 82 m. from Sydney.

WHITE, a central co. of the state of Indiana, U. S., comprising an area of 504 sq. m., drained by Tippecanoe river and its tributaries, and intersected by the New Albany and Salem extension railway. Pop. in 1840, 1,832; in 1850, 4,761. Its cap. is Monticello.—Also a central county of the state of Tennessee, comprising an area of 846 sq. m., drained by Caney Fork of Cumberland river, and its affluents, and intersected by the Lexington and Mack-minville railway. Pop. in 1840, 10,747; in 1850, 11,444. Its cap. is Sparta.—Also a county in the SE part of the state of Illinois, comprising an area of 4,809 m., drained by Little Wabash and Skillet Fork. Pop. in 1840, 7,919; in 1850, 8,925. Its cap. is Carnie.—Also a central county of the state of Arkansas, comprising an area of 1,043 sq. m., bordered on the E by White river, and intersected by Red river, one of its affluents. Pop. in 1840, 929; in 1850, 2,619. Its cap. is Searcy.—Also a township of Cambria co., in the state of Pennsylvania. Pop. 438.—Also a township of Carroll co., in the state of Arkansas. Pop. 222.—Also a range of mountains in the state of New Hampshire. This range, the highest in New England, and among the highest in the United States, is 26 m. in length from N to S, and 22 m. in breadth. Their highest summits, the principal of which, Mount Washington, is 6,226 ft. above sea-level, are covered with snow during a great part of the year, and are visible at the distance sea-ward of upwards of 50 m.—Also a river of the state of Vermont, which has its source in Hancock township, Addison co., and after a course of 55 m. joins the Connecticut in Hartford township.—Also a river of the state of Indiana, which has its source in Johnson co., and, after a course of 225 m., joins the Wabash.—Also a river of the state of Arkansas, which has its source in the Black mountains, and after a winding course of 1,000 m., joins the Mississippi in Desha co.—Also a river which has its source in Newago co., flows SW through Oceana co., and falls into Lake Michigan.—Also a river of Utah territory, and forming one of the chief head-streams of the Colorado.

WHITECHAPEL. See **LONDON**.

WHITCHURCH, a parish in co. Cork, 5½ m. NNW of the city. Pop. in 1831, 2,856; in 1841, 3,368.—Also a parish in co. Dublin, 1½ m. S of Rathfarnham, containing the villages of Ballyboden and Edmonstown. Pop. in 1831, 1,705; in 1841, 1,375.—Also a parish in co. Kildare, 2½ m. N of Kill. Area 3,165 acres. Pop. in 1831, 279; in 1841, 320.—Also a parish in co. Kilkenny, 2 m. NW of Pilltown. Area 2,186 acres. Pop. in 1831, 778; in

1841, 837.—Also a parish in co. Tipperary, 3 m. SW of Cahir. Area 3,921 acres. Pop. in 1831, 1,218; in 1841, 1,274.—Also a parish in co. Waterford, 4½ m. NNW of Dungarvan. Area 9,951 acres. Pop. in 1831, 8,176; in 1841, 8,403.—Also a parish in co. Wexford, 4½ m. S by W of New Ross. Area 5,342 acres. Pop. in 1831, 1,328; in 1841, 1,384.

WHITECHURCH-GLYNN, a parish of co. Wexford, 2½ m. N by E of Tagmon. Area 7,187 acres. Pop. in 1831, 1,738; in 1841, 1,960.

WHITE-CREEK, a township of Washington co., in the state of New York, U. S., 30 m. NE of Albany, drained by Owl and Little White creeks. Pop. in 1840, 2,195; in 1850, 2,994.

WHITE-DEER, a township of Union co., in the state of Pennsylvania, U. S., bounded on the N by White Deer mountain, and drained by White Deer creek, an affluent of the Susquehanna. Pop. 1,252.

WHITE-EYES, a township of Coshooton co., in the state of Ohio, U. S., drained by affluents of the Tuscarawas. Pop. 997.

WHITEFIELD, a township of Lincoln co., in the state of Maine, U. S., 14 m. N of Wiscasset, drained by Sheepscot river. Pop. in 1840, 2,150; in 1850, 2,160.—Also a township of Coos co., in the state of New Hampshire, 9 m. S of Lancaster, drained by John's river. Pop. in 1840, 751; in 1850, 857.

WHITEFIELD, a township in the p. of Deerhurst, Gloucestershire, 4 m. SSW of Tewkesbury. Pop., with Apperley, in 1851, 548.

WHITEFORD, or **WHITFORD**, a parish in Flintshire, 4 m. NW of Holywell, near the estuary of the river Dee, including the townships of Bychton, Eden-Owain-Merton, Is-Glan, Merton-Uwch-Glan, Mostyn-Tre-Lan, Tre'r-Abbot, and W. Area 13,065 acres. Pop. in 1831, 3,333; in 1851, 3,884. This parish abounds with lead, zinc, and copper ore, coal, calamine, cherts, and limestone, all which are wrought to a considerable extent.

WHITEGATE, or **NEW CHURCH**, a parish in the co. palatine of Chester, 8½ m. SW by S of Northwich, on the river Weaver, which partly intersects the parish, and in the line of the Grand Junction railway. It comprises the townships of Darnhall and Marton. Area 4,384 acres. Pop. 1,529.

WHITEGATE, a fishing-village in the p. of Aghada, co. Cork, on the E side of Cork harbour, 2 m. N of Roche's Point. Pop. in 1841, 1,129.

WHITE-HALE, a township of Washington co., in the state of New York, U. S., 58 m. NNE of Albany, drained by Pawlet and Poultney rivers and Wood creek, affluents of Lake Champlain, and intersected by the Saratoga and Washington railroad. Pop. in 1840, 3,813; in 1850, 4,726. It contains a village of the same name with 3,000 inhabitants.—Also a village of Baltimore co., in the state of Maryland, on the Baltimore and Susquehanna railroad, 26 m. N of Baltimore.

WHITEHAVEN, a port and parliamentary borough, in the p. of St. Bees, Cumberland, 40 m. SW of Carlisle, and 13 m. S by W of Maryport. Pop. of the township in 1831, 11,393; in 1851, 14,190. The creek, at the mouth of the Poebek, on which W. is built, is so deeply seated that the adjacent lands overlook it on every side. The town itself is one of the most handsome in the northern counties; the streets being regular and spacious, and crossing each other at right angles. The castle, the seat of Viscount Lowther, at the SE end of the town, is a large quadrangular building. The harbour is formed by the mouth of the Poebek, and has been protected by piers of stone, bending across from each side, with lighthouses on each. In the interior of the harbour are three piers running outwards in parallel lines from the town, and

others connected with the exterior protecting piers. A narrow vale extending to the village of St. Bees, supposed to have been formerly occupied by the sea, might be cut through and made navigable for large vessels at a moderate expense. The harbour is capable of sheltering several hundred sail of vessels. The trade of this port chiefly consists in the exportation of coal, lime, iron, freestone, gypsum, and grain; and in the importation of West Indian, American, and Baltic produce; and of flax and linen from Ireland, and pig-iron from Wales. The jurisdiction of the port extends from Maryport northwards to the river Duddon, including the intermediate ports of Millern, Harrington, Ravenglass, and Workington. The shipping belonging to W., in 1828, amounted to 195 vessels = 30,960 tons; besides a number of small vessels entirely engaged in the coasting trade. In 1851, the entries of sailing vessels were 897 = 50,564; and of steamers, 191 = 56,365 tons. Steamers sail weekly between this port and Liverpool, and occasionally to Dublin, the isle of Man, and Dumfries. Extensive collieries are in the immediate vicinity of the town, and, indeed, under its very streets and harbour. Some of these collieries are worked to the extent of 2 m. under the sea. They are excavations which have in their structure a considerable resemblance to the gypsum quarries of Paris; and are of such a magnitude and extent, that, in one of them alone, a sum exceeding £500,000 was, in the course of a century, expended by the proprietors. Their principal entrance is by an opening at the bottom of a hill, through a long passage hewn in the rock, leading to the lowest vein of coal. The greater part of this descent is through spacious galleries, which continually intersect other galleries, all the coal being cut away, with the exception of large pillars, which, where the mine runs to a considerable depth, are 9 ft. in height, and about 36 ft. square at the base. The mines are sunk to the depth of 130 fath. There are three strata of coal, which lie at a considerable distance, one above the other, and are made to communicate by pits; but the vein is not always continued in the same regularly inclined plane, the miners frequently meeting with hard rock, by which their further progress is interrupted. W. was enfranchised by the reform act, and now returns one member to parliament. The borough boundaries include the whole town and suburbs, and a considerable circuit of ground in the immediate vicinity of the town. The number of electors for the borough, in 1837, was 463; in 1852, 512.

WHITEHAVEN, a port of Nova Scotia, in N lat. 45° 10', W long. 61° 10'. It has a splendid and convenient port, as capacious as Halifax harbour, and as safe and commodious, and its approaches are safe and under any circumstances easily attainable from open sea. The haven finishes to the N at Pleasant river, which is navigable for 2 m. by vessels of any burden, and for small craft 2 m. further to its head, which is only 4 m. from the high road from Guysboro' and the port of Canso. Whitehaven-island, the outer point to seaward of the haven, is 140 ft. high, and may be considered as the NE extremity of Nova Scotia, and the nearest available point of the American continent to the British islands, although itself isolated. The Acadian settlement of Molasses-harbour is separated to the W by a very narrow isthmus of mere beach from the western part of the haven; besides which there are not now more than 8 or 10 establishments around W. The shores of this port are said to offer no impediments to railroad termini wherever convenient, and the vicinity is practicable for rail communications.

WHITEHILLS, a fishing-village in the p. of

Boindie, Banffshire, 2½ m. WNW of Banff. Pop. about 600.

WHITEHORSE, a fishing-harbour in the p. of Durrus, co. Cork, on the SE side of Bantry bay, 4½ m. SW of the town of Bantry.

WHITEHOUSE, a manufacturing locality, and a group of three villages, in the p. of Carrmonee, co. Antrim, on the NW side of Belfast-lough, 3½ m. N by E of Belfast. Pop. of the village of Whitehouse-abbey in 1831, 391; in 1841, 650. Pop. of the v. of Lower Whitehouse in 1841, 256.

WHITEHOUSE, a village of Hunterdown co., in the state of New Jersey, U. S., on the E side of Rockaway creek, 26 m. N of Trenton, on the New Jersey Central railroad.

WHITE-ISLAND, an island in the Scilly group, situated about 2½ m. W of St. Mary's. Its area is about 50 acres.

WHITEKIRK, a parish on the coast of Haddingtonshire. Area about 6,000 acres. About 300 acres at the mouth of the Tyne are sandy marsh. Pop. in 1831, 1,109; in 1851, 1,131. The present p. comprehends the ancient parishes of Tyninghame, Aldham, and Hamer or Whitekirk.

WHITE-LADY-ASTON, or **ASTON-ERISCOMB**, a parish in Worcestershire, 4 m. SE of Worcester. Area 1,230 acres. Pop. in 1831, 381; in 1851, 356.

WHITELETS, a village in the parish of St. Quivox, 1½ m. NE of Ayr.

WHITELEY, a township of Greene co., in the state of Pennsylvania, U. S., 168 m. W by S of Harrisburg, drained by Whiteley creek, an affluent of Monongahela river. Pop. in 1850, 2,500.

WHITE-MARSH, a township of Montgomery co., in the state of Pennsylvania, U. S., 85 m. E of Harrisburg, drained by Wissahickon creek. Pop. in 1840, 2,079; in 1850, 2,400.

WHITE-MOUNTAIN, one of the eastern summits of the Blackstairs mountains, in co. Wexford, 3 m. NE of the junction-point of the counties of Wexford, Carlow, and Kilkenny. It has an alt. of 1,259 ft. above the level of the sea.—Also one of the Sperrin mountains, in co. Londonderry, overhanging the SW side of the pass of Glenshane, confronted by Carntopher on the opposite side of the pass. Its summit has an alt. of 1,996 ft. above the level of the sea.

WHITE-MOUNTAINS. See **ALLEGHANY**.

WHITE-OAK, a township of Ingham co., in the state of Michigan, U. S., 522 m. SE by E of Lansing. Pop. in 1840, 270; in 1850, 508.

WHITEPARISH, a parish in Wilts, 8 m. SE by E of Salisbury. Area 6,284 acres. Pop. with Earldoms, in 1831, 1,254; in 1851, 1,391.

WHITE-PIGEON, a township of St. Joseph's co., in the state of Michigan, U. S., 80 m. SW by S of Lansing, drained by Pigeon and Fawn rivers branches of St. Joseph river, and intersected by the Michigan Southern railway. Pop. in 1850, 794.

WHITE-PLAINS, a township of Westchester co., in the state of New York, U. S., 116 m. S of Albany, bounded on the W by Broad river, and on the E by Mamaroneck creek, and intersected by the Harlem railroad. Pop. in 1840, 1,087; in 1850, 1,414.

WHITEPOINT, a village in the p. of Clonmel, co. Cork, situated on Great Island, in the vicinity of Cove. Pop. in 1841, 401.

WHITE-RIVER, a township of Izard co., in the state of Arkansas, U. S. Pop. in 1840, 551.—Also a township of Independence co., in the same state. Pop. 556.—Also a township of Marion co., in the same state. Pop. 389.—Also a township of Randolph co., in the state of Indiana. Pop. 2,227.

WHITE-RIVER, a village of Windsor co., in the

state of Vermont, U. S., on the W side of the Connecticut, at the confluence of White river and at the junction of the Vermont Central, the Connecticut, and Passumpsic, and the Northern railways.—Also a village of Windsor co., in the state of Vermont, U. S., on White river, and on the Vermont Central railroad, 1 m. from White River junction.

WHITESBORO, a village of Oneida co., in the state of New York, U. S., on the SW bank of Mohawk river, 8 m. WNW of Albany, and intersected by the New York Central railroad. Pop. about 2,000.

WHITESIDES, a county in the NW part of the state of Illinois, U. S., comprising an area of 729 sq. m., intersected by rock river, and by the Chicago, Albany, and Camanche railroad. Pop. 5,361.

WHITE-STANTON, or WHIT-STANTON, a parish in Somersetshire, $\frac{3}{4}$ m. NNW of Chard. Area 1,960 acres. Pop. in 1831, 318; in 1851, 261.

WHITESTONE, or WHIRSTON, a parish in Devon, $\frac{3}{4}$ m. WNW of Exeter. Area 4,077 acres. Pop. in 1831, 643; in 1851, 624.

WHITESTOWN, a township and semi-capital of Oneida co., in the state of New York, U. S., 88 m. WNW of Albany, bounded on the NE by Mohawk river, and drained by Jadagnada and Oriskany creeks, and intersected by the Erie canal, and by the Central railroad. Pop. in 1850, 6,810.

WHITESTOWN, a village in the p. of Carlingford co. Louth, 1 m. WSW of Bellagun, $\frac{3}{4}$ m. SE of Carlingford. Pop. in 1831, 370; in 1841, 334.

WHITE SULPHUR SPRINGS, a village of Greenbrier co., in the state of Virginia, U. S., on a branch of Greenbrier river, 156 m. W by N of Richmond, and on the Covington and Ohio railroad.

WHITESVILLE, a village of Columbus co., in the State of North Carolina, U. S., on the W side of Whitemarsh creek, on the Wilmington and Manchester railroad. Pop. in 1850, 350.

WHITEWATER, a township of Hamilton co., in the state of Ohio, U. S., 102 m. SW by W of Columbus, drained by Whitewater river. Pop. in 1840, 1,883; in 1850, 1,567.—Also a township of Walworth co., in the state of Wisconsin, 39 m. SE by E of Madison, watered by tributaries of Rock river, and intersected by the Milwaukee and Mississippi railroad. Pop. in 1850, 1,252.—Also a river of the state of Indiana, which is formed at Brookville, Franklin co., by the confluence of the E and W forks, and thence flows SE and S to Miami river, 6 m. above its mouth.—Also a river which has its source in Cape Guardian co., in the state of Missouri, by the junction of several streams, and flows nearly parallel with the Mississippi to St. Francis bay, Mississippi co., in the state of Arkansas.

WHITEWELL, or WHITEWELL-IN-BOWLAND, a chapelry in the p. of Whalley, W. R. of Yorkshire, 7 m. NW by W of Clitheroe.

WHITFIELD, a township of Indiana co., in the state of Pennsylvania, U. S. Pop. in 1840, 1,664.

WHITFIELD, a township in the p. of Glossop, Derby, $\frac{3}{4}$ m. N by W of Chapel-en-le-Frith. Pop. in 1831, 1,734; in 1851, 4,776, an increase attributed to the great extension of the cotton manufacture in this township.

WHITFIELD, anciently BEAUXFIELD, a parish in Kent, $\frac{3}{4}$ m. NNW of Dover. Area 893 acres. Pop. in 1851, 210.—Also a parish in Northamptonshire, 2 m. NE by N of Brackley. Area 1,210 acres. Pop. in 1831, 328; in 1851, 326.—Also a parish in Northumberland, $11\frac{1}{4}$ m. WSW of Hexham. Area 12,125 acres. Pop. in 1851, 340.

WHITGIFT, a parish and village in the W. R. of Yorkshire, $\frac{6}{4}$ m. SE of Howden, on the navigable river Ouse, near its junction with the Trent at the Humber. It includes the chapelry of Swinfleet.

and the townships of Ousefleet, Reedness, and W. Area 8,328 acres. Pop. in 1851, 2,394.

WHITHORN, a parish in the district of Maechers, Wigtonshire. Area about 10,000 acres. The coastline extends $5\frac{1}{2}$ m., runs out into the little promontories of Port-Yarroch-head and Stun-head, and admits the little bays of Isle of Whithorn, Port-Allan, and Port-Yarroch. The only village, as well as noticeable port, is Isle-of-Whithorn. Pop. in 1831, 2,415; in 1851, 3,001.—The royal burgh, situated near the centre of the parish, stands 11 m. S of Wigton. It unites with Wigton, Stranraer, and New Galloway, in sending a member to parliament. W. boasts a very high antiquity. It was the capital of the British tribe of Novantes, who possessed all Galloway west of the river Dee; and, on the influx and ascendancy of the Romans, it was adopted by that people as a station. Ptolemy mentions it under the name of *Leucophibia*. Bede emphatically notices the humble edifice of Ninian as the first church which was built of stone, and says that, on that account, it was called *Candida Casa*. David I. set up at W. an episcopal see, which, under the wide name of the bishopric of Galloway, held coeval sway with that of popery and of Stuart prelacy till the final triumph of presbyterianism in 1689.

WHITING, a township of Washington co., in the state of Maine, U. S., 109 m. E by N of Augusta. Pop. in 1840, 462; in 1850, 470.—Also a township of Addison co., in the state of Vermont, 41 m. SW of Montpelier, intersected by the Rutland and Burlington railroad. Pop. in 1840, 659; in 1850, 629.—Also a township of Windham co., in the state of Vermont, 106 m. S by W of Montpelier, drained by Deerfield river. Pop. in 1840, 1,391; in 1850, 1,380.

WHITINS, a village of Worcester co., in the state of Massachusetts, U. S., on the Providence and Worcester railway, 26 m. from the latter place.

WHITKIRK, a parish in the W. R. of Yorkshire, 4 m. E of Leeds, including the townships of Austerhorpe, Seacroft, Temple-Newsham, and Thorp-Stapleton. Area 5,930 acres. Pop. in 1851, 2,794.

WHITLEY, a hamlet in the p. of St. Giles, Berks, 2 m. S of Reading. Pop. in 1831, 363; in 1851, 639.—Also a chapelry and village in the p. of Tyne-mouth, Northumberland, $2\frac{1}{4}$ m. N by E of North Shields, with which it communicates by a railroad. Area 531 acres. Pop. in 1831, 632; in 1851, 431. The inhabitants are principally occupied in mining operations,—large quantities of coal and magnesian limestone being raised in the parish, and iron-ore also in considerable quantities. The village is in general well-built, and contains several very excellent houses.—Also a township in the p. of Kelling-ton, Yorkshire, 5 m. W by S of Snaith. Area 1,679 acres. Pop. in 1831, 310; in 1851, 320.

WHITLEY, a county in the NE part of the state of Indiana, U. S., comprising an area of 324 sq. m., and drained by Eel river and its tributaries. It is in some parts undulating. Pop. in 1840, 1,287; in 1850, 5,190. Its capital is Columbia.—Also a county in the SE part of the state of Kentucky, comprising an area of 704 sq. m., drained by Cumberland river and its branches, and intersected by the Knoxville and Lexington railroad. It is generally fertile. Pop. in 1840, 4,673; in 1850, 7,447.

WHITLEY (INVERIOR), a chapelry in the parish of Great Budworth, co-palatine of Chester, 5 m. NW by N of Northwich. Area 1,118 acres. Pop. in 1831, 237; in 1851, 216.

WHITLEY (LOWRA), a township in the p. of Thornhill, Yorkshire, $\frac{6}{4}$ m. SW of Wakefield. Area 1,011 acres. Pop. in 1831, 1,012; in 1851, 1,068.

WHITLEY (OVER), a township in the p. of Kirk-

Heaton, Yorkshire, 6 m. E by N of Huddersfield. Area 1,953 acres. Pop. in 1851, 1,002.

WHITLEY (SUPERIOR), a township in the p. of Great Budworth, co.-palatine of Chester, 5½ m. NNW of Northwich, comprehending the hamlets of Norcot, Anterbus, Middle-Walke, Seven-Oaks, and Crowley. Area 1,011 acres. Pop. in 1851, 322.

WHITLINGHAM, a parish in Norfolk, 2½ m. ESE of Norwich. Area 542 acres. Pop. 19.

WHITMORE, a parish in Staffordshire, 4 m. SW of Newcastle-under-Lyne. Area 2,023 acres. Pop. in 1831, 281; in 1851, 377.

WHITNASH, or WITNASH, a parish in Warwickshire, 3 m. ESE of Warwick. Area 1,242 acres. Pop. in 1831, 260; in 1851, 346.

WHITNEY, a parish in Herefordshire, 5 m. NE of Hay. Area 1,483 acres. Pop. in 1851, 232.

WHITNEY'S VALLEY, a village of Alleghany co., in the state of New York, U. S., on the Buffalo and New York City railroad, 78 m. from Buffalo.

WHITNEYVILLE, a village of Washington co., in the state of Maine, U. S., on the SW side of Matthias river, and on the Franklin railroad, 9 m. from Machiasport.

WHITSOME AND HILTON, a united parish in the district of Merse, Berwickshire, with a superficial extent of 7½ sq. m. Pop. in 1851, 612.

WHITSTABLE, or WHITSTAPLE, a parish and small port in Kent, 6 m. NNW of Canterbury, near the entrance to the Swale, opposite to Sheppey isle, and connected by railroad with Canterbury. It contains the hamlet of Harwich. Area of p., 4,075 acres. Pop. in 1851, 2,746.

WHITSTON, a parish in Monmouthshire, 5½ m. SE by E of Newport. Area 1,073 acres. Pop. 76.

WHITSTONE, a parish in Cornwall, 5½ m. SSE of Stratton, intersected by the Bude and Launceston canal. Area 3,787 acres. Pop. in 1851, 425.

WHITSUNDAY. See PENTECOST.

WHITSUNDAY PASSAGE, a passage on the NE coast of Australia, between Cumberland Islands and the continent, discovered by Captain Cook in 1770.

WHITTINGHAM, a parish in Haddingtonshire. Area about 20,700 acres, of which about five-eighths is moorish upland, declining from both sides of the summit-range of the broad Lammermoors. Pop. in 1851, 671.

WHITTINGHAM, a township in the p. of Kirkham, co.-palatine of Lancaster, 6 m. NNE of Preston. Area 4,322 acres. Pop. in 1831, 710; in 1851, 677.—Also a parish in Northumberland, 8½ m. W by S of Alnwick, intersected by the river Aln, comprising the townships of Callaley-with-Yetlington, Glanton, Lorbottle, Great Ryle, Little Ryle, Shawdon, and W. Area 17,484 acres. Pop. in 1831, 1,790; in 1851, 1,905.

WHITTINGTON, a parish in Derbyshire, 2 m. N of Chesterfield, near the North Midland railway. Area 2,640 acres. Pop. in 1831, 740; in 1851, 874.—Also a parish in Gloucestershire, 4 m. ESE of Cheltenham, intersected by the small river Colne. Area 1,422 acres. Pop. in 1831, 247; in 1851, 233.—Also a parish in the co.-palatine of Lancaster, 2 m. SSW of Kirby-Lonsdale, on the river Lune. Area 4,322 acres. Pop. in 1831, 542; in 1851, 414.—Also a parish and village in Salop, 3 m. ENE of Oswestry, on both sides of the river Perry. Area 8,296 acres. Pop. in 1831, 1,788; in 1851, 1,927.—Also a parish in Stafford, 4 m. NW by W of Tamworth. Area 2,921 acres. Pop. with the hamlet of Tamhorn, in 1831, 773; in 1851, 809.—Also a chapelry in the parish of St. Peter, Worcestershire, 2½ m. SE of Worcester. Area 989 acres. Pop. in 1831, 279; in 1851, 289.—Also a township in the

parish of Corbridge, Northumberland, 7 m. NE of Hexham.

WHITTLE, a township in the p. of Glossop, Derbyshire, 6 m. NW of Chapel-en-le-Frith. Pop. in 1831, 2,266; in 1851, 2,691.—Also a township in the parish of Shilbottle, Northumberland, 5 m. S of Alnwick. Area 555 acres. Pop. in 1851, 40.

WHITTLE (WELCH), a township in the p. of Standish, co.-palatine of Lancaster, 3 m. SW of Chorley. Area 594 acres. Pop. in 1851, 140.

WHITTLE-LE-WOODS, a township and chapelry in the p. of Leyland, co.-palatine of Lancaster, 3½ m. N by E of Chorley. Area 1,357 acres. Pop. in 1831, 2,015; in 1851, 2,310.

WHITTLEBURY, a parish in Northamptonshire, 4 m. S by W of Towcester. Area 2,870 acres. Pop. in 1831, 670; in 1851, 707.

WHITTLESEY, or WHITTLESEA, a parish and village in the isle of Ely, 6 m. E by S of Peterborough. Area 2,531 acres. Pop. in 1851, 5,472.

WHITTLESFORD, a parish in Cambridgeshire, 6 m. W by N of Linton. Area 1,915 acres. Pop. in 1831, 524; in 1851, 719.

WHITTON, a parish in Lincolnshire, 11 m. WNW of Barton-upon-Humber. Area 2,440 acres. Pop. in 1831, 245; in 1851, 190.—Also a parish in Radnorshire, 4 m. NW of Presteign. Area 1,549 acres. Pop. in 1831, 131; in 1851, 118.—Also a parish within the liberties of the borough and 2½ m. NNW of Ipswich, intersected by the Stow-market and Ipswich canal. Area with Thurston, 1,459 acres. Pop. in 1831, 346; in 1851, 476.

WHITTONSTALL, a chapelry in the p. of Bywell-St.-Peter, Northumberland, 10 m. SE by E of Hexham. Area 1,968 acres. Pop. in 1851, 198.

WHITWELL, a parish in Derbyshire, 11 m. ENE of Chesterfield. Area 4,680 acres. Pop. in 1831, 1,007; in 1851, 1,355.—Also a parish in Norfolk, 1 m. SW of Reepham. Area 1,511 acres. Pop. in 1831, 483; in 1851, 477.—Also a parish in Rutland, 4½ m. E of Oakham. Area 602 acres. Pop. in 1831, 124; in 1851, 129.—Also a parish in the isle of Wight, 8 m. S by E of Newport. Area 1,963 acres. Pop. in 1831, 556; in 1851, 637.

WHITWELL, or WHITWELL-ON-THE-HILL, a township in the p. of Crambe, Yorkshire, 6 m. SW of New-Malton. Area 1,640 acres. Pop. 205.

WHITWICK, a parish in Leicestershire, 5½ m. E by S of Ashby-de-la-Zouch, containing the chapelry of St. George and the townships of Swannington and Thringstoe. Area 6,229 acres. Pop. 4,956.

WHITWOOD, a township in the p. of Featherstone, Yorkshire, 5 m. NW by W of Pontefract, on the Calde navigation. Area 1,045 acres. Pop. 576.

WHITWORTH, a parochial chapelry in the co.-palatine of Durham, 4 m. NE by N of Bishop-Auckland. Area, with Tudhoe, 1,465 acres. Pop. in 1831, 337; in 1851, 650.—Also a chapelry in the p. of Rochdale, co.-palatine of Lancaster, 3 m. N by W of Rochdale.

WHIXLEY, a parish in the W. R. of Yorkshire, 6½ m. SSE of Aldborough, comprising the township of Thornville, Green-Hamerton, and W. Area 3,470 acres. Pop. in 1831, 968; in 1851, 1,041.

WHIXOE, or WIXOE, a parish in Suffolk, 4 m. WSW of Clare, on the river Stour. Area 600 acres. Pop. in 1831, 146; in 1851, 168.

WHOAHOU. See OAHU.

WHORLTON, a chapelry in the p. of Gainford, co.-palatine of Durham, 4 m. ESE of Barnard-Castle, on the river Tees. Area 1,760 acres. Pop. in 1831, 311; in 1851, 296.—Also a parish in the W. R. of Yorkshire, 5½ m. SW by S of Stokesley, including the chapelry of Faceby, and the townships of Potto and W. Area 9,690 acres. Pop. in 1851, 865.

WHYDAH, a district and town of Western Africa, on the Right-of-Benin, about 80 m. S of Abomey. The town is in N lat. 6° 2', E long. 2° 5'. The district is fertile, and is well cultivated. A considerable trade in palm-oil, ivory, and salt, is conducted from this place.

WIANBEEN, a creek of New South Wales, in the co. of St. Vincent, an affluent of Shoalhaven river near Curwary.

WIAZOWNA, a town of Poland, in the woiwodie of Masow, and obwod of Stanislawow, 15 m. SE of Warsaw. Pop. 300.

WIBLING, or **WIBLINGEN**, an oberamt and village of Württemberg, in the circle of the Danube. Pop. of amt, 22,854. The village is near the confluence of the Iller and Danube, 3 m. S of Ulm. Pop. 900. It has a royal castle.

WIBLINGWERDER, a village of Prussia, in the prov. of Westphalia, regency and 23 m. WSW of Arenberg, and circle of Altena. Pop. 1,240.

WIBORG, Wyborg, or Viborg, a district of European Russia, lying between Finland Proper and the lake of Onega. Its area is computed at 16,000 sq. m. The pop., chiefly Finns, is 200,000. —Its cap., of the same name, stands in a valley opening on the gulf of Finland, in N lat. 60° 42' 40", 70 m. NW of Petersburg. Pop. 3,600. It consists of several parts, town, castle, and suburbs, and has a large military hospital, and a gymnasium. Its exports consist of wood, rosin, pitch, potash, and fish. Its trade is considerable. Its proper harbour is about 8 m. distant at Stralsund.

WIBORG, or Wyborg, an ancient town of Denmark, situated on a small lake, nearly in the centre of Jutland, and 24 m. W of Randers. It is tolerably built, having been in some degree reconstructed after a great fire in 1726. Pop. 3,400. It has few manufactures, but is of some importance as a military point.

WIBRIN, a department and commune of Belgium, in the prov. of Luxemburg, and arrond. of Marche. Pop. 1,193.

WICHAWSKA-KHOTA, a village of Austria, in Bohemia, in the reg. of Gitschin, and bail. of Hohenelbe. Pop. 340.

WICHENDORF, a village of Hesse-Darmstadt, prov. of Lower Hesse, circle of Fritzlar. Pop. 587.

WICHELEN, a department and commune of Belgium, in the prov. of East Flanders, district and 6 m. WSW of Termonde, on the r. bank of the Scheldt. Pop. of dep., 4,143; of com., 459.

WICHELSDORF, a village of Prussia, in the reg. of Liegnitz, and circle of Sprottau. Pop. 440.

WICHENFORD, a parish in Worcestershire, 6 m. NW by N of Worcester. Area 2,669 acres. Pop. in 1831, 355; in 1851, 336.

WICHENSTOCK, a mountain of Switzerland, in the cant. and 9 m. S of Glaris.

WICHLINGHAUSEN, a village of Prussia, in the regency of Düsseldorf, circle and 3 m. NE of Ellerfeld. Pop. 1,500.

WICHMANSDORF, a village of Prussia, in the regency of Potsdam, and circle of Zemplin. Pop. 300.

WICHMANNSHAUSEN, a village of Hesse-Darmstadt, in the prov. of Lower Hesse, and circle of Eschwege. Pop. 794.

WICHMAR, a village of Saxo-Meiningen, in the bail. of Earmburg, on the Saale. Pop. 250. It has a paper-mill.

WICHNOR, a chapelry in the parish of Tatenhill, Stafford, 5½ m. NE of Lichfield, in the line of the Grand Trunk canal. Pop. in 1851, 131.

WICHRAU, a village of Prussia, in the reg. of Oppeln, and circle of Rosenberg. Pop. 440.

WICHROWITZ, a village of Prussia, in the reg. of Königsberg, and circle of Neidenburg. Pop. 210.

WICHSTADLE, or **WIEGSTADLE**, a village of Austria, in Bohemia, in the regency of Wittschin, and bail. of Seftenberg. Pop. 890.

WICHTE, a village of Hesse-Darmstadt, in the prov. of Lower Hesse, and circle of Melfungen. Pop. 334.

WICHTERICH, a village of Prussia, in the reg. of Cologne, and circle of Enskirchen. Pop. 490.

WICHTRACH, a village of Switzerland, in the cant. of Berne, and bail. of Konolfingen. Pop. 562.

WICHTRINGHAUSEN, a village of Hanover, in the prov. of Calenberg, and bail. of Wennigsen. Pop. 250.

WICHTSHAUSEN, a village of Prussia, in the regency of Erfurt, and circle of Schleusingen. Pop. 500.

WICK, a parish in Glamorganshire, 5 m. SE of Bridgend. Area 1,370 acres. Pop. 404.

WICK, a parish on the E coast of Caithness-shire, having a superficial extent of 75 sq. m. Keiss-bay, called also Sinclair-bay, penetrates the N half of the coast to the extent of 3½ m. Wick-bay, measuring 1 m. across the entrance, and stretching inland to the extent of 1½ m., opens 3 m. S of Keiss-bay. The hills of Camsten, Yarrow, and Bean, in the SW, are the only high ground in this p. The fishing-village of Broadhaven, situated about 1 m. E of the town of Wick, has about 170 inhabitants. The other villages, either suburban to the burgh or situated at a distance, are Pulteney-town, Louisburgh, Staxigoe, and Sarclet. Pop. in 1831, 9,850; in 1851, 11,851.

WICK, a royal burgh, the capital of Caithness, and the principal seat of the northern-herring fishery, is situated at the head of Wick-bay, 18½ m. S of John o'Groat's, 20½ m. SE by E of Thurso, and 119½ or 139½ m., according to the route, NNE of Inverness. It lies low, and is encompassed by a tame and level strath. The town consists of three parts, Wick- Proper, Louisburgh, and Pulteney-town. W. consists principally of one crooked street about 220 yds. long, winged with lanes, and situated on the north side of the river. Louisburgh, situated quite adjacent to it on the N, nearly vies with it in bulk, and far excels it in regularity and freedom from unpleasantness. Pulteney-town, situated on the S side of the river, but extending eastward till it lines part of the coast of the bay, is the division of prime importance, and contains several hundreds more than one-half of the pop. A bridge of 3 arches, flung across a narrow part of the river, a little above the head of the bay, connects Pulteney-town with the other two divisions. The present manufactures of the town are all of modern origin, and seem to have sprung up in connection with its fishing-establishment. Rope-works, the dressing pavement-slugs for exportation, boat-building, a recently-erected iron-foundry, the making of herring-nets, and the spinning of material for them, employ a large number of hands. In the town are a distillery, a brewery, and some grain and sawmills. A large proportion of the trade of the port is conducted at the little harbour of Staxigoe. A steam-vessel plies once a fortnight, during eight months of the year, between W. and Leith, calling at some intermediate ports, and extending her trips to Orkney and Shetland. In 1808, the establishment of Pulteney-town was commenced by the British fishery society; and, since that date, the annual fishings, during eight or ten weeks succeeding the middle of July, have been regularly conducted both at Pulteney-town itself, and at the subordinate stations of Broadhaven, Staxigoe, Keiss, and Sarclet. The burgh unites with Ding-

wall, Tain, Cromarty, Kirkwall, and Dornoch, in sending a member to parliament; and is the returning burgh. Total parl. constituency in 1852, 699. Pop. of royal burgh in 1841, 1,333; in 1851, 1,514.

WICK, a town and port of Denmark, in the duchy and 47 m. WNW of Sleswig, and bail. of Tondern, on the E coast of the island of Foeher. Pop. 700. It has a nautical school, a port capable of receiving a considerable number of large vessels, and a good roadstead. See also **VICK**.

WICK-NEAR-PERSHORE, a chapelry in the p. of St. Andrew Pershore, Worcestershire, $1\frac{1}{2}$ m. ESE of Pershore. Pop. in 1831, 280; in 1851, 339.

WICK-CHAMPFLOWER, a chapelry in the p. of Bruton, Somersetshire, $1\frac{1}{2}$ m. W of Bruton. Pop. in 1851, 107.

WICKEDE, a village of Prussia, in the regency of Arnberg, and circle of Dortmund. Pop. 638.—Also a village in the circle of Goest. Pop. 440.

WICK-ST.-LAWRENCE, a parish in Somersetshire, $8\frac{1}{2}$ m. NNW of Axbridge. Area 1,900 acres. Pop. in 1831, 1,281; in 1851, 800.

WICKEN, or **WYKES**, a parish in Cambridgeshire, 7 m. NW by W of Newmarket. Area 3,812 acres. Pop. in 1831, 892; in 1851, 1,054.—Also a parish in Northamptonshire, $3\frac{1}{2}$ m. WSW of Stony-Stratford, intersected by the Buckingham canal. Area 2,280 acres. Pop. in 1831, 536; in 1851, 487.

WICKEN-BONANT, or **BONHURST**, a parish in Essex, 5 m. SW by S of Saffron-Walden, in the line of the Northern and Eastern counties railway. Area 841 acres. Pop. in 1831, 184; in 1851, 156.

WICKENBY, a parish in Lincolnshire, $5\frac{1}{2}$ m. NW of Wragby. Area 1,997 acres. Pop. 289.

WICKENDORF, a village of Bavaria, in the circle of Upper Franconia, presidial of Lugwigstadt. Pop. 300.—Also a village of Prussia, in the regency of Breslau, and circle of Schweidnitz. Pop. 360.

WICKENRODE, a village of Hesse, in the prov. of Lower Hesse, circle of Witzzenhausen, and bail. of Gross-Almerode. Pop. 1,076. It has manufactories of alum and vitriol.

WICKENRODT, a village of the principality of Oldenburg, and bail. of Oberstein. Pop. 260.

WICKER, a village of the duchy of Nassau, and bail. of Hockheim. Pop. 640.

WICKERADBERG. See **WICKRATHBERG**.

WICKERAN (**GROSS** and **KLEIN**), a village of Prussia, in the regency of Danzig, and circle of Elbing. Pop. 400.

WICKERODA, a village of Prussia, in the regency of Merseburg, circle and 6 m. WNW of Sangerhausen. Pop. 330. It has a copper-work.

WICKERSLEY, a parish in the W. R. of Yorkshire, $8\frac{1}{2}$ m. E by S of Rotherham. Area 1,230 acres. Pop. in 1831, 527; in 1851, 700. This p. is famous for a bed of fine stone peculiarly adapted for the making of grindstones.

WICKFORD, a parish in Essex, 6 m. E by S of Billericay. Area 1,758 acres. Pop. in 1851, 490.

WICKFORD, a village of North Kingston township, Washington co., in the state of Rhode island, U. S., 22 m. S of Providence, on the W side of Narragansett bay, and intersected by the Stonington and Providence railroad. Pop. in 1850, 500.

WICKHAM, a parish in Hants, 4 m. S by E of Bishop's-Waltham. Area 2,433 acres. Pop. in 1851, 1,049.

WICKHAM, a river of N. W. Australia, an affluent of Limnen Bight river.

WICKHAM (**BISHOP'S**), a parish in Essex, $2\frac{1}{2}$ m. S by E of Witham. Area 1,534 acres. Pop. 577.

WICKHAM-BREAU, or **WICKHAM-BREUX**, a parish in Kent, 5 m. E by N of Canterbury. Area 2,810 acres. Pop. in 1831, 486; in 1851, 481.

WICKHAM-BROOK, a parish in Suffolk, $6\frac{1}{2}$ m. N by W of Clare. Area 4,848 acres. Pop. 1,597.

WICKHAM (**CHILD'S**), a parish in Gloucestershire, 5 m. W by S of Chipping-Camden. Area 2,040 acres. Pop. in 1831, 415; in 1851, 466.

WICKHAM (**EAST**), a parish in Kent, $3\frac{1}{2}$ m. WNW of Crayford. Area 885 acres. Pop. 666.

WICKHAMFORD, a parish in Worcestershire, $2\frac{1}{2}$ m. SE by E of Evesham. Area 1,242 acres. Pop. in 1831, 186; in 1851, 129.

WICKHAM-MARKET, a parish and village in Suffolk, $2\frac{1}{2}$ m. NE of Ipswich, on a rising ground near the river Deben. Area 2,310 acres. Pop. in 1831, 1,202; in 1851, 1,697. It is said that no fewer than fifty other churches are visible from the eminence on which the church of this p. is built.

WICKHAM-ST.-PAUL, a parish in Essex, $2\frac{1}{2}$ m. E by N of Castle-Hedingham. Area 1,225 acres. Pop. in 1831, 388; in 1851, 425.

WICK-HAMPTON, a parish in Norfolk, $4\frac{1}{2}$ m. SSE of Acle, in Halvergate Marsh. Area 1,605 acres. Pop. in 1831, 122; in 1851, 181.

WICKHAM-SKEYTH, a parish in Suffolk, $2\frac{1}{2}$ m. N of Mendlesham. Area 1,770 acres. Pop. 613.

WICKHAM (**WEST**), a parish in Cambridgeshire, $4\frac{1}{2}$ m. NE by E of Linton. Area 2,937 acres. Pop. in 1831, 529; in 1851, 570.—Also a parish in Kent, $2\frac{1}{2}$ m. SW by S of Bromley. Area 2,645 acres. Pop. in 1831, 614; in 1851, 732.

WICKLEWOOD, a parish and village in Norfolk, 8 m. WNW of Wymondham. Area 1,564 acres. Pop. in 1831, 787; in 1851, 894.

WICKLOW, a maritime county of the Irish province of Leinster; bounded on the N, by co. Dublin; on the E, by the Irish sea; on the S, by co. Wexford, on the SW, by co. Carlow; and on the W, by co. Kildare. The longest line which can be drawn within the co. in any direction, extends SW by S from the N extremity of the coast-line to the W side of Slieveboy, and measures $34\frac{1}{2}$ m.; and the longest line which can be drawn in a direction at right angles with the preceding, falls upon the S extremity of the coast-line, and measures 26 m. The area of the co. comprises 280,393 acres of arable land, 200,754 of uncultivated land, 17,600 of continuous woods, 341 of towns, and 1,090 of water,—in all, 500,178 acres. Of the unimproved land, 130,000 acres have an elevation exceeding 1,000 ft. The whole coast, generally viewed, is inhospitable to navigators; it offers no better retreat to even the smallest craft than the poor harbours of Wicklow and Arklow; and presents to the sea not one salient angle, and scarcely even a considerable projection.

Surface.] The sea-board or eastern district of the co., to the mean breadth of between 4 and 5 m., is a band of tumulated ground, decidedly mountainous in the extreme N. The central district, extending from the extreme N to near the extreme S, with a breadth of from $7\frac{1}{2}$ to 13 m., is grandly mountainous, and possesses many picturesque or beautifully romantic scenes. Three of the *gaps* or alpine defiles, through which roads cross the summit-line of this great district, are Sally-gap, near the N, with an elevation of 1,631 ft. above sea-level; Wicklow-gap, $6\frac{1}{2}$ m. SW by S of Sally-gap, with an elevation of 1,569 ft.; and the gap at the S side of Tablemountain, 3 m. SW of Wicklow-gap, with an elevation of 2,266 ft. The N part of the western district of the co. has a small average breadth, and consists of the vale of the Liffey, with the convergence upon it of the vale of the King's river; the central part of the western district consists of a far-extending ramification of the great mountain-region of the co., having for its chief feature the summit of Slieve-Gadoc, and acting as a watershed between the river-

system of the Liffey and the river-system of the Slaney; and the S part of the western district consists principally of the valley of the Slaney. The south-western district forms a wing or projecting district of the co., consisting of an irregular and flowingly-outlined series of pleasant vales and lofty hills. The principal summits of the co., together with their respective altitudes above sea-level, are Kippure, on the N boundary, 8½ m. W by S of Bray, 2,473 ft.; a height on the boundary, 1½ m. WNW of Kippure, 2,864 ft.; a height 3 m. E by S of Sorrel-hill, 2,364 ft.; Thonelagee, 6½ m. SE of Blessington, 2,683 ft.; a height 1½ m. NNE of Thonelagee, 2,307 ft.; Comaderry, 2½ m. S of Thonelagee, 2,296 ft.; Lugdaff, 2 m. SE of Comaderry, 2,148 ft.; and Croghan, 4 m. SE of Lagnaquilla, 2,175 ft.

Minerals and mines.] Granitic rocks constitute a conspicuous district of the co., about 84 m. in mean breadth, extending SSW from the middle of the northern boundary. Metamorphic rocks constitute considerable bands of country along both sides of the granitic district. Transition rocks, consisting principally of clay-slate, greywacke, and greywacke slate, constitute the platform of all the other districts of the co.—The principal mines worked within the county in 1838, were the Laganure lead mines, employing from 150 to 300 men, and annually producing from 1,200 to 3,000 tons; the Ballymurtagh copper mine, annually producing from 5,000 to 6,000 tons; the Crobane and Tigrosey copper mines, annually producing from 5,000 to 6,000 tons; the Connoree copper mine, annually producing from 1,000 to 1,500 tons; the Ballygahan copper mine, annually producing from 200 to 300 tons; and the Glenmalur lead mine, annually producing from 180 to 200 tons. The gold mines of W., situated in a vale among the declivities of Croghan-Kinsheila, on the S margin of the co., have been noticed in the article CROGHAN-KINSHEILA: which see.—Bismuth of iron occurs in vast beds in association with the copper lodes of the clay-slate district. Porcelain clay, of various degrees of fineness, formed by the decomposition of the felspar of granite, constitutes the agricultural soil of some tracts of the county; and kaolin of fine quality, occurs at Kilsnaleagh, in the vicinity of Baltinglass.

Rivers and lakes.] The river Liffey, and its tributary, the King's river, drain the NW district into the coa. of Kildare and Dublin; the river Slaney, and its tributaries, the Derreen and the Derry, drain the SW district into the coa. of Carlow and Wexford; the Ovoca, formed by the large indigenous rivulets, Avonmore, Avonbeg, and Aughrim, drains the central and the SE districts into the sea at Arklow; five or six small rivulets drain part of the E district into the sea between Arklow and Wicklow-head; the Varrey river drains a chief part of the E district into the sea at Wicklow; and the Bray river drains the NE district into the sea, on the boundary with co. Dublin, at Bray. The principal lakes, together with their respective surface-elevation above sea-level, are Lower Lough Bray, 1,225 ft.; Upper Lough Bray, 1,458 ft.; Lough Tay, 897 ft.; Lough Dan, 685 ft.; Lough Ouler, 1,829 ft.; Lough Nahanagan, 1,884 ft.; the lower lake of Glendalough, 411 ft.; and Broad Lough, the estuarial expansion of the Varrey parallel to the sea above the town of Wicklow.

Soils and agriculture.] Bog of considerable depth, and covered with heath, overlies a large part of the great granitic district. Vast numbers of the rounded summits and curving acclivities of the granitic mountains are either quite bare rock, or so thinly covered with soil as to possess the most meagre vegetation. The soil of a large proportion of the other mountainous grounds of the county, like the substratum of the bog on the granite mountains, consists simply of the disintegrations of the underlying rocks; that of the valleys of the NE district of the co., from the boundary with co. Dublin to a point 3 m. S of the town of Wicklow, consists of a diluvium, which bears evidence of having been swept hither from the breaking up of a limestone country. In 1841, there were within the rural districts of the county, 2,620 farms of from 1 acre to 5 acres, 2,922 of from 5 to 15 acres, 1,891 of from 15 to 30 acres,

and 2,000 of upwards of 80 acres. The totals of live stock, together with their respective estimated value, were 12,314 horses and mules, £98,512; 1,917 asses, £1,917; 45,022 cattle, £292,643; 75,743 sheep, £88,317; 19,348 pigs, £24,185; and 120,785 poultry, £3,019.—The plantations within the county consisted of 17,600 continuous acres, and 1,015,301 detached trees.

Manufactures and Trade.] The commerce of the co. is of small extent, and is chiefly conducted through the ports of Wicklow and Arklow. The most considerable seat of manufacture is the small town of Stratford-on-Slaney. A large aggregate of productive industry is concentrated upon mining, and has been noticed in the section upon minerals.—A line of railway has been proposed to connect Bray with the Dublin and Kingstown railway. The line of railway from Wexford to the Kilkenny and Dublin railway at Carlow, passes near the SW boundary of the barony of Shillelagh.

Divisions and Towns.] The co. is divided into the 8 baronies of Rathdown, in the NE; Newcastle, in the middle-E; Arklow, in the SE; North Ballinacor, in the N-centre; South Ballinacor, in the S-centre; Lower Talbotstown, in the NW; Upper Talbotstown, in the middle-W; and Shillelagh, in the SW. The towns and principal villages are Enniskerry, Delgany, Killinacraig, and part of Bray, in the barony of Rathdown; Newtown-Mount-Kennedy, Glencaly, Downa, Kilcoole, Kiliasky, Newcastle, Ballinalee, Rathnew, and part of Wicklow, in the barony of Newcastle; Arklow, Redcross, and part of Wicklow, in the barony of Arklow; Rathdrum, in the barony of North Ballinacor; Tinnehely, in the barony of South Ballinacor; Dunlavin, Blessington, and Donard, in the barony of Lower Talbotstown; Baltinglass and Stratford-on-Slaney, in the barony of Upper Talbotstown; and Carnew and Shillelagh, in the barony of Shillelagh. The assizes are held at Wicklow; quarter-sessions at Wicklow, Arklow, Baltinglass, Bray, and Tinnehely. The co. sent 10 members to the Irish parliament, or 2 for the county at large, and 2 for each of the boroughs of Wicklow, Blessington, Baltinglass, and Carysfort; but it sends to the imperial parliament only 2 members,—those for the county at large. Constituency in 1841, 1,503; in 1851, 3,830. Pop. in 1831, 121,557, in 19,970 families. Pop. in 1841, 126,143. Males, 63,489; females, 62,654; families, 21,182. Inhabited houses, 19,210. First-class inhabited houses, 616; second-class, 5,488; third-class, 7,709; fourth-class, 5,397. Families residing in first-class houses, 716; in second-class houses, 6,141. Families employed chiefly in agriculture, 14,082; in manufactures and trade, 4,740, in other pursuits, 2,410. Families dependent chiefly on property and professions, 662. Pop. in 1851, only 99,287.

WICKLOW, a port and county-town, and formerly a parliamentary borough, partly in the parishes of Drumkey and Kilpoole, and partly in the parish of Rathnew, co. Wicklow, situated on the estuary of the Varrey, at the head of a small bay, 2 m. NW of Wicklow-head, and 2½ SSE of Dublin. Its streets are narrow, irregular, and badly-aligned, and the town, in an architectural view, is the poorest of the assize-towns of Ireland. The harbour, in ordinary tides, admits vessels drawing between 7 and 8 ft. of water; but it is a bar harbour, with a narrow entrance in any state of the tide, and inaccessible at low water. Pop. in 1831, 2,472; in 1841, 2,794. It was anciently called *Wicklenos* by the Danes, and *Kilmantas* by the Irish. It gives the title of Earl, in the peerage of Ireland, to the noble family of Howard.

WICKLOW, a county of Western Australia, bounded on the N by the co. of Grantham; on the E by that of Seel; on the S by the co. of Goderich; and on the W by that of Wellington and Nelson. It contains the William, Buchanan, Arthur, and Beaufort rivers, and several salt lakes. The chief towns are Bannister and Williamsburg.

WICKMERE, a parish in Norfolk, 5 m. NNW of Aylesham. Area 820 acres. Pop. in 1851, 302.

WICKRATH, or **WICKERATH**, a village of Prussia, in the regency and 18 m. WSW of Dusseldorf, and circle of Grevenbroich, on the l. bank of the Niers. Pop. 855. It has a fine castle, and possesses manufactories of linen and cotton fabrics, and of iron ware, tanneries, and paper-mills.

WICKRATHBERG, a village of Prussia, in the regency of Dusseldorf, and circle of Grevenbroich, on the Niers. Pop. 880. It has manufactories of linen and damask.

WICKRATHHAN, a village of Prussia, in the regency of Dusseldorf, and circle of Grevenbroich, near Wickrath. Pop. 260. It has manufactories of linen and damask.

WICKTON, a township in the p. of Stoke-Prior, Herefordshire, 4½ m. SE of Leominster. Pop. in 1831, 143; in 1851, 124.

WICKWAR, a parish and town in Gloucestershire, 24 m. SSW of Gloucester. Area of p. 2,307 acres. Pop. in 1831, 972; in 1851, 966.

WICONISCO, a township of Dauphin co., in the state of Pennsylvania, U. S., 22 m. N of Harrisburg. Pop. in 1850, 500.

WICZLIN, a village of Prussia, in the regency of Danzig, and circle of Neustadt. Pop. 430.

WICZOW, a village of Austria, in Moravia, in the circle of Olmutz. Pop. 470.

WIDACH, a village of Austria, in Bohemia, in the regency of Gitschin, and bail. of Neu Pef. Pop. 600.

WIDA (*GULF OF*), a gulf in the Molucca archipelago, between the S and SE peninsulas of the island of Gilolo. It is 75 m. in depth. Near its widest part to the S of its entrance is a group of small islands of the same name.

WIDAWA, a town of Poland, in the gov. of Kalisch, obwod and 18 m. SE of Sieradz, on the Widawka, an affluent of the Wartha. Pop. 1,510. It has manufactories of cloth, linen, hosiery, and hats.

WIDCOMBE, a parish in Somersetshire, 1½ m. SE by E of Bath. Area with Lyncombe, 1,845 acres. Pop., with Lyncombe, in 1831, 8,704; in 1851, 9,974.

WIDDECOMBE-IN-THE-MOOR, a parish in Devon, 6 m. NW by N of Ashburton. Area 10,614 acres. Pop. in 1831, 959; in 1851, 974.

WIDDERN, a town under the common government of Württemberg, and of the grand-duchy of Baden, on the l. bank of the Jaxt, 10 m. N of Oehringen. The part belonging to Württemberg is in the circle of the Neckar, bail. and 12 m. NE of Neckarsulm. The Badois portion is in the circle of the Lower Rhine, and bail. of Adelsheim. Pop. 1,419. It has two castles and a tile-kiln.

WIDDESBACH, a village of Bavaria, in the circle of Middle Franconia, and presidial of Leutershausen. Pop. 330.

WIDDESDORF, a village of Prussia, in the regency and circle of Cologne. Pop. 360.

WIDDESHAUSEN, a village of Hesse, in the prov. of Fulda, and circle of Hersfeld. Pop. 523.

WIDDERT (*ONER and UNTER*), two villages of Prussia, in the regency of Dusseldorf, and circle of Solingen. Pop. 460.

WIDDESHOVEN, a village of Prussia, in the regency of Dusseldorf, and circle of Grevenbroich. Pop. 580.

WIDDIG, a village of Prussia, in the regency of Cologne, and circle of Bonn. Pop. 432.

WIDDIN, or **WIDIN**, a town of Bulgaria, the cap. of a sanjak of the same name, situated on the r. bank of the Danube, opposite Kalafat, and 130 m. SE of Belgrade. The outer town forms a semicircular outwork on the land side, the houses being all of one story, built of mud, and each having a small farmyard planted with trees and enclosed with walling. This large agglomeration of farmyards, with the appertaining land scattered out at a distance, reminds one of Debreczin and other towns of Hungary, which cover so much ground, and are in fact but large villages. Within this semicircle, which has the Danube, here about 1 m. wide, for its base, are the inner town, or citadel, built by the Genoese, now employed as an arsenal, and in which is situate the seraglio of the pasha; the principal mosque, and a population exclusively Moslem. It is much better built than the *veras* or outer town. The total number of houses in the two towns is 1,500 Turkish, 1,250 Christian or Bulgarian, and 360 Jewish; and the total civil pop. may amount to 16,000. The outer town is only fortified towards the land side. The inner town is separated from it by a wide and deep fosse, with solid bastions and curtains. The town has some trade in corn, wine, and salt.

WIDDIN, a creek of New South Wales, which forms the line of separation between the counties of Phillip and Hunter, and flows into the Goulburn.

WIDDINGTON, a parish in Essex, 5 m. W by N of Thaxted, near the line of the Northern and Eastern Counties railway. Area 2,028 acres. Pop. in 1831, 386; in 1851, 447.

WIDFORD, a parish in Essex, 1 m. SW of Chelmsford, in the line of the Eastern Counties railway. Area 692 acres. Pop. in 1831, 157; in 1851, 184.—Also a parish in Gloucestershire, 1½ m. ESE of Burford, isolated from the rest of the county, and locally in Oxfordshire. Area 564 acres. Pop. in 1831, 51; in 1851, 43.—Also a parish in Hertfordshire, 4 m. E by N of Ware, intersected by the river Ash. Area 1,137 acres. Pop. in 1851, 519.

WIDHOSTITZ, a village of Austria, in Bohemia, in the regency of Eger, and bail. of Saatz. Pop. 240.

WIDIM, a village of Bohemia, in the regency of Böhmisch-Leipa, and bail. of Dauba. Pop. 270.

WIDIM-KOKORRIN, a village of Bohemia, in the regency of Böhmisch-Leipa, and bail. of Dauba. Pop. 322.

WIDITZ, a village of Bohemia, in the regency of Pardubitz, and bail. of Kulenberg. Pop. 200.

WIDLEY, a parish in Hants, 5½ m. E by N of Fareham. Area 1,090 acres. Pop. in 1851, 565.

WIDLITZ, a village of Bohemia, in the regency of Eger, and bail. of Tachan. Pop. 235.

WIDMERPOOLE, a parish in Notts, 9 m. SSE of Nottingham. Area 2,190 acres. Pop. 147.

WIDMMENAR, a market-town of Prussia, in the reg. of Gumbinnen, circle of Loken. Pop. 532.

WIDNAU, a parish of Switzerland, in the cant. of St. Gall, and bail. of the Lower Rheinthal. Pop. 2,586.

WIDONITZ, a village of Bohemia, in the reg. of Gitschin, and bail. of Horzitz. Pop. 255.

WIDONNER, a village of Prussia, in the reg. of Königsberg, and circle of Kaslenberg. Pop. 406.

WIDÖYE, a department and commune of Belgium, in the prov. of Limburg, watered by the Molebeek. Pop. 192.

WIDRINGTON, a parochial chapelry in Northumberland, adjacent to Morpeth, including the township of Linton. Area 4,580 acres. Pop. 429.

WIDWORTHY, a parish in Devon, $3\frac{1}{2}$ m. E by S of Honiton. Area 1,437 acres. Pop. in 1851, 192.

WIDZIM, a village of Prussia, in the reg. of Posen, and circle of Bomst, near Wollstein. Pop. 500.

WIDZY, a town of Russia in Europe, in the gov. of Wilna, on the Desna. Pop. 4,000.

WIEBELITZ (GROSS and KLEIN), two villages of Prussia, in the regency of Magdeburg, and circle of Salzwedel. Pop. 220.

WIEBELSBACH, a village of Hesse, in the prov. of Starkenburg, and presidial of Höchst. Pop. 335.

WIEBELSBERG, a village of Bavaria, in the circle of Lower Franconia, and presidial of Gerolzhofen. Pop. 166.

WIEBELSHEIM, a village of Prussia, in the regency of Coblenz, and circle of St. Goar. Pop. 345. —Also a village in the regency of Treves, and circle of Saarbrück, at the confluence of the Osterbachs with the Blies. Pop. 1,320. —Also a village of Bavaria, in the circle of Lower Franconia, and presidial of Uffenheim. Pop. 200.

WIEBELSKIRCHEN, a bail. of Prussia, in the reg. of Treves, and circle of Ottweiler. Pop. 1,310.

WIEBLINGEN, a village of Baden, in the circle of the Lower Rhine, and bail. of Heidelberg, on the Neckar. Pop. 1,110. It has a tobacco factory.

WIECHNOW, a village of Austria, in Moravia, circle of Iglau, and district of Bistritz. Pop. 460.

WIECHS, a village of Baden, in the circle of the Upper Rhine, and bail. of Schopfheim. Pop. 607. —Also a village in the circle of the See, and bail. of Blumenfeld. Pop. 401.

WIECK, a village of Prussia, in the regency of Stralsund, and circle of Griefswald. Pop. 478.

WIECK-ON-THE-DARS, a village of Prussia, in the regency of Stralsund, and circle of Franzburg. Pop. 754.

WIECK AND WITTOW, a village of Prussia, in the regency of Stralsund, and circle of Bergen. Pop. 795.

WIECK (DOMLAPOTELS), a village of Prussia, in the regency of Stettin, and circle of Kammin. Pop. 497. —Also a village in the regency of Koslin, and circle of Schlawe. Pop. 441.

WIECZIN, a village of Prussia, in the regency of Posen, and circle of Pleschen. Pop. 312.

WIED, a river of the duchy of Nassau, which has its source in the Westerwald, and flows past Neuwied into the Rhine. —Also a village in the bail. and 3 m. SW of Hachenburg. Pop. 200.

WIED (ALTEN), a market-town of Prussia, in the regency and 9 m. NW of Coblenz, and circle of Neuwied, on the Wied. Pop. 314. It has copper and lead mines, a silver finery, and copper forges.

WIEDA, a village of Brunswick, in the circle of Blankenburg, and bail. of Walkenried. Pop. 1,130.

WIEDELAH, a village of Hanover, in the prov. of Hildesheim, and bail. of Vienenburg, near Salzauler. Pop. 615.

WIEDEMAR (GROSS and KLEIN), two villages of Prussia, in the regency of Merseburg, and circle of Delitzsch. Pop. 440.

WIEDEN (OBER and UNTER), two villages of Baden, in the circle of the Upper Rhine, and bail. of Schönenau. Pop. 274.

WIEDENBRÜCK, a circle and town of Prussia, in the prov. of Westphalia, and regency of Minden. The circle comprises an area of 180 sq. m. Pop. in 1849, 39,492. The town is 42 m. SW of Minden, on the Ems, which is here crossed by four bridges. Pop. 2,716. It contains three Catholic churches, a gymnasium, and an hospital, and has manufactures of woollen hosiery and of tobacco.

WIEDENBRUGGE, a village of Schaumburg-Lippe, and bail. of Hagenburg. Pop. 200.

WIEDENFELD, a village of Prussia, in the regency of Cologne, and circle of Bergheim. Pop. 210.

WIEDENSAHL, a market-town of Hanover, in the prov. of Kalenberg, and bail. of Loccum, near Rehburg. Pop. 745.

WIEDENSHAUSEN, a village of Bavaria, in Upper Bavaria, presidial of Dachau. Pop. 260.

WIEDERAU, a village of Prussia, in the regency of Merseburg, and circle of Liebenwerda. Pop. 345. —Also a village of Saxony, in the circle of Liepsig, and bail. of Pegau. Pop. 240. —Also a village in the bail. of Roehlitz. Pop. 944.

WIEDERGELTINGEN, a village of Bavaria, in the circle of Swabia, and presidial of Turkheim, on the Wertach. Pop. 455.

WIEDERGRÜN, a village of Austria, in Silesia, in the circle of Troppau, and district of Freudenthal. Pop. 330.

WIEDERMUTH, a village of Schwarzburg-Sondershausen, and bail. of Ebeleben, on the Helbe. Pop. 260.

WIEDERSBACH, a village of Prussia, in the reg. of Erfurt, and circle of Schleusingen. Pop. 320.

WIEDERSBERG, a village of Saxony, in the circle of Zwickau, and bail. of Voigtsburg. Pop. 245.

WIEDERSEE, a village of Prussia, in the reg. of Marienwerder, and circle of Graudenz. Pop. 300.

WIEDERSTADT (ONZE), a village of Prussia, in the regency of Merseburg, and circle of Mannsfeld, near Hettstadt, on the Wipper. Pop. 535.

WIEDERSTEIN, a village of Prussia, in the regency of Arnberg, and circle of Siegen. Pop. 260.

WIEDIKON, a village of Switzerland, in the cant. of Zurich, bail. and near Zurich. Pop. 328.

WIEDLISBACH, a town of Switzerland, in the cant. of Berne, and bail. of Wangen, 6 m. NE of Soleure, near the l. bank of the Aar. Pop. 914. It has quarries of mill-stone.

WIEDNITZ, a village of Prussia, in the reg. of Liegnitz, and circle of Hoherswerda. Pop. 340. It has a castle.

WIEFELSTEDE, a parish of the duchy and 11 m. NNW of Oldenburg, circle of Neuenburg, and bail. of Kastede. Pop. 1,925.

WIEGANDSTHAL, a market-town of Prussia, in the regency of Liegnitz, circle and 15 m. SSE of Lauban, at the confluence of the Tafelfichte and Lausitzbach. Pop. 490. It has manufactories of linen, and several furnaces.

WIEGE-FATY, a commune of France, in the dep. of the Aisne, and cant. of Sains, 9 m. NNW of Vervins. Pop. 1,647. It has manufactories of beet-root sugar.

WIEGERSDORF, a village of Hanover, in the prov. of Hildesheim, and bail. of Ilfeld. Pop. 412.

WIEGLEBEN, a village of Saxe-Coburg, in the bail. of Tonna. Pop. 270.

WIEGSTADTL, a town of Austrian Silesia, 28 m. NE of Olmutz. Pop. 1,300.

WIEHE, a town of Prussian Saxony, in the reg. of Merseburg, 26 m. NE of Erfurt. Pop. 1,700.

WIEHL, a village of Baden, in the circle of the Upper Rhine. Pop. 1,400.

WIEHRE, a village of Baden, in the Upper Rhine circle, bail. of Freiburg. Pop. 800.

WIEKEVORST, a commune and v. of Belgium, in the prov. and 20 m. ESE of Antwerp. Pop. 1,100.

WIELD, a parish in Hants, 6 m. W of Alton. Area 2,087 acres. Pop. in 1831, 248; in 1851, 307.

WIELICKZKA, a town of Austria, in Galicia, 8 m. SE of Cracow, at the N extremity of a spur of the Carpathian mountains. Pop. 4,500. The exclusive trade of this place is connected with its salt mines, which have been wrought for six centuries, and are still perhaps the richest in Europe.

The works at present extend over an area of 35,000 sq. fathoms; and the entire length of their galleries and passages is about 37 m., and the greatest depth yet attained is 743 ft. They are entered by a broad flight of steps cut through the superincumbent strata of marl, clay, and sand. The first traces of salt present themselves at a depth of about 15 fath. In some places the beds are only 20 ft. thick; in others, they attain a thickness of 100 ft. Every 400 cubic fath. of rock yield 100,000 cwts. of salt; and the annual yield is 700,000 cwts. On the occasion of the partition of Poland in 1772, Russia and Prussia introduced a stipulation into the infamous treaty; according to which Austria cedes from the 900,000 cwts. of salt annually raised in the mines of Bothnia and W. 200,000 cwts. to Prussia, and 150,000 cwts. to Russia.

WIELLRANDOROV, a village of Prussia, in the reg. of Danzig, circle of Stargard. Pop. 400.

WIELONA, a small town of Russian Lithuania, in the gov. of Wilna, on the Niemen, 20 m. S of Rosienne.

WIELSBEKE, a commune and town of Belgium, in the prov. of W. Flanders, 18 m. S of Bruges, on the Lys. Pop. 1,900.

WIELUN, a town of Poland, 65 m. E of Breslau. Pop. 2,000.

WIEN. See VIENNA.

WIENERWALD, a mountain range of Lower Austria, a branch of the Styrian Alps, extending from Kahlenberg southward, across the valley of the Danube, towards St. Polten, about 70 m. It separates and gives name to the two circles of the Upper and Lower Wienerwald, otherwise known as the quarters 'above' and 'below' the forest of Vienna.

WIEPRZ, a river of Poland, which, rising from a lake to the SE of Zamosc, flows NNW, and joins the Vistula, near Stericza, after a course of 140 m.

WIERDE, a commune and village of Belgium, in the prov. and 4 m. SE of Namur. Pop. 1,200.

WIERDEN, a village of Holland, in the prov. of Overijssel, 14 m. NE of Deventer.

WIERINGEN, an island of Holland, in the Zuyder-Zee, opposite to the coast of N. Holland, and 11 m. SE of the Heider. It is about 10 m. in length, and 2 m. broad, and has a well-cultivated surface. Pop. 1,500. Its chief place is Hypolitushof.

WIERS, a commune and village of Belgium, in the prov. of Hainault, 22 m. W of Mons. Pop. 3,800.

WIERUM, a small port of Holland, in Friesland, 6 m. N of Dokkum.

WIERUSZOW, a town of Poland, on the Prosna, 81 m. S of Kalisch. Pop. 1,000.

WIESA, a river of Germany, which rises on the Feldburg, and flows WSW to the Rhine, which it joins 2 m. below Barb.

WIESBADEN, the capital of the duchy of Nassau, situated on the Salsach, 20 m. WSW of Frankfort, and on the Frankfort railway. It has a neat, clean, and animated appearance, and is yearly increasing in size by the construction of handsome streets and detached houses. Pop. 18,000, being double what it was twenty years ago. Its great attractions are its baths, and hot alkaline springs, which are annually visited by upwards of 15,000 strangers from all parts of Europe. Placed in a valley, with an open and fruitful country in the direction of the Rhine and the Maine, and bounded on the N and E by hills covered with apple, cherry, and walnut trees, behind which rises the Taunus range of mountains, W. is effectually protected from the cold winds from these quarters. On account of its position, it is at times exceedingly hot and oppressive in the summer months.

WIESE, or LAUKA, a town of Moravia, on the river Iglau, 6 m. E of Iglau.

WIESELBURG, or MOSORY, a county of Hungary, bounded on the N by the Danube, and on the W by Lower Austria. Its area is about 740 sq. m. Pop. 26,000, a mixture of Germans and Croats.—Its chief town of the same name is on a branch of the Danube, 21 m. SSE of Presburg. Pop. 2,500.

WIESEN, a district of the grand-duchy of Baden, of which it forms the SW corner. It contains the south part of the Briegau, and the district of Sausenburg.—Also a small river of Germany, which rises in the Black forest, and falls into the Rhine opposite to Huningen.

WIESENBRONN, a town of Bavarian Franconia, near Kitzingen. Pop. 100.

WIESENTEIG, a town of Württemberg, 18 m. NW of Ulm. Pop. 1,200.

WIESENT, a small river of Bavaria, which falls into the Regnitz at Forchheim.

WIESENTHAL, a village of Baden, 4 m. E of Philippsburg. Pop. 900.—Also a town of Saxony, 12 m. SSE of Schwarzenburg. Pop. 1,500.

WIESENTHIED, a village of Bavaria, in Lower Franconia, 19 m. E of Würzburg. Pop. 1,100.

WIESLOCH, a town of Baden, 8 m. S of Heidelberg. Pop. 2,700.

WIETLISBACH, a town of Switzerland, in the cant. of Bern, 6 m. ENE of Soleure.

WIGAN, a parish and parl. borough in the copalatin of Lancaster, intersected by the Leeds and Liverpool canal, the North Union line of railway from the Liverpool and Manchester, and the Grand Junction lines. Besides the town of W. the parish comprises the chapelrys of St. George, Abram, Billinge-Chapel-end, Haigh, Hindley, Holland, Pemberton, and Scholes-Church; and the townships of Billinge-higher-end, Dalton, Ince, Orrel, and Winstanly. Area of the parish, 24,433 acres. Pop. in 1801, 25,552; in 1831, 44,486; in 1851, 63,287. Area of the township, 2,161 acres. Pop. in 1801, 10,989; in 1831, 20,774; in 1851, 31,941. The borough having a pop. of 31,941 in 1851, returns 2 members to parliament. The number of electors registered, in 1837, was 551; in 1852, 718. The town, which is situated on a rising ground, is bounded on the W by the river Douglas, has increased rapidly of late years. Many of the houses are old and ill built, but the more modern streets contain several good houses. W. is well situated for manufactures by steam power, being in the midst of coal mines. The vicinity is celebrated for producing coal of the species well-known as cannel or gamal coal, which may be turned in a lathe, and gives out a bright light when burning. The chief manufactures are those of cotton and iron. Amongst the fabrics produced here have been calicoes, fustians, checks, linens, &c., besides spun cotton yarn in large quantities; there are also manufactories of edge-tools, brased articles, and spades, and other agricultural implements.

WIGBOROUGH (GREAT), a parish in Essex, 7 m. SSW of Colchester, bounded by a creek of the Blackwater river called Verley. Area 2,585 acres. Pop. in 1831, 434; in 1851, 471.

WIGBOROUGH (LITTLE), a parish in Essex, 7½ m. SSW of Colchester, bounded on the E by the Mersea channel, and on the S by the Verley; both creeks are branches of the Blackwater. Area 1,168 acres. Pop. in 1831, 123; in 1851, 89.

WIGGENHALL-ST.-GERMAN, a parish in Norfolk, 4 m. SW by S of Lynn-Regis, on the river Ouse, near the Eaubrink cut. Area 1,319 acres. Pop. in 1831, 552; in 1851, 750.

WIGGENHALL (ST.-MARY), a parish in Nor-

folk, 5 m. SW of Lynn-Regis, on the river Ouse, near the Eaubrick cut. Area 2,807 acres. Pop. 325.

WIGGENHALL (St. MARY MAGDALENE), a parish in Norfolk, 5½ m. SSW of Lynn-Regis, on the river Ouse. Area 4,248 acres. Pop. in 1831, 845.

WIGGENHALL (St. PETER), a parish in Norfolk, 5 m. SW of Lynn-Regis, on the river Ouse. Area 944 acres. Pop. in 1831, 114; in 1851, 162.

WIGGINTON, a parish in Hertfordshire, 1½ m. SE of Tring, near the Grand Junction canal, and the London and Birmingham railway. Area 1,662 acres. Pop. in 1831, 536; in 1851, 643.—Also a parish in Oxford, 5½ m. WNW of Deddington. Area 1,790 acres. Pop. in 1831, 327; in 1851, 314.—

Also a chapelry in the parish of Tamworth, Staffordshire, 1½ m. W of Tamworth station, on the Birmingham and Derby railroad. Pop. in 1851, 593.—Also a parish in the N. R. of Yorkshire, 5 m. N of York. Area 1,465 acres. Pop. in 1831, 359; in 1851, 374.

WIGGLESWORTH, a township in the p. of Long Preston, W. R. of Yorkshire, 6½ m. SSW of Settle. Area 4,089 acres. Pop. in 1851, 850.

WIGGONBY, a township in the p. of Aikton, Cumberland, 5 m. NE of Wigton. Pop. in 1851, 219.

WIGHILL, a parish in Yorkshire, 3 m. N by W of Tadcaster. Area 2,568 acres. Pop. in 1851, 296.

WIGHT (Isle of), a beautiful island, politically belonging to Hampshire, washed, on the NW and NE, by the Solent sea, and on the other sides by the English channel. It lies opposite the mainland part of Hampshire, from Portsmouth on the E, to a point 4 m. beyond Lymington on the W. The sound or channel called the Solent sea, varies in breadth from 2 to 5 m.; and is believed to have been formed by a gradual encroachment of the ocean upon a connecting belt of low land, which in the time of the Romans may have been an isthmus or passable at low water. The island has, in a general view, a four-sided outline, whose angles face the cardinal points of the compass; but it is acutely prolonged on the W, somewhat rounded on the N and S, and gently curved and indented in its general coast-line. Its greatest length from E to W, or from the Needles to Foreland-farm, is nearly 23 m.; its greatest breadth, from its N to its S angle, is about 13 m.; and its superficial extent is estimated at from 106,000 to 125,000 acres. A steamer of ordinary size can easily circumnavigate the island in about 8 hours, in good weather. The Southampton railway has brought the isle of W. within 4 hours' distance of the metropolis. The passage from Southampton to Cowes is usually performed by the steamers in 1½ hour; that from Portsmouth to Ryde in half-an-hour. Along nearly the whole of the NW, the coast slopes gently to the water's edge, and possesses no feature of scenic interest; around and toward the W angle it becomes rocky, broken, precipitous, and romantic; and along the SW and the SE, commonly called 'the Back of the Island,' it breaks down in a richly varied series of cliffs, often sheer and abrupt, or high and very bold, and everywhere replete with interest to both the geologist and the lover of landscape. The general surface of the island lies at a considerable height above sea-level. The water-shedding line uniformly follows the trending of the S coast, and is distant from it never more than 2½ m., and generally less than 1 m.; so that all the rivers and rivulets flow leisurely to the N. Blackgang-chine comes down the seaward face of a hill 830 ft. above sea-level, the loftiest height in the island. From a point 1½ m. E of Blackgang, a

singularly romantic and grand tract, called Undercliff, whose characteristic features are those of a great landslip, extends nearly 6 m. to Bonchurch. Shanklin-chine, 2½ m. NE of Undercliff, is about ½ m. in length, and its width and depth, at the mouth, are respectively about 180 and 270 ft.—Culver cliffs, 4 m. farther to the NE, are a series of chalky precipices 500 ft. high.—Bambridge-down, which extends inland from the cliffs to the vale of the Brading, and forms the east end of the great bisecting range of the island, commands a panoramic view which, for combination of extent, variety, and magnificence, excels most others seen in the country.

Bays and Rivers.] Alum, Toland, and Colwell bays indent the NW coast, the first in the immediate vicinity of the W extremity; the third at the distance of 3½ m.; and the second in the centre. The river Yar enters the sea 2 m. NE of Colwell bay; it is between 3 and 4 m. long, and over much the greater part of its length it is tidal, and has the character of an estuary. Newton bay opens nearly 4 m. farther NE. Thorness and Gurnet bays are situated respectively 2½ and 4 m. NE of Newton bay. The Medina—anciently called the Mede, and disputing with the Brading the honour of being the monarch-stream of the island—enters the sea at Cowes harbour, the N point of the country, 1½ m. from Gurnet bay. This river rises near Down court, within less than 1½ m. of the S angle of the island; and it performs due northward an entire run of about 12 m. It is tidal, navigable, and slenderly of an estuary character, 4½ m. up to Newport. Brading river opens upon St. Helen's roads, 1½ m. NW of Foreland, on the E extremity of the island. This river rises near Niton, 1 m. from the source of the Medina, and flows upwards of 7 m. N and NE to Horringfield. The bays or creeks along the whole of the SE and SW coasts, though numerous, are all so small as simply to render the coast in a gentle degree curvilinear. Pure water springs abound. At Shanklin is a spring which holds in solution some proportion of alum; at Pitland is one impregnated with sulphur; and at Blackgang, under Chale cliff, is a very strong aluminous spring.

Mineralogy.] Chalky formations constitute all the higher parts of the island. Schists of various kinds, but all secondary, lie under these, and occasionally look out on the south coast. Fossils—particularly bivalve and turritated shells, and more particularly ammonites of from an inch to 1½ foot in diameter—are very abundant in the cliffs, and may often be gathered in large quantity from fragments of rock which have fallen 200 or 300 ft., and lie upon the beach. Some of the schists are of a kind to make good whetstones. Limestone, unusually rich in fossils, is burnt for manure. Coal of good quality, about 3 ft. thick in the upper stratum, and dipping to the N, commences at Bambridge cliff, and extends across the S district of the island. A vein of red ochre, and veins of white sand and fuller's earth, occur on respectively the south and the north sides of the coal-bed. Sandstone of various kinds is plentiful; but, as a building-material, though at one time worked, it has long been abandoned in favour of the beautiful Portland stone. A siliceous and silvery-looking sand occurs in immense beds at Freshwater and Alum bays, and has, for a long period, been exported to a great annual amount for the glass and china works of London, Bristol, and Worcester. Brighter and various coloured sands, at the same places, are used in smaller quantities, for being so disposed in phials, as to represent fancy scenes behind the glass, and form mantle-piece ornaments. Fine clay abounds in various localities. Native alum, in large quantities, and red and yellow ochres, in such strata as beautifully variegate the tinting of the cliffs, occur at Alum bay. Small masses of native sulphur are often seen beneath the cliffs; and copperas stones were, for many years, so abundant on the shores, that several small vessels were employed in conveying them to London for the extraction of their copperas.

Climate and Soil.] The Isle of Wight has obtained a reputation for salubriousness and genial warmth, and most of the amenities of a benign climate, so high and of so long standing as ill to brook dispute. The temperature in winter, owing to saline exhalations from the encincturing sea, is two or three degrees higher than on most of the adjacent

mainland, and considerably higher than in the colder parts of England; but in consequence of the hilly ranges constantly attracting vapours, all the central districts are subject to heavy rains, and, in winter, fling humidity and gloom down all the valleys and the slowly descending slopes. See article *UNDERCLIFF*.—The soil is very various; to a large extent, a poor, yellowish, ill-drained clay; but chiefly a strong loamy earth, easy of culture, and exceedingly fertile—so much so, that the natives are in the habit of boasting that their fortunate island yields seven times as much as its own population consumes. The uplands are disposed in pasturage, and maintain about 40,000 fine-fleeced sheep. Farms are generally of a moderate size, and pay a rental of from £100 to £400; but a few are so high as £800.

Trade.] The principal manufactures are those of starch and salt. There are numerous corn-mills on the island, and several breweries. The chief exports are grain, malt, wool, salt, and siliceous sand; and the chief imports are coals, timber, iron, hemp, fruits, and wine. The harbours of the island, particularly that of Cowes, have increasingly become ports of call for outward-bound ships making the final arrangements for their voyage, and inward-bound ships landing their letters and passengers.

Divisions and General Statistics.] The island is divided, politically, into the two hundreds of East and West Medina, which are separated from each other by the river whence they have their name; and ecclesiastically into 80 parishes, which constitute an archdeaconry in the dio. of Winchester. The civil administration is conducted by a governor, a vice-admiral, and other honorary functionaries. The island, which is considered as a county of itself under the Reform act, returns a member to parliament. The polling-stations are Newport and West Cowes. Electors registered in 1837, 1,167; in 1850, 1,877. Pop. in 1377, 8,000; in 1777, 18,024; in 1801, 22,802; in 1821, 31,611; in 1831, 35,363; in 1841, 42,547; in 1851, 50,324.

NEWPORT is the capital of the island. COWES, YARMOUTH, CARISBROOKE, RYDE, BRADING, and NEWTON, are separately described. Ventnor is a little but rapidly rising and elegant town of villas on the skirt of Undercliff. See *VENTNOR*. St. Helen's Green is a village of neat, thatched, scattered cottages on a creek of Brading harbour, 4 m. E of Ryde. St. Laurence is celebrated for the smallest parish-church in the kingdom. The other noticeable villages are Newchurch, Niton, Chale, Shorwell, Brixton, Gatcombe, Whippingham, Clatterford, Brook, Shalfleet, Binstead, Arreton, Godshill, Yaverland, Motteston, Calbourne, Sandown, Wootton, and Bembridge, most of which will be found separately described in our pages.

History.] The name of the Isle of Wight among the Britons was *Gwith* or *Gwict*—a word signifying 'divorced,' or 'separated,' and supposed by some writers to have been suggested of the island's disavowment from the mainland, by the gradual formation of the Solent sea. The name known to the Romans was *Vecta*, or *Vectis*. In the year 43, according to Tacitus' *Life of Agricola*, Plantinus, the Roman general, conquered the Isle of Wight. In 530, Cerdic, a Saxon chieftain, founder of the kingdom of Wessex, subdued the island, and colonized it with Jutes and Saxons. In 787 the Danes seized it. William Fitz-Osborne, afterwards Earl of Hereford, received from William I. the Isle of Wight as an independent lordship. Richard de Redvers, Earl of Devon, received from Henry I. a grant of the lordship of the Isle. Edward I. obtained the reversion of the lordship for the sum of 6,000 marks. In the reign of Richard II., the French made a descent upon the Isle, burnt Yarmouth, Newton, and Ryde, and unsuccessfully besieged Carisbrooke castle. Henry Beauchamp, duke of Warwick, was made king of the Isle of Wight by Henry VI., the king placing the crown on the duke's head with his own hand. In 1645, 2,000 French, from the fleet commanded by D'Annebault, landed on the island, but were obliged to withdraw hastily. Colonel Robert Hammond, being governor of the

Isle at the time when Charles I. unconditionally surrendered to him at Titchfield-house, the fallen monarch was conveyed by him to Carisbrooke.

WIGHTON, a parish in Norfolk, 2½ m. N by E of Little Walsingham. Area 2,982 acres. Pop. 562.

WIGLAND, a township in the p. of Malpas, co. palatine of Chester, 2 m. SSE of Malpas. Area 562 acres. Pop. in 1831, 265; in 1851, 203.

WIGMORE, a parish in Herefordshire, 10 m. NW of Leominster. Area 3,441 acres. Pop. 494.

WIGNEHIES, a commune of France, in the dep. of the Nord, and cant. of Trelon, 9 m. SE of Avesnes, near the r. bank of the Petite-Heule. Pop. in 1846, 2,413. It has manufactories of hosiery, wood-ware, staves, and charcoal, and a bleachery.

WIGOLDINGEN, a village of Switzerland, cant. of Thurgau, and bail. of Weinfelden. Pop. 359.

WIGRY, a lake of Russian Poland, in the woiwodie and obwod of Augustowo, 6 m. SE of Sawalki. It is upwards of 6 m. from N to S, and 1½ m. in medium breadth. Near the N extremity is an island on which is a convent which forms the residence of the bishop of Lithuania.

WIGSTADT. See *WIEGSTADT*.

WIGSTADTL, a market-town of Austria, in Bohemia, in the circle and 89 m. ESE of Koniggratz. Pop. 600.

WIGSTEIN, a village of Austria, in Silesia, in the circle of Troppau. Pop. 800.

WIGSTON (*MAGNA*), a parish and village of Leicestershire. Area 2,780 acres. Pop. in 1831, 2,174; in 1851, 2,441. The v. is situated ½ a m. W of the Wigton station on the Midland Counties railway, by which it is 4 m. distant from Leicester.

WIGTOFT, a parish in Lincolnshire, 7 m. SW of Bolton. Area 3,300 acres. Pop. in 1851, 741.

WIGTON, a parish in Cumberland, containing the market-town of the same name, the townships of Oulton, High and Low Waverton, and Woodside-Quarter. Area 11,800 acres. Pop. in 1831, 6,501; in 1851, 6,229. The town, situated in a tract of country which embraces little level land, yet scarcely can be called hilly, contains several well-built houses, and consists principally of two streets, the smaller one placed transversely at the extremity of the other. Some cotton goods are manufactured here, principally ginghams, muslins, and other fine fabrics.—Also a township in the p. of Harwood, W. R. of Yorkshire, 5½ m. N by E of Leeds. Area 1,170 acres. Pop. in 1831, 168; in 1851, 147.

WIGTON, a parish, port, and parl. borough, the capital of Wigtonshire, situated on the W side of Wigton-bay, 94 m. SW of Edinburgh. Pop. of p. in 1831, 2,337; in 1851, 2,824; of burgh in 1831, 1,977; in 1851, 1,556. It has no manufactures except the ordinary artisan products for local use, and little trade beyond the transfer of commodities for the supply of the circumjacent country. The most valuable part of the export trade is the annual shipment of probably, on the average, 10,000 or 12,000 bushels of grain, with a proportionate quantity of potatoes, and a small quantity of oatmeal. It unites with Stranraer, Whithorn, and New-Galloway in sending a member to parliament. Total constituency, in 1840, 320; in 1851, 400. W. gave the title of Earl to the family of Fleming.

WIGTON-BAY, the estuary or frith of the Cree, running NNW between the cos. of Wigton and Kirkcubright. Its extremities or headlands are Burrowhead in Wigtonshire, and the Slack of Ross in Kirkcubrightshire. Its entrance, measured is a straight line between these points, is 12 m. wide. Its length, measured from the middle of this line to a point a little N of Creetown, where the river begins to be estuary, is 15 m. Its breadth over the upper half slowly expands from 6 fms to 4 m.; and over the lower half averages about 7½ m. Fleet-bay opens from about the middle of its Kirkcubrightshire side. Of smaller bays which open from it, the chief on the Wigtonshire

side are Isle of Whithorn-bay, Port-Yarrow, Rigg-bay, Garliestown-bay, and the little estuary of the Bladenoch: on the Kirkcudbrightshire side, Bridgehouse, Boreness, Kirkcudbright, and Knockbrex bays.

WIGTONSHIRE, a county forming the W division of Galloway, and occupying the SW extremity, as well as containing the most southerly land of Scotland. It is bounded on the N partly by the Irish channel or frith of Clyde, principally by Ayrshire, and to a small extent by Kirkcudbrightshire; on the E by Kirkcudbrightshire; on the S by the Irish sea; and on the W by the Irish channel. The county lies between the parallels of $54^{\circ} 36' 45''$ and $55^{\circ} 3' 40''$ N lat., and between $4^{\circ} 15' 50''$ and $5^{\circ} 7' 10''$ W long. It extends from E to W between 30 and 31 m.; and from N to S between 28 and 29. Its form would be proximately square but for the enormous indentation of Luce-bay on the S, and the smaller though very considerable indentation of Loch-Ryan on the N. The superficial extent is variously stated by the New Statistical Account at 459 sq. m.; by the Rev. Samuel Smith, in his *View of the Agriculture of Galloway*, at 485.5 sq. m., or 244,498 Scottish acres; and by Chalmers, in his *Caledonia*, at 484 sq. m., or 309,760 statute acres. The district or double peninsula W of Luce-bay and Loch-Ryan, and of the isthmus of $6\frac{1}{2}$ m. which lies between them, is called the Rhinns of Galloway. The district which forms the broad large peninsula between Luce-bay and Wigton-bay is called the Machers. The remaining district, or all the country N of the Machers and E of Loch-Ryan, bears the loose general name of the Moors. Ordinary reckoning restricts the Machers to little more than one-half of the large peninsula, or to about 64 sq. m.; and, estimating the Rhinns at 116, it consequently assigns to the Moors about 305 sq. m., or an area not much more than double of the joint area of the other districts. The physical aspect of W. is not striking or broadly varied, and offers few large interesting landscapes. While almost uniformly tumulated, a restless and continuous sea of knolls and hillocks and hills, it aggregately rises less above sea-level than probably any other co. in Scotland. A plain or valley, bearing marks of having at a comparatively recent period lain under the sea, extends from Luce-bay to Loch-Ryan, and measures $6\frac{1}{2}$ m. in length, and about 3 m. in breadth. A considerable extent of low and level ground, also at a comparatively late date submarine, lies along the lower Cree, and the upper part of Wigton-bay. The heights, as the county recedes northward, become bolder and of a more decidedly hilly character than near the coast; and in the vicinity, or along the line of the boundary with Ayrshire, they often rise to 1,000 ft., and occasionally to not very far from 1,500 ft. above sea-level. The coast, except at the head of the three very large indentations of the sea, and in a few of the minor bays and creeks, is very generally—indeed almost continuously—bold and rocky; and though it aggregately extends to something upwards of 120 m., it contains comparatively few recesses where a large ship may safely ride at anchor, or attempt to land a cargo. The streams of W. are, for the most part, small and unsuited to topographical notice; yet, in a few instances, they afford admission, for a brief way, to light coasting-vessels, and are ornamental to a country of no great scenic beauty. The principal are the Cree and the Bladenoch, southward to Wigton-bay; the Tarf, a tributary of the Bladenoch; and the Luce southward; and Piltanton-burn south-eastward, to the head of Luce-bay. The lakes are very numerous; but are all small, and aggregately cover only $7\frac{1}{2}$ sq. m.

Geology, Soil, and Agriculture.] The most prevalent rocks are primary, transition, and secondary schists. Greywacke, greywacke slate, and argillaceous schist, are particularly abundant. Hillocks and hills occur of till and gravel, evidently formed by water, and singularly contrasting in the roundness and smoothness of their surface, to the roughness of the rest of the country. Slate quarries have been worked in Kirkmaiden. Sandstone occurs in the N of the Rhinns. Limestone occurs in no great plenty, and is generally of too poor a quality to be worked for the uses of the farmer. The soil of nearly all the Machers and a considerable part of the Moors is of a hazel colour, and of the species sometimes termed dry loam, though it often inclines to gravel. The carse of Baldoon, which constitutes the larger part of the low ground along the Cree, and measures about 3,000 acres, has all the qualities of carse, or strong clay soil, and justly possesses the fame of being the richest and best cultivated land in W. The lands of the Rhinns, in a general view, possess all the characters of the best soils of Galloway, and are, to a large extent, arable. The central and northern sections of the district of the Moors present a pervading aspect of extreme barrenness. The land of the county lies, for the most part, under entail; and is little subdivided among proprietors. Farms are generally of medium size, and are usually let on leases of 19 years. The proportions of the whole area which are arable and pastoral are to each other respectively as 7 to 11; or the arable grounds amount to about 35 per cent. of the entire county. The average rent of land throughout the co. is at present little more than 6s. per acre; but, in 1810, it amounted to 8s. 6d. W. is celebrated, in common with the eastern and larger section of Galloway, for the excellence of its pastures, the good points of its peculiar breed of black cattle, and the largeness of its produce in oxen and sheep for the markets of England. It is an agricultural and a grazing co., to the almost total exclusion both of manufactures and of all such commerce as is unconnected with the exchange of the produce of the soil for foreign articles of local consumption. The only exports consist of grain, wool, sheep, and black cattle, which are sent to England and the west of Scotland; the imports are chiefly lime, coals, and all sorts of groceries, and manufactured goods from the markets to which the exports are taken, and occasionally timber from America, and timber and iron from the Baltic.

Towns, &c.] The royal burghs are Wigton, Stranraer, and Whithorn; and they, jointly with New Galloway in Kirkcudbrightshire, send a member to parliament. The existing burghs-of-barony are Portpatrick, Glenluce, and Newton-Stewart. The extinct burghs-of-barony are Invermessan, on the shore of Loch-Ryan; Myreton, in the parish of Penninghame; and Merton, in the parish of Mochrum. The principal villages, additional to the existing burghs-of-barony, are Garlieston, Isle-of-Whithorn, Port-Logan, and Stewarton. Wigtonshire sends a member to parliament. Constituency in 1840, 1,038; in 1851, 1,272. Pop. in 1801, 22,918; in 1811, 26,891; in 1821, 33,240; in 1831, 36,258; in 1841, 39,179; in 1851, 43,389.

History.] In ancient times, and even for ages after the abdication of the Roman government in Britain, the powerful tribe of the *Novantes* inhabited the territory which now forms W. and the western half of Kirkcudbrightshire. They had *Leucophibia* on the site of the present Whithorn for their chief town, and possessed also another town, called *Rerigonium*, on the *Rerigonius* stream, the modern Loch-Ryan. The civil history of the co. will be found in our article GALLOWAY.

WIGUM, a village of Prussia, in the regency of Munster and circle of Ahaus. Pop. 260.

WIHERIES, a department and commune of Belgium, in the prov. of Hainault, arrond. and 12 m. SW of Mons. Pop. 1,548.

WIHLAW, a village of Austria, in Bohemia, in the reg. and bail. of Budweis. Pop. 210.

WIHLEN, a village of Baden, in the circle of the Upper Rhine, and bail. of Lorrach. Pop. 1,105.

WIHOGNE, a department and commune of Belgium, in the prov. and arrond. of Liege. Pop. 210.

WIHORAN, a village of Austria, in Bohemia, in the reg. of Pilsen, and bail. of Neugedein. Pop. 590.

WIHR-AU-VAL, a town of France, in the dep. of the Haut-Rhin, and cant. of Wintzenheim, 8 m. WSW of Colmar. Pop. 822.

WIHURGHULLY, a village of New South Wales, in the co. of Durham, at the confluence of Myall creek with Williams river, and 158 m. from Sydney.—Also a hill of the same co. near Tatsit creek.

WIJUHEN, a village of Holland, in the prov. of Gelderland, 6 m. SW of Nijmegen. Pop. 1,000.

WIK, a village of Holstein, in the bail. of Kronshagen. Pop. 610.

WIKANAMSH, a village of Vancouver's island, on a bay of the W coast, to the S of Nootka.

WIKAU, a village of Austria, in Bohemia, in the reg. of Pardubitz, and bail. of Bohimsch-Brod.

WIKE, a township in the p. of Birstall, W. R. of Yorkshire, $3\frac{1}{4}$ m. NW of Bradford. Area 920 acres. Pop. in 1831, 1,918; in 1851, 2,916.—Also a township in the p. of Harewood, Yorkshire, $6\frac{1}{2}$ m. NNE of Leeds. Area 880 acres. Pop. in 1851, 131.

WIKEOENST, a village of Belgium, prov. of Antwerp and arrond. of Mecheln. Pop. 1,021.

WIKISHKEN, a village of Prussia, in the reg. of Gumbinnen, and circle of Darkehmen. Pop. 210.

WIKLANTITZ, a village of Austria, in Bohemia, in the regency of Eger, and bail. of Patzan. Pop. 210. It has a castle and a potash-factory.

WIKLEK, a village of Austria, in Bohemia, in the reg. of Gitschin, and bail. of Elumetz. Pop. 500.

WIKOLINE, a village of Prussia, in the regency of Breslau, and circle of Guhran. Pop. 240.

WILANTITZ, a village of Bohemia, reg. of Gitschin, and bail. of Konigenhof. Pop. 640.

WILATKOWO, a village of Prussia, in the reg. of Bromberg and circle of Gnesen. Pop. 370.

WILATOWO, or **WILLATOWO**, a town of Prussia, in the regency of Bromberg, circle and 85 m. S of Mogillno, between two lakes. Pop. 430.

WILAWITAL, a creek of New South Wales, in the co. of Gloucester, an affluent of Port Stephens.

WILBARSTON, a parish in Northamptonshire, 6 m. E of Market-Harborough. Area 2,800 acres. Pop. in 1831, 681; in 1851, 754.

WILBERFORCE, a town of Upper Guinea, on the Sierra Leone coast, 2 m. SW of Freetown.—Also a colony of New South Wales, in the co. of Cook, on the left bank of the Hawkesbury, opposite Windsor, and 83 m. NW of Sydney. This colony is also called Gabramatta.—Also a headland on the N coast of New South Wales, to the NW of Melville bay, in S lat. $11^{\circ} 53'$, and E long. $136^{\circ} 39'$.

WILBERFOSS, a parish in the E. R. of Yorkshire, containing the townships of Newton-upon-Derwent and W. Area 2,870 acres. Pop. 367.

WILBRAHAM, a township of Hampden co., in the state of Massachusetts, U. S., 72 m. W by S of Boston, drained by the head branches of Scantic river, and other affluents of the Connecticut, and intersected by the Western railway. Pop. of township in 1840, 1,864; in 1850, 2,127.

WILBRAHAM, or **WILBURGHAM** (GREAT), a parish in Cambridgeshire, 6 m. E of Cambridge. Area 1,800 acres. Pop. in 1831, 510; in 1851, 644.

WILBRAHAM (LITTLE), a parish in Cambridge-

shire, 7 m. E of Cambridge. Area 1,300 acres. Pop. in 1831, 315; in 1851, 397.

WILBRENNING, a village of Prussia, in the regency and circle of Munster. Pop. 270.

WILBRINGHOVEN, a village of Prussia, in the regency of Cologne, and circle of Waldbrol. Pop. 230.

WILBURGSLATTEN, a village of Bavaria, in the circle of Middle Franconia, and presidial of Dinsfelsbuhl. Pop. 390.

WILBURTON, a parish in Cambridgeshire, $6\frac{1}{2}$ m. SW of Ely. Area 2,233 acres. Pop. 562.

WILBY, a parish in Norfolk. Area 1,400 acres. Pop. in 1831, 123; in 1851, 106.—Also a parish in Northamptonshire, $2\frac{1}{4}$ m. SW by W of Wellingborough. Area 1,120 acres. Pop. in 1831, 286; in 1851, 468.—Also a parish in Suffolk, 6 m. SE of Eye. Area 1,844 acres. Pop. in 1851, 620.

WILCHENREUTH, a village of Bavaria, in the circle of the Upper Pfalz, and presidial of Weiden. Pop. 200.

WILCHINGEN, a village of Switzerland, in the cant. of Schaffhausen, and bail. of Unterlettan. Pop. 1,345.

WILCHWA, a village of Prussia, in the regency of Oppeln, and circle of Ribnitz. Pop. 330.

WILCOT, a parish in Wilts, 2 m. WNW of Pewsey, containing the chapelry of Draycott-Poliatt, and the tythings of Pare and Stowel. Area 2,668 acres. Pop. in 1831, 677; in 1851, 702.

WILCOTE, a parish in Oxfordshire, 4 m. N by E of Witney. Area 270 acres. Pop. in 1851, 10.

WILCOX, a county in the SW part of the state of Alabama, U. S., comprising an area, generally level and productive, of 906 sq. m., drained by the Alabama and its branches. Pop. in 1840, 15,278; in 1850, 17,352. Its cap. is Camden.

WILCZA, two villages of Prussia, in the regency of Posen, and circle of Pleschen. Pop. 300.

WILCZAK, a village of Prussia, in the regency and circle of Bromberg. Pop. 530.

WILCZE, a village of Prussia, in the regency and circle of Bromberg. Pop. 350.

WILCZYN, a town of Russia in Europe, in Poland, in the gov. of Warsaw, and obwod. of Konin. Pop. 400.

WILDA (OBER and UNTER), a village of Prussia, in the regency and circle of Posen. Pop. 420. It has an hospital.

WILD-ALPEN, a range of mountains on the confines of Styria and of the archduchy of Austria, to the NNE of Bruck, in the chain of the Noric Alps. They contain marble-quarries.

WILDAU, a village of Prussia, in the regency of Potsdam, and circle of Jüterbogk. Pop. 200.

WILDBACH, a village of Saxony, in the circle of Zwickau, and bail. of Stein, near Schneeberg. Pop. 502.

WILDBAD, a town of Würtemberg, in the Schwarzwald circle, 20 m. WSW of Stuttgart. Pop. 1,800. It is situated in a sombre valley of the Black forest, enclosed by steep pine-covered mountains, at an alt. of 1,335 ft. above sea-level. It is celebrated for its hot springs and baths, of a temp. ranging from 82° to 100° . Their chemical composition is the same, the amount of saline and gaseous substance being exceedingly small, and the solid residuum after an analysis of a pint of the water scarcely exceeding three grains: so that the medicinal properties of the water may be considered as principally depending upon its temp., in which it differs from most of the other German waters, which require to be either warmed or cooled down to the proper degree of heat for bathing. The water rises through a layer of sand, to a height of from 2 to 3 ft., into basins in which several persons bathe at the same

time. The rapid rivulet Ens flows behind the town; and the only carriage-road through the valley is constructed on its banks, which, beyond the baths, are planted with trees for a mile, forming the public promenade. There is in fact, notwithstanding the florid descriptions of W. indulged in by some writers, little either of beauty or romance in the environs of this spa, and its poor looking village. Wetzler states, that during the greater part of the year the climate is raw and cold; snow not unfrequently remaining on the neighbouring mountains till the middle of May: whilst from the deficiency of free ventilation, to which narrow valleys between wood-covered mountains are subject, the atmosphere must be considerably charged with moisture for some time after the falling of rain or heavy dew.

WILDBAD-GASTEIN, a village of Austria, in the regency of Linz, and circle of Salzburg, in the valley of Gastein, 4 m. from Hof. It is noted for its thermal springs and baths, and has an imperial castle formerly belonging to the princes of Salzburg. An aqueduct constructed in 1829, conducts the mineral waters to Hof.

WILDBAHN, a village of Prussia, in the reg. of Breslau and circle of Militsch. Pop. 250.

WILDBANK, a village of Prussia, in the reg. of Aachen and circle of Gupen. Pop. 210.

WILDBERG, a town of Württemberg, in the circle of the Schwarzwald, bail, and 6 m. N of Nagold, on the river of that name. Pop. 1,787. It has manufactories of woollen fabrics, and several paper-mills.—Also a village of Prussia, in the regency of Potsdam, and circle of Kuppin. Pop. 647.—Also a village in the regency of Stettin, and circle of Demmin. Pop. 268.—Also a village of Saxony, in the circle and bail of Dresden. Pop. 212.—Also a village of Switzerland, in the cant. of Zurich, and bail. of Pfaffikon, on the Toss. Pop. 990.

WILDBOAR-CLOUGH, a township in the p. of Prestbury, co. palatine of Chester, 6½ m. SE of Macclesfield. Area 4,980 acres. Pop. 447.

WILDEPENRIED, a village of Bavaria, in the circle of the Upper Pfalz, and presidial of Oberbiechtach. Pop. 310.

WILDEK, a hamlet of Hesse-Cassel, in the prov. of Lower Hesse, circle and 15 m. E of Rotenburg, on the Suhla. It has an ancient castle, formerly the residence of the landgraves of Hesse-Rotenburg.

WILDEMANN, a town of Hanover, in the territory and 3 m. NW of Klausthal, on the Innereste. Pop. 1,300. It is built in the form of a horseshoe.

WILDEN, a parish in Bedfordshire, 5½ m. NE by N of Bedford. Area 2,160 acres. Pop. 483.

WILDEN, a village of Prussia, in the regency of Arnberg, and circle of Siegen. Pop. 374.

WILDENAU, a village of Bavaria, in the circle of the Upper Pfalz, and presidial of Terschenreuth. Pop. 386.—Also a village of Austria, in the district above the Ens, and circle of the Inn. Pop. 280.—Also a village of Prussia, in the regency of Merseburg, and circle of Schweinitz. Pop. 260.—Also a village of Saxony, in the circle of Zwickau, and bail. of Grünham, near Schwarzenberg. Pop. 300.—Also a village in the bail. of Plauen, near Auerbach. Pop. 560.

WILDENBERG, a village of Bavaria, in the circle of Lower Bavaria, and presidial of Rottenburg. Pop. 200. It has a castle.

WILDENBRUCH, a village of Prussia, in the regency of Stettin, and circle of Griefenberg. Pop. 315.—Also a village of the regency of Potsdam, and circle of Zauch-Belzig. Pop. 210.

WILDENFELS, a seignory and town of Saxony, in the circle and bail. of Zwickau, and 17 m. SW of

Chemnitz. Pop. in 1837, 2,202; in 1843, 2,374; in 1849, 2,723. It has a castle belonging to the counts of Solm, and possesses manufactories of linen and hosiery.

WILDENHAG, a village of Austria, in the district above the Ems, circle of Hausruck, and bail. of Rogel. Pop. 260.

WILDENHAGEN, a village of Prussia, in the circle of Frankfurt, and circle of Sternberg. Pop. 220.—Also a village in the regency of Stettin, and circle of Kammin. Pop. 200.

WILDENHAIN, a village of Saxony, in the circle of Dresden, and bail. of Grossenhain. Pop. 441.—Also a village of Prussia, in the regency of Merseburg, and circle of Torgau, near Gelenburg. Pop. 450.

WILDENHOLZ, a village of Bavaria, in the circle of Middle Franconia, and presidial of Feuchtwang. Pop. 473.

WILDENHORTEN, a village of the duchy of Saxe-Altenburg, and bail. of Lumpzig. Pop. 200.

WILDENOW, a village of Prussia, in the reg. of Frankfurt, and circle of Friedeberg. Pop. 260.

WILDENRATH, a village of Prussia, in the reg. of Aachen, and circle of Heinsberg. Pop. 280.

WILDENREUTH, a village of Bavaria, in the circle of the Upper Pfalz, and presidial of Neustadt. Pop. 445. It has a castle.

WILDENROTH, a village of Bavaria, in the circle of Upper Bavaria, and presidial of Bruck. Pop. 240.

WILDENSCHWERT, or **AUSTONAD-ORLICZ**, a town of Austria, in Bohemia, in the circle and 29 m. E of Chrudim, on the Adler, at the confluence of the Trebowka and Stillen-Adler. Pop. 3,500. It has manufactories of varieties of linen and woollen fabrics, and of hosiery.

WILDENSEE, a village of Bavaria, in the circle of Lower Franconia, and presidial of Klingenberg. Pop. 200.

WILDENSFORG, a village of Bavaria, circle of Upper Franconia, presidial of Banberg. Pop. 290.

WILDENSFRING, a village of Schwarzburg-Rudolstadt. Pop. 460.

WILDENSTEIN, a village of Württemberg, in the circle of the Jaxt, and bail. of Crailsheim. Pop. 564.—Also an ancient fortress of Baden, in the circle of the See, bail, and 8 m. NW of Möskirch, on a rocky island of the Danube.

WILDENTHAL, a village of Saxony, in the circle of Zwickau, and bail. of Eibenstock. Pop. 469.

WILDENTHIERBACH, a village of Württemberg, in the circle of the Jaxt, and bail. of Gerabronn. Pop. 236. It has a castle.

WILDEREN, a department and commune of Belgium, in the dep. of Limburg, and arrond. of Hasselt. Pop. 163.

WALDERMIEMINGEN, a village of Austria, in the Tyrol, in the circle of the Inn, and bail. of Silz. Pop. 420.

WILDERSWEIL, a village of Switzerland, in the cant. of Berne, and bail. of Interlaken. Pop. 1,145.

WILDERVANK, a village of Holland, in the prov. of Groningen, arrond. and 11 m. SW of Winschoten. Pop. 2,800.

WILDESCHAUSEN, a parish-town of the duchy and 18 m. SSE of Oldenburg, and circle of Delmenhorst, on the l. bank of the Hunte. Pop. 2,100. It has a castle, and contains manufactories of hosiery, and several breweries.—Also a village of Prussia, in the regency of Leignitz, and circle of Goldberg-Haynau. Pop. 662.—Also a village of the regency of Erfurt, and circle of the Zeigenrück. Pop. 275.—Also a village of Württemberg, in the circle of the Danube, and bail. of Ravensburg. Pop. 259.

WILHELMSFELD, a village of Baden, in the circle of the Lower Rhine, and bail. of Heidelberg. Pop. 628.

WILHELMSGLUCK, a hamlet of Württemberg, in the circle of the Jaxt, and bail. of Hale. Pop. 33. It has extensive salt-works.

WILHELMSHAUSEN, a village of Hesse, in the prov. of Lower Hesse, and circle of Hofgeismar, on the Fulda. Pop. 587.

WILHELMSHUTTE, a hamlet of the duchy of Brunswick, in the circle and 8 m. NNW of Seisen, on the Notte. Pop. 585. It has ironworks.

WILHELMSHULD, a village of Prussia, in the reg. of Danzig, and circle of Karthaus. Pop. 270.

WILHELMSTEIN, a small fortress of the principality of Lippe-Schaumburg, and bail. of Hagenburg, on an island of Lake Steinhude, and 20 m. NE of Bückeburg.

WILHELMSTHAL, or NEUBACH, a village of Bavaria, in the circle of Upper Franconia, and presidial of Kronach. Pop. 528.

WILHELMSTHAL, or NEUSTADTEL, a town of Prussia, in the regency of Breslau, circle and 11 m. ESE of Habelschwert, at the foot of the Schneeberg. Pop. 530. It has manufactories of musical instruments, and several mills.

WILHERING, a village of Austria, in the circle

of Hansruck, on the r. bank of the Danube, 5 m. W of Linz. It is noted for its abbey.

WILHERMSDORF, a market-town of Bavaria, in the circle of Middle Franconia, and presidial of Radolzburg. Pop. 1,302.

WILIA. See WILIA.

WILIMOW, a village of Bohemia, in the regency of Pardubitz, and bail. of Czeslau. Pop. 1,100.

WILIMOWITZ, a village of Austria, in Bohemia, in the regency of Pardubitz, and bail. of Deutschbrod. Pop. 300.—Also a village in the bail. of Rutenberg. Pop. 200.—Also a village of Moravia, circle of Iglau, bail. of Trebitsch. Pop. 600.

WILKA, a village of Prussia, in the regency of Liegnitz, and circle of Lauban. Pop. 200.

WILKASSEN, a village of Prussia, in the regency of Gumbinnen, and circle of Lötzen. Pop. 200.—Also a village of the circle of Oletsko. Pop. 240.

WILKAU, a village of Prussia, in the regency of Breslau, and circle of Namslau. Pop. 710. It has two castles.—Also a village in the circle of Neumarkt. Pop. 400. It has a castle.—Also a village of the circle of Schweidnitz. Pop. 490. It has a castle, and several mills.—Also a village of the regency of Liegnitz, and circle of Glogau. Pop. 520.

It has a castle.—Also a village of the regency of Frankfurt, and circle of Züllichau. Pop. 290.—Also a village of Saxony, in the circle and bail. of Zwickau. Pop. 245.

WILKAU (GROSS), a village of Prussia, in the regency of Breslau, and circle of Nimptsch. Pop. 440. It has a castle and two mills.

WILKAU (ONEN), a village of Prussia, regency of Oppeln, and circle of Neustadt. Pop. 290.

WILKAWE, a village of Prussia, in the regency of Breslau, and circle of Trebnitz. Pop. 310.

WILKE, a village of Prussia, in the regency of Posen, and circle of Fraustadt. Pop. 620.—Also a village in the circle of Koslin. Pop. 440.

WILKEIM, a village of Prussia, in the regency and circle of Königsberg. Pop. 210.

WILKENBERG, a village of Prussia, in the regency of Arnberg, and circle of Olpe. Pop. 230.

WILKENDORF, a village of Prussia, in the reg. of Königsberg, and circle of Wehlau. Pop. 440.

WILKENDORF, or WILKOVO, a village of Prussia, in the regency of Königsberg, and circle of Kastenburg. Pop. 390.

WILKERSDORF, a village of Prussia, in the reg. of Frankfurt, and circle of Kustrin. Pop. 500.

WILKES, a county in the NE part of the state of Georgia, U. S., comprising an area generally level of 486 sq. m., drained by Fishing creek and its

affluents, and by branches of Broad and Little rivers. Pop. in 1840, 10,143; in 1850, 12,107. Its capital is Washington.—Also a county in the NW of the state of North Carolina, comprising an area finely diversified of 579 sq. m., bounded on the NW by Blue Ridge, and drained by Gadkin river and its branches. Pop. in 1840, 12,577; in 1850, 12,099. Its capital is Wilkesboro.

WILKESBORO, a township of Luzerne co., in the state of Pennsylvania, U. S., on the SE bank of Susquehanna river, and 82 m. NE by N of Harrisburg. Pop. in 1840, 1,718; in 1850, 2,723.

WILKESBORO, a village of Wilkes co., in the state of North Carolina, U. S., on the S side of Gadkin river. Pop. in 1850, 180.

WILKESVILLE, a township of Vinton co., in the state of Ohio, U. S., 68 m. SE by S of Columbus, drained by Raccoon creek, and intersected by the Hillsboro and Parkersbury railroad. Pop. in 1840, 238; in 1850, 1,037.

WILKINS, a township of Alleghany co., in the state of Pennsylvania, U. S., on the Pennsylvania

railroad, 7 m. from Pittsburg. Pop. in 1840, 2,165; in 1850, 2,500.

WILKINSON, a central county of the state of Georgia, U. S., comprising an area, finely undulating and generally fertile, of 388 sq. m., drained by Big-Sandy and Commissioner creeks, and affluents of Oconee river, by which it is bounded on the E, and intersected by the Georgia Central, and the Milledgeville and Gordon railroad. Pop. in 1840, 6,842; in 1850, 8,212. Its capital is Irwinton.—Also a county in the SW part of the state of Mississippi, bounded on the W by the Mississippi, and intersected by Buffalo creek. Pop. in 1840, 14,193; in 1850, 16,914. Its capital is Woodville.

WILKINSTOWN, a village in the p. of Kilberry, co. Meath, 5 m. N by W of Navan. Pop. 218.

WILKISCHEN, a village of Bohemia, in the reg. and bail. of Pilsen. Pop. 350. It has a castle.

WILKITEN, a village of Prussia, in the regency of Königsberg, and circle of Memel. Pop. 840.

WILKOMIERZ, a district and town of Russia in Europe, in the gov. and 60 m. from Wilna, on the Iwenta. Pop. 5,000.

WILKOWITZ (GROSS and KLEIN), two villages of Prussia, in the regency of Oppeln and circle of Benthen. Pop. 400.

WILKOWYSZKI, a town of Poland, in the gov. of Augustowo, obwod and 27 m. NNW of Kalwarya, Pop. 3,511, of whom $\frac{1}{2}$ are Jews, and the remainder Christians.

WILKESBY, a parish in Lincolnshire, 5 m. SE of Horncastle. Area 670 acres. Pop. in 1851, 66.

WILL, a county in the NW part of the state of Illinois, U. S., comprising an area of 1,152 sq. m., drained by Iroquois and the Kankakee, affluents of the Illinois, and intersected by the Chicago branch of the Central railroad, the Chicago and Mississippi railroad, and by the Illinois and Michigan canal.

WILLAMETTE, a river of Oregon, which rises at the foot of the Cascade Range in California, in N lat. 42°, and flows in a N course of about 200 m. to the Columbia, which it joins about 8 m. below Fort Vancouver, in N lat. 46° 30', W long. 122° 30'. It winds through fertile prairies now and then skirted by forests of fir, pine, and cedar, and receives many considerable tributaries, all of which have traversed their whole length through a fine country interspersed with groves of oak. About 25 m. from its confluence with the Columbia, the W. is interrupted by a series of falls. On arriving near these, the river spreads out into a wide, deep basin, and runs slowly and smoothly until within $\frac{1}{2}$ a mile of the falls, when its velocity increases, its width diminishes, eddies are formed in which the water turns back as if loth to make the plunge but is forced forward by the water in the rear, and when still nearer, it breaks upon the volcanic rocks scattered across the channel, and then precipitates itself over an almost perpendicular ledge of 25 ft., presenting a somewhat whitened column. Below the falls, for the distance of $\frac{1}{2}$ a m., the channel of the river is confined by ledges of basaltic rocks to about 200 yds. in width. About 1 m. below the falls, the Clackamas river enters from the E, which takes its rise near Mount-Hood, one of the snow peaks of the Cascade mountains. Here the Clackamas rapids form another obstacle in the navigation of the W.; but the difficulties here presented are of minor importance—at almost any stage of water, the boats of the Hudson-bay company ascend and descend with but little difficulty. From this place to the mouth of the W., a distance of 25 m., navigation is good, as the tide runs up to the foot of the Clackamas rapids. Oregon city—as it is called—has been founded on the E side of the Wil-

lametta, at the falls, on a piece of land which a few years ago was a dense forest of fir and underbrush. The city is now incorporated with a pop. of above 500.

WILLAND, a parish in Devon, $2\frac{1}{2}$ m. NE of Col-lumpton. Area 969 acres. Pop. in 1851, 398.

WILLANMEZ, a group of islands of the South Pacific, in the archipelago of New Britain, and to the N of the island of that name. The most northerly of the group, also called Willanmez, is in 8 lat. 5°, and E long. 150° 10'. It is mountainous and indented by deep bays.

WILLANPUIS, a department and commune of Belgium, in the prov. of Hainault, and arrond. of Tournai. Pop. 581.

WILLANZHEIM, a village of Bavaria, circle of Middle Franconia, presidial of Bobart. Pop. 732.

WILLASTON, a township in the p. of Wyburn-bury, co.-palatine of Chester, $1\frac{1}{2}$ m. E by N of Nant-wich. Area 967 acres. Pop. in 1851, 147.—Also a township in the p. of Nestor, co.-palatine of Ches-ter, 3 m. E of Great Nestor. Area 1,941 acres. Pop. in 1851, 317.

WILLATOWO, or **WILATOWO**, a town of Prus-sia, in the regency of Bromberg, circle and 7 m. S of Mogilno. Pop. in 1843, 510.

WILLBICH, a village of Prussia, in the reg. of Erfurt, and circle of Heiligenstadt. Pop. 513.

WILLEBADESSEN, a town of Prussia, in the regency of Minden, and circle of Warburg, on the Netze. Pop. 1,315. It is enclosed by walls, now much dilapidated, and entered by two gates.

WILLEBRINGEN, a department and commune of Belgium, in the prov. of Brabant, and arrond. of Louvain. Pop. of dep., 607; of com., 411.

WILLEBROECK, a commune and town of Bel-gium, in the prov. and 13 m. S of Antwerp, and arrond. of Malines, on the Rupel at the junction of the Brussels canal. It has building docks, distil-leries of gin, vinegar manufactories, breweries, and carries on an active trade in butter, chicory, and grain.

WILLEM, a river of Australia, in the SW part of De Witt Land, which throws itself into the Indian ocean, near the Cape, and to the SW of a bay of the same name. It has a narrow mouth, encumbered with rocks.—Cape Willem or Murat is in 8 lat. 21° 37', and E long. 60° 20'.

WILLEM, GUILLAUME, or **EXMOUTH**, a bay of the W coast of Australia, in De Witt Land, in 8 lat. 22°, enclosed on the W by Cape North-West or Vliaming.

WILLEMEAU, a department and commune of Belgium, in the prov. of Hainault, and arrond. of Tournai. Pop. 462.

WILLEMS, a commune of France, in the dep. of the Nord, and cant. of Lannoy, 10 m. E of Lille. Pop. 1,735.

WILLEMSTAD, a town of Holland, in the prov. of North Brabant, arrond. and 18 m. WNW of Breda, on the l. bank of the Maas, called the Hol-lands-Diep, in N lat. 41° 33'. Pop. 1,980. It is fortified, and has a harbour. This town was founded in 1583, by the Prince of Orange.

WILLEMSTAD, a town of the Dutch Antilles, the capital of and on the S coast of the island of Cu-raçao, in N lat. 12° 7', and W long. 69°. Pop. 8,000. It is large, handsome, and well-built, and the port is one of the safest of the New world. The en-trance is narrow, but within are two fine basins, perfectly sheltered, and capable of containing ves-sels of the largest size. This town is the entrepot of an active trade.

WILLEN, or **WYLLIEN**, a parish in Bucks, $1\frac{1}{2}$ m. S of Newport-Pagnell. Area 450 acres. Pop. 98.

WILLENBERG, a town of Prussia, in the reg. and 90 m. SSE of Königsberg. Pop. 2,000.

WILLENHALL, a chapelry in the p. of Wol-verhampton, Staffordshire, 8 m. W of Walsall Area, with Wednesfield township, 5,580 acres. Pop. of chapelry in 1831, 5,834; in 1851, 11,931. Coal and ironstone are raised here to a considerable ex-tent, and sent along the Wyrley and Easington canal. The village—which is midway between Wol-verhampton and Walsall—was in a flourishing con-dition in the reign of Queen Elizabeth. Its iron manufactures, especially that of locks, bits, and keys, have now arrived at a remarkable degree of perfection.—Also a hamlet in the parish of the Holy Trinity, Coventry, $2\frac{1}{2}$ m. SE by E of Coventry. Area 440 acres. Pop. in 1831, 120; in 1851, 107.

WILLERBY, a parish in the E. R. of Yorkshire, 6 m. S by W. of Scarborough, containing the town-ships of Binnington, Saxton, and W. Area 4,180 acres. Pop. in 1831, 356; in 1851, 422.

WILLERSEY, a parish in Gloucestershire, 3 m. W of Chipping-Camden. Area 1,344 acres. Pop. in 1831, 327; in 1851, 373.

WILLERSLEY, a parish in Herefordshire, 7 m. ESE of Hay. Area 280 acres. Pop. in 1851, 5.

WILLESBOROUGH, a parish in Kent, 2 m. SE by E of Ashford. Area 1,457 acres. Pop. in 1841, 641; in 1851, 1,022.

WILLESDEN, or **WILSDON**, a parish in Middle-sex, 8 m. NW by W of St. Paul's. Area 4,190 acres. Pop. in 1831, 1,876; in 1851, 2,989.

WILLESLEY, a parish of Derby, locally within Leicestershire, $2\frac{1}{2}$ m. SW of Ashby-de-la-Zouch. Area 910 acres. Pop. in 1831, 63; in 1851, 48.

WILLEY, a parish in Salop, 5 m. NW by N of Bridgenorth. Area 1,330 acres. Pop. in 1831, 159; in 1851, 144.—Also a parish in Warwickshire, 7 m. N by W of Rugby. Area 970 acres. Pop. 137.

WILLIAM (FORT). See **FORT-WILLIAM**.

WILLIAM (MOUNT), a mountain in South Shet-land, in S lat. 64° 45', W long. 63° 51'.—Also a mountain of Victoria, in Australia, in S lat. 37° 15', E long. 142° 25', the loftiest summit in the Gran-pian range.

WILLIAM (POINT), a cape on the W coast of North America, forming the S point of the entrance into Bellingham's bay, in N lat. 48° 37'.

WILLIAMS, a county in the NW of Ohio, U. S. Area 432 sq. m. Pop. 8,108. Its cap. is Bryan.

WILLIAM'S ISLAND, an island of Australia, in Spencer's gulf, in S lat. 35° 6', E long. 136°.

WILLIAM'S RIVER, a river of Vermont, U. S., which rises in Chester, and runs into the Connecti-cut, 3 m. N of Bellows-falls.

WILLIAMSBOROUGH, a township of Granville co., North Carolina, on a creek which falls into the Roanoke, 42 m. N by E of Raleigh.

WILLIAMSBURG, a township of Hampshire co., Massachusetts, U. S., 90 m. W of Boston. Pop. 1,500.—Also a township of Clermont co., Ohio, 82 m. SW of Columbus. Pop. 1,900.—Also a village of James co., Virginia, 46 m. ESE of Richmond. It is situated between two rivulets, one of which flows into York, and the other into James river. Pop. 877. The college of William and Mary, founded here in 1691, has 7 professors.—Also a district in the NE part of S. Carolina. Area 1,067 sq. m. Pop. in 1850, 12,477. Its cap. is Kingston.—Also a village of Jackson co., Tennessee, on the N side of the Cumberland, about 15 m. ENE of Carthage.—Also a township of Dauphin co., Pennsylvania, at the junction of the Swatara and Little Swatara, 23 m. NNE of Harrisburg.—Also the cap. of King's co., in New York, on the East river, 3 m. E by N of New York. Pop. in 1840, 5,094; in 1850, 30,785.

It has extensive ship-yards, and varied and extensive manufactures.

WILLIAMSFIELD, a township of Ashtabula co., Ohio, U. S., 158 m. NE of Columbus.

WILLIAMSON, a central county of the state of Illinois, U. S., comprising an area of 432 sq. m., and intersected by the Sangamon and Massac railway, drained by Muddy and Saline creeks. The surface is diversified, but generally fertile. Pop. in 1840, 4,457; in 1850, 7,216. The capital is Marion.—Also a central county of the state of Tennessee, comprising an area of 536 sq. m., drained by Harpeth river, and intersected by the Nashville and New Orleans railway. It has a finely undulating surface, but is generally fertile. Pop. in 1840, 27,006; in 1850, 27,201. Its capital is Franklin.—Also a central county of the state of Texas, comprising an area of 1,187 sq. m., drained by San Gabriel river and its N and S forks, and by Brushy creek. It is finely diversified, and generally productive. Pop. in 1850, 1,568. Its capital is Georgetown.—Also a township of Wayne co., in the state of New York, 182 m. W by N of Albany, drained by affluents of Lake Ontario.—Pop. in 1850, 2,380.

WILLIAMSPORT, a village of Warren co., in the state of Indiana, U. S., on the W bank of Wabash river, 69 m. NW by W of Indianapolis, and intersected by the Chesapeake and Ohio canal, and by the Franklin railroad. Pop. in 1840, 350; in 1850, 450.—Also a village of Lycoming co., in the state of Pennsylvania, on the W branch of Susquehanna river, 66 m. N by W of Harrisburg, and on the Williamsport and Elmira, and the Sunbury and Erie railroads. Pop. in 1840, 1,353; in 1850, 1,615.

WILLIAMSTON, a village of Martin co., in the state of North Carolina, U. S., 88 m. E of Raleigh. Pop. in 1840, 250; in 1850, 300.

WILLIAMSTON, a parish in Pembrokeshire, 4 m. NW of Tenby. Area 1,431 acres. Pop. 551.

WILLIAMSTOWN, a maritime town of Australia Felix, in the county of Bourke, on Point Gelibrand, a low promontory on the S side of Hobson's bay. Pop. 322. It is badly supplied with water.

WILLIAMSTOWN, a village of Upper Canada, in the township of Charlottenburg, on the river Aux Raisins. Pop. about 200.

WILLIAMSTOWN, a township of Orange co., in the state of Vermont, U. S., 10 m. S by E of Montpelier. Pop. in 1840, 1,620; in 1850, 1,452.

—Also a township of Berkshire co., in the state of Massachusetts, 19 m. N of Pittsburg, drained by Hoosic river and its branches. Pop. in 1840, 2,153; in 1850, 2,626.—Also a township of Oswego co., in the state of New York, 124 m. WNW of Albany, and intersected by the Watertown and Rome railway. Pop. in 1840, 842; in 1850, 1,121.—Also a village of Grant co., in the state of Kentucky, 49 m. NNE of Kentucky, on the side of Eagle creek.

WILLIAMSTOWN, a village in the p. of Boerstown, co. Dublin, on the S shore of Dublin bay. Pop. in 1841, 355.—Also a village in the p. of Templetogether, co. Galway, 7 m. NE by N of Dunmore.

WILLIAMSVILLE, a village of Amherst township, Erie co., in the state of New York, U. S., on the NE side of Ellicott's creek.—Also a settlement of Upper Canada, on the N shore of Lake Erie, between Walpole and Rainham. Pop. about 30.

WILLIAN, a parish in Hertfordshire, 3 m. E of Hitchin. Area 1,854 acres. Pop. in 1851, 322.

WILLICHOW. See **WIELICHOWO**.

WILLICH, a village of Prussia, in the regency of Düsseldorf and circle of Krefeld. Pop. 828.

WILLIES, a village of France, in the dep. of the Nord, and cant. of Trelon, near the Grande-Helpé. Pop. 320.

WILLIMAN, a village of Austria, in Moravia, in the circle of Olmutz, and district of Chudweim. Pop. 660.

WILLIMANSETT, a village of Hampden co., in the state of Massachusetts, U. S., on the E bank of the Connecticut river, and intersected by the Connecticut railroad.

WILLIMANTIC, a township of Windham co., in the state of Connecticut, U. S., on the N side of a river of the same name, a head-stream of the Shetucket river, and intersected by the Hartford, Providence, and Fishkill, the New London, Willimantic, and Palmer, and the New York and Boston lines of railway.

WILLIMETSCH, a village of Austria, in Moravia, circle of Iglau and district of Reish. Pop. 260.

WILLIMOW, a market-town of Austrian Bohemia, reg. of Eger, and bail. of Saatz. Pop. 800.

WILLIMOWITZ, a village of Austria, in Moravia, in the circle of Brunn, and district of Raitz. Pop. 500.

WILLIMS, a village of Prussia, in the regency of Königsberg, and circle of Rossel. Pop. 260.

WILLINBOROUGH, a township of Burlington co., in the state of New Jersey, U. S., 7 m. NW of Mount Holly, and bounded on the NW by the Delaware. Pop. in 1840, 900.

WILLING, a village of Bavaria, in the circle of Upper Bavaria, and presidial of Aibling. Pop. 241.

WILLINGALE-DOE, or **WILLINGHALE-DE-OU**, a parish in Essex, 4½ m. NE of Chipping-Ongar. Area 1,739 acres. Pop. in 1831, 466; in 1851, 518.

WILLINGALE-SPAIN, or **WILLINGHALE-DE-ISPANIA**, a parish in Essex, 4½ m. NE of Chipping-Ongar. Area 1,200 acres. Pop. in 1851, 216.

WILLINGBUSEN, a village of Holstein, in the bail. of Reinbeck. Pop. 220.

WILLINGDON, a parish in Sussex, 2½ m. N by W of East Bourne. Area 4,259 acres. Pop. 678.

WILLINGEN, a village of Nassau, in the bail. of Marienburg. Pop. 821.—Also a village of Waldeck, and district of Eisenberg. Pop. 990.

WILLINGHAM, or **WIVELINGHAM**, a parish in Cambridgeshire, 6½ m. E by S of St. Ives, and 10 m. NW of Cambridge, on the S bank of the Ouse. Area 4,663 acres. Pop. in 1831, 1,403; in 1851, 1,604.—Also a parish in Lincolnshire, 6 m. SE of Gainsborough. Area 2,170 acres. Pop. in 1831, 392; in 1851, 499.—Also a parish in Suffolk, 4½ m. S of Beccles. Area 1,023 acres. Pop. in 1851, 160.

WILLINGHAM-CERRY, a parish in Lincolnshire, on the N bank of the Witham, 3½ m. E by N of Lincoln. Area 980 acres. Pop. in 1851, 148.

WILLINGHAM (North), a parish in Lincolnshire, 4 m. E by S of Market-Raisin. Area 1,990 acres. Pop. in 1831, 223; in 1851, 861.

WILLINGHAM (South), a parish in Lincolnshire, 5 m. ENE of Wragby. Area 1,900 acres. Pop. in 1831, 212; in 1851, 341.

WILLINGSHAIN, a village of Hesse, in the circle of Hersfeld. Pop. 352.

WILLINGSHAUSEN, a village of Hesse, in the prov. of Lower Hesse, circle and bail. of Ziegenhain. Pop. 663.

WILLINGTON, a parish in Bedfordshire, on the N bank of the Ouse, 4 m. E of Bedford. Area 1,648 acres. Pop. in 1831, 332; in 1851, 282.—Also a township in the p. of Whalley, co. palatine of Chester, 3 m. NW of Tarporley. Pop. in 1841, 103.—Also a parish of Derbyshire, on both sides of the river Trent, and intersected by the Birmingham and Derby junction railway, which has a station-house here, 6½ m. from Derby, and 4½ m. from Burton. Area 1,270 acres. Pop. in 1831, 402; in 1851, 442.—Also a township in the p. of Brancepeth, union

and co.-palatine of Durham, 4 m. N of Bishop-Auckland. Area 1,485 acres. Pop. in 1831, 216; in 1851, 965.—Also a township in the p. of Hammer, co. of Flint, 5 m. NE of Ellesmere. Area 1,874 acres. Pop. in 1831, 388; in 1851, 358.—Also a township in the p. of Wallsend, Northumberland, on the Tyne, 3 m. W by N of North Shields. Coal is raised to a great extent within the township. Pop. 2,284.

WILLINGTON, a township of Tolland co., in the state of Connecticut, U. S., 21 m. E by N of Hartford, drained by branches of Willimantic river, and intersected by the New London, Willimantic, and Palmer railroad. Pop. in 1840, 1,268; in 1850, 1,399.—Also a village of Piscataquis co., in the state of Maine. Pop. in 1840, 722.

WILLIS, a parish of New South Wales, in the co. of Brisbane. See also **WILIS (CAPE)**.

WILLISAU, a parish and town of Switzerland, cant. and 18 m. WNW of Lucerne, and bail. of the same name, at the foot of the Williberg, near the l. bank of the Wigger. Pop. of bail. 23,250; and of town, 2,859.

WILLISHAM, a parish in Suffolk, 3 m. SSW of Needham. Area 927 acres. Pop. in 1851, 213.

WILLISTON, a township of Chittenden co., in the state of Vermont, U. S., 26 m. WNW of Montpelier, on the S side of Onion river, and intersected by the Vermont central railroad. Pop. in 1850, 1,699.—Also a village of Barnwell district, in the state of S. Carolina, on the S. Carolina railroad.

WILLISTOWN, a township of Chester co., in the state of Pennsylvania, U. S., 20 m. NW of Philadelphia, drained by Ridley and Crum creeks. Pop. in 1840, 1,460.

WILLITSCH, a village of Austria, in Styria, in the bail. of Marburg. Pop. 210.

WILLITZ, a village of Austria, in Bohemia, in the reg. of Budweis, and bail. of Tabor. Pop. 220.

WILLKISCHKEN, a village of Prussia, in the reg. of Gumbinnen, and circle of Tilsit. Pop. 428.

WILLKOWE, a village of Prussia, in the regency of Breslau, and circle of Militsch. Pop. 220.

WILLKOWEN, a village of Prussia, in the regency of Gumbinnen, circle of Angerburg. Pop. 210.

WILLKUHNEN, a village of Prussia, in the regency and circle of Königsberg. Pop. 210.

WILLMANDINGEN, a village of Württemberg, in the circle of the Schwarzwald, and bail. of Neutlingen, on the Alp. Pop. 747.

WILLMANS DORF, a village of Prussia, in the regency of Leignitz, and circle of Jauer. Pop. 240.

WILLMANSTRAND, a town of Finland, in the laen and 50 m. N of Viborg, on Lake Salma. Pop. 308. It suffered extensively from fire in 1741.

WILMARS, a village of Bavaria, circle of Lower Franconia, and presidial of Mellrichstadt. Pop. 691.

WILLMENDINGEN, a village of Baden, circle of the Upper Rhine, bail. of Waldshut. Pop. 270.

WILLMERSBACH, a village of Bavaria, in the circle of Middle Franconia, and presidial of Neustadt. Pop. 200.

WILLMETSHOFEN, a village of Bavaria, in the circle of Swabia, and presidial of Zusmaurshausen. Pop. 220.

WILLOFS, a village of Bavaria, in the circle of Swabia, and presidial of Obergünzburg. Pop. 220.

WILLOMITZ, a town of Austria, in Bohemia, in the regency of Eger, and bail. of Kaaden. Pop. 800.

WILLOUGHBY, a parish in Lincolnshire, 8½ m. SSE of Alford. Area 4,280 acres, Pop.—including the hamlet of Sloothby—in 1831, 557; in 1851, 748.—Also a parish in Warwickshire, 4½ m. NW of Daventry. Area 2,290 acres. Pop. in 1851, 373.

WILLOUGHBY, a parish of New South Wales,

in the co. of Cumberland, between Middle Harbour on the NE, and Port Jackson on the E. Pop. 987.

WILLOUGHBY, a bay of the island of Antigua, Little Antilles, on the SW coast, between the parishes of St. Phillip and St. Paul, and opening between Hudson Point on the NE, and Sandy island on the SW.

WILLOUGHBY, a township of Upper Canada, in the Niagara district, bounded on the E by the Niagara, and on the N by the Welland river, by which it is separated from the township of Stamford. Pop. in 1841, 895.

WILLOUGHBY, a township of Lake co., in the state of Ohio, U. S., 133 m. NE by N of Columbus, bounded on the E by Chagrin river, and on the N by Lake Ontario, and intersected by the Cleveland and Erie canal. Pop. in 1840, 1,943; in 1850, 2,081.—Also a lake of Orleans co., in the state of Vermont, which discharges itself by a river of the same name into Barton river.

WILLOUGHBY (CAPE), a headland of Australia, on the E extremity of Kangaroo island, having a lighthouse elevated 241 ft. above sea-level, and in S lat. 35° 49' 20", E long. 138° 12' 30".

WILLOUGHBY (SCOTT), a parish in Lincolnshire, 4 m. NW of Folkingham. Area 556 acres. Pop. in 1831, 24; in 1851, 23.

WILLOUGHBY (SULX), a parish in Lincolnshire, 2½ m. SW of Sleaford. Area 2,505 acres. Pop. 256.

WILLOUGHBY-WATERLESS, or WATER-LAY, a parish and village in Leicestershire, intersected by the Midland Counties railway, from the Broughton-Astley station, 5½ m. NNE of Lutterworth. Area 1,151 acres. Pop. in 1831, 327; in 1851, 761.

WILLOUGHBY-ON-THE-WOLDS, a parish in Notts, 7½ m. NE of Loughborough. Area 2,080 acres. Pop. in 1831, 465; in 1851, 600.

WILLOUGHTON, a parish in Lincolnshire, 8½ m. E by N of Gainsborough. Area 2,460 acres. Pop. in 1831, 477; in 1851, 657.

WILLOW FORK, a township of Morgan co., in the state of Missouri, U. S. Pop. in 1840, 1,146.

WILLOW SPRINGS, a township of Lafayette co., in the state of Wisconsin, 45 m. SW by W of Madison, and watered by Pekatomica river. Pop. in 1850, 606.

WILLSBACH, a village of Württemberg, in the circle of the Neckar, and bail. of Weinsberg, on the Sulm. Pop. 1,080.

WILLSBOROUGH, a township of Essex co., in the state of New York, U. S., on the W side of Lake Champlain, 118 m. N by E of Albany. Pop. 1,932.

WILLSHIRE, a township of Van-Wert co., in the state of Ohio, U. S., 93 m. WNW of Columbus, drained by St. Mary's river. Pop. in 1840, 484; in 1850, 1,053. It contains a village of the same name.

WILLSINGEN, a village of Württemberg, in the circle of the Danube, bail. of Munsingen. Pop. 220.

WILLSTEDT, a market-town of the grand-duchy of Baden, in the circle of the Middle Rhine, bail. of Kork, 6 m. NNW of Offenburg. Pop. 1,449.

WILLUDDEN, a village of Prussia, in the regency of Gumbinnen, circle of Angerburg. Pop. 220.

WILLUHNEN, a village of Prussia, in the regency of Gumbinnen, circle of Pillkallen. Pop. 310.

WILLUNGA, a town of South Australia, at the W base of Mount Barker, and near the gulf of St. Vincent.

WILLWILLBROOK, a parish of Australia Felix, in the co. of Bourke, bounded on the W by the Monce Monce ponds.

WILLWITZ, a village of Prussia, in the regency of Breslau, and circle of Munsterburg. Pop. 220.

WILMARSDONE, a department and commune of Belgium, prov. and arrond. of Antwerp. Pop. 775.

WILMENROTH, a village of Nassau, in the bail. of Rennerod. Pop. 410.

WILMERSDORF, a village of Prussia, in the regency of Frankfurt, and circle of Lebus. Pop. 200.—Also a village in the regency of Potsdam, and circle of Teltow. Pop. 280.—Also a village of Schwarzburg-Sondershausen, and bail. of Gehren. Pop. 355.

WILMERSHAGEN, a village of Prussia, reg. of Stralsund, and circle of Grimmen. Pop. 200.

WILMINGTON, a parish of Kent. 1 m. S of Dartford. Area 1,715 acres. Pop. in 1831, 724; in 1851, 915.—Also a parish of Sussex, $4\frac{1}{2}$ m. SW of Havisham. Area 1,744 acres. Pop. in 1851, 288.

WILMINGTON, a township of Windham co., Vermont, U. S., 21 m. E of Bennington. Pop. 1,372.—Also a township of Middlesex co., Massachusetts, 16 m. N of Boston. Pop. 876.—Also a town and port of entry, in Newcastle co., Delaware, between the Brandywine and Christiana creeks, 1 m. above their confluence, and 37 m. N of Dover, in N lat. $39^{\circ} 41'$, W long. $75^{\circ} 28'$. It is built on gently rising ground, the most elevated part of which is 112 ft. above tide-water, and is regularly laid out, the streets intersecting each other at right angles. It contains a town-hall, several county-buildings, an arsenal, and 19 churches. Pop. in 1810, 4,416; in 1830, 6,628; in 1850, 13,979. The Christiana is navigable as far as W., for vessels drawing 14 ft. of water. The shipping owned here, in 1850, amounted to 9,460 tons. The trade of the town is considerable; its exports consist chiefly in flour and leather, and gunpowder. On the Brandywine, at a little distance from the body of the town, there are extensive flour-mills. The Brandywine and the Christiana, with their branches, afford great water-power for mills and manufactories. W. was severely injured on the 31st of May 1854, by the explosion of three waggons each loaded with 150 barrels of gunpowder, while passing through from Dupont's mills.—Also the cap. of Clinton co., Ohio, 54 m. SW of Columbus. Pop. 1,238.—Also a port of entry and the cap. of New Hanover co., N. Carolina, on the E side of Cape Fear river, situated immediately below the confluence of the NE and NW branches, about 35 m. from the sea, and 128 m. SSE of Raleigh, in N lat. $34^{\circ} 11'$, W long. $78^{\circ} 10'$. It is well situated for trade; but is accounted unhealthy from the lowness of its site. The total tonnage of the district was in 1850, 15,198 tons. The exports consist of lumber, turpentine, rosin, tar, pitch, peanuts, and cotton. The harbour admits vessels of 300 tons; but the entrance is rendered dangerous and difficult by a large shoal. Opposite the town are two islands, which afford the finest rice fields in the state. W. is connected with Weldon and with Manchester by railroads.—Also an island of the United States, near the coast of Georgia, at the mouth of the Savannah, in N lat. 32° .

WILMOT, a township of Merrimac co., New Hampshire, U. S., 29 m. NW of Concord. Pop. 1,272.—Also a township of Noble co., Indiana, 114 m. NNE of Indianapolis.

WILMSLOW, or **WIMBOLDSEY**, a parish and village of Cheshire, 7 m. NW of Macclesfield. Area of p. 8,028 acres. Pop. in 1851, 4,952.

WILMSTORF (Old), a village of Prussian Silesia, in the co. of Glatz. Pop. 900.

WILNA. See **VILNA**.

WILNA, a township of Jefferson co., New York, U. S., 134 m. NW of Albany.—Also a village of Houston co., in Georgia, 50 m. SW of Milledgeville.

WILNE (Great), a parish of Derbyshire, $7\frac{1}{2}$ m. SE of Derby. Area 8,500 acres. Pop. in 1851, 2,096.

WILNECOTE, a hamlet in Tamworth p., War-

wickshire, $2\frac{1}{2}$ m. SE of Tamworth. Pop. in 1851, 824.

WILNIS, or **WILLIS**, a village of Holland, in the prov. of Utrecht, 7 m. N of Woerden. Pop. 1,041.

WILPESHIRE, a township of Blackburn p., in Lancashire, 4 m. N by E of Blackburn. Area 940 acres. Pop. in 1831, 337; in 1851, 237.

WILRYK, a commune and village of Belgium, in the prov. and 4 m. S of Antwerp. Pop. 2,700.

WILSDORF, a village of Saxony, in the bail. of Dresden. Pop. 368.—Also a village in the circle of Bautzen, bail. of Stolpen. Pop. 740.

WILSDEN, a township of Keighley p., in Yorkshire, 4 m. SE of Keighley. Area 2,450 acres. Pop. in 1831, 2,252; in 1851, 3,454.

WILSDRUFF, a town of Saxony, 9 m. W of Dresden. Pop. in 1849, 2,342.

WILSELE, a commune and village of Belgium, prov. of Brabant, 15 m. NE of Brussels. Pop. 1,200.

WILSFORD, or **WIVELSFORD**, a parish in Lincolnshire, 4 m. WSW of Sleaford. Area 2,860 acres. Pop. in 1831, 393; in 1851, 484.—Also a parish of Wiltshire, 2 m. SW of Amesbury. Area 1,591 acres. Pop. in 1831, 119; in 1851, 135.

WILSFORD-DAUNTSEY, a parish in Wilts, 4 m. SW of Pewsey. Area 2,997 acres. Pop. 575.

WILSNACK, a town of Prussia, in the prov. of Brandenburg, 63 m. WNW of Berlin. Pop. 1,848.

WILSON, a township of Niagara co., New York, U. S., 206 m. W by N of Albany. Pop. in 1850, 2,955.—Also a county in West Tennessee, on the S side of the Cumberland. Area 468 sq. m. Pop. in 1850, 27,446. Its cap. is Lebanon.

WILSON'S ISLES, a group of three small low islands in the Pacific, in N lat. $7^{\circ} 11'$, E long. $145^{\circ} 8'$. Pop. about 140.

WILSON (Point), a cape on the W coast of North America, in the gulf of Georgia, in N lat. $48^{\circ} 10'$.

WILSON'S PROMONTORY, a remarkable headland, about 20 m. long, and from 5 to 14 m. in breadth, forming the southernmost point of Australia, in S lat. $39^{\circ} 8'$, E long. $146^{\circ} 23'$. It is of granitic formation, and attains an alt. of 3,000 ft.

WILSONTOWN, a village of Lanarkshire, in the p. of Carnwath, 23 m. SW of Edinburgh, and $8\frac{1}{2}$ m. E of Lanark.

WILSTER, a town of Holland, near the Elbe, 34 m. NW of Hamburg. Pop. 2,900. It has a trade in corn and cattle, and several distilleries. The surrounding district is called Wilstermarsch.—Also a river of Holstein, properly a branch or separation from the Cudensee. It falls into the Stör, and is navigable for small craft.

WILSTHORPE, a township of Lincolnshire, 5 m. NW of Market-Deeping. Pop. in 1851, 66.—Also a hamlet in the p. and 3 m. N by W of Bridlington in Yorkshire. Area 712 acres. Pop. 147.

WILTHEN, a village of Saxony, on the borders of Lusatia, to the S of Bautzen. Pop. 429. The vicinity was the scene of a battle between the French and the Allies, in May 1813.

WILTON, a parish of Roxburghshire, lying on the banks of the Teviot. Pop. in 1851, 2,557.

WILTON, a parish in Somersetshire, 1 m. SW of Taunton. Area 700 acres. Pop. in 1831, 795; in 1851, 949. The p. contains the hamlets of Ganton and Sherford, and forms an extensive suburb to the town of Taunton.—Also a borough and parish in Wilts, including the tythings of Bulbridge and Ditchampton. Area 1,791 acres. Pop. in 1801, 2,144; in 1831, 1,997; in 1851, 1,804.—The town, situated in a valley 3 m. W by N of Salisbury, in the peninsula formed by the confluence of the Madder and Wily, consists principally of one street. It is well-known for the manufacture of the kind of

carpets called after its name, and which was introduced from France by one of the earls of Pembroke, who brought workmen to England for the purpose of instructing the inhabitants in the art. The borough formerly sent 2 members to parliament; under the reform act it has been deprived of one member. Number of voters in 1852, 219.—The name of this place is probably derived from its situation on the river Willy. It is a town of great antiquity, and was anciently of considerable importance, giving name to the co. In the beginning of the 10th cent., it became the seat of the diocese of Wiltshire; and was such until the two bishoprics having been united, the see was removed to Sherborne, and ultimately to Old Sarum.—Also a township and chapelry in the p. of Kirk-Leatham, N. R. of Yorkshire, $\frac{3}{4}$ m. NW of Guisborough. Area 6,928 acres. Pop. in 1831, 411; in 1851, 518.—Also a township in the p. of Ellerburn, N. R. of Yorkshire, $\frac{3}{4}$ m. E of Pickering. Area 2,060 acres. Pop. in 1851, 202.

WILTON, a township of Franklin co., Maine, U. S., 27 m. NW of Augusta. Pop. 1,908.—Also a township of Hillsborough co., New Hampshire, 40 m. SSW of Concord. Pop. 1,161.—Also a township of Fairfield co., Connecticut, 7 m. N of Norwalk. Pop. 2,066.—Also a township of Saratoga co., New York, 32 m. N of Albany. Pop. 1,458.

WILTON (BISHOP'S), a parish in the E. R. of Yorkshire, $\frac{4}{5}$ m. N of Pocklington, containing the townships of Bishop-Wilton with Belthorpe, Bolton, and Youlthorpe with Gowthorpe. Area 4,970 acres. Pop. in 1831, 831; in 1851, 652.

WILT, or WILTSHIRE, an inland county of England; having Gloucestershire on the N; Berkshire and Hampshire on the E; Hampshire and Dorsetshire on the S; and Somersetshire and Gloucestershire on the W. The area of the county is, according to the latest admeasurements, 869,620 acres.—Pop. in 1801, 185,107; in 1811, 193,828; in 1821, 222,527; in 1831, 240,200; in 1841, 260,007; in 1851, 254,221. The form of this co. is somewhat that of an ellipse, measuring nearly 57 m. from N to S, by 34 m. from E to W. It is naturally divided into two portions, by an irregular range of hills, which extends transversely through the greater part of the co., in a direction inclining from NE to SW, or from Savernake forest, by the Black-heath, to Westbury. The districts on either side of this range are usually denominated South and North Wiltshire; and differ materially from each other, not only in appearance, but in almost every distinguishing quality. South W. forms the western division of a vast tract of chalk-hills, comprising a considerable part of Hampshire, and presents, when surveyed from a distance, the appearance of a large elevated plain. Long-Knoll, near Maiden-Bradley on the borders of Somersetshire, the highest point in this division of W., is only 973 ft. above sea-level.—North W. differs completely from the southern division of the co. in its general appearance. Instead of a constant series of 'chalky waves,' the aspect of this district—which extends from the verge of the Downs to the hills of Gloucestershire—is nearly that of a perfect flat; the few deviations from the ordinary level being, for the most part, so gradual as scarcely to be perceptible. The air in South W.—as on all open downs—is generally cold and bracing. In North W. the climate is milder than in the southern parts; but is, nevertheless, likewise cold.

Rivers. W. abounds with rivers and streams, most of which take their rise within itself. The Isis, afterwards called the Thames, rises in the Cotswold hills, in Gloucestershire; enters W. near Ewen; forms its N boundary for a short distance; and leaves the co. at its NE extremity. It receives

the small streams of the Swillbrook, the Key, and the Churn, from the N part of the co.—The Lower Avon rises on the borders of Gloucestershire; proceeds SE, and, on reaching Chippenham, flows in a winding direction W to a point, near the borders of Somersetshire, by Bradford and Melksham; and finally turning N, enters the last named co. a little to the S of Winsley.—The Kennet rises to the W of East Kennet; passes Marlborough; and flows in a direction at first SW, and afterwards S, to the West Kennet; and passing Ramsbury and Chilton, reaches Hungerford in Berks.—Several small streams uniting in the vale of Pewsey, form the river called the Wiltshire and Hampshire Avon, which, passing Amesbury and Salisbury, enters Hampshire, near Downton. It receives several streams and small rivers, of which the principal is the Willy, which rises at the foot of the Clayhills, and after passing Warminster, Heytesbury, and Wilton, is joined by the Nadder, and discharges itself into the Avon by two channels. The Nadder rises near Shaftesbury, in Dorsetshire, and joins the Willy near Wilton. The Bourne rises near Easton, passes the three Winterbournes, and joins the Avon near the city of Salisbury. The bed of this river is generally dry in summer.

Agriculture, &c. About 800,000 acres of the superficies of W. are arable, meadow, or pasture-land. The average rent of land is 18s. 6d. per acre. With regard to agriculture, the S district may almost be regarded as one vast sheep-farm; the greater part of its extensive downs, and large portions of the vales being devoted to the rearing and feeding of that animal. The sheep stock—consisting chiefly of South Downs—is estimated at 700,000, of which nearly six-sevenths are depastured on the downs. The distinguishing feature of the agriculture of North W. is the pasturage, or grazing system, which is conducted principally with a view to the supply of the dairy with milk for the manufacture of cheese. W. had formerly abundance of wood, but the forests have now in a great measure disappeared. There are few wastes, and these are principally marshy. Owing to the scarcity of coal—the supply of which is in a great measure derived from the coal-fields of Somersetshire—fuel is scarce. The mineral productions of W. are of little importance. Chalk forms the chief part of the substructure of all that extensive assemblage of hills which constitute the downs. On the W side of the co., bordering on Somersetshire, are several freestone quarries.

Manufactures. The manufactures of W. are of considerable importance. Woollens were formerly made to a great extent, but the manufacture has greatly fallen off within these thirty years. Salisbury carries on a considerable manufacture of outlery and steel goods. Carpets of an excellent quality and kerseymere and linsey, are made at Wilton. Broad cloths and other descriptions of woollen goods are made at Bradford, Devizes, Heytesbury, Chippenham, Westbury, Trowbridge, and all the adjacent towns and villages. Linen is manufactured at Mere; fustians and thicksets at Aldbourn. Linen and silk are made to a considerable extent at Stourton and Maiden-Bradley. The principal exports of the county consist of its agricultural produce; besides supplying its own extensive cloth manufactories, it exports a large proportion of its wool.

Canals and roads. The Thames and Severn canal, which commences at Stroud in Gloucestershire, and terminates near Lechlade in the same co., passes through a small portion of the N boundary of W. The Kennet and Avon canal, which connects the navigation of these two rivers, crosses the whole of the co., and nearly divides it into two equal parts.—The Wiltshire

and Berkshire canal strikes off from the Kennet and Avon canal at Semington, and running in a direction almost due N, passes Melksham; and pursues nearly the same course as the Great Western railway, by Wootton-Basset, Chadderton, and Swinton, to within a mile of Highworth, near which town it leaves the co., and passes into Berkshire, on its way to join the Thames. A short distance below Abingdon.—The North Wilts canal branches off from the Wiltshire and Berkshire canal, a little to the NW of Swindon, and running in a NW direction, joins the Thames and Severn canal at Easton.—The roads in Wiltshire are both numerous and good; indeed few counties are so well provided in this respect.—The Great Western road, which leads from London to the most western part of Cornwall, enters W. at two points, about a mile distant from one another; the one branch is from Andover, and the other from Stockbridge; they join about a mile after entering the co., and pass through Salisbury to Blandford.—The London road to Bath, by Chippenham, passes through Hungerford in Berkshire; immediately after entering W.; and passes through Marlborough, Calne, and Chippenham, to Bath.—The Great Western railroad enters W. at a point about 3 m. NE of Bath, and soon after passes Box, where it passes through a ridge of lias limestone, Bathstone, and hard by quartz, by a tunnel 2,168 yds. in length, and 80 ft. wide. It then passes on the S of Corham, on the N of Chippenham, S of Wootton Bassett, and N of Swindon; and enters Berkshire at a point about 4 m. to the NE of Swindon.—There is a branch railway from the Swindon station, by Purton and Minety, to Cheltenham.

Ecclesiastical and Civil Divisions, &c.] This co., although now in the dio. of Salisbury, was in the time of the West Saxons included in that of Winchester. It forms the two archdeaconries of Salisbury and of Wilts; the former comprising the deaneries of Amesbury, Chalke, Salisbury, Wilton, and Wylie; the latter those of Avebury, Marlborough, and Potterne. In 1829, W. was divided into 295 parishes; viz. 143 rectories, 104 vicarages, and 48 perpetual curacies.—The co. is divided, for the purposes of civil government, into 28 hundreds, viz. Alderbury, Amesbury, Bradford, Branch and Dole, Calne, Cawden and Cadworth, Chalke, Chippenham, Dammerham (North and South), Downton, Dunworth, Elstah and Everley, Frustfield, Heytesbury, Highworth, Cricklade, and Staple,—Kingsbridge, Kinwardstone, Malmesbury, Melksham, Mere, Potterne and Cannings, Ramsbury, Selkley, Swanborough, Underditch, Warminster, Westbury, and Whorwelsdown. It contains the city of New Sarum, commonly called Salisbury; the borough and market towns of Calne, Chippenham, Cricklade, Devizes, Malmesbury, Marlborough, and Westbury; the borough of Wilton; and the market-towns of Amesbury, Great Bradford, Market-Lavington, Melksham, Mere, Swindon, Trowbridge, Warminster, Hindon, and Wootton-Basset. The two last named towns, with Great Bedwin, Downton, Heytesbury, Ludgershall, and the well-known Old Sarum, returned members to parliament until the passing of the Reform act. The represented towns are Chippenham, Devizes, Calne, Marlborough in the N division; and Wilton, Salisbury, and Westbury in the S. By the Reform act this co., formerly returning 2 members, returns 4; namely, 2 for the northern, and 2 for the southern division. The number of registered voters was, in 1832, in the N division, 3,614; in the S, 2,540. In 1852 the voters in the N division were 4,956; in the S, 3,256. The total number of members returned by the co. and boroughs, under the new act, is 18. W. is within the western circuit, the assizes being held at Salisbury.

History.] When Cæsar wrote his Commentaries, Wiltshire was occupied by the Belgæ throughout the greater part of its extent. The Romans included W. in their province of *Britannia Prima*. W. suffered much from the Danes; the Great Alfred was defeated at Wilton in 871. During the civil wars which raged between the Empress Maude and Stephen, the latter seized the castles of Salisbury, Devizes, and Malmesbury; but was defeated, with great slaughter, at Wilton. Shortly after the battle of Lansdown, the Parliamentary army was defeated on Roundway-hill, and suffered great loss. Devizes was taken by Cromwell in 1645.

WILTSHIRE (FORT), a military station in South

Africa, 44 m. NNE of Graham's Town, near the Keiskamma river.

WILLY, or WYLYE, a parish in Wilts, 7 m. ENE of Hindon. Area, with Deptford, 2,279 acres. Pop. in 1831, 476; in 1851, 510.

WILZ, a town of Holland, in the prov. of Luxemburg, bail. and NW of Diekirch, on the r. bank of a river of the same name, an affluent of the Sure. Pop. 2,500. It has manufactories of cloth and linen, and several paper-mills.

WILZENBURG, a village of Oldenburg, in the bail. of Birkenfeld. Pop. 200.

WIMBACH, a village of Prussia, in the regency of Coblenz, and circle of Adenau. Pop. 290.

WIMBERG, a village of Prussia, in the regency of Arnberg, and circle of Iserlohn. Pop. 200.

WIMBISH, a parish in Essex, 4½ m. ESE of Saffron-Walden. Area, with Thunderley, 4,862 acres. Pop. in 1831, 921; in 1851, 1,004.

WIMBLEDON, a parish and village in Surrey, intersected by the Southampton railway, by which the village is 6 m. distant from London. Area of p., 3,700 acres. Pop. in 1831, 2,195; in 1851, 2,693.

WIMBLINGTON, a hamlet in the p. of Dodington, Cambridgeshire, 4 m. S of March. Area 7,589 acres. Pop. in 1831, 965; in 1851, 1,158.

WIMBORNE-ST.-GILES, or UPWINBORN-MALMAYNE, a parish in Dorset, 2½ m. SW by W of Cranborne. Area, including Wimborne-all-Saints, 3,978 acres. Pop. in 1831, 384; in 1851, 495.

WIMBORNE-MINSTER, a parish in Dorset, containing the market-town of the same name, and the tythings of Abbot-street, Barnesley, Cowgrove, Leigh, Petersham, Stone, Thornhill, and Wimborne-Borough. Area 11,966 acres. Pop. in 1801, 3,039; in 1831, 4,009; in 1851, 4,759. The church, or minster, is a spacious cruciform structure of early Norman, with an admixture of early English architecture. In the chancel—which is raised several steps above the level of the nave—are 16 stalls, surmounted by canopies of carved oak. The town, which stands in a valley near the confluence of the Stour and Allen, consists of a few irregular and ill-constructed streets. The borough contains the N part of the town, and consists of two streets. It has been supposed by some that this is the place designated in the Saxon Chronicle under the name of *Wiganbeorche*, as the scene of a great battle fought in 851, between the Danes and the Devonians; but Bishop Gibson refers the scene of the encounter to Wenbury, in the county of Devon. In the time of Leland it was a respectable town.

WIMESBOTHAM, or WIMBOTSAM, a parish in Norfolk, 1½ m. NE of Downham-Market. Area 2,015 acres. Pop. in 1831, 476; in 1851, 606.

WIMESWOULD, a parish in Leicestershire, 5 m. NE by E of Loughborough. Area 4,220 acres. Pop. in 1831, 1,276; in 1851, 1,235.

WIMILLE, a commune of France, in the dep. of the Pas-de-Calais, cant. and 3 m. NNE of Boulogne-sur-Mer, on the Vimieux. Pop. 1,779. Iron and potter's clay are found in the vicinity.

WIMMELBACH, a village of Bavaria, in the circle of Upper Franconia, and presidial of Forchheim. Pop. 240.

WIMMELBURG, a village of Prussia, in the regency of Merseburg, and circle of Mannsfelder See. Pop. 458.

WIMMENTHAL, a village of Würtemberg, in the circle of the Neckar, and bail. of Weinsberg. Pop. 894.

WIMMER, a village of Hanover, in the principality of Osnabruck, and bail. of Wittlage-Hunteburg, near Bohmte. Pop. 759.

WIMMERA, a district of Australia Felix, com-

prising an area of about 15,000,000 acres, extending S of the Murray from the South Australian frontier, to the dividing ridge of the basins of the Murray and of Portland bay, and S to a line between that ridge and Mount Cole. Pop. 876. It is watered by numerous streams, of which the principal are the Murray, Wimmera, and Avoca, and contains several lakes.—The river W. rises in Mount Cole, and flows into Lake Hindmarsh.

WIMMERBY, a town of Sweden, in the län of Calmar, 40 m. WSW of Westerwick. Pop. 1,465.

WIMMERSBACH (NECKAR), a village of Baden, in the circle of the Lower Rhine, and bail. of Oberbach, on the Neckar. Pop. 448.

WIMMERSBACH (WALD), a village of Baden, in the circle of the Lower Rhine, and bail of Neckar. Pop. 561.

WIMMERTINGEN, a department and commune of Belgium, in the prov. of Limburg, and arrond. of Hasselt, on the Laak. Pop. 131.

WIMMIS, a village of Switzerland, in the cant. of Berne, and bail. of Nieder-Simmenthal. Pop. 1,369.

WIMPFEN-AM-BERG, a town of Hesse-Darmstadt, capital of a bail. of the same name, in the prov. of Starkenburg, near the l. bank of the Neckar, opposite the confluence of the Jaxt, and 8 m. NNW of Heilbronn. Pop. 2,340. It consists of two distinct parts, one on a height, and the other in a valley, and is surrounded by walls. It has five gates, two churches, a Catholic and a Lutheran, an hospital, a poor's house, and three schools. This town is of great antiquity, and was erected in 1230 into a free imperial school.

WIMPFEN-IM-THAL, a town of Hesse-Darmstadt, in the prov. of Starkenburg, and bail of Wimpfen-am-Berg. Pop. 410.

WIMPOLE, a parish in Cambridgeshire, 6 m. E of Caxton. Area 2,428 acres. Pop. in 1851, 452.

WIMSBACH, a market-town of Austria, in the county above the Ens, and circle of the Traun, on the l. bank of the Alm, and 27 m. W of Steyer. Pop. 550. It has a castle.

WIMSHEIM, a village of Württemberg, in the circle of the Neckar, and bail. of Leonberg. Pop. 669.

WIMY, a village of France, in the dep. of the Aisne, and cant. of Hirson, near the Oise, 9 m. NNE of Vervins. Pop. 610. It has extensive bottle-works.

WINAR, a village of Austrian Bohemia, in the regency of Gitschin, and bail. of Neu Bidschow. Pop. 440.—Also a village of the regency of Pardubitz, and bail. of Czaslau. Pop. 540.—Also a village of the same regency, in the bail. of Hohenmauth. Pop. 340.—Also a village in the regency of Prague, and bail. of Karolinenthal. Pop. 670. It has a castle.—Also a village of Moravia, in the circle of Prerau. Pop. 270.

WINARITZ, a village of Austrian Bohemia, in the regency of Gitschin, and bail. of Jungbunzlau. Pop. 850.—Also a village in the regency and bail. of Pardubitz. Pop. 240.—Also a village in the reg. of Prague, and bail. of Laun. Pop. 370. It has the ruins of a castle.

WINAU, a village of Austrian Bohemia, in the regency of Budweis, and bail. of Gratzau. Pop. 440.—Also a village in the regency of Pardubitz, and bail. of Deutschbrod. Pop. 240.—Also a village of Moravia, in the circle of Znaim, and bail. of Jaispitz. Pop. 620.—Also a village of Prussia, in the regency and circle of Oppeln. Pop. 220.

WINBURNDAL, a river of New South Wales, in the co. of Roxburgh, an affluent of the Macquarie.

WINCANTON, a parish of Tasmania, in the co. of Somerset, to the W of the Macquarie.

WINCANTON, or **WINGANUTON**, a market-town

and parish in Somerset, 108 m. W by S of London. A large portion of the town was consumed by fire in 1747, but it has since been rebuilt in a more regular form. It is situated on the W declivity of a wooded hill, at the foot of which flows the Cale, and consists of four streets regularly built, and containing some good houses. The parish contains the hamlets of Barrow-Common, Marchcourt, Stavordale, Sutton, the Tything, and Wincanton-Common. The inhabitants are partly employed in the manufacture of linen and bed-ticking, also in a branch of the silk trade; but the chief trade is in corn, cattle, butter, and cheese. Area of p., 4,130 acres. Pop. in 1831, 2,123; in 1851, 2,488.

WINCEBY, an island of South Australia, in Spencer's gulf, in the group of Sir Joseph Banks' islands.

WINCEBY, a parish in Lincolnshire, 4 m. E by S of Horncastle. Area 842 acres. Pop. in 1851, 78.

WINCH (EAST), a parish in Norfolk, 6 m. SE by E of Lynn. Area 2,530 acres. Pop. in 1851, 469.

WINCH (WEST), a parish in Norfolk, 3 m. S of Lynn. Area 1,170 acres. Pop. in 1851, 477.

WINCHAM, or **WINSHAM**, a township in the p. of Great Budworth, co.-palatine of Chester, 2 m. NE by E of Northwich. Area 941 acres. Pop. 684.

WINCHCOMBE, or **WINCHELCOMBE**, a market-town and parish in Gloucestershire. The parish, which comprises the chapelries of Grest and Gretton, with the hamlets of Contes, Cockbury, Corn-dean, Langley, Naunton with Frampton, Postlip, and Sudley-Tenements, has an area of 5,700 acres. Pop. in 1831, 2,514; in 1851, 2,824. The town is situated at the base of the Cotswold hills, on the N side of the range, and to the SE of the river Islip, in a sheltered valley. The chief streets, three in number, run from E to W, and are crossed by a few of smaller extent. The houses are in general old. The inhabitants were at one time much employed in the culture and manufacture of tobacco. Here are paper mills, a tanyard, and a silk-mill, and some small manufactories of stockings and thread.

WINCHELSEA, a market-town and parish in Sussex, 64 m. SE of London, and 2 m. SW of Rye. Area of p., 1,510 acres. Pop. in 1831, 772; in 1851, 778. The town consists of several streets running at right angles to one another, and is said to have been built after the plan of the old town which was swept away by the sea in 1287. It gives the title of Baron to the family of Finch. Until the passing of the reform act, the borough returned 2 members to parliament. It now unites with Rye in returning a member.

WINCHENDON (NETHER), a parish in Bucks, 6 m. W of Aylesbury. Area 1,520 acres. Pop. in 1831, 294; in 1851, 284.

WINCHENDON (UPPER), a parish in Bucks, 5 m. W by N of Aylesbury. Area 1,066 acres. Pop. in 1831, 228; in 1851, 186.

WINCHENDON, a township of Worcester co., in the state of Massachusetts, U. S., 54 m. WNW of Boston, drained by Miller's creek, and intersected by the Cheshire railroad. Pop. in 1840, 1,754; in 1850, 2,445.

WINCHESTER, a township of Cheshire co., in the state of New Hampshire, U. S., 53 m. SW by W of Concord, drained by Ashuelot river, and intersected by the Ashuelot railroad. Pop. in 1840, 2,065; in 1850, 3,296.—Also a township of Litchfield co., in the state of Connecticut, 26 m. NW of Hartford, and drained by Mad river. Pop. in 1840, 1,667; in 1850, 2,179.—Also a village of Frederick co., in the state of Virginia, 116 m. NNW of Richmond, and at the junction of the Winchester and Potomac and the Baltimore railways. Pop. in 1840

3,451; in 1850, 4,300.—Also a township of Adam's co., in the state of Ohio, drained by a branch of Brush creek. Pop. in 1840, 1,121.—Also a village Clarke co., in the state of Kentucky. Pop. in 1840, 1,047; in 1850, 1,100.—Also a village of Franklin co., in the state of Tennessee, 94 m. SSE of Nashville, on a small branch of Elk river. Pop. in 1840, 700; in 1850, 800.—Also a village of Scott co., in the state of Illinois, 15 m. SW of Jacksonville. Pop. in 1840, 720; in 1850, 700.—Also a township of Middlesex co., in the state of Massachusetts, on the Boston and Lowell railroad. Pop. in 1850, 353.—Also a village of Wayne co., in the state of Mississippi, on the E bank of Chickasawha river, and 104 m. ESE of Jackson.

WINCHESTER, an ancient and peculiarly constituted city, once the metropolis of England, situated nearly in the centre of Hampshire, 12 m., by railway, N of Southampton, and 6½ m., by railway, SW by W of London. The river Itchen approaches its E side, in such a tiny maze of channels as to form a series of islets; concentrates its waters to cut off, over the whole breadth of the town, a large eastern suburb; and again divides and subdivides its stream in wandering toward St. Cross. On the E of the vale rise high downs; on the W stretch spreading hills, which acknowledge the dominion of the plough, and permit, through a deep cut, the passage of the London and Southampton railway. The site of the town, though pleasant, cannot be called beautiful; and is so far from being advantageous that one wonders why it should ever have held a city of importance, and still more a metropolis of England. As seen from the railway station it is "a wide extended mass of old brick houses, grey church towers, and red-tiled roofs, with immediately in front, on the brow of the descending eminence, a huge square edifice, now answering as a barrack for soldiers, but formerly a royal residence." The barrack, fitted up in 1811 for the accommodation of 2,000 men, occupies the site of an ancient and demolished castle. The guild-hall, built in 1711, is a neat structure in the Doric style, and has in front a statue of Queen Anne, bearing the sceptre. The county-gaol is a large and substantial building, with an imposing front. The county house-of-correction is an old building, on a low site. The county hospital is a capacious building, partly of recent date. The city-cross, in the centre of High-street, is an elegant pyramidal structure, 43½ ft. in height, of three stages, in the later Gothic style, with arches, niches, and figures. The other noticeable buildings—additional to the cathedral and the college of Winchester, and the hospital of St. Cross—are the market-house, a theatre, and assembly-rooms.

The Cathedral. The original cathedral of W. claims—on very apocryphal authority—to have been built, in 177, on the site of a great pagan temple. The present pile, regarded in its various parts, is of at least seven principal dates; and, if viewed in its minor features, its smaller accessories, its remodellings, and its restorations, must be pronounced to belong to upwards of ten centuries. The oldest parts of the edifice belong to a pile constructed, in the Saxon style, by the famous architect and bishop of Winchester, St. Ethelwold, in 980. Apart from minute or secondary restorations, W. cathedral may be viewed as nearly a continuous exemplification of all the successive styles of ecclesiastical architecture in England, from the Saxon to the debased variety of the Gothic. The grand western front, the most conspicuous part of the contribution made to the pile by William of Wykeham, is 116 ft. long, embellished below with tabernacle-work, and everywhere magnificent. The cathedral is cruciform. Its length, from E to W, is 545 ft.; and from N to S, within the walls, 209 ft. The nave is 73 ft. high; and, including the aisles, 86 ft. wide; and the central tower is 138 ft. in height, and 50 by 40 ft. in breadth. The altar is ornamented by West's picture of the raising of Lazarus from the dead; and behind the altar is a stone screen of wonderful elaboration and beauty.

The College. Winchester college, founded by William of Wykeham, is the oldest institution of its class in England, and

served as a model for the schools of Eton and Westminster. It was instituted about the year 1327, for a warden, 10 fellows or perpetual chaplains, and 70 scholars, besides conductors, clerks, choristers, and some other parties; and, in the 26th year of Henry VIII., it had endowments to the amount of £639 yearly value. It is simply a school of the higher order, and somewhat in the style of the middle ages, for Latin and Greek; it forms a kind of literary porch to New college, Oxford, and trains young gentlemen as candidates for that college's fellowships, scholarships, and exhibitions; it equips its masters and scholars in black gowns and caps in the manner of the Oxonians, and enacts from them the observance of similar rules of discipline; and, in addition, it admits a certain number of young men to be educated, under the name of 'commoners,' on the terms of a boarding-school, and has attached to it, as a kind of legend, the singing boys of the cathedral. The buildings and grounds of the college are situated on the verge of the green vale of the Itchen, in the lower environs of the town, and are surrounded by a protecting wall. The original buildings are in the early style, and form a large quadrangle fronting the street, and a smaller quadrangle behind. The school-room is a finely proportioned apartment, measuring 90 ft. by 36. Adjoining the school, and constituting the extreme SE of the college buildings, are the cloisters or covered walks, very neat but more modern than the time of Wykeham, and enclosing a quadrangular area of 17,424 sq. ft.—The ruins of Wolvesey castle are at a short distance SE from the college.

The Hospital and Church of St. Cross. The hospital of St. Cross, situated in the suburban village of its name, within a mile of the city, was founded and endowed, in 1132, by Henry de Blois, bishop of Winchester, for the residence and support of a master, steward, 4 chaplains, 13 clerks, 7 choristers, and 13 poor brethren. The buildings of the hospital consist of an outer and an inner court. The former is entered by a spacious gateway; but is small, and presents little matter of interest except 'the Hundred-men's-hall,' or the refectory for the quondam 100 out-boarders. Over the centre of the range of building which separates the two courts, rises a lofty and beautiful tower. The inner or principal court presents, on three sides, the neat uniform buildings of the hospital, two stories high, and ornamented with fig-trees and vines. The brethren wear black cloaks, with a silver cross on the left breast. The church of St. Cross, built partly by Henry de Blois, and partly by William of Wykeham, like Winchester cathedral, has been so much and often modified as to exhibit a record of architectural styles from the Norman to the most highly decorated Gothic. It is cruciform; and consists of three aisles, with a transept, a cross aisle, and a low broad tower rising over the intersection. Its length, from E to W, is 160 ft.; its breadth, including the transepts, is 120 ft. The interior of the tower, which serves as a lantern to the chancel, is open to a considerable height above the vaulting of the nave, and is ornamented with galleries. The present income of the hospital is £1,600, but, on the expiry of certain life-leases, will amount to £8,000.

Institutions, Charities, &c. A mechanics' institution was established in W. in 1835. A subscription library is well supported. Concerts, balls, and assemblies are frequently held in St. John's rooms.—The dissenting congregations, are a Baptist, an Independent, a Wesleyan Methodist, and a Roman Catholic. Opposite the latter—which is a handsome Gothic structure—stands a Benedictine nunnery, inhabited by a community who removed hither from Brussels. A new cemetery was formed in 1840, in a field to the SW of the King's-house. The city returns 2 members to parliament. Constituency, in 1837, 500; in 1852, 788. The making of sacks, and that to no great extent, is the only manufacture. Coal is supplied by the Itchen navigation from Southampton. Pop. of the city, in 1801, 3,555; in 1831, 5,280; in 1851, 6,446. Pop. within the parliamentary boundary, in 1831, 9,292; in 1851, 13,704.

History. The city, no doubt, occupies one of the most ancient seats of population in Britain; but it does not become known to history till it figures as the Roman station of *Fens Belgarum*. It afterwards became the principal seat of the Saxons, the Danish, and the Norman dynasties; it was the grand scene of Alfred's and of Canute's glories; it did not lose its character, as the capital of England, till London became supereminent in magnitude, influence, and wealth; and it continued to be a chief or frequent place of residence for the English kings and princes, till the death of the husband of Queen Anne. In the reign of Henry Beauchamp, when the city reached its culminating point, the city extended a mile in every direction beyond its present limits; it had densely crowded fairs, a considerable woollen manufactory, and an extensive commerce with the continent, and was the general thoroughfare from the eastern to the western parts of the kingdom. It was the chief seat of government, and the site of the royal mint, the royal treasury, and the national archives; and it had a great and magnificent royal palace, and

possessed in its cathedral the remains of more personages of the various royal families, than all the other towns and places of the island.

WINCHFELD, a parish in Hants, 2½ m. NE of Odiham. Area 1,543 acres. Pop. in 1851, 327.

WINCHMOREHILL, a chapelry in the p. of Edmonton, Middlesex, 8 m. N of London.

WINKLEY, or **WINKLEIGH**, a parish in Devon, 5 m. SW of Chulmleigh. Area 9,118 acres. Pop. in 1831, 1,596; in 1851, 1,554.

WINGLE, a township and chapelry in the p. of Prestbury, co.-palatine of Chester, 4½ m. SE of Macclesfield. Area 1,980 acres. Pop. in 1851, 336.

WINDACH (OBER, MITTEL, and UNTER), three villages of Bavaria, in the circle of Upper Bavaria, and presidial of Landsberg. Pop. 440.

WINDANG, an island of New South Wales, in the co. of Camden, at the entrance of Lake Illawarra.

WINDAU, or **WINDAWA**, a town of Russia in Europe, in the gov. of Courland, and district of Goldingen, to the NW of Mitau, on the Baltic, in N lat. 57° 23' 52". Pop. 1,756. It has a port, and carries on an active trade in grain, flax, hemp, and timber. This town is one of considerable antiquity.

WINDBERG, a village of Bavaria, in the circle of Lower Bavaria, and presidial of Bogen. Pop. 270.—Also a village of Prussia, in the regency of Dusseldorf and circle of Gladbach. Pop. 240.

WINDBERGEN, a village of Holstein, in the bail. and 5 m. SSE of Mildorf. Pop. 520.

WINDEBERG, a village of Prussia, in the reg. of Erfurt, and circle of Muhlhausen. Pop. 360.

WINDECKEN, a town and bail. of Hesse-Cassel, in the prov. and circle and 5 m. N of Hanau, on the l. bank of the Nidda. Pop. 1,612. It has an hospital. It is enclosed by walls, with 5 gates, and contains two churches, a Lutheran and a Reformed, and an hospital.

WINDEHAUSEN, a village of Prussia, in the reg. of Merseburg, circle of Sangerhausen. Pop. 505.

WINDELLAMA, a creek of New South Wales, in the co. of Argyll, an affluent of Werriaming river.

WINDELSBACH, a village of Bavaria, in the circle of Middle Franconia, and presidial of Leutershausen. Pop. 270.

WINDEN, a village of Bavaria, in the circle of the Pfalz, and cant. of Kandel. Pop. 538.—Also a village of Baden, in the circle of the Middle Rhine, and bail. of Baden. Pop. 380.—Also a village of Nassau, in the bail. of Nassau. Pop. 700.—Also a village of Prussia, in the regency of Aachen, and circle of Duren. Pop. 370.

WINDENREUTHE, a village of Baden, in the circle of the Upper Rhine, and bail. of Emendingen. Pop. 493.

WINDERMERE, a parish in Westmoreland, 9 m. NW of Kendal, comprising the chapelry of Troutbeck, and the townships of Applethwaite and Under-Milbeck. Area 17,139 acres. Pop. in 1831, 1,632; in 1851, 3,280.—The large and beautiful lake called Windermere, in the Applethwaite division of the p., is nearly 11 m. in length, and has an average breadth of ½ m. It runs N and S, with a very slight curve near the centre. The middle and lower parts of the lake lie between bold and steep hills. Towards its foot, where its undulating shores are adorned with forest trees, it contracts in breadth considerably. Towards the head the hills recede, leaving a broad margin of woods, meadows, and lawns, beautifully spread over a waving surface. It is a mile in width in the upper part, and presents a very noble expanse of water. It contains 14 islands, most of them forming a cluster near the middle. The largest, Belle Isle, which runs obliquely across the centre of the lake, opposite Bowness,

contains 28 acres. The lake has an extreme depth of 240 ft., and abounds in trout, perch, pike, and char, the last being a rare and delicate fish, found only in the deepest of the lakes. The whole of the W shore, and nearly half of the E, are in Lancashire, but the lake is considered to belong to Westmoreland. There is a ferry over the lake, a little below Bowness. Its alt. above sea-level is 116 ft.; and it discharges its waters by the Leven river, which flows, from the southern end of the lake, into the deep inlet called Leven sands. The Kendal branch railway from the Lancaster and Carlisle line, has been prolonged to the thriving and beautiful village of Birthwaite or Windermere on this lake.

WINDESHEIM, a village of Prussia, in the regency of Coblenz, circle of Kreutznach. Pop. 904.

WINDFOCHE, a village of Prussia, in the reg. of Dusseldorf, and circle of Elberfeld. Pop. 380.

WINDGALEN, a rocky mountain of Switzerland, in the cant. of Uri, 8 m. SE of Altorf. It has an alt. of upwards of 9,000 Parisian ft. above Lake Waldstetten.

WIND-GAP, a pass of the Blue Mountains, in Northampton co., in the state of Pennsylvania, U. S., 90 m. ENE of Harrisburg.

WINDHAG, a market-town of Austria, in the country above the Ens, and circle of the Muhl, 8 m. NE of Freistadt. Pop. 400.

WINDHAGEN, a village of Prussia, regency of Cologne, and circle of Gummersbach. Pop. 260.

WINDHAM, a township of Upper Canada, in the Talbot district, watered by Big creek. Pop. 1,568.

WINDHAM, a county in the NE part of the state of Connecticut, U. S., drained by Quinnebang and Shetucket rivers, and their branches, and intersected by the Norwich and Worcester, the New York and Boston, the Hartford, Providence, and Fishkill, and the Plainfield railways. Pop. in 1840, 28,080; in 1850, 31,079. Its capital is Brooklyn.—Also a county in the SE part of the state of Vermont, comprising an area of 765 sq. m., drained by Williams, West, and Saxton rivers, and the tributaries, and intersected by the Vermont Valley railway. It is generally hilly. Pop. in 1840, 27,442; in 1850, 29,062. Its capital is Fayetteville.—Also a township of Windham co., in the state of Connecticut, 28 m. E by S of Hartford, drained by Shetucket river and its branches. Pop. in 1840, 3,382; in 1850, 4,636.—Also a township of Cumberland co., in the state of Maine, 47 m. SW of Augusta, drained by branches of Presumpscot river. Pop. in 1840, 2,303; in 1850, 2,380.—Also a township of Rockingham co., in the state of New Hampshire, 35 m. SSE of Concord, watered by several ponds, and by branches of Merrimac river, and intersected by the Manchester and Lawrence railroad. Pop. in 1840, 926; in 1850, 818.—Also a township of Green co., in the state of New York, 32 m. SW of Albany, drained by Patavickill and Red-kill creek. Pop. in 1840, 2,417; in 1850, 2,048.—Also a township of Portage co., in the state of Ohio, 130 m. NE of Columbus, drained by a branch of Mahoning river. Pop. in 1840, 907; in 1850, 813.—Also a township of Bradford co., in the state of Pennsylvania, 115 m. N by E of Harrisburg, drained by Wepasseeing creek. Pop. in 1840, 879; in 1850, 1,000.—Also a township of Lucerne co., in the same state, 25 m. NW of Wilkesbarre, drained by Big and Little Mahoopy creeks. Pop. in 1840, 1,647.—Also a township of Windham co., in the state of Vermont, 76 m. S of Montpelier, drained by branches of Williams, West, and Saxton's rivers. Pop. in 1850, 763.

WINDHAM CENTRE, a village of Greene co., in the state of New York, U. S., on Red-kill creek, 33 m. SW of Albany. Pop. in 1850, 700.

WINDHAUSEN, a village of Brunswick, in the circle of Wolfenbützel. Pop. 490.—Also a village of Hesse, in the prov. of Upper Hesse, and circle of Grunberg. Pop. 460.

WINDHEIM, a village of Prussia, in the reg. and circle of Minden, on the Weser. Pop. 400.—Also a village of Bavaria, in the circle of Upper Franconia, and presidial of Ludwigstadt. Pop. 390.—Also a village in the circle of Lower Franconia, and presidial of Hammelburg. Pop. 424.—Also a village in the same circle, in the presidial of Munsterstadt. Pop. 182.—Also a village in the same circle, in the lordship of Rotherfels. Pop. 300.

WINDHOF, a village of Austria, in Styria, circle of Gratz, near Peckan. Pop. 800.

WINDHORING, a village of Bavaria, circle of Swabia, and presidial of Altöttingen. Pop. 350.

WINDIGSTEIG, a market-town of Austria, in the circle of the Upper Mannhardsberg, on the Thaya, 30 m. NW of Krems. Pop. 335.

WINDIG-YENIKAU, a town of Bohemia, in the circle and 33 m. S of Czeslau.

WINDISCH, a parish and village of Switzerland, in the cant. of Argau, district and $1\frac{1}{2}$ m. E of Brugg, on the Reuss, near its confluence with the Aar. Pop. 1,294. This village occupies the site of the *Vindonissa* of the Romans, one of the most important towns of Helvetia, destroyed by the Germans in 570, and of which some remains still exist. It was the seat of the bishopric transferred after its destruction to Constance.

WINDISCHBACH, a village of Württemberg, circle of the Jaxt, and bail. of Oehringen. Pop. 390.

WINDISCH-BLEYBERG, a village of Illyria, in the gov. of Laybach, and circle of Klagenfurt. It has a lead mine and mineral springs.

WINDISCHBUCH, a market-town of Baden, in the circle of the Lower Rhine, bail. and 3 m. S of Boxberg. Pop. 450.

WINDISCHENLAIBACH, a village of Bavaria, in the circle of Upper Franconia, and presidial of Weidenberg. Pop. 280.

WINDISCHESCHENBACH, a market-town of Bavaria, in the circle of the Upper Pfalz, and presidial of Neustadt. Pop. 917.

WINDISCH-FEISTRITZ. See **FEISTRITZ-WINDISCH**.

WINDISCHGARSTEN, a market-town of Austria, in the country above the Ens, and circle of the Traun, 27 m. SSW of Steyer, in the midst of mountains, on the Teichel. It has mineral springs and baths, and in the environs are numerous forges and saw-mills.

WINDISCH-GRATZ, or **SLAVENI-GRADEZ**, a town of Austria, in Styria, in the circle and 20 m. ESE of Cilly, on the Missling. Pop. 700. It has a castle and an hospital.

WINDISCHHAUSEN, a village of Bavaria, in the circle of the Middle Rhine, and presidial of Heldenheim. Pop. 230.

WINDISCH-HOLZHAUSEN, a village of Prussia, in the reg. and circle of Erfurt. Pop. 200.

WINDISCHIN-STAIK, a market-town of Austria, in the country below the Ens, and circle of the Upper Mannhardsberg, on the Thaya. Pop. 400.

WINDISCH-KAPPEL, a market-town of Austria, in Illyria, in the gov. of Laibach, and circle of Klagenfurt. It has a mine of quicksilver.

WINDISCHLANDSBERG, a market-town of Austria, in Styria, in the circle and 20 m. ESE of Cilly, on the r. bank of the Sotta. Pop. 400. It has a castle.

WINDISCHLEUBA, a village of Saxe-Altenberg. Pop. 480.

WINDISCHMATREY, or **WINDISCH-MATRAY**,

a market-town of Austria, in the Tyrol, in the circle of the Pustertal. Pop. 558.

WINDISCHPROBEN, a market-town of Hungary, in the comarca of Thurocz. It has a castle.

WINDISCHSCHLETTEN, a village of Bavaria, in the circle of Upper Franconia, and presidial of Sohesalitz. Pop. 270.

WINDLACH, a village of Switzerland, in the cant. of Zurich, and bail. of Regensberg. Pop. 390.

WINDLE, a township in the p. of Prescot, co-palatine of Lancaster, containing the hamlets of Hardshaw and St. Helen's. Area 2,907 acres. Pop. in 1831, 5,825; in 1851, 9,310.

WINDLESHAM, a parish in Surrey. Area 5,874 acres. Pop. in 1831, 1,912; in 1851, 1,794.

WINDLESTONE, a township in the p. of St. Andrews-Auckland, co-palatine of Durham, 4 m. ESE of Bishop-Auckland. Area 1,250 acres. Pop. in 1831, 201; in 1851, 153.

WINDLEY, a township in the p. of Duffield, Derbyshire, $6\frac{1}{2}$ m. NNW of Derby. Pop. 219.

WINDMAIS, a village of Bavaria, in the circle of the Upper Pfalz, and presidial of Oberviechtach. Pop. 114.

WINDMILL POINT, a promontory of Upper Canada, on the N side of St. Lawrence, 1 m. E of Prescott.

WINDO, an island of Sweden, in the laen of Stockholm, to the NE of Rimaroe.

WINDORF, a market-town of Bavaria, in the circle of Lower Bavaria, and presidial of Vilshofen, on the Danube. Pop. 524.—Also a village of Saxony, in the bail. of Leipzig. Pop. 355.

WINDRATH, a village of Prussia, in the regency of Dusseldorf and circle of Elberfeld. Pop. 440.

WINDRUSH, a parish in Gloucestershire, $5\frac{1}{2}$ m. E of Northleach. Area 1,710 acres. Pop. 332.

WINDSBACH, a town of Bavaria, in the circle of Middle Franconia, and presidial of Heilsbronn, on the Rezat. Pop. 1,196. It is surrounded with walls, with two gates, and has two churches and a Latin school. It has tobacco-mills, and carries on an active trade in wood.

WINDSBERG, a village of Bavaria, in the circle of the Pfalz, and cant. of Pirmasens. Pop. 540.

WINDSCHACHT. See **SCHEMNITZ**.

WINDSCHLAG, a village of Baden, in the circle of the Middle Rhine, bail. of Offenburg. Pop. 884.

WINDSFELD, a village of Bavaria, in the circle of Middle Franconia, and presidial of Heidenheim. Pop. 285.

WINDSHAUSEN, a village of Bavaria, in the circle of Lower Franconia, and presidial of Neustadt, on the Saale. Pop. 308.

WINDSHEIM, a town and presidial of Bavaria, in the circle of Middle Franconia, on the Aisch, at the confluence of the Raunach, and 13 m. NW of Anspach. Pop. 3,335. It is enclosed by walls, with 5 gates, and has a castle, two churches, an hospital, and a Latin school.

WINDSOR (New), a borough, market-town, and parish, in the NE corner of Berkshire. The borough is pleasantly situated on the r. bank of the Thames, 19 m. E by N of Reading, 40 m. SE by E of Oxford, and 22 m. W by S of London. Its principal thoroughfare bears the names successively of Park, High, Castle, and Thames street; and describes, through the centre of the town, from the E end of the Thames, a curvature of about $\frac{1}{2}$ a m. in length. The smaller streets so ramify or intersect the greater, as to give the town no pretension to regularity of street arrangement. York-place, Gloucester-place, Brunswick-terrace, the New-road, Grove-place, and Clarence-crescent, are the chief lines of new houses erected in the S and W outskirts. The

VIEW OF THE CITY OF VENICE FROM THE RIVER

royal palace, with its sumptuous suites of accompanying edifices, sweeps eastward from the centre of the town, away into the royal demesne, and looks out from the summit of a rising-ground upon a brilliant and far-extending landscape. The infantry barracks, built in 1795, and situated in Sheet-street, accommodate nearly 1,000 men. The cavalry barracks, situated at Spital, $\frac{1}{2}$ a m. to the south, have less accommodation, but a better appearance. The bridge connecting Windsor with Eton, and placed on a line with Thames street, is 200 ft. long and 29 ft. wide, and consists of 3 cast-iron arches, resting on piers of granite. The town-hall, situated in High-street, is a plain edifice, with an interesting interior. The theatre, built in 1815, at a cost of nearly £6,000, has little exterior ornament, but is said to possess some interior embellishment. The parish-church, built in 1822, is a spacious structure in the plain Gothic style, surmounted by an embattled and pinnacled square tower. The town has good public and subscription libraries. Though numerous craft are borne past by the Thames, the town profits little by the navigation. Ale is made in large quantity, and sent chiefly to London. Omnibuses ply to the Slough station of the Great Western railway. The p. has an area of 3,237 acres. The parish of New W. is all comprehended within the borough-boundaries. Windsor comprises the hamlet of Dedworth, and a part of the p. of Clewer. Pop. of parl. burgh in 1831, 7,103; in 1851, 9,596. The borough sends two members to parliament. Electors in 1852, 712.

WINDSOR-CASTLE, a royal palace—a suite of majestic structures, quaintly yet expressively pronounced, for its combination of grandeur, beauty, strength, and antiquity, “an emblem of the British constitution”—lies on the E side of the town. “Windsor,” says Von Raumer, “has far surpassed my expectation, and produced a greater impression on my mind than any other castle I have ever seen. It combines the bold peculiarity of the middle ages with all the comfort and magnificence of the present day. There is not a tedious symmetrical repetition of similar apartments, not the same thing over and over again; but every staircase, every gallery, every saloon, every window is different, striking, and peculiar—in a word, it is poetical. These giant towers, bastions, balconies, chapels, and halls of chivalry—the ever-changing prospect over stream and valley, wood and pasture—the fantasy of a thousand years compressed within a single moment, all combine to produce an effect exceeding everything that scenic decoration can produce on canvas.” A Saxon palace stood at old Windsor, $\frac{1}{2}$ m. from the present castle, and was occasionally the residence of the kings of England. A fortress at New Windsor was given, along with the town, by Edward the Confessor, to the abbey of St. Peter at Westminster; but was purchased back, reconstructed, and made a place of considerable strength by William the Conqueror. It was enlarged by Henry I., and, in the time of Stephen, it was esteemed the second fortress in the kingdom. It became the rendezvous of the royal party in the civil wars of Henry III.; and it was the favourite residence of Edwards I. and II., and the birth-place of Edward III., and other princes. Edward III. commenced, and extensively achieved, the construction of the whole pile on its present plan of vastness and grandeur. Edward IV. rebuilt, upon an extended plan, St. George's chapel; Henry VII. made several additions to the chapel, and to the upper ward; Henry VIII. rebuilt the principal gateway—that which still bears his name; Elizabeth built, in the peculiar architectural style of her age, a gallery still named after her, the northern terrace; and Charles II. made numerous additions and changes, some enriching, others not a little debasing. The castle passed to George III., nearly in the state in which it was left by Charles II.; but, during the former's reign, it was much renovated and embellished in its chapel, in the N front of its upper ward, and in some other of its parts. Soon after George III.'s death, a purpose was adopted, on a grand scale, to strip the entire building of excrescences, to free it from occasional features of doubtful taste, to mould it into symmetry, and to extend and beautify it into uniform magnificence; and the designs of Mr. Jeffrey Wyatt, afterwards Sir Jeffrey Wyattville, were adopted for the purpose. The castle crowns a hill, or rising ground, which extends from E to W, and is somewhat precipitous on the N, but, on the other three sides, slopes gently to the plain. The Thames makes so noble sweep round it, gemmed with islets and gorgeously decorated along the banks, as to be 1 furlong from the W end, $\frac{1}{2}$ furlong from the middle of the N, and $\frac{1}{4}$ from the NE corner. The magnificent pile appears more or less imposing and picturesque from almost every point of view within a radius of several miles. Its N front, which presents the longest continuous range of its buildings, and com-

prises Queen Elizabeth's picture-gallery, the state apartments, and Winchester, George III.'s, and Brunswick towers, is seen with impressive effect from the Bath road and the Great Western railway, but especially from the play-grounds of Eton college. The E front, which, with its four grand towers seems itself to be larger than most other great edifices—which comprises the suite of apartments at present occupied by the Queen—and which has, as a beautiful fore-ground, the new Pentagon terrace, with bastions at the angles, and an enclosed flower-garden—is strikingly seen on the road to Windsor from Datchet. The S front, and the general outline, combined with the sylvan and luxuriant frame-work of scenery in which the whole is set, produce, to a spectator at the extremity of the Long walk, and especially to one on Snow-hill, perhaps the most beautiful, though not the most striking, of the entire series of views. The W front, and the combination of it and the north one, form impressive though close views, as seen from the Thames. The Round tower, ‘the proud keep of Windsor,’ as seen round the whole circumference of the range of vision, rises above the whole group of edifices, and fixes the attention by the vastness of its bulk. It crowns the summit of a lofty artificial mound between the two wards of the castle, and is surrounded by a belt of low ground, once a fosse, but now filled up, or transmutated into a shrubbery and garden. The tower is 302 ft. in circumf., and lifts the top of its flag-pole to the alt. of 298 ft. above the level of the Little park.—The State apartments occupy the N side of the great quadrangle.—The chapel, dedicated to St. George, and designed for the special use of the order of the Garter, founded at Windsor by Edward III., but chiefly constructed by Henry VII., is remarkable for its exquisite proportions, and the rich yet solemn ornaments of the interior. It is in the purest style of the later pointed architecture.

WINDSOR, a town of New South Wales, in the p. of St. Matthew, co. of Cumberland, 20 m. from Parramatta, 35 m. from Sydney, at the confluence of South creek with Hawkesbury river, on a hill, at an alt. of 100 ft. above the level of the river. Pop. 1,679. The streets are regularly built, but the houses are chiefly of wood. It has a church, a Methodist chapel, a public school, and an hospital. It was originally named Greenhill.—Also a river of New Zealand, on the SW coast of the island of Taval-Poenammon, which flows into the ocean in S lat. 46° 10'.

WINDSOR, a town of Nova Scotia, in the co. of Hants, of which it is the capital, on the r bank of a river of the same name, also called Pigauquit, and near its entrance into Minas bay. It is well built, and has a university.

WINDSOR, a village of Upper Canada, in the township of Sandwich, on the Detroit river, opposite the town of that name, on a bank, at an alt. of about 50 ft. above the river, which is here about 1 m. in width. Pop. 500.—Also a village in the township of Whitby, 2 m. from Windsor bay, on Lake Ontario, and 31 m. from Toronto. Pop. 500.

WINDSOR, a county in the SE part of the state of Vermont, U. S., comprising an area of 912 sq. m., drained by Black, Queechee, Williams, and White rivers, and intersected by the Vermont Central and the Rutland and Burlington railroads. It is hilly, but is in some parts very fertile. Pop. in 1840, 40,356; in 1850, 38,320. Its cap. is Woodstock.—Also a township of the above-named co., on the W side of Connecticut river, 54 m. S by E of Montpelier, drained by Mill branch, and intersected by the Sullivan railway. It is generally hilly, and in the S is Acutey mountain, which has an alt. of 3,320 ft. above sea-level. Pop. in 1840, 2,744; in 1850, 1,928.—Also a township of Kennebec co., in the state of Maine, 10 m. E of Augusta, drained by Sheepscot river. Pop. in 1840, 1,789; in 1850, 1,793.—Also a township of Hillsboro' co., in the state of New Hampshire, drained by branches of Contoocook river. Pop. in 1840, 177.—Also a township of Berkshire co., in the state of Massachusetts, 83 m. W by N of Boston, drained by branches of Westfield river. Pop. in 1840, 897; in 1850, 899.—Also a village of Broom co., in the state of New York, 106 m. WSW of Albany, drained by Sasquehanna river, on the W bank of which the village is situated. Pop. of township in 1840, 2,368; in 1850,

the regency of Gitschin, and bail. of New-Bidschow. Pop. 220.

WINKBOURNE, a parish in Nottinghamshire, 8 m. N. of Southwell. Area 2,240 acres. Pop. 129.

WINKEL, a village of Bavaria, in the circle of Upper Bavaria, and presidial of Berchtesgaden. Pop. 250.—Also a village of the same circle, in the presidial of Landsberg. Pop. 250.—Also a market-town of the duchy of Nassau, in the bail. of Budeaheim, on the r. bank of the Rhine. Pop. 1,700.—Also a village of Austria, in the Tyrol, in the circle of Brixen, and bail. of Lienz. Pop. 350.—Also a village of Saxe-Weimar, in the bail. of Altstadt. Pop. 433.—Also a village of Switzerland, in the cant. and 4 m. S of Luzern, on an arm of the Waldstetten-see.—Also a village in the cant. of Zurich, and bail. of Bülach. Pop. 728. See also WERTIN.

WINKELDORF, a village of Hanover, in the gov. of Stade, and bail. of Ottersberg. Pop. 200.—Also a village of Prussia, in the regency of Breslau, and circle of Habelschwerdt. Pop. 280.

WINKELHAUSEN, a village of Prussia, in the reg. of Düsseldorf, and circle of Lennep. Pop. 330.

WINKELHORST, a village of Prussia, in the reg. of Munster, and circle of Beckum. Pop. 220.

WINKEL, a village of Nassau, and bail. of Weilburg. Pop. 450.

WINKEL-SAINT-CLOI, a village of Belgium, in the prov. of West Flanders, and arrond. of Courtrai. Pop. 2,350.

WINKELSAS, a village of Bavaria, in the circle of Lower Bavaria, presidial of Rottenburg. Pop. 200.

WINKELSDORF, a village of Austria, in Moravia, in the circle of Olmütz, and lordship of Ullersdorf. Pop. 760. It has a glass-work.

WINKELSHUTEN, a village of Prussia, in the reg. of Minden, and circle of Halle. Pop. 628.

WINKELSTETTIN, a village of Hanover, in the principality of Osnabrück, and bail. of Iburg. Pop. 350.

WINKFIELD, a parish and village in Berks, 6 m. SW of New Windsor, including the hamlets of Ascot, Bulbrook, and Hateley. Area 8,982 acres. Pop. in 1831, 2,009; in 1851, 2,185.

WINKHAUSEN, a village of Prussia, in the reg. of Düsseldorf, and circle of Duisburg. Pop. 860.

WINKLARN, a market-town of Bavaria, in the circle of the Upper Pfalz, and presidial of Oberviechtach. Pop. 862. It has a castle, and possesses important manufactories of cloth and other fabrics, and fisheries.

WINKLERN, a village of Austria, in Styria, in the circle of Judenberg. Pop. 350.

WINKLERSBERG. See SCHNEEBERG.

WINKLING, a village of Bavaria, in the circle of Lower Bavaria, and presidial of Bogen. Pop. 280.

WINKOWITZ. See VINKOVCE.

WINKSLEY, a chapelry in the p. of Ripon, W. R. of Yorkshire, $\frac{1}{2}$ m. W of Ripon. Area 703 acres. Pop. in 1831, 259; in 1851, 214.

WINLATON, a parochial chapelry and township in the p. of Ryton, co.-palatine of Durham, $\frac{1}{2}$ m. W by S of Gateshead, on the river Derwent, over which there is here a bridge. A handsome chain bridge also has been thrown across the Tyne, between this place and Scotswood in Northumberland. Area 8,261 acres. Pop. in 1831, 8,951; in 1851, 6,085. Here are extensive iron-works, established in 1690, in which anchors, even of the largest size, anvils, chain cables, cylinders, edge-tools, nail-rods, files, &c., are manufactured. On the banks of the Tyne are works for refining lead.

WINMARLEIGH, a township in the p. of Garstang, co.-palatine of Lancaster, 3 m. NW of Gar-

stang, near the Preston and Lancaster canal and railway. Area 2,282 acres. Pop. in 1851, 262.

WINNAGORA, a village of Prussia, in the reg. of Posen, and circle of Schroda. Pop. 400.

WINNALL, a parish in Hants, 1 m. NNE of Winchester. Area 561 acres. Pop. in 1851, 117.

WINNAMAC, a village of Pulaski co., in the state of Indiana, U. S., on the W side of Tippecanoe river, and 90 m. N by W of Indianapolis, and intersected by the Indiana Central railroad. Pop. in 1850, 240.

WINNBACH, a village of Austria, in the Tyrol, circle of Brixen, and bail. of Bruneck. Pop. 500.

WINNEBAGO, a county in the N part of the state of Illinois, U. S., comprising an area of 534 sq. m., intersected by Rock river, and by its branches Kishwaukee and Pekatoma, and by the Galena and Chicago, and the Belvoir branch railroads. Pop. in 1840, 4,609; in 1850, 11,773.—Also a county in the N part of the state of Iowa, comprising an area of 432 sq. m., drained by affluents of Mankato river.—Also a central county of the state of Wisconsin, comprising an area of 471 sq. m., drained by Neenah or Fox, and Panwaggon rivers, and containing several lakes. Pop. in 1840, 135; in 1850, 10,125. Its cap. is Ashkosh.—Also a lake in the E part of the state of Wisconsin, 30 m. W of Lake Michigan, between Winnebago and Calumet counties, and in the N part of Fond-du-Lac co. It is 32 m. in length, and 8 m. in average breadth. It receives several streams, and discharges itself into Green bay.

WINNEBAH, a town of Africa, in Upper Guinea, on the Gold coast, in the kingdom of Ashantee, to the W of Accorah. Pop. 4,000.

WINNELENDONK, a village of Prussia, in the reg. of Düsseldorf, and circle of Geldern. Pop. 845.

WINNEN, a village of Hesse, in the prov. of Upper Hesse, circle of Marburg, and bail. of Treis, on the Lumbde. Pop. 200.—Also a village of Nassau, and bail. of Kennerod. Pop. 250.

WINNENDEN, a town of Württemberg, in the circle of the Neckar, bail. and 6 m. NE of Waiblingen. Pop. 3,200. It has a lunatic asylum, formerly the royal castle of Winnenthal, and several schools, and contains extensive tanneries, dye-works, and yarn-mills. The trade consists chiefly in grain and wood.

WINNENTHAL, a market-town of Prussia, in the regency and 32 m. NW of Düsseldorf, and circle of Geldern. Pop. 1,300.

WINNESHEIK, a county in the NE part of the state of Iowa, U. S., comprising an area of 732 sq. m., drained by Upper Iowa and Turkey rivers and their branches. Pop. in 1850, 546. Its cap. is Winnesheik.

WINNEZELLE, a village of France, in the dep. of the Nord, and cant. of Steenwoorde. Pop. 1,550.

WINNIBIGOSHISH LAKES, a group of lakes in the Minnesota Territory, 180 m. N by W of St. Paul. It is 14 m. long, and 9 m. wide.

WINNICA. See VINNITZA.

WINNIFELD, or VARUSFELD, a territory of the principality of Lippe-Deimold, and bail. of Detmold.

WINNINGEN, a market-town of Prussia, in the regency and circle and 5 m. SW of Coblenz, on the Moselle. Pop. 1,548, chiefly Protestants. The vine is assiduously cultivated in the vicinity of this place, and the wine produced here is the best in the regency.—Also a village in the regency of Magdeburg, and circle of Aschersleben. Pop. 562.

WINNINGTON, a township in the p. of Great Budworth, co.-palatine of Chester, 1 m. NW of Northwich, on the river Weaver, over which there is here a bridge, and in the line of the Grand Junction canal. Area 597 acres. Pop. in 1831, 256;

in 1851, 405.—Also a township in the p. of Mucklesham, Staffordshire, $4\frac{1}{2}$ m. NE of Drayton-in-Hales. Pop. in 1831, 249; in 1851, 200.

WINNIPEG, a river of North America, which rises in the Lake-of-the-Woods, and flows in a W course to Lake Winnipeg, into which it enters at Fort Alexander, in N lat. $50^{\circ} 36' 30''$, after a singularly broken course of 170 m. It forms the chief water-communication between Lake Superior and Lake Winnipeg. Major Long, in his account of the route pursued by his exploring expedition between the two lakes, says that the W. at its confluence with the lake of the same name, presents a majestic and impressive stream of considerable but variable width. "It is composed of a series of deep and broad basins rising one above another, and serving as the channel of a huge volume of water, which is precipitated from one basin to another in tumultuous cataracts of the most romantic character. Of these waterfalls, there are no less than 31 in the route to the Lake-of-the-Woods, which interrupt the passage of canoes, and at all of which are carrying places. The aggregate descent of water in the W. may be estimated at 410 ft., which may be considered as the elevation of the Lake-of-the-Woods above Lake W. The route by Covert and Sturgeon-Dam rivers is probably the most direct, (the lower portion of which is the same with that above mentioned,) but the obstructions are said to be more numerous and formidable, especially in a low stage of water. Besides these there are numerous other deviations from the main route, some of which have been traversed, but the number that remains to be explored is doubtless far greater. At the distance of about 60 miles below the Lake-of-the-Woods, the W. receives a large tributary from the north, called English river, which is of a character similar to that of the principal, and nearly as large as the latter above their junction. Its headwaters interlock with those of Albany river, which empties into James' bay, and is the principal channel of intercourse between Lake W. and the trading establishments on that river. The Lake-of-the-Woods is about 75 m. long, and of irregular widths, from 10 to 35 or 40 m. Compared with other lakes, it deserves a high rank on the scale of beauty. The scenery is wild and romantic in a high degree, its shores being faced with precipices and crowned with hills and knobs of variable heights, clad with a dense foliage of shrubbery and evergreens. Its surface is beautifully studded with countless islands of various sizes and forms, disclosing between them the continued sheet of its wide-spreading waters, the extent of which enlarges upon the vision as the traveller advances upon the lake, till the main land is shut out from the view by the islands that multiply around him. The 49th parallel crosses the lake within the distance of about 12 m. from its S extremity. The region bordering upon the waters above described, is one of the most dreary imaginable. Its climate is rigorous, its surface exceedingly rugged and broken, and its products so limited and meagre, that it seems never to have been destined as a residence either by man or beast. A solitary moose, caribou, or bear, is occasionally to be found; and a half-starved family of savages sometimes fix a temporary residence upon some of the water-courses, and subsist miserably upon fish, but it seems as if comfort and competency were denied to both. The prevailing rocks are primitive, and are almost exclusively the ingredients of which the hills are composed, while the earthy portions of the valley are made up of the coarse and unproductive detritus afforded by their disintegration. The soil is uniformly thin, and in many places totally

wanting. The stunted growth of the woodlands, and the dwarfish character of vegetation which prevail generally throughout this region, are attributable to these causes. The islands of the lakes and river are similar to the circumjacent highlands, being uniformly based upon rock and presenting rugged and broken surfaces. The growth found on the lower part of the river, comprises only the aspen, white birch, spruce, tamarack, and scrub-oak, none of which attain any considerable magnitude. As we approach the Lake-of-the-Woods, the following trees make their appearance, viz., two species of pine, called the white and red epinette, the former of which is more commonly called the larch. From the latter is extracted the gum employed for pitching canoes, which usually have their ribs and lining constructed of its timber; a small species of pitch pine called by the Canadians cypress, which also furnishes a gum inferior to that above mentioned; and the liard, a variety of the poplar, more commonly called the balsam of Gilead. The undergrowth is dense in many places, and consists of stunted oak, chokecherry, hazle, pambina or bush cranberry, service-berry, arrow-wood, wild plum, raspberry, briar-bush, whortleberry, sumac, wild rose, sweet briar; sand cherry, red and black cherry, pea-vine, gooseberry, currant, bear-berry, &c. &c. Above the Lake-of-the-Woods, Rainy river becomes the channel of communication, and extends 100 m. to the lake of the same name. It has an average breadth of about 300 yds., is deep and gentle, and has no obstructions to its navigation, within 48 m. of its mouth; at this distance are situated the rapids of Rainy river, which are about one mile long, and have an aggregate descent of about 10 ft. About 10 m. further up is another inconsiderable rapid, with a fall of 3 ft. At the outlet of Rainy lake is a rapid of about 5 ft. descent, and $2\frac{1}{2}$ m. below are the falls of Rainy river, down which the torrent pours with terrific grandeur through an aggregate descent of 25 ft. in the distance of but a few yards. At this place are situated an establishment of the Hudson's Bay company on the N side of the river, and one belonging to the American Fur company on the S. Twenty miles below the falls is the entrance of a considerable tributary from the SW, called the Grand fork, which affords a channel of communication between the principal and Little Winnepeck lake of the Mississippi, navigable in wet seasons. It receives several other streams of less note. The contrast between the country of Rainy river and that before described, is no less striking than that between the two water-courses themselves. Here bottoms and table-lands of considerable extent are often to be met with, wearing the aspect of a secondary region; these are, however, generally terminated, at no great distance, by tracts of a rugged and broken character. Rocks are seldom to be found in the immediate valley or bed of the river. The forests are more dense and heavy, and contain several trees not enumerated in the foregoing list, viz. white oak, ash, hickory, water-maple, white walnut, linden, elm, &c. The pine and white birch become more abundant, and attain a more stately size. From the estimates above given, making some allowance for the general descent of the river, it will appear that the surface of Rainy lake is elevated about 60 ft. above that of the Lake-of-the-Woods, or 470 ft. above that of Lake W. Pursuing our course upwards we passed through Rainy, Sturgeon, La Croix, Upper Sturgeon, Doré, Cannibal, and Thousand lakes, besides numerous others of less note and size, and also the channels by which they are connected, which, in the language of the voyagers, are denominated rivers, and known by various names.

before we reach the dividing ridge between the waters of lakes W. and Superior. Several routes are practicable through this part of the country, but the one we pursued is said to be the most frequented. The route connected with the Grand Portage, which was the only route frequented till within a few years, is united to the new route by two channels, one branching off at Lac-de-la-Croix, and the other at Upper-Sturgeon lake, both of which unite in Lake Saganaga, and enter Lake Superior at Pigeon river. The lakes of this region are of all possible shapes, exceedingly numerous, and thronged with islands. As on the route before described, the lakes here rise one above another in continual gradations, but less abruptly, giving an altitude to the uppermost on the route at least equal to 130 ft., making the entire elevation above Lake W. about 600 ft. The alt. of the dividing ridge, above the water-table of the adjacent country, is no where greater than about 150 ft., the head-waters of the streams tributary to Hudson's bay being somewhat more elevated than those of Lake Superior. The channel of communication thence to Lake Superior is through Dog river, the lower portion of which is more commonly called the Kamanatekwoya. This river is exceedingly serpentine in its course, has a regular bed, and a rapid current. About 40 m. below the point where we entered it, is a lake of the same name, about 12 m. long and from 1 to 5 m. broad. The river receives several tributaries, the most considerable of which is the Cypress, entering from the W above Dog lake. Two others (names unknown) one of which enters Dog lake from the NE, and is said to communicate with the English river before noticed, and the other into the SW part of the same lake, affording a communication with the Thousand lakes, which is sometimes travelled; besides these there are two others of considerable size. On this route the portages are equally as numerous, and more extensive than on the other, nor are its other impediments less formidable. Rapids and cataracts abound; among the latter is a magnificent cascade, denominated by the Indians the falls of Kakabikka or 'Cleft Rock,' situated about 80 m. upward from the mouth of the river, which is here contracted to the width of about 50 yards, and supplied with a volume of water unusually large for that width. Thus confined, the whole body of the river is precipitated, in a dense sheet, down a perpendicular precipice more than 130 ft. into a deep chasm, bounded by perpendicular cliffs of the height just mentioned; the banks of the river, for a distance of nearly $\frac{1}{2}$ a mile below, are completely insurmountable, rising perpendicularly, and in many places overhanging their bases. Below the falls of Kakabikka, the river presents a continued rapid for the distance of about 20 m., below which it quietly passes through serpentine folds to its mouth, which is in an arm of the lake called Kamana bay. The whole descent of the water from Coldwater lake, (the first water eastward of the dividing ridge), to Lake Superior, may be estimated at about 600 ft."

WINNIPEG (LAKE), a large and interesting lake nearly in the centre of the great middle plain of the North American continent, comprised within what is called the Hudson's bay territories, and lying between the parallels of 50° 30' and 53° 45' N lat., and the meridians of 95° 30' and 99° 30' W long. It is about 280 m. long, with a breadth varying from 15 to 80 m. Its area has been estimated at 9,000 sq. m.; and its alt. above sea-level by some at 853 ft., by others at only 630 ft. It appears to be the same lake which was called by early travellers the Lake of the Assinipoils. Carver gave it its present appel-

lation, which is said to be derived from the muddy or sallow appearance of its waters: we, signifying 'muddy,' and *nepe*, 'water' in the Chippewa language. Its banks on the S and SW are low and marshy; on the NE the shore swells into broad hills of no great elevation, which are covered with a thin growth of pine, spruce, juniper, red-cedar, and white birch. The whole of the eastern shore appears to be of primitive formation; while the western is composed of secondary rocks. Its shores are much indented, but its general direction is about NNW. Few lakes receive so many and such large streams; and by many of them and of the rivers which flow from it, a communication is kept up between the Atlantic and Pacific. The Saskatchewan flowing to the NW, enters this lake after a course of 650 m.; and issuing from its NE extremity, under the name of the Nelson river, flows into the SW side of Hudson's bay, after a further course of 350 m. The Winnipeg river enters its SE extremity; and the Red river, which has its remotest sources in Lake Travers, pursues a nearly N course of about 600 m. to the SW extremity. The latter river—which is to be distinguished from the Red river affluent of the Mississippi—rises in about N lat. 45° 40', W long. 96° 34' in the Riviere-des-Sioux, which, after a course of 30 m. from Lake Travers, is joined by the Otter-tail river, which rises near the head-waters of the Mississippi, 150 m. NE of Lake Travers. The general course of the confluent streams is N, inclining a little to the W, and exceedingly tortuous. Its length, following its meanders, is, according to Long, more than 500 m., while in the direction of its valley, it does not exceed 360 m. It receives numerous tributaries, of which the following are the principal, and enter it in the order here mentioned, commencing with the uppermost, viz.:—The Pe or Rice river, the Shienne, the Buffalo, Elm, Wild-rice, the Plum and Sandhill rivulets. The Goose river, the Red Fork, the Turtle, Big Saline and Park rivers, the Swamp Brook, the "Two Rivers," and Pembina river, all within the territory of the United States. The Reed Grass, Scotchman, Rat, Muddy, Assiniboin, and Death rivers, entering northwardly of the 49th parallel. Red river is navigable for canoes, and even pirogues of two tons burthen, from its mouth to its source, as also to the sources of several of its tributaries when swollen by freshets. On such occasions, canoes have been known to pass from Lake Travers, its source, and into the St. Peter, and back again without inconvenience. The voyage down the river is now seldom performed, owing to the limited nature of the trade in this direction. Formerly the Hudson's Bay company had a trading establishment on Lake Travers, between which and their establishments lower down the river considerable intercourse existed. It abounds in rapids, which, together with its numerous and extensive windings, render the passage by water very tedious. The aggregate descent from Lake Travers to Lake W., or from the source to the debouchure of Red river, a distance of about 600 m., following the meanders of that stream, amounts, Major Keating estimates, to about 200 ft. Otter-tail river is navigable as above to its source, through which a water communication is continued, forming a connection with the Riviere-de-Corbeau of the Mississippi, and the Medicine-Bark of the St. Peter. The Wild-rice river and the Red Fork are connected in the same manner with other sources of the Mississippi, affording navigable communications between the subsidiary lakes at their respective heads, and others tributary to that great river. Reed Grass river has a two-fold connection with other waters, serving as a channel of intercourse between Red

river and the source of the Mississippi, as also that of one of the tributaries of Rainy river. Rat river also affords a communication between Red river and the Lake-of-the-Woods. These several communications are only practicable in very wet seasons, and the transition from their summits into other waters is interrupted by portages of greater or less extent, but in no instances by ridges of any considerable height. The Goose and Turtle rivers, both of which take their rise in Devil lake, are navigable to that place, and the lake itself, which is said to be made up of a multiplicity of small pools connected by navigable channels, affords an extent of navigation of about 100 m. The Assiniboin is the largest of all the tributaries of Red river, and in point of magnitude and extent, vies even with the principal. Their point of junction is in N lat. 49° 53' 35", and W long. 97° 00' 50". Its sources mingle with the waters of the Saskatchewan, NW from the point just mentioned. In its progress downwards it forms an extensive curve with a convexity to the SW, and receives numerous subsidiaries, among which is a stream of respectable size, called Mouse river, that is said to receive some of its waters from a point within one mile of the Missouri. The Assiniboin is navigable at all stages of the water to a great distance, and is the channel of continual intercourse between several British trading establishments located on its waters, and one of their principal depots situated at the mouth of the river. The immediate valley of Red river is not bounded by parallel ranges of bluffs or banks like that of the St. Peter and other tributaries of the Mississippi, but expands to a great width, terminated on the west by highlands connected with the Coteau-des-Prairies, and on the E by the ridges and swamps in which the waters of the Mississippi, St. Lawrence, and Nelson's rivers find a common origin. A broad expanse of verdant prairie, says Keating, spreading beyond the utmost extent of vision, is here presented to the view. If we except the margin of the river and those of its tributary streams, which are ringed with trees and shrubbery, there is very little to interrupt the simplicity and uniformity of the scenery; scarcely is there an undulation to variegate the prospect, save what is afforded by an optical illusion that makes the traveller fancy himself at the centre of a basin, and surrounded by an amphitheatre of rising ground at no great distance, which constantly eludes his approach. The soil is generally thin, of a light complexion, and argillaceous structure. The dwarfish appearance of the sedge which it supports, especially on the upper portion of the valley, indicates either a want of fertility or the admixture of salts or other ingredients not congenial to vegetation. In many places, however, the soil appears rich, supporting a dense and luxuriant growth of grass, weeds, &c. As we descend along the river, the indications of fertility multiply, the soil becomes deeper and the vegetation more thrifty, woodlands become more frequent, and trees attain a larger size. The flatness of surface that almost uniformly prevails throughout the valley of Red river, may be regarded as a defect in natural character that cannot easily be remedied. A colony planted by the Earl of Selkirk occupies positions on the banks of this river, one at the junction of the Assiniboin, usually called Fort Assiniboin, and the other about 60 m. above, called Pembina. See RED RIVER SETTLEMENT.

WINNIPSEOGEE (LAKE), a lake of the state of New Hampshire, U. S., between Belknap and Carroll counties, and at an alt. of 472 ft. above sea-level. It is 22 m. in length, from 1 to 10 m. in width, and charges itself on the SW, by a river of the same

name, into Pemigewasset river, a head-stream of the Merrimac. It contains above 300 small islands, some of which contain from 100 to 200 cultivated acres.

WINNISBORO, a village of Fairfield district, in the state of South Carolina, U. S., on the Charlotte and South Carolina railroad. Pop. in 1850, 1,050.

WINNOWE (SAINT), a parish in Cornwall, 2½ m. SE of Lostwithiel, on the river Fowey, which is here navigable, and is crossed by the high road from Bodmin to Plymouth. Area 6,137 acres. Pop. in 1831, 1,048; in 1851, 1,076.

WINNSDORF, a village of Prussia, in the regency of Oppeln, and circle of Neisse. Pop. 310.

WINNWEILER, a town and presidial of Bavaria, in the circle of the Pfalz, 15 m. NE of Kaiserslautern, on the Alsenz. Pop. 1,284. It has iron and copper-works.

WINOOSKI-FALLS, a village of Chittenden co., in the state of Vermont, U. S., on the N bank of Onion river, and intersected by a branch railroad from Burlington to Essex junction.

WINSKALES, or WINSKEL, a township in the p. of Workington, Cumberland, 2½ m. SE of Workington. Pop. in 1831, 100; in 1851, 200.

WINSCHOTEN, a town of Holland, in the prov. and 22 m. ESE of Groningen, on the Bessel, canalised under the name of Winschoter-Trekvaart, and 8 m. S of Dollart. Pop. 3,500. It has ancient fortifications, and is noted for a victory by the Prince of Orange over the Spaniards in 1568.

WINSOMBE, a parish in Somerset, 2 m. N by W of Axbridge. Area 4,140. Pop. in 1851, 1,439.

WINSELDORF, a village of Holstein, in the district of Breitenburg. Pop. 279.

WINSELER, a village of Holland, in the prov. of Luxemburg, bail. of Diekirch. Pop. 240.

WINSEN-AN-DER-ALLER, a village and parish of Hanover, in the gov. and 48 m. SSW of Lüneburg. Pop. 928.

WINSEN-AN-DER-LUHE, a village and parish of Hanover, in the gov. and 11 m. NW of Lüneburg, on the Luhe, which here becomes navigable. Pop. 1,821. It has a castle and an hospital, and possesses extensive fisheries, manufactories of vinegar, and breweries.

WINSFORD, a parish in Somersetshire, 5 m. N by W of Dulverton, crossed by the river Ax, containing the hamlets of Northern-Mill and Garleycombe, also the ancient, though now depopulated, villas of Quarum-Kitnor and Quarum-Moneaux. Area 8,656 acres. Pop. in 1831, 524; in 1851, 604.

WINSHAM, a parish in Somersetshire, 4 m. SE by E of Chard. Area 2,953 acres. Pop. 1,062.

WINSHILL, a township in the p. of Burton-upon-Trent, Derbyshire, 1½ m. ENE of Burton-upon-Trent. Area 1,150 acres. Pop. in 1851, 405.

WINSLADE, a parish in Hants, 3 m. S by E of Basingstoke, containing the tything of Kempshot. Area 1,235 acres. Pop. in 1831, 134; in 1851, 174.

WINSLEY, a hamlet in the p. of Darley, Derbyshire, 3½ m. WNW of Matlock, near the river Derwent. Area, with Snitterton, 2,200 acres. Pop. in 1831, 671; in 1851, 557.—Also a chapel in the p. of Bradford, Wilts, 1½ m. W of Bradford, near the Kennet and Avon, and the Wilts and Berks canals. Pop. in 1831, 2,847; in 1851, 1,587.

WINSLOW, a parish and market-town in Bucks, 6½ m. NE of Buckingham. Area 1,920 acres. Pop. in 1831, 1,290; in 1851, 1,889. The town, which has existed from a remote period, and is mentioned as having been given, in 794, to the abbey of St. Albans, by Offa, consists chiefly of three streets, neat and well-built. The inhabitants are partially employed in the manufacture of lace.—Also a town-

ship in the p. of Bromyard, Herefordshire, 2½ m. SW by W of Bromyard. Pop. in 1851, 491.

WINSLOW, a township of Kennebec co., in the state of Maine, U. S., on the E bank of Kennebec river, 17 m. NNE of Augusta, and intersected by the Kennebec and Penobscot railroads. Pop. in 1840, 1,722; in 1850, 1,796.—Also a township of Camden co., in the state of New Jersey, 38 m. S of Trenton, drained by Great Egg Harbour, and by a branch of Little Egg Harbour. Pop. in 1850, 1,540.

WINSTANLEY, a township in the p. of Wigan, co.-palatine of Lancaster, 3¼ m. SW by W of Wigan. Area 1,853 acres. Pop. in 1851, 675.

WINSTER, a chapelry and market-town in the p. of Youlgrove, Derbyshire, 4 m. W by N of Matlock, and 8 m. NE of the High-Peak railway. Pop. in 1831, 962; in 1851, 928.—Also a chapelry in the parish of Kendal, Westmoreland, 7 m. W of Kendal.

WINSTON, a parish in the co.-palatine of Durham, 6½ m. E of Barnard-Castle, on the river Tees, across which there is here a bridge. It includes the hamlets of Burford, Newsham, Osmondcroft, and Stubhouse. Area 2,961 acres. Pop. in 1831, 327; in 1851, 301.—Also a parish in Gloucestershire, 6 m. NW by N of Cirencester. Area 1,437 acres. Pop. in 1831, 164; in 1851, 252.—Also a chapelry in the p. of Bibury, Gloucestershire, 4¼ m. SSW of Northleach. Area 1,437 acres. Pop. in 1831, 176; in 1851, 252.—Also a parish in the co. of Pembroke, 5 m. NE of Haverford West, containing the town of the same name, which is incorporated, and contributes with Pembroke in returning a member to parliament. Pop. in 1831, 745; in 1851, 683.—Also a parish in Suffolk, 7 m. W by S of Framlingham. Area 1,476 acres. Pop. in 1851, 392.

WINSTON, a central county of the state of Mississippi, U. S., comprising an area of 718 sq. m., drained by head branches of Pearl river, and by affluents of Noxubee river. It is level, but generally fertile. Pop. in 1840, 4,650; in 1850, 7,956. Its capital is Louisville.

WINSUM, a village of Holland, in the prov. and 8 m. N of Groningen. Pop. 1,525.

WINTDORF, a village of Prussia, in the reg. of Frankfort, and circle of Rottbus. Pop. 200.

WINTER (OBER), a village of Prussia, in the regency of Coblenz, and circle of Ahrweiler. Pop. 691.

WINTERBACH, a village and parish of Bavaria, in the circle of Swabia, and presidial of Dillingen. Pop. 305.—Also a village in the circle of the Pfalz, and cant. of Zweibrücken. Pop. 260.—Also a village of Baden, in the circle of the Middle Rhine, and bail. of Oberkirch. Pop. 300.—Also a village of Prussia, in the regency of Coblenz and circle of Kreuznach. Pop. 316.—Also a village of the reg. of Treves, and circle of St. Wendel. Pop. 425.—Also a parish and village of Würtemberg, in the circle of the Jaxt, and bail. of Schorndorf. Pop. 2,007.

WINTERBERG, a town of Austria, in Bohemia, in the regency of Pilsen, on the Wolinka, 30 m. SW of Pisek. Pop. 2,238. It has a castle, a paper-mill, and glass-works.—Also a town of Prussia, in the regency of Arnberg and circle of Brelon, on the Orka, amid steep mountains. Pop. 1,308. It has a considerable trade in iron and wood-ware.—Also a village of the principality of Lippe-Detmold, and bail. of Scheider, 14 m. E of Detmold. Pop. 350. It has a glass-work, and in the vicinity, on Mount Armentus, are the ruins of a fortress.

WINTERBERG (GROES), a mountain of Saxony, in the circle of Dresden, near Schandau, in N lat. 50° 58' 56". It has an alt. of 1,706 Parisian ft. above sea-level.

WINTERBORN, a village of Bavaria, in the circle of the Pfalz, and cant. of Obermoschel. Pop. 300.

WINTERBOURN, a chapelry in the p. of Chevely, Berks, 3½ m. NNW of Speenhamland. Pop. 395.

WINTERBOURNE, a parish in Gloucestershire, 6½ m. NNE of Bristol, containing the hamlet of Hambrook. Area 3,170 acres. Pop. in 1851, 2,876.

WINTERBOURNE-ABBAS, a parish in Dorset, 5 m. W of Dorchester, intersected by a stream called the Winterbourne. Area 1,500 acres. Pop. 195.

WINTERBOURNE-BASSET, a parish in Wilts, 8 m. NW by W of Marlborough. Area 2,210 acres. Pop. in 1831, 288; in 1851, 289.

WINTERBOURNE-CAME, a parish in Dorset, 3 m. SE of Dorchester, including the district of Farrington, and the tything of Crompton. Area 1,970 acres. Pop. in 1831, 80; in 1851, 150.

WINTERBOURNE-CLENTSTONE, a parish in Dorsetshire, 4 m. SW of Blandford-Forum. Area 1,406 acres. Pop. in 1831, 84; in 1851, 97.

WINTERBOURNE-DANTSEY, a parish in Wilts, 4 m. NNE of Salisbury. Area 1,162 acres. Pop. in 1831, 161; in 1851, 187.

WINTERBOURNE-EARLS, a parish in Wilts, 3 m. NNE of Salisbury. Area 1,663 acres. Pop. in 1831, 243; in 1851, 281.

WINTERBOURNE-GUNNER, or CHERBOURGH, a parish in Wilts, 4 m. NNE of Salisbury. Area 1,562 acres. Pop. in 1831, 166; in 1851, 167.

WINTERBOURNE-KINGSTON, a parish in Dorset, 12 m. NE of Dorchester. Area 2,508 acres. Pop. in 1831, 564; in 1851, 584.

WINTERBOURNE (ST. MARTIN), a parish in Dorset, 3 m. WSW of Dorchester. Area 3,503 acres. Pop. in 1831, 369; in 1851, 434.

WINTERBOURNE-MONKTON, or WAST, a parish in Dorset, 2 m. SW by W of Dorchester. Area 431 acres. Pop. in 1831, 101; in 1851, 87.

WINTERBOURNE-STEEPLETON, or STAPLETON, a parish in Dorset, 4 m. W by S of Dorchester. Area 1,783 acres. Pop. in 1831, 176; in 1851, 206.

WINTERBOURNE-STOKE, a parish in Wilts, 5 m. W by S of Amesbury. Area 3,419 acres. Pop. in 1831, 272; in 1851, 365.

WINTERBOURNE-STRICKLAND, a parish in Dorset, 4 m. WSW of Blandford-Forum. Area 1,340 acres. Pop. in 1831, 401; in 1851, 595.

WINTERBOURNE-WHITCHURCH, a parish in Dorset, 5½ m. SW of Blandford-Forum. Area 2,841 acres. Pop. in 1831, 513; in 1851, 595.

WINTERBOURNE-ZELSTONE, a parish in Dorset, 6 m. S by E of Blandford-Forum. Area 823 acres. Pop. in 1831, 233; in 1851, 224.

WINTERBURG, a village of Prussia, in the reg. of Coblenz, and circle of Kreuznach. Pop. 325. It has a castle.

WINTERBURN, a township in the p. of Gargrave, Yorkshire, 7 m. NW by N of Skipton. Area, with Flasby, 4,311 acres. Pop. in 1851, 124.

WINTERFELDE, a village of Prussia, in the reg. of Stettin, and circle of Greiffenhagen. Pop. 245.

WINTERFELDT, a village of Prussia, in the reg. of Magdeburg, circle of Salzwedel. Pop. 200.

WINTERFULGEN, a village of Baden, in the circle of the See, and bail. of Heiligenberg. Pop. 300.

WINTER-HARBOUR, an inlet on the SE coast of Melville island, in N lat. 74° 47' 2", W long. 110° 48' 2", in which the expedition-ships Hecla and Griper, under Parry, wintered from Sept. 1819 to 1st August 1820. Measures were adopted for fitting up the ships so as to preserve the health and promote the comfort of the people on board, during the long and inclement winter upon which they had just entered. The boats, spars, and rigging were removed ashore, and a sort of housing, formed of planks and the kind of canvass used for covering waggons, was erected over the decks, to protect the

men from snow and wind, and to enable them to take exercise whenever the weather should be too inclement for walking on shore. The greatest obstacle to health and comfort that our navigators had to encounter, arose from the circumstance, that when the temp. of the atmosphere began to fall considerably below the zero of Fahrenheit, the steam from the coppers, as well as the breath and other vapour generated in the inhabited parts of the ship, was found to condense into drops upon the beams and sides, to such a degree as to keep them constantly wet. The invention of the officers, therefore, and particularly of the medical gentlemen, was employed in devising means whereby at once to create warmth and secure ventilation. About the end of October the atmosphere became much colder than it had been hitherto experienced. "On the 29th," says Captain Parry, "the weather was calm and clear; and we remarked, for the first time, that the smoke from the funnels scarcely rose at all, but skimmed nearly horizontally along the housing, the therm. having got down to 24°, and the mercury in the barom. standing at 29° 70'. It had become rather a painful experiment to touch any metallic substance in the open air with the naked hand; the feeling produced by it exactly resembling that occasioned by the opposite extreme of intense heat, and taking off the skin from the part affected." The cold at length became so great as to burst not only the beer barrels, but even the bottles containing lemon-juice. To while away the dreary hours of an Arctic winter, the officers got up a newspaper, which was published on board the *Hecla*, and denominated the *North Georgia Gazette and Winter Chronicle*,—a production which does no small credit to the talents and pleasantry of the several contributors. It was conducted by Captain Sabine; and was subsequently printed in London. The sun, which had ceased to rise on the 4th of November, did not reappear above the horizon till the same day in February. As, however, that luminary was at no period so much as 18° below the horizon, there was a perceptible twilight even on the 22d of December. It was possible to read the smallest print, when the page was turned to the S. On the first of September the expedition left Lancaster's sound, and proceeded down the W side of Davis' straits on their way to England. The most westerly point in the polar sea, to which discovery was actually extended in this expedition by the squadron under Captain Parry, is situated in N lat. 74° 26' 25", and W long. 115° 46' 43". The mean degree of cold and heat for twelve months, beginning with September 1819, when the expedition took up their residence in Winter-harbour, was as follows:

September,	+	22.54
October,	—	3.46
November,	—	20.60
December,	—	21.79
January,	—	30.09
February,	—	32.19
March,	—	18.10
April,	—	8.37
May,	+	16.66
June,	+	36.34
July,	+	42.41
August,	+	32.66

The lowest temp. observed in the course of the winter, was on the 15th day of February, when a therm. fixed on a pole between the ships and the shore, fell as low as — 55°, that is 87° below the freezing-point of Fahrenheit. During the temp. now mentioned, "which," says Captain Parry, "was the most intense degree of cold marked by the spirit thermometer, during our stay in Winter-harbour, not the slightest inconvenience was experienced from the exposure to the open air by a per-

VII.

son well clothed, as long as the weather was perfectly calm; but in walking against a very light air of wind, a smarting sensation was experienced all over the face, accompanied by a pain in the middle of the forehead, which soon became rather severe. We amused ourselves freezing some mercury during the continuance of this cold weather, and by beating it out on an anvil previously reduced to the temperature of the atmosphere; it did not appear to be very malleable when in this state, usually breaking after two or three blows from the hammer."

WINTERHAUCH, a mountain of the Odenwald, in the grand-duchy of Baden, and circle of the Lower Rhine, near Mosbach. It has an alt. of 1,680 ft. above sea-level.—Also mountains in the N part of the principality of Lichtenberg, belonging to the duchy of Saxe-Coburg-Gotha. It is one of the most northerly ramifications of the Vosges.

WINTERHAUSEN, a village of Bavaria, in the circle of Lower Franconia, and seignory of Sommershausen, on the Main, 7 m. SE of Würzburg. Pop. 1,000.

WINTERHEVEN. See WINTER-HARBOUR.

WINTERHOEK, a mountain of South Africa, in the Tulbagh district connected with the Khamuberg, and rising to an alt. of 3,100 ft. above sea-level.

WINTERHUDE, a village belonging to Hamburg, in the parish of Eppendorf, on the Allster. Pop. 380.

WINTERICH, a village of Prussia, in the regency of Treves, and circle of Berncastell. Pop. 750. Slate is quarried in the vicinity.

WINTERINGHAM, a parish in Lincolnshire, 7½ m. W of Barton-upon-Humber, on the S bank of the Humber. Area 5,675 acres. Pop. 824.

WINTER ISLAND, an island of British North America, near Melville peninsula, in N lat. 66° 11'.

WINTERITZ, a village of Austria, in Bohemia, in the regency of Eger, and bail. of Raden. Pop. 290. It has a castle, several flour and saw mills, and manufactories of potash.

WINTERKASTEN, a village of Hesse, in the prov. of Starkenburg, and presidial of Michelstadt. Pop. 490.

WINTERLINGEN, a village of Württemberg, in the circle of the Schwarzwald, and bail. of Balingen. Pop. 1,817. It has muslin factories.

WINTERRAM, a village of Prussia, in the reg. of Düsseldorf, and circle of Geldern. Pop. 588.

WINTERRIEDEN, a village of Bavaria, in Swabia, in the seignory of Burheim. Pop. 360.

WINTERSBACH, a village of Bavaria, in the circle of the Lower Rhine, and presidial of Rothenbuch. Pop. 639.

WINTERSCHIED, a village of Hesse, in the prov. of Upper Hesse, and circle of Ziegenhain. Pop. 210.

WINTERSCHIEDT, a village of Prussia, in the regency of Cologne, and circle of Sieg, near Siegburg. Pop. 374.

WINTERSDORF, a village of Baden, in the circle of the Middle Rhine, and bail. of Rastadt. Pop. 610.—Also a village of Austria, in Styria, in the circle of Marburg. Pop. 200.—Also a village of Prussia, in the regency and circle of Treves. Pop. 250.—Also a village of Saxe-Altenburg. Pop. 960.

WINTERSETT, a township in the p. of Wragby, Yorkshire, 6 m. SE by E of Wakefield, near the North Midland railway.

WINTERSHAGEN, a village of Prussia, in the regency of Koslin, and circle of Stolpe, on the river of that name. Pop. 210.

WINTERSHEIM, a village of Hesse, in the prov. of the Rhine, and circle of Mainz. Pop. 315.

WINTERSHOVEN, a department and commune of Belgium, in the prov. of Limburg, and arrond. of Tongres. Pop. 274.

WINTERSINGEN, a village of Switzerland, in the cant. of Bâle, and bail. of Gissach. Pop. 575.

WINTERSLOW, a parish, including the tything of East W. or Easton, West W. or Weston, and Middle W. or Middleton, in the hund. and union of Alderbury, Wilts, 6 m. ENE of Salisbury. Area 4,843 acres. Pop. in 1831, 749; in 1851, 913.

WINTERSPELT, a village of Prussia, in the regency of Treves, and circle of Prum. Pop. 215.

WINTERSPUREN, a village of Baden, in the circle of the See, and bail. of Stockach. Pop. 420.

WINTERSTEIN, a village of Saxe-Coburg-Gotha, in the principality and 14 m. WSW of Gotha. Pop. 789. It has manufactories of linen fabrics, and of baskets.

WINTERSTETTENDORF, a village of Württemberg, in the circle of the Danube, and bail. of Waldsee, on the Riss. Pop. 118. It has saw-mills and tile-kilns.

WINTERSTETTENSTADT, or **MARKT-WINTERSTETTEN**, a village of Württemberg, in the circle of the Danube, and bail. of Waldsee, in the valley of the Riss. Pop. 394.

WINTERSWEILER, a village of Baden, in the circle of the Upper Rhine, and bail. of Lorrach. Pop. 298.

WINTERSWYK, a market-town of Holland, in the prov. of Guelders, and arrond. of Zutphen. Pop. 5,800. It has extensive bleachfields.

WINTERTHUR, a town of Switzerland, capital of a bail., in the cant. and 14 m. NE of Zurich, on the Enlach, in a fine valley. Pop. 2,158. It consists of two principal streets, and is well-built. Its principal edifices are the parish church, the town-house, and an hospital. It has a gymnasium, a public library, and a printing-press, and possesses manufactories of woollen and cotton fabrics, and of chemical substances and tanneries. Pop. of bail., 22,000. This town is of considerable antiquity. It was erected into an imperial town by Sigismund, and was ceded by Austria to Zurich in 1552.

WINTERTHUR (OBER), a village of Switzerland, in the cant. of Zurich, circle and 1½ m. NE of Winterthur. It is the *Vindurum* of the ancients, and contains some antiquities.

WINTERTON, a parish in Lincolnshire, 8 m. WSW of Barton-upon-Humber, at the termination of the ancient Fosseway. Area 3,628 acres. Pop. in 1831, 1,295; in 1851, 1,665.—Also a parish in Norfolk, 5½ m. N by W of Caistor, on the coast of the North sea. Area 1,515 acres. Pop. 722.

WINTERTON, a parish of Tasmania, in the co. of Monmouth, bordered on the W by the Jordan, and on the S by the Quoin rivers.

WINTERVELD, a district of South Africa, in the prov. of Graaf Reynet, to the N of the Sneeuw-Berg or Snow mountains.

WINTHORPE, a parish in Lincolnshire, 11 m. E by N of Spilsby, on the coast of the North sea. Area 2,339 acres. Pop. in 1831, 244; in 1851, 299.—Also a parish in Notts, 3¼ m. NNE of Newark, on the river Trent, and intersected by the ancient Fosseway. Area 680 acres. Pop. in 1851, 243.

WINTHROP, a township and village of Kennebec co., in the state of Maine, U. S., 10 m. W by S of Augusta, drained by Cobbesconte river, and intersected by the Androscoggin and Kennebec railway. Pop. in 1840, 1,915; in 1850, 2,154.

WINTON, a township in the p. of Kirkby-Stephen, Westmoreland, 1½ m. NE of the town of Kirkby-Stephen. Area 3,383 acres. Pop. in 1831, 267; in 1851, 257.—Also a township in the p. of

Kirkby-Siggerton, Yorkshire, 4 m. NE by E of Northallerton. Area 1,354 acres. Pop. in 1851, 108.

WINTON, a village of Hertford co., in the state of North Carolina, U. S., on the SW bank of Chowan river, and 102 m. NE by E of Raleigh. Pop. in 1840, 100; in 1850, 140.

WINTRICH, a village of Prussia, in the reg. of Treves, and circle of Bernkastel. Pop. 862.

WINTRINGEN, a village of Holland, in the prov. of Luxemburg, and bail. of Grevenmacher. Pop. 400.

WINTRINGHAM, a parish in the E. R. of Yorkshire, 7 m. E by N of New-Malton, comprising the townships of W. with Linton and Newton, and the chapelry of Knapton. Area 8,480 acres. Pop. 588.

WINTZ, a village of Prussia, in the reg. of Arnberg, and circle of Bochum. Pop. 400.

WINTZENHEIM, a canton, commune, and town of France, in the dep. of the Haut-Rhin, and arrond. of Colmar. The cant. comprises 11 com. Pop. in 1831, 14,779; in 1846, 15,772. The town is 4 m. W of Colmar. Pop. in 1846, 3,896. It has manufactories of cotton and woollen fabrics, and of soap, and an iron foundry.

WINWEILER, a town of Bavaria, in the circle of the Pfalz, 11 m. NE of Kaiserslauten, on the Alsenz. Pop. 1,000. It has a castle and several forges.

WINWICK, a parish, partly in Northamptonshire, but chiefly in Hunts, 6 m. SE of Oundle. Area 1,710 acres. Pop. in 1831, 326; in 1851, 431.—Also a parish and township in the co.-palatine of Lancaster, 2½ m. N of Warrington, at the junction of the Liverpool and Manchester, the Grand Junction, and the North Union section of the Great North-Western railway, and intersected by the Sankey canal. It contains the chapelries of Ashton-in-Makerfield, Croft, Lowton, Newchurch, Newton and Makerfield, and Downall-Green; with the townships of Culcheth, Golborne, Haydock, Houghton with Middleton and Arbury, Kenyon, and W.; the borough of Newton in Makerfield, and the lordship of Risley. Area 25,148 acres. Pop. in 1801, 12,290; in 1831, 17,961; in 1851, 19,954. The living of this parish, amounting in 1831 to £4,220 gross, has been regarded as the largest in England; but its division into several districts for ecclesiastical purposes, and the appropriation of its income amongst the several incumbents is proposed.—Also a parish in Northamptonshire, 9½ m. NNE of Daventry, intersected by the Grand Union canal. Area 2,038 acres. Pop. in 1831, 159; in 1851, 155.

WINXELE, a department and commune of Belgium, in the prov. of South Brabant, and arrond. of Louvain. Pop. of dep. 1,170; and of com., 567.

WINXELE-DELLE, a commune of Belgium, in the prov. of South Brabant, and dep. of Winzele. Pop. 603.

WINYAW-BAY, an indentation of the coast of Georgetown district, in the state of South Carolina, U. S. It runs in a SW by S direction, and is 14 m. long, and 2 m. wide. It receives Great Pedee, Black, and Waccamaw rivers.

WINZA, a market-town of Austria, in Transylvania, in the comitat of Carlstadt, on the Marosch. Pop. 4,000. It has manufactories of china.

WINZELDORF, a village of Denmark, in Holstein, in the bail. of Pinneberg. Pop. 210.

WINZELN, a village of Bavaria, in the circle of the Pfalz, and cant. of Pirmasens. Pop. 640.—Also a village of Württemberg, in the circle of the Schwarzwald, and bail. of Oberndorf. Pop. 1,149.

WINZENBERG, a village of Prussia, in the reg. of Oppeln, and circle of Grottkau. Pop. 558.

WINZENBURG, a village and bail. of Hanover, in the prov. of Hildesheim, near Alfeld. Pop. of

town, 1,172; and of bail, 13,500. It contains the ruins of a castle.

WINZENDORF, a village of Austria, in Styria, in the circle of Gratz. Pop. 240. See also ALVINZ.

WINZENHEIM, a village of Prussia, in the reg. of Coblenz, and circle of Kreuznach. Pop. 646.

WINZENHOFEN, a village of Baden, in the circle of the Lower Rhine, and bail of Krantheim. Pop. 270.

WINZENHOHL, a village of Bavaria, in the circle of Lower Franconia, and presidial of Aschaffenburg. Pop. 184. It has considerable iron-works.

WINZER, a village of Bavaria, in the prov. of Lower Bavaria, and presidial of Hengersberg. Pop. 694.—Also a village of Swabia, in the presidial of Mindelheim. Pop. 359.—Also two villages distinguished as Ober and Nieder, in the circle of the Upper Pfalz, and presidial of Regenstau, containing respectively 167 and 177 inhabitants. They have several breweries.

WINZERHAUSEN, a village of Württemberg, in the circle of the Neckar, and bail of Marbach. Pop. 928. It has a castle.

WINZERLA, a village of Saxe-Weimar, in the prov. of Weimar, and bail of Jena. Pop. 260.

WINZIG, a town of Prussia, in the regency and 32 m. NW of Breslau, and circle of Mohlau. Pop. 2,000. It is enclosed by walls with three gates, and has a suburb, a Catholic and two Lutheran churches, and an hospital. It contains manufactories of tobacco and of earthenware, and several breweries.

WINZINGEN, a village of Württemberg, in the circle of the Jaxt, and bail of Gmund, on the Lauter. Pop. 418. It has a castle.—Also a village of Bavaria, in the circle of the Pfalz, and cant. of Neustadt. Pop. 712.

WINZINGERODE, a village of Prussia, in the reg. of Erfurt, and circle of Worbis. Pop. 360.

WINZLAR, a village of Hanover, in the principality of Kalenberg, and bail of Loccum, to the SW of Lake Steinhude. Pop. 468.

WINZNAU, a village of Switzerland, in the cant. of Solothurn, and bail of Eosgen. Pop. 312.

WIOSTE, a village of Prussia, in the reg. of Posen, and circle of Bomst. Pop. 600.

WIPFELD, a market-town of Bavaria, in the circle of Lower Franconia, and presidial of Werneck, on the r. bank of the Main, 17 m. NNE of Würzburg. Pop. 742. It has several mineral springs, and wine is cultivated in the environs. In the vicinity is the castle of Klingenberg.

WIPKENGEN, a village of Switzerland, in the cant. bail., and to the NW of Zurich, on the Limmat. Pop. 887.

WIPPACH, WIRBACH, or VIPAVA, a market-town of Austria, in Illyria, in the gov. of Laibach, circle and 20 m. WNW of Adelsburg, on a river of the same name, an affluent of the Isonzo. Pop. 1,050. It has a fine castle, and possesses manufactories of cloth, and of copper ware. The valley of the W., noted as the garden of Carniola, abounds in fruit and wine.

WIPPER, or WUPPER, a river which has its source in Prussia, in the prov. of Saxony, regency of Erfurt, and circle of Worbis. It traverses the principality of Schwarzburg-Sondershausen; re-enters the Prussian prov. of Saxony; and, after a course of about 15 m., joins the Unstrut, on the l. bank, to the SW of Heldrungen. Sondershausen is the chief place on its banks.—Also a river which has its source in the Prussian prov. of Saxony; in the reg. of Merseburg, and circle of Sangerhausen, to the E of Stollberg; passes Wippra, Leimbach, Hettadt; enters the duchy of Anhalt-Bernburg, in

which it waters Sandersleben and Gusten; and after a course, in a generally NE direction, of about 36 m., joins the Saale, on the l. bank, a little above Bernburg.—Also a river of Prussia, in the prov. of Pomerania, which flows into the Baltic a little below Rugenwalde.—Also a river which has its source in the prov. of Westphalia, in the regency of Merseburg, and circle of Hagen; flows thence into the regency of Düsseldorf; waters the circles of Elberfeld and Solingen; and, after a course, in a generally SW direction of about 30 m., joins the Rhine, on the r. bank, 8 m. N of Cologne.—Also an affluent of the Gera, in the duchy of Saxe-Coburg-Gotha.

WIPPERFURT, a circle and town of Prussia, in the prov. of the Rhine, and regency of Cologne. Pop. of circle in 1849, 26,121.—The town is 24 m. NE of Cologne, on the Wipper. Pop. 1,795. It has a gymnasium, and possesses manufactories of woolen and cotton fabrics, and of iron-ware. In the vicinity is a copper-mine.

WIPPERGEN, a village of Hanover, in the principality of Osnabruck, and bail of Mippen. Pop. 400.—Also a village of Württemberg, circle of the Danube, and bail of Blaubeuren. Pop. 382.

WIPPERODA, a village of Saxe-Coburg-Gotha, in the bail of Georgenthal. Pop. 210.—Also a village of Hesse, in the prov. of Lower Hesse, and circle of Eschwege. Pop. 300.

WIPPERSDORF, a village of Prussia, in the reg. of Potsdam, and circle of Jüterbogk. Pop. 230.

WIPPERSHAIN, a village of Hesse, in the prov. and circle of Fulda. Pop. 414.

WIPPRA, a market-town of Prussia, in the reg. of Merseburg, and circle of Giberge-Mannsfeld, on the Wipper. Pop. 880. It has extensive bleacheries.

WIPS, a village of Prussia, in the regency of Königsberg, and circle of Allenstein. Pop. 200.

WIPSHAUSEN, a village of Hanover, in the principality of Lüneburg, and bail of Meinersen, near Dohf. Pop. 334.

WIRAWA, a village of Austrian Bohemia, in the reg. of Gitschin, and bail of Königgratz. Pop. 650.

WIRBALLEN, or WIERZBOLOW, a town of Russia, in Poland, in the gov. of Augustowo and obwod of Kalvary, 41 m. N of Suwalki. Pop. 1,800.

WIRBELAU, a village of Nassau, in the bail of Runkel. Pop. 360.

WIRBENZ, a village of Bavaria, in the circle of the Upper Pfalz, and presidial of Remnath. Pop. 300.

WIRBLEN, a village of Prussia, in the reg. of Gumbinnen, and circle of Insterburg. Pop. 420.

WIRCHLESCHKE, a village of Prussia, reg. of Oppeln, and circle of Gross Strehlitz. Pop. 210.

WIRDUM, a village of Hanover, in Ostfriesland, in the bail of Grestyhl, near Emden. Pop. 405.

WIRFKALLEN, a village of Prussia, in the reg. of Gumbinnen, and circle of Insterburg. Pop. 260.

WIRFUS, a village of Prussia, in the regency of Coblenz, and circle of Kochem. Pop. 361.

WIRGES, a village of Nassau, in the bail of Montabaur. Pop. 740.

WIRINGTON, or WITHERINGTON, a hamlet in the p. of Paston, Northamptonshire, 3½ m. NNW of Peterborough. Pop. in 1831, 537; in 1841, 629.

WIRKSWORTH, a parish including the market-town of Wirksworth, the chapelry of Cromford, and the townships of Hopton and Idle, the hamlets of Callow and Middleton, in the hund. of W.; the chapelry of Alderwasley, and the townships of Ashleyhay, Biggen, and Ildridgehay with Allton, in the hundred of Appletree; and the hamlet of Iron-Brook-Grange, in the hund. of High-Peak, Derbyshire. The town is distant 13 m. NNW of Derby, and the parish is intersected by the High-Peak railway and the Cromford canal, through which it com-

municates with the North Midland railway. Area 14,154 acres. Pop. in 1801, 5,862; in 1831, 7,754; in 1851, 7,480. The town is situated in a valley. The principal portion of the inhabitants are employed in mining operations. The manufacture of cotton goods, principally gingham, is also carried on in this parish.

WIRMINGHAUSEN, a village of Waldeck, in the bail. of Arolsen. Pop. 250.

WIRMO, a parish of Russia in Europe, in Finland, to the NW of Abo.

WIRMSTHAL, a village of Bavaria, in the circle of Lower Franconia, and presidial of Guerdorf. Pop. 284.

WIRRING LAKE, a lake of Australia Felix, in the district of Portland bay, near the Woody Galloway river.

WIRRWITZ, a village of Prussia, in the reg. and circle of Breslau. Pop. 641.

WIRSCHAWITZ, a village of Austria, in Silesia, in the circle of Troppau. Pop. 440.

WIRSCHBEL, or **WIRSPEL**, a village of Prussia, reg. of Oppeln, and circle of Falkenberg. Pop. 448.

WIRSCHEN. See **WYERSHEIM**.

WIRSCHKOWITZ (**ALT** and **NEU**), two villages of Prussia, in the regency of Breslau, and circle of Militsch, containing respectively 530 and 380 inhabitants.

WIRSCHWEILER, a village of Prussia, reg. of Treves, and circle of Bernkastel. Pop. 462.

WIRSCTZ, a circle and town of Prussia, in the prov. of Posen and regency of Bromberg. Pop. of circle, 47,286. The town is 33 m. WNW of Bromberg, on the Lobsonka. Pop. 908. It has Lutheran and Catholic churches, and possesses manufactories of cloth, linen, and lace, and tanneries.

WIRT, a township of Alleghany co., in the state of New York, U. S., 280 m. W by S of Albany. Pop. in 1840, 1,207; in 1850, 1,544.—Also a county in the NW of the state of Virginia, comprising an area of 296 sq. m., intersected by the Little Kanawha, on which its capital is situated. Pop. 3,353.

WIRTEMBERG. See **WURTEMBERG**.

WIRTHEIM, a village of Bavaria, in the circle of Lower Franconia, and presidial of Orb, on the Biber. Pop. 955.

WIRTKALLEN, a village of Prussia, in the reg. of Gumbinnen, and circle of Insterburg. Pop. 250.

WIRY, a village of Prussia, in the regency and circle of Posen. Pop. 460.

WIRZBICA. See **WIERNICA**.

WIRZCHUCIN, a village of Prussia, in the reg. and circle of Bromberg. Pop. 412.

WIRZERW, a lake of Russia in Europe, in the gov. of Livonia, 16 m. in length, which discharges itself into Lake Peipus.

WIRZFELD, a village of Prussia, in the reg. of Aachen, and circle of Malmedy. Pop. 460.

WISA. See **VISA**.

WISBAUM, a village of Prussia, in the reg. of Treves, and circle of Daun.—Pop. 360.

WISBADEN. See **WIESBADEN**.

WISBEACH, or **WISBECH**, a borough and port in the isle of Ely, co. of Cambridge, 44 m. N of Cambridge, on the river Nene or Wisbeach, which is here crossed by a bridge of one elliptical arch 72 ft. in span. The navigation of the port is through a canal connecting the river with the Old Nene at Outwell, at the commencement of Well-creek, which connects it with the river Ouse. The borough comprises the parishes of St. Mary and St. Peter, with the chapels of New Chapel and Gyhirn, in the archd. and dio. of Ely. Area of the whole, 16,038 acres. Pop. in 1831, 8,777; in 1851, 12,709. The town, which is the most considerable place in the isle of

Ely, stands on both sides of the Nene, and is in general well-built. It possesses assembly-rooms, a theatre, spacious baths, and one or two good libraries. There are no manufactures carried on in the town excepting those of cordage, iron, and malt. There are several large malting-houses, one extensive brewery, an iron-foundry, and yards for building and repairing small vessels and boats. The principal exports are corn, of which above 100,000 quarters are annually sent by the Ouse and canals to Cambridge, Lynn, &c., and rape-seed and long wool which are sent into Yorkshire. Hemp, pepper-mint, and several other articles not everywhere found, are grown in the vicinity, and exported through Wisbeach. W. owes much of its present prosperity to the improved state of the fens by which it is surrounded. The drainage of these fens has much increased the produce of the land in this vicinity. Trade has also been much facilitated by improvements made in the outfall of the Nene, and in its channel from Wisbeach to the Crosskeys Wash.

WISBOROUGH-GREEN, a parish in Sussex, 6 m. NE by E of Petworth, intersected by the Arun and Wey canal. It contains the chapelry of Loxwood-End. Area 8,484 acres. Pop. in 1851, 1,740.

WISBU, a village of Prussia, in the regency of Stettin, and circle of Regenwalde. Pop. 500.

WISBUHR, a village of Prussia, in the reg. of Stettin, and circle of Furstenthum. Pop. 380.

WISBY, a town of Sweden, capital of a laen of the same name, 130 m. from Stockholm, on the W coast of the island of Gothland, in N lat. 57° 38' 34". Pop. 4,550. It is fortified, and has a cathedral, a gymnasium, and a good port. The laen comprises the island of Gothland only. Its chief manufactures are leather and tobacco.

WISCASSET, a port of entry, and the cap. of Lincoln co., in the state of Maine, U. S., on the W bank of Sheepscot river, 22 m. SSE of Augusta. The v. has an elevated and very beautiful site, and contains the county buildings, several churches, a bank, and many handsome dwellings. Pop. in 1850, 2,343. It is one of the most important seaports in the state, being largely engaged in the coasting trade, fisheries, ship-building, &c. Its foreign commerce is not so extensive as formerly. The total tonnage of this district on June 30, 1850, was 18,341 tons. The registered tonnage amounted to 6,024 tons, of which 4,748 tons were permanent, and 1,276 tons temporary.

WISCH, a village of Holstein, to the NE of Kiel, in the parish of Schonberg. Pop. 440.

WISCH, a commune of France, in the dep. of the Vosges, and com. of St. Die. Pop. 1,137.

WISCH (**GREU**), a village of Holstein, to the SW of Elmshorn. Pop. 246.

WISCHAU, or **WISKOW**, a town of Austria, in Moravia, in the circle, and 21 m. ENE of Brunn, on the Hanna. Pop. 3,360. It is well-built.

WISCHDORF, a village of Austria, in Styria, in the circle of Marburg. Pop. 320.

WISCHEHORSCH, a village of Austria, in Moravia, in the circle of Olmutz and seignory of Hohenstadt. Pop. 300.

WISCHEN, a village of Prussia, in the regency of Posen, and circle of Meseritz. Pop. 300.

WISCHENAU, or **WISZNOW**, a market-town of Austria, in Moravia, in the circle of Znaim. Pop. 510. It has a castle.—Also a village of Bohemia, in the regency of Budweis, and bail. of Neuhaus. Pop. 260.

WISCHENIOWETZ, a village of Austria, in Bohemia, in the reg. and bail. of Pardubitz. Pop. 300.

WISCHERAD, a town of Austria, in Bohemia, in

the circle of Kaurim, near Prague, of which it forms a suburb.

WISCHERWITZ, a village of Austria, in Bohemia, in the regency of Pardubitz, and bail. of Bohmisch-Brod. Pop. 350.

WISCHEZAN, a village of Austria, in Bohemia, in the circle of Pilsen and seignory of Topl. It has an iron-mine.

WISCHHAVEN, a bailliage of Hanover, in the duchy of Bremen, Neustadt. Pop. 82. It contains the village of Nen-Wischhaven, on the Elbe, and near the island of Wischhavener-Sand.

WISCHIN, a village of Prussia, in the prov. of Posen, reg. of Bromberg, and circle of Chodziesen. Pop. 360.—Also a village in the regency of Danzig, and circle of Berent. Pop. 320.

WISCHIN-HANLAND, a village of Prussia, in the regency of Bromberg, and circle of Chodziesen. Pop. 420.

WISCHIN-NENDORFA, a village of Prussia, in the reg. of Bromberg, and circle of Chodziesen. Pop. 350.

WISCHKOWA, a village of Austria, in Bohemia, in the reg. of Eger, and bail. of Saatz. Pop. 210.

WISCHKOWITZ, a village of Austria, in Moravia, in the regency of Olmutz, and bail. of Gross-Peterswald. Pop. 300.—Also a village of Silesia, circle of Troppau. Pop. 220. It has a castle.

WISCHLÄU, a village of Prussia, in the reg. of Oppeln, and circle of Neisse. Pop. 240.

WISCHNAGORA. See WEICHELBERG.

WISCHNEI-WOLOTSCHOK, a town of Russia in Europe, in the gov. of Twer, on the Tzna. Pop. 6,000. It has a cathedral, a school, and a glass-work.—Also a canal which connects Lake Ilmen with the Wolga.

WISCHNIT, a village of Prussia, in the regency of Oppeln, and circle of Tost. Pop. 300.

WISCHNITZA, or WIENITZ, a town of Austria, in Galicia, in the circle and 33 m. WSW of Tchernowitz, on the r. bank of the Czeremosz, opposite Kutj.

WISCHOPOL, a village of Austria, in Bohemia, in the regency and bail. of Gitschin. Pop. 260.

WISCHORU, a village of Turkey in Europe, in Great Walachia, on the Danube.

WISCHUTZ, a village of Prussia, in the regency of Breslau, and circle of Mohlau. Pop. 479.

WISCHWILL, a village of Prussia, in the regency of Gumbinnen, and circle of Ragnit, 20 m. E of Tilsit, near the r. bank of the Niemen. Pop. 525. It has a copper foundry.

WISCONSIN, one of the most flourishing and healthy states of the North American union, stretching between the parallels of 42° 30' and 47° N lat., and between 87° and 94° 30' W long.; and bounded on the N by the territory of Minnesota, Lake Superior, and the northern peninsula of Michigan; on the E by Lake Michigan; on the S by the state of Illinois; and on the W by the Mississippi, which separates it from the state of Iowa and the Western territories. It is 300 m. in length, and 240 m. broad, with an area of 73,711 sq. m., or 47,175,292 acres, of which only 13,955,825 are surveyed. Its surface is one vast plain, varied only by river hills and the gentle swells and undulations of country usually called "rolling." This plain is elevated from 600 to 1,500 ft. above the level of the ocean. The highest lands are those dividing the waters of the lakes from those of the Mississippi. From these there is a gradual descent towards the S and W, which, however, is frequently interrupted by ridges and mounds, the latter of which, rising above the general landscape, present an anomaly in the contour of the country. The slope towards Lake Su-

perior is abrupt, and, as a consequence, the rivers intersecting this portion are short, rapid, and broken by falls. They are unfit for navigation, but possess abundance of water-power which, at no distant period, will become useful to the settler. There is another ridge of broken land, running SW from Green bay, forming the dividing ridge between the waters of Lake Michigan and those of the bay and the Neenah. After pursuing a similar direction, this ridge passes into the state of Illinois. Besides the great lakes on the N and E, a vast number of smaller ones are scattered over the northern portion of the state. They are from 1 to 20 m. in extent, and many lie amid beautiful and picturesque scenery. In the shallow water of the bays, the *Zigania aquatica*, or wild rice, is abundant, and attracts immense flocks of water-fowl. Among the small lakes may be mentioned Lakes Winnebago, St. Croix, Cass, Pepin, Four Lakes, the Mille Lac, Ottawa, Pewaugan, Pewaukee, Geneva, Greene, and many others. The natural feature peculiar to W., says Mr. J. W. Hunt, in his gazetteer of the state, published in 1853, is the uniformity of its elevation, and shape of its surface, which is neither mountainous, hilly, nor flat, but gently undulating. The country W of Sugar-river, and S of the Wisconsin, is somewhat broken, principally by the dividing ridge upon which the road from Madison to Prairie-du-Chien passes. In this section, known as the mines, are several peculiar elevations called mounds. W of the Wisconsin river is a range of high hills, being the only elevations in the state either deserving or assuming the dignity of mountains. The SE portion of the state is marked by ravines at the streams, but little depressed below the surrounding level. Its prominent features are the prairie, destitute of tree or shrub, covered only by a luxuriant growth of grass, interspersed with flowers of every hue; the oak-opening, the lake, the woodland on the border of streams, and the natural meadow. Proceeding N, to the Fox and Wisconsin rivers, and Green bay, the timber increases, and the soil gradually changes from the vegetable mould of the prairie to a sandy loam. The surface also becomes somewhat depressed and uneven, diversified with timber, rolling prairie, large marshes, and extensive swamps, having an abundant growth of cranberries and wild rice. Still, N and W the surface becomes more uneven, and the streams rapid, affording an abundance of water-power for the manufacture of lumber from the immense forests of evergreen, scarcely surpassed on the Western continent.

Soil and Productions.] The soil of the prairie consists of a dark brown vegetable mould, from 1 to 2 ft. in depth, very mellow, and entirely destitute of stone or gravel, which, for fertility and agricultural properties, cannot be surpassed. The subsoil is a clayish loam, similar to the soil of the timbered lands, and is also suitable for cultivation. The soil of the timbered land is less rich than the prairie, not so deep, and contains less carbonate of lime, which enters into the composition of the latter in the proportion of from 20 to 40 per cent. The mining region, unlike that of any other mineral district, promises a liberal reward as well to the farmer as to the miner. The soil of the evergreen district is mostly sandy, and not so rich as in other portions of the state; it is nevertheless well adapted to agriculture and grazing. The prairies of W. are not so extensive as those of other states, and are so skirted and belted by timber that they are well adapted to immediate and profitable occupation. The openings, which comprise a large portion of the finest land of the state, owe their present condition to the action

of the annual fires which have kept under all other forest growth, except those varieties of oak which can withstand the sweep of that element. The limestone underlying the coal-fields of Illinois forms the immediate basis of the alluvion of Southern W. This geological district, in addition to that portion of the state which lies S of the valley of the Wisconsin river, comprises the whole of the slope towards Lake Michigan. In many portions of this district, the lime rock disappears, and the out-cropping sandstone furnishes a fine material for building. The lead-bearing rock of the mineral region is a porous limestone, prevailing throughout Grant, Lafayette, and Iowa cos., and comprising four-fifths of the 'lead district' of the Upper Mississippi, the remaining one-fifth being in the states of Illinois and Iowa. Deposits of iron-ore, water-limestone, and beds of gypsum, together with other varieties of minerals, are found in localities more or less numerous throughout the limestone region. That section of the state which lies between Lake Superior on the N and the falls of St. Anthony on the Mississippi, and the falls of the other rivers flowing S, is primitive in its prevailing geological character; and it is within this primitive region that the copper-mines of Lake Superior are found. In all that portion of the state lying between the primitive region just described and the limestone formation of the south and east, the transition sandstone prevails interspersed with limestone, and more sparsely with rock of a primitive character. This formation comprises that section of the country drained by the Wisconsin and other rivers tributary to the Upper Mississippi and below the falls of those streams.

Rivers.] The Mississippi, which, as before observed, forms the western boundary, is augmented from this state by the waters of the Chippewa and Wisconsin, which, though themselves considerable rivers, scarcely perceptibly increase the volume of 'the father of waters.' Innumerable smaller streams and branches run through the whole extent of the state, so that no portion of it is without a plentiful supply of good and generally pure water. The Mississippi is navigable as far up as the falls of St. Anthony, and small steamboats ply on the Wisconsin and some other rivers. The rivers running into the Mississippi take their rise in the vicinity of the sources of those running into the lakes, and often originate in the same lake or swamp, so that the communication from the Mississippi to the lakes is rendered comparatively easy at various points. Some of the rivers are supplied from the Tamarack swamps, from which the water takes a dark colour.

Soil, Climate, &c.] W. is composed of timbered and prairie land, pretty equally divided, with some swamps and wet prairies having generally a soil from 1 to 10 ft. deep. All kinds of crops which are raised in northern latitudes may be here cultivated with success; and owing to the great range of pasturage on the prairies, it is a fine grazing country. The cos. of Grant and Iowa abound with lead and copper ore. Bordering the Mississippi and Wisconsin rivers the soil is rich, and the surface generally covered with a heavy growth of timber. The proximity of W. to the great lakes ensures it a softer climate than its geographical position would assign to it. The extremes, however, are great—the therm. sometimes during the summer marking 100°, and in winter receding to 40° below zero; but the salubrity of the country is not disturbed by these circumstances, as the heat and cold are seasonal, and approach not by sudden flaws but by a gradation that renders the change almost unfelt. The lowest mean monthly temp. is 13° 58', in January; the highest,

75° 47', in July. The average annual amount of rain is from 27.96 to 38.83 inches. The N and NW, and the S and SW winds, are those most prevalent; the former in the winter, the latter in the summer season. The salubrity of the climate, the purity of the air and of the water, the coolness and short duration of the summers, and the dryness of the winters, conspire to render W. one of the most favoured regions of the United States. Its swamps, marshes, and wet meadows, are constantly supplied with pure water from springs; and as they are seldom exposed to long continued heats, they do not send forth those noxious vapours so much dreaded in the more southern sections of the union. It is especially adapted for agricultural purposes, and for grazing or sheep-farming. Its river and lake facilities are great, and the busy strife of commercial activity has already penetrated to its very centre. Steamboats ply on its waters; and roads built by the late territorial government, greatly facilitate the development of the natural wealth of this fine country. Lead, copper, and iron are found. The SW portion of the country is one vast mine of lead, extending over a region of at least 100 m. in circumference. The ore is supposed to be inexhaustible in quantity, and yields about 70 per cent. pure metal. The lead is generally found in a light ochrous earth, free from rock, at a depth of 10 or 15 ft.; but the greatest beds have been found at about 40 ft. below the surface. The copper-mines in the N bordering on Lake Superior, are among the richest in the world, and are at the present day worked to a considerable amount. The ore yields from 60 to 75 per cent. of metal. To the lumberman, the pineries of W. present great inducements for investment and settlement. That of the Upper W. and its tributaries is the most extensive; and distinguished still more for the fine quality than the inexhaustible quantities of its timber. The other localities of the white pine and other evergreens are mainly on the Wolf, the great northern affluent of the Fox, the tributaries of Green Bay, and on the La Crosse, the Black, Chippewa, and the St. Croix, branches of the Upper Mississippi. The rapids of these streams furnish abundant water-power for the manufacture of lumber, and on the annual spring rise, and occasional freshets at other seasons of the year, the yield of the mills is floated from the Wolf into Lake Winnebago and the Lower Fox, and from most of the other streams into the Mississippi. Scarcely ten years have elapsed since the Alleghany pine of Western New York and Pennsylvania had undisputed possession of the market, not only of the Ohio Valley, but of the Mississippi and its tributaries above New Orleans, at which point it competed with the lumber of Maine and New Brunswick. The course of the lumber trade may now be considered as permanently changed. The pineries of Wisconsin now control, and will hold exclusive possession of the market of the valleys of the Mississippi and its great western affluents. The amount of pine lumber estimated to be sawed in Wisconsin annually, is as follows: Black River, 15,000,000 ft.; Chippewa, 28,500,000 ft.; Green Bay, 21,000,000 ft.; Manitowoc, 24,500,000 ft.; St. Croix, 20,000,000 ft.; Wisconsin, 58,500,000 ft.; Wolf, 25,500,000 ft.—total number of feet, 193,000,000. Aside from the manufacture of pine lumber, reaching as it does nearly 200,000,000 feet per year, saw-mills, driven by both steam and hydraulic power, are now in operation in every section of the state where timber is found, and large quantities of oak scantling and plank, and basswood siding and lath, are yearly manufactured.

Population, &c.] In regard to pop., W. has outstripped some of the old established states. The

progressive increase of its pop. has been as follows:

	Population.	INCREASE.	
		Numerical.	Per cent.
1830.	2,245		
1836.	11,686	8,441	72.7
1838.	13,149	6,463	35.3
1840.	20,945	12,796	41.4
1842.	46,678	13,733	33.9
1844.	117,600	70,322	60.1
1846.	155,277	38,277	24.7
1848.	213,800	60,523	28.0
1850.	304,565	274,246	88.2

The number of free persons born in the U. S., in the pop. of 1850 was 197,912; of foreign birth 106,695; of birth unknown 784. The foreign pop. was composed of persons from—England 18,952, Ireland 21,043, Scotland 3,527, Wales 4,319, Germany 34,519, France 775, Spain 4, Portugal 4, Belgium 45, Holland 1,157, Italy 9, Austria 61, Switzerland 1,244, Russia 71, Denmark, 146, Norway 8,651, Sweden 83, Prussia 3,545, Sardinia 1, Greece 1, Asia 17, Africa 1, British America 8,277, Mexico 9, Central America 11, South America 6, West Indies 20, and other countries 191. The general statistics of the resources, productions, manufactures, wealth, and institutions of W., in accordance with the census of 1850, and other authentic reports referring to the same period of time, are as follows: The improved farm lands amounted to 1,045,499 acres; unimproved lands to 1,931,159 acres. The total number of farms in operation on the 1st June, 1850, was 20,177. The live stock of 1840 and of 1850 was as follows:

Live Stock.	1840	1850.
Horses,		30,179 head
Asses and Mules,	5,735 head	156 "
Milk Cows,		64,339 "
Working Oxen,	30,269 "	42,801 "
Other Cattle,		76,293 "
Sheep,	34,624 "	124,492 "
Pigs,	51,389 "	159,276 "

The amount of animal produce was, wool, 253,963 pounds; butter, 3,633,750 pounds; cheese, 400,283 pounds; and the value of animals slaughtered in the year 920,178 d. The wool crop of the census year of 1840 amounted to 6,777 pounds; hence that of 1850 exhibits an increase of 247,186 pounds, or of 3,499 per centum. The clip per fleece, in 1840, was 31.3 ounces, and in 1850, 32.5 ounces—being an average increase of 1.2 ounces per fleece. The grain crops of 1850, compared with the crops of 1840, was as follows:

Crops.	1840.	1850.
Wheat,	212,116 bushels	4,286,131 bushels
Rye,	1,905 "	81,253 "
Indian corn,	279,359 "	1,988,979 "
Oats,	406,514 "	2,414,072 "
Barley,	11,062 "	209,602 "
Buckwheat,	10,624 "	79,878 "

Pease and beans were grown in 1850 to the extent of 20,657 bushels; potatoes, Irish, 1,402,077 b., and sweet 979 b. The potato crop of 1840 amounted to 419,698 b. The principal miscellaneous crops, compared with similar crops of 1840, exhibit the results appended:

Crops.	1840.	1850.
Hay,	30,938 tons	275,662 tons
Hay,	133 pounds	13,930 pounds
Flax—dew-rotted,		300 tons
Flax—water-rotted,	2 tons	2 "
Flax,		68,303 pounds
Maple sugar,	186,288 pounds	610,976 "
Wine,	0 gallons	113 gallons

Manufactures.] The whole number of manufacturing establishments in operation on the 1st June, 1850, and manufacturing to the value of 500 d. and upward annually, was 1,273, the great portion of

them being mills of various descriptions, and other agricultural manufactories, and of the strictly national manufactures the following: 9 woollen factories, 16 iron works—one making pig iron, and 15 making castings; and 8 tanneries. The total capital invested in manufactures, in 1840, amounted to 635,926 d. In the woollen manufacture there was a capital of 31,225 d. invested; wool consumed, 134,200 pounds; value of all raw material, &c., 32,630 d.; hands employed, 25; products of the year—cloth 36,000 yards, and yarn 94,350 pounds; value of products 87,992 d. The capital invested in the manufacture of pig iron was 15,000 d.; ore used, 3,000 tons; coke and charcoal consumed, 150,000 bushels; hands employed 60; pig iron produced in the year 1,000 tons; value of entire products, 27,000 d. In the manufacture of iron castings, a capital of 116,350 d. was invested, pig iron used, 1,371 tons; old metal, 15 tons; coal, 595 tons; and coke and charcoal, 2,700 bushels; value of all raw material, &c., used in the year, 86,930 d.; hands employed, 228; products of the year—castings 1,342 tons, and, including 64,025 d., the value of other products, these were valued at 216,195 d. In 1840, there was but one furnace in the State, which produced only 3 tons cast iron, and employed 3 hands, and a capital of 800 d. In tanneries, the capital invested amounts to 78,950 d.; value of hides and skins used, 93,380 d.; hands employed, 75; monthly cost of labour, 1,710 d.; tanned during the year, 14,900 skins, and 59,600 sides of leather, valued at 175,710 d. In 1840, but one tannery was reported, employing 3 hands and 2,000 d., and producing annually 150 sides of sole leather, and 150 sides of upper leather. The capital invested in the manufacture of malt and spirituous liquors amounted to 98,700 d. in 1850; quantities and kinds of grain, &c., consumed—barley, 91,020 bushels; corn, 29,900 bushels; rye, 9,200 bushels; hops, 28 tons, hands employed, 98; quantities of liquors produced—ale, &c., 31,320 barrels; whisky, 127,000 gallons. In 1840, there were 3 breweries, producing 14,200 gallons ale, &c. and 3 distilleries, producing 8,300 gallons spirits, &c., together employing 11 hands, and a capital of 14,400 d.

Commerce and Internal improvements.] The commerce of W., chiefly carried on at its lake ports, is extensive. The statistics of its foreign trade with Canada are embraced in those of the districts of Michillimackinac and Chicago, and cannot be stated separately. The coasting trade is relatively of immense importance, both on the lake and on the Mississippi. The chief ports of the Mississippi are Prairie-du-Chien and Cassville, and the exports from those are chiefly mineral. The internal commerce of the state is carried on with great activity, radiating from the principal commercial towns to every portion, and large supplies are needed in the northern pineries, which supply so valuable a material to general commerce. The internal improvements of W. are more prospective than existing, but great progress has been made in building railroads, one of which will extend along the lake shore from Chicago to Fond-du-Lac, and other roads diverge from Chicago, Milwaukee, &c., toward the Mississippi, centering at Madison. A line will also extend from the latter point to Portage city on the N., and to Beloit and Janesville to the S., and these will be carried to a junction with the Galena and Chicago Union R. R. The only line yet complete is that from Milwaukee to Madison, which, under the name of Milwaukee and Mississippi R. R., will stretch across the State. The improvement of Fox and Wisconsin rivers is in progress, with the intention ultimately of connecting the rivers by a canal, and

thus giving uninterrupted navigation from the lake to the Mississippi.

Government.] The constitution now in force was adopted in convention on the 1st February, 1848, and approved by the people at the election held in April following. All males 21 years old, residents of the state for one year next before the election, who are white citizens of the U. S., or white foreigners who have declared their intention to become such citizens, or persons of Indian blood once declared by the laws of the U. S. to be citizens, subsequent laws to the contrary notwithstanding, or "civilized persons of Indian descent" not members of a tribe, are entitled to vote at all elections; and the right of suffrage may be extended by a law approved by a majority of votes at a general election. The legislature consists of an assembly and senate. Members of the assembly (in number between 54 and 100) are chosen annually, and senators (not more than one-third nor less than one-fourth the number of assemblymen) are chosen for two years, one-half each year. Both must be qualified voters in their districts. The legislature meets at Madison on the first Monday of January annually. The governor shall be a qualified voter and citizen of the U. S., and be chosen for two years by a plurality of votes, and if there be no choice the legislature shall, by joint ballot, choose one of the persons having the highest equal number of votes. In default of the governor, his duties are discharged by the lieutenant-governor, who is chosen with the same qualification and for the same term as the governor. He is *ex-officio* president of the senate. If the lieutenant-governor defaults, then the secretary of state fills the office. The governor's *veto* may be defeated by a vote of two-thirds of the members present in each house. The judiciary is comprised in a supreme court, circuit-courts, county courts, and justices of the peace. Justices of the peace are elected in the several towns, hold office two years, and have jurisdiction throughout their counties in civil matters when the debt or damages claimed do not exceed 100 dol. A county court is established in each county, and the judge is elected by the voters of the county for the term of four years; his court has jurisdiction concurrent with the circuit courts in all civil actions arising within the county, and in civil actions originating out of the county, when the damages claimed are not more than 500 dol., and exclusive appellate jurisdiction in all cases of appeal or *certiorari* from justices of the peace, also probate powers and jurisdiction. The State is divided into six judicial circuits, the voters of each of which elect a judge for six years. The circuit courts have general original jurisdiction in actions civil and criminal at law and equity within their circuits. The supreme court is composed of the judges of the circuits, one of whom is elected by the other judges chief justice. Except the power to issue writs of *mandamus*, *quo warranto*, and the like, this court has appellate jurisdiction only, and is the court of last resort. There can be no trial by jury in this court. Tribunals of conciliation may be established, and in every organized county the legislature may appoint one or more persons with powers not exceeding those of a circuit judge at chambers. Sheriffs, coroners, registrars of deeds, and district attorneys are chosen by the people for two years. Among the miscellaneous provisions of the constitution are the following: no lottery or divorce can be granted by the legislature; laws shall be passed providing a way for suing the state; the credit of the state shall never be lent, nor shall any debt be contracted, nor money paid for internal improvements, unless the state hold trust property dedicated to such uses; except in cases of war, invasion, or insurrection, no debt exceeding 100,000 d. shall be contracted; a university without sectarian instruction shall be established; the legislature shall prevent towns and cities from contracting debts; no general or special law to create a bank or banks shall be passed till a majority of the votes at a general election shall have been in favour of a bank, and until such a majority have afterward approved the act as passed; any person implicated in a duel loses the right of suffrage and of holding office; no public defaulter shall hold office; in criminal prosecutions for libel the jury are judges of law and fact; all lands are allodial, and leases of agricultural lands, with rent or service reserved for more than 18 years, are void; resident aliens have all the property rights of citizens; imprisonment for debt on contract is prohibited; no religious opinions shall disqualify a witness, &c. Amendments to the constitution, agreed to by a majority of members of both houses shall be published for three months before the next election, and referred to the legislature then chosen; and if again approved by such majority, shall be submitted to the people. A convention may be called in like manner.

Federal representation, &c.] W., in accordance with the apportionment act of the 23d May, 1850, has three representatives in the U. S. congress. The militia force of the state, as reported to the adjutant-general of the U. S. army, consists of 32,203 men of all arms, of which 1,804 are commissioned officers, and 30,399 non-commissioned officers, musicians, artificers, and privates. Of the commissioned officers, 9 are general officers, 31 general staff officers, 212 field officers, &c., and 1,552 company officers. The principal benevolent institution of the state is the asylum for the education of the blind at Janes-

ville, a tax of one-fifteenth of a mill on every dollar of taxable property in the state is levied for its aid. —The total receipts for the year ending 31st December, 1850, amounted to 93,889 d., and the expenditures to 62,746 d. The total receipts since the organization of the state government had been to date, 160,218 d., and the total expenditures 152,969 d. The chief sources of revenue are taxes and the sales of lands. The principal expenditures are for salaries of executive and judicial officers, 13,592 d.; legislative expenses, 14,309 d.; printing, 8,793 d.; State convicts (there being no prison), 3,093 d.; miscellaneous (including revision of statutes in 1849), 16,356 d. There is a territorial debt of 12,892 d., which would be due in June, 1851.—Madison, on the isthmus between Third and Fourth lakes, is the political capital.

Statistics of education.] The superintendent of public instruction reported the capital of the school fund as amounting on the 1st June, 1851, to 538,094 d., which, at 7 per cent. interest, yielded an annual revenue of 37,666 d. It is expected that 5,301,943 d. will be eventually realized from the sales of the school-lands. For the year ending August 1, 1850, out of 2,105 districts, 1,700, and out of 764 part districts, 650 had reported schools. In the districts reported, each school had been taught on an average 4.96 months, and all received 65,604 d. of public money. Out of 92,047 children between the ages of 4 and 20, 61,597 attended schools, and 1,020 under 4, and 688 over 20, also attended. There were also in the state 87 private or select schools, with an average of 75 pupils. The state university is located at Madison; it was founded in 1848, and is well endowed. The Beloit college was founded in 1846, and in 1850 had 6 professors, and 25 students; and its library contained about 2,000 volumes. The whole number of periodicals published in W., in 1850, was 49, of which 11 were conducted on whig principles, 29 on democratic principles, and 9 were neutral in politics, including literary, religious, and all issues, the character of which had not been ascertained.

Religious denominations.] The statistics of the several religious denominations in the state, in 1850, were as follows:—

Denominations.	No. of Churches.	Church acrom
Baptist,	28	8,505
Christian,	2	700
Congregational,	33	10,585
Dutch Reformed,	2	550
Episcopal,	19	5,140
Free,	2	275
Lutheran,	18	5,000
Methodist,	54	15,008
Presbyterian,	21	6,000
Roman Catholic,	57	23,717
Union,	1	400
Universalist,	1	300

Pauperism and Crime.] The whole number of paupers who received support within the year ending 1st June 1850, was 666, of which number 169 were native, and 497 foreign born; and the whole number of paupers at the date specified, was 338, of which 72 were natives, and 166 foreigners. Cost of support within the year, 14,748 d. A state-prison has just been erected at Waupun, in Fond-du-Lac co.

Historical sketch.] Wisconsin, says J. A. Lapham, Esq., does not fall behind the other portions of the Western country in the monuments it affords of the existence of an ancient people who once inhabited North America, but of whom nothing is known except what can be gathered from some of the results of their labours. The works at Aztalan, in Jefferson county, are most known and visited; but there are many other localities which are said to equal them in interest and importance. The substance called brick at this place is evidently burnt clay, showing marks of having been mixed with straw, but they were not moulded into regular forms. There is a class of

ancient earth-works in Wisconsin, not before found in any other country, being made to represent quadrupeds, birds, reptiles, and even the human form. These representations are rather rude, and it is often difficult to decide for what species of animal they are intended; but the effects of time may have modified their appearance very much since they were originally formed. Some have a resemblance to the buffalo, the eagle or crane, or to the turtle or lizard. One representing the human form, near the Blue Mounds, is, according to R. C. Taylor, Esq., 120 ft. in length; it lies in an east and west direction, the head towards the west, with the arms and legs extended. The body or trunk is 30 ft. in breadth, the head 25, and its elevation above the general surface of the prairie is about 6 ft. Its conformation is so distinct that there can be no possibility of mistake in assigning it to the human figure. A mound at Prairieville, representing a turtle, is about 5 ft. high, the body is 55 ft. in length; it represents the animal with its legs extended and its feet turned backward. It is to be regretted that this interesting mound is now nearly destroyed. The ancient works are found in all parts of the territory, but are most abundant at Axtalan, on Rock river, near the Blue Mounds, along the Wisconsin, the Neenah, and the Pishkaka rivers, and near Lake Winnebago. The mounds are generally scattered about without any apparent order or arrangement, but are occasionally arranged in irregular rows, the animals appearing as if drawn up in a line of march. An instance of this kind is seen near the road, 7 m. E. from the Blue Mounds, in Iowa co. At one place near the Four lakes, it is said that one hundred tumuli, of various shapes and dimensions, may be counted—those representing animals being among others that are round or oblong. Fragments of ancient pottery of a very rude kind are often found in various localities. They were formed by hand, or moulded, as their appearance shows evidently that these vessels were not turned on a "potter's wheel." Parts of the rim of vessels, usually ornamented with small notches or figures are most abundant. A mound is said to have been discovered near Cassville, on the Mississippi, which is supposed to represent an animal having a trunk like the elephant, or the now extinct mastodon. Should this prove true, it will show that the people who made these animal earth-works, were contemporaries with that huge monster whose bones are still occasionally found; or that they had then but recently emigrated from Asia, and had not lost their knowledge of the elephant.—W. was first visited by French missionaries in 1680, in October of which year Menard reached Che-go-le-mo-on, on Lake Superior. In 1673, Aloues and Dablon visited Green bay, and the country between the Fox river and the south end of Lake Michigan. In the year following, on the 13th of May, Marquette, a Jesuit missionary, and Joliet, an agent of the government of France, with five other Frenchmen, embarked from their mission near Mackinac, and arrived at Green bay, where they found an Indian village and procured guides to accompany them up Fox river to the portage with the Wisconsin. They descended this river to its mouth, where they arrived on the 17th of June 1673, and made the first discovery of the Upper Mississippi. The territory remained under the government of the French, who claimed it, until 1763, when, at the treaty of Paris, it was ceded to Great Britain, who retained it until the independence of the U. S. was acknowledged by that country in 1783, when it was claimed by Virginia as a part of the Illinois country conquered by Col. George Rogers Clark. It, however, remained in the possession of Great Britain until 1796, when it was surrendered in accordance with Jay's treaty, ratified the previous year. On the first day of March 1784, it was ceded by Virginia to the U. S. By the ordinance passed the 13th of July 1787, a governor was provided for the territory NW of the Ohio river, which territory was divided into two separate governments, the western called Indiana, by an act passed May 7th, 1800. An act dividing the Indiana territory, and organizing Illinois, was passed and approved February 2d, 1809. By the act of Congress to enable the people of Illinois to form a state government, approved April 18th, 1818, all that portion of said territory north of the parallel of latitude 42° 30' west of the middle of Lake Michigan, was attached to the territory of Michigan, which had been set off from Indiana in 1805. In 1835, Michigan having assumed a state government, a session, convened at Green bay, from the remainder of said territory, signed several memorials to congress, among which was one asking for the organization of the territory of W., with the seat of government at Cassville, on the Mississippi. An act establishing the territorial government of W., was passed and approved April 20th, 1836, and the territory fully organized July 4th, 1836. On the 12th of June 1838, an act was passed dividing the territory of W., and establishing that portion on the W side of the Mississippi (which had been attached to Michigan in 1834) into a separate government, under the name of Iowa. A convention was held at Madison, October 5th, 1846, for the purpose of drafting a state constitution, which was adopted in convention, December 16th, 1846, but rejected by the people at the election held on the first Tuesday in April 1847. A second convention was held December 16th, 1847, and a constitution agreed to February 1st, 1848, which was approved of by the electors, at the election held April 1848, and W. was admitted into the union, on an equal footing with the other states, on the 29th day of May 1848.

WISCONSIN, a river which rises in Vieux Desert lake, on the NE boundary of the above State, and flows S in general course for 250 m. until it reaches

Portage, when it turns, and flows SW and WSW 114 m. to its confluence with Mississippi river, near Prairie-du-Chien. Above Portage it has numerous rapids, which afford great water-power, used at many places by saw-mills. At Portage it is 1,200 ft. wide, and gradually increases in width to its mouth, where it is 1,800 ft. wide. Its current is usually quite rapid, but is shallow, and there are numerous islands and shifting sand-bars, rendering navigation somewhat difficult. Steam-boats of light draft can usually ascend to Portage. In Richmond co., where it is 1,350 ft. wide, it is bordered by high sandstone bluffs, from 150 to 200 ft. high, presenting grand and beautiful scenery. Proposed improvements of this river will render it a very important channel of trade and travel between the great lakes and the western rivers.

WISDORF, a village of Prussia, in the regency of Dusseldorf, and circle of Solingen. Pop. 725.

WISEGO, a village of Prussia, in the regency of Konigsberg, and circle of Ortelsburg. Pop. 240.

WISEK, a village of Austria, in Bohemia, in the regency of Pilsen, and bail. of Bokikan. Pop. 260.

WISELL, a village of Austria, in Styria, in the circle of Cilli. Pop. 200.

WISEMBARCK, a commune of France, in the dep. of the Vosges, cant. and 9 m. E of Saint Die. Pop. 1,137.

WISENT. See **WIESENT**.

WISERNES, a village of France, in the dep. of the Pas-de-Calais, and cant. of Tumbres, near the Aa. Pop. 610. It has a flour and three paper mills.

WISERTON, or **WISSTON**, a township in the p. of Clayworth, Notts, 5 m. ESE of Bawtry, intersected by the Chesterfield canal. Pop. in 1851, 127.

WISGOLDINGEN, a village of Wurtemberg, circle of the Jaxt, and bail. of Gemund. Pop. 699.

WISHART, an island of South Australia, in the archipelago of New Britain, 6 m. from New Ireland, in S lat. 2° 20', and E long. 150° 49'.

WISLAU, a parish in Warwickshire, 3½ m. ESE of Sutton-Coldfield, intersected by the Birmingham and Fazeley canal, and containing the hamlet of Moxhall. Area 1,196 acres. Pop. in 1851, 282.

WISHAWTON, a village of Lanarkshire, in the p. of Cambusnethan, 14 m. E by S of Glasgow. Pop. 3,271, chiefly engaged in coal mines and iron works in the vicinity.

WISHFORD, or **WICHFORD** (**GREAT**), a parish in Wilts, 2½ m. NNW of Wilton. Area 1,610 acres. Pop. in 1831, 361; in 1851, 378.

WISINGSOE, an island of Sweden, in the Western-See. Pop. 900. It has a botanic garden, and a gymnasium.

WISKA, a village of Austria, in Bohemia, in the regency of Gitschin, and bail. of Weiswasser. Pop. 760.—Also a village of the regency of Pardubitz, and bail. of Neu-kolin. Pop. 260. It has manufactures of potash.

WISKITKI, a town of Russia in Europe, in Poland, in the gov. and WSW of Warsaw, on the Pisia. Pop. 1,000.

WISKITTNO, a village of Prussia, in the reg. and circle of Bromberg. Pop. 250.

WISKOW. See **WISCHAU**.

WISLA. See **WIECHEL**.

WISLEY, or **WIEHLEY**, a parish in Surrey, 2½ m. N by E of Ripley. Area 1,321 acres. Pop. 167.

WISLICA, a town of Poland, in the gov. and 39 m. S of Kielce, obwod of Stobinca, on the Nida, in a marshy locality. Pop. 800. It is enclosed by walls, and has two churches.

WISLOCH. See **WIESLOCH**.

WISLOK, or **WISLOKA**, a river of Austria, in Galicia, which has its source on the N side of the Car-

pathian chain, in the circle of Sanok; runs first NW, then NE; and, after a course of 120 m., joins the San, on the l. bank. Krasno, Fryztak, Stryszow, and Rzeszow, are the chief places on its banks. —Also a river of the same prov., which also has its source on the N side of the Carpathian chain; traverses the circles of Jaslow and Tarnow; and after a course, in a generally N direction, of 90 m., joins the Vistula, on the r. bank. Zmygrod, Osiek, Jaslo, Kolaczyce, Brzostek, Pilsno, and Dembica, are the chief places on its banks.

WISMANNSDORF, a village of Prussia, in the reg. of Treves, and circle of Bittburg. Pop. 220.

WISMAR, a town of the grand-duchy of Mecklenburg-Schwerin, capital of a seignory of the same name, 18 m. N of Schwerin, on a bay of the Baltic, named Walfisch, and at the mouth of the outlet of Lake Schwerin, in N lat. 53° 53' 31". Pop. 12,000. It is enclosed by walls and ditches, with four gates, and has a suburb, four Lutheran churches, three hospitals, an orphans' asylum, and a school. It possesses manufactories of tobacco, playing cards, sail-cloth, and woollen and linen fabrics, distilleries of brandy, breweries, and building-docks, and carries on an active trade in grain, wood, and other articles of local produce. The harbour is good, but wanting in depth for large vessels. The number of vessels which entered the port during 1849 was 328, and 343 cleared outwards, exclusive of steamers; of these 77 vessels were English, 29 Russian, 39 Danish, 64 Swedish, 3 Norwegian, 23 Dutch, and 2 French.

WISNA, a town of Poland, in the gov. of Augustowo, obwod and 15 m. E of Lamosa, on the Narew. Pop. 2,013.

WISNICE, or **WISNICA**, a town of Poland, in the wojewode of Siedlec, obwod and 29 m. E of Radzyn. —Also a town of Austria, in Galicia, in the circle and 5 m. S of Bochnia. It has a castle and a Carmelite convent.

WISNIEWKE (GROSS, KLEIN, NEU and POLNISCHE), four villages of Prussia, in the regency of Marienwerder, and circle of Flatow. Pop. 980.

WISNIEWO, a village of Prussia, in the reg. of Bromberg, and circle of Wongrowiec. Pop. 200.

WISNITZ. See **WISCHNITZA**.

WISOCKEN, a village of Prussia, in the reg. of Gumbinnen, and circle of Lyk. Pop. 200.

WISOKA, a village of Austria, in Moravia, in the circle of Olmutz, and seignory of Biskupitz. Pop. 220. —Also a village of the circle of Prerau, and seignory of Hustopetsch. Pop. 230.

WISOKEIN, a village of Austria, in Moravia, circle of Znaim and seignory of Bottau. Pop. 240.

WISOKEPOLE, a village of Austria, in Moravia, and seignory of Brunow. Pop. 570.

WISOKI-MAZOWIECKI, a town of Russia in Europe, in Poland, in the gov. of Augustowo, obwod and 29 m. SE of Lomza. Pop. 1,000, of whom a large proportion are Jews.

WISOKY, a village of Austria, in Moravia, circle of Iglaui, and seignory of Saar. Pop. 240.

WISOTSCHAU, a village of Austria, in Bohemia, in the regency of Gitschin, and bail. of Neu-Bidschow. Pop. 240.

WISOWITZ, or **WYSOWICE**, a town of Austria, in Moravia, circle and 27 m. NE of Hradisch, on the Drownitz. Pop. 2,700. It has a castle, and possesses manufactories of cloth and paper.

WISP-HILL, a mountain of Roxburghshire, near the source of the Teviot, 13 m. ESE of Ettrick-Pen, in N lat. 55° 17', W long. 2° 57', having an alt. of 1,830 ft. above sea-level.

WISPGINGTON, a parish in Lincolnshire, 4 m. W by N of Horncastle. Area 1,570 acres. Pop. 83.

WISPITZ, a village of Anhalt-Dessau, in the bail. of Nienburg, on the Saale. Pop. 260.

WISSANT, a commune of France, in the dep. of the Pas-de-Calais, cant. and 7 m. NNW of Marquise. Pop. in 1841, 1,012. It has a port, now much choked with sand, supposed to have been the *Ithys-Portus* of the Romans.

WISCHRAD. See **WISCHERHAD**.

WISSEK, or **WISOKA**, a town of Prussia, in the prov. of Posen, regency and 42 m. WNW of Bromberg, and circle of Wirsitz. Pop. in 1842, 915.

WISSEK, a village of Austria, in Moravia, in the circle of Brunn, and bail. of Boskowitz. Pop. 260.

WISSEL, a village of Prussia, in the regency of Dusseldorf, and circle of Kleves. Pop. 730.

WISSELSHEIM, a village of the grand-duchy of Hesse-Darmstadt, in the prov. of Upper Hesse, to the SE of Rutzbach, on the Wetter. Pop. 200. It has a salt-work.

WISSELSING, a village of Bavaria, in the circle of Lower Bavaria, presidial of Deggendorf. Pop. 400.

WISSEMBOURG, **WEISSENBURG**, or **KROX-WEISSENBURG**, an arrondissement, canton, commune, and town of France, in the dep. of the Bas-Rhin. The arrond. comprises an area of 78,450 hect., and contains 6 cant. Pop. in 1831, 96,349; in 1836, 95,873; in 1846, 94,821. The cant. comprises 13 com. Pop. in 1831, 17,398; in 1846, 16,598. The town is 36 m. NNE of Strasburg, on the r. bank of the Lauter, and on the frontier of Rhenish Bavaria. Pop. in 1789, 5,694; in 1821, 5,714; in 1831, 6,097; in 1841, 6,184; in 1846, 6,273. It stands in a gorge running between the Vosges and the plains of the Rhine, and is enclosed by a strong wall and a ditch, forming a portion of the fortifications known as the 'Lignes-de-Wissembourg.' It contains a church, a Lutheran chapel, a synagogue, a communal college, an hospital, an almshouse, and possesses manufactories of hosiery, felt, straw-hats, china, pottery, soap, and turnery, dye-works, bleacheries, wax-works, oil-mills, brick, tile, and lime-kilns, &c. The environs are noted for their wine. It is of great antiquity, and is reputed the *Sebusium* of the ancients. It had an abbey founded by Dagobert I., the abbe of which ranked third among the abbe-princes of the empire. It became a free imperial town in 1247, and was united to France by the treaty of Ryswyk. It was dismantled by Louis XIV. In 1744, it was taken by Charles of Lorraine, and in 1793 by the Austrians.

WISSEN, a village of Prussia, in the regency of Dusseldorf, and circle of Geldern. Pop. 350. —Also a village of the regency of Coblenz, and circle of Altenkirchen, on the Sieg. Pop. 615. It has copper-works.

WISSENBACH, a village of Nassau, in the bail. of Dillenburg. Pop. 470.

WISSENTRUP, a village of Lippe-Detmold, in the bail. of Lage. Pop. 260.

WISSERSHEIM, a village of Prussia, in the regency of Achen, and circle of Düren. Pop. 500.

WISSET, a village of Austria, in Bohemia, in the reg. of Eger, bail. of Saatz. Pop. 240.

WISSETT, a parish in Suffolk, 2 m. NW of Halesworth. Area 2,259 acres. Pop. in 1851, 496.

WISSING, a village of Bavaria, in the circle of Middle Franconia, presidial of Beilngries. Pop. 302.

WISSOKA, a village of Prussia, in the regency of Danzig, and circle of Stargard. Pop. 300.

WISSOWATTEN, a village of Prussia, in the regency of Gumbinnen, circle of Lotzen. Pop. 340.

WISSULKE, a village of Prussia, in the regency of Marienwerder, circle of Deutsch-Crone. Pop. 200.

WISTANSTOW, a parish of Salop, 9½ m. NW by

N of Ludlow. Area 5,160 acres. Pop. in 1831, 989; in 1851, 1,044.

WISTASTON, a parish in the co.-palatine of Chester, 2½ m. NE by E of Nantwich, near the junction of the Chester and Crewe, the Grand Junction, and the Manchester and Birmingham railways. Area 1,465 acres. Pop. in 1831, 350; in 1851, 298.—Also a chapelry in the p. of Marden, co. of Hereford, 7 m. N by E of Hereford, on the river Lug.

WISTENLACH, a village of Switzerland, in the cant. of Freiburg, and bail. of Murten. Pop. 1,037.

WISTERNITZ, a market-town of Austria, in Moravia, in the circle and 5 m. E of Olmütz, on the Flatitz. Pop. 1,250.

WISTERNITZ (UNTER), or DOLNY-WISTERNICE, a market-town of Moravia, in the circle and 23 m. S of Brunn, on the r. bank of the Thaya. Pop. 660.

WISTERZA. See FRISTRITZ-WINDECH.

WISTITTEN. See WYSTITTEN.

WISTON, a parish in the upper ward of Lanarkshire, on the N bank of the Clyde. It is irregular in form, and about 6 m. in length, by from 3 to 4½ m. in breadth. The hill of Tinto, which stands on its N boundary, raises its beautiful crest 2,000 ft. above the level of the sea, and is green to the very summit. From this elevation may be enjoyed one of the most extensive views in Scotland; for the eye embraces within its range an immense tract of country and sweep of sea, including Hartfell and Queensberry, in Dumfries-shire; Goatfell, in the Isle of Arran; the Bass; and even the hills in the north of England and north of Ireland. There are three villages in the p., viz., Robertson, Wiston, and Newton of Wiston. Pop. in 1831, 940; in 1841, 929; in 1851, 819.

WISTON, or WISSINGTON, a parish in Suffolk, 1 m. WSW of Nayland, on the N bank of the river Stour, over which there is here a bridge. Area 7,030 acres. Pop. in 1831, 249; in 1851, 683.—Also a parish in Sussex, 1½ m. NNW of Steyning. Area 2,865 acres. Pop. in 1831, 296; in 1851, 301.

WISTOW, a parish in Huntingdonshire, 3½ m. SSW of Ramsey. Area 2,070 acres. Pop. in 1831, 404; in 1851, 553.—Also a parish in Leicestershire, 7 m. SE by S of Leicester, intersected by the Union canal. It includes the chapelry of Newton-Harcourt. Area 2,100 acres. Pop. in 1831, 298; in 1851, 261.—Also a parish in the E and W ridings of Yorkshire, 3 m. NW by N of Selby, near the river Ouse. Area 3,870 acres. Pop. in 1851, 788.

WISTRITZ, a village of Austria, in Bohemia, in the reg. of Eger, and bail. of Teplitz. Pop. 310.

WISTRICHENOWITZ, a village of Austria, in Moravia, in the circle of Znaim, and seignory of Neu-Reisch. Pop. 290. It has two mills.

WISWALL, or WISWELL, a township in the p. of Whalley, co.-palatine of Lancaster, 3 m. S of Clitheroe, and within the borough boundaries. Area 1,410 acres. Pop. in 1831, 724; in 1851, 747.

WISZGOLDINGEN, a village of Würtemberg, circle of the Jaxt, and bail. of Gmünd. Pop. 669.

WISZLAUF, or WIEZLAUF, a river of Würtemberg, an affluent of the Rems.

WISZNICZ. See WISZNICZ.

WISZNIEWEN, a village of Prussia, in the reg. of Gumbinnen, and circle of Lyk. Pop. 470.

WISZNOWIEC, a town of Russia in Europe, in the gov. of Volhynia, and circle of Kremenitz. Pop. 2,000.

WISZNOW. See WISCHENAU.

WISZICKEN, a village of Prussia, in the regency and circle of Gumbinnen. Pop. 300.

WITANOW, or WITAL, a village of Austria, in Bohemia, in the regency of Pardubitz, and bail. of Hohenmauth. Pop. 400.

WITASCYZE, a village of Prussia, in the reg. of Posen, and circle of Pleschen. Pop. 640.

WITCHAM, a parish in the isle of Ely, co. of Cambridge, 5½ m. W of Ely. Area 2,671 acres. Pop. in 1831, 519; in 1851, 594.

WITCHFORD, a parish in the isle of Ely, co. of Cambridge, 3 m. WSW of Ely. Area 2,376 acres. Pop. in 1831, 461; in 1851, 620.

WITCHINGHAM (GREAT), a parish in Norfolk, 2 m. S of Reepham. Area 2,245 acres. Pop. 669.

WITCHINGHAM (LITTLE), a parish in Norfolk, 2 m. SE by S of Reepham. Area 738 acres. Pop. in 1831, 62; in 1851, 42.

WITCHLING, a parish in Kent, 10 m. E of Maidstone. Area 1,309 acres. Pop. in 1851, 124.

WITCOMBE, or WHITCOMBE (GREAT), a parish in Gloucestershire, 3½ m. NE by N of Painswick. Area 918 acres. Pop. in 1831, 174; in 1851, 167.

WITHAM, a parish and market-town in Essex, 8 m. NE by E of Chelmsford, in the line of the Eastern Counties railway. Area of p. 3,633 acres. Pop. in 1831, 2,735; in 1851, 3,303. The town, which stands in an agreeable situation near the confluence of the rivulet Braine with the river Blackwater, consists principally of one long street of a respectable aspect, through which runs the high road from London to Colchester. It is the supposed site of the Roman station *Canonium*; and there is a Danish camp in the vicinity.

WITHAM, a river in Lincolnshire, which rises near South Witham, and passing Colsterworth, Grantham, and Lincoln, unites with the sea at Boston deeps. From Lincoln it becomes navigable, and it has also a communication with the Trent by the Foss-dyke canal.

WITHAM. See WYTHAM.

WITHAM-ON-THE-HILL, a parish in Lincolnshire, 4½ m. SW of Bourne, containing the hamlets of Manthorpe, and Toft with Lound. Area 4,210 acres. Pop. in 1831, 540; in 1851, 635.

WITHAM (NORTH), a parish in Lincolnshire, 1½ m. S by W of Colsterworth, intersected by the river Witham. It contains the hamlet of Leithorpe. Area 2,373 acres. Pop. in 1831, 273; in 1851, 309.

WITHAM (SOUTH), a parish in Lincolnshire, 2½ m. S by W of Colsterworth. Area 3,230 acres. Pop. in 1831, 410; in 1851, 544.

WITHAM-FRIARY, or CHARTERHOUSE-WITHAM-IN-SELWOOD, a parochial chapelry in Somersetshire, 5½ m. SSW of Frome. Area 4,970 acres. Pop. in 1831, 574; in 1851, 556.

WITHAMSVILLE, a village of Union township, Clermont co., in the state of and 3 m. N of the Ohio, U. S., 128 m. SW of Columbus. Pop. in 1840, 250.

WITHCALL, a parish in Lincolnshire, 4 m. W by S of Louth. Area 2,650 acres. Pop. 117.

WITHCOTE, a parish in Leicestershire, 9 m. SSE of Melton-Mowbray. Area 777 acres. Pop. 40.

WITHERIDGE, a parish, formerly a borough and market-town, in the co. of Devon, 8 m. E of Chumleigh, on the small river Sturcomb. Area 9,048. Pop. in 1831, 1,263; in 1851, 1,309.

WITHERLEY, a parish in Leicestershire, 1 m. E of Atherstone, comprising the hamlet of Atterton. The counties of Leicester and Warwick are here separated by the river Anker and the Watling-street, which crosses the Anker at Witherley-bridge. The tower of the church, surmounted by a spire 156 ft. high, is considered the finest in the county. Manchester, the site of the Roman station *Mandussædum*, is in this p. Area 1,570 acres. Pop. in 1851, 540.

WITHERNE-WITH-STAIR, a parish in Lincolnshire, 3½ m. NW by N of Alford. Area 2,669 acres. Pop. in 1831, 390; in 1851, 503.

WITHERNSEA, a chapelry in the p. of Hollym,

E. R. of Yorkshire, $2\frac{1}{2}$ m. N of Patrington. Area 1,210 acres. Pop. in 1821, 130; in 1851, 109.

WITHERNWICK, a parish in the E. R. of Yorkshire, 8 m. N by E of Hedon. Area 2,600 acres. Pop. in 1831, 443; in 1851, 513.

WITHERSDALE, a parish in Suffolk, 3 m. SE by E of Harleston. Area 880 acres. Pop. 199.

WITHERSFIELD, a parish in Suffolk, 9 m. W by N of Clare. Area 2,509 acres. Pop. 642.

WITHERSLACK, a township and chapelry in the p. of Beetham, Westmoreland, $7\frac{1}{2}$ m. WNW of Milnthorpe, on the river Belo. Area 4,689 acres. Pop. in 1831, 488; in 1851, 487.

WITHERSTONE, a parish in Dorset, 5 m. ENE of Bridport. Pop. returned with that of Poorstock.

WITHIEL, a parish in Cornwall, 5 m. W by S of Bodmin. Area 3,005 acres. Pop. in 1851, 452.

WITHIEL-FLOREY, a parish in Somerset, 5 m. NE of Dulverton. Area 2,485 acres. Pop. in 1851, 104.

WITHINGTON, a parish in Gloucestershire, 6 m. W of Northleach, intersected by the river Colne. Area 5,830 acres. Pop. in 1831, 743; in 1851, 823.

—Also a parish in Herefordshire, 4 m. ENE of Hereford. Area 2,392 acres. Pop. in 1831, 723; in 1851, 881.—Also a township in the p. of Manchester, co.-palatine of Lancaster, 4 m. S of Manchester. Area 2,498 acres. Pop. in 1831, 1,048; in 1851, 1,492. There is here a well-organized college for the education of students of the Congregational body of dissenters.—Also a parish in Salop, 6 m. E of Shrewsbury, intersected by the Shrewsbury canal. Area 1,135 acres. Pop. in 1851, 266.

WITHINGTON (Lower), a township in the parish of Prestbury, co.-palatine of Chester, 7 m. NNW of Congleton, in the line of the Manchester and Birmingham railway, and near the Macclesfield branch. Area 2,265 acres. Pop. in 1831, 584; in 1851, 570.

WITHINGTON (Old), a township in the p. of Prestbury, co.-palatine of Chester, $7\frac{1}{2}$ m. NNW of Congleton, in the line of the Macclesfield branch of the Manchester and Birmingham railway. Area 1,840 acres. Pop. in 1831, 191; in 1851, 189.

WITHNELL, a township in the p. of Leyland, co.-palatine of Lancaster, 5 m. NE by N of Chorley, near the Liverpool and Leeds canal. Area 3,557 acres. Pop. in 1831, 1,251; in 1851, 1,975.

WITHYBROOK, a parish in Warwickshire, 8 m. NE by E of Coventry, intersected by the Oxford canal. Area 2,520 acres. Pop. in 1851, 834.

WITHYCOMBE, a parish in Somersetshire, $2\frac{1}{2}$ m. SE of Dunster. Area 1,787 acres. Pop. 329.

WITHYCOMBE-RAWLEIGH, a parish in Devon, $2\frac{1}{2}$ m. E of Exmouth, bounded on the west by the navigable river Exe. It contains a portion of the town of Exmouth. Area 2,617 acres. Pop. in 1831, 1,063; in 1851, 1,811.

WITHYHAM, a parish in Sussex, $6\frac{1}{2}$ m. ESE of East Grinstead. Area 8,086 acres. Pop. 1,692.

WITHYPOOLE, a parish in Somersetshire, 7 m. NW of Dulverton. Area 3,630 acres. Pop. 259.

WITIEGITZ, a village of Austria, in Bohemia, in the reg. of Pilsen, bail of Prachatitz. Pop. 610.

WITIM. See *WITIM*.

WITIN, a village of Austria, in Bohemia, in the reg. of Budweis, and bail. of Neuhaus. Pop. 370.

WITINOWES, a village of Austria, in Bohemia, in the reg. and bail. of Gitschin. Pop. 420.

WITKOW, a market-town of Austria, in Galicia, in the circle and 36 m. NNW of Zloczow.

WITKOWITZ, a village of Austria, in Bohemia, in the regency of Gitschin, and bail. of Hohenelbe. Pop. 2,200.

WITKOWKI, a village of Prussia, in the reg. of Posen, and circle of Kosten. Pop. 200.

WITKOWO, a town of Prussia, in the regency of Bromberg, circle and 12 m. SE of Gnesen. Pop. 1,958. It has several Catholic and Lutheran churches, and possesses manufactories of linen and woollen fabrics, and nails, and several tanneries.

WITKOWOWIES, a village of Prussia, in the reg. of Bromberg, and circle of Gnesen. Pop. 230.

WITLEY, a parish in Surrey, $3\frac{1}{2}$ m. S by W of Godalming. Area 6,828 acres. Pop. in 1851, 1,546.

WITLEY (Great), a parish in Worcestershire, 5 m. SW by S of Stourport. It contains the hamlet of Redmarley. Area 2,633 acres. Pop. 408.

WITLEY (Little), a chapelry in the p. of Holt, Worcestershire, $8\frac{1}{2}$ m. NW by N of Worcester. Area 960 acres. Pop. in 1831, 287; in 1851, 206.

WITLINGHAM, or WHITLINGHAM, a parish in Norfolk, 3 m. ESE of Norwich, on the river Yare. Area 542 acres. Pop. in 1831, 45; in 1851, 19.

WITMAARSUM, a parish of Holland, in the prov. of Friesland, bail. of Leeuwarden. Pop. 800.

WITMUND. See *WITTMUND*.

WITNESHAM, a parish in Suffolk, $4\frac{1}{2}$ m. N by E of Ipswich, in the projected line of the Eastern Counties railway. Area 1,906 acres. Pop. 575.

WITNEY, a parish and market-town in the co. of Oxford, 11 m. W by N of Oxford. The parish contains the chapelry of Hailey, and the hamlets of Crawley, Curbridge, and Lew. Area 7,083 acres. Pop. in 1801, of the township, 2,584; of the entire parish, 4,349; in 1831, of the former, 3,190; of the latter, 5,336; in 1851, of the latter, 5,437. The town, which consists principally of two streets, well-built houses arranged with considerable regularity, is situated on the small river Windrush, over which there is here a bridge of 3 arches. The road from London to Cheltenham and Gloucester passes through it. The vicinity abounds in agreeable scenery. The inhabitants are partly employed in the manufacture of gloves and malt, and in various branches of the woollen manufacture. The chief source of employment is the manufacture of blankets, duffels, pilot cloth, waggon tilts, &c., for which W. has long been celebrated. Dr. Plott, an old historian of Oxfordshire, writing in 1675, attributes this celebrity, in part at least, to the detestable qualities of the waters of the Windrush. "The Isis, 'tis true," says he, "till it comes to Newbridge, receives not (that I find) any eminently salt or sulphureous waters; but there it admits the nitrous Windrush, so well impregnated with that absterive salt, that no place yields blanketing so notoriously white as is made at Witney." In the reign of Queen Anne, the blanket weavers in the town, and within 20 miles around it, were incorporated by the style of "The Master, Assistants, Wardens, and Commonalty of the blanket weavers of Witney, in Oxfordshire." At that period, 150 looms and 3,000 persons were constantly employed, and the weekly consumption of wool amounted to about 1,000 packs; but the charter was found to lead to bad consequences, the rules framed by the corporation having retarded the interests of the trade, so that for many years the privilege has not been acted upon. The manufacture is by no means in such a flourishing condition as it once was; but the trade is steady. The average annual number of blanket pieces, including pilot cloth, &c., manufactured, each containing about half a peck of 120 lbs. of wool, is about 10,000. The average value of a piece is £9, but some are double that amount. There is a handsome blanket-hall in the High-street, erected in 1721. In the market-place is a neat town-hall, the lower part of which consists of piazzas for the use of the market.—W. existed long before the Conquest as a town of some importance, under the name of Whit-

ney or Whittney. In the reign of Edward the Confessor the manor was given by Bishop Ailwyn to the monastery of St. Swithin at Winchester, in gratitude for the deliverance of Emma, mother to the king, from the fiery ordeal which she underwent in the cathedral of that city. It was formerly a royal borough, and sent 2 members to parliament.

WIPOSES, a village of Austria, in Bohemia, in the regency of Eger, and bail. of Saatz. Pop. 470.

WITOSLAW, a village of Prussia, in the prov. of Posen, regency of Bromberg, and circle of Wirsitz. Pop. 280.

WITOSLAWITZ, a village of Prussia, in the prov. of Silesia, regency of Oppeln, and circle of Kosel. Pop. 280.

WITOWITZ, a village of Austria, in Moravia, in the circle of Brunn, and seignory of Posoritz. Pop. 300.

WITOWO, a village of Prussia, in the regency of Posen, and circle of Schroda. Pop. 300.

WITKOWITZ, a village of Austria, in Moravia, in the circle of Praelau, and seignory of Hochwald, on the Lubina. Pop. 400.

WITRY, a department and commune of Belgium, in the prov. of Luxembourg, and arrond. of Arlon, watered by the Sure. Pop. 622.

WITRY-LES-REIMS, a commune of France, in the dep. of the Marne, and cant. of Bourgogne, 5 m. NE of Reims. Pop. 1,161.

WITSCHAPP, a village of Austria, in Moravia, in the circle of Znaim. Pop. 490. It has a castle and a brewery.

WITSCHÉ, a village of Austria, in Moravia, in the circle of Olmutz, and bail. of Wallachisch-Moosritsch. Pop. 1,530.

WITSCHÉIN, a village of Austria, in Styria, in the circle of Marburg. Pop. 1,600. It has a castle.

WITSCHIN, a village of Austria, in Bohemia, in the reg. of Eger, and bail. of Tepel. Pop. 400.

WITSCHITZ, a village of Austria, in Moravia, in the circle of Olmutz, and seignory of Moritz. Pop. 400.

WITSEMBERG, a summit of South Africa, in the district of Talbagh, near the valley of Rodezand. It has an alt. of 2,900 Parisian ft. above sea-level.

WITTS (DE) LAND. See AUSTRALIA.

WITTAU, a village of Austria, in the country below the Ens, bail. of Gross Enzersdorf. Pop. 400.

WITTBACH, a village of Bavaria, in the circle of Lower Bavaria, and presidial of Kreuzwertheim. Pop. 330.

WITTBRIETZEN, a village of Prussia, in the regency of Potsdam, and circle of Zauch-Belzig, near Belitz. Pop. 488.

WITTEKIND. See SIEBICHENSTEIN.

WITTELBACH, a village of Baden, in the circle of the Lower Rhine, and bail. of Lahr. Pop. 220.

WITTELSBACH (OBER and UNTER), two villages of Bavaria, in the circle of Upper Bavaria, and presidial of Aichach, 17 m. NE of Augsburg, on a mountain, containing respectively 90 and 185 inhabitants. In the vicinity are the ruins of the castle of Wittelsbach, the cradle of the royal house of Bavaria.

WITTELSBURG, a village of Hesse, in the prov. of Upper Hesse, circle and presidial of Marburg. Pop. 538.

WITTELSHEIM, or WETTESEN, a commune of France, in the dep. of the Haut-Rhin, and cant. of Cernay, 27 m. NE of Belfort. Pop. in 1841, 1,565.

WITTELSHOFEN, a village of Bavaria, in the circle of Middle Franconia, and presidial of Dinkelsbühl. Pop. 646, of whom 200 are Jews. It has a synagogue.

WITTEM, a commune of Belgium, in the prov.

of Limburg, and arrond. of Maastricht. Pop. 3,007. It has a paper-mill.

WITTEN, a town of Prussia, in the regency of Arnberg, and circle of Bochum, on the Ruhr. Pop. 2,480. It has manufactories of silk and woollen fabrics, iron and steel ware, and several oil and paper-mills. The trade consists chiefly in corn. In the vicinity is a coal-mine.

WITTENBACH, a village of Switzerland, in the cant. of St. Gall, and bail. of Tablat. Pop. 1,301.

WITTENBERG, a circle and town of Prussia, in the prov. of Saxony, and regency of Merseburg. Pop. of circle, 48,181. The town is 48 m. NE of Merseburg, on the r. bank of the Elbe, which is here crossed by a long wooden bridge, and at an alt. of 229 ft., above sea-level, in N lat. 51° 52' 13", and E long. 12° 45' 29". Pop. in 1831, 7,084; in 1841, 8,241; in 1849, 11,052. It is fortified, and has two suburbs, a fortress, and five churches, in one of which belonging to the castle are the tombs of Luther and Melancthon. It has also a colossal statue of Luther, an orphans' asylum, a theological seminary, and gymnasium. The ancient university was joined to that of Halle in 1816. Its industry consists chiefly in the manufacture of woollen and linen fabrics, and distillation of brandy. Wood forms one of its chief articles of trade.

WITTENBERGE, a town of Prussia, in the prov. of Brandenburg, regency and 84 m. NW of Potsdam, and circle of West Priegnitz, at the confluence of the Stepnitz. Pop. 2,780. The manufacture of earthenware, fishing, and navigation form the chief objects of local industry.

WITTENBURG, a village of Hanover, in the principality and bail. of Kalenberg, near Hanover. Pop. 138.—Also a town and bail. of the grand-duchy of Mecklenburg-Schwerin, district and 17 m. SW of Schwerin. Pop. 1,760. It has distilleries of brandy, breweries, dye-works, tanneries, manufactories of linen, tobacco, pipes, and nails, and a tin-foundry.

WITTENDORF, a village of Württemberg, in the circle of the Schwarzwald, and bail. of Freudenstadt. Pop. 536.

WITTENFELDE, a village of Prussia, in the regency of Stettin, and circle of Naugard. Pop. 220.

WITTENFORDEN, a village of Mecklenburg-Schwerin, in the prov. of Mecklenburg, and bail. of Schwerin. Pop. 630.

WITTENHAGEN, a village of Prussia, in the reg. of Stralsund, and circle of Grimmen. Pop. 270.

WITTENHAM (LITTLE), a parish in Berks, 4 m. NW by N of Wallingford, south of the Thames. Area 870 acres. Pop. in 1831, 113; in 1851, 128.

WITTENHAM (LONG), a parish in Berks, 5 m. NW of Wallingford. Area 2,280 acres. Pop. 608.

WITTENHEIM, or WETTENEU, a commune of France, in the dep. of the Haut-Rhin, and cant. of Mulhausen, 15 m. NNE of Altkirch. Pop. 1,260.

WITTENMOOR, a village of Prussia, in the reg. of Magdeburg, and circle of Slendal. Pop. 270.

WITTEN-SEE, a lake of Denmark, in the duchy of Sleswig, and bail. of Heitten, 6 m. NE of Rendsburg. It is upwards of a mile in length from NE to SW, and 1½ m. in breadth. It discharges itself in the S into the Eyder.

WITTENWEIER, a village of Baden, in the circle of the Middle Rhine, bail. of Lahr. Pop. 620.

WITTENWEIL, a village of Switzerland, in the cant. of Thurgau, and bail. of Frauenfeld. Pop. 411.

WITTER, a parish, consisting of a main body and a detached district, in co. Down. The main body lies at the extremity of the Ardes peninsula, 2 m. SE of Portaferry. Area of the whole 2,529 acres. Pop. in 1831, 1,116; in 1841, 1,053.

WITTICHENAU, a village of Prussia, in the regency of Erfurt. Pop. 781.

WITTERING, or WHITTERING, a parish in Northamptonshire, 2½ m. NW by N of Wansford. Area 2,690 acres. Pop. in 1831, 216; in 1851, 262.

WITTERING (EAST), a parish in Sussex, 6 m. SW of Chichester. Area 1,505 acres. Pop. 233.

WITTERING (WEST), a parish in Sussex, 7½ m. SW by W of Chichester. The English Channel bounds the parish on the SW, and the mouth of Chichester harbour lies on the NW side. Area 3,615 acres. Pop. in 1831, 606; in 1851, 609.

WITTERSCHLICK, a village of Prussia, in the regency of Cologne, and circle of Bonn. Pop. 384.

WITTERSEE, a village of Belgium, in the prov. of Brabant, and arrond. of Nivelles. Pop. 958.

WITTERSHAM, or WITTESHAM, a parish in Kent, 4½ m. S by E of Tenterden. Area 3,601 acres. Pop. in 1831, 919; in 1851, 987.

WITTERSHAUSEN, a village of Bavaria, in the circle of Lower Franconia, and presidial of Guedorf. Pop. 329.—Also a village of Würtemberg, in the circle of the Schwarzwald, bail. of Sulz. Pop. 654.

in the circle of Igau, and seignory of Bistritz.
Pop. 290.

WITTON, a parochial chapelry, locally in the p.
of Great Budworth, co.-palatine of Chester, $\frac{1}{2}$ m. E of
Northwich, containing the township of Twambrooke
and part of that of Radheath. The village, which
forms a suburb to the town of Northwich, stands on
an elevated spot near the banks of the river Dane.
Area 588 acres. Pop. in 1831, 2,912; in 1851, 3,493.
Also a parish in Huntingdonshire, $2\frac{1}{2}$ m. W by N
of St. Ives, bounded on the N by the river Ouse.
Area 1,690 acres. Pop. in 1831, 277; in 1851,
207.—Also a township in the parish of Black-
burn, co.-palatine of Lancaster, 2 m. N by W of
Blackburn, on the river Derwent. Area 650 acres.
Pop. in 1831, 1,047; in 1851, 1,367. The inhabi-
tants are chiefly employed in some cotton-spinning
manufactories.—Also a parish in Norfolk, $\frac{3}{4}$ m. E of
Norwich. Area 1,746 acres. Pop. in 1851, 299.

WITTON (EAST), a parish in the N. R. of Yorkshire,
2 m. SE of Middleham. Area 7,720 acres. Pop. in
1831, 687; in 1851, 610. In this parish are the re-
mains of Jerveaux abbey. The late earl of Aylesbury
caused the whole to be explored and cleared out in
1805 and 1807; when the abbey, church, and choir,
with the transepts and high altar, several tombs, the
chapter house, abbot's house, kitchen, &c., were dis-
covered.

Marienwerder, and circle of Flatow. Pop. 220.

WITT-WATER'S RAANDT, a high tract or
land in S. Africa, on the N side of the Vaal river, run-
ning parallel to the Magalie's Berg, and giving rise
to the Oori or Krokodil river, the main source of the
Limpopo.

WITTWEIL, a village of Switzerland, in the
cant. of Argau, and circle of Zofingen. Pop. 526.

WITUCHOWO, a village of Prussia, in the re-
gency of Posen, and circle of Birnbaum. Pop. 200.

WITZELRODA, a village of Saxe-Meiningen, in
the bail. of Salzungen. Pop. 230.

WITZEN, a village of Prussia, in the regency of
Frankfurt, and circle of Sorau. Pop. 270.

WITZENHAUSEN, a town of Hesse-Cassel, ca-
pital of the circle and bail. of the same name, in the
prov. of Nieder-Hesse, on the l. bank of, and at the
confluence of the Gelster with the Werra, which is
here crossed by a bridge, and 14 m. E of Cassel. It is
enclosed by walls, with three gates, and has a syna-
gogue, an hospital, and a school. Pop. 3,235. It
has several dye-works, manufactories of linen, to-
bacco, and vinegar, a paper-mill and tanneries, and
possesses an active trade. The environs are noted
for their beans, fruit, wine, and tobacco.—The circle
comprises an area of 38,300 hect., of which 10,159
hect. are arable. Pop. in 1840, 32,828. It is gene-
rally mountainous, and contains valleys of great
fertility, especially in grain, legumes, cherries, and
other fruit. Salt, alum, coal, and potter's clay, are
its chief mineral productions. It is divided into four
bailiwicks, and contains 5 towns, and 54 villages.

WITZENITZ, a village of Austria, in Moravia,
in the circle of Brünn, near Znaim. Pop. 300.

WITZETZE, a village of Denmark, in the prov.
of Lauenburg. Pop. 270.

of Trottaw, to the E of Hamburg. Pop. 307.

WITZHELDEN, a village of Prussia, in the re-
gency of Düsseldorf, and circle of Solingen. Pop. 220.

WITZIN, a village of Mecklenburg-Schwerin,
in the prov. of Mecklenburg, and bail. of Sternberg.
Pop. 390.

WITZISCHKEN, a village of Prussia, in the re-
gency of Gumbinnen, circle of Niederung. Pop. 338.

WITZKE, a village of Prussia, in the regency of
Potsdam, and circle of Westhavelland. Pop. 200.

WITZLESHOVEN, a village of Bavaria, in the
circle of Ober-Franconia, and presidial of Berneck.
Pop. 200.

WITZNITZ, a village of Prussia, in the regency
of Stettin, and circle of Regenwalde. Pop. 388.

WITZOMIELITZ, a village of Austria, in Mo-
ravia, in the circle of Brünn. Pop. 490. It has a
brewery.

WITZOMIERITZ, a village of Austria, in Mo-
ravia, circle of Olmutz. Pop. 380. It has a castle.

WITZSCHDORF, a village of Saxony, in the
circle of Zwickau, bail. of Angustusburg. Pop. 775.

WITZSCHERSDORF, a village of Prussia, in the
regency and circle of Merseburg. Pop. 200.

WIVELISCOMBE, a parish and market-town,
situated, with three other parishes, in a detached
portion of the hund. of Kingbury, co. of Somerset,
28 m. W of Somerton. Area of p. 5,984 acres. Pop.
in 1801, 2,571; in 1831, 3,047; in 1851, 2,861.
The town is situated on a low hill, in the midst of
a valley of some extent, bounded by lofty hills in-
terrupted by numerous ravines. It consists of seve-

as well as a number which bear the stamp of considerable antiquity. One part of the town is called the borough, and at an early period the inhabitants sent members to parliament, but were relieved from that burden at their own request. The inhabitants are employed to a considerable extent in blanket-weaving and other branches of the woollen manufacture.

WIVELSFIELD, a parish in Sussex, 4 m. SE of Cuckfield, in the line of the London and Brighton railway. Pop. in 1831, 559; in 1851, 608.

WIVENHOE, a parish in Essex, 4½ m. SE by E of Colchester, on the river Colne. Area 1,597 acres. Pop. in 1831, 1,714; in 1851, 1,672. This is regarded as the port to Colchester. A plan was recently formed for the construction of a ship canal hence to the Hythe, at an estimated expense of £56,000. The quay is very commodious, and vast numbers of the celebrated Colchester oysters are shipped hence for London and other markets. There is a custom-house subordinate to Colchester.

WIVETON, a parish in Norfolk, ½ m. W of Clay. Area 1,042 acres. Pop. in 1831, 218; in 1851, 245.

WIX, or **WEEKS**, a parish in Essex, 4½ m. ESE of Manningtree. Area 3,090 acres. Pop. in 1851, 778.

WIXFORD, or **WICKLESFORD**, a parish in Warwickshire, 2 m. S of Alcester. Area 530 acres. Pop. in 1831, 108; in 1851, 117.

WIXHAUSEN, a village of Hesse, in the prov. of Starkenburg, and presidial of Langen. Pop. 560.

WIXWEN, a village of Prussia, in the regency of Gumbinnen, and circle of Niederung. Pop. 220.

WOLTRUP, a village of Hanover, in the principality of Osnabruck, and bail. of Bersenbruck, near Aum. Pop. 334.

WOLTUSCH, a village of Austria, in Bohemia, in the reg. of Pilsen, and bail. of Brzeznitz. Pop. 320.

WOLTWIESCHE, a village of Brunswick, in the circle of Wolfenbüttel. Pop. 620.

WOLUWE-SAINT-ETIENNE, a department, commune, and town of Belgium, in the prov. of Brabant, and arrond. of Brussels. The town is 5 m. ENE of Brussels, on the Woluwe. Pop. 795. It has a paper-mill.

WOLUWE-SAINT-LAMBERT, a department and commune of Belgium, in the prov. of Brabant, and arrond. of Brussels. Pop. of dep. 1,070. The village is 2 m. SSW of Woluwe-Saint-Etienne, on the Woluwe. Pop. 382.

WOLUWE-SAINT-PIERRE, a department and commune of Belgium, in the prov. of Brabant, and arrond. of Brussels. Pop. of dep. 1,130. The village is 2 m. SSW of Woluwe-Saint-Etienne, on the Woluwe. Pop. 591.

WOLVELINGEN, a village of Holland, in the prov. of Luxemburg, and bail. of Diekirch. Pop. 200.

WOLVERCOTE, or **WOOLVERCOTT**, a parish in Oxfordshire, 3 m. NNW of Oxford, intersected by the river Isis and the Oxford canal. Area 1,600 acres. Pop. in 1831, 524; in 1851, 631.

WOLVERHAMPTON, a parish, borough, and market-town, in the co. of Stafford. The parish, comprising the chapelries of Pelsall, Wednesfield, and Willenhall, the market-towns of Bilston and Wolverhampton, and the townships of Featherstone, Hatherton, Hilton, and Kirwaston, has an area of 16,680 acres. The parish is intersected by, or in immediate communication with, the Birmingham, the Wyrley and Essington, the Stafford and Birmingham, and the Birmingham and Liverpool canals, the Grand Junction section of the Great North-Western, and the Shrewsbury and Birmingham railways. Pop. in 1801, 24,536; in 1851, 48,080; in 1851, 92,287.—W. was enfranchised under the Reform act, and now returns 2 members to parliament. The borough boundaries comprehend the townships of Wolverhampton, Bilston, Willenhall, and Wednesfield, and the parish

of Sedgley. Pop. of parl. borough in 1851, 49,985. The number of electors registered for the borough in 1837, was 2,170, in 1852, 2,600. The town consists of several streets diverging from a centre, in which stands the market-place. It is lighted with gas, paved, and supplied with water chiefly from numerous wells sunk to a great depth through the solid rock on which the town is built. The church of St. Peter's is a stately and venerable cruciform structure, consisting of a lofty nave, two side aisles, and a chancel, with a very fine embattled and richly ornamented Gothic central tower, 120 ft. in height. The old town-hall was the place in which Mrs. Siddons and John Philip Kemble first developed their extraordinary histrionic talents. The public subscription library is a handsome building, containing a news-room, and assembly and concert-rooms. In August, races are annually held on a fine course near the town. W. has been long celebrated for its lock and key smiths; and the inhabitants were formerly much employed in the manufacture of the finer kinds of steel ornaments, but this latter branch of trade has declined, or been transferred to other places. Wares of brass and tin, japanned wares, and papier-mache articles, locks, files, nails, gun-locks, screws, machinery of every kind, and ironmongery articles in general, are largely made. The smelting of iron, and the making of boiler-plates and iron-castings, are now a principal portion of the manufactures of the place. Here are also chemical works of some extent; and there are two mills for spinning worsted, and a variety of other manufacturing establishments. The situation of W., nearly in the centre of England, in the midst of exhaustless mines of coal and ironstone, and in communication with some of the most important lines of road, canal, and railway, in the kingdom, is one highly advantageous to its commercial advancement.

WOLVERLEY, a parish in Worcestershire, 2 m. NW of Kidderminster, intersected by the river Stour, and the Stafford and Worcester canal. It contains the hamlets of Blakesall, Caunsall, Cookley, Hanstoley, Horseley, Kingsford, Low, Sion-hill, Wolverley, and Little Wolverley. Area 5,532 acres. Pop. 2,441.

WOLVERTHEM, a department, commune, and town of Belgium, in the prov. of Brabant, and arrond. of Brussels. Pop. of dep. 3,221. The town is 8 m. NNW of Brussels. Pop. 1,230.

WOLVERTON, or **WOOLVINGTON**, a parish in the co. of Buckingham, 1 m. ENE of Stony-Stratford, in the line of the Grand Junction canal, and the London and Birmingham section of the Great North-Western railway, on the latter of which the railway company have here their central station, depôt, and factory, distant 52½ m. from London, and 59½ from Birmingham. A 'railway church,' the first of its kind, for the religious instruction of those employed by the railway company, was recently erected here, near the station. The railway directors have also established a 'railway school,' with an infant school, in addition to a reading-room and library for the artificers and others employed by the company, whose magnificent establishment here comprises a new town, with a market-place, streets, factories, &c. Area 2,260 acres. Pop. in 1851, 2,070.

WOLVERTON, or **WOLFEATON**, a parish in Norfolk, 3 m. N of Castle-Rising, on the coast of the Wash. Area 5,634 acres. Pop. in 1851, 165.

WOLVERTON, or **WOOLVERTON**, a parish in the co. of Somerset, 4½ m. N by E of Frome, on the river Frome. Area 736 acres. Pop. in 1851, 174.

WOLVERTON, or **WOLVERDINGTON**, a parish in the co. of Warwick, 5½ m. WSW of Warwick. Area 1,320 acres. Pop. in 1831, 166; in 1851, 174.

WOLVEY, a parish in the co. of Warwick, 5 m SE of Nuneaton, at the source of the river Anker. Area 3,790 acres. Pop. in 1831, 985; in 1851, 963.

WOLVISTON, a chapelry in the p. of Billingham, co-palatine of Durham, 4½ m. N by E of Stockton-upon-Tees, in the line of the Clarence and Hartlepool railway. Area 2,396 acres. Pop. 750.

WOLWARK, a village of Prussia, in the prov. of Posen, regency of Posen, and circle of Schubin. Pop. 240.

WOLKHEIM, or **WOLIKEN**, a commune of France, in the dep. of the Bas-Rhin, and cant. of Molsheim. Pop. 1,140. It is noted for its wine.

WOLZ (Gaoes), a village of Prussia, in the regency of Marienwerder, and circle of Graudenz. Pop. 488.

WOLZ (Osee), a town of Austria, in Styria, in the gov. of Gratz, circle and 20 m. W of Judenburg, on the Wolzbach, at the confluence of the Schoderbach. Pop. 585. It has an old castle, and possesses several iron and steel works, and a saltpetre refinery.

WOLZHAUSEN, a village of Hesse, in the circle of Ober-Hesse, and presidial of Bredenköpft. Pop. 310.

WOMBA, a town of Africa, in Sudan, in the Fel-latah territory, and prov. of Guri, to the SSE of Sak-katu. It is surrounded by an earthen wall, and has a daily well-frequented market. The surrounding country is well-cultivated, and produces a good deal of rice. It is at present the residence of an independent sultan.

WOMBACH, or **WOEMBACH**, a village of Bavaria, in the circle of Lower Franconia, and presidial of Lohr. Pop. 834.

WOMBLETON, or **WIMBLETON**, a township in the p. of Kirkdale, N. R. of Yorkshire, 5 m. E by S of Helmsley. Area 1,040 acres. Pop. in 1851, 335.

WOMBELLORE, or **OMALORE**, a town of Hindostan, in the presidency of Madras, district and 9 m. NNW of Salem, on an affluent of the Cavery.

WOMBO, a mountain of New South Wales, in the co. of Hunter, between the river of that name and a small stream named Wollombe.

WOMBOURNE, a parish in the co. of Stafford, 4 m. SW by W of Wolverhampton, intersected by the Stafford and Worcester canal. Area 4,680 acres. Pop. in 1831, 1,647; in 1851, 2,007.

WOMBRIDGE, a parish in the co. of Salop, 2 m. E of Wellington, at the junction of the Shrewsbury, Shropshire, and Marquis of Stafford's canals; and intersected by the ancient Watling-street, the Holyhead parliamentary road, and various railways connected with extensive coal-mines and iron-works in the vicinity, particularly at Ketley. Area 698 acres. Pop. in 1831, 1,855; in 1851, 2,166.

WOMBRZEZNO. See **BRZEN**.

WOMBWELL, a chapelry in the p. of Darfield, W. R. of Yorkshire, 5 m. SE by E of Barnesley, in the line of the Dearn and Dove canal, and the North Midland railway. Area 5,557 acres. Pop. 1,627.

WOMELSDORF, a town of Berks co., in the state of Pennsylvania, U. S., on the S side of Tulpe-hocken creek, and 36 m. E by N of Harrisburg. Pop. in 1840, 849; in 1850, 950. Its inhabitants are chiefly of German origin.

WOMENSWOLD, or **WIMLINGSWOLD**, a parish of Kent, 5 m. SW of Wingham. Area 1,010 acres. Pop. in 1831, 263; in 1851, 256.

WOMERSLEY, a parish in the W. R. of Yorkshire, 5½ m. ESE of Pontefract, containing the townships of Cridling-Stubbs, Little Smeaton, Walden-Stubbs, and W. Area 7,780 acres. Pop. in 1851, 998.

WOMITZ, a village of Austria, in Moravia, in the circle of Brunn, and seignory of Rossitz. Pop. 310. It has two flour-mills.

WOMMELGEN, a department and commune of Belgium, in the prov. and arrond. of Antwerp, watered by the Schyn. Pop. of dep. 1,800; and of com. 750.

WOMMELSHAUSEN, a village of Hesse, in the prov. of Upper Hesse, circle of Biedenkopf, and presidial of Gladenbach. Pop. 230.

WOMMEN, a village of Hesse, in the prov. of Lower Hesse, and circle of Eschwege. Pop. 333.

WOMMERSOM, a department and commune of Belgium, in the prov. of Brabant, and arrond. of Louvain, watered by the Ghète. Pop. of dep. 562; and of com. 429.

WOMPIERSK, a village of Prussia, in the regency of Marienwerder, and circle of Strasburg. Pop. 250.

WOMRATH, a village of Prussia, in the regency of Coblenz, and circle of Simmern. Pop. 350.

WOMWELNO, a village of Prussia, in the prov. of Posen, regency of Bromberg, and circle of Wirzitz. Pop. 320.

WOMZO, a village of Central Africa, in Sudan, SSW of Womba.

WONASQUATUCKET, a river of Providence co., in the state of Rhode Island, U. S., which flows SE into Providence lake.

WONASTOW, or **WONASTON**, a parish in Monmouthshire, 2 m. WSW of Monmouth, on the river Trothy. Area 1,599 acres. Pop. in 1851, 141.

WONCK, a department and commune of Belgium, in the prov. of Limburg, and arrond. of Tongres, watered by the Jaer. Pop. of dep. 1,480. The village is 8 m. E of Tongres, on the Jaer.

WONDA, a river of Senegambia, in the kingdom of Fuladu, which, after a course of about 150 m., joins the Kokoro, on the l. bank, 24 m. W of Keminnoum. It receives the Comersay on the l.—Also a walled town of the state of Manding, 45 m. ENE of Kamalia.

WONDELGEM, a department and commune of Belgium, in the prov. of E. Flanders, and arrond. of Ghent. The dep. is intersected by the Canal-du-Sas. Pop. 1,181. The village is 2 m. N of Ghent, on the above-named canal. Pop. with Kerkdriesch, 409.

WONDOLÉK, a village of Prussia, in the regency of Gumbinnen, circle and S of Johannisburg. It has extensive iron-works.

WONDREB, a bail. and village of Bavaria, in the circle of the Upper Pfalz, and presidial of Tirschenreuth. Pop. 333. It has iron-works and manufactories of porcelain.

WONERSH, or **OGNERSH**, a parish in Surrey, 3½ m. SSE of Guildford, in the line of the Arun and Wey canal. Ironstone is abundant, and is worked to some extent in this vicinity. Area 4,427 acres. Pop. in 1831, 1,069; in 1851, 1,280.

WONFURT, or **WOHNFURT**, a village of Bavaria, in the prov. of Lower Franconia, and presidial of Hassfurt. Pop. 632.

WONGAN, a range of hills in Western Australia, in the co. of Glenelg.

WONGROWITZ, or **WONGROWIC**, a circle and town of Prussia, in the prov. of Posen, and regency of Bromberg. The circle comprises an area of 24½ German sq. m. Pop. 46,519.—The town is 60 m. SW of Bromberg, on the Wilna, at the extremity of a small lake. Pop. 2,849. It has a Cistercian convent, a synagogue, and a good market.

WONISCHEN, a village of Austria, in Bohemia, in the regency of Pilsen, and bail. of Bischofteinitz. Pop. 870. It has extensive bleacheries.

WONNERUP, a town of Western Australia, in the co. of Sussex, on Vasse Inlet, Bay-du-Geographe.

WONNIBERG, a village of Prussia, in the re-

gency of Königsberg, and circle of Rößel. Pop. 240.—Also a village of the regency and circle of Danzig. Pop. 495.

WONNO, a village of Prussia, in the regency of Marienwerder, and circle of Lobau. Pop. 350.

WONOMISCHEL, a village of Prussia, in the regency of Pardubitz, and bail. of Neukolin. Pop. 270.

WONSCHOW, a village of Austria, in Bohemia, in the regency of Pardubitz, and bail. of Ledetsch. Pop. 600. It has a castle, and possesses manufactories of potash and several mills.

WONSCHOWITZ, a village of Austria, in Bohemia, in the regency of Pilsen, and bail. of Winterberg. Pop. 325.

WONSÉES, or **WONNÉES**, a market-town of Bavaria, in the circle of Upper Franconia, and presidial of Hollfeld, 17 m. W of Bayreuth, on the Kainach, near the castle of Sanspareil. Pop. 1,700. It has manufactories of woollen and linen fabrics.

WONSHEIM, a village of Hesse, in the prov. of Rhine-Hesse, and circle of Bingen. Pop. 680.

WONSOSZ, a town of Russia in Europe, in Poland, in the gov. of Augustowo. Pop. 1,255.

WONSOWO, a village of Prussia, in the regency of Posen, and circle of Buk. Pop. 458.

WONSTON, a parish in the co. of Southampton, 6 m. S of Whitechurch. Area 4,160 acres. Pop. 716.

WONTERGEM, a department and commune of Belgium, in the prov. of E. Flanders and arrond. of Ghent. Pop. of dep. 1,067.

WONVOLNICA, a town of Russia in Europe, in Poland, in the gov. of Lublin. Pop. 1,150.

WOBBURN. See **WOBURN**.

WOOD, a county in the NW part of the state of Virginia, U. S., comprising an area of 476 sq. m., drained by Little Kanawha river and its branches, and intersected by the North-Western railway. The surface is hilly, but generally fertile. Pop. in 1840, 7,923; in 1850, 9,450. Its capital is Parkersburg.—Also a county in the NW part of the state of Ohio, comprising an area of 612 sq. m., drained by Portage river and its branches, and by branches of Maumee river, and intersected by the Toledo and Port Wayne railroad, and the Wabash and Erie canal. It has a diversified surface, and is in some parts fertile. Pop. in 1840, 5,357; in 1850, 9,157. Its capital is Perrysburg.—Also a county in the NE of the state of Texas, comprising an area of 1,046 sq. m., drained by Sabine river and its branches. It has a finely undulating surface, and is very fertile. Its capital is Quitman.—Also a creek of Oneida co., in the state of New York, which has its source in Rome, and falls into Oneida lake. It now forms a part of Oneida Lake canal.—Also a creek of Washington co., in the same state, an affluent of Lake Champlain, and forming for some distance a part of the canal of that name.

WOOD, or **WOODVILLE**, a member of the port and liberty of Dover, locally situated in the isle of Thanet, co. of Kent, 8 m. SW by W of Margate. Pop. in 1831, 292; in 1851, 254.

WOOD-BASTWICK, a parish in Norfolk, 5 m. NW of Acle. Area 2,163 acres. Pop. in 1851, 293.

WOODBINE, a village of Carroll co., in the state of Maryland, U. S., on the Baltimore and Ohio railroad, and 50 m. NW of Annapolis.

WOODBOROUGH, a parish in Nottinghamshire, 7½ m. NE by N of Nottingham, intersected by the Doverbeck. Area 1,940 acres. The inhabitants are chiefly employed in the stocking manufacture on the loom or frame invented in 1528, by William Low, a mechanic of the village of Woodborough. Pop. 852.

WOODBOROUGH, a parish in Wilts, 3½ m. W of Pewsey, intersected by the Kennet and Avon canal. Area 1,015 acres. Pop. in 1851, 424.

WOODBIDGE, a parish and market-town in Suffolk, $7\frac{1}{2}$ m. ENE of Ipswich, on the NW bank of the navigable river Deben. Area of the p. 1,059 acres. Pop. in 1831, 4,769; in 1851, 5,161. The church is a spacious edifice of black flint and freestone. There are two independent chapels, and places of worship for Baptists, Wesleyan Methodists, and the Society of Friends. The town consists of two principal streets, with a number of lanes, and a spacious square. The eminence on which it stands is surrounded by pleasant walks, and the situation is remarkably healthy. The divisional county prison, or house-of-correction, stands on an elevated spot at the extremity of the town. The mouth of the river forms an excellent haven, and is navigable as far as the town for vessels of 120 tons. There are bonded warehouses for wine and spirits, wood and corn; two quays, one for general commerce, the other for the accommodation of vessels loaded with lime; and two small docks. Vessels of war of small magnitude, and coasting-craft are occasionally built here. A regular trade is conducted with London, Newcastle, Hull, Liverpool, the continent of Europe, and the Baltic. The principal articles of import are coal, timber, wine, spirits, porter, salt, grocery, drapery, and iron-ware. The exports consist chiefly of corn, flour, and malt.

WOODBIDGE, a township of Middlesex co., in the state of New Jersey, U. S., 33 m. NE of Trenton, and on the New Jersey railroad. Pop. in 1840, 4,821; in 1850, 5,141. It contains several flourishing villages.—Also a township of Hillsdale co., in the state of Michigan. Pop. in 1840, 226.

WOODBURN, a manufacturing locality in co. Antrim, on the Woodburn rivulet, and on the road from Carrickfergus to Ballinure, 2 m. NW of Carrickfergus. Extensive calico print-works at this place, during a number of years preceding 1823, afforded employment to about 80 or 100 persons, and annually bleached and printed about 15,000 pieces of calicoes, shawls, and muslins. The cotton factories of W., though distant 2 miles from Carrickfergus, are usually ranked among the manufactures of that town. See article **CARRICKFERGUS**.

WOODBURY, a parish, formerly a market-town, in the co. of Devon, 3 m. E by S of Topsham, on the navigable river Exe. It contains the hamlets of Ebford, Exton, Grindle, Gulliford, Higher Nutwell, Salterton, and Woodmanton. Area 7,804 acres. Pop. in 1831, 1,673; in 1851, 2,014.

WOODBURY, a township and village of Litchfield co., in the state of Connecticut, U. S., 31 m. WSW of Hartford, drained by Pomperang river and its branches. Pop. of township, 2,150. The village is near the junction of the head streams of the Pomperang river.—Also a township of Huntingdon co., in the state of Pennsylvania. Pop. 2,102.—Also a township of Bedford co., in the same state, 113 m. W of Harrisburg, drained by Yellow creek and its branches, and by the Frankstown branch of the Juniata. Pop. in 1840, 3,944; in 1850, 4,000.—Also a village of Oyster Bay township, Queen's co., in the state of New York.—Also a village of Gloucester co., in the state of New Jersey, 33 m. SW by S of Trenton, and watered on the N by a creek of the same name, an affluent of the Delaware. Pop. in 1840, 800; in 1850, 900.—Also a village of Cannon co., in the state of Tennessee, 42 m. SE by E of Nashville. Pop. in 1840, 150; in 1850, 200.—Also a township and village of Washington co., in the state of Vermont, 17 m. NE by N of Montpelier, watered by numerous ponds, and by branches of Lamotte and Onion rivers. Pop. in 1850, 1,070.

WOODCHESTER, a parish in Gloucestershire, $2\frac{1}{2}$ m. SW of Stroud. Area 1,203 acres. Pop. in

1831, 885; in 1851, 898.—Also a parish and township in the co.-palatine of Chester, $3\frac{1}{2}$ m. N by W of Great Neston. The parish contains the townships of Arrow, Barnston, Irby, Landican, Noctorum, Oxton, Pensby, Prenton, Thingwell, and W. Area 5,792 acres. Pop. in 1801, 725; in 1831, 929; in 1851, 2,927.—Also a parish in Kent, 5 m. E of Tenterden. Area 6,948 acres. Pop. in 1831, 1,887; in 1851, 1,286.

WOODCOCK, a township of Crawford co., in the state of Pennsylvania, U. S., 187 m. NW by W of Harrisburg, drained by Woodcock creek. Pop. in 1840, 1,921; in 1850, 2,000.—Also a valley of Hopewell township, Huntingdon co., in the state of Pennsylvania, between Allegripus and Tussey's mountains.

WOODCOTE, or **WOODCUT**, a parish in the co. of Southampton, 5 m. NNW of Whitechurch. Area 1,350 acres. Pop. in 1831, 90; in 1851, 100.—Also a chapel in the p. of South Stoke, Oxfordshire, $5\frac{1}{2}$ m. SSE of Wallingford, on the Thames.—Also a township in the p. of Sheriff-Hales, co. of Salop, 8 m. SE by S of Newport. Area 1,248 acres. Pop. in 1831, 195; in 1851, 166.

WOOD-DALLING, a parish in Norfolk, 3 m. N by W of Reepham. Area 2,444 acres. Pop. 574.

WOOD-EATON, a parish in the co. of Oxford, 4 m. NNE of Oxford, on the river Cherwell. Area 689 acres. Pop. in 1831, 86; in 1851, 89.

WOOD-EATON. See **CHURCH-EATON**.

WOODEN-BRIDGE, a retreat of tourists at the confluence of the Ovoca and the Aughrim or Second Meeting of the Waters, $3\frac{1}{2}$ m. NW of the town of Arklow, in co. Wicklow.

WOODFORD, a township in the p. of Prestbury, co.-palatine of Chester, 5 m. S by W of Stockport, near the Manchester and Birmingham railway, and its Macclesfield branch. Area 1,449 acres. Pop. in 1831, 403; in 1851, 430.

WOODFORD, a parish in the co. of Northampton, $7\frac{1}{2}$ m. SSW of Daventry. Area with Membria, 2,655 acres. Pop. in 1831, 827; in 1851, 800.—Also a parish in the co. of Northampton, $2\frac{1}{2}$ m. SW by W of Thrapston, on the river Nen. Area 1,750 acres. Pop. in 1831, 639; in 1851, 726.—Also a parish in Wilts, $4\frac{1}{2}$ m. NNW of Salisbury, on the river Avon. Area 2,780 acres. Pop. in 1851, 496.

WOODFORD, a small river of Ireland, which rises among the SE declivities of the Slieve-an-Ierin mountains, in co. Leitrim, and flows about 17 m. eastward, past Ballinamore, through Lough Garadice, across the NW wing of co. Cavan, and along the boundary between co. Cavan and co. Fermanagh, to the head of the W side of Upper Lough Erne.—Also a rivulet of the p. of Ballinakill, co. Galway, which rises among the Slieve-Baughta mountains, on the S verge of the co., and runs about 4 m. ENE to the village of Woodford, and about the same distance ESE to the head of a small bay of Lough Derg.—Also a village in the p. of Ballinakill, co. Galway, on the Woodford rivulet, 8 m. SW by W of Portumna. The portion of the vale and screens of the Woodford rivulet which immediately adjoins it, is largely enriched with wood; and the country lying immediately to the west and the south climbs speedily into the acclivities, and toward the summits, of the Slieve-Baughta mountains. Pop. in 1841, 396.

WOODFORD, an island of New South Wales, in the river Clarence and district of that name.

WOODFORD, a central county of the state of Kentucky, U. S., comprising an area of 141 sq. m., drained by branches of Kentucky river, by which it is bounded on the W, and intersected by the Lexington and Frankfort railway. Pop. in 1840, 11,740;

in 1850, 12,423. Its capital is Versailles.—Also a central co. of the state of Illinois, comprising an area of 532 m., drained by the Mackinac and other branches of the Illinois, by which it is bounded on the W, and intersected by the Central Illinois railroad. Pop. in 1850, 4,416. Its capital is Metamora.—Also a township of Bennington co., in the state of Vermont, 103 m. SSW of Montpelier, on the Green Mountain range, and watered by several streams. Pop. in 1840, 487; in 1850, 425.—Also a village of Cumberland co., in the state of Maine, on the York and Cumberland railway, 2 m. W of Portland.

WOODFORD (Cape), a headland of Albemarle island, Gallipagos islands, South Pacific, on the SE coast, in N lat. 0° 56', and W long. 90° 52'.

WOODFORD-ST.-MARY, a parish in Essex, 8½ m. NE of St. Paul's, London, near the river Roding. Area 2,148 acres. Pop. in 1831, 2,548; in 1851, 2,774. The village, which stands on the main road from London to Newmarket, consists chiefly of detached houses, surrounded by trees and gardens, and of handsome villas, which are much resorted to by wealthy merchants of the metropolis.

WOODGATE. See **UTTOXETER**.

WOODHALL, a parish in the co. of Lincoln, 3 m. WSW of Horncastle. Area 2,240 acres. Pop. in 1831, 196; in 1851, 275.

WOODHAM, a township in the p. of Aycliffe, co.-palatine of Durham, 7 m. ESE of Bishop-Auckland, in the line of the Great Northern railway. Area 3,705 acres. Pop. in 1831, 204; in 1851, 209.

WOODHAM-FERRERS, or **FERRIS**, a parish in Essex, 4½ m. SSE of Danbury. Area 4,431 acres. Pop. in 1831, 826; in 1851, 981.

WOODHAM-MORTIMER, or **LITTLE-WOODHAM**, a parish in Essex, 2½ m. SW by W of Maldon. Area 1,380 acres. Pop. in 1831, 339; in 1851, 326.

WOODHAM (WALTER), a parish in Essex, 2½ m. ENE of Danbury, near the Chelmer and Blackwater navigation. Area 2,421 acres. Pop. 585.

WOODHAY (EAST), a parish in the co. of Southampton, 10½ m. NNW of Whitechurch. Area 4,966 acres. Pop. in 1831, 1,269; in 1851, 1,550.

WOODHAY (WEST), a parish in Berks, 6 m. SW by W of Newbury. Area 1,407 acres. Pop. 115.

WOODHEAD, a chapelry in the p. of Mottram-in-Longden-dale, co.-palatine of Chester, 12½ m. ENE of Stockport. Returns with the parish.

WOODHORN, a parish in Northumberland, 6½ m. ENE of Morpeth. It contains the chapelries of Newbigen and Cresswell, the demesne of Woodhorn, and the townships of Ellington, Hurst, Linmouth, North Seaton, and W. Area 8,456 acres. Pop. in 1831, 1,416; in 1851, 1,598.

WOODHOUSE, a township and chapelry in the p. of Barrow-upon-Soar, co. of Leicester, 3½ m. W of Mountsorrel. Pop. in 1831, 1,262; in 1851, 1,201.

WOODHOUSE, a township of Upper Canada, in the Talbot district, bordered on the S by Lake Erie. Pop. in 1840, 1,694.

WOODHULL, a township of Steuben co., in the state of New York, U. S., 194 m. W by S of Albany, drained by Tuscarora creek. Pop. in 1840, 827; in 1850, 1,769.—Also a township of Shiawassee co., in the state of Michigan, 10 m. ENE of Lansing, drained by branches of Looking-glass river. Pop. in 1840, 147; in 1850, 259.

WOODHURST, a parish in the co. of Huntingdon, 4 m. N of St. Ives. Area 2,130 acres. Pop. 583.

WOOD-ISLAND, an inhabited islet in the p. of Tullynakill, co. Down, on the W side of Lough Strangford, 2 m. WNW of Island-Magee, and 2 m. NNE of Killinchy. The tide entirely forsakes it at low water.

WOODLAND, a chapelry in the p. of Ipplepen, Devon, 2 m. E by S of Ashburton. Area 1,606 acres. Pop. in 1831, 237; in 1851, 188.—Also a township in the p. of Staindrop, co.-palatine of Durham, 4½ m. NE of Barnard-Castle. Pop. 240.

WOODLAND, a chapelry in the p. of Kirkby-Ireth, co.-palatine of Lancaster, 7 m. NE by N of Ulverstone.

WOODLANDS, or **WOODLAND-EYAM**, a township in the p. of Eyam, co. of Derby, 2 m. N of Stoney-Middleton. Pop. in 1831, 213; in 1851, 275.

WOODLANDS, or **WOODLAND-HOPE**, a hamlet in the p. of Hope, co. of Derby, 6 m. NE of Tideswell. Pop. in 1831, 273; in 1851, 256.—Also a tything in the p. of Horton, Dorset, 4 m. SSW of Cranbourne. Area 2,561 acres. Pop. in 1831, 423; in 1851, 476. After the battle of Bedgmoor, the Duke of Monmouth is said to have fled to this place, and to have been taken in a ditch, under an ash tree still in existence.

WOODLAWN, a village of Cecil co., in the state of Maryland, U. S., 51 m. NE by N of Annapolis. Pop. in 1850, 180.

WOODLE, a populous island of the North Pacific, in the Mulgrave archipelago, in N lat. (NW part) 0° 15' 55", and E long. 168° 45' 58". It is separated from the island of Enderville, by a channel 6 m. in width. It was discovered in 1809.

WOODLEIGH, or **WOODLEY**, a parish in the co. of Devon, 3 m. N of Kingsbridge. Area 2,819 acres. Pop. in 1831, 279; in 1851, 233.

WOODMANCOT, a hamlet in the p. of Bishop's Clive, co. of Gloucester, 3½ m. W by S of Wincombe, and about 2 m. E of the Birmingham and Gloucester railway. Pop. in 1831, 267; in 1851, 432.

WOODMANCOTE, a parish in the co. of Southampton, 8 m. SW of Basingstoke, near the South-Western railway. Area 1,896 acres. Pop. in 1831, 92; in 1851, 76.—Also a parish in Sussex, 5 m. NE by E of Steyning. Area 2,336 acres. Pop. 526.

WOODMANSEA, a township within the liberties of the town of Beverley, Yorkshire, 2 m. SE by E of Beverley. Pop. in 1831, 360; in 1851, 241.

WOODMANSTONE, a parish in Surrey. Area 1,590 acres. Pop. in 1831, 184; in 1851, 271.

WOODNESBOROUGH, or **WIMBOROUGH**, a parish in Kent, 2 m. WSW of Sandwich. The church is an elegant structure in the decorated style of English architecture. Area 2,944 acres. Pop. 813.

WOOD-NORTON, a parish and village in Norfolk, 7 m. NW of Reepham. Area 1,726 acres. Pop. in 1831, 315; in 1851, 308.

WOOD-RISING, a parish in Norfolk, 3 m. WNW of Hingham. Area 1,868 acres. Pop. in 1851, 177.

WOODS (LAKE OF THE). See **LAKE-OF-THE-WOODS**.

WOODSETTS, a township, partly in the p. of Auston, partly in that of Loughton-in-le-Morden, partly within the liberty of York, partly in the wapentake of Strafforth, W. R. of York, 4½ m. NW by W of Worksop. Pop. in 1831, 146; in 1851, 173.

WOODSFIELD, a village of Centre township, Monroe co., in the state of Ohio, U. S., on the S side of Sunfish creek, 96 m. E of Columbus. Pop. in 1840, 300; in 1850, 395.

WOODSFORD, a parish in the co. of Dorset, 5½ m. E of Dorchester, on the river Frome. It consists of the villages of East and West W. or Woodsford-Strangeways. Area 1,742 acres. Pop. 183.

WOOD'S HOLE, a village of Barnstable co., in the state of Massachusetts, U. S., 62 m. SSE of Boston. It has a good harbour.

WOOD'S MILLS, a village of Vigo co., in the state of Indiana, U. S., on Terre-Haute and Richmond railway, 8 m. E of Terre-Haute.

WOODSIDE, or **WOODSIDE-QUARTER**, a township in the p. of Wigan, Cumberland, 3 m. E by N of Wigan, in the line of the Carlisle and Maryport railway. Pop. in 1841, 415; in 1851, 404.

WOODSIDE, a joint township with Hatton, in the p. of Shiffnall, Salop, 3 m. SSE of Shiffnall. Pop. in 1831, 379; in 1851, with Hatton, 1,085.—Also a township in the p. of Elsdon, Northumberland, 1½ m. N of Elsdon. Area 6,487 acres. Pop. 112.

WOODSTOCK, a chapelry, borough, and market-town, in the co. of Oxford, 8 m. NNW of Oxford. It includes the extra-parochial precincts of Blenheim-park. Area 360 acres. Pop. in 1831, 1,380; in 1851, 1,262. The town, which consists of several well-built and regular streets, chiefly of stone, with a large proportion of handsome houses, stands on an eminence, skirted on the west by the river Glynn, which, after expanding into a sheet of water in Blenheim-park, is joined by the Evenlode, and shortly after falls into the Isis. It contains a handsome town-hall, erected in 1766. It formerly possessed a wool staple, granted by Queen Elizabeth, but there is now no trade in wool. It was also celebrated for the manufacture of articles in fine polished steel, formed of the iron nails extracted from old horse shoes; but this branch of trade has nearly disappeared since the advance of Birmingham and Sheffield. The manufacture of gloves has long been the staple of the town, and gives employment to many of the inhabitants, both of the town and the neighbouring villages. The number of pairs made weekly at W. is said to average 500 dozen; and about 100 men, and 1,500 women and girls, are said to receive constant employment from it. Under the reform act, the borough boundaries, which were previously confined within the limits of the town, even excluding part of it, were extended so as to comprehend, besides the old borough, the several parishes of Bladon, Begbrook, Shipton-on-Cherwell, Hampton-Gay, Tackley, Wooton, Stones-field, Coombe, and Handborough; the parish of Kidlington, except the respective hamlets of Gosford and Water Eaton; the hamlet of Old Woodstock, and Blenheim-park. The borough was also deprived of one member. The number of electors registered for 1837, was 385. This parish became, at an early period, a favourite abode of royalty, and at present it contains the splendid demesne and residence of the duke of Marlborough, called Blenheim. It appears that Alfred the Great resided here while employed in the translation of Boetius, and it is said to have been the birth-place and occasional residence of Chaucer. The duke of Portland takes his title of Viscount from Woodstock.

WOODSTOCK, a rivulet of co. Wicklow, which rises on the E side of the Donce mountain, and runs about 7 m. ESE to the Irish sea at the Breaches, forming the only outlet for drainage between the Three-Trouts' Stream at Delgany, and the mouth of the Leitrim or Vartrey river at Wicklow.—Also an old castle in the p. of Churchtown, co. Kildare, on the r. bank of the Barrow, in the N environs of the town of Athy. The walls are of great thickness, and, considering the attacks they have been exposed to, in good preservation.

WOODSTOCK, a town of Upper Canada, in the Brock district, in the township of Blandford, 32 m. from London. Pop. 1,085.

WOODSTOCK, a township of Oxford co., in the state of Maine, U. S., 37 m. W of Augusta, drained by a branch of Little Androscoggin river, and intersected by the Atlantic and St. Lawrence railroad. Pop. in 1840, 819; in 1850, 1,012.—Also a township of Grafton co., in the state of New Hampshire, 54 m. N by W of Concord, drained by Penn-

gewasset river. Pop. in 1840, 472; in 1850, 418.—Also a township of Windsor co., in the state of Vermont, 45 m. S by E of Montpelier, drained by Otta-Queechee river and its branches. Pop. in 1840, 3,315; in 1850, 3,041.—Also a township of Windham co., in the state of Connecticut, 43 m. ENE of Hartford, drained by Muddy Brook and its branches, and by other streams. Pop. in 1840, 3,053; in 1850, 4,686.—Also a township of Ulster co., in the state of New York, 45 m. SSW of Albany. It has a mountainous surface, and is drained by Saghill creek. Pop. in 1840, 1,691; in 1850, 1,550.—Also a village of Shenandoah co., in the state of Virginia, 106 m. NW by N of Richmond. Pop. in 1840, 1,000; in 1850, 1,000.—Also a village of Cherokee co., in the state of Georgia, on a branch of Etowah river, and 108 m. NW of Milledgeville.—Also a village of Champaign co., in the state of Ohio, 80 m. NNW of Columbus. Pop. in 1850, 205.—Also a township of Lenawee co., in the state of Michigan, 48 m. S by E of Lansing, watered by the head branches of Raisin river. Pop. in 1840, 674; in 1850, 949.

WOODSTONE, a parish in the co. of Huntingdon, 1 m. S of Peterborough. Area 1,050 acres. Pop. in 1831, 243; in 1851, 320.

WOODSTOWN, a village of Salem co., in the state of New Jersey, U. S., on the N side of Salem creek, 48 m. SW by S of Trenton. Pop. in 1840, 700; in 1850, 750.

WOODSVILLE, a village of Hopewell township, Mercer co., in the state of New Jersey, U. S., 13 m. NNW of Trenton.

WOODTHORPE, a township in the p. of North Wingfield, co. of Derby, 6 m. ENE of Chesterfield, near the North Midland line of railway. Pop. in 1831, 231; in 1851, 267.

WOODTON, or **WOOTTON**, a parish in Norfolk, 5 m. NW of Bungay. Area 2,124 acres. Pop. 583.

WOODVILLE, a village of Ellisburg township, Jefferson co., in the state of New York, U. S., on the S side of Sandy creek, and 147 m. NW by W of Albany. Pop. in 1840, 150; in 1850, 200.—Also a village of Perquimans co., in the state of North Carolina, on the W side of Little river. Pop. in 1840, 75.—Also a township of Sandusky co., in the state of Ohio, 104 m. N by W of Columbus, drained by Portage river, on which is a village of the same name. Pop. in 1840, 486; in 1850, 1,069.—Also a village of Wilkinson co., in the state of Mississippi, 105 m. SW by S of Jackson, and intersected by the West Feliciana railroad. Pop. in 1840, 800; in 1850, 900.—Also a village of Jackson co., in the state of Alabama, and near the Memphis and Charleston railway.—Also a village of Tyler co., in the state of Texas, on the W side of Turkey creek, 200 m. E by N of Austin city.—Also a village of Greene co., in the state of Georgia, on Athens Branch railway, 43 m. N by E of Milledgeville.

WOODY, an island of the Asiatic archipelago, in the group of the Banda Islands, to the S of Timor Laut.

WOOKEY, or **WOKEY**, a parish in Somersetshire, 2 m. W of Wells. It contains the hamlets of Bladney, Castle, Hinton, Kallehill, Oure, Turlichmead, and Yardley. Area 3,420 acres. Pop. 1,158.

WOOL, a parish in Dorset, 6 m. W by S of Wareham, on the river Frome. It includes the hamlets of Great Bindon, Bovington, and Woodstreet. Area 2,550 acres. Pop. in 1851, 545.

WOOLASTON. See **WOLLASTON**.

WOOLASTON, a parish in Gloucestershire, 5 m. NE of Chepstow, on the river Severn. Area 3,640 acres. Pop. in 1831, 880; in 1851, 1,261.

WOOLASTON (GREAT), a township and chapelry

in the p. of Alberbury, Salop, 11 m. W of Shrewsbury. Pop. in 1831, 883; in 1851, 344.

WOOLAVINGTON, a parish in Somersetshire, 4 m. NE of Bridgewater, near the Glastonbury canal and the Bristol and Exeter railway. Area 1,725 acres. Pop. in 1831, 412; in 1851, 405.

WOOLAVINGTON (East and West), a parish divided into two tythings, in Sussex, $4\frac{1}{2}$ m. SW by S of Petworth. Area 2,530 acres. Pop. 462.

WOOLBEDING, a parish in Sussex, $1\frac{1}{2}$ m. NW of Midhurst, intersected by the river Rother. Area 2,253 acres. Pop. in 1831, 307; in 1851, 320.

WOOLBOROUGH, or **WOLBOROUGH**, a parish in Devon, 1 m. S of Newton-Abbots. Area 1,231 acres. Pop. in 1831, 2,194; in 1851, 3,227.

WOOLDALE, a township in the p. of Kirkburton, W. R. of the county of York, $6\frac{1}{2}$ m. S of Huddersfield. Area 2,370 acres. Pop. in 1851, 5,600.

WOOLER, a parish and market-town in Northumberland, 46 m. NNW of Newcastle-upon-Tyne. Area of p. 4,852 acres. Pop. in 1831, 1,926; in 1851, 1,911. The town, which is situated in a healthy district on the eastern declivity of the Cheviots, consists of several streets diverging from a central area used as the market-place. Through the centre of it runs a good trout stream, which subsequently falls into the river Till.

WOOLFARDISWORTHY, a parish in Devonshire, $9\frac{1}{2}$ m. SW by S of Bideford. Area 5,798 acres. Pop. in 1831, 840; in 1851, 824.—Also a parish in Devon, 6 m. N by W of Crediton. Area 1,815 acres. Pop. in 1831, 226; in 1851, 208.

WOOLFORD (Great), a parish in the co. of Warwick, 4 m. S by W of Shipston-on-Stour. It includes the hamlet of Little Woolford. Pop. 290.

WOOLHAMPTON, or **WOLHAMPTON**, a parish in Berks, 7 m. E of Newbury, on the Kennet navigation. Area 694 acres. Pop. in 1851, 602.

WOOLIBARY, an estuary of Clarence river, in the district of that name, New South Wales.

WOOLLEN-GRANGE, or **MOLL-GRANGE**, a parish in co. Kilkenny, 3 m. NNW of Thomastown. Area 1,663 acres. Pop. in 1831, 373; in 1841, 328.

WOOLLEY, a parish in Huntingdonshire, 5 m. NE by N of Kimbolton. Area 1,420 acres. Pop. in 1831, 58; in 1851, 90.—Also a chapelry in the p. of Royston, W. R. of the co. of York, 6 m. N by W of Barnesley, near the North Midland railway. Area 2,569 acres. Pop. in 1831, 553; in 1851, 450.

WOOLLOOMOOLOO. See **SYDNEY**, New South Wales.

WOLOWARDALLA, a town of New South Wales, in the co. of King, on the Narrawa or Lachlan river, and 149 m. from Sydney.

WOOLPIT, a parish in Suffolk, $5\frac{1}{2}$ m. NW by W of Stow-Market. Area 1,877 acres. Pop. 1,071.

WOOLSTASTON, a parish in the co. of Salop, $10\frac{1}{4}$ m. SSW of Shrewsbury. Area 843 acres. Pop. in 1831, 89; in 1851, 72.

WOOLSTHORPE, or **WOOLSTROP**, a parish in Lincolnshire, 6 m. W by S of Grantham, in the line of the Nottingham and Grantham canal. Area 2,600 acres. Pop. in 1831, 650; in 1851, 632.

WOOLSTON, a parish in Gloucestershire, 4 m. WNW of Winchcombe, near the line of the Birmingham and Gloucester railway. Area 787 acres. Pop. in 1831, 92; in 1851, 86.—Also a township with Martinscroft, in the p. of Warrington, co.-palatine of Lancaster, $2\frac{1}{4}$ m. E by N of Warrington, and the Grand Junction railway. Area 1,444 acres. Pop. in 1831, 578; in 1851, 516.

WOOLSTON (Great), a parish in Buckinghamshire, $3\frac{1}{4}$ m. N by W of Fenny-Stratford, on the river Ousel, and intersected by the Grand Junction canal. Area 760 acres. Pop. in 1851, 72.

WOOLSTON (Little), a parish in Buckinghamshire, $3\frac{1}{4}$ m. N of Fenny-Stratford, on the river Ousel, and intersected by the Grand Junction canal. Area 613 acres. Pop. in 1831, 121; in 1851, 102.

WOOLSTONE, anciently **WOLVSTONCHROS**, a chapelry in the p. of Uffington, Berks, $5\frac{1}{4}$ m. S by E of Great-Farrington. Pop. in 1831, 270; in 1851, 288.

WOOLTON (Little), a township in the p. of Childwall, co.-palatine of Lancaster, $4\frac{1}{4}$ m. SW by S of Prescott. Area 1,200 acres. Pop. in 1851, 1,016.

WOOLTON (Much), a chapelry in the p. of Childwall, co.-palatine of Lancaster, $5\frac{1}{4}$ m. SW by S of Prescott. Area 930 acres. Pop. in 1851, 3,616.

WOOLVERSTONE, a parish in Suffolk, $4\frac{1}{4}$ m. S by E of Ipswich, skirted on the NE by the navigable river Orwell. Area 1,256 acres. Pop. 241.

WOOLVERTON. See **WOLVERTON**.

WOOLVERTON, a parish in Southamptonshire, $7\frac{1}{4}$ m. NW of Basingstoke. Area 736 acres. Pop. in 1831, 229; in 1851, 174.

WOOLWICH, a parish and market-town in Kent, on the S bank of the Thames, $2\frac{1}{4}$ m. E of Greenwich, and $8\frac{1}{4}$ m. E by S of St. Paul's, London. The parish extends to the Essex side of the Thames, where it comprehends the Devil's-house, and certain lands running along the N bank of the river, but included in the county of Kent. The surface soil is generally loam; the sub-soil is in many places clayey; the sub-strata is sand to a considerable depth, and then chalk. Area of p. 1,596 acres. Pop. in 1801, 9,826; in 1831, 17,661; in 1841, 26,811; in 1851, 32,367.

This pop. includes the garrison, whose numbers, including artillerymen, sappers, miners, and marines, may amount to 8,600, and the convicts in the hulks usually exceeding 1,000.—The town stands on an elevated site, close to the S bank of the Thames, and gradually rises on the gravel ridge which extends from Greenwich to Erith, here known as Shooter's hill. There are marshes on the E and W of the town, which are sometimes flooded by the river. The principal street runs parallel to the river, and is crossed at right angles by others of smaller extent. It adjoins Plumstead on the E, and Charlton on the W; and stands partially within the parish of Plumstead. The most agreeable part of the town occupies the upper part of the elevated site, near the Charlton road, and the scenery of the environs is of a rich and diversified character, well-wooded, and containing a number of respectable villas. The lower and more densely peopled parts of the town, occupying a marshy site between the ridge and the river, are less healthy. The inhabitants are not engaged in any particular branch of manufacture, nor is there any trade of importance; by far the larger part of the population is supported by the government army and navy establishments. The common is open, spacious, and park-like in its general character, and there are good public walks. Off the town are moored hulks for the confinement of convicts. W. by the reform act joins with Deptford and Greenwich, under the name of the borough of Greenwich, in returning two members to parliament.

Government works.] The most interesting and important objects in Woolwich are the dockyard, the arsenal, and other government-works. The dock-yard here is supposed to be the most ancient royal dock-yard in the kingdom. It consists of a narrow strip of land on the banks of the river, about a furlong in breadth, and rather more than half a mile in length. The outer basin comprises an area of 120,000 sq. ft. The inner basin has an area of 160,000 sq. ft. Recent extensive improvements in this great naval depot are such as must render it superior to any in the kingdom. The dry dock, at the east end of the yard, is without exception the

finest and most commodious that has ever been built, and is constructed of the most durable materials, being first laid in the bottom with one foot of brickwork, and over it large granite stones, about 3 ft. 6 in. in thickness, and each many tons in weight. The base of this dock is 230 ft. in length, and of a proportionate breadth; but it will contain vessels of upwards of 300 ft. in length on the upper deck. At the west end of the dock-yard, a dock of still greater dimensions than the old one was begun in 1840, and finished in July 1843. The dimensions of the dock are 300 ft. by 80 at the top of the water, and 245 ft. at the bottom. This is considerably larger than any ever yet made, but it is anticipated that steam-vessels of this gigantic size will be laid down when docks capable of containing them for fitting and repairing are ready for their reception. In 1839, two ranges of building, each 440 ft. in length by 26 in breadth, were built and fitted up with machinery for the manufacture of steam-engines and boilers. The number of workmen employed in the dock-yard in 1842 was 1,300, exclusive of about 700 convicts. The royal arsenal on the east side of the town, extends into the parish of Plumstead. It is the grand depot of artillery, &c., for the army and navy. It contains barracks and foundries, factories, &c., for the manufacture of various warlike stores; and, including a part of the Plumstead marshes, used as an artillery practising ground, it extends over about 300 acres. A practice-range of nearly 3 m. in extent has also been formed towards Erith. All the government ordnance are first proved here. The quantity of cannon, cannon-balls, bomb-shells, &c., is immense. There are four air-furnaces in the foundry, the largest of which will melt 325 cwt. of metal, a sufficient quantity to cast 14 guns, and the smallest 20 cwt. On the E side of the artillery barracks are military hospitals, and on the W side is a piece of water on which experiments are occasionally made with boats. Between the dock-yard and the arsenal is a rope-walk, an extensive building about 400 yds. in length, where, in time of war, several hundred workmen are engaged in making cables of all dimensions. On the SW side of the barrack-field is the Repository, containing an extensive collection of military models and trophies. An observatory for the officers of the royal artillery and engineers was lately in course of erection, in the barrack-field between the repository and the mortar-battery on the right wing of the barracks. An institution for the better education of engineer and military officers was founded here in 1719. It is under the direction of the master-general and board-of-ordnance. The education is excellent; and the sons of officers are admitted upon a scale of payment corresponding to the father's rank, and varying from £80 to £20 per annum; while the sons of private gentlemen pay £125 per annum. The cadets receive an annual allowance of £45 12s. 6d.; and commissions according to their merit. It is understood that the establishment, which numbers from 150 to 170 pupils, now nearly maintains itself.

WOOLWICH, a township of Upper Canada, in the Wellington district, intersected by Grand river. Pop. in 1842, 1,009. It contains a village of the same name.

WOOLWICH, a township of Lincoln co., in the state of Maine, U. S., 26 m. S of Augusta, drained by small affluents of the Kennebec, by which it is bounded on the W. Pop. in 1840, 1,416; in 1850, 1,420.—Also a township of Gloucester co., in the state of New Jersey, 11 m. SW of Woodbury, bounded on the NW by Delaware river, and drained by Pepaups, Little Timber, Racoon, and Oldman's creeks. Pop. 3,676.

WOOLWORTH POINT, a promontory of Tasmania, of which it forms the NW extremity.

WOONSOCKET FALLS, a village of Smithfield township, Providence co., in the state of Rhode Island, U. S., on Blackstone river, 15 m. NNW of Providence, and intersected by the New York and Boston Direct railroad. Pop. in 1850, 3,000.

WOOPERTON, a township in the p. of Eglingsham, Northumberland, 6½ m. SE by S of Wooler. Area 923 acres. Pop. in 1831, 107; in 1851, 86.

WOOPPOOSE, a small uninhabited island of Upper Canada, in Prince Edward's bay, Lake Ontario, between the forks of the township of Marysburgh.

WOORE, or **WORM**, a chapelry in the p. of Muckleston, Salop, 6½ m. NNE of Drayton-in-Hales. It includes the townships of Bearston, Dorrington, and Gravenhanger. Area 5,291 acres. Pop. in 1831, 890; in 1851, 1,860.

WOORNYALOOON, a parish of Australia Felix, in the co. of Grant.

WOOSPEER, a village of the grand-duchy of Mecklenburg-Schwerin, in the prov. of Mecklenburg, and bail. of Domitz. Pop. 500.

WOOSTEN, a village of the grand-duchy of Mecklenburg-Schwerin, in the circle of Wendisch, and bail. of Goldberg. Pop. 200.

WOOSTER, a township of Wayne co., in the state of Ohio, U. S., 73 m. NE of Columbus, drained by Killbuck creek and its branches, and intersected by the Ohio and Pennsylvania railroad. Pop. 4,060.

WOOTTON, a parish in the co. of Bedford, 4½ m. SW of Bedford. Area 3,711 acres. Pop. in 1831, 1,051; in 1851, 1,204.—Also a parish in Berks, 4 m. NW by N of Abingdon. Acreage with the parish of Cumner. Pop. in 1831, 340; in 1851, 370.—Also a hamlet in the p. of St. Mary de Lode, Gloucestershire. Area 260 acres. Pop. in 1831, 804; in 1851, 1,174.—Also a parish in Kent, 9½ m. SE by S of Canterbury. It includes the hamlet of Giddings. Area 1,019 acres. Pop. in 1831, 128; in 1851, 153.—Also a parish in Lincolnshire, 5½ m. SE of Barton-upon-Humber. Area 2,960 acres. Pop. in 1831, 459; in 1851, 608.—Also a parish in Northamptonshire, 2½ m. S by E of Northampton. Area 1,420 acres. Pop. in 1831, 648; in 1851, 877.—Also a parish in Oxfordshire, 2½ m. N by W of Woodstock. Area 3,720 acres. Pop. in 1831, 1,060; in 1851, 1,250.—Also a parish in the isle of Wight, 4 m. NE of Newport, between the river Motherbank on the N, and an inlet of the sea on the E; the latter crossed by a causeway 900 feet in length, on the high road to Newport. Area 1,360 acres. Pop. in 1831, 55; in 1851, 58.—Also a township in the p. of Eccleshall, co. of Stafford. Area 680 acres. Pop. in 1831, 150; in 1851, 182.—Also a township in the p. of Ellastone, Staffordshire, 4½ m. W by S of Ashbourne. Pop. in 1831, 269; in 1851, 218.

WOOTTON-BASSET, a parish, disfranchised borough, and market-town, in Wilts, 36 m. N by W of Salisbury, in the line of the Great Western railway, and the Wilts and Berks canal, on the former of which there is here a principal station, distant 82½ m. SW of London. Area 4,778 acres. Pop. in 1801, 1,244; in 1831, 1,896; in 1851, 2,123. Two members were regularly returned to parliament for the burgh from 26° Henry VI., till disfranchised under the Reform act. The town consists of a single street, about a ½ m. in length, occupying an elevated site in the middle of a beautiful and fertile district. The inhabitants are chiefly engaged in agriculture and the ordinary handicrafts.

WOOTTON-COURTNEY. See **WOTTON-COURTNEY**.

WOOTTON-GLANVILLE, a parish in Dorset,

7½ m. SSE of Sherborne. It contains the tything of Wootton-Newland. Area 1,665 acres. Pop. 328.

WOOTTON (St. LAWRENCE), a parish in the co. of Southampton, 3 m. W by N of Basingstoke. Area 3,957 acres. Pop. in 1831, 847; in 1851, 922.

WOOTTON (NORRIS), a parish in the co. of Dorset, 2 m. SE by S of Sherborne. Area 1,536 acres. Pop. in 1831, 78; in 1851, 75.—Also a parish in Norfolk, 2 m. W by S of Castle-Rising. Area 4,968 acres. Pop. in 1831, 179; in 1851, 188.—Also a parish in Somersetshire, 4 m. WSW of Shepton-Mallet. Area 1,586 acres. Pop. in 1851, 335.

WOOTTON-RIVERS, a parish in Wilts, 3 m. NE of Pewsey, in the line of the Kennet and Avon canal. Area 1,179 acres. Pop. in 1851, 427.

WOOTTON (SOURN), a parish in Norfolk, 2½ m. SW by S of Castle-Rising. Area 1,874 acres. Pop. in 1831, 177; in 1851, 155.

WOOTTON-WAWEN, a parish in the co. of Warwick, 1½ m. S of Henley-in-Arden, intersected by the Birmingham and Stratford-on-Avon canal. It contains the chapelries of Henley-in-Arden and Ullenhall, and the hamlet of Aspley with Fordhall. Area 8,700 acres. Pop. in 1851, 2,306.

WOPERSNOW, a village of Prussia, in the reg. of Koslin, and circle of Schiefelbein. Pop. 237.

WOPLAN, a village of Austria, in Bohemia, in the regency of Pardubitz, and bail. of Schwarz-Kosteletz. Pop. 340.

WOPLANKEN, a village of Prussia, in the reg. of Königsberg, and circle of Kastenburg. Pop. 281.

WOPRZAN, a market-town of Austria, in Bohemia, in the regency of Budweis, and bail. of Muhlhausen. Pop. 880. It has a paper-mill.

WOPPAM, a village of Austria, in Bohemia, in the regency of Böhmisch-Leipa, and bail. of Leitmeritz. Pop. 240.

WOPPEN, a village of Prussia, in the regency of Königsberg, and circle of Braunsberg. Pop. 251.

WOPPENHOF, a village of Bavaria, in the circle of the Upper Pfalz, and presidial of Bohenstrausa. Pop. 250. It has a castle.

WOPPENRIETH, a village of Bavaria, in the circle of the Upper Pfalz, and presidial of the Bohenstrausa. Pop. 90.

WOPPENRODT, a village of Prussia, in the reg. of Treves, and circle of Bernkastel. Pop. 200.

WORADA, a state of Senegambia, to the S of Konkadu, to the W of the Bading or Black river, and intersected by an affluent of that river.

WORASITZ, a village of Austria, in Bohemia, in the reg. of Prague, and bail. of Laun. Pop. 260.

WORATSCHEN, a village of Austria, in Bohemia, in the reg. of Eger, bail. of Saatz. Pop. 420.

WORATTA, a country which is reputed to lie to the S of Abyssinia, and E of Kaffa, and to be inhabited both by Christians and Pagans of various shades of colour.

WORB, a village of Switzerland, in the cant. of Bern, and bail. of Konolfingen; surmounted by an ancient castle. Pop. 3,185.

WORBEN, a village of Switzerland, in the cant. of Bern, and bail. of Nidan. Pop. 454.

WORBIS, a circle and town of Prussia, in the prov. of Saxony, and regency of Erfurt. The circle comprises an area of 826 German sq. m. Pop. 42,589. The town is on the Wipper, near the source of that river, and 45 m. NW of Erfurt. Pop. 2,078. It has manufactories of woollen and cotton fabrics.

WORBIS (BARRAN), a village of Prussia, in the prov. of Saxony, and regency of Erfurt, circle and 5 m. ESE of Worbis, on the Wipper. Pop. 1,300. It has manufactories of linen fabrics, and spinning mills.

WORBLINGEN, a village of the grand-duchy of

Baden, in the circle of the See, and bail. of Radolphzell. Pop. 568.

WORESCHEIDT, a village of Prussia, in the reg. of Arnberg, and circle of Otp. Pop. 260.

WORCESTER, a city and county of itself, the seat of a see, and the capital of the co. of Worcester, locally situated in the division, union, and county of Worcester, on the river Severn, which is here crossed by a handsome bridge of 5 arches, and distant 3½ m. W of the Birmingham and Gloucester railway at Spetchley, from which a branch line runs to the city. In the parliamentary returns for 1831, Worcester is held to comprise the parishes of St. Albans, All Saints, St. Andrew, St. Helen, St. Nicholas, and St. Swithin, parts of the parishes of Claines, St. Clement, St. Martin, and St. Peter, and the extra-parochial parts of the Blackhouse, the jail and bridewell, and the precincts of the college. Area 220 acres. Pop. in 1801, 11,300; in 1831, 18,610; in 1851, 27,528. This city, which is one of the most ancient in the kingdom, stands on a gentle slope on the E bank of the Severn. It is sheltered from the E by a finely wooded hill: on all the other sides it is open, being in what may be called the great plain of the Severn. It was formerly surrounded by a strong wall, of which some slight vestiges remain. The streets in general are wide, well-paved, and lighted, clean, and neat; and the principal streets are regular and handsome. The principal public edifices, besides the cathedral and the parish churches, nine of which stand within the walls, and two without, are the guild-hall, a handsome modern structure; new county-courts recently erected; the new county-jail, a building on Howard's plan; the city-jail erected in 1824; the house-of-industry, the infirmary, a theatre, and various hospitals and schools. The principal manufactures are those of gloves and porcelain. There is a very extensive demand for W. gloves, both for home-consumption and for exportation, and the largest number of the working classes are employed in this branch of manufacture, which is recommended to them by the facility which it allows to those engaged in it to work in their own houses, and at their own convenience. There are several large porcelain establishments. The beauty of W. china is well known in most parts of the world, it being a considerable article of trade. The trade of the city is very considerable, not only in the articles of its more immediate produce, but also owing to the great advantages of its central situation for inland navigation, independently of its recent valuable railway communications. The assizes and general quarter-sessions for the shire are held in W. as the county-town. The city has regularly returned 2 members to parliament since 28th Edward I. The number of electors registered, in 1837, was 3,196; in 1852, 2,651. W. is a polling-place, and the principal place of election for the members representing the western division of the shire.

[*Diocese and See.*] The diocese of W., which is said to have been founded at the request of Osbert, a prince of the Wiccii, by Ethelred, king of Mercia, about the year 680; was formerly of much greater extent than latterly, even though re-enlarged by recent orders in council. The whole of the co. of Gloucester anciently belonged to it. Latterly it contained all Worcestershire (excepting 15 parishes and 8 chapelries belonging to Hereford), besides about one-third of Warwickshire, and the parishes of Broms and Clent in Staffordshire, and of Hales-owen in Shropshire. By order in council of date 22d December, 1836, the archd. of Coventry was transferred to this dio. from that of Lichfield and Coventry; and part of the deanery of Burford. The total

amount of the average gross yearly income of the see of W. for three years, ending 31st December, 1831, was £6,916: nett yearly income £6,569. The average nett income of the dean and chapter or corporation of the cathedral, as a corporation aggregate, during the three years ending 1841, was £8,479; the corporation consisting of a dean and 10 prebendaries or canons.—The Cathedral is a noble specimen of Gothic simplicity: the exterior is extremely plain, and devoid of all laboured ornaments. Its beauty consists in its height, space, and the lightness of its architecture, which is greatly aided by the lofty pinnacles rising from every termination of the building. This edifice was first erected by Ethelred, king of Mercia, in 680, when it was a convent of secular priests. The greatest part of the present buildings, consisting of the hall, refectory, cloister, watergate, &c., were all built between 1320 and 1386, by Bishop Wakefield. The form is the usual one of a double cross, displaying the grand features of the Gothic style, which consist in extent and strength, and to which we may add the solemnity of the high pointed arch, and the beauty of diminutive ornament. The proportions of the exterior are on a grand scale: it is in length 514 ft.; in breadth 78 ft.; and in height 68 ft.; and the tower, which rises from the centre of the cross aisle to the altitude of 200 ft., is ornamented at the corners by four lofty pinnacles, and with elegant battlements of light open work. This tower has been reckoned heavy, particularly in the upper tier of ornamental windows. Nothing can be imagined more august, and yet more simple, than the choir, in which the best effect is produced by its clustered pillars, the exquisite open-worked mouldings of its pointed arches, and its general arrangement. The cloisters are 125 ft. by 120 ft., and 16 ft. in width. The bishop's palace stands near the cathedral, in a commanding situation, on the banks of the Severn. The charities of W. are very numerous, and in 1830 yielded in all an annual revenue of about £4,500.

[History.] The city of W. boasts of an antiquity as high as any in the island. In the time of the ancient Britons, according to the list of their cities given by Nennius, it was a place of considerable consequence, and was called *Caser Guorangan*. Perhaps it owed its consequence to its situation, being protected, on the one hand, by an impassable forest, and, on the other, by the river Severn, besides having the advantage of an adjacent ford over the river. It was taken possession of by the Romans at an early period of their dominion in Britain, and, although some doubts exist as to whether it was a principal station of that people, yet it seems certain that a fortress was erected here to protect the passage of the Severn, and secure the conquests in the neighbourhood. After the general union of the small Saxon kingdoms, the bishop of W. obtained certain royal grants, which enabled him to fortify the cathedral and close. In the 12th and 13th centuries, the city suffered severely and repeatedly from fires, partly accidental, and partly by military and other incendiaries. During this period, and the two succeeding centuries, it was also the scene of several recorded historical events of some importance, which, however, our limits do not permit us more particularly to notice. During the civil wars in the reign of Charles I., this city embraced the royal cause, and was, in fact, the first city which openly did so. It afterwards fell into the hands of the parliamentary forces, and a fine of £5,000 imposed on the inhabitants, besides a forced loan of £3,000. These measures did not subdue the spirit of the citizens, who, after the removal of the army, continued to exert themselves in the cause of the king, and in consequence, it was again besieged in 1646, when, after an obstinate resistance of four months, the garrison capitulated on honourable terms. The city still remained favourable to the royal cause, and on the 22d August, 1651, notwithstanding the opposition of the garrison, the gates were opened to a Scottish army under Charles II. From various untoward circumstances, the king, on arriving at W., found that his forces, fatigued by a long and harassing march, were not more numerous than when he rose from his camp at Torwood. On the other hand, he found all the militia and regular forces of the country everywhere opposed to him, and in consequence his situation was one of great difficulty. With an army of about 30,000 men Cromwell fell upon the city, and attacking it on all sides and meeting with little opposition, except from the Duke of Hamilton and General Middleton, broke in upon the disordered royalists, and the whole Scottish army were either killed or taken prisoners. The country people, in-

flamed with national antipathy, put to death the few that escaped from the field of battle. The king left W. in the afternoon, and travelled to Boscobel in Staffordshire. After his escape, the citizens made their last stand in the town-hall, but were finally overwhelmed by superior numbers.

WORCESTER, a county and division of Cape Colony in S. Africa. The division is bounded on the N by the division of Clanwilliam; on the E by Beaufort; on the S by George and Zwillendam; and on the W by Stellenbosch and Cape. It has an area of about 20,000 sq. m., and is watered by the Breede, the Great Berg, and the Doorn. The town is situated on the Breede, 60 m. ENE of Cape Town. Between Cape Town and the rich corn-growing regions of W. there interposes, at a distance of about 40 m., the Bokkeveld range of mountains stretching across the country, and nearly cutting off the capital from all communication with the interior in that direction. These mountains are only passable at a few points, where it was formerly necessary to unload a waggon on one side, carry over the packages by hand, or on the backs of horses, and reload them into another at the other side; in short, they form as complete a barrier to intercourse by wheel carriages as the isthmus of Darien to ships. At an expense of £50,000, with the labour of our colonial convicts, this mighty barrier has been cut through from one side to the other,—upwards of 18 m., and a magnificent road constructed, by which the wealth of the interior may pour down unobstructed to the shores of Table Bay.

WORCESTER, a central county, township, and city of the state of Massachusetts, U. S. The township, comprising an area of 1,450 sq. m., is generally undulating, and possessing considerable fertility, drained by Blackstone, Guinnebaug, Ware, Millar's, Nashua, and Mill rivers, and intersected by the Boston and Worcester, the Providence and Worcester, the Worcester and Fitchburg, the Western, the Nashua and Worcester, the Fitchburg, the Vermont and Massachusetts, the Norwich and Worcester, the Cheshire, &c. railroads. Pop. in 1840, 95,313; in 1850, 130,789. Its capital, which bears the same name, is 45 m. by railroad W by 8 of Boston, and in N lat. 42° 16' 17", and W long. 71° 48' 18". It is pleasantly situated in a valley, surrounded by hills, and drained by branches of Blackstone river. It contains some handsome streets and public buildings, and is one of the most important thoroughfares in New England, being situated in the centre of five extensive lines of intercommunication, viz. the Boston and Worcester, the Western, the Providence and Worcester, the Norwich and Worcester, the Worcester and Nashua, and the Fitchburg and Worcester.—Also a county in the SE part of the state of Maryland, comprising an area of 616 sq. m. intersected from N to S by Potomac, and drained by its branches. Pop. in 1840, 18,377; in 1850, 18,859. Its capital is Snowhill.—Also a township of Otsego co., in the state of New York, 57 m. SW of Albany. It has a hilly surface, and is drained by Charlotte river and its branches. Pop. in 1840, 2,390; in 1850, 2,047. It has a village of the same name, with about 200 inhabitants.—Also a township of Montgomery co., in the state of Pennsylvania, 89 m. E of Harrisburg. Pop. in 1840, 1,200; in 1850, 1,400.—Also a township of Washington co., in the state of Vermont, 7 m. N of Montpelier, drained by the N branch of Onion river. Pop. in 1840, 587; in 1850, 702.

WORCESTERSHIRE, a central county of England, bounded on the N by Shropshire and Staffordshire; on the E by Warwickshire; on the S by Gloucestershire; and on the W by Herefordshire and Shropshire. In form it is a very irregular quadrangle, with detached portions on all sides surrounded by

other counties, while portions of other counties are insulated within it. Its greatest length is 36 m.; breadth 26 m.; circumf. 130 m.; area 723 sq. m., or 462,720 acres. It was divided into hundreds very irregularly shaped and singularly intermixed, until by an act passed in 1831, new divisions were formed. The county is now accordingly divided into 10 portions, called divisions, politically separated into an eastern and a western parliamentary district or division; the eastern comprising the Droitwich, Northfield, Pershore, Stourbridge, Dudley, and Blockley, divisions, and the western, those of Worcester, Kidderminster, Hundred House, and Upton. There are 197 parishes in the county, comprising 1 city and county town, Worcester; 6 parliamentary boroughs, Worcester, Evesham, Droitwich, Kidderminster, Bewdley, and Dudley; and these and the following six other market-towns, namely, Stourbridge, Pershore, Shipston, Tetbury, Brooms Grove, and Upton. The number of inhabited houses in the county, in 1831, was 41,646; in 1841, 46,962; in 1851, 51,943. The pop. of this county, in 1801, was 439,333; in 1831, 211,400; in 1841, 233,484; in 1851, 276,926. The pop. of 1831 consisted of 45,512 families, 14,654 of whom were chiefly employed in agriculture, and 19,080 in trade, manufactures, and handicraft.

Climate and soil.] The climate of this co. is mild and salubrious, and in the vales vegetation is very early. On the Malvern-hills the air is extremely mild as well as pure. The same character prevails on some of the elevated parts in the NW; but on the Lickey, the Bredon, and the Broadway-hills, the climate is rather colder. The general appearance of the county is rich and beautiful, being finely diversified with hill and valley, and richly wooded. There is scarcely any tract so sterile as to be destitute of verdure, and in most parts the cultivation is good. Almost the entire central and southern parts of the district are occupied by the vales of Worcester and Evesham. The vale of Worcester is bounded on the SW by the Malvern-hills, which form part of the boundary between this county and Herefordshire: see article MALVERN-HILLS. Connected with these are the Abberley-hills which occupy the NW part of the county, and bound on the W the vale which stretches on the N into Shropshire and Staffordshire. On the E side of the vale are the Lickey or Hagley-hills, which, commencing at Hagley, continue in nearly a SE direction to Headless Cross, whence they stretch nearly S along the boundary of the co., and for a short distance enter it again, at length sloping off near Evesham. Connected with the Coteswold-hills of Gloucestershire, are the Bredon-hills, in the SE district of the county, a mile or two S of Pershore. These hills separate the vale of Gloucester from that of Evesham. A ridge of high ground beginning a little to the E of Worcester, and stretching nearly S between the Severn and the Avon, separates the vales of Worcester and Evesham, the former of which is, in fact, part of the vale of the Severn; and the second of its tributary the Avon. The soil of this co. is various. In the northern parts it consists of rich loamy sand, united with a small proportion of gravel. Towards the east, light sand and peat earth are sometimes found; but the prevailing soil there is a strong clay. In the vale the upper soil is particularly deep: it is a dark-coloured earth, resting on a substratum of clay in some parts, and of gravel in others. On some parts of the banks of the Severn and its tributary streams, there is a rich alluvial soil, extremely favourable to vegetation. Wheat is very extensively cultivated, and yields a good return, as well as barley and beans. Hops in some districts form

a principal crop, and orchards of apple and pear trees, for cider and perry, are numerous. Perry is in some parts so plentiful as to form the common drink of the peasantry. Cattle and sheep are fattened on the rich pasturage of this county. The new red sandstone formation occupies the principal part of the co. Rocks of an older epoch, as usual, form the higher ranges. The Malvern-hills are composed of granite, syenite, and syenitic greenstone. The Lickey-hills are a mass of quartz, a rock which is also found in the Malvern-hills. Limestone occurs in the Abberley-hills, on the NW side of the co. At the SE corner in Cleeve Prior parish, there are quarries of very good stone; and still farther S, in the Broadway-hills, stone of a reddish colour is quarried. Freestone and calcareous flagstone are quarried in various quarters. The NW corner of the co. is for a small space occupied by part of the Bewdley coal-basin, and coal-pits are sunk there at Mable and at Bayton. The detached division of Dudley forms part of the Dudley coal-basin, in which the beds of coal alternate with strata of ironstone; and coal is raised, and iron made in large quantities. The Dudley limestone quarries are very extensive and curious excavations. Brick earth abounds in this co. At Droitwich there are rich and long celebrated brine-springs, supposed to have been worked even by the Romans. There are singular springs and beds of rock-salt at Stoke Prior, near Bromsgrove.

Rivers.] The Severn, the Avon, the Stour, and the Teme, are the principal rivers in Worcestershire. The Severn enters the co. from Salop, near Bewdley, and taking nearly a southward course, runs through the length of the co., passing by Stourport, Worcester, and Upton, and finally quitting it for Gloucestershire, a little before it is joined by the Upper Avon. The Severn is navigable for vessels of 80 tons as far as Worcester, and for those of 60 tons as far as Bewdley-Bridge. The whole navigation of this river from its mouth, without the aid of locks, is 160 m. The mass of the co., as already seen, is within the basin of the Severn, of which it occupies one of the finest districts. The Upper Avon enters from Warwickshire on the E, and thence takes a SW course to Evesham, round which town it flows. Running then in a general western direction, with many bendings, by Pershore, and after a very winding course nearly S, it passes into Gloucestershire. The Stour enters the co. from Staffordshire, passes through Kidderminster, and joins the Severn at Stourport. The Teme, which has its source in Shropshire, enters this co. near Tenbury, on the NW, whence it takes a very irregular course to the SE, and joins the Severn about 1½ m. below Worcester.

Roads and Railways.] This co. is intersected by several canals, and water communication is thus kept up with all parts of England. The Staffordshire and Worcestershire, or Stourport canal, which opens into the Severn at Stourport, meets the old Birmingham canal, a little to the N of Wolverhampton in Staffordshire, and thence communicates with the Grand Trunk canal. Its course of 46 m., it is carried by aqueducts over the Trent, Sow, Stour, and two or three other smaller streams, and by a tunnel under the town of Kidderminster. There are likewise two other tunnels, two large reservoirs, and a number of bridges and small aqueducts on its course. The Dudley canal proceeds from the Worcester and Birmingham canal, about 4 m. S of Birmingham, and joins the Stourport canal a little west of Stourbridge. Its whole course is 15 m., and in this short distance it passes through three tunnels of more than 4 m. in aggregate length. About 1 m. N of Stourbridge a branch runs to that town. The Leominster and Kington canal runs through a small portion of the NW part of this co. where there are coal-mines. The Droitwich canal runs from the salt-works at Droitwich to the Severn, a distance of 5 m., in which it descends 56½ ft. by 8 locks. The Worcester and Birmingham canal connects the two towns so named, and joins the Severn at the former. About 16 m. from this junction, at Tardebigg, 2 m. ESE of Bromsgrove, it runs through a tunnel 500 yds. in length, and in the remainder of its course there are

three other shorter tunnels. All of these tunnels are 18 ft. high, and 18½ ft. wide, with 7 ft. 3 in. depth of water. The Birmingham and Stratford canal communicates with this one at King's Norton.—The principal roads are those from London to Welshpool, Aberystwith, Worcester, Shrewsbury and Holywell, Kidderminster and Birmingham.—The Birmingham and Gloucester railway intersects this county from its NE to its SE extremity. From its junction with the London and Birmingham line at Birmingham, it proceeds across the Birmingham and Warwick canal, and by Campbell, Bromsgrove, Stoke Prior, Droitwich, Spetchley near Worcester, Defford, Eckington, and Bredon, (at all of which places there are stations), into Gloucestershire, east of Tewkesbury. This line is 45 m. in length, with branches 8 m. The London and Birmingham railway crosses a small portion of the co. at its NE corner. A line runs from Worcester by Pershore, Evesham, and Banbury, to the London and Birmingham line.

Trade, Manufactures, &c. Besides the general county produce of corn, cattle, fine wool, hops, fruit, cider, and perry, the trade and manufactures of W. consist chiefly of carpets, &c., at Kidderminster; glass and iron at Dudley and Stourbridge; gloves, porcelain, iron, &c., at Worcester; bar, sheet, and other iron, to a great extent, in the villages near the river Stour; salt at Droitwich and Stoke Prior; and needles at Redditch.

Franchise and Government. Previous to the passing of the reform act, two members were returned to parliament for the co., two each for Worcester, Evesham, and Droitwich, and one for Bewdley. Under that act Droitwich was deprived of one member, and Kidderminster and Dudley were each authorized to return one; and the county four, two for the eastern division, who are polled for at Droitwich, Stourbridge, Pershore, and Shipston, the principal place of election being at Droitwich; and two for the western, who are polled for at Worcester, Upton, Tenbury, Bewdley, and Stourport, the principal place of election being at Worcester. The number of electors registered for the co. in 1837 was, for the eastern division, 5,995; for the western, 4,654. In 1852 the electors were 6,354 for the eastern division, and 4,102 for the western. This county is included in the Oxford circuit. The assizes and quarter-sessions are held at Worcester.—In ecclesiastical jurisdiction, this co. is in the archdeaconry and dio. of Worcester, and prov. of Canterbury. It includes the deaneries of Kidderminster, Droitwich, Wigborn, Powick, Pershore, and Evesham.

History and Antiquities. The principal military transactions connected with the history of this co. occurred, the first in the vale of Evesham, where fell Simon de Montfort, with many of his party, under the arms of Prince Edward, son of Henry III., in the barons' wars against that king; and the second at Worcester, in 1651, where Cromwell obtained what he called his crowning victory over the Scotch army, which had marched into England for the purpose of placing Charles II. on the throne. In the time of the Britons, Worcestershire was inhabited by the *Cornavii*; the Romans comprised it in the province of *Flavia Caesariensis*; and during the heptarchy it belonged to Mercia. There are traces here of the Ikniel-street and the Ridge-way. Upton and Worcester are supposed to have been Roman stations.

WORCHEN. See BORGO-DI-VAL-LUGANO.

WORDEL, a village of Prussia, in the regency of Marienwerder, and circle of Deutsch-Krone. Pop. 200.—Also a village of the same regency, in the circle of Flatow. Pop. 260.

WORDINGBORG, a town of Denmark, on the S coast of the island of Seeland. Pop. 1,500. It has manufactories of woollen fabrics.

WORDWELL, a parish in Suffolk, 6 m. W by N of Bury-St.-Edmunds. Area 2,299 acres. Pop. 56.

WORECH, a village of Austria, in Bohemia, in the regency of Prague, bail. of Simchow. Pop. 810.

WOREL, a village of Austria, in Bohemia, in the reg. of Parbutitz, and bail. of Chrudim. Pop. 590.

WORFELDEN, a village of Hesse, in the prov. of Starkenburg, presidial of Grossgerau. Pop. 460.

WORFIELD, a parish in Salop, 8¼ m. NE by E of Bridgnorth. Area 10,320 acres. Pop. 1,735.

WORININGEN (GROSS and KLEIN), two villages of Prussia, in the regency of Gumbinnen, and circle of Pilkallen, containing respectively 230 and 820 inhabitants.

WORITTEN, a village of Prussia, in the regency of Königsberg, and circle of Allenstein. Pop. 300.

WORKHEIM, a village of Prussia, in the reg. of Königsberg, and circle of Heilsberg. Pop. 280.

WORKINGTON, a parish, market-town, and sea-port, in Cumberland, 34 m. SW of Carlisle, at the mouth of the river Derwent, near the sea. The parish, besides the town of W., contains the chapel of Great Clifton, and the townships of Little Clifton, Stainburn, and Winscales. Area 8,310 acres. Pop. in 1831, 7,196; in 1851, 7,159. The town is situated on the S bank of the Derwent, which is here crossed by a handsome bridge, and from which it receives a good supply of water. The older part consists of narrow and irregular streets, but a few good streets have been formed of late years. In the vicinity are extensive coal mines, and the chief portion of the trade consists in the exportation of their produce to Ireland and other places. Shipbuilding and manufactures of ropes, cables, and other articles in connection with shipping, are carried on.

WORKSALL, or **WORSALL** (HIGH), a township and chapelry in the p. of Northallerton, Yorkshire, 4 m. SW of Yarm. Area 1,511 acres. Pop. 130.

WORKSALL, or **WORSALL** (LOW), a township in the p. of Kirkclevington, Yorkshire, 8 m. SW of Yarm. Area 1,812 acres. Pop. in 1851, 171.

WORKSOP, a parish and market-town in the co. of Nottingham, 10 m. E of the Eckington station, on the North Midland railway, and intersected by the Chesterfield canal. It contains, besides the town of W., the chapelries of Scofton and Shireoaks, and the hamlets of Gateford, Kilton, Osberton, Radford, Ratcliffe, Ryton, and Sloswicks. Area 18,220 acres. Pop. in 1831, 5,566; in 1851, 7,215. The church, which formed the western part of the church of an ancient priory, is one of the most perfect specimens of the Anglo-Norman style in England. It has two beautiful towers, one of which was formerly the great central tower of the pile. The situation of the town is in a valley at the N extremity of Sherwood forest, near the source of the river Ryton. The principal street is of considerable length, and is crossed by another of smaller dimensions, both consisting of good houses. The principal trade is in malt, which is chiefly sent to Manchester by the Chesterfield canal. The vicinity is covered with wood, and is, in general, picturesque: there are several handsome seats belonging to the nobility, on account of which the vicinity of W. is well known under the cognomen of 'the Dukery.' Among these splendid seats are Clumber, the residence of the Duke of Newcastle; Welbeck abbey, that of the Duke of Portland; and Thoresby, that of Earl Manvers.

WORKUM, a town of Holland, in the prov. of Friesland, arrond. and 11 m. WSW of Sneek, and about ½ of a m. from the Zuider-Zee. Pop. 3,000. It has a harbour and considerable fisheries.

WORKUM, or **WONDRICHEM**, a fortified town of Holland, in the prov. of North Brabant, arrond. and 18 m. NW of Bois-le-Duc, on the l. bank of the Maas, opposite the confluence of the Whaal. Pop. 1,000.

WORLABY, or **WORLETSBY**, a parish in Lincolnshire, $\frac{5}{8}$ m. N by E of Glandford-bridge. Area 8,210 acres. Pop. in 1831, 809; in 1851, 500.

WORLDHAM (East), a parish in the co. of Southampton, $\frac{3}{4}$ m. E by S of Alton. Area 1,687 acres. Pop. in 1831, 212; in 1851, 258.

WORLDHAM (West), a parish in the co. of Southampton, $\frac{3}{4}$ m. SE by E of Alton. Area 447 acres. Pop. in 1831, 96; in 1851, 98.

WORLE, a parish in the county of Somerset, 8 m. NW of Axbridge, in the line of the Bristol and Exeter railway. Area 1,810 acres. Pop. 960.

WORLESTON, a township in the p. of Acton, co.-palatine of Chester, $\frac{1}{2}$ m. N of Nantwich, in the line of the Chester and Crewe railway. Area 1,122 acres. Pop. in 1831, 867; in 1851, 837.

WORLINGHAM, a parish in Suffolk, 2 m. ESE of Beccles, on the navigable river Waveney. Area 1,631 acres. Pop. in 1831, 202; in 1851, 174.

WORLINGTON, a parish in Suffolk, 1 m. WSW of Mildenhall, on the navigable river Lark, over which there is here a ferry. Area 2,080 acres. Pop. in 1831, 868; in 1851, 894.

WORLINGTON (East), a parish in Devonshire, 6 m. E of Chumleigh. Area 2,363 acres. Pop. in 1831, 292; in 1851, 277.

WORLINGTON (West), a parish in Devonshire, $\frac{5}{8}$ m. E of Chumleigh. Area 2,683 acres. Pop. in 1831, 187; in 1851, 229.

WORLINGWORTH, a parish in Suffolk, 5 m. NW of Framlingham. Area 2,446 acres. Pop. 811.

WORLITSCHKA, a village of Austria, in Bohemia, in the regency of Pardubitz, and bail. of Landskron, at the confluence of the Adler and Buchberges. Pop. 1,300.

WORLITZ, a town of the duchy of Anhalt-Des-sau, in the bail. of Orienbaum, $\frac{1}{2}$ m. from the l. bank of the Elbe, and on the S side of a lake of the same name. Pop. 1,895. It is well-built, and has several breweries, and in the vicinity is a ducal castle and park, reputed the finest in Germany.

WORLOW, a village of Austria, in Bohemia, in the reg. of Pardubitz, and bail. of Lietomisahl. Pop. 200.

WORM, a village of Prussia, in the regency and circle of Aachen. Pop. 300.

WORMBERG, a summit of the Harz mountains, on the confines of the duchy of Brunswick, which has an alt. of 2,880 ft. above sea-level.

WORMBRIDGE, a parish in Herefordshire, 9 m. SW of Hereford, in the line of the Abergavenny and Hereford railroad. Area 720 acres. Pop. 91.

WORMDILT, or **ORNETA**, a town of Prussia, in the regency and 47 m. SSW of Königsberg, and circle of Braunsberg, on the Dreweion. Pop. 3,630. It has a castle, two suburbs, and two hospitals, and possesses manufactories of cloth and gloves, and tanneries. This town was founded in 1816.

WORMELDANGE, or **WORMELDINGEN**, a village of Holland, in the prov. and 10 m. E of Luxemburg, and cant. of Grevenmachern, on the l. bank of the Moselle. Pop. 1,510.

WORMELN, a village of Prussia, in the reg. of Minden, and circle of Warburg. Pop. 435.

WORMENHALL, or **WORMINGHALL**, a parish in Buckinghamshire, 12 m. WSW of Aylesbury. It includes the hamlet of Thumley in the county of Oxford. Area 1,469 acres. Pop. in 1851, 840.

WORMER, a village of Holland, in the prov. of North Holland, and bail. of Hoorn, 9 m. N of Amsterdam. Pop. 1,310.

WORMERSDORF, a village of Prussia, in the reg. of Cologne, and circle of Rheinbach. Pop. 268.

WORMGAY, or **WERNEGAY**, a parish in Norfolk,

$7\frac{1}{2}$ m. NNE of Downham-Market. Area 2,788 acres. Pop. in 1831, 323; in 1851, 440.

WORMHILL, a chapelry in the p. of Tideswell, co. of Derby, $\frac{3}{4}$ m. WSW of Tideswell, on the river Wye, amidst picturesque scenery. Pop. 869.

WORMHOUDT, a canton, commune, and market-town of France, in the dep. of the Nord, and arrond. of Dunkerque. The cant. comprises 10 com. Pop. in 1831, 15,842; in 1846, 15,730. The town is 16 m. SSE of Dunkerque, on the Penne. Pop. in 1846, 8,991. It has several breweries, a wax-work, an oil-mill, tanneries, and brick-kilns.

WORMINGFORD, a parish in Essex, $\frac{3}{4}$ m. WSW of Nayland, on the navigable river Stour. Area 2,331 acres. Pop. in 1851, 535.

WORMINGTON (Little), a parish in the co. of Gloucester, 5 m. N by E of Winchcombe. Area 560 acres. Pop. in 1831, 97; in 1851, 62.

WORMLAG, a village of Prussia, in the reg. of Frankfort, and circle of Kalan. Pop. 322.

WORM LAKE, or **BAHA-EL-DUP**, a small lake of Fezzan, in Central Africa, in N lat. $26^{\circ} 42' 0''$, E long. $0^{\circ} 54' 57''$, according to Dr. Vogel. It is one of the Trona lakes, as they are called, a small group scattered around a labyrinth of sand hills, valleys, and precipices, along the N side of the Wadi-Shergi and the Wadi-Gharbi. Its waters, which are of a dark colour, of from 18 to 24 ft. deep, abound in a species of worm called *dud*.

WORMLEIGHTON, a parish in Warwickshire, 8 m. E by N of Kingston, crossed by the Oxford canal. Area 2,320 acres. Pop. in 1851, 194.

WORMLEY, a parish in Hertfordshire, $\frac{3}{4}$ m. N by E of Cheshunt, crossed by the New river, bounded on the E by the river Lea, and intersected by the Northern and Eastern railway. Area 940 acres. Pop. in 1831, 471; in 1851, 511.

WORMS, a city of Hesse-Darmstadt, in the prov. of Rheinhessen, on the l. bank of the Rhine, a few hundred yards from the river, and 26 m. SSE of Mainz. The streets are dark and narrow, and the old massive walls, by which it is surrounded, are in a dilapidated state. The cathedral is a ponderous Gothic building, with a magnificent portal. The other public buildings are the mint, the town-house, in which Luther appeared before the diet in 1521, Trinity church, and two synagogues. The population is said to have been formerly considerable; but the city having been laid waste by the French in the general devastation of the palatinate in 1689, part of the inhabitants retired to Frankfort-on-the-Maine, or to Holland; and many of the houses were never rebuilt, the ground belonging to them being laid out in gardens. The present pop. is about 9,500, chiefly Lutherans. The manufactures are leather, tobacco, and lacquered ware. The environs are fertile. The title of the town to historic notice, arises from its having been frequently the seat of the diet of the empire. Few places have suffered more from war and other calamities. So early as 407 W. was ravaged by the Vandals; in 451, and 538, by the Huns. It has suffered also by fires; and on one or two occasions, by earthquakes. The former bishopric of this name comprised a territory in the W of Germany, of the extent of 170 sq. m., with 18,000 inhabitants. It was divided into two parts by the Rhine; and, at the peace of Lunenburg in 1801, the portion to the W of that river was ceded to France, while that to the E was given to Hesse-Darmstadt. At present, the whole belongs to the latter state.

WORMSDORF, a village of Prussia, in the regency of Magdeburg, and circle of Neuhaldensleben. Pop. 545.

WORMSER-JOCH. See **STILFNER-JOCH**.

WORMSFELD, a village of Prussia, in the reg. of Frankfurt, and circle of Landsberg. Pop. 362.

WORMSHILL, or **WORMSELL**, a parish in Kent, 5 m. SSW of Sittingbourne. Area 1,467 acres. Pop. in 1831, 186; in 1861, 209.

WORMSLEY, a parish in Herefordshire, $8\frac{1}{2}$ m. SE by S of Weobly. Area 1,293 acres. Pop. in 1831, 102; in 1851, 125.

WORMSTEDT, a village of Saxe-Weimar, in the prov. of Weimar, and bail. of Dornburg. Pop. 400.

WORMZE, a village of North West Africa, in Sudan, in the Fellatah state, to the SE of Saocatu.

WORNITZ. See **WERNITZ**.

WORNSDORF, a village of Baden, in the circle of the See, and bail. of Stockach. Pop. 389.

WORONETSCH. See **VORONETZ**.

WORONETZ, a village of Galicia, in the circle and 54 m. from Tschernowitz, near the r. bank of the Moldawa. It is noted for its manufacture of pottery.

WORPLACK, a village of Prussia, in the reg. of Königsberg, and circle of Ressel. Pop. 200.

WORPLESDON, a parish in Surrey, $8\frac{1}{2}$ m. NNW of Guildford. It contains the tythings of Bingham, Perry-hill, Westend, and Wyke. Area 7,140 acres. Pop. in 1831, 1,860; in 1851, 1,549.

WORPSWEDE, a village of Hanover, in the gov. of Stade, and principality of Bremen, near Osterholz. Pop. 461.

WORRINGEN, a town of Prussia, in the prov. of the Rhine, regency and 9 m. NNW of Cologne, on the l. bank of the Rhine. Pop. 1,415. It has several breweries, and distilleries of brandy.

WORSBOROUGH, a chapelry in the p. of Darfield, Yorkshire, $2\frac{1}{2}$ m. S by E of Barnesley, and connected with the Barnesley and Dearne and Dove canals, by a branch in Worsborough-dale. Area 3,594 acres. Pop. in 1831, 2,677; in 1851, 4,250.

WORSLEY, a township in the p. of Eccles, co. palatine of Lancaster, $5\frac{1}{2}$ m. SSE of Great Bolton, intersected by the Wigan and Leigh canal, and near the Liverpool and Manchester railway. Area 6,240 acres. Pop. in 1801, 5,061; in 1831, 7,839; in 1851, 10,189. Here are extensive coal-mines, and subterranean canals formed by the late duke of Bridgewater. The Bridgewater canal was one of the earliest of our inland navigations, and was formed soon after the construction of the Sankey canal. The first portion of this great work, the Manchester and Worsley branch, was commenced in 1758, and completed in 1762; but the plan of a canal was first conceived early in the 18th century by Sir Wm. Egerton. In 1737 an act of parliament was obtained for rendering Worsley brook navigable, but was never carried into execution. The act which was destined to be worked out was passed in 1758, and the scheme included about 30 m. of underground tunnelling, connecting together the extensive collieries of Worsley. The other portions of the canal—those to Runcorn and Preston Brook—were subsequently grafted upon the Manchester and Worsley. So highly successful was the undertaking, that at the death of the duke, in 1803, it is said to have been realising a profit of £50,000 to £80,000 a-year. The mouths of the colliery tunnels at W. form a singular feature in the landscape. They are low, dark, cavernous openings, only constructed for very small boats, which, when loaded, sink almost to the water's edge. The whole length of the tunnels is about 14 m.—the canals being upon two levels. "The first level strikes into the solid rock at W., and follows the higher seam of coal: in other words, the miners, in getting the coal from this field, take out a portion in the form of a canal, so that wherever they go the water follows them, and they are enabled to load

directly into the boats. The level of the water in this subterranean canal is a little higher than the level of the canal outside, and the water is held up into it during the day by sluices at the mouth of the tunnel. When the miners have completed their toil in the evening, the boats they have filled during the day, holding about 10 tons each, and chained together, are carried out with the current created by raising the sluice at the mouth of the tunnel, so as to let the surface of the subterranean canal find its level. The floating of the coal out of the mines is thus performed at little or no cost beyond the first outlay. The sluices of the subterranean canals are closed again every morning, and the water constantly filtering through the earth and accumulating in the mines is sufficient to raise the level of the water so as again to float out the coal boats. These underground canals thus drain the workings to some extent, whilst they supply cheap water carriage. Another bed of coals, lying at a depth of 60 yds. below this, has a similar subterranean canal, but it has no outlet, and merely floats the boats to a shaft, whence they are lifted by steam to the canal previously mentioned, on the upper level. The total craft employed upon the navigation (including 10 steamers on the Mersey, connecting the canal at Runcorn with Liverpool) are 497 in number. Eleven of these are passenger packets, known by the name of 'swift boats,' and are each drawn by a pair of horses at a speed of eight miles per hour. The number of workmen in the employ of the earl, including colliers, is not far short of 5,000."

WORSSTADT, a town of the grand-duchy of Hesse-Darmstadt, and prov. of the Rhine, 14 m. SSW of Mayence. Pop. 1,500. It has a castle and an hospital, and carries on an active trade in cattle.

WORSTEAD, a parish in Norfolk, 4 m. SSE of North Walsham. Area 2,603 acres. Pop. in 1831, 830; in 1851, 827. The village of W. was formerly a market-town, and had extensive manufactures of worsteds, which indeed took their name from it, [see article **NOAWICH**,] but neither market nor manufactures now exist.

WORTHORN, a township in the p. of Whalley, co. palatine of Lancaster, 2 m. E of Burnley. Area 2,800 acres. Pop. in 1831, 798; in 1851, 909.

WORSTON, a township in the p. of Whalley, co. palatine of Lancaster, 1 m. NE of Clitheroe. Area 860 acres. Pop. in 1831, 129; in 1851, 89.

WORTEGHEM, a department and commune of Belgium, in the prov. of Antwerp, and arrond. of Oudenarde. Pop. 3,142. The village is 5 m. WNW of Oudenarde. Pop. 707.

WORTEL, a department and commune of Belgium, in the prov. of Antwerp, and arrond. of Turnhout. Pop. 702. The village is 26 m. NE of Antwerp, on the r. bank of the Merck. In the vicinity is Champ Frederich, a colony founded in 1822 for the repression of mendicity.

WORTELSTETTEN, a village of Bavaria, in Swabia, in the presidial of Wertingen. Pop. 407.

WORTH, a county in the N part of the state of Iowa, U. S., comprising an area of 432 sq. m., drained by English river and Lime creek. It has a generally level surface, and contains several large lakes.—Also a township of Tuscola co., in the state of Michigan, 77 m. NE of Lansing. Pop. 600.

WORTH, a township in the p. of Prestbury, co. palatine of Chester, 6 m. SE of Stockport. Area 450 acres. Pop. in 1831, 490; in 1851, 885.—Also a parish in Sussex. Area 13,250 acres. Pop. in 1831, 1,859; in 1851, 2,475.

WORTH, or **WORD**, a parish in Kent, $1\frac{1}{2}$ m. S of Sandwich. Area 7,431 acres. Pop. in 1851, 471.

WORTH, or **WORHD**, a town of Bavaria, in the

circle of Middle Franconia, near Nuremberg. Pop. 2,243. It has manufactories of cloth, chemical substances, and paper.

WORTH-MATRAVERS, a parish in Dorset, $3\frac{1}{2}$ m. SSE of Corfe-Castle. Area 2,645 acres. Pop. in 1831, 856; in 1851, 896.

WORTHAM, a parish in Suffolk, $5\frac{1}{2}$ m. NW of Eye. Area 2,736 acres. Pop. in 1851, 1,086.

WORTHEN, a parish, and formerly a market-town, chiefly in the co. of Salop, but extending into the adjoining co. of Montgomery, 9 m. NE of the town of Montgomery. The parish includes Bing-Weston, Bromblow, Upper-Heath, and Worthen, quarters, also Aston-Pigott, Aston-Rogers, Beachfield, Brockton, Habberley, Netherheath, and Walton with Rewins-Farm. Area 4,227 acres. Pop. in 1831, 2,290; in 1851, 3,325. Lead-mines were wrought here to a considerable extent in the reign of Adrian. A curious line of stones here is supposed to have been the ancient boundary between England and Wales.

WORTHENBURY, a parish in Flint, 8 m. N of Ellesmere, on the river Dee. Area 3,279 acres. Pop. in 1831, 623; in 1851, 543.

WORTHING, a parish in Norfolk, 4 m. N by E of East Dereham. Area 690 acres. Pop. in 1831, 138; in 1851, 170.—Also a sea-port and chapelry in the p. of Broadwater, 20 m. E by S of Chichester. This town has risen from a poor fishing village to be a well-frequented watering-place. The lodging-houses and inns are of the best description, and the streets are well-paved and lighted. Pop. 5,370. The inhabitants are extensively employed in the herring and mackerel fisheries.

WORTHINGTON, a township in the p. of Standish, co.-palatine of Lancaster, $3\frac{1}{2}$ m. N by W of Wigan, in the line of the Leeds and Liverpool canal, and the North Union railway. Area 657 acres. Pop. in 1831, 124; in 1851, 176.—Also a chapelry in the p. of Breedon-on-the-hill, co. of Leicester, $4\frac{1}{2}$ m. NE of Ashby-de-la-Zouch, with which, and with the Swannington and Leicester railway, it is connected by a branch line of railway. Pop. with the liberty of Newbold, in 1801, 1,096; in 1831, 1,211; in 1851, 1,203.

WORTHINGTON, a township of Hampshire co., in the state of Massachusetts, U. S., 17 m. WNW of Northampton. It has a finely diversified surface, and is drained by Westfield river and its branches. Pop. in 1840, 1,197; in 1850, 1,184.—Also a village of Sharon township, Franklin co., in the state of Ohio, on the E side of Olontangy river, 9 m. N by W of Columbus, and intersected by the Cleveland, Columbus, and Cincinnati railroad. Pop. in 1840, 440; in 1850, 501.—Also a village of Armstrong co., in the state of Pennsylvania, 145 m. WNW of Harrisburg. It has a large charcoal hot-blast furnace.—Also a township of Richland co., in the state of Ohio. Pop. in 1840, 1,842.

WORTHY (Kine's), a parish in the co. of Southampton, $2\frac{1}{2}$ m. NNE of Winchester, in the line of the Southampton railway. Area 2,216 acres. Pop., with the tything of Abbots-Worthy, in 1801, 161; in 1831, 345; in 1851, 382.

WORTHY (MARTY), a parish in the co. of Southampton, 3 m. NE by N of Winchester. It includes the hamlet of Chilland. Area 1,800 acres. Pop. in 1831, 219; in 1851, 193.

WORTING, a parish in the co. of Southampton, 2 m. W of Basingstoke, in the line of the Southampton railway. Area 1,139 acres. Pop. in 1851, 158.

WORTLEY, a township and chapelry in the p. of St. Peter, Yorkshire, $2\frac{1}{2}$ m. WSW of Leeds. Area 1,036 acres. Pop. in 1801, 1,995; in 1831, 5,944; in 1851, 7,896. The inhabitants are extensively

employed in the woollen manufacture of the Leeds district. Here also coarse earthenware and tobacco pipes are made from clay found in the neighbourhood.—Also a chapelry in the p. of Tankersley, Yorkshire, $5\frac{1}{2}$ m. SSW of Barnsley, in the line of the Manchester and Sheffield railway. Area 5,964 acres. Pop. in 1831, 918; in 1851, 1,095.

WORTON, a tything in the p. of Potterne, Wilts, $3\frac{1}{2}$ m. SW of Devizes. Pop. in 1851, 349.

WORTON (NETHER), a parish in the co. of Oxford, 3 m. SW of Deddington. Area 790 acres. Pop. in 1831, 84; in 1851, 62.

WORTON (OVER), a parish in Oxford, 4 m. SW by S of Deddington. Area 623 acres. Pop. 85.

WORTOWA, a village of Austria, in Bohemia, in the regency of Pardubitz, and bail. of Hohenmauth. Pop. 280.

WORTWELL, a hamlet in the p. of Reddenhall, Norfolk, 6 m. SW of Bungay, on the Waveney. Pop. in 1831, 537; in 1851, 541.

WOSANT, a village of Austria, in Bohemia, in the regency of Eger, bail. of Tachau. Pop. 280.

WOSCHITZ (JUNE), a town of Austria, in Bohemia, in the regency of Budweis, and bail. of Tabor. Pop. 1,800. It has a castle belonging to the counts of Khuenburg, an Armenian institute, an hospital, and a paper-mill. In the vicinity is the village of Alt-Woschitz.

WOSCHNICK, a market-town of Prussia, in the regency of Oppeln, and circle of Lublinitz. Pop. 1,000. It has a castle.

WOSCHTSCHUTZ, a village of Prussia, in the regency of Oppeln, and circle of Pless. Pop. 407. It has an iron-work.

WOSCZELLEN, a village of Prussia, in the regency of Gumbinnen, and circle of Lyk. Pop. 240.

WOSEHNO, a village of Austria, in Bohemia, in the regency and bail. of Budweis. Pop. 260.

WOSEK, a village of Austria, in Bohemia, in the regency of Budweis, and bail. of Mühlhausen. Pop. 330.—Also a village of the regency of Gitschin, and bail. of Podiebrad. Pop. 260.—Also a village of the same regency, in the bail. of Gitschin. Pop. 260.—Also a village of the regency of Pardubitz, and bail. of Neu-Colin.—Also a village of the regency of Pilsen, and bail. of Przesitz. Pop. 200.—Also a village of the same regency, in the bail. of Rokitzan. Pop. 1,000. It has a synagogue, and possesses several iron-works.—Also a village of the same regency, in the bail. of Strakonitz. Pop. 400. It possesses a castle and a synagogue, and has manufactories of potash.

WOLELEK, a village of Austria, in Bohemia, in the regency of Pilsen, and bail. of Horasdiowitz. Pop. 500.

WOSERIN, a village of Mecklenburg-Schwerin, in the prov. of Mecklenburg, and bail. of Sternberg. Pop. 200.

WOSH, **WEDGE**, or **WIJH**, a small creek on the E coast of the Red sea, in N lat. $26^{\circ} 13'$, E long. $36^{\circ} 32'$, having a shallow natural anchorage, with an entrance 250 yds. wide. There is a village or collection of huts upon an elevated rock on the N side of the creek, distant about 5 m. from an inland fort of the same name, which has a garrison of 25 men, and is used as a depot for grain for the supply of the caravans going to Mecca.

WOSISCHEK, a village of Austria, in Bohemia, in the regency and bail. of Pardubitz. Pop. 300.

WOSITZ, a village of Austria, in Bohemia, in the regency and bail. of Pardubitz. Pop. 370.

WOSKORINEK, a village of Austria, in Bohemia, in the regency of Gitschin, and bail. of Nimburg. Pop. 800.

WOSKRESENSKOE, a village of Russia in Europe, in the gov. of Moscow. Pop. 1,100.

WOSLAWITZ, a village of Austria, in Moravia, in the circle of Iglau, and seignory of Meseritsch. Pop. 340.

WOSLOW, a village of Austria, in Bohemia, in the regency of Pilsen, and bail. of Pisek. Pop. 410.

WOSNESSENSK, a market-town of Russia in Europe, in the gov. of Kherson. Pop. 1,000.

WOSNITZ, a village of Austria, in Bohemia, in the regency of Gitschin, and bail. of Königgrätz. Pop. 240.

WOSPORK. See WRISENBERG.

WOSSARKEN, a village of Prussia, in the regency of Marienwerder, and circle of Graudenz. Pop. 250.

WOSSIDEN, a village of Prussia, in the regency of Königsberg, and circle of Heilsberg. Pop. 200.

WOSSIK, a village of Austria, in Bohemia, in the regency of Eger, circle of Klattau, and seignory of Lukawitz. Pop. 230.

WOSSINGEN, a town of the grand-duchy of Baden, in the circle of the Middle Rhine, and bail. of Stein, 11 m. E. of Carlsruhe. Pop. 1,800. It has a castle and two churches.

WOSSITZ, a village of Prussia, in the regency and circle of Danzig. Pop. 335.

WOSTEGKOWITZ, a village of Austria, in Moravia, in the circle of Znaim, and seignory of Jamnitz. Pop. 800.

WOSTITZ, or WASATICE, a market-town of Austria, in Moravia, in the circle and 18 m. SSW of Brunn, between two small lakes. Pop. 1,100.

WOSTRATSCHIN, a village of Austria, in Bohemia, in the regency of Pilsen, and bail. of Bischofteinitz. Pop. 550. It has a castle.

WOSTREDEK, a village of Austria, in Bohemia, in the regency of Budweis, and bail. of Beneschau. Pop. 460. It has a castle.

WOSTRETIN, a village of Austria, in Bohemia, in the regency and bail. of Pardubitz. Pop. 800.

WOSTROMUR, a village of Austria, in Bohemia, in the regency of Gitschin, and bail. of Horzitz. Pop. 550.

WOSTROW, a village of Austria, in Bohemia, in the regency of Pardubitz, and bail. of Hohenmauth. Pop. 800.—Also a village of the same regency, in the bail. of Leditsch. Pop. 440. It has a castle and manufactories of potash.—Also a village of the regency of Budweis, and bail. of Beneschau. Pop. 240.—Also a village of the regency of Pilsen, and bail. of Brzesnitz. Pop. 250.

WOSTROWETZ, a village of Austria, in Bohemia, in the reg. of Pilsen, bail. of Pisek. Pop. 800.

WOSTRUZNO, a village of Austria, in Bohemia, in the regency and bail. of Gitschin. Pop. 800.

WOTAWA, a river of Austria, in Bohemia, in the circle of Prachin, which has its source on the NE side of the Bohmerwald; flows first NE, then E, and afterwards NE; and after a total course of 75 m., joins the Moldau on the l. bank. Schüllenhofen, Horazdowitz, Strakonitz, and Pisek, are the principal places on its banks.

WOTENIK, a village of Prussia, in the regency of Stralsund, and circle of Grimmen, on the Tribel. Pop. 820.

WOTENITZER, a village of Mecklenburg-Schwerin, in the prov. of Mecklenburg, and bail. of Grerismühlen. Pop. 220.

WOTERSIN, a village of Mecklenburg-Strelitz, and regency of Ratzeburg. Pop. 640.

WOTITZ, a town of Austria, in Bohemia, in the regency of Budweis. Pop. 2,000. It has a castle.

WOTRUB, a village of Austria, in Bohemia, in the reg. of Pardubitz, bail. of Ledetsch. Pop. 210.

WOTSCH, a village of Austria, in Bohemia, in the regency of Eger, and bail. of Saatz. Pop. 220.

WOTTON-COURTNEY, a parish in Somersetshire, 4 m. W of Dunster. Area 3,145 acres. Pop. in 1831, 426; in 1851, 411.

WOTTON-FITZ-PAINE, a parish in Dorset, 4½ m. NNE of Lyme-Regis. Area 1,679 acres. Pop. in 1831, 455; in 1851, 361.

WOTTON-UNDER-EDGE, a parish and market-town in the co. of Gloucester, 19 m. S by W of Gloucester. Besides the town of W., this p. contains the tythings of Huntingford, Sinwell with Bradley, Symond's-hall with Combe, and Wortley. Area 4,880 acres. Pop. in 1831, 5,482; in 1851, 4,224. The town was burned in the reign of John, and the ancient site is called 'the Brands.' The present town stands on a rising ground, and consists of two parallel streets, containing some neat houses.

WOTTON-UNDERWOOD, a parish in Bucks. Area 3,220 acres. Pop. in 1851, 253.

WOTUNDO, or ARUNDO, a river of Zanguebar, which throws itself by two embouchures into the Indian ocean, opposite the island of Zanzibar.

WOTWOWITZ, a village of Austria, in Bohemia, in the reg. of Prague, bail. of Wolwarn. Pop. 660.

WOTZLAF, a village of Prussia, in the regency and circle of Danzig. Pop. 850.

WOUBRECHTEGEM, a department and commune of Belgium, in the prov. of East Flanders, and arrond. of Audenarde. Pop. 2,800.

WOUBRUGGE, a village of Belgic Holland, in South Holland. Pop. 1,168.

WOUDSEND, a village of Holland, in the prov. of Friesland, to the N of Slooten.

WOUGHTON-ON-THE-GREEN, a parish in Bucks, 2½ m. N by W. of Fenny-Stratford, on the river Ouse, and crossed by the Grand Junction canal. Area 890 acres. Pop. in 1831, 803; in 1851, 833.

WOULDHAM, a parish in Kent, 3 m. SW of Rochester, on the river Medway. Area 612 acres. Pop. in 1831, 411; in 1851, 343.

WOUMEN, a department and com. of Belgium, in the prov. of West Flanders, and arrond. of Furnes, watered by the Canal-de-l'Yser. Pop. 2,330.

WOUTSCHUA, a village of Austria, in Styria, in the circle of Cilly. Pop. 538.

WOUW, a village of Holland, in the prov. of North Brabant, to the N of Bergen-op-Zoom. Pop. 2,600.

WRASCHKOW, a village of Austria, in Bohemia, in the reg. of Prague, and bail. of Melnik.

WRATH (CAPE), a celebrated head-land, in the parish of Durness in Sutherlandshire, forming the NW point of Scotland, in $58^{\circ} 87' N$ lat., and $5^{\circ} W$ long. It is a fine promontory of granitic gneiss, towering up in a pyramidal form to the height of 300 ft., and standing boldly out into the waves.

"Nothing," says Macculloch, "can exceed the elegance and majesty of its form, declining towards the sea in a second and much lower pyramidal rock; the whole forming an outline as graceful as it is unexpected, and as grand as it is appropriate. No vessels approach this shore, as the rapidity and turbulence of the tide are extreme; and as this is esteemed both a difficult and a dangerous point to double." In 1828, a lighthouse was erected here at an expense of £14,000. It shows a white revolving light, which is elevated 400 ft. above high water, and is seen at the distance of 24 m. in clear weather. The Butt of Lewis on the SW, and the Hoyhead of Orkney towards the NE, can be seen in clear weather from the top of this lighthouse.

WRATISCHOW, a village of Austria, in Bohemia, in the regency of Budweis, and bail. of Pilgram. Pop. 280.

WRATKO, a village of Austria, in Bohemia, in the regency of Pardubitz, and bail. of Schwarzkostelez. Pop. 250.
